Angels appear to man as the medium of God's power and will and to execute His dispensations. Angels reveal themselves to individuals as well as to the whole nation, in order to announce events, either good or bad, affecting them. Angels foretell to Abraham the birth of Isaac, to Manoah the birth of Samson, and to Abraham the destruction of Sodom. Guardian angels are mentioned, but not, as was later the case, as guardian spirits of individuals and nations. God sends an angel to protect the people after their exodus from Egypt, to lead them to the promised land, and to destroy the hostile tribes in their way (Ex. xxiii. 20, Num. xx. 16). In Judges (ii. 1) an angel of the Lord—unless here and in the preceding instances (compare Isa. xlii. 19, Hag. i. 13, Mal. iii. 1) a human messenger of God is meant—addresses the whole people, swearing to bring them to the promised land. An angel brings Elijah meat and drink (I Kings, xix. 5); and as God watched over Jacob, so is every pious person protected by an angel that cares for him in all his ways (Ps. xxxiv. 7, xci. 11). There are angels militant, one of whom smites in one night the whole Assyrian army of 185,000 men (II Kings, xix. 35); messengers go forth from God "in ships to make the careless Ethiopians afraid" (Ezek. xxx. 9); the enemy is scattered before the angel like chaff (Ps. xxxv. 5, 6). Avenging angels are mentioned, such as the one in II Sam. xxiv. 15, who annihilates thousands. It would seem that the pestilence was personified, and that the "evil angels" mentioned in Ps. lxxviii. 49 are to be regarded as personifications of this kind. "Evil" is here to be taken in the causative sense, as "producing evil"; for, as stated above, angels are generally considered to be by nature beneficent to man. They glorify God, whence the term "glorifying angels" (Ps. xxix. 1, ciii. 20, cxlviii. 2; compare Isa. vi. 2 *et seq.*). They constitute God's court, sitting in council with him (I Kings, xxii. 19; Job, i. 6, ii. 1); hence they are called His "council of the holy ones" (Ps. lxxxix. 7, R. V.; A. V. "assembly of the saints"). They accompany God as His attendants when He appears to man (Deut. xxxiii. 2; Job, xxxviii. 7). This conception was developed after the Exile; and in Zechariah angels of various shapes are delegated "to walk to and fro through the earth" in order to find out and report what happens (Zech. vi. 7). In the prophetic books angels also appear as representatives of the prophetic spirit, and bring to the prophets God's word. Thus the prophet Haggai was called God's messenger (angel); and it is known that "Malachi" is not a real name, but means "messenger" or "angel." It is noteworthy that in I Kings, xiii. 18, an angel brings the divine word to the prophet.

Upon the important problem of the origin of angels Biblical writers do not touch; but it is inferred that angels existed before the Creation (Gen. i. 26; Job, xxxviii. 7). The earlier Biblical writings did not speculate about them; simply regarding them, in their relations to man, as God's agents. Consequently, they did not individualize or denominate them; and in Judges, xiii. 18, and Gen. xxxii. 30, the angels, when questioned, refuse to give their names. In Daniel, however, there already occur the names Michael and Gabriel. Michael is Israel's representative in heaven, where other nations—the Persians, for instance—were also represented by angelic princes. More than three hundred years before the Book of Daniel was written, Zechariah graded the angels according to their rank, but did not name them. The notion of the seven eyes (Zech. iii. 9, iv. 10) may have been affected by the representation of the seven archangels and also possibly by the Parsee seven amshaspands (compare Ezek. ix. 2).

2. Talmudical and Midrashic Literature: The writer of the Book of Daniel was the first by whom angels were individualized and endowed with names and titles. Not long after that time Essenism came into existence. It possessed a highly developed Angelology; but knowledge of the system was confined to Essenes. The Sadducees, on the contrary, disputed the very existence of angels.

Development of Angelology.

Upon the foundations of Scripture a gigantic structure was reared at the time of the completion of the Talmud. Post-Talmudic mysticism extravagantly enlarged this structure, until it reached from earth to heaven; and the fanciful ideas of the Apocrypha and pseudepigrapha, of the Talmudic and Midrashic works, and of the mystic and cabalistic literature rush along like a wild stream that overflows its banks. From this wealth of material the assumption may be drawn that the Angelology was not systematically organized. The Judaic intellect is little inclined to systematization; and a systematic Angelology was a matter of impossibility with the vast number of haggadists, who lived and taught at different times and places, and under a manifold variety of circumstances. In this regard it is difficult to distinguish between Palestinians and Babylonians, between the Tannaim and the Amoraim; for descriptions of heaven varied according to the exegetic needs of the homily and the social condition of the audience.

Following the Bible as a model, the Maccabean warriors invoked the angel that smote Sennacherib's army (I Macc. vii. 41; II Macc. xv. 22; Syriac Baruch Apocalypse, lxiii. 7; Book of Jubilees, xvii. 11, xxvii. 21 *et seq.*). But the scholars handled the material after their individual inclinations. It is impossible, in consequence, to fix the boundaries between the speculations of scholars and popular notions, between individual and general views, between transient and permanent ideas. On the whole, however, the dominant beliefs concerning Angelology may be gathered from the traditions that continued even after the extinction of the Essenes. If these traditions did not originate with the people, they were transmitted to them by the scholars, who were held in undisputed popular esteem; and they thus came to form part of the popular belief. Since the Bible was interpreted only in the light of tradition, haggadic teachings are quite as important for the understanding of the religion and its forms as is the Bible itself.

Embellishment of Biblical Accounts.

Not infrequently the ministration of angels is inferred in Biblical narratives when no mention is made of them. For instance, when God wishes to create man, the angels ask, "Wherefore dost Thou create him?" (Gen. R. viii. 5); Sarah is protected from Pharaoh by an angel holding a whip uplifted in his hand and making it dependent on Sarah whether he should use it or not (Gen. xii. 14 *et seq.*); five angels appear to Hagar; an angel leads Rebekah to the well (Gen. R. xli., near beginning, xlv., lix.); when Abraham is about to sacrifice Isaac, the angels intercede, protesting to the Lord that the intended act is unnatural (Bacher, "Ag. Pal. Amor." iii. 29); angels transfer the animals of Laban's flock to that of Jacob (Gen. R. lxxiii., near end); in Gen. xxxi. 8 an angel speaks to Jacob (Tan. ed. Buber, Wayeẓe, 24); Jacob employs some of the angels who meet him as messengers to Esau (Gen. xxxii. 4, Gen. R. lxxv.); when Joseph seeks his brethren (Gen. xxxvii. 15 *et seq.*) three angels meet him (Gen. R. lxxv.); angels gather together the sons of Jacob (Gen. xlix. 2; Gen. R. xcviii., near beginning); an angel speaks out of the mouth of Balaam and compels him to pronounce a blessing (Sanh. 105*b*); the ministering angels wait on Ehud (Judges, iii. 23) in order to assist him (Gen. R. xcviii.); and an angel causes weapons to be found for Saul and Jonathan (I Sam. xiii. 22).

The rabbis most frequently give angelological embellishments to the story of Esther; thus transforming the plain, straightforward account into a miraculous tale. Gabriel drastically prevents Queen Vashti from appearing before Ahasuerus and his guests, in order to bring about the election of Esther in her place; and when Esther appears in the court of the king's house (Esth. v. 1), three ministering angels hurry to her help: one raises her head; the second invests her with grace; and the third holds out to her the king's scepter. When Ahasuerus has the "book of records of the chronicles" read to him, it is found that Shimshai, the scribe (see Ezra, iv. 8), has stricken out the passage recording Mordecai's rescue of the king; but the angel Gabriel rewrites it. On Esther's complaint to Ahasuerus that she and her people have been sold, the king asks who has done this thing. Esther is about to point her finger to Ahasuerus, to designate him as the wrongdoer, when an angel turns her hand in the direction of Haman. Ahasuerus then goes out in wrath to the garden, and, seeing there men tearing up the trees, asks the reason for their action; they reply that Haman has commanded it. The men were angels, of course. Angels, too, throw Haman upon Esther's couch. Ahasuerus' statement that the Jews had "slain and destroyed five hundred men" (*ibid.* ix. 12) sounds like a reproach against the queen; but an angel, touching the king's mouth, causes his speech to end kindly (Meg. 15*b*, 16*a*, 16*b*). In two cases an angel strikes Nebuchadnezzar on the mouth: when he begins to praise God (Dan. iii. 33 [A. V. iv. 3]), so that he may not cast David's psalms into the background, and when he says of the form of one of the four men "walking in the midst of the fire" (*ibid.* iii. 25) that it is like the Son of God, the angel thereupon thunders, "Has God a Son?" (Sanh. 92*b*, below; Yer. Shab. vi., end).

There are many such examples in the Talmud of the addition of angels to the Biblical narrative which give the impression that angels are merely to voice men's opinions. Where there are possible objections to the act of divine justice, these are put into the mouth of the angels who represent God's council; and His reply to them is the justification of His doings. Many other haggadot in which God and angels converse are to be similarly construed as the figurative representation of differing opinions; and quite as often such intercourse between God and angels serves to present in a vivid and impressive form certain ethical doctrines—a fact which has been misunderstood and misconstrued by Weber ("Jüdische Theologie," 2d ed., pp. 176 *et seq.*, Leipsic, 1897).

Jewish tradition frequently gives distinct and unmistakable expression to God's sublime superiority over the angels. When, in order to remove the anthropomorphism from the Biblical passage, Ex. xxxiii. 20, "There shall no man see me and live" (וחי), Akiba interprets it, "Not even the holy ḥayyot who carry the throne of glory, see the glory itself," Simon improves upon this; saying, "Not even the ever-living ones, the angels" (Sifra, Lev. i. 1). God's dwelling-place is in the seventh heaven, next to which is the abode of the pious; and the angels rank after the latter (Ḥag. 12*b*; Midr. Teh. on Ps. xxi. 7; Weber, *ibid.* pp. 162 *et seq.*).

The dignity of the pious is greater than that of the angels (Sanh. 93*a*, top). "God is first praised by Ezekiel; then by the angels" (Gen. R. lxv.). Adam reclined in paradise; and the ministering angels roasted meat for him (Sanh. 59*b*). When Israel recited the Shema', the angels were silent till the end, and then sang their song of praise (Gen. R. lxv.). The angelic hosts praise God during the night; for during the day, when Israel's praise is heard, they are silent (Ḥag. 12*b*). The pious command the angels (Bacher, "Ag. Pal. Amor." ii. 262, note 6); angels are not allowed to condone sins (Midr. Teh. xvii. 2). When Rabbi Joshua discourses concerning the throne of God, the angels gather about him in curiosity (Ḥag. 14*b*). In the laudation of God, Israel is given precedence. Israel praises every day; angels praise but once (Midr. Teh. ciii., beginning; Ḥul. 91*b*, below).

Every man that does not practise magic enters a department of heaven to which even the ministering angels are not allowed access (Ned. 32*a*).

Nomenclature and Essence.

In addition to the Biblical name מלאך ("angel") the term העליונים ("the upper ones") often occurs in contrast with התחתונים ("the lower ones"). The former name designates them as inhabitants of heaven (Sanh. 20*b*, Ket. 104*a*, Midr. Teh. xxv. 14, etc.). By the creation of mankind God established peace between the upper ones and the lower ones (Lev. R. ix.). The upper household (פמליא של מעלה)—from *familia*, servants, meaning the angels forming the heavenly court—is often contrasted with Israel as God's servants on earth below (פמליא של מטה) (Ber. 17*a*; Sifre, Num. 42; Sanh. 98*b*, 99*b*; Ḥag. 13*b*, below). The angelic host is even called "exercitus" and "strateia"; and angels of the lowest rank are called "galearii" (army servants; Cant. R. viii. 13; Num. R. xii. 8; Pesiḳ. R. xv. 69*a*; Pesiḳ. v. 45*b*).

The essence of the angels is fire; they sustain themselves in fire; their fiery breath consumes men; and no man can endure the sound of their voices (Cant. R. v. 10; Pesiḳ. v. 57*a*; Ḥag. 14*b*, above; Shab. 88*b*, below; Tan., Yitro, xvi.). "The angel of the Lord" in Judges, ii. 1, was Phinehas, whose countenance, when the Holy Spirit rested upon it, glowed like a torch (Lev. R. i., beginning). To Joshua b. Hananiah the emperor Hadrian said: "You say that no portion of the heavenly hosts sings praise to the Lord twice, but that God daily hears new angels who sing his praise [based on Lam. iii. 23] and then go. Whither do they go?" Whereupon Joshua replied: "To the stream of fire whence they emanated" (Dan. vii. 10). H.: "What is the character of this stream?" J.: "It is like the Jordan, which ceases not to flow by day or by night." H.: "And whence comes the stream of fire?" J.: "From the sweat of the living creatures of God's chariot, which drops from them under the burden of God's throne" (Gen. R. lxxviii., beginning, and parallel passages; compare Bacher, "Ag. Tan." i. 178). Another theory is, that angels are half fire, half water, and that God makes peace between the opposing elements (Yer. R. H. ii. 58*a*). They feed on the rays of God's majesty, for "in the light of the king's countenance is life" (Prov. xvi. 15, Pesiḳ. vi. 57*a*).

A characteristic and well-known passage is the following:

> "In three respects demons resemble angels; in three others, mankind. Like the angels they have wings, they move from one end of the earth to the other, and are prescient. Like men they eat and drink, propagate themselves, and die. In three respects men resemble the angels; in three others, the animals. Like animals they eat and drink, propagate themselves, and discharge waste matter" (Ḥag. 16*a* and parallel passages).

In order that Moses might become like the angels, all food and drink had to be consumed in his entrails (Yoma, 4*b*). The angels that appeared to Abraham only pretended to eat (Targ. Yer. Gen. xviii. 8, and in the Midrash).

The angels are generally represented as good, and as not subject to evil impulses (Gen. R. xlviii. 11). Hence the Ten Commandments are not applicable to them (Shab. 88*b*); they are called "holy," while men require a twofold sanctification to merit the epithet (Lev. R. xxiv. 8). Having this character, they show neither hatred nor envy; nor does discord or ill will exist among them (Sifre, Num. 42). Nevertheless, they stand in need of mutual beneficence (Lev. R. xxi., beginning). Although there is nothing hidden from the superior beings (Midr. Teh. xxv. 14), yet they do not know the day of Israel's redemption (Sanh. 99*a*); see also Matt. xxiv. 36, "of that day and hour knoweth no man, no, not the angels of heaven, but my Father only." Though the Israelites, emerging from the sea, knew where God's glory resided, the angels were in ignorance of it (Ex. R. xxiii., end). Adam's knowledge exceeded that of the angels (Bacher, "Ag. Pal. Amor." iii. 125, note 1): not Adam alone, however, but all the pious rank above the ministering angels (Gen. R. xxi., Yer. Shab. vi., end).

Although they render God unfailing obedience, and are ready to serve Him before they hear His commands—in which regard they are imitated by Israel—they are nevertheless fallible. There are fallen angels. Two were expelled from heaven for one hundred and thirty-eight years on account of prematurely disclosing the decree of Sodom's destruction, or for presumption (Gen. R. l., lxviii.).

The angels appear at times standing: now in the shape of a man or of a woman, and now as wind or as fire (Ex. R. xxv., beginning). Of the three angels that appeared to Abraham (Gen. xviii. 2), one was like a Saracen, one like a Nabatean, and the third like an Arab (Gen. R. xlviii. 9). To Jacob (Gen. xxxii. 25) the angel appeared as a shepherd (Gen. R. lxxvii.), as a heathen, and as a learned man (Ḥul. 91*a*). An angel assumed the shape of Moses in order to be captured by Pharaoh in Moses' place: another, taking Solomon's form, dethroned him (Yer. Ber. ix. 13*a*; compare Lev. R. vi., Yer. Sanh. ii. 20*c*). Angels come from heaven on horses, with gleaming weapons (IV Macc. iv. 10); Gabriel smites Sennacherib's host (II Kings, xix. 35) with a sharpened scythe which had been ready since the Creation (Sanh. 95*b*). The stone mentioned in Dan. vi. 18 was a stone lion into which an angel had entered (Cant. R., beginning). A high priest was killed by an angel in the Holy of Holies; and the impress of a calf's foot (compare Ezek. i. 7; Ta'anit, 25*b*; Yoma, 21*a*) was found between his shoulders (Yoma, 19*b*). Angels being generally conceived as endowed with wings, Akiba took the expression "fowls of the heaven" (Ps. civ. 12) to mean angels; but R. Ishmael refuted him (Bacher, "Ag. Tan." i. 324; compare Gen. R. lxv. 21; Pesiḳ. R. viii., beginning; Yer. Ber. vii., end).

Their bodies were supposed to be like the figure described in Dan. x. 6. Their size is variously given. One angel extends from earth to heaven, where the ḥayyot stand; Sandalfon is taller than his fellows by the length of a journey of five hundred years (Ḥag. 13*b*). According to one tradition, each angel was one-third of a world; according to another, two thousand parasangs (a parasang = 3.88 miles), his hand reaching from heaven to earth (Bacher, "Ag. Pal. Amor." iii. 371, 547). The angels do not, of course, always disclose themselves in all their size; they are visible to those only whom their message concerns; and their message is heard by none but those for whom it is intended (Ta'anit, 21*a*).

Variety of Angelic Forms.

Their number was considered, even by the oldest Talmudists, to be infinite. Rabbi Joshua said that the sun is only one of the many thousands that serve God (Yalḳ., Ex. 396). God caused to pass before Moses the hosts of angels that lived in His presence and served Him (Targ. Yer. to Ex. xxxiii. 23). God combats evil by Himself; but in beneficent works myriads of angels assist Him (Num. R. xi. 7). Every angelic host consists of a thousand times a thousand; but, to judge from Dan. vii. 10, and Job, xxv. 2, 3, the hosts themselves were innumerable.

After the expulsion of the Jews from their own country the number of the angelic hosts was decreased (Sifre, Num. 42). When Jacob left Laban's house, sixty times ten thousand angels danced before him (Cant. R. vii. 1; compare Gen. R. lxxiv., end). When at the revelation Israel first said "We will do it," and then "We will hear it," the same number descended and bound two crowns about the head of each Israelite; but when the Israelites sinned, one hundred and twenty thousand angels came to remove them (Shab. 88*a*). On Sinai God appeared with twenty-two thousand angelic hosts; though another authority holds that the number of hosts could not be computed by any mathematician (Pesiḳ. xii. 107*b* and parallel passages). A thousand angels constitute the following of every Israelite; one angel preceding him, to bid the demons make way. This angel's left hand, which executes but one command—the command of the *tefillin* (Deut. vi. 4-8)—holds a thousand angels; and the right hand, which executes a number of commands, holds ten thousand angels (Bacher, "Ag. Pal. Amor." ii. 136, 219).

Though the Bible makes no statement concerning the origin of angels, tradition emphatically declares them to have been created by God, but not until the second day of the Creation, in order that it should not be said that God had received assistance in His work, and that Michael sustained the firmament in the south, Gabriel supported it in the north, and God strengthened it in the middle. This is one view: another is that the angels were not created until the fifth day. They were not among the six things whose creation was decided upon before the world was made (Gen. R. i. 3). God indeed held council with angels at the creation of man, without, however, allowing them to decide against His decree in favor of his creation (Sanh. 38*b*, Gen. R. viii. 5). These sayings of the rabbis show a desire to preserve intact the idea of monotheism.

Angels also sit in council at the judgment of man, to decide his guilt or innocence. If nine hundred and ninety-nine vote for conviction and only one for acquittal, God decides in favor of man. The soul announces the affairs of man to the angel, the angel to the cherubim, the cherubim to God (Cant. R. i. 9; Yer. Ḳid. i. 61*d*; Pesiḳ R. viii., beginning).

Functions of Angels.

As zealous servants of the Lord, angels act in accordance with His spirit; but not infrequently they mistake His intentions. They dispute as to who shall rescue Abraham from the furnace; but God reserves the decision to Himself. When God strove with the Egyptians at the Red sea, angels wanted to take part in the contest; when Phinehas interceded with God to save Israel from the plague, they wanted to strike him down. Micah, the idolater (Judges, xvii.), they wanted to destroy utterly; but God, remembering Micah's hospitality, had compassion on him (Tan., Teẓawweh, xii.; Midr. Teh. xviii. 13; Sanh. 103*b*). God harkened, however, to their representations concerning the extent of Jerusalem, which they wished to be unlimited, since God did not limit heathen cities; and He yielded to their request. They pleaded for Moses, when he was exposed on the river, that he should not be allowed to perish; it being the sixth day of Sivan, the day destined for the revelation (Soṭah, 12*b*). Angels interest themselves deeply in the destiny of Israel and of the pious. They take Israel's part when God proposes to punish him; they lament over the decreed destruction; they plead for Israel with the heathen; they accuse Ishmael's descendants for Israel's sake. They protect Israel, and come to his assistance at the revelation. After Moses' death an angel takes God's place in the guidance of Israel. Angels help at the construction of Solomon's Temple; they weep over its destruction; but their consolation is rejected by God (Giṭ. 7*a*; Ber. 20*b*; Esther R. iii. 9, i. 14; Gen. R. liii. 14; Ex. R. xviii. 5, near beginning; xxxii., beginning; Ex. R. xxxii. 3; Cant. R., introduction, near beginning; Ḥag. 5*b*; Sanh. 96*b*; Gen. R. xix. 8).

Angels protect the pious and help them in their transactions. An angel nullifies the consequences of Esau's hunting. When Jacob trembles in approaching Isaac, two angels support him lest he fall. When Amram takes his wife again, the angels rejoice over the fact that Moses will be born; and at Moses' death they chant a funeral song. They lament over the martyred Akiba; exclaiming, "This is the Law, and this is its reward" (Soṭah, 12*a*; Ber. 61*b*; Shab. 55*b*). They mourn the death of Adam; they carry off the bodies of Nadab and Abihu. Every man has a special guardian angel, according to Targ. Yer. Gen. xxxiii. 10: "I have seen thy face as though I had seen the face of thy angel" (compare Levi in Soṭah, 41*b*). These guardian spirits are identical with the two angels accompanying man (Ḥag. 16*a*). When going into an unclean place, one begs these accompanying angels to wait, until he comes out again (Ber. 60*b*). Guardian spirits are mentioned particularly in Matt. xviii. 10, and in Acts, xii. 15. They resemble the Persian *fravashis*, and were probably modeled after them. The spirits of the elements, like the prince of the fire, etc., also had their origin in Persia, as is shown by their names. The accompanying angels are probably not identical with the guardian spirits; for certain angels accompany Jacob in the Holy Land, and others attend him in foreign lands (Gen. R. lxviii. 12).

Accompanying angels are not permanent, but temporary, companions. Every angel wears on his breast a tablet inscribed with the name of God (Pesiḳ. xii. 108*b*; comp. Bacher, "Ag. Pal. Amor." i. 412, note 1). Two angels—one good and one evil—accompany man as he returns from the synagogue to his home on Sabbath eve. The souls of the pious are received by three good angels; those of the wicked, by three evil angels, who accompany them and testify for them (Tosef., Shab. xvii. 2; Shab. 119*b*; Ket. 104*a*; Ḥag. 16*a*). The angels associate with the pious and instruct them in certain matters. Ishmael b. Elisha says: "Three things did the angel of His presence impart to me." To Johanan ben Dahabai ministering angels gave four teachings. They frightened Sheshet. Three angels appeared to a maid serving in the house of Simon b. Yoḥai's father. If some one forsakes the community in its need, his two guardian angels lay their hands on his head saying, "May he have no share in the salvation of the community." Man before his birth, being pure spirit, knows everything; but at the moment that he sees the light of day, an angel strikes him on the mouth, and he forgets the whole Torah (Ber. 51*a*; Ned. 20*a*; Meg. 29*a*; Me'ilah, 17*b*; Ta'anit, 11*a*; Nid. 30*b*).

In Ḥag. 12*b* it is stated that there is in heaven a Jerusalem, containing a sanctuary in which Michael, the great prince, stands like the high priest on earth, offering up sacrifice. Angels chant the "Holy, holy, holy" of Isa. vi. 3 (Ḥul. 91*b* and elsewhere); and their voices sound soft and low (Sifre, i. 58). Angels in heaven, representing the peoples of the earth, are mentioned as early as Ben Sira (Ecclus. xvii. 17; Deut. xxxii. 8, LXX.), the number of the peoples being seventy, according to the reckoning of Gen. x. But while Ben Sira speaks of God as the ruler of Israel, as does also the Book of Jubilees (xv. 32), later sources unanimously designate Michael as the prince of Israel. It was to these angels that God said at the building of the tower of Babel, "Let us confound their language" (Targ. Yer. to Gen. xi. 7, Pirḳe R. El. xxiv.). They were the *shinan*, distinguished angels who came down with the myriads of angels at the revelation on Sinai (Pesiḳ. R. xxi., with reference to Ps. lxviii. 18 [compare Gal. iii. 19]).

The destiny of the nations and of their heavenly princes is closely interwoven. God punishes no nation; nor will He, even in the time of the Messiah, punish any, until He shall have punished its guardian angel (Cant. R. viii. 14; Mek., Beshallaḥ, Shirah, ii.). The hostility of the ancient nations against Israel is reflected in the legend that the seventy princes of the nations bring charges against Israel, whose part God takes. The same angels favored Egypt. God enjoined obedience on Israel in order that he might ward off the hostility of those angels. Jacob saw them in a dream ascending and descending a ladder reaching to heaven, and feared they would always oppress Israel (Ruth R., introduction; Targ. Yer. on Ex. xxiv. 10 and Midrash Abkir; Pesiḳ. xxiii. 150*b*). No individual names of these are given, with the exception of Michael and Samael: the following, however, are mentioned: namely, the princes of Egypt, Babylon, Media, Yavan (= Greece, hence also Syria), Edom (Rome). The last occurs most frequently, since any great world-power easily suggested to the minds of the haggadists the power of Rome (Ex. R. xv. 15; Pesiḳ. 151*a*; Mak. 12*a*, etc.). Samael, Edom's patron, wanted to kill Jacob; also to deprive Tamar of her pledges (Gen. xxxviii. 25), wherein Gabriel prevented him, and he complained against Israel on the latter's departure from Egypt (Gen. R. lxxvii.; Cant. R. iii. 6; Tan., Wayishlaḥ, viii.; Soṭah, 10*b*; Ex. R. xxi., near end; Bacher, "Ag. Pal. Amor." i. 25, 473). An interesting angel, mentioned in B. B. 25*a*, is Ben Neẓ, the ruler of the winds, to whom is referred Job, xxxix. 26: "Doth the *neẓ* [A. V. "hawk"] fly by thy wisdom and stretch his wings towards the south" (to ward off the scorching heat). The "prince of the world" (Yeb. 16*b*) is possibly identical with Michael.

Mention is also made of the following: Dumah, prince of the realm of the dead, prince of hell, prince of fire; Rahab, prince of the sea; Ridia, prince of the rain; Yurḳemi, prince of the hail (the etymology of the last-mentioned name is unknown); Gabriel, prince of the ripening of the fruit, the prince of lust; Lailah ("night"), prince of conception; Af and Ḥemah ("anger" and "wrath"); Abaddon and Mawet ("destruction" and "death"); the angels of prayer, of beneficence, and of dreams (Shab. 152*b*; compare Sanh. 94*a*; 'Ar. 15*a*; Pes. 118*a*; Sanh. 95*b*; B. B. 25*a*; Gen. R. lxxxv.; Niddah, 16*b*; Ned. 32*a*; Shab. 89*a*; Ex. R. xxi.; Midr. Teh. lxxxviii. 4; Ber. 10*b*). Frequently angels of peace or wrath, good and bad angels, are referred to; and more frequently destroying angels (מלאכי חבלה = מלאכי המשחית, II Sam. xxiv. 16, I Chron. xxi. 15), whose unlimited number figuratively represents the infinite number of ills and mishaps to which flesh is heir (Shab. 88*a*; Enoch, liii. 3, lxvi. 1). Besides these, Jewish tradition has the names of METAṬRON, SANDALFON, and (once) SEMALION (Sanh. 38*b*; Ḥag. 13*b*; Soṭah, 13*b*).

According to the Talmud, the three angels that visited Abraham (Gen. xviii. 2) were Michael, Gabriel, and Raphael (Yoma, 37*a*; B. M. 86*b*). The Suriel, prince of his presence, of Ber. 51*a* may have been identical with Sariel.

The Cabala.

3. In the Medieval Period: The system of the Essenes reappears in the mystical writers at the time of the Geonim (600–1000). It was given a still more mystical character by the cabalists, who, beginning in the thirteenth century, gained more and more ground, and finally obtained overwhelming influence. In the Talmud, angels were the instruments of God; in the Middle Ages, the instruments of man, who, by calling their names, or by other means, rendered them visible. The Talmud knew of angelic apparitions, but not of the conjuration of angels, which must be distinguished from the conjuration of demons. Even gaonic mysticism was reserved on this point; but the Book of Raziel, composed of various elements, gives at its very beginning directions for invoking the angels, that change according to the month, day, and hour, and for using them for a peculiar purpose, such as prophecy. After this the Cabala knew no limits as to the number of the angels. Like the Egyptian magic, it was dominated by the belief that no angel could resist the invocation of his name when it took place after certain preparations, in the proper places, and at the right time.

Accordingly, post-Talmudic Angelology, while serving practical ends, had increased the number of angels. Besides those that did duty in heaven, a whole host was placed over the specific activities of man's world; and names were given to the individuals composing this host. When the mysticism that ascribed peculiar properties to letters and numbers, and devoted itself at first to cosmic speculation, turned its attention to the world of angels—considering it a portion of the cosmos—numerous names arose that were exclusively the conceptions of mystical speculators, having no rational etymology. Such names exist by the thousand, occurring to a considerable extent in the Book of Raziel, which pretends to be a revelation by the angel Raziel to Adam, and which passed from Adam to Abraham, Moses, and the Prophets in direct succession from father to son.

Mystical Angelology.

Disregarding these fictitious names, which, though genuine to the Cabala, are not to be regarded as component parts of traditional belief, the names of angels and other angelological elements are older than the literature concerning them, especially the cabalistic works Hekalot, Otiot de-R. Akiba, Raziel, and the Zohar. It is a commonly observed feature of secret arts that they flourish in concealed and nonliterary forms before venturing into the light of day and becoming literature. Since angelic names constituted the most sacred element in mysticism, they were often not written, much less printed; and, in consequence, a number of them remain unknown, and could not be given in Schwab's "Vocabulaire de l'Angélologie," Paris, 1897, a work numbering three hundred and sixty-eight pages. Curiously enough, Greek names were smuggled in and were later explained by Biblical names. Naturally, there were some authors even in the Middle Ages who condemned as foolishness these fanciful names along with *gematrias* ("numerical values of the letters"), by means of which they were created. "Neither the older Jewish mysticism nor the Spanish Cabala produced so full an Angelology, or so rich a demonological literature, as did the mysticism of the German Jews of the thirteenth century. Nor did either of them elaborate the angelic character in such detail, or adapt it so skilfully to all the needs of daily life. Consequently, German-Jewish mysticism was from this point of view more closely allied to contemporary Christian mysticism than to its predecessors. According to the 'Book of the Angels,' by Eleazar of Worms, one of the most prominent pupils of Judah Ḥasid, the whole world is peopled with angels and demons; no nook or cranny is unprotected by guardian angels; and God determines on everything, and then sends an angel to execute His will. Every man has his angel of destiny [מלאך מזל] or 'appointed one' [ממונה], who brings about all the good and evil that he experiences" (Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden," i. 162; compare ii. 165, 180).

After the victorious advance of the Cabala, opposition to the highly fanciful belief in angels was no longer made; and mystical Angelology lured the Occident as well as the Orient into its charmed circle, from which a portion of Judaism has not yet liberated itself. Angels still play a part in usages connected with the home among the Ḥasidim, who design their amulets with regard to the particular angel dominant at the time they are made. According to one source, all angels placed over the months and days are said to serve this purpose. In this way Angelology is brought into the closest connection with astrology and into agreement with monotheism.

L. B.

—General Historical Development: In the earlier Biblical writings the term "Malak YHWH" (messenger of the Lord) occurs chiefly in the singular, and signifies a special self-manifestation of God (see Gen. xxxi. 11–13, where the angel of God says, "I am the God of Beth-el"; Ex. iii. 2–6, where the angel of the Lord who appeared to Moses in the flame of fire says, "I am the God of thy father"; compare Gen. xxii. 11; Judges, vi. 11–22). At times the angel clearly distinguishes himself from the Lord who sends him (see Gen. xvi. 11, xxi. 17; Num. xxii. 31; Judges, xiii. 16). Though appearing in human form (see Gen. xviii. 2 *et seq.*, xxxii. 25; compare Hosea, xii. 5), the angel of the Lord has no individuality. Being only a temporary manifestation of God, he can never replace His presence; wherefore Moses, not satisfied with the Lord's saying "I will send an angel before thee" (Ex. xxxiii. 2), replies: "If thy presence [face] go not with me, carry us not up hence" (Ex. xxxiii. 15).

There prevailed no uniform conception of these angelic beings. In Jacob's dream they ascend and descend the ladder (Gen. xxviii. 12); in the vision of Isaiah (vi. 2) they are six-winged seraphim; in Ezekiel the cherubim and living creatures (ḥayyot) have the likeness of a man, are winged, and have feet (Ezek. i. 5–7, x. 19–21). As guests of Abraham, they eat (Gen. xviii. 8); in the house of Manoah the angel refuses to eat (Judges, xiii. 16). Whether in the popular mind these angels took the place of the powers of nature deified by the heathen nations elsewhere, or whether the psychological process was a different one, the monotheism of Israel necessitated the assumption of beings representing a heavenly hierarchy ready to mediate between man and God.

The story of Creation makes no mention of the creation of angels, while from Job, xxxviii. 7, if not from Gen. i. 26, it rather appears that they looked on, approving and praising God's creative work. According to Job, iv. 18, xv. 15, the angels are endowed with moral sense, though they fall short of God's own ideal of purity and perfection. According to Ps. lxxviii. 25, manna is "angels' food" ("bread of the mighty," R. V.; compare Ps. ciii. 20). Similarly, the tree in paradise, whose fruit makes man like godly beings "knowing good and evil" (Gen. iii. 5), as well as the tree of life, bears food for angels, as may be learned from the word of the Lord spoken obviously to the angelic sons of God: "Behold the man is become as one of us, to know good and evil: and now, lest he put forth his hand, and take also of the tree of life, and eat, and live forever: therefore, the Lord God sent him forth from the Garden of Eden" (Gen. iii. 22, 23). Elsewhere the angels are referred to as partaking of God's wisdom (see II Sam. xiv. 17, 20, xix. 28). Some such view underlies the verse: "Thou madest him a little lower than the angels [godly beings]" (Ps. viii. 5); man, though mortal, being endowed with intellect.

Postexilic Period: During and after the Exile, under the influence of Babylonian and Persian systems of belief, a great change becomes noticeable in the angelic lore of the Jews. The more the monotheistic idea took hold of the people—permitting no being to interfere with the absolute supremacy of YHWH—the greater became the need of personifying the working forces of life, and of grouping them in ranks around the throne of God to form His royal court. His transcendent nature demanded a more definite system of heavenly functionaries attending Him and awaiting His commands. Gradually the celestial government was formed after the pattern of the earthly one, as it presented itself, imposing and well organized, at the Persian court.

Angelology Systematized.

But it is chiefly from a closer contact with Babylonia and her system of upper and lower spirits that the influx of new elements into Jewish Angelology can be traced; and this is confirmed by the rabbinical tradition, "The names of the angels were brought by the Jews from Babylonia" (Yer. R. H. i. 2, Gen. R. xlviii.). Ezekiel (ix. 2) already sees seven angels of God in human form (see Toy's notes, "S. B. O. T." xii.): six to do the work of destruction, and the seventh the heavenly scribe sent toward the Holy City. While all the revelations he receives come directly from the Lord, in one instance an angel in the form of a man acts as a divine interpreter, when the plan of a new city is mapped out for the prophet (Ezek. xl. 3). The prophet Zechariah, on the other hand, receives all his divine instructions no longer from God directly, but through "the angel of the Lord who talks with him" (Zech. i. 9; 14, ii. 2; iv. 1, 5; v. 10; compare also I Kings, xiii. 18). Instead of the Lord there appears to him "a man riding upon a red horse" as chief among those who "walk to and fro through the earth" (*ib.* i. 8–10). The four smiths (*ib.* ii. 3, *Heb.* [R. V. i. 20]; compare Ezek. xxi. 36) as well as "the man with a measuring line" (Zech. ii. 5, *Heb.* [A. V. 1]) are angels; and the scene of the accusation by Satan of the high priest Joshua while "standing before the angel of the Lord" (*ib.* iii. 1) must be placed in heaven, parallel to the scene in Job, i. 6–12, ii. 1–6. However, "the seven eyes of the Lord which run to and fro through the whole earth" (Zech. iv. 10), while betraying Babylonian influence, are only the symbolical representation of Divine Providence, and are not identical with the seven archangels or watchers, as Herzfeld ("Gesch. d. Volkes Israel," iii. 287) and Kohut ("Jüd. Angelologie," p. 6, note 17) believe.

It is in the Book of Daniel that a systematic classification of angels is first presented. In Josh. v. 15 reference is made to "the captain of the Lord's host" (שר צבא יהוה), still without name and individuality, and rather a mere manifestation of the Lord, as is seen from Josh. vi. 2. In Dan. x. 13, mention is made of "captains of the first rank," A. V. "chief princes" (compare *ib.* xii. 1, "sar ha-gadol," "the great captain," A. V. "prince") and "captains" (princes) of a lower rank, these being tutelary spirits of the nations, "the prince of Persia and the prince of Grecia" (*ib.* x. 20). Obviously, the underlying idea is the one expressed, if not already in Deut. xxxii. 8, at least in the Septuagint reading, "according to the number of the sons of God" (compare Targ. Yer. to the verse and to Gen. xi. 7, Ecclus. [Sirach] xvii. 17, Pirḳe R. El. xxiv., Isa. xxiv. 21), that the seventy nations of Gen. x. each had their guardian angel in heaven; and that Michael, the guardian angel of Israel, ranks above the rest. He is one of the chief princes, his name signifying, "Who is like God?" being expressive of God's greatness. The angel who interprets the visions to Zechariah appears in Dan. viii. 16, ix. 21, under the name of Gabriel ("the mighty man of God"). Above these two ranks a man-like being "clothed in linen," whose fiery appearance overawes Daniel (viii. 15–17, x. 5–10, 16–18), and who swears "by him that liveth for ever" (xii. 7). He is probably identical with the angel who stands before the Lord, the *malak panaw* (Isa. lxiii. 9), according to the Masoretic text—not to be confounded, however, as is done by Oehler (p. 446) with "the son of man" mentioned in Dan. vii. 13, who is only a personification of Israel.

Of particular interest is the name עיר for angel (Dan. iv. 10, 14 [A. V. 13, 17]), which is taken by some (recently Behrmann) to be the Aramean word for ציר (Obad. 1, "messenger"; Isa. lxvii. 9, "angel"), but which most commentators in accordance with tradition (Aquila, Symmachus, Jerome) explain by the term "watcher." The *'ir we-ḳaddish* ("watcher and holy one"), who comes down from heaven to announce the destiny decided "by the decree of the watchers and by the word of the holy ones," evidently represents a high class of angels forming God's "council of the holy ones" (Ps. lxxxix. 7, R. V.); while "thousands and ten thousand times thousands of angels stand before Him" to minister to Him (Dan. vii. 10, *Heb.*). Whether the name *'ir* (from *ur*, "being awake") is to be derived (see Herzfeld iii. 291, note 342, and Kohut, "Jüd. Angelologie," p. 6) from the seven amshaspands, the Persian archangels—according to Bopp, "the sleepless ones"; according to Spiegel and Darmesteter, "the undying holy ones"—or not, the watchers certainly occupy a high rank in the Book of Enoch.

In the Book of Tobit the name of a third angel appears—namely, Raphael ("God healeth," Tobit, iii. 17)—called thus after his mission. "God hath sent me," he says, "to heal thee and Sarah, thy daughter-in-law. I am Raphael, one of the seven holy angels, which present the prayers of the saints, and which go in and out before the glory of the Holy One" (Tobit, xii. 14–15). "He presented Tobit's prayer on account of the latter's blindness, and the prayer of Sarah on account of the humiliation of her parents," and was sent to heal them both (*ib.* iii. 17), to remove the blindness of the one and bind the evil spirit Asmodeus, in order to give a husband to the other. He presented himself to Tobias as an ordinary man to accompany him (*ib.* v. 4), and ate with him (*ib.* vi. 5, viii. 1).

A Heavenly Hierarchy.

The process begun in Daniel, and continued in the entire apocalyptic literature, finally led to the assumption of a heavenly hierarchy of stupendous proportions. The mystic lore, intended only for the initiated few, dwelt on the prophetic theophanies (*Ma'aseh Merkabah*, "the heavenly throne chariot," Ezek. i.–iii., viii., x.; Isa. vi. 1–3; see Ḥag. ii. 7); turning the imagery of the seer into gross realities, and greatly amplifying it in accordance with an expanded view of the universe and of its cosmic forces. Yet this angelic lore, the knowledge of which was the special property of the Essenes or Ḥasidim (Josephus, "B. J." ii. 8, § 7), while the Sadducees rejected it (Acts, xxiii. 8), was not merely a theoretical speculation, but was also practical in so far as it enabled its possessor to control the spiritual forces by use of the specific names of the angels in incantations and conjurations. It was the application of this principle, derived from the Babylonian magi and Mazdaism, that brought about a well-developed system of Angelology such as is found already in the writings preserved under the name of Enoch. The strange story of the "sons of God" (in Gen. vi. 1–4), which, combined with Isa. xiv. 12–15, gave rise to the story of the fall of the angels, offered the means of establishing a relationship between the good and the bad angels and, through that, between legitimate and illegitimate magic. These two ideas then—the celestial throne with its ministering angels, and the cosmos with its evil forces to be subdued by superior angelic forces—are the determining factors of Angelology.

According to Enoch, xxi., as the text has now been critically fixed (see Charles, "Book of Enoch," p. 357), there are seven archangels (*'irin we-ḳaddishin*, "holy ones who watch"):

(1) Uriel ["God is Light"; compare II Esd. iv. 1], set over the world's luminaries and over Sheol [compare Enoch, xxi. 5, xxvii. 2, xxxiii. 3, 4]; (2) Raphael, set over the spirits of men [compare Enoch, x. 4, where he is told to bind Azazel and to heal the earth with Tobit—iii. 17]; (3) Raguel [Ra'uel, "the terrifier"], who chastiseth the world of the luminaries; (4) Michael, set over the best part of mankind, over the people of Israel; (5) Sariel [Æth., *Sarakiel*, *Suriel*, "God turneth"?], set over the spirits who seduce the spirits to sin; (6) Gabriel, set over paradise, the serpents [seraphim?], and the cherubim; (7) Jerahmeel ["God is merciful"], whom God set over the resurrection [compare II Esd. iv. 36; Syriac Apoc. Baruch, lv. 3; Steindorf, "Elias Apoc." p. 152].

Whether corresponding with the seven amshaspands of Persia or with the seven planetary spirits of Babylonia (see Herzfeld, Kohut, and Beer, in Kautzsch's "Apokryphen u. Pseudepig. d. A. T." p. 251), these seven archangels recur in Enoch, xc. 21–22 (compare Pirḳe R. El. iv. and Hekalot, iv.; the Revelation of John, v. 6, and Hermas Sim. ix. 31; 6, 2; Vis. iii. 4, 1; see Spitta, "Zur Gesch. u. Lit. d. Urchristenthums," ii. 361). Michael, named as the fourth, is probably meant to stand in the middle as chief (Luecken, "Michael," p. 37). He is the leader of the seven (Enoch, xc. 21, 22).

Four Angels of the Throne.

On the other hand, Michael, Gabriel, Uriel, and Fanuel (Penuel) are introduced as "the four angels of the face of the Lord." After the watchers ("those that sleep not") have been described (*ibid.* xxxix. 12, 13) as chanting the "Holy, holy, holy!" and mutually responding, "Blessed be the name of the Lord!" the following passage occurs (*ibid.* xl. 2):

"I saw on the four sides of the Lord of spirits four presences [faces] different from those that sleep not, and I heard the voice of those four presences as they gave glory before the Lord of glory: The first [as the angel of peace explained it afterward], Michael [מיכאל = "who is like God?"], merciful and long-suffering, blesses the Lord of spirits for ever and ever; the second, Raphael, set over the diseases of the children of men, blesses the Elect One [the Messiah] and the elect ones who cleave to the Lord of spirits [the pious ones]; the third, Gabriel ["the mighty one of God"], set over all the powers, intercedes in behalf of the inhabitants of the earth [see Enoch, x. 9–10, 12–14]; and the fourth, Fanuel [Penuel = "turning to God"], set over repentance and hope of eternal life, prevents the Satans from accusing men."

In Enoch, lxxi. 7–13, these four stand near the crystal throne of God, which, encircled by fire, is surrounded by the seraphim, cherubim, and ofanim ("wheels," Ezek. i. 15), "those that sleep not, and guard the throne of His glory" amidst a thousand times thousand and ten thousand times ten thousand, the Head (Ancient) of Days being with the four. Four angels standing before the face of God as leaders of four troops of angels glorifying the Most High, who is seated in the midst of them, are mentioned also in Pirḳe R. El. iv. and Hekalot, vi.; but their names are given as Michael, Uriel, Gabriel, and Raphael (Sibylline Books, ii. 215). Compare the four archangels, Michael, Gabriel, Raphael, and Uriel, in Enoch, ix. 1, xl. 2. They correspond with the four tutelary spirits or rulers of the four parts of the earth in the Babylonian mythology (Beer, following Jensen, "Cosmologie d. Babylonier," p. 169). (For the twenty-four elders seated around the throne of God in heaven next to the four beasts and the seven spirits, Apoc. John, iv. 4, see Gunkel, "Schöpfung und Chaos," p. 308.)

Then again mention is made of seven classes of angels (Enoch, lxi. 10 *et seq.*): (1) the cherubim,

(2) seraphim, (3) ofanim, (4) all the angels of power, (5) principalities, (6) the Elect One (Messiah), and (7) the (elementary) powers of the earth and the water. They are endowed with seven angelic virtues—one more than is ascribed to the Messiah (*ibid.* lxi.; after Isa. xi. 2): "In the spirit of faith, of wisdom, of patience, of mercy, of judgment, of peace, and of goodness they glorify, saying: 'Blessed is He, and may the name of the Lord of spirits be blessed for ever and ever.'"

A parallel to this is offered by the Testaments of the Patriarchs in Test. Levi, iii., where this description of the seven heavens is given:

"In the highest of which dwelleth the great Glory in the Holy of Holies, and beneath it are the angels of the presence of the Lord, who minister and make propitiation to the Lord for all the ignorance of the righteous. . . . And in the heaven below this are the angels who bear the answers to the angels of the presence of the Lord, and in the heaven next to this are thrones and dominions in which hymns are offered to God; in the third heaven there are hosts of the armies ordained for the day of judgment, to work vengeance on the spirits of deceit and of Belial; the second has fire, snow, and ice ready, all the spirits of retribution for the day of judgment; and the lowest is gloomy because it is near the iniquities of men."

In another vision (*ibid.* viii.) Levi sees seven men in white raiment, the seven archangels, each consecrating him and investing him with some insignia of the priesthood; while Michael, "the angel who intercedeth for the race of Israel," opens the gates of heaven for him, where he sees the holy Temple and the Most High upon a throne of glory (*ibid.* v.).

The Slavonic Enoch.

In the Slavonic Book of Enoch, written a little before the beginning of the common era, the heavenly hierarchy is still more fully developed. Enoch, taken up by two angels of fiery appearance (Shemiel and Raziel, xxxiii. 6), sees in the third heaven the sun and the stars (i. 5), the former surrounded by phenixes and other winged creatures and attended by 400 (Version B, 15,000) angels, who take off his crown each evening to bring it to the Lord, and set it upon his head again each morning (xiv. 2, 3; compare Pirke R. El. vi.); in the fourth heaven he sees hosts of angels armed (for judgment), while serving God with cymbals and singing. In the fifth he sees the watchers, four orders, in grief over their fallen fellow angels, but still singing, at his monition, and sounding four trumpets in praise of the Lord. In the sixth heaven legions of angels more resplendent than the sun, the archangels set over the sun, the stars, the seasons, the rivers, the vegetation, the living things, and the souls of men, with seven phenixes (seraphim?), seven cherubim, and seven six-winged creatures (ḥayyot?) in the midst of them, sing with one voice, indescribably beautiful, while rejoicing before the Lord. And finally, in the seventh heaven:

"I saw a very great light, and all the fiery hosts of great archangels, and incorporeal powers, and lordships, and principalities, and dominions, cherubim and seraphim, thrones, and the watchfulness of many eyes [ofanim], ten troops according to their rank. Day and night without ceasing they sing: 'Holy, holy, holy, Lord God of Sabaoth, heaven and earth are full of Thy glory!' [Some versions have here interpolated the eighth heaven, mazzalot, with the twelve signs of the zodiac; the ninth heaven, kokabim, the heavenly homes of the twelve signs of the zodiac; and the tenth heaven.] This is 'arabot, where I saw the face of the Lord like iron burnt in the fire emitting sparks—wonderful beyond words—and the great throne of the Lord not made by hands, and hosts of cherubim and seraphim around Him."

(For the thrones, principalities, dominions, and powers, compare Col. i. 16; Eph. i. 21; Rom. viii. 38; I Peter, iii. 22; and the "Prières des Falashas," ed. Halévy, p. 20, Paris, 1877).

With this corresponds the rabbinical tradition as given by Rabbi Meir of the second century in Ḥag. 12*b*, Ab R. N., *A*. 37 (see Bacher, "Ag. Tan." ii. 65).

The Seven Heavens in the Talmud.

"There are seven heavens one above the other: (1) Velon [Latin, *velum*, "curtain"], which is rolled up and down to enable the sun to go in and out; according to Isa. xl. 22, 'He stretched out the heavens as a curtain'; (2) Raḳi'a, the place where the sun, moon, and stars are fixed [Gen. i. 17]; (3) Shehakim, in which are the millstones to grind [*shaḥak*] manna for the righteous [Ps. lxxviii. 23; comp. Midr. Teh. to Ps. xix. 7]; (4) Zebul, the upper Jerusalem, with its Temple, in which Michael offers the sacrifice at the altar [Isa. lxiii. 15; I Kings, viii. 13]; (5) Ma'on, in which dwell the classes of ministering angels who sing by night and are silent by day, for the honor of Israel who serve the Lord in daytime [Deut. xxvi. 15, Ps. xlii. 9]; (6) Makon, in which are the treasuries of snow and hail, the chambers of dew, rain, and mist behind doors of fire [1 Kings, vii. 30; Deut. xxviii. 12]; (7) 'Arabot, where justice and righteousness, the treasures of life and of blessing, the souls of the righteous and the dew of resurrection are to be found. There are the ofanim, the seraphim, and the ḥayyot of holiness, the ministering angels and the throne of glory; and over them is enthroned the great King" (see Ps. lxviii. 5).

Maimonides, in his "Yad ha-Ḥazaḳah, Yesode ha-Torah," ii., counts ten ranks of angels, beginning from the highest:

(1) Ḥayyot; (2) ofanim; (3) arelim [אֶרְאֶלִּים from אֶרְאֶלָּם, Isa. xxxiii. 7]; (4) ḥashmallim [Ezek. i. 4], explained in Ḥag. 13*b* as ḥayyot, who are sometimes silent [*ḥash*], and who sometimes speak [*mallel*]—they are silent when the word emanates from the Holy One, blessed be He! they speak when he has ceased speaking; (5) seraphim; (6) malakim, "angels"; (7) elohim or godly beings; (8) bene Elohim, "sons of God"; (9) cherubim, "like blooming youth," Ḳarabia [Ḥag. 13*b*]; (10) ishim, "manlike beings" [Dan. x. 5]. See Rapoport on Maimonides' "Maämar ha-Yiḥud," ed. Steinschneider, p. 10; Jellinek, "Beiträge zur Kabbala," p. 61, note; Bacher, "Bibelexegese Moses Maimuni's," p. 69.

The cabalists (Zohar, Exodus, 43) have a different list:

(1) Arelim, with Michael as chief: (2) ishim, with Zephaniah as chief: (3) bene Elohim, with Hofniel as chief; (4) malakim, with Uriel as chief; (5) ḥashmallim, with Ḥashmal as chief; (6) tarshishim, with Tarshish as chief [after Dan. x. 6; see Ḥul. 91*b*]; (7) shinannim, with Ẓadḳiel as chief [after Ps. lxviii. 18]; (8) cherubim, with Cherub as chief; (9) ofanim, with Raphael as chief; (10) seraphim, with Jehoel as chief.

Still more elaborate is the description of the seven heavens with their angelic chiefs, and of the twelve degrees of angels instead of ten, in "Sode Raza," quoted in Yalḳ. Reubeni to Gen. i. 1.

In "Maseket Aẓilut" the ten ranks of angels are given in the following order:

(1) Seraphim, with Shemuel [Ḳemuel] or Jehoel as chief; (2) ofanim, with Raphael and Ofaniel as chiefs; (3) cherubim, with Cherubiel as chief; (4) shinannim, with Ẓedeḳiel and Gabriel as chiefs; (5) tarshishim, with Tarshish and Sabriel as chiefs; (6) ishim, with Zephaniel as chief; (7) ḥashmallim, with Ḥashmal as chief; (8) malakim, with Uzziel as chief; (9) bene Elohim, with Ḥofniel as chief; (10) arelim, with Michael as chief.

These are the ten archangels that were created first: and over them is set Meṭaṭron-Enoch, transformed from flesh and blood into flaming fire.

Of the vastness of the armies of heaven the following description is given by R. Simon b. Laḳish:

"There are twelve mazzalot ["signs of the zodiac"], each having thirty armies; each army, thirty camps [גסטרא = castra]; each camp, thirty legions [compare Matt. xxvi. 53]; each legion, thirty cohorts; each cohort, thirty corps [compare Krauss, "Lehnwörter," *s.v.* ררהטון]; and each corps has 365,000 myriads of stars entrusted to it" (Berach. 32*b*).

"When Moses went up in the cloud to heaven, Ḳemuel, the janitor of the first gate, with 12,000 angels of destruction under him, went to strike him, but succumbed. As he arrived at the second gate, Hadraniel, who exceeded the former 600,000 parasangs in length, came with his darts of fire to smite him, but God interfered. Finally, he came to the precincts of Sandalfon, the angel who towers above the rest by the length of 500 years' journey, and who when standing on earth reaches with his head up to the ḥayyot. Standing behind the heavenly chariot, he weaves crowns for the Most High, while all the hosts of heaven sing, 'Blessed be the glory of the Lord from His place.' Before his fire even Hadraniel trembled; but Moses passed him also, the Lord shielding him. Then Moses came to the stream of fire which consumes even the angels; and God caused him to pass through unscathed. Next came Galiẓur ["Revealer of the Rock"], also called Raziel ["The Secret of God"], or Akraziel [כרוז = κῆρυξ "the herald of God"], the angel who spreads his wings over the

> ḥayyot, lest their fiery breath consume the ministering angels. Finally, the troop of the mighty angels standing around the throne of glory threatened to consume Moses by the breath of their mouth: but Moses seized the throne of glory; and the Lord spread His cloud over him [according to Job, xxvi. 9], and he received the Law despite the protesting angels" (Pesiḳ. R. xx., ed. Friedmann, pp. 96*b*, 98*a*; see editor's notes).

This ascension of Moses is described more elaborately in the Shir ha-Shirim Rabba fragment, ed. Wertheimer, "Bate Midrashot," iv., Jerusalem, 1897 (compare with this the Hekalot in Jellinek, "B. H." ii. 41–46, iii. 94*f*, v. 170–190, vi. 110–111; also Merkabah de-R. Yishmael in Wertheimer, "Bate Midrashot," i., Jerusalem, 1893; and Jellinek's introduction to each of the treatises).

Fall of the Angels.

Hebrew theology knows of no principle of evil such as is the Persian Ahriman. Satan is one of the sons of God (Job, i. 6, ii. 1). This makes the problem of evil all the more difficult. The Biblical story of the sons of God marrying the daughters of men (Gen. vi. 1–4), implying the possibility of angels lusting and sinning, suggested the idea of a fall, not only of man, but of pure heavenly beings as well. Taken together with the (Babylonian?) mythology of Lucifer (Isa. xiv. 12), it seemed to take for granted the existence of evil spirits working antagonistically to God through the evil practises of witchcraft, astrology, and the like. Fallen angels became progenitors of hosts of evil spirits and seducers of men to crime and vice. Still, they were finally subjugated by the power of heaven, and punished by the archangels Raphael and Gabriel, and consequently a knowledge of their names would enable one to control them. This is the idea pervading the Enoch story of the fall of the angels, which rests on two different sources, now incorporated, in a fragmentary form, into one (Enoch, vi.–xv.). According to the one, Azazel (Lev. xvi. 10; Targ. Yer. Naḥmanides; also a Mandæan god, Brandt, "Mandäische Religion," p. 198) was the leader of the rebellion, and the chief debaucher of women; and his place of punishment was in the neighborhood of Jerusalem, by the rocks of Bet Ḥaduda (see Charles, "Enoch," p. 72), where the scapegoat was cast down: this shows the legend to be of ancient Judean origin (compare with this the reading of the chapter on incestuous marriages on the Day of Atonement, and the song of the maiden in Ta'anit, iv. 8). According to the other, Samiaza, or Samḥazai (Enoch, vi. 3–8, viii. 1–3, ix. 7, x. 11; compare Targ. Yer. Gen. vi. 4; Midr. Abkir in Yalḳ., Gen. 44; Hebrew Enoch in Jellinek, "B. H." ii.), is the chief seducer. He forms the center of rabbinical groups of legends (see Grünbaum, "Z. D. M. G." xxi. 225–248). As the story is presented in Enoch, the two rebel leaders, when they take the oath on Mount Hermon to subvert the rule of heaven, have each ten chieftains and one hundred angels at their command. But the punishment they receive at the hands of Michael, Gabriel, Raphael, and Uriel (Enoch, ix. 1; compare xl. 2) does not altogether annihilate them. Uzza (Samḥazai) and Azael (Azazel) still betray the secrets of heaven to King Solomon as they did in Enoch's time (see Jellinek, "B. H." ii. 86; compare with "B. H." v. 173). Some angels were afterward guilty of betraying divine secrets heard from behind the curtain (פרגוד, Ber. 18*b*), and were, therefore, expelled from their positions (see Gen. R. l., lxviii.).

Book of Jubilees, ii. 2, reads:

Creation of Angels.

> "The angels of the face and of glorification, the angels of the elements of fire, wind, and darkness, of hail and hoar frost, thunder and lightning, of cold and heat, of winter and spring, summer and fall, of the abyss and night, of light and morning, were created on the first day."

Pirḳe R. El. iv. says that the angels were created on the second day. In Gen. R. iii. R. Johanan places the creation of the angels on the second day, referring to Ps. civ. 4, "He maketh his angels of winds" ("who maketh winds his messengers," R. V.); R. Ḥanina, on the fifth day, classified them among the winged creatures (Isa. vi. 2).

According to the Slavonic Book of Enoch, God created them on the second day out of fire. The bodies of angels are radiant, their faces like lightning, their eyes as flaming torches (Prayer of Aseneth, xiv.; compare Pesiḳ. I. 3*a*; Cant. R. iii. 11; Matt. xxviii. 3; Luke, ii. 9; Acts, xii. 7). The food of angels is manna, of which Adam and Eve ate before they sinned (Vita Adæ et Evæ, 4; compare Akiba, Yoma, 75*b* on Ps. lxxviii. 25, and Yoma, 4*b* with regard to Moses).

Angels worship God at certain hours of the day (Apoc. Mosis, 17; Testament of Abraham, *B*, iv.; see James's notes, p. 121; compare Sifre, Deut. 306; Gen. R. lxxviii.; Targ. Yer. Gen. xxxii. 27 and Ex. xiv. 24). There are 496,000 myriads of angels (the numerical value of the Hebrew word מלכות sovereignty, or 499,000, the equivalent of צבאת hosts) glorifying God from sunrise to sunrise (Tanna debe Eliyahu R. xvii., xxxi.; Zuṭṭa, xii.; see ed. Friedman, pp. 32, 34, 193).

A guardian angel of Israel is mentioned in the apocryphal Epistle of Jeremy, 7. An angel carries Habakkuk by the hair of his head from Judea to Babylon to bring the pottage he has prepared for Daniel in the lions' den (apocryphal additions to Dan. v. 36).

Angels as Instructors.

Angels endowed with divine knowledge (Hag. 16*a*) appear in the apocalyptic and rabbinic literature as the teachers of men. This is the so-called "whisper of the angels" (שיחת מלאכי השרת) referred to in Zunz, "G.V." 2d ed. 173; compare p. 363 (סחו לי מלאכי השרת). Michael initiated Adam and Seth into the secrets of creation (Apoc. Mosis, iii. 13) and taught Adam agriculture (Vita Adæ et Evæ, 22). The angels Michael, Uriel, and Raziel initiated Enoch into the mysteries of the world (Book of Jubilees, iv. 21; the Ethiopian Enoch, xl. 4, 5, xix. 1, lxxii. 1; and Slavonic Enoch, xxii. 11, xxxiii. 6). Raphael imparted to Noah the secret of healing herbs ("Sefer Noah," Jellinek, "B. H." iii. 155; compare Book of Jubilees, x. 9–10). Michael initiated Abraham into the secret lore (Testament of Abraham, xi.–xiv.). The angel of the face instructed Abraham in Hebrew, the language of creation; revelation thus enabling him to study the holy writings of the first fathers (Book of Jubilees, xii. 25). The angels understand only Hebrew (Ḥag. 16*a*; Soṭah, 33*a*), but the angel Gabriel knows seventy languages, all of which he taught to Joseph (Soṭah, 36*b*; compare Shir ha-Shirim Rabbah fragment in Wertheimer, "Bate Midrashot," iv. 25, where Zagzagael is mentioned as instructor in the seventy languages). Moses, who received all his knowledge from the angel of the face (Book of Jubilees, i., ii., etc.), was taught the art of healing by the angels when on Mount Sinai (Pirḳe R. El. xlvi.; Jellinek, "B. H." i. 61). Yefehfiah ("Divine Beauty"), the angel of the Law, and Meṭaṭron ("the Prince of the Face") taught him the mystery of the practical Cabala (Jellinek, "B. H." i. 61). The angel Zagzagael ("Divine Splendor") instructed Moses in the knowledge of the Ineffable Name (Deut. R. xi.). Uriel disclosed to Ezra the mysteries of life (II Esd. iv. 1). Suriel, the angel of the face, instructed R. Ishmael b. Elisha in laws of hygiene (Ber. 51*a*; compare also Ned. 20*a*). Occasionally the angels themselves gather amid joy and singing to listen to the sage initiated into the sacred lore of heaven (see Ḥag. 14*b*). But at times they also betray jealousy and fear, begrudging man his knowledge of hidden things. Thus, they sought to dissuade the Most High from giving the Law to Moses (Pesiḳ. R. xx., Shab. 88*b*); but Moses pacified them by his arguments. In like manner they sought to drive Akiba out of the realm of paradise, as they did his colleagues Ben 'Azzai and Ben Zoma; but God Himself interceded, saying, "Leave this venerable sage unscathed; for he is worthy to make use of My glory" (Ḥag. 15*b*).

Mediate between God and Men.

The angels mediate between God and man. They carry the prayers up to the throne of God (Tobit, xii. 12, 15; Baruch Apoc., Greek, xi.). According to Ex. R. xxi., an angel set over the prayers weaves them into crowns for the Most High. Angels intercede for those who dwell on earth (Enoch, xl. 6; compare Job, xxxiii. 23, which is to be translated: "If there be on his side one single messenger among a thousand pleading for him"). They pray for Adam's pardon (Apoc. Mosis, 33), and offer praise to God after the same has been granted (*ibid.* 37). But in the same manner in which they place the prayers and good deeds of the righteous before God, they also bring the sins of the evil-doers before Him (Enoch, xcix. 3). They "write down all the deeds and lives before the face of the Lord" (Slavonic Book of Enoch, xix. 5). These records, in the Testament of Abraham, *B*, x., are called the "Books of the Cherubim" because they are kept by the cherubim. From these they read off in the great Judgment Hall of the nether world the register of the sins or the righteous deeds of the soul.

Angels minister to Adam (Sanh. 59*b*; Pirḳe R. El. xii.; compare Matt. iv. 11; Luke, xxii. 43; Heb. i. 13–14) and bring him to his last resting-place (Apoc. Mosis, 38), attend the funeral of Abraham (Testament of Abraham, *A*, xx.), and bury Moses (Deut. R. xi., Targ. Yer. Deut. xxxiv. 6). Angels bring the souls of the righteous to heaven (Testament of Abraham, *A*, xx.; Targ. Yer. Song of Solomon, iv. 12; compare Luke, xvi. 22).

Angels accompany the dead on their departure from this world. "Three bands of angels of the divine ministry [*mal'ake ha-sharet*], or peace [*ha-shalom*], accompany the righteous: the first singing, 'He shall enter in peace'; the second, 'They shall rest on their couches'; and the third, 'The one who walketh in uprightness'" (Isa. lvii. 2). But when a wicked man departs, three bands of angels of destruction (*mal'ake ḥabbalah*) are described as accompanying him singing, "There is no peace, saith my God, to the wicked" (Isa. lvii. 21, Ket. 104*a*, Num. R. xi.).

The angels that execute God's judgment are called "the angels of punishment" (Enoch, lvi. 1, lxx. 11, lxiii. 1), *Saṭanim* (Enoch, xl. 7), mal'ake ḥabbalah (Shab. 55*a*; Yer. Shebu. vi. 37*a*; compare Apoc. John, vii. 2, xii. 7), "angels of the dragon" = Satan; Matt. xxv. 41. Their fierceness and their mode of punishment are described in the Testament of Abraham, *A*, xii., *B*, xi. They "sling the souls of the wicked from one end of the world to the other" (Shab. 152*b*, after I Sam. xxv. 29). These are under the leadership of six or seven archangels: Ḳeẓef, Af, Ḥemah (Deut. ix. 19), Mashḥit, Meshabber, Mekalleh (compare Ps. lxxviii. 49: *'ebrah, za'am, ẓarah*); and above these is the angel of death (Shab. 89*a*; Ex. R. xli.; Testament of Abraham, *A*, xviii.–xx.). Af and Ḥemah threatened to devour Moses because of his neglect to circumcise his son (Ned. 32*a*). God keeps these angels of destruction far from Himself, lest they strike at once, thus affording the people no opportunity for repenting (Yer. Ta'anit, ii. 65*b*).

Angels of the Nether World.

According to John's Apocalypse (Rev. ix. 11) Abaddon (Job, xxxi. 12; Shab. 89*a*) is the angel of the abyss. In the Talmud, Dumah, the angel of silence (after Ps. cxv. 17), is the prince of the nether world in whose charge are the spirits (Sanh. 94*a*, Shab. 152*b*). He announces the arrival of newcomers in Sheol (Ber. 18*b*). According to the Midrash Konen, there are three princes placed at the three upper gates: (1) Ḳipod (the Persian *ḳapod* = "wolf"; see "Zendavesta," tr. by Darmesteter, in "Sacred Books of the East," xxiii. 295); (2) Nagrasagiel, or Nasragiel, the prince of Gehinnom, who shows Moses the nether world and the sufferings of the wicked (Shir ha-Shirim fragment in Wertheimer's "Bate Midrashot," iv. 24; Jellinek, "B. H." iii. 63, v. 130); the messenger of Ahuramazda, Nairyo Sangha, to whose care the souls of the righteous are entrusted ("Vendidad," xix. 34; Darmesteter, "Zendavesta," i. 214, and elsewhere). In Testament of Abraham, *A*, xiii., two archangels are mentioned as assisting at the judgment of the souls: Doḳiel ("the weigher," from *daḳ*., Isa. xl. 15) and Puruel ("the fiery and pitiless angel," probably from *para'*, "paying"; *pur'anut*, "punishment"). In the Midrash Konen and Maseket Gan Eden and Gehinnom (Jellinek, "B. H." v. 44) the following angels of punishment are mentioned for the seven departments: (1) Ḳushiel ("the rigid one of God"); (2) Lahatiel ("the flaming one"); (3) Shofṭiel ("the judge of God"); (4) Makatiel ("the plague of God"); (5) Ḥuṭriel ("the rod of God"); (6) Pusiel (Puriel)—certainly not Hadriel (Jellinek, "B. H." ii. 31)—and (7) Rogziel ("wrath of God").

The tendency to individualize and to give each angel a distinct name and assign to him a particular charge or position grew among the haggadists and devotees of secret lore:—

"Each angel has a tablet on his heart on which his name, combined with the name of God [*El*], is inscribed," says Simon b. Laḳish (Pesiḳ. xii. 108*b*). In Ex. R. xxix. this doctrine is based upon Ps. lxviii. 18: "The Lord dwells in them," wherefore they are called Micha*el*, Gabri*el*, Rapha*el*. They receive their name in accordance with their message, wherefore they can not tell their names (Num. R. x., commenting upon Judges, xiii. 18). "No single angel can carry out two messages, nor can two angels fulfil only one message. Of the three angels that came to Abraham, Michael, the guardian angel of Israel, brought the tidings of Isaac's birth; Gabriel, the angel of heavenly vengeance and of fire, had to overthrow Sodom; and Raphael rescued Lot" (B. M. 86*b*, Gen. R. l., Targ. Yer. Gen. xviii. 2). Michael to the right, Uriel to the left, Gabriel in front, and Raphael in the rear of the throne (Num. R. ii.), are stationed on the four sides of heaven (Midrash Konen, at end; compare Hekalot, vi.). Padael is the name given to the angel who appeared to Samson's parents in the apocryphal history of Philo ("Jew. Quart. Rev." 1898, p. 324). Zeroel (זרוע אל = "Arm of God") was one of the angels who supported Kenaz in his battle against the Amorites; Nathaniel (Nuriel? = "Fire of God"), the angel who saved the men cast into the fire by Jair, the judge, for refusing to worship his idols (*ibid.*). Over each force and element of life an angel is placed: one over the winds (Rev. vii. 1); one over fire (*ibid.* xiv. 18); and one over water (*ibid.* xvi. 5).

In the Hebrew Enoch (Jellinek, “B. H.” v. 176) the following angel-princes are named:

Baradiel,	from	*barad,*	set over the	hail.
Ruḥiel,	„	*ruaḥ,*	„ „ „	wind.
Baraḳiel,	„	*baraḳ,*	„ „ „	lightning.
Za‘amael,	„	*za‘am,*	„ „ „	storm.
Ziḳiel,	„	*ziḳ,*	„ „ „	glow wind (or comet).
Zava‘el,	„	*zva‘ot,*	„ „ „	whirlwind.
Za‘afiel,	„	*za‘af,*	„ „ „	hurricane.
Ra‘amiel,	„	*ra‘am,*	„ „ „	thunder.
Ra‘ashiel,	„	*ra‘ash,*	„ „ „	earthquake.
Shalgiel,	„	*sheleg,*	„ „ „	snow.
Maṭariel,	„	*maṭar,*	„ „ „	rain.
Shamsiel,	„	*shemesh,*	„ „ „	light of day.
Lailahel,	„	*lailah,*	„ „ „	night.
Galgaliel,	„	*galgal,*	„ „ „	wheel of the sun.
Ofaniel,	„	*ofan,*	„ „ „	wheel of the moon.
Kokbiel,	„	*kokab,*	„ „ „	stars.
Rehaṭiel,	„	*rahat* (“runner”),	set over the	planets.

A few of these names recur in Enoch, viii. and lxix. The angel of hail is introduced under the obscure name of Yurḳemo (Pes. 118*a*). The angel of night is called Lailah (Sanh. 16*a*). The one set over the sea, Sar shel yam (Gen. R. x.), is called Rahab (B. B. 74*b*, after Job, xxvi. 12). He was slain by God at the Creation, because he refused to swallow the water for the drying of the land; and his body is covered by water lest all creatures should perish from his stench (compare also Pes. 118*b*). The angel set over the rain is Ridya, רדיא (“the Irrigator”); according to Kohut, “Jüd. Angelologie,” p. 45, Rediyao (Persian, *Areduyao, Ardoi*); Ta‘anit, 25*b*; Yoma, 21*a* (Rashi): “He resembles a calf, and is stationed between the upper and the lower abyss, saying to the one, ‘Let your waters run down’; and to the other, ‘Let your waters spring up.’” Of the seven names of the earth (Ab. R. N. *A*, xxxvii.; Pesiḳ. R. K. 155*a*) seven angel names were formed: (1) Arẓiel, (2) Admael, (3) Ḥarabael,(4) Yabbashael, (5) ‘Arḳiel (compare ‘Arḳas, Slavonic Book of Enoch, xxiv. 2), (6) Ḥaldiel, and (7) Tebliel. They were stationed in the second heaven (see “Merkabah de-Rabbi Ishmael” in Wertheimer’s “Bate Midrashot,” i. 22.

An angel set over the beasts is mentioned in Hermas’ “Visions,” iv. 2; his name is Thegri (see Hekalot, vi.) (Turiel = “bull-god,” Jerome on Hab. i. 14). In Abraham of Granada’s “Berit Menuḥah,” p. 37, are mentioned the angel Jeḥiel (Hayyel?), set over the wild beasts; ‘Anpiel, over the birds; Hariel (Behemiel), over the tame beasts; Shaḳẓiel, over the water-insects; Dagiel, over the fish; Ilaniel, over the fruit-bearing trees; Seraḳel, over the trees not bearing fruit.

“There is not a stalk on earth that has not its angelic star [*mazzal*] in heaven” (Gen. R. x.)—a genuinely Persian notion. “Every single flower is appropriate to an angel” (“Bundahish,” xxvii. 24).

Already in Dan. x. 20–21, the idea prevails that each nation has a heavenly guardian angel or prince. In Enoch, lxxxix. 59, the seventy shepherds are the guardian angels of the seventy nations over whom Michael, as Israel’s angel-prince, is set as ruler.

Guardians of the Nations.

With these seventy-one angel-princes of the world God sits in council when holding judgment over the world (Hebrew Enoch; Jellinek, “B. H.” v. 181); each pleading the cause of his nation before God (Targ. Yer. Gen. xi. 7–8, Pirḳe R. El. xxiv.). At times they accuse Israel (Pesiḳ. xxvii. 176*a*); at times they find especial merit in him (Suk. 29*a*). They are the “gods” whom the Lord crushes before He executes His punishment upon the nations in their charge (Suk. 29*a*, according to Ex. xii. 12; Soṭah, 9*a*). These angel-princes of the nations—of Babel, Media, Greece, Syria, and Rome—Jacob saw in his dream ascending and descending the ladder (Gen. R. lxviii., Pesiḳ. xxiii. 151*a*). The angel with whom Jacob wrestled was the angel-prince of Edom (Gen. R. lxxvii.), Samael, the head of all Satans (Tan., Wayishlaḥ, ii. 25). The name of the angel of Egypt is Miẓraim (Ex. R. xxi.) or Uzza (Midr. Wayosha‘; Jellinek, “B. H.” i. 39; Hekalot, v. 172); that of Persia’s angel-prince is Dubbiel (= Bear-god: Yoma, 77*a*, after Dan. vii. 5). But Michael, the angel-prince of Jerusalem (Zion, Targ. Ps. cxxxvii. 7–8), is set over all the seventy angels (Midr. Abkir; Yalḳ., Gen. § 132).

There is, however, a special angel-prince set over the world, Sar ha-‘olam (Yeb. 16*b*, Ḥul. 60*a*, Sanh. 94*a*). He composed the verses, Ps. xxxvii. 25, civ. 31, and, partly, Isa. xxiv. 16. An angel of mankind is mentioned also (Apoc. Mosis, 32). He has been identified, whether correctly or incorrectly (see Tos. Yeb. 16*b*; Wiener, “Ben Chananja,” ix. 600; Kohut, “Jüd. Angelologie,” p. 42), with Meṭaṭron. In order fully to resemble the court of the Persian King of Kings, the heavenly court is put in charge of a vice-regent, the *sar ha-Panim* (“prince of the divine face”). According to the Testament of Job (lii.), this vice-regent “sitteth upon the great chariot” (see Kohler, “Semitic Studies,”p. 299); he is, according to Philo “On Dreams” (i. 25), “the driver of the chariot” (*ἡνιοχος ἁρματος*). His “name is like the name of his Master” (Sanh. 38*b*, according to Ex. xxiii. 21), known under the name of “Meṭaṭron” (Mithra; see Dio Chrysostomus, “Oratio,” xxxvi. Windischmann, “Zoroastrische Studien,” pp. 309–312; frequently explained as “Metator,” “Metathronos,” and “Metatyranos.” See Sachs, “Beiträge,” i. 108; Frank, “Kabbala,” p. 43; Jellinek, “B. H.” ii. 30; Levy, “Chal. Wörterb.” *s.v.*; Kohut, “Aruch,” *s.v.*).

This vice-regent is probably identical with the archangel Jehoel mentioned in Apoc. Abraham, x., as mediator of the ineffable name of God; also with Yehadriel (“Hekalot” in Jellinek, “B. H.” ii. 47); and perhaps also with Akathriel, the occupant of God’s throne (Ber. 7*a*).

But alongside of Meṭaṭron is mentioned in “Maseket Aẓilut” (based on Job, xli. 9), as “brother” and above him, Sandalfon, explained as Synadelphon (“twin-brother”) and as “Sardonyx” (see Jellinek, in “Ben Chananja,” iv. 182, 329, 365; compare Slavonic Book of Enoch, xxv.). The later Cabala places Akathriel above the twin-brothers Meṭaṭron (= Enoch) and Sandalfon (= Elijah) (see Yalḳ. Ḥadash, *s.v.* “Malakim,” pp. 38–39). Of well-nigh equal rank with Meṭaṭron are Sandalfon and Akathriel (“the crown of God”; Ber. 7*a*).

Beneath these are the seven heavens with Michael, Gabriel, Shateiel (“angel of silence”), Shaḥaḳiel, (“angel of shaḥaḳim”), Baradiel, Baraḳiel, and Sadriel (“angel of order”) as chiefs; and beneath them in the Velon, Galgaliel, and Ofaniel, Rehaṭiel, and Kokbiel as the angels of sun-wheel, moon-wheel, planets, and the other stars with all their hosts; the seventy-two angel-princes of the nations being stationed above these (Hekalot, published by Jellinek, “Ḳontros ha-Maggid,” pp. 31 *et seq.*).

Besides these, sixty-three angels are mentioned as janitors of the seven heavens (“Hekalot,” xv.; Jellinek, “B. H.” iii. *et seq.*), and others stationed at each of the seven heavens as seal-bearers (*ibid.* xvii.–xxii.); and above all these, as head and chief, Anfiel, whose crown “branches out” to “cover the heaven with the divine majesty” (Hab. iii. 3). Mention is made also of Ofaniel, Seraphiel, Cherubiel, as chiefs of the ofanim, seraphim, and cherubim; of Rikbiel and Hailael (Hayael?) as chiefs of the divine chariot and the ḥayyot; Sofriel as “bookkeeper”; Dabriel as interpreter of the “word”; Ḳafẓiel (“speed of God”); Hadriel, or Hadraniel (“majesty of God”);

Adiririon (Adiryah? "might of God"; see Jellinek, "B. H." v. 178-180, and "Hekalot" fragment in "Ḳontros ha-Maggid," pp. 34-36; *idem*, "B. H." i. 58). Zunz counts forty angels mentioned in the liturgy ("S. P." p. 476). These are increased to the extent of thousands, with names far beyond intelligibility or recognition, but scarcely, as Zunz thinks ("G. V." p. 177), altogether invented.

Conjuring by Names of Angels.

The names of angels formed a favorite study of the Essenes or Ḥasidim in view of the magical cures effected by means of these names; for upon the accurate knowledge of the name and sphere of each angel, and of the power exerted by him on certain evil spirits, depended the efficacy of the conjurers. In the Testament of Solomon (translated by Conybeare, "Jew. Quart. Rev." 1898, pp. 1-45)—an apocryphal book belonging probably to the first century —King Solomon is introduced as giving his experiences on meeting the various demons, of each of whom he asks his name as well as the name of the angel that can overpower him. Asmodeus answers that he is frustrated by Raphael, the archangel; another demon answers Paltiel is his antagonist; a third, Uriel, etc. (see pp. 24, 38, 40). The magic book "The Sword of Moses," published and translated by M. Gaster (London, 1896), is based upon the same principle, as are parts of the Book of Raziel ascribed to Eleazar of Worms. In Pseudo-Sirach (ed. Steinschneider, p. 23*a*) the three angels, Sanuy, Sansanuy, and Samangaluf are said to have brought Lilith back to Adam, and when she turned child-murderess like Lamia, they were set in control over her; see Brueck, "Rabbinische Ceremonial-bräuche," pp. 50-55; see also Amulet.

A strange story is told in Yalk., Lam. 1001: "At the siege of Jerusalem by Nebuchadnezzar, after the mighty hero Abiḳa ben Gafteri had fallen, Hananeel, the uncle of Jeremiah, conjured up angels who struck terror into the hearts of the Chaldeans, thus setting them to flight. But God, having decreed the fall of the city, had changed the names of the angels when Hananeel summoned up the prince of the world by using the Ineffable Name, and he lifted Jerusalem into the air, but God cast it down again. To this the verse Lam. ii. 1 refers." According to another story (*ibid.* 1012), the leading men of the city had conjured up the angels of water and of fire to surround the city with walls of fire and water; but God changed the names of the angels.

Angel Worship.

The charge of angel-worship raised against the Jews, based upon Col. ii. 18, is decidedly unfounded. Paul had probably the same Gnostic sect in mind that Celsus refers to when he repeats the charge of Aristides ("Apology," xiv. 4; see Origen, book i. 26, v. 6-34, 41), telling us (Origen, vi. 30) of magical figures on which he found the seven angels inscribed: (1) Michael, with the figure of a lion; (2) Suriel, as a bull (*shor* or *tura* = Turiel; see Jerome on Hab. i. 14); (3) Raphael in a serpentine form; (4) Gabriel as an eagle; (5) Yalda Bahut with the countenance of a bear; (6) Erathaol as a dog; and (7) Onoel in the shape of an ass. Of these seven archons (Celsus, vi. 27) Paul speaks continually in his letters (I Cor. ii. 6-8; Col. ii. 8, 20). But this Ophite sect has nothing to do with the Jews. On the contrary, R. Ishmael, in Mek., Yithro, x., expressly applies the prohibition of idolatry to the likeness of angels of the ofanim and cherubim (compare Targ. Yer. to Ex. xx. 20). "He who slaughters an animal in the name of sun, moon, stars, and planets, or in the name of Michael, the great captain of the heavenly hosts, renders the same an offering to dead idols" (Ḥul. 40*a*; ‘Ab. Zarah, 42*b*). "Not as one who would first send his servant to a friend to ask for aid in his hour of need should man apply to Michael, or Gabriel, to intercede for him; but he should turn immediately to God Himself; for 'whosoever shall call on the name of the Lord shall be delivered'" (Joel, iii. 5 [A. V. ii. 32]; Yer. Ber. ix. 13*a*; compare Rev. xix. 10, xxii. 8-9). "Four keys are in the keeping of God exclusively and not in that of the angels: the keys of rain, of nourishment, of birth, and of resurrection" (Targ. Yer. to Gen. xxx. 22; Deut. xxviii. 12; compare Ta‘anit, 2*a*, where only three keys are mentioned). This is rightly interpreted by Gfrörer, "Jahrhundert des Heils," i. 377, as meant to exclude prayer to the angels. The invocations of angels occurring in the liturgy were addressed to them as mediators, not as helpers. Still many rabbinical authorities disapproved of such invocations (see the literature in Zunz, "S. P." p. 148).

Inferior to Man.

However great the tendency to enlarge the number and the influence of the angels over life, there is, on the other hand, great stress laid upon the fact that the angels are in many respects inferior to man. Already Enoch (xv. 2) intercedes on behalf of the angels, instead of having them intercede for him; and none of the angels could see what he saw of God's glory (*ibid.* xiv. 21), or learn the secrets of God as he knew them (Slavonic Book of Enoch, xxiv. 3; compare Sifra, 2*b*; Ascensio, Isa. ix. 27-38). Adam was to be worshiped by the angels as the image of God (Vita Adæ et Evæ, p. 14; Gen. R. viii.). Before his fall his place was within the precincts of God's own majesty, where the angels can not stay (Gen. R. xxi.); and so in the future will the righteous again be placed nearer to God than the angels (Deut. R. 1, Yer. Shab. vi. 8*d*, Ned. 32*a*). Indeed, "they were inferior in intelligence to Adam, when names were given to all things" (Pirḳe R. El. xiii.). "The righteous rank above the angels" (Sanh. 93*a*; Midr. Teh., Ps. ciii. 18; compare I Cor. vi. 3; Heb. ii. 5). "When Aaron in his vestments as high priest entered the Holy of Holies, the ministering angels fled in awe before him" (Pesiḳ. R. 47; compare Ex. R. xxxviii.). "Israel is dearer to God than the angels; for Israel's praise is not confined to stated hours as that of the angels. Israel pronounces the name of God after two words: 'Hear, Israel'; the angels after three: 'Holy, Holy, Holy!' Israel begins the song of praise on earth and the angels in heaven chime in" (Ḥul. 91*b*; Midr. Teh., Ps. civ. 1). "Angels minister to the saints" (Heb. i. 13-14).

Philo on Angels.

Philo was inclined to accept the existence of angels as a fact far more than his allegorical system would lead one to surmise. He was prompted to do so through the example of the Stoics: "Beings whom other philosophers called demons, Moses usually called angels"; they are "souls hovering in the air"; "some have descended into bodies; others have not thought fit to approach any part of the earth; and these, hallowed and surrounded by the ministrations of the Father, the Creator employs as assistants and ministers for the care of the mortals." "They report the injunctions of the Father to His children, and the necessities of the children to the Father. And, with reference to this, Holy Scripture represents them as 'ascending and descending.' . . . Not God, but we mortals are in need of a mediator and intercessor" (*idem*, "On Dreams," i. 22). "Souls, demons, and angels are things differing in name, but identical in reality. Yet, as men speak of God and of evil demons and of good and evil souls, so they speak of angels, calling them ambassadors of man to God and of God to man; and they are holy because of this blameless and honorable office. Others, on the contrary, are profane and unworthy, as is seen in Ps. lxxviii. 49" (*idem*, "On Giants," pp. 3–4).

But Philo also calls them *logoi*, "words," or "intellects" (*idem*, "On Confusion of Language," p. 8; "On Dreams," i. 12, 19; "Allegory," iii. 62; compare Hag. 14*a*, based on Ps. xxxiii. 6). They are also called "God's own powers with whom the Father of the Universe consulted when saying: 'Let us make man.' To them He gave the mortal part of our soul to form by imitating His art when He shaped the rational principle in us" (*idem*, "On Fugitives," p. 13). Angels are the priests in the heavenly temple (*idem*, "Monarchy," ii. 1). And in the same manner as the rabbis speak of Michael (Meṭaṭron) as the captain of the heavenly host, as the high priest that offers sacrifice in the upper temple, and as the charioteer of God, Philo says:

> "The Father, the Creator of the universe, gave to the archangel and most ancient *logos* ["word"] the privilege of standing on the confines, separating the creature from the Creator, and of interceding between the immortal God and the mortal, as ambassador sent by the ruler to the subject. Rejoicing in this position, he says [Deut. v. 5]: 'I stood between the Lord and you,' being neither uncreated nor created, but between the two, pledge and security to the Creator and to the creature, a hope that the merciful God would not despise His work" ("On Who is the Heir," p. 42; compare "On Dreams," i. 25; "On Fugitives," p. 19, where he is called "the charioteer of the powers"; and "On Confusion of Languages," p. 28, where, like Meṭaṭron with his seventy-two names, he is called "the great archangel of many names").

Saadia, Ha-Levi, Ibn Daud, Maimonides.

The medieval philosophers treated the belief in angels in a far more rationalistic spirit than did Philo. Saadia, finding man to be the object of Creation, and therefore in the center of the world, claims for him a rank higher than that of the angels ("Emunot we-De'ot," iv. 1). They are to him creatures of light, ethereal beings, created for special purposes (ii. 8), visions of the prophet rather than realities. So is the fiery angel of death (iv. 6). Satan to him is a human being (see Ibn Ezra to Num. xxii. 22). Judah ha-Levi also sees in the angels beings created of ethereal matter; some for a certain time, and those of the upper world for eternity ("Cuzari," iv. 13; see Cassel's note). Concerning Gabirol's angels formed of fire, see Kaufmann, "Attributenlehre," pp. 184, 505. To Ibn Daud angels are intelligences, created, yet eternal and spiritual; the motors of the soul; the highest of these intelligences being the active intellect of the Tenth Sphere, identified by the Mohammedan thinkers (according to "Cuzari," i. 87) with the angel Gabriel and the Holy Ghost, but mentioned already in Job, xxxii. 8 as "the spirit in man; and the breath [A.V. "inspiration"] of the Almighty that giveth them understanding." Maimonides, taking as his guide Aristotle, who places the "Intelligences" as intermediate beings between the Prime Cause and existing things—by the agency of which is produced the motion of the spheres on which all existence depends—declares the Biblical angels to be the beings with whom God consults before taking action (Gen. R. viii.). Differing, however, from Aristotle, whose "Intelligences" are coexistent with the First Cause, he asserts that the angels are created by God, and endowed with the power of governing the spheres; that they are conscious beings possessed of a free will, but that, unlike human beings, they are in constant action and without evil ("Moreh," ii. 6–7). Far from accepting Scripture in its literal meaning, when angels are introduced, he finds the term "angel" applied to men, to elements, and to animals, as well as to ideals perceived by the Prophets. "Natural forces and angels are identical. When the rabbis (Midr. Eccl. x. 7) say: 'When man sleeps, his soul speaks to the angel, and the angel to the cherub,' man's imaginative faculty is called angel, and his intellectual faculty is called cherub. The form in which angels appear characterizes the mental vision of the seer." He thus distinguishes between angels endowed with eternal life—such as the Spheric Intelligences—and the perishable phenomena. But then these spheres and angels were not created for our sake, says Maimonides ("Moreh," iii. 13) in opposition to Saadia, who says: "Man is superior to everything formed of earthly matter, but exceedingly inferior to the spheres and intelligences." Of such spheres, Aristotle counted fifty, numbering as many ideals. Maimonides, with later philosophers, assumes these to be ten, the Tenth Intelligence being the Active Intellect. For this reason, Maimonides follows the Cabala in counting ten classes of angels ("Yesode ha-Torah," ii. 7).

Cabalistic View.

In the Cabala two currents run in parallel lines. The practical Cabala, bent upon overruling, through incantations, the destinies of earthly life by the higher powers, is ever busy finding new names of angels able to control the lower forces. Such attempts are made in "Sefer ha-Razim," which is a list of angels for the months of the year, in the "Sefer Raziel," and the like. On the other hand, the Neoplatonic view of Emanation, and the idea of the macrocosm, or the world in its totality, being the evolution of the image of God, the type of which is man as microcosm, necessarily made man the object of Creation, so that in this view he ranks above the angels (Zohar, iii. 68); while they (the angels) belong to the lower realm, to the world of formation (*yeẓirah*), and not to that of Creation (*beriah*), to which the higher spirits belong. The angels are intellectual, spiritual beings, yet invested with a shining garb to make them visible to man (Frank and Jellinek, "Cabala," p. 161; Joel, "Religionsphilosophie d. Zohar," pp. 278–279).

Relation to non-Jewish Religions.

How far Jewish Angelology was influenced by Babylonian and Persian mythology, and what its relations are to Mandæan lore and to Egyptian-Hellenistic gnosticism, is still a matter of dispute among students (see Kohut, "Jüd. Angelologie"; Schorr, "He-Ḥaluẓ," viii. 1–120; Gunkel, "Schöpfung und Chaos"; Dieterich, "Abraxas"; Kessler, "Mandæans" in Schaaf and Herzog's "Encyclopedia of Religious Knowledge." The Mandæans also speak of angels of light (not kings, Brandt, "Mandäische Schriften," p. 14) surrounding the king of light (Brandt, "Mandäische Religion," p. 42; "Mandäische Schriften," p. 14), and of angels of wrath surrounding the evil spirit Ruaḥ (Brandt, "Mandäische Religion," p. 123); of three angels, or guardian spirits, accompanying Adam (*ibid.* pp. 44, 122); of the angel Yofim (Yofafin) (*ibid.* pp. 26, 198); of Ptahil (Gabriel), the assistant of the Lord of Life at the world's creation (*ibid.* pp. 34, 35, 44, 50–55); of the great sardonyx (p. 221) as well as of Azazel (p. 198); of the seven nether worlds with their archdemons as rulers ("Mandäische Schriften," pp. 137–183). But Persian mythology is throughout interwoven with Angelology (see Brandt, "Mandäische Religion," pp. 194–198). Coptic gnosticism, also, has Ariel as king of the nether world, corresponding with Ur of the Mandæans (see Schmidt, "Gnostische Schriften in Koptischer Sprache," p. 413).

That the archons, the seventy-two rulers of the world (Schmidt, *ibid.* p. 194), are alluded to in I Cor. ii. 6–8; Gal. iv. 3, 9; and elsewhere, by Paul, has been shown by Everling, "Die Paulinische Angelologie und Dämonologie," pp. 12, 75. The "angel worship" (Col. ii. 18) is of the Gnostics, not of the Jews. For Christian Angelology in general, Zunz ("S. P." p. 148) may be quoted: "The Coptic, the Abyssinian, the Greek, and the Roman churches adopted the invocation of angels in their liturgy; and since the tenth century the whole earth has been divided among the various tutelary angels and saints."

Mohammedan Angelology.

In the Koran, Jewish and Gnostic angelologies seem to be intermingled. In Mohammed's time the old Arabian goddesses—Al-Lat, Al-Uzza, and Manat—were spoken of as angels and daughters of God (Koran, sura xxxvii. § 150, liii. § 20). The chief of all the archangels is Gabriel (Jibril); Michael comes next; Israfil (Sarafiel) sounds the trumpet of the resurrection; and Azrael is the angel of death (the etymology of the last name is obscure). Instead of four, there are eight angels that support the throne of God (sura xlix. § 17). Some angels have two, some three, others four wings (sura xxxv. § 2). "They celebrate the praise of their Lord and ask forgiveness for those that are on earth" (sura xlii. § 2). "Each man hath a succession of angels before and behind him" (sura xiii. § 12). The chief angel, who has charge of hell, is Malik (etymology unknown). Hell has seven doors (sura xv. § 44). Nineteen angels are set over the fire (sura lxxiv. §§ 30–31). Munkar and Nakir are the angels that interrogate the dead; and another angel, Ruman, makes each man write down his deeds (Wolff, "Muhammedanische Eschatologie," pp. 69, 166). Regarding the names of other angels, used for invocations and exorcism, see Hughes, "Dict. of Islam," under "Da'wah" (incantation).

K.

ANGELUS: A Jewish merchant in Rome in the thirteenth century, who, with other merchants—Sabbatinus, Museus, Salamon, and Consiliolus—held commercial relations with the papal court. They were associated in business with Christians who possessed the rights of Roman citizenship; but they themselves were not enrolled in the merchants' gild and did not have those rights. A bull of Pope Alexander IV., dated Naples, February 1, 1255, exempted them from the traveling-tax.

H. V.

ANGER: A violent passion aroused by some wrong experienced; vengeance is sought upon the one who committed or caused it. It includes every degree, from displeasure and indignation at unworthy acts to wrath and fury. The Hebrew terms are *ḥaron af*, literally, "the burning of the nose"—that is, "the kindling of anger"; *'ebrah*, "a boiling over"; *rogez*, "anger"; *ka'as*, "chagrin"; *ḳeẓef*, "provocation"; *ḥemah*, "wrath"; *za'af*, "rage"; while *za'am*, though translated in the A. V. "indignation," implies rather an outpouring of fury. Anger, therefore, is an element of punitive or vindictive justice in man, which, anthropopathically, is applied also to God.

——**Anger of God.—Biblical View:** One of the most essential doctrines of the Bible, and hence also of Judaism, is God's holiness. God is not an intellectual abstraction, nor is He conceived as a being indifferent to the doings of man; and His pure and lofty nature resents most energetically anything wrong and impure in the moral world: "O Lord, my God, mine Holy One . . . Thou art of eyes too pure to behold evil, and canst not look on iniquity" (Hab. i. 12, 13 *Heb.*). "The man of unclean lips can not bear the sight of His holiness (see Isa. vi. 5). "The sinners in Zion are afraid . . . Who among us shall dwell with the devouring fire?" (Isa. xxxiii. 14). "Evil shall not dwell with thee; scoffers [A. V. "the foolish"] shall not stand in thy sight" (Ps. v. 4, 5). "He that telleth lies shall not tarry in my sight" (Ps. ci. 7). An evil tongue and evil actions "provoke the eyes of his glory" (Isa. iii. 8). "For the Lord thy God is a consuming fire, even a jealous God" (Deut. iv. 24). His anger is kindled not only by idolatry (Deut. vi. 15, ix. 19, xxix. 17; II Kings, xvii. 18, and elsewhere), by rebellion (Num. xi. 1), ingratitude (Num. xi. 10), disregard of things holy (Num. xvii. 13, xvi. 4, 7; Lev. x. 6; Num. xxv. 3; II Sam. vi. 7; Isa. v. 25). and disobedience (Ex. iv. 14), but also by the oppression of the poor (Ex. xxii. 23; Isa. ix. 16, x. 4).

The divine Anger kindled becomes "a fire which shall burn unto the lowest nether world and consume the earth with her increase and set on fire the foundations of the mountains" (Deut. xxxii. 22; compare Jer. xv. 14, xvii. 4; Ps. xxi. 10, lxxviii. 21). "Wherefore my fury and mine anger was poured forth and blazed up [A. V. "was kindled"] in the cities of Judah and the streets of Jerusalem; so that they became waste and desolate as they are at this day" (Jer. xliv. 6; compare also Isa. xlii. 25, and Ps. lxxix. 5). Especially forcible is the description of God's avenging wrath in Nahum, i. 6, where the physical and moral forces combine to make the prophet exclaim: "Who can stand before his wrath [A. V. "indignation"]? and who can abide in the fierceness of his anger? His fury is poured out like fire, and the rocks are thrown down by him." At times the divine Anger is sent forth as an elementary force to work destruction on individuals or nations (Ex. xv. 7; Ps. lxxviii. 49; Job, xx. 23; Isa. xxx. 30); or God (like the goddess of destiny) offers a wine-cup of foaming wrath to the nations to drink of and become mad (Jer. xxv. 15 *et seq.*). "God as a righteous judge is wroth every day" (Ps. vii. 12, *Heb.*; A. V. translates this differently); and He has certain set days for the outbursts of His Anger (Isa. xiii. 13; Zeph. i. 15, 18, ii. 2, 3; Ezek. vii. 19; Lam. i. 12, ii. 1, 21, 22; Prov. xi. 4; Job, xx. 28). Hence the day of wrath corresponds to the Day of Judgment or doomsday (Zeph. i. 15, ii. 2, iii. 8 and elsewhere).

Principles of Application.

But whether directed against natural powers (Ps. xviii. 9, 16; compare, however, Hab. iii. 8), against individuals (II Sam. vi. 7), against Israel (Deut. xxix. 27, Jer. xxv. 37 *et seq*), or the nations (Isa. lxiii. 3, 6; Jer. x. 25; Ezek. xxxvi. 5); whether it inflicts immediate death (Num. xi. 33, Ps. lxxviii. 38), or uses the foe as a rod ("O Assyrian, the rod of mine anger," Isa. x. 5), God's anger is never the outburst of a mere capricious passion, but is a necessary element of His moral order. "Fury is not in me" (Isa. xxvii. 4). It is restrained and controlled by divine mercy, the correlate attribute of justice. As Hosea, xi. 8, 9 says: "Mine heart is turned within me, my repentings are kindled together; I will not execute the fierceness of mine anger." "Full of compassion . . . he many a time turned away his anger and did not stir up all his wrath" (Ps. lxxviii. 38). God is also "long-suffering" (*erek appayim*) and "slow to anger" (Ex. xxxiv. 6; Nahum, i. 3). "Though thou wast angry with me, thine anger is turned away, and thou comfortest me" (Isa. xii. 1). "In wrath thou rememberest mercy" (Hab. iii. 2, *Heb.*). "I will not contend forever, neither will I always be wroth" (Isa. lvii. 16). "In my wrath I smote thee but in my favor have I had mercy on thee" (Isa. lx. 10).

Anger at sin (the outflow of *middat ha-din* = justice) and compassion upon the sinner (the outflow of *middat ha-raḥamim* = mercy), while they are merely human conceptions of God, are inseparable from God's manifestations as the righteous ruler of the world. Without the former there would be no fear of God or obedience to His law (Ex. xx. 20; Deut. xi. 16, 17; Josh. xxiv. 19, 20); without the latter, no repentance or return of the sinner to the path of life (Micah, vii. 18; Jonah, iii. 9; Ezek. xviii. 23). Great calamities that befell the land under Herod were ascribed to the "anger of God" (Josephus, "Ant." xv. 9, § 1).

——**In Rabbinical Literature:** God's Anger is often made the subject of discussion. God said to Moses: "Let my face of wrath pass by and I will give thee ease" (Ex. xxxiii. 14, *Heb.*). Is there wrath before God? Yes, "God is angry every day" (Ps. vii. 12, *Heb.*)—that is, for a brief moment imperceptible to any creature: "For his anger endureth but a moment; in his favor is life" (Ps. xxx. 6), or, again, "Hide thyself for a little moment until the wrath [A.V. "indignation"] is passed" (Isa. xxvi. 20). Balaam alone was able to select the right moment for his curses; and he would have annihilated the people of Israel, had not God withheld His anger at the critical moment: "How shall I curse if God doth not curse? or how shall I pour out wrath if the Lord doth not pour out wrath?" (Num. xxiii. 8, *Heb.*). This withholding of wrath by God is the "righteousness" or mercies spoken of in Micah, vi. 5. Joshua b. Levi, knowing the time most favorable to cursing to be the early morning, wanted to use it against some troublesome heretic in his neighborhood. But as he slept on beyond the appointed hour, he took this as a hint that heaven was against such practises (Ber. 7*a*; 'Ab. Zarah, 4*b*). Rabbi Meir says: "When the heathen kings rise in the morning and prostrate themselves before the sun, this is the time when God is angry" (Ber. 7*a*). "As long as there are wicked men in the world, so long is there wrath in the world" (Sanh. xi., last Mishnah, pp. 111*b*, 113*b*). "Every hypocrite brings wrath into the world" (Soṭah, 41*a*; Job, xxxvi. 13, "The hypocrites in heart heap up wrath"). "God's indignation is roused when the Shekinah in the house of worship has to wait for the number of ten to begin the regular service" (R. Johanan, Ber. 6*b*). If one verse reads, "God is wrathful every day" (Ps. vii. 12, *Heb.*) and another, "Who can tarry before his wrath" (Nahum, i. 6, *Heb.*), the one refers to the judgment of the community, the other to that of the individual ('Ab Zarah, 4*a*). If one Biblical passage reads, "Fury is not in me" (Isa. xxvii. 4), and another, "The Lord revengeth and is furious" (Nahum, i. 2), the one refers to Israel, the other to the heathen nations. This is explained later with reference to Amos, iii. 2, *Heb.* The transgressions of Israel are punished in this world, while those of the heathen accumulate and are punished in the next ('Ab. Zarah, 4*a*; compare Shab. 30*b*). Similarly (Ps. lxxvi. 11, *Heb.*, A. V. 10), "The wrath of man shall praise thee, the remainder of thy wrath shalt thou restrain," is thus explained in Yer. Ma'as. iii. 51*a*: "The divine wrath expended upon the righteous in this world conduces to praise; while the wrath is all reserved for the wicked in the next." In Midr. Teh. the wrath is referred to Israel in this world and to the heathen nations on the Day of Judgment in the next (Midr. Teh., ed. Buber, 342).

Rabbinical Sayings.

The Day of Wrath.

"The day of wrath" (Zeph. i. 15) is understood by the rabbis (B. B. 10*a*, 116*a*; Shab. 118*a*; 'Ab. Zarah, 18*b*) to refer to the Judgment of Gehenna; likewise, "the day that shall burn as an oven" (Mal. iii. 9; see Sanh. 110*b*; 'Ab. Zarah, 4*a*; Gen. R. vi., xxi., xxvi., xlviii., and elsewhere). So is the "day of vengeance" (Deut. xxxii. 35, Samaritan text) understood to be the great Judgment Day in Targ. Yer. and Sifre Deut. 325 (see Geiger, "Urschrift," p. 247; "Jüd. Zeit." ix. 92; Driver's "Commentary on Deuteronomy," pp. 374 *et seq.*). This idea of a day of wrath reserved for the wicked (referred to frequently in the "Sibyllines," ii. 170 and Fragment, ii. 38, iii. 556–561, 810, iv. 159 *et seq.*, v. 358; in Book of Enoch, ed. Dillmann, xci. 7–9; and also in the Hasidic, II. Macc. vii. 30–38, but not in Ecclus. [Sirach], v. 7) finds its emphatic utterance in the New Testament: "O generation of hypocrites [A.V., "vipers"], who hath warned you to flee from the wrath to come?" (John the Baptist, in Matt. iii. 7); Paul, in Rom. ii. 5: "Thou treasurest up wrath against the day of wrath" (compare *ib.* i. 18, v. 9); xii. 19: "Avenge not yourselves, but give place unto the [divine] wrath; as it is written, To me belongeth vengeance" (Deut. xxxii. 35); "The wrath of God cometh upon the sons of disobedience" (Eph. v. 6; compare I Thess. i. 10; Col. iii. 6; Rev. vi. 17, xix. 15; John, iii. 36; Sanday, "Epistle to the Romans," p. 41; and Hastings, "Dict. Bible," *s.v.* "Anger").

Tempered by Mercy.

Still, God's anger is ever tempered with mercy, as is evident from Hosea, i. 6: "I will not have mercy and yet I will forgive them" (Pes. 87*b*; A. V., differently). "The great power of God consists in his constraining his anger and being longsuffering even toward the wicked" (Yoma, 69*b*). "He is longsuffering inasmuch as he sends his anger and wrath far away from his presence, so as to grant the people time for repentance; like a king who has two harsh and fiery legions, which he sends into different countries lest their zeal and eagerness to punish might interfere with the pacification of his subjects" (Yer. Ta'anit, ii. 65*b*.). "What is the meaning of 'the Lord spake unto Moses face to face'?" (Ex. xxxiii. 11). He said to him: "When thy face shows anger, I shall appease thee, and if I show a face of anger, thou mayest appease me" (Ex. R. xlv.). "So did Ishmael ben Elisha pray upon entering the Holy of Holies with the holy incense, and, seeing Akatriel, the head of the archangels, seated upon the throne of the Most High—who addressed him in the name of God, 'Bless me, my son!'—'May it be thy will that thy mercy prevail over thine anger and thy mercy be uppermost among thy attributes, so that thou mayest deal with thy children after the measure of loving-kindness and go beyond that of strict justice!'" Another version is: God Himself prays: "May my mercy prevail upon mine anger and my mercy be uppermost among mine attributes, so that I may deal with my children after the measure of loving-kindness and go beyond that of strict justice!" (Ber. 7*a*).

A "philosopher" (פלוספוס) asked R. Gamaliel: "Since your God is 'a consuming fire,' why does he take vengeance upon the idolaters and not upon the idols themselves?" And he answered: "Suppose a king has a disrespectful son, who gave his dog the name of his father and swore by that name, shall the father vent his anger upon the dog or upon his irreverent son?" It is the idolater, not the irresponsible idol, that excites God's anger ('Ab. Zarah, 54*b*).

Maimonides, in "Moreh," i. 36, declares that wherever Anger is applied to God in the Bible, it has reference to idolatrous practises, the idolater being the hater of the Lord. (As to the inaccuracy of this statement, see the commentaries; but as to its general meaning, compare Ab. R. N. xvi.: "Love all fellow creatures, but hate those that are haters of God"; also Pes. 113*b*.)

Anger in Man: If this be the outburst of a holy indignation at the sight of wrong done, it is Zeal (*kinah*), and conducive to godliness (see Num. xxv. 13; I Kings, xix. 10, 14; Ps. lxix. 9). Anger kindled into passion, however, is conducive to strife (Prov. xxx. 33). "He that is slow to wrath is of great understanding, but he that is hasty of temper [A. V. "spirit"] exalteth folly" (Prov. xiv. 29; compare Prov. xii. 16, xiv. 17; Job, v. 2; Ecclus. xxvii. 30). "A wrathful man stirreth up strife: he that is slow to anger appeaseth strife" (Prov. xv. 18). "He that is slow to anger is better than the mighty" (Prov. xvi. 32). "Be not hasty in thy spirit to be angry; for anger resteth in the bosom of fools" (Eccl. vii. 9). Jacob already condemned Anger in his sons Simon and Levi, although it was the outflow of righteous indignation: "Cursed be their anger, for it was fierce; and their wrath, for it was cruel" (Gen. xlix. 7).

In Apocryphal and Rabbinical Literature.

Anger is condemned in stronger terms in apocryphal and rabbinical literature (Ecclus. i. 22): "A furious man can not be justified; for the sway of his fury shall be his destruction." In the Testaments of the Patriarchs almost the whole Testament of Dan (chaps. i.–vi.) dwells on anger (Dan having been one of those reported to his father by Joseph as having eaten forbidden meat; see Geiger, "Jüd. Zeit." vii. 131):

> "One of the spirits of Belial wrought with me, saying: Take this sword and with it slay Joseph. . . . This is the spirit of anger that counseled me that even as a leopard rendeth a kid, so should I rend Joseph. . . . There is blindness in anger, my children, and no wrathful man regardeth any person with truth, for though it be a father or a mother, he treats them as enemies; though he be a brother, he knoweth him not; though he be a prophet, he disobeyeth him; though a righteous man, he regardeth him not; a friend he doth not acknowledge. For the spirit of anger encompasseth him with the nets of deceit, and through lying darkeneth his mind and giveth him a vision of his own making; it affecteth his eye with hatred of the heart and giveth him another heart against his brother. My children, mischievous is anger; it changeth the body of the angry man into another, and over his soul it getteth the mastery. . . . He who is wrathful, if he be a mighty man, hath a treble power in his anger; yea, even though he be weak, yet hath he twofold of that which is his by nature; for wrath aideth much in mischief. . . . Therefore when any man speaketh against you, be not moved unto anger. . . . Depart from wrath. . . . Cast away wrath and lying, and love truth and longsuffering."

"Be not prone to anger, for anger leadeth to murder; nor a zealot (ζηλώτης), nor contentious, nor quick-tempered; for murder also is the outcome of these" (Didache, iii. 2); compare "Whosoever is angry with his brother without a cause shall be in danger of the judgment" (Matt. v. 22). "Be slow to wrath (βραδὺς εἰς ὀργήν), for the wrath of man worketh not the righteousness of God" (James, i. 19, 20). A very similar expression occurs in Ab. v. 11 (*Ḳasheh lik'os*): "There are four dispositions: (1) He who is easily provoked and easily pacified—his gain is cancelled by his loss; (2) He who is hard to provoke and hard to pacify—his loss is canceled by his gain; (3) The one who is hard to provoke (קשה לכעוס) and easily pacified is a Ḥasid; (4) He who is easily provoked and hard to pacify is wicked."

One of the especial virtues practised by the Ḥasidim (Essenes) was to restrain anger and to show a mild temper (see Josephus, "B. J." ii. 8, § 6; Philo, "On the Virtuous Being Free," xii.). Thus Eliezer b. Hyrcanus taught, Ab. ii. 14: "Be not easily provoked (compare Hillel's saying, "The irritable man can not teach," Ab. ii. 4). Likewise, the moral teachings at the end of Paul's epistles: "Now ye also put off all these: anger, wrath, malice," etc. (Col. iii. 8; compare Gal. v. 26, Eph. vi. 4). Especially significant is Eph. iv. 26: "Be ye angry and sin not; let not the sun go down on your wrath"—a teaching shown by Resch ("Agrapha," pp. 110, 210), to be taken from some "Scripture" based upon Ps. iv. 4 (compare Ber. 19*a*): "If one of the wise have committed a sin at night, be sure that he has repented (upon his bed) and bear him no grudge the following day" (Baraita de-R. Ishmael; compare Ber. 19*a*). "God loves him who never gets angry" (Pes. 113*b*). "The mysterious name of 'Forty-two' is entrusted only to him who is retiringly chaste (צנוע) and who never gets angry" (Ḳid. 71*a*). To R. Judah, brother of Sela the Ḥasid, Elijah the prophet said: "Do not get angry and you will not sin" (Ber. 29*b*). A man who gets angry, if he be one of the wise, his wisdom departs from him: for Moses in his anger forgot the law; and Eleazar, his nephew, had to declare it (Num. xxxi. 21). If he be a prophet, the spirit of prophecy forsakes him; for Elisha in his anger had to invoke the musician's aid to call back the spirit that had left him (II Kings, iii. 14, 15). Nay, if heaven assigned a high rank to him, it will be taken away; for of Eliab, the brother of David, God said, "I have refused him" (I Sam. xvi. 7)—the reason for which is afterward given in I Sam. xvii. 28: "Eliab's anger was kindled against David" (Pes. 66*b*).

"A man who gets angry will be overcome by the powers of Gehenna, and his body by ailments of the belly," according to Eccl. xi. 10, and Deut. xxviii. 65. "He despiseth the Shekinah as it is written: 'The wicked in the height of his wrath will not seek God; God is not in his thoughts' (Ps. x. 4, *Heb.*). "He forgets his learning and grows foolish; nay, his sins will be more numerous than his meritorious acts" (Ned. 22*a*, *b*). "He who in his wrath tears his goods or garments is like a worshiper of idols, for it is written: 'There shall no strange god be in thee' (Ps. lxxxi. 10 [A. V. 9]): this is the evil spirit that enters man through anger" (Shab. 105*b*).

"In three things a man is tested: in his cup (*bekoso*), his purse (*bekiso*), and his anger (*beka'aso*)" ('Er. 65*b*). The verse, "All the days of the afflicted are evil" (Prov. xv. 15), refers to the quick-tempered (B. B. 145*b*). "His life is no life" (Pes. 113*b*); "his anger is the only profit he has" (Ḳid. 41*a*, Eccl. R. to vii. 9). "By what virtue didst thou merit a long life?" was the question put to Ze'ira or to Adda b. Ahabah; and the answer was: "I never excited anger in my household" (Ta'anit, 20*b*); "every irritable man is a fool" (Koh. R. to xi. 10).

Still there is also a righteous Anger. The verse, "Better is anger than laughter" (Eccl. vii. 3), is explained in Koh. R. *ad loc.*; better would have been the Anger which David should have displayed toward Amnon and Adonijah than the laughter of

Righteous Anger.

justice over their fall as described in II Sam. xiii. 33, I Kings, i. 6. If the learned man becomes angry, it is the zeal for the Law that makes him so; for "Is not my word like a fire, saith the Lord, and like a hammer that breaketh the rock in pieces?" (Jer. xxiii. 29, *Heb.*). Nevertheless the scholar should also accustom himself to mildness of temper (Ta'anit, 4*a*). In a public address Rabbi Jose once said: "Father Elijah was quick-tempered"; whereupon the prophet failed to appear to him for three days. On the following day, Rabbi Jose inquired of Elijah why he was absent. "Because you called me quick-tempered," was the answer. "Thou hast only corroborated my opinion of thee," said R. Jose (Sanh. 113*a*, *b*). K.

ANGLO-ISRAELISM: A theory which identifies the Anglo-Saxon race with the Lost Ten Tribes. Its adherents, who claim that the promises given to Israel will be fulfilled with regard to England and America, are said to number 2,000,000 in England and the United States; and at one time they included in their ranks a member of the English House of Lords and a colonial bishop of the Church of England. They have issued several weeklies in defense of their views; and there is one publisher in London whose publications are devoted entirely to the cause. Strictly speaking, the believers in Anglo-Israelism do not form a sect, as most of its members retain communion with the Church of England, and they only hold their views as a supplementary pious opinion.

History of Movement.

The first person who seems to have broached these views was the eccentric Richard Brothers (1757–1824), who styled himself "Nephew of the Almighty," and, in his "Revealed Knowledge" (1794), claimed to be descended from David and prophesied that he would be revealed as prince of the Hebrews on Nov. 19, 1795. In 1822 Brothers published his "Correct Account of the Invasion of England by the Saxons, Showing the English Nation to be Descendants of the Lost Ten Tribes," which may be regarded as the foundation of the movement. He was followed by J. Wilson ("Our Israelitish Origin," 1845), who placed the theory upon its present basis; by W. Carpenter ("Israelites Found"), and by F. R. A. Glover ("England the Remnant of Judah"); and the movement obtained a somewhat distinguished adherent in C. Piazzi Smith, astronomer royal for Scotland, who in his bizarre work, "Our Inheritance in the Great Pyramid," attempted to prop up the cause by showing the identity of British weights and measures with those of the ancient Egyptians and Hebrews. The chief representative, however, in England was Edward Hine, of whose "Identification of the British Nation with Lost Israel," London, 1871, a quarter million copies are said to have been sold. He also published for several years a weekly journal, "The Nation's Leader," and a monthly magazine, "Life from the Dead." In America the chief leaders of the movement appear to have been G. W. Greenwood, who published a monthly journal, "Heir of the World," New York, 1880, and Rev. W. H. Poole, of Detroit, Mich. The theory has even extended to Germany, though it does not appear to have attracted much notice there. A work by S. Backhaus, "Die Germanen ein Semitischer Volksstamm," appeared in Berlin in 1878.

Chief Arguments.

The theory of Anglo-Israelism is based upon an extremely literal interpretation of the Old Testament, as represented by King James's version and by an application of texts brought together from the prophecies about Israel; and its advocates attempt to bring their readers into the dilemma that England and its colonies must be the Israel to whom the promises were made in the Bible, or that these promises have been unfulfilled. At the start, distinction is made between the ultimate fates of Israel and Judah. For the former all the blessings of the Bible are reserved; whereas the latter, represented in modern times by the Jews, are to experience all the curses threatened to the backsliding people in the prophecies. It is pointed out that while in the prophecies Israel will change his name (Hosea, i. 9), be numberless (*ibid.* ii. 1), dwell in islands (Isa. xxiv. 15) with colonies and be the chief of the nations (Micah, v. 8), Judah will be a byword (Jer. xv. 4). The "isles" (Isa. xli. 1, xlii. 4), to which Israel was banished, were to be north (Jer. iii. 12) and west (Isa. xxiv. 15) of Palestine, and to be in a cold climate, since it is said: "Heat nor sun will smite them" (Isa. xlix. 10). It was further prophesied that the isles would become too small for Israel (Isa. xlix. 19) and that Israel should be a nation and company of nations (Gen. xxxv. 11). It would, therefore, have colonies (Isa. xlix. 20, liv. 3), so that it might surround the nations (Deut. xxxii. 7–9) and be above them all (Deut. vii. 6, xiv. 2, xxviii. 1).

Biblical Texts.

The children of Israel will always know and recognize the Lord (Isa. lix. 21, xlix. 3), which of course is interpreted to mean, "will be members of the true Church of England." The Anglo-Israelites triumphantly ask, "What nation save England corresponds to all these prophetic signs?" In further confirmation it is pointed out that one of the tribes of Manasseh was to become an independent nation (Gen. xlviii. 19): the United States obviously represents Manasseh. Both Ephraim and Manasseh shall exterminate the aborigines ("push the people together") in the countries into which they spread (Deut. xxxiii. 17). The lion and the unicorn are referred to in Num. xxiv. 8, 9; while the American eagle is intended in the prophecy in Ezek. xvii. 3. The promise that Israel "shall possess the gates of his enemies" (Gen. xxii. 17, xxiv. 60) is taken to be fulfilled in the possession by England of Gibraltar, Malta, Heligoland, Aden, and Singapore. Finally, it was prophesied that Israel should bear another name (Isa. lxv. 15) and speak another tongue (Isa. xxviii. 11). All these characteristics of Israel, as distinguished from Judah, are fulfilled, it is contended, in England, its colonies, and the United States.

Historic Connection.

The historical connection of the ancestors of the English with the Lost Ten Tribes is deduced as follows: The Ten Tribes were transferred to Babylon about 720 B.C.; and simultaneously, according to Herodotus, the Scythians, including the tribe of the Saccæ, appeared in the same district; the progenitors of the Saxons afterward passed over into Denmark—the "mark" or country of the tribe of Dan—and thence to England. Another branch of the tribe of Dan which remained "in ships" (Judges, v. 17) made its appearance in Ireland under the title of "Tuatha-da-Danan." Tephi, a descendant of the royal house of David, arrived in Ireland, according to the native annals, in 580 B.C. From her was descended Feargus More, king of Argyll, an ancestor of Queen Victoria, who thus fulfilled the prophecy that "the line of David shall rule for ever and ever" (II Chron. xiii. 5, xxi. 7). The Irish branch of the Danites brought with them Jacob's stone, which has always been used as the coronation-stone of the kings of Scotland and

England, and is now preserved in Westminster Abbey. Somewhat inconsistently, the prophecy that the Canaanites should trouble Israel (Num. xxxiii. 55, Josh. xxiii. 13) is applied to the Irish. The land of Arzareth, to which the Israelites were transplanted (II Esd. xiii. 45), is identified with Ireland by dividing the former name into two parts, the former of which is *ereẓ*, or "land"; the latter, *Ar*, or "Ire."

Philological Arguments.

Philology, of a somewhat primitive kind, is also brought in to support the theory: the many Biblical and quasi-Jewish names borne by Englishmen are held to prove their Israelitish origin (H. E. Nicholls, "Surnames of the English People"). An attempt has been made to derive the English language itself from Hebrew (R. Govell, "English Derived from Hebrew"). Thus, "bairn" is derived from *bar* ("son"), "berry" from *peri* ("fruit"), "garden" from *gedar*, "kid" from *gedi*, "scale" from *shekel*, and "kitten" from *quiton* (*ḳaton* = "little"). The termination "ish" is identified with the Hebrew *ish* ("man"); "Spanish" means "Spain-man"; while "British" is identified with *Berit-ish* ("man of the covenant"). Perhaps the most curious of these philological identifications is that of "jig" with *chag* (*ḥag* = "festival").

Altogether, by the application of wild guesswork about historical origins and philological analogies, and by a slavishly literal interpretation of selected phrases of prophecy, a case was made out for the identification of the British race with the Lost Ten Tribes of Israel sufficient to satisfy uncritical persons desirous of finding their pride of race confirmed by Holy Scripture. The whole theory rests upon an identification of the word "isles" in the English version of the Bible unjustified by modern philology, which identifies the original word with "coasts" or "distant lands" without any implication of their being surrounded by the sea. Modern ethnography does not confirm in any way the identification of the Irish with a Semitic people; while the English can be traced back to the Scandinavians, of whom there is no trace in Mesopotamia at any period of history. English is a branch of the Aryan stock of languages, and has no connection with Hebrew. The whole movement is chiefly interesting as a *reductio ad absurdum* of too literal an interpretation of the prophecies.

The Anglo-Israelite theory has of recent years been connected with the persecutions of the Jews, in which the Anglo-Israelites see further confirmation of their position by the carrying out of the threats prophesied against Judah. This side of the subject has been dealt with by T. R. Howlett in "An Anglo-Israel Jewish Problem," Philadelphia, 1892; supplement, 1894.

BIBLIOGRAPHY: Besides the works mentioned above, the chief sources from which this article has been drawn are E. Hine, *The British Nation Identified with Lost Israel*, London, 1871, and W. H. Poole, *Anglo-Israel, or the Saxon Race Proved to be the Lost Tribes of Israel*, Detroit, 1889. See also P. Cassel, *Ueber die Abstammung der Englischen Nation*, Berlin, 1880, and S. Beruatto, *Britannia-Israel ossia gli Ebrei nella Questione d'Oriente*, Rome, 1880. Much information is also contained in the journals *Anglo-Israel* and *Banner of Israel*, both published in London, and *Heir of the World*, published in New York. The Anglo-Israelite theory has also been criticized in the *British and Foreign Evangelical Review*, xxxv. 65 *et seq.*, and the *Church Quarterly Review*, xvii. 34 *et seq.*

J.

ANGLO-JEWISH ASSOCIATION: An organization formed by Jews of the British empire having for its objects the promotion of social, moral, and intellectual progress among the Jews; and the obtaining of protection for those who may suffer in consequence of being Jews. Some far-seeing and large-minded men, among them the late Dr. Benisch and the Rev. Dr. A. Löwy (late secretary of the association), had many years before its establishment conceived the idea of forming a society on lines similar to those of the Alliance Israélite Universelle in Paris; but it was not until after the Franco-German war of 1870–71 that an opportunity presented itself for the realization of their idea. Grave apprehensions were entertained that the work of the Alliance, interrupted by the war, would suffer through want of means; that the unhappy feud, which had estranged the two powerful nations of France and Germany, would, for some time to come at least, prevent the Jews in both countries from cooperating even in works of philanthropy, and that unless help came from without, disorganization, if not dissolution, must be the inevitable result. It was thought also that it was time a body so prosperous, influential, and sympathetic as the English Jews should take its stand by the side of the other sections of Jewry, and share in a movement full of promise for the welfare of the Jewish race; and at the same time should give the best conceivable evidence of their sympathy with their brethren in France. These were the objects which guided the promoters of the Anglo-Jewish Association; but taking into consideration the position occupied by Great Britain, it was from the outset thought desirable that the right of independent action should be reserved to the new society. While it works in the utmost harmony with the Alliance Israélite Universelle, this right has ever since been maintained.

Foundation.

A large number of prominent members of the Jewish community in London gave their adhesion to the movement, and the Anglo-Jewish Association was formally constituted at a public meeting held on July 2, 1871. Efforts were made at once to obtain members throughout the United Kingdom and in the British colonies, and within the first year branches were formed in Manchester, Liverpool, and Birmingham, and promises of support were received from Cape Colony and some of the Australian colonies. That these promises were kept, and that the work of the Anglo-Jewish Association has since then enlisted the sympathy of Jews in many quarters of the globe, may be inferred from the fact that in 1900 the society had 36 branches; viz., 21 in the United Kingdom, 14 in the Colonies, British settlements, and foreign countries, and 1 in India. In this respect the Anglo-Jewish Association forms a powerful link between the Jews in all parts of the British dominions, for there is no other Jewish body in the United Kingdom with such extensive ramifications. The late Professor Jacob Waley was elected the first president of the association; the vice-presidents were Dr. Benisch, Sir Francis H. Goldsmid, Mr. (afterward Sir) Julian Goldsmid, Sir George Jessel (then solicitor-general), Sir David Salomons, Mr. Reuben D. Sassoon, and Sir John (then Mr. Serjeant) Simon. Of these gentlemen (five of whom were at the time members of Parliament) only Mr. Sassoon survives, and his name still appears in the list of vice-presidents. After the first year Professor Waley was compelled by ill health to resign the office of president. The vacancy was filled by the election of Baron Henry de Worms (now Lord Pirbright), who held the office for fourteen years. On his resignation in 1886, Sir Julian Goldsmid was elected president and continued in office until the latter part of 1895, when the state of his health necessitated his resignation, and Mr. Claude G. Montefiore was then elected his successor.

The present vice-presidents are the chief rabbi, Dr. H. Adler; Mr. Ellis A. Franklin (who is also treasurer), Mr. Alfred G. Henriques, Mr. Benjamin Kisch, Sir Philip Magnus, Mr. F. D. Mocatta, Sir George Faudel-Phillips, Lord Rothschild, Mr. Leopold de Rothschild, Sir Edward Sassoon, M.P.; Mr. Reuben D. Sassoon, and Mr. Leopold Schloss. These names, as well as the list of members of the Council, show that the governing body of the Anglo-Jewish Association contains within its ranks representatives of every section of religious thought in the Jewish communities of England.

The Rumanian and Russo-Jewish Committees.

On two important occasions the association has not acted independently. In the very first year of its existence it was called upon to take up the cause of the persecuted Jews in Rumania. But in view of the fact that it had not then secured all the support, either personal or financial, that it required, the Council thought it desirable to assist in the formation of a special "Rumanian Committee," consisting mainly of its own members, and with Sir Francis Goldsmid, a vice-president of the association, as its chairman. As a consequence of the appointment of this committee, a great meeting was held at the Mansion House early in 1872, when Lord Shaftesbury, the bishop of London, many members of Parliament, and representatives of almost all the great city houses concurred in a cry of righteous indignation against the oppression of the Rumanian Jews. About four years later the association, at the request of the Rumanian Committee, resumed charge of the duties previously undertaken by that committee. It is scarcely necessary to add that down to the present time the condition of the Rumanian Jews has never ceased to occupy the attention of the association. Again in 1882, when the persecution of the Jews in Russia attained such dimensions as to arouse general indignation, the association assisted in the formation of a special Russo-Jewish Committee, representing all sections of the community.

Apart from these two great occasions, in which, for the reasons already stated, the association did not, as a body, take an active part, there have been, during the past twenty-nine years, innumerable cases in which it has interposed, usually with success, on behalf of victims of oppression or persecution. These cases have been of the most varied character. Sometimes it has been to quell an actual rising of a fanatical populace against the Jews, sometimes to nip in the bud an anticipated émeute; at one time to rescue from prison, or to procure a fair trial for Jews falsely accused or the victims of a vindictive or fanatical official; at another to obtain redress for a man unjustly punished, or compensation for a family deprived of its head in some religious broil; to procure the revocation or mitigation of degrading regulations affecting Jews, or the removal of a hostile governor or other official.

Not a single year has passed without the association being called upon to take action in one or more matters arising out of injustice, oppression, or persecution; but it is some satisfaction to find that, apart from the standing grievances in Russia and Rumania, cases of official persecution in which government connivance may be suspected tend to become more and more rare.

In this department of its work, the association has at all times received the most ready and cordial cooperation from the Foreign Office, quite irrespective of the party politics of the government in office for the time being. In many instances, indeed, communications from the Foreign Office have been the means of calling attention to cases upon which action has been subsequently taken.

Educational Work.

In addition to this, the educational field of the Anglo-Jewish Association has been largely extended, and only awaits increased resources for its further development. With the exception of schools under its own control at Bombay, Jerusalem (the Evelina de Rothschild School for Girls), and Mogador (Morocco) the Council employs its energies in the direction of education by helping to maintain schools of the Alliance Israélite Universelle in various parts of the East. Striking testimony to the efficiency of several of these schools is to be found in the fact that Moslem and Christian parents of high standing have sent their children as paying pupils. It may be roughly estimated that the association has assisted in the education of no less than 40,000 children. In the year 1899, the number of children receiving education in schools subventioned by the association was 9,418; viz., 5,666 boys, 3,497 girls, and 255 infants of both sexes. The total of the subventions amounted to £2,848 ($14,240).

Before the association had been many years in existence an arrangement was made with the London Committee of Deputies of British Jews with the view of preventing the possibility of the two bodies acting independently of each other in matters involving applications to the British government. The importance of some such arrangement was at once recognized, and a formal compact was entered into in 1878, which has ever since been adhered to, and has resulted in uniformly harmonious action. This compact has indeed been carried out beyond the mere letter, for the two bodies have on several occasions acted jointly in presenting addresses to foreign potentates.

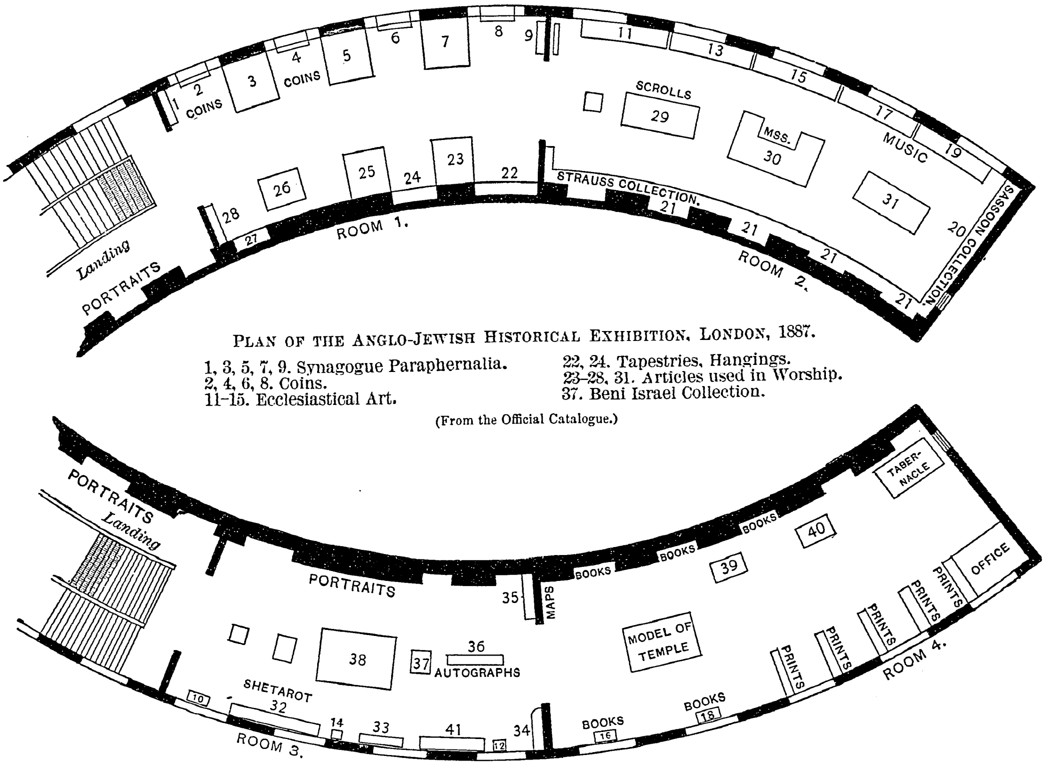
Jewish Colonization Association.

In the year 1893, the late Baron de Hirsch presented the Anglo-Jewish Association with 3,600 fully paid-up shares of £100 each in the Jewish Colonization Association, which he had then formed for the purpose of carrying on permanently the work he had initiated for removing Jews from countries where they were persecuted and settling them in lands where they could live under happier auspices. Shortly before his death in 1896, the baron (who had in the meanwhile become a vice-president of the association) gave this body another proof of his confidence by requesting it to accept a further number of shares to be held in trust for the Alliance Israélite Universelle, which is not competent by French law to hold shares in a public company. A few weeks later the baron increased the holding of each institution in the Jewish Colonization Association by 995 shares, making a total for each body of 4,595 shares, from which, however, no pecuniary benefits accrue to the holders. The Anglo-Jewish Association is entitled to one representative on the Council of Administration of the Jewish Colonization Association, and this position was held in 1900 by the president, Mr. Claude G. Montefiore.

M. D.

ANGLO-JEWISH HISTORICAL EXHIBITION: An exposition held at the Royal Albert Hall, London, England, during April, May, and June, 1887, in which were collected and shown most of the antiquarian remains illustrating the history of the Jews in England, together with a collection of objects of ecclesiastical art and miscellaneous Jewish antiquities. The idea of the exhibition originated with Isidore Spielman, who enlisted the cooperation of a large number of English antiquaries. The president of the exhibition was F. D. Mocatta.

The exhibits included a large number of *sheṭarot*, or Hebrew deeds, relating to the transactions of the early English Jews; numerous portraits of Anglo-Jewish worthies, with engravings and caricatures bearing upon their lives; a collection of exhibits from the Beni Israel community of India, and numerous specimens of ancient Jewish coins. Two collections of objects of Jewish ecclesiastical art—one by M. Strauss of Paris, the other by R. D. Sassoon of London—attracted considerable attention. The various objects were arranged as indicated on the accompanying plan.



Plan of the Anglo-Jewish Historical Exhibition, London, 1887.

1, 3, 5, 7, 9. Synagogue Paraphernalia.
2, 4, 6, 8. Coins.
11-15. Ecclesiastical Art.
22, 24. Tapestries, Hangings.
23-28, 31. Articles used in Worship.
37. Beni Israel Collection.

(From the Official Catalogue.)

During the exhibition a number of lectures were given on the various phases of Jewish history illustrated by it; and these papers were subsequently published in book form. They included an address by the eminent historian Graetz, who visited London expressly to deliver it. Under the auspices of the exhibition the sheṭarot were edited and published; while an edition de luxe of the catalogue of the exhibition, with 28 full-page illustrations, put on permanent record many of the most interesting objects shown. A distinct revival of interest in the history of the Jews in England can be traced to the exhibition, as well as a renewed taste for beautiful objects of Jewish ecclesiastical art.

ANGRO-MAINYUSH. See Ahriman.

ANGYAL (ENGEL), ANNA: Hungarian author; born at Veszprim, 1848, died 1874; the daughter of a teacher in the town of Hód-Mezö-Vásárhely. Versed in the literature of Hungary, France, and Germany, from a very early age, she began her literary career in her sixteenth year. Her first novel, "Adventures of a Hungarian Family," was published in the "Szegedi Hiradó," a Hungarian magazine. In 1865 she published in the "Magyar Izsráelita" a short novel entitled "Prejudices," in which she described the condition of the Jews in Hungary. Her historical novel, "Jlonka és Elemér," was published in 1868.

Bibliography: Kayserling, *Jüdische Frauen*, 300, 301.

S.

ANGYAL (ENGEL), DAVID: Hungarian writer; born November 30, 1857. After graduating from the University of Budapest he was appointed high-school teacher in that city and in spite of absorbing duties distinguished himself as a writer on history and literature. Among his more important works are: "Berzsenyi Dániel" (1879), "Késmárk Tököly Imre, 1657-1705" (1882), and "Magyarország

Története II. Mátyástól III. Ferdinand Haláláig" (The History of Hungary from Matthias II. to the Death of Ferdinand III.) (1889). The last work forms the sixth volume of Szilágyi's "Hungarian National History," which was published on the occasion of the millennial celebration of the existence of the Hungarian realm. He has translated several works by Macaulay, Paul Janet, etc., into Hungarian, contributed several historical essays to the periodical press, and edited the works of the poets Kölcsey and Kisfaludy. Angyal has been baptized.

ANHALT: An ancient principality of Germany, now a state of the German empire; formerly divided into four duchies: Anhalt-Bernburg, Anhalt-Dessau, Anhalt-Köthen, and Anhalt-Zerbst. Its former capital was Zerbst, a town on a tributary of the Elbe, situated about ten miles northwest of Dessau. Jews are known to have been permitted to live here before the year 1440, and it is said that the "Jüdenstrasse" (Jews' Street) dates from the fifteenth century. According to an agreement made in 1460 and a document drawn up in 1488, the revenue derived from the Jews was to be divided between the prince of Anhalt and the town of Zerbst. The Jews owned no real estate there, and seem to have lived in the town at irregular intervals, and then only in small numbers. In 1774 several families from Dessau settled at Zerbst. But the settlement of Jews in other towns of the duchy is even more recent than this.

At Bernburg, also the capital of the duchy of Anhalt with which its name is linked, a city situated on the Saale, there was a synagogue in 1454; and here, in 1462, Bernhard VI., prince of Bernburg, sold to Tile Goldschmidt a house near the "Joddenschulen."

In Dessau, the capital of the duchy of Anhalt-Dessau, a city about eighty miles southwest of Berlin, a small number of Jews lived in 1621. Here Prince George II. permitted them to build a synagogue, and he gave them the use of a cemetery as well as a piece of land for a hospital (*hekdesh*). In the villages of Anhalt-Dessau the Jews lived in large numbers.

In 1764 Prince Leopold granted the Jews a constitution and issued regulations for the maintenance of their credit. He abolished the poll-tax in 1804, and permitted the Jews of Woerlitz to build a synagogue. In the same year Leopold recognized the Franzschule as a Jewish public school.

Important Hebrew printing-houses existed at Köthen from 1622 to 1717, and at Jessnitz from 1719 to 1726. The Jews of the principality were compelled to take family names at Bernburg in 1810, at Köthen in 1811, and at Dessau in 1822. In 1810 civil rights were granted in Bernburg, and in 1811 in Köthen. In 1848 all restrictions were abolished.

Anhalt is remarkable for the great number of Jewish scholars it has produced. Moses Mendelssohn and Ludwig Philippson came from Dessau; the historian Jost, from Bernburg; the mathematician Unger, from Coswig; the philosopher Steinthal, from Gröbzig; and the preacher Salomon, from Sandersleben.

ANILAI and **ASINAI:** Robber chieftains. Two Jewish boys of Nehardea in Babylonia were apprenticed by their widowed mother to a weaver. Having been punished for laziness by their master, they ran away and became freebooters in the marshlands of the Euphrates. There they gathered about them a large number of discontented Jews, organizing troops, and levying forced contributions on the shepherds, and finally established a little robber-state at the forks of the Euphrates. One Sabbath they were surprised by the Parthian ruler of Babylonia, but they determined to fight regardless of the day of rest, and defeated their assailant so completely that the Parthian king Artaban III. (about 10–40), who was just then engaged in putting down a rebellion, resolved to make use of such brave Jews to keep the satraps in check. He concluded an alliance with them, entrusting them with the control of that portion of Babylonia which they already occupied. They then built fortifications, and the little state lasted for fifteen years (about 18–33). Its downfall was brought about by the marriage of Anilai with the widow of a Parthian general, whom he had attacked and killed in battle. He tolerated the idolatry of his foreign wife, and met the religious objections of his people with violence, thus estranging his followers and sowing dissension among them. After Asinai had been poisoned by his brother's wife for his too frank utterances, Anilai assumed the leadership of his troops. He sought to divert them with wars, and succeeded in capturing Mithridates, governor of Parthyene, and son-in-law of the king. He soon, however, released Mithridates, fearing that Artaban might take vengeance on the Babylonian Jews for his death. Being signally defeated by Mithridates in a subsequent engagement, he was forced to withdraw to the forests, where he lived by plundering the Babylonian villages about Nehardea, until his resources were exhausted and the little robber-state disappeared. Babylonian hatred of the Jews, long restrained from fear of Anilai, now broke forth afresh, and the Jews fled from the persecutions to Seleucia without finding there the desired peace.

[The name Anilai is identical with "Ḥanilai" in Talmudic literature. This was, for example, the name of the father of the well-known haggadist Tanḥum b. Ḥanilas (Bacher, "Ag. Pal. Amor." iii. 627).

ANIMAL FABLES IN TALMUD AND MIDRASH. See ÆSOP'S FABLES, also FABLES.

ANIMAL OFFERINGS. See SACRIFICE.

ANIMAL WORSHIP: This is an expression which needs careful definition, since it is understood and explained in various ways. A distinction has to be made between a strict and a loose employment of the expression. On the one hand, a difference must be noted between actual devotion to, or service of, an object and the mere recognition of such an object as divine or supernatural. On the other hand, care must be taken to avoid confounding the direct worship of an animal with the use of the animal as a symbol of the real object of worship.

In the strictest sense of the words, it is doubtful whether Animal Worship ever existed in any large portion of the Hebrew community; but, in a wider sense, there were instances which are worthy of close attention. Generally speaking, there were three distinct occasions on which religious sentiment toward animals resulted in superstitious awe or actual ceremonial service.

First Form of Worship: Belief in Demons.

Characteristics of the "Jinn."

The first or lowest mode of Animal Worship is that form of deference or veneration which arises from the persuasion that certain animals are invested with demoniacal powers. Such a notion is universal among savage and semicivilized peoples, and still survives to a great extent among members of the most cultivated of modern communities. The whole ancient Semitic population of western Asia was infected with this superstition, which manifested itself in many different ways. In Babylonia it was especially rife. Hundreds of spirits are referred to in the religious cuneiform texts. Every condition and activity of human life was subject to their influence; and their forms and characteristics were as various as their occupations. Among the ancient Arabs demons of all sorts and grades, generally representing the denizens of the desert, were known as "jinn" (genii); and this well-known term may be here used to include the demonized animals with which the Hebrews and their neighbors were most familiar. Both the Babylonian and the Arabian systems of belief are of prime importance in the elucidation of the Bible. The latter system, having been longer known and studied, is for the present the more available. The "jinn" were related to ordinary animals, somewhat as the gods were related to man. That is to say, certain animals were invested with superhuman, or at least extrahuman, attributes. Their qualities were not, however, of a high or spiritual character, and for the most part they remained animals socially and morally. Their chief attribute was the power to assume various shapes, including that of man; and occasionally they adopted the human form permanently. Yet as a class they stood aloof from men; so that they could not be really worshiped, but were feared as foes or prized as allies. They were usually maleficent, but occasionally beneficent. The generic Hebrew designation seems to have been *shedim*, a word which was also used by the Babylonians for a very large class of animal demons. Their animal character is indicated by several names applied to them, which names mean primarily "hairy." In Moslem legend Balkis, the queen of Sheba wedded to Solomon, had hair on her ankles, and was thus shown to be by descent a "jinnee." Of this race may be the *se'irim*, or hairy creatures, of the Hebrews. The *Lilith* (Assyrian *lelit*) of Isa. xxxiv. 14 is a species of nightmare. Other demoniacal creatures are mentioned in Isa. xiii. 21. It is probable that most, if not all, of such allusions to classes or types of demons are exilic or postexilic; and but scanty information is available as to the animal cults of earlier times in Israel. The statement of Deut. xxxii. 17 (compare Ps. cvi. 37) is, however, a general indication.

The Rôle of the Serpent.

One of the most prominent of the demons, the serpent, was raised to exceptional distinction among the Babylonians, the Arabs, and the Hebrews. Many qualities united in the serpent to make it an object of superstitious regard, as it still is, more or less, to practically the whole human race. Among these attributes were its faculty of sudden appearance and disappearance, its flexibility, its rapid changes of posture and shape, its haunting of obscure and uncanny places, its subterranean abode, its ubiquity on land or water, its apparent kinship with many sorts of elusive beings, great and small, marine, terrestrial, and aerial. It seemed to have kinship even with the flying cloud and the forked lightning, the celestial "tannin" (Isa. xxvii. i.; Job, vii. 12), the leviathan (Job, iii. 8; Isa. xxvii. 1), the Babylonian *tiamat*, or the dragon. The highest function attributed to the serpent is that of the primal tempter of man (Gen. iii.)—a conception which is both Hebrew and Babylonian. But it had many rôles of a less exceptional kind. Serpents were often maleficent, but often also beneficent. From their watchfulness they were held to be the natural guardians of groves, rocky recesses, and other animal retreats; and when such abodes of lower life were converted to the uses of man, they still remained as sentinels, and were naturally promoted to be the protectors of gardens and estates, fountains and streams, and became the familiar demons of homes and sanctuaries. Thus, boundary-stones in Babylonia were decorated with images of serpents and scorpions as terrors to the trespasser or the invader (compare the Brazen Serpent of the Hebrews).

Even in Israel some form of demoniacal superstitions must have been more or less secretly practised for centuries, since we find that in the gloomy time just before the captivity of Judah, images of noxious creatures were portrayed or carved on an inner wall of the Temple (Ezek. viii. 10). Evidently a desperate resort was had to the baser animal spirits during the utter lapse of faith and hope among the leaders of the nation. Strange to say, this nearest approach to direct Animal Worship recorded in the Bible was made just at the close of the national existence. Robertson Smith has suggested that this was a revival of a totemic ritual.

Clean and Unclean Animals Contrasted.

A second source of the religious veneration of animals is found in the primitive notion of the kinship and ultimate identity of all forms of life, vegetable and animal, human and celestial. This notion explains, in part at least, the existence of sacred trees among so many ancient peoples. To a large extent also this sense of kinship was the basis of religious devotion in many forms. It was, for example, both the cause and the effect of ancestor worship. The kinship between national or tribal gods and their worshipers is a familiar belief. But it is also a significant fact that certain animals, usually possessed of demoniacal or superhuman powers, were sacred to many tribes and families of primitive men by virtue of a fancied kinship between them. Such a belief has been ascribed by recent authoritative writers to the earliest society of ancient Israel, as well as to the original Semites from whom they were descended. And it has been plausibly maintained that the distinction between clean and unclean animals was due to the circumstance that the latter were sacred and, therefore, forbidden as food on ordinary occasions. The sacredness depended upon a supposed kinship between the tribesmen and the animals in question, such as is the basis of totemism in many savage communities, ancient and modern. It happened, however, that at special seasons such unclean animals were actually eaten, and that, too, at sacrificial feasts. The meaning of this ceremony is apparently twofold: The tribe or clan ratifies its union or covenant with its animal kindred; and, by partaking of the flesh, its members derive some communion with the supernatural life, which is an attribute of the sacred animal. Now, it would be expected that if there had been any time in the history of Israel when such ceremonies were observed, it would have been when degenerate members of the community were mixed with a heathen population. Such a time occurred toward the end of the Exile, described in Isa. lxv. and lxvi., when swine and dogs and mice, the most unclean of animals, were eaten by certain Hebrews living among the Babylonians. It is more than a coincidence that in the Bible and elsewhere these very animals have specially demoniacal qualities or associations.

Third or Symbolic Type of Worship.

The third cause of the religious veneration of animals is the desire to have acknowledged deities, as distinguished from mere demons, represented by some visible, tangible object or image, which may impress the imagination and excite faith and devotion. This does not refer to the deities that may have been developed out of the "jinn," or animal demons, and which thus continued to image forth, in the form in which they were adored, the original animal whose supposed spiritual essence swayed the credulous fancy of an earlier people, but rather to those prominent instances of animal cults in which the qualities of great national or tribal gods are symbolically expressed by the characteristics of certain animals chosen as their visible representatives. The typical Biblical instance is that of the so-called bull- or calf-worship of northern Israel, with which may be included the worship of the golden calf made by Aaron before Mount Sinai. This latter is of importance in so far as it shows the traditional and inveterate character of the cult, since Ex. xxxii. was probably intended for illustrative purposes and as a prophetic object-lesson.

Explanation of Bull- or Calf-Worship.

The explanation of this influential cult is wide and comprehensive. Israel was heir to many forms of Semitic belief; and religious symbolism had begun in early ages among peoples to which, both through racial descent and historic association, Israel owed much of its culture. That bull-worship was borrowed from Egypt is still perhaps the popular belief; but it has been given up by scholars, partly on the general ground that Israel was scarcely affected in any essential religious matter by the Egyptians, and partly in view of the fact that the Egyptian worship was that of living animals. The chief direct cause of the cult in Israel was no doubt the influence of the Canaanites, not merely of the predecessors of the Hebrews in Canaan, but also of their contemporaries in central Palestine and in Phenicia. Many characteristics of the bull doubtless contributed to the prevalent symbolism. In the popular mind YHWH was largely confounded with the Canaanitic Baal; and the image of the Baal was a bull, as that of his consort Astarte was a cow. To an agricultural people the choice of such a symbol for the chief deity was almost inevitable, as an image of strength, endurance, animal reproductiveness, and service to mankind. There was another cardinal feature in the representation. The Baal was also the great Canaanitic sun-god, symbolizing thus the chief source of agricultural prosperity. The horns of the steer were the familiar emblem of the rays of the sun, even embodied in current Hebrew speech to describe the gleaming face of Moses (Ex. xxxiv. 29). A favorite ideograph for the Babylonian Merodach-Bel signifies "the bullock of the sun." This view accords with the fact that bull-worship was unknown to the kingdom of Judah, where Canaanitic influences were slight during the formative period of the later popular religion. The Brazen Serpent and Azazel were in great part symbolic (see Azazel; Brazen Serpent; and Totemism).

Bibliography: Useful illustrations of early forms of Hebrew and Semitic worship may be gained from well-known anthropological works. For the special subject, refer to W. R. Smith, in *Journal of Philology*, ix. 75 *et seq.*; *Religion of the Semites* (index, under *Animals*, *Demons*, and *Jinn*); Wellhausen, *Reste Arabischen Heidenthums*, pp. 135 *et seq.*, 176 *et seq.*; Baudissin, *Studien zur Semitischen Religionsgesch.* i. 128 *et seq.*, 258 *et seq.* For Babylonian beliefs, see Jastrow, *Religion of Babylonia and Assyria*, pp. 180 *et seq.*, 260 *et seq.*

ANIMALS, CLEAN AND UNCLEAN. See Dietary Laws.

ANIMALS OF THE BIBLE: To contrast them with plants and minerals, animals are called in Hebrew נפש חיה (living soul): used always collectively in Gen. i. 20, 24; ix. 10; or simply *ḥayyah* (living): as a rule collectively (Gen. ix. 2 *et seq.*); rarely as a singular (Gen. xxxvii. 20); or in the plural ḥayyot, as in Ps. civ. 25. Etymologically speaking, this latter Hebrew word corresponds well enough with the Latin *animal* and still better with the Greek ζῷον; it might, therefore, have been used of man as well as of brutes. It is, however, never so used in Hebrew, nor in certain other languages, reflecting the popular rather than the scientific mind. Popular Jewish philosophy accords willingly to animals all the characteristics man has in common with them, inclusive of life. The Biblical writers, when speaking of animals, generally look at them either from the standpoint of man's superiority—and thus avoid lessening the distance between the animals and their godlike and God-appointed ruler by uniting the two under a common name—or from the point of view of the Creator of all, and then merge man and brutes, together with inanimate beings, and angels as well, into the universal appellative of "creature." When exceptionally—as in the narrative of the Deluge—man and brutes are recorded together, it is done by means of a circumlocution or descriptive clause, like "all flesh" (Gen. vi. 12, 13; ix. 11, 17), sometimes with the addition, "in which there is breath of life" (Gen. vi. 17), or "all [beings] in whose nostrils was the breath of life" (Gen. vii. 22).

Classification into Four Groups.

It is generally considereed that the Bible divides animals into four groups, according to their mode of moving: (1) quadrupeds, or walkers; (2) birds, or fliers; (3) reptiles, or creepers; (4) fishes, or swimmers. In fact, we find these four groups enumerated, side by side, throughout the Biblical books: for instance, in Gen. i. 26, 28; vi. 7, 20; vii. 8; ix. 2; Lev. xi. 46; Deut. iv. 17, 18; I Kings, v. 13; Ezek. xxxviii. 20. This division, however, is but a later and abridged form of a more complete classification, consisting of six distinct groups as recorded in Gen. i. 20–25. Moreover, the mode of living seems to be absolutely foreign to either the primitive classification or its simpler substitute. Birds in the Bible are said to fly, but reptiles are nowhere said to creep, nor fish to swim. Man and quadrupeds are said "to go" rather than "to walk," but the same is also said of the serpent (Gen. iii. 14). In fact, the grouping of Gen. i. 25 is the complex outcome of no less than four different factors.

First in order comes the origin or element from which the animals were produced. The creation of animals is divided into two distinct acts: the one for the fishes and birds taken from the water (Gen. i. 20–23), the other for the terrestrial animals taken from the earth (Gen. i. 24, 25). The air evidently was not yet recognized as an element. Such, at least, is the interpretation that both the Septuagint and the Vulgate have given to the original text.

The habitat of animals is introduced as a second factor. Fishes are the "living things" of the waters, of the sea, of the rivers. Birds, created to "fly in the

ANIMALS OF THE BIBLE.

PREPARED BY WILLIAM FRANK UNDER THE DIRECTION OF PROF. THEODORE GILL, M. D., L L. D.,

Smithsonian Institution, Washington, D.C.

expanse of heaven," are called the "birds of heaven"; that is, of the air. Hence, a new group obtained by the subdivision of the first group into animals of the air and animals of the water.

A third factor was the mode of propagation. Just as we are in the habit of grouping together all useless and all troublesome small vegetation—or, to be more accurate, as in the Linnean system all plants having an obscure mode of fertilization were thrown into one large family, in contrast with flowering plants—so in the Bible all inferior animals whose way of propagating escapes the popular attention were designated by a common name שרץ (*sherez*); that is, "fast breeding [animals]," or its practical equivalent רמש (*remes*), "that which moves in large masses." This factor creates two new groups, inasmuch as it involves the subdivision of the terrestrial animals into (*a*) higher quadrupeds or "animals of the earth" proper, and (*b*) lower quadrupeds and reptiles, or sherez and remes (see, for the rendering of these two appellatives, Fish and Reptiles). The same subdivision was made for the aquatic animals thus divided into (*a*) *tanninim gedolim*, or cetaceous animals, and (*b*) *sherez, remes.*

Finally, the fourth factor—which gave the last and finishing touch to the division of animals as we find it in Gen. i. 20–25—is the relation of animals to man from a practical point of view; that is, their possible utility, as food or helpers. The animals that were of special usefulness to man, whether domesticated or not, received the common appellative of בהמה—that is, according to current etymology, "dumb animals"—while the others retained the more general name of "animals of the earth." This last line of division is not well marked in all the books of the Bible. The name *behemah* is sometimes extended to all large quadrupeds, whether useful to man or not, just as the *behemot* are frequently thrown in with the other quadrupeds, or "animals of the earth"; but we find also the two groups registered side by side, for instance (besides Gen. i. 20–25), in Gen. i. 26 (according to the Septuagint and Syriac, Gen. vii. 14, ix. 10).

To sum up, in accordance with the four factors mentioned—origin, habitat, propagation, usefulness—the Animals of the Bible are classified as follows: First group, "animals of the earth" proper; second group, behemot; third group, remes, or reptiles; fourth group, birds; fifth group, sherez proper, or fishes; sixth group, cetaceans. Besides this classification into six groups and the one into four, we find in the Bible another division into five groups; that is: (1) "animals of the earth"; (2) behemot; (3) birds; (4) reptiles; (5) fish (Gen. i. 24, 26), according to Septuagint and Syriac, Gen. vii. 14, ix. 10. If we now observe that in the division into four groups the quadrupeds are called indifferently "animals of the earth," or "behemot," it becomes plain that both the division into five and the one into four were obtained from the more complete classification by eliminating such groups of animals as could be dispensed with without creating confusion. Thus, the division into five was obtained from the one into six by suppressing the cetaceans, in which man, the Hebrews especially, had but little interest. Thus, also, the division into four was obtained from the one into five by selecting at one time the behemot and at another the "animals of the earth" to represent all the quadrupeds: the former because more interesting to man; the latter, very likely, on account of greater comprehensiveness.

This classification marks by no means the last stage of action of the four factors we have just described. Thus, we find that the third factor brought about the adoption of a subgroup in the group of birds; that is, the insects called שרץ העוף (flying sherez), from their obscure and rapid mode of propagating. Again, the fourth factor created a new section in the group of the behemot, the domesticated animals being distinguished from the others by the appellation of מקנה "possession, property" (compare Latin "pecunia, peculium," from "pecus"; English "chattel" from "cattle"). Further, apparently under the influence of the same factor, the *miḳneh* was subdivided into (*a*) בעיר *be'ir*, the beasts of burden; (*b*) בקר *baḳar*, plow-animals; and (*c*) צאן "small animals"—sheep and goats, which furnish merely food and clothing. It was also the same factor of usefulness that caused the ברברים *barburim*, fowls, to be detached from the group of birds (I Kings, v. 3). It may be fortuitous that the classification adopted by the author of Gen. i. 20–25 stops, so to speak, half-way, recording only six groups of animals, when the factors that underlie it suggested a good many more groups. It seems, however, that it was with a view of obtaining, when added to the creation of man, the same number seven as that which suggested the division of the whole creation into six days, completing a week with the seventh day. Further subdivisions of some of the groups above mentioned betray the action of another factor. This, however, contrasts entirely with the others, in so far as it originated from an observation of the anatomical structure of the animal itself and its mode of feeding. Thus, the birds of prey were detached from the group of birds, taking the specific name of עיט *'aiṭ*. The behemot were divided into hoofed animals and clawed animals; the former into cloven-hoofed and non-cloven-hoofed animals; and, in their turn, each of these categories into "cud-chewing" and "non-cud-chewing," etc. This attempt at a somewhat scientific classification seems, however, to have been the outcome of ritualism, not of popular observation like the more primitive and general grouping of which the above is a logical, not chronological, analysis. See for further discussion of these classes and subdivisions the article Clean and Unclean Animals; also Birds, Cattle, Fish, Reptiles; Dietary Laws.

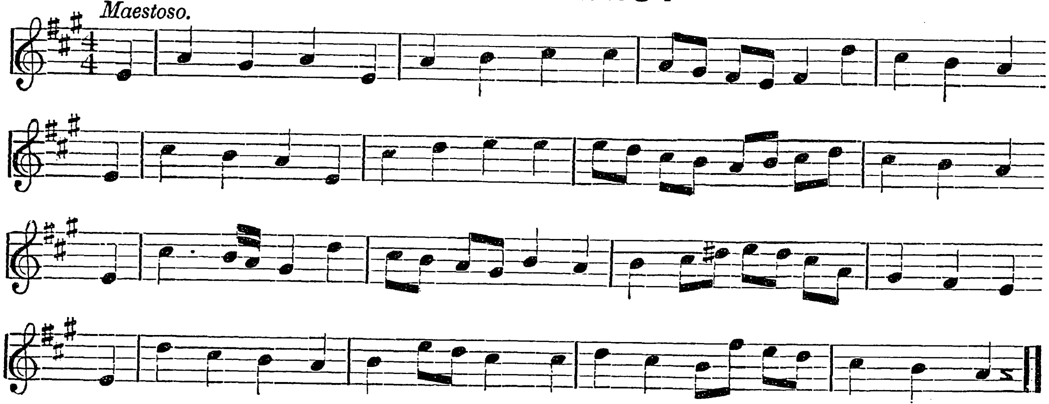
H. R.

ANJOU: Ancient province of France, bounded by Poitou, Brittany, Maine, and Touraine. It now includes the whole of the department Maine-et-Loire as well as parts of Mayenne, of Sarthe, and of Indre-et-Loire. This province, at one time a duchy, like all the neighboring region seems to have been settled by Jews at an early date. One of the earliest rabbis known, Joseph Ṭob-Elem (about 1050), bore the title of chief of the community of Limousin and of Anjou. The rabbis of the province took part in the synods presided over by Rabbenu Tam previous to the year 1171. One Samuel of Anjou was a pupil of the celebrated Tosafist R. Isaac, abbreviated "RI" of Dampierre. But almost nothing is known of the history of the Jews of Anjou. The first circumstantial information furnished by contemporary documents is the mention of the massacres, of which the Jews were victims, in 1236; but it is not known whether the murderers were inhabitants of the province. These massacres were, in fact, the work of the Crusaders, who began their exploits in Brittany and continued them in Poitou. Three thousand Jews in Anjou were killed and five hundred submitted to baptism in the year in question. A rabbi, Solomon b. Joseph D'Avallon, composed an elegy on the martyrs.

AN'IM ZEMIROT



This catastrophe did not completely annihilate the Jews of the province. They are met with again in 1239 and in 1271, at which latter date they are found complaining that they are obliged to wear the "wheel," or Jewish badge, and that certain persons seized property that should pass to them as their rightful heritage. Charles I., duke of Anjou, protected them against the greed and arbitrariness of the bailiffs. But their term of respite seems to have been brief. In December, 1288, the Jews were formally expelled from Anjou by Charles II. on charges of religious propagandism, of usury, and of engaging in trade with Christians. These were the stereotyped accusations that almost invariably accompanied such measures; to what extent they were true in this case it is impossible to determine.

A number of Jews returned to Angers in the fourteenth century, where they inhabited a particular quarter, and were subjected to vexatious regulations, little inducement being given them to remain. From this period all trace of them is lost. In modern times not a single Jewish community has been reestablished in the province. Some localities, such as Saumur, Segré, and Baugé—one of whose rabbis, Moïse, was a contemporary of R. Tam—have preserved the names of streets or quarters which attest the presence of Jews in these places in the Middle Ages.

ANKAVA (ANKOA). See Alnaqua, Ephraim ben Israel.

ANKAVA, ABRAHAM BEN MORDECAI: North-African Talmudist, author, and liturgical poet; born at Fez, Morocco, about the beginning of the nineteenth century; a descendant of the Alnaqua family; died after 1860. His special department of study was the law of ritual slaughtering, in which subject he made extensive investigations, traveling in North Africa and Italy, consulting living authorities, and searching for manuscripts of Castilian and African writers. In the course of his travels he came to Tlemçen, Algeria, which had once been a famous seat of learning, but had degenerated, owing to the persecutions to which the Jews there were subjected (see Alnaqua, Ephraim). Ankava, in his desire to improve the state of education among the Jews of Tlemçen, remained there three years, and founded a Talmudic academy. His labors were highly appreciated in the northwestern parts of Africa; and the wealthier members of the Jewish population supported him liberally. He published (1) "Zekor le-Abraham" (Remember unto Abraham), containing an exposition of the dietary laws, written in verse, and a commentary on them, compiled from various manuscripts (Leghorn, 1839); and (2) "Zebaḥim Shelamim" (Peace-Offerings), written especially for *sho-ḥeṭim* (slaughterers; Leghorn, 1858). He also wrote an Arabic paraphrase of the Seder liturgy, and edited and revised a number of liturgies, into which he incorporated several elegies (*ḳinot*) of his own.

Bibliography: Zedner, in Steinschneider's *Hebr. Bibl.* vol. i. No. 327.

S.

ANKAVA, JACOB BEN AMRAM: Translator; lived in Algeria in the nineteenth century. He translated from Spanish into Arabic a treatise on the laws to be observed by Jewish women, under the title "Dat Yehudit" (Laws for the Jewess), Algiers, 1855.

Bibliography: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 50.

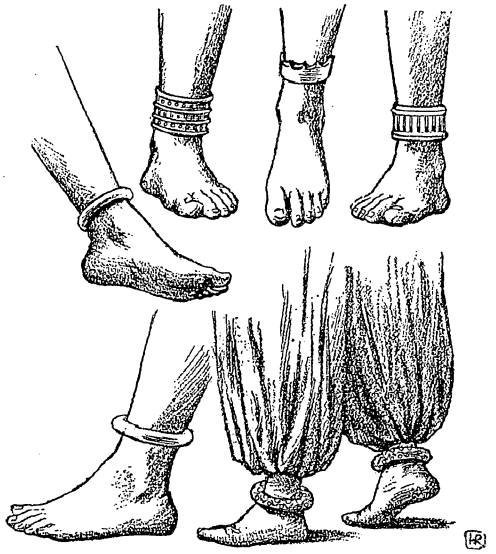
ANKLET: An ornament for the ankle, alluded to by Isaiah (iii. 18) in the list of articles of jewelry that the women of that day were accustomed to wear. Sometimes the Anklets were connected by a short chain, compelling in this way an affected or mincing manner of walking. The Targum on the passage and Yer. Shab. iii. 8*b* translate *'akasim* by "shoes" or "slippers." G. B. L.



Oriental Anklets.
The upper forms are ancient, the lower modern, Anklets.
(From "Narrative of a Mission," 1839.)

ANNA (in Greek writings, for Heb. **HANNAH**): **1.** Tobit's wife, of his own kindred (Tobit i. 9), consanguineous marriages being regarded by the pious Jews of old as especially meritorious (see Kohler, "The Pre-Talmudic Haggadah," in "Jewish Quarterly Review," v. 406, note). **2.** A saintly woman mentioned in the New Testament, daughter of Phanuel of the tribe of Asher, who, after seven years' marriage, had been a widow for fourscore and four years, spending night and day in the Temple with prayers and fasting, and who, as prophetess, had spoken of the coming advent of the Messiah to those assembled there as worshipers "looking for the redemption of Jerusalem," when the sudden appearance of Jesus, the infant, on the scene, caused her to give thanks to God for the fulfilment of the Messianic prediction (Luke, ii. 36–39). Exactly the same story is told of Simeon, the devout one of Jerusalem, that "while looking for the consolation of Israel" he had received a revelation by the Holy Spirit that he should not die before he had seen the Lord's Anointed, and when he saw the child Jesus in the Temple he blessed God for the salvation he had seen (Luke, ii. 25–34). Such "mourners for Zion, who look for the Messianic salvation" or "for the consolation," are mentioned in the early Midrashim (Pes. R. xxxiv.; Bar. Apoc. xliv. 7; compare Luke, xxiii. 51).

These two stories of Luke have the true Jewish coloring, whatever may be said regarding the historic character of these two witnesses to the Messianic claim of Jesus. It is certainly remarkable that there existed a rabbinic legend of another long-lived saintly woman, Serah, the daughter of Asher, who was permitted to live all through the years of Egyptian oppression in order that she might aid in the redemption of Israel by the discovery of the bones of Joseph (Mek., Beshalah, i.). See Serah bat Asher. K.

ANNA: Daughter of Rabbi Eleazar of Worms; lived at Erfurt, where she died as martyr by the hand of Crusaders, Dec. 6, 1213 or 1214. Her mother (Dolce) and sister (Bellette) met with the same fate.

Bibliography: Kayserling, *Jüdische Frauen*, p. 68.

G.

ANNA: Daughter of R. Meir of Ramerupt, sister of Rabbenu Tam and Rashbam, and granddaughter of Rashi; a learned woman of Champagne, France, and who, about the middle of the twelfth century, gave instruction to women in the Jewish religion.

Bibliography: Kayserling, *Jüdische Frauen*, p. 137.

ANNA (אנא). See Hallel, Hakafot.

ANNA BEKORENU (אנא בקראנו): A Pizmon for the Eve of Atonement, according to the Sephardic ritual, taking the place occupied by "Omnam Ken" and "Ki Hinneh Ka-ḥomer" in the ritual of the Ashkenazim. It is a prayerful hymn by David Ibn Bekodah (twelfth century, Zunz, "Literaturgeschichte," p. 217), who obviously intended it for antiphonal rendering between ḥazan and congregation. The traditional melody is of ancient Spanish origin, and of considerable interest in itself for its construction and rhythm. It possesses a flavor of Arab melody, better preserved in the version given on next page, which is that of Bevis Marks, than in the Italian traditional chant. F. L. C.

ANNA IVANOVNA: Empress of Russia; born Feb. 8, 1693; crowned 1730; died Oct. 28, 1740. After the death of Peter the Great (Feb. 8, 1725) a reactionary policy was inaugurated by his immediate successors, who were influenced by the Greek Orthodox clergy. This policy induced Catherine I. to expel the Jews from the Ukraine and from some other parts of the empire, with the order "not to admit them in the future into Russia under any circumstances, and carefully to watch everywhere to this end" (Ukase of May 7, 1727, Complete Russian Code, vii., No. 5063). Peter II. (1727–30), in response to a petition of the Zaporogian Hetman Apostol, permitted the Jews to attend the fairs of Little Russia, provided they carried on a wholesale trade only (Ukase of Sept. 2, 1728, Complete Russian Code, viii., No. 5324).

The German element at the court of Anna Ivanovna, represented by Ostermann and Biron, followed a broader, more practical policy in regard to the Jews, whom they considered to be a useful factor in the development of Russian commerce; not looking upon them with the eyes of the narrow-minded, uneducated Russian clergy, who feared them as enemies of the Church. Anna Ivanovna, therefore, "in consideration that in many military settlements the number of merchants is very scanty, and commerce and industry very little developed," allowed the Jews ("for the benefit of the inhabitants") to carry on trade at fairs in retail (*ibid.* v.–ix. Nos. 6610, 6614). By an edict of July 14, 1738, the Jew Baruch Leibov and the captain of the navy Voznitzyn were sentenced to be burned; the former for the conversion of the latter to the Jewish faith; and the captain, for apostasy. It was probably owing to this incident that Anna Ivanovna issued, on Aug. 29, 1739, a ukase forbidding Jews to own or to rent in Little Russia inns or any other property (*ibid.* v.-x. No. 7869). A previous edict, of July 22, had expelled all the Jews from Little Russia.

ANNAS (Ἄννας; also known as **Anan**; probably a contracted form of the name Ananiah in its Greek form, Ἄνανος, which is employed by Josephus): Son of Sethi, or Seth (Josephus, "Ant." xviii. 2, § 1), a Jewish high priest. He was appointed to the office by Quirinus, governor of Syria, to succeed Joazar. When in his thirty-seventh year, and after having held his position from the years 6–15, he was deposed by Valerius Gratus, procurator of Judea. Annas was the head of a family which produced five high priests during the Herodian period (Josephus, "Ant." xx. 9, § 1). These were Eleazar, Jonathan, Theophilus, Anan, and Matthias. His daughter was married to the high priest Joseph, who, under the surname of Caiaphas, held that office about ten years (27–37).

Annas is the high priest who appears in the New Testament as holding this office along with Caiaphas, his son-in-law (Luke, iii. 2). In fact, one passage calls him plainly the high priest (Acts, iv. 6), while Caiaphas is merely a member of the hierarchic family. It is into Annas' hands that Jesus is delivered for his first hearing, ere being sent to Caiaphas (John, xviii. 13), though in another passage (John, xi. 49, 51) Caiaphas is styled the high priest of that year. From these citations it is obvious that though Caiaphas was the properly appointed high priest, Annas, being his father-in-law and a former incumbent of the office, undoubtedly exercised a great deal of the power attached to the position. The use of the singular in the passage in Luke, in fact, is interpreted by Dr. Plummer as significant of this circumstance: *ἐπὶ ἀρχιερέως Ἄννα καὶ Καιάφα*—"under the high priest Annas-Caiaphas," which would mean "that between them they discharged the duties, or that each of them in different senses was regarded high priest, Annas *de jure* [Acts, iv. 6] and Caiaphas *de facto*" (John, xi. 49). Plummer's further suggestion that Annas may have been encouraged, "so far as it was safe to do so, to ignore the Roman appointments and to continue in office during the high-priesthoods of his successors," must be noted, particularly in view of the fact that government appointments to religious offices were always discountenanced by the Jews. After the removal of Caiaphas four more sons of Annas held the high-priesthood, and the last of them, another Annas, is said to have put to death James, known as "the brother of Jesus," and the first bishop of Jerusalem. The Anan family (בית חנין) is referred to in the Talmud (Pes. 57*a*) as having influence, but using it against the interests of the people.

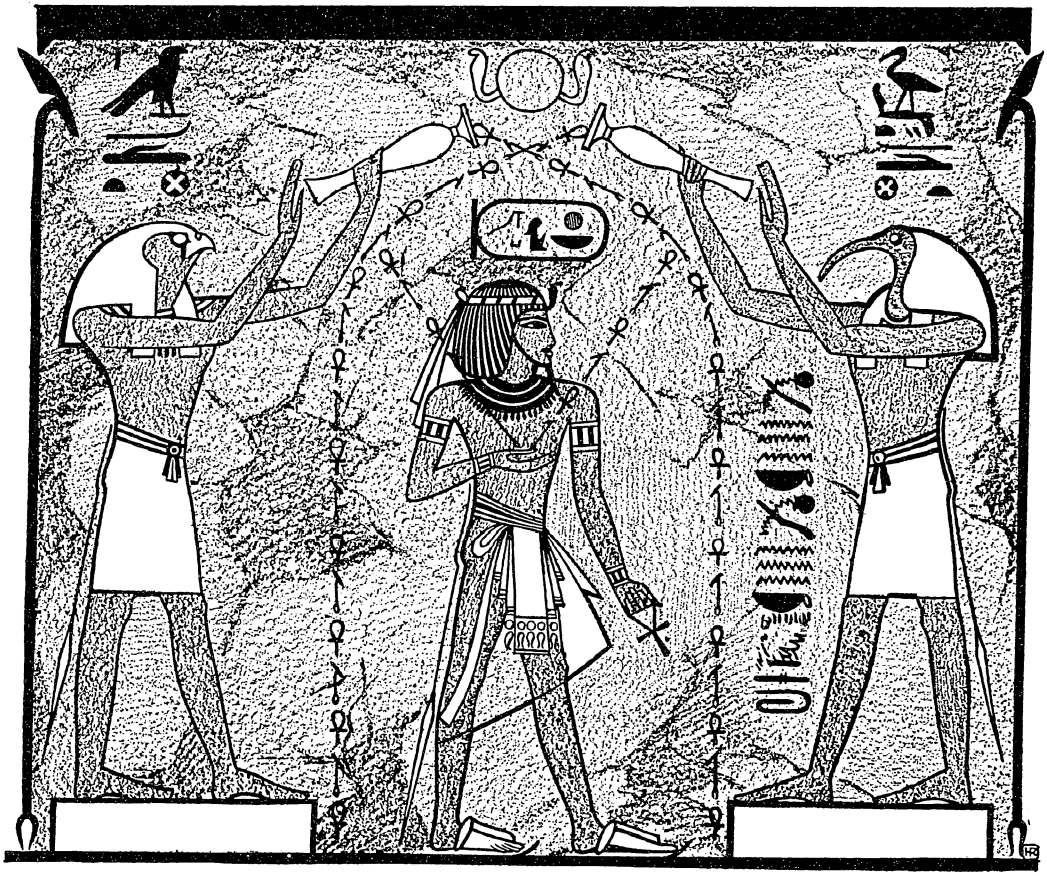
ANOINTING.—Biblical Data: Two words are employed in the Old Testament for Anointing, סוך and משח. The former designates the private use of unguents in making one's toilet, the latter their use as a religious rite.

As a means of soothing the skin in the fierce heat of the Palestinian climate, oil seems to have been applied to the exposed parts of the body, especially to the face (Ps. civ. 15); that this was a part of the daily toilet may be inferred from Matt. vi. 17. The practise is older than David, and runs throughout the Old Testament (see Deut. xxviii. 40; Ruth, iii. 3; II Sam. xii. 20, xiv. 2; II Chron. xxviii. 15; Ezek. xvi. 9; Micah, vi. 15; Dan. x. 3). Anointing accompanied a bath (Ruth, iii. 3; II Sam. xii. 20; Ezek. xvi. 9; Susanna, 17); it was a part of the toilet for a feast (Eccl. ix. 8, Ps. xxiii. 5) [in which a different term is poetically used] (Amos, vi. 6). Hence, it was omitted in mourning as a sign of grief (II Sam. xiv. 2, Dan. x. 3), and resumed to indicate that mourning was over (II Sam. xii. 20; Judith, x. 3).

The primary meaning of *mashaḥ*, which occurs also in Arabic, seems to have been to daub or smear. It is used (Jer. xxii. 14) of painting a ceiling and (Isa.



Pouring Oil on an Egyptian King.
(From Wilkinson.)

xxi. 5) of anointing a shield. It is applied to sacred furniture, like the altar (Ex. xxix. 36, Dan. ix. 24), and to the sacred pillar (Gen. xxxi. 13): "where thou anointedst the pillar."

Anointing of King.

The most important use of mashaḥ is in connection with certain sacred persons. The principal and oldest of these is the king, who was anointed from the earliest times (Judges, ix. 8, 15; I Sam. ix. 16, x. 1; II Sam. xix. 10; I Kings, i. 39, 45; II Kings, ix. 3, 6, xi. 12). So exclusively was Anointing reserved for the king in this period that "the Lord's anointed" became a synonym for king (I Sam. xii. 3, 5, xxvi. 11; II Sam. i. 14; Ps. xx. 7). This custom was older than the Hebrews. El-Amarna Tablet No. 37 tells of the anointing of a king.

In that section of the Pentateuch known as the Priestly Code the high priest is anointed (Ex. xxix. 7; Lev. vi. 13, viii. 12), and, in passages which critics regard as additions to the Priestly Code, other priests as well (Ex. xxx. 30, xl. 13–15). It appears from the use of "anointed priest," in the sense of high priest (Lev. iv. 5–7, 16; Num. xxxv. 25, etc.), that the high priest was at first the only one anointed, and that the practise of anointing all the priests was a later development (compare Num. iii. 3; Dillman on Lev. viii. 12–14; Nowack, "Lehrbuch der Hebräischen Archäologie," ii. 124). In the earliest times the priests were not anointed, but "their hands were filled," which probably means that they were hired (compare Judges, xvii. 5, 12; I Kings, xiii. 33; Wellhausen, "Prolegomena," 5th ed., pp. 155 *et seq.*; Benzinger, "Lehrbuch der Hebräischen Archäologie," p. 407). Weinel (Stade's "Zeitschrift," xviii. 60 *et seq.*) contests this view. The earliest mention of an anointed priest is in Zech. iv. 14; and as Ezek. xliii. 26 still uses "fill the hand" for "consecrated" (that Ezekiel uses it here figuratively for the altar does not materially affect the argument), we may infer that priests were not anointed before the middle of the sixth century B.C. Elijah is directed to anoint Elisha as a prophet (I Kings, xix. 16); but this seems never to have been carried out, and from Isa. lxi. 1 we may infer that the direction was intended to be figurative. So far as is known, prophets were not anointed.

W. R. Smith found the origin of this sacred Anointing in the custom of smearing the sacred fat on the *maẓẓebah*, or altar ("Religion of the Semites," 2d ed., pp. 233, 383 *et seq.*); so also Wellhausen ("Reste des Arabischen Heidenthums," 2d ed., pp. 125 *et seq.*). Weinel maintains (Stade's "Zeitschrift," xviii. 50 *et seq.*) that the use of oil is an agricultural custom borrowed from the Canaanites; that the offering of oil poured on an altar is parallel to the offering of first-fruits; thus the anointing of a king with sacred oil is an outgrowth from its regular use by all persons for toilet purposes.

From this latter view it seems difficult to account for the great sanctity of "the Lord's anointed." The different terms used would lead us to accept Robertson Smith's views of the origin of mashaḥ (namely, that it is nomadic and sacrificial) and to believe that the *suk*, or use of oil for toilet purposes, was of agricultural and secular origin; hence the distinct and consistent use of the two terms.

G. A. B.

——**In Rabbinical Literature:** The first Biblical instance of Anointing as a sign of consecration—the pouring of oil by Jacob upon the stone of Beth-el—offered a problem to later speculative rabbis as to the source whence Jacob obtained the oil in that lonely spot. The reply was made by them that it must have "streamed down from heaven in quantity just sufficient for the purpose" (Gen. R. lxix., Pirḳe R. El. xxxv.). The oil of holy ointment prepared by Moses in the wilderness (Ex. xxx. 23 *et seq.*) had many miraculous qualities: it was never absorbed by the many spices mixed therewith; its twelve logs (1.68 gallons) were sufficient for the anointment of all the kings and high priests of Israelitish history, and will be in use in the Messianic time to come. During the reign of Josiah this oil was hidden away simultaneously with the holy ark, to reappear in the Messianic time (Hor. 11*b et seq.*; Sifra, Millium, 1).

For Consecration.

As to the mode of anointment, an old rabbinical tradition relates (Hor. 12*a*, Ker. 5*b*) that "the kings were anointed in the form of a crown; that is, all around the head; and the high priests in the form of a Greek Chi (χ). In other words, in anointing the priests the oil was poured first upon the head and then upon the eyebrows (see Rashi, and "'Aruk," *s.v.* כי; and, as against Kohut's dissertation, compare Plato, "Timæus," chap. xxxvi., referred to by Justin Martyr, "First Apology," lx.: "He impressed the soul as an unction in the form of the letter χ (chiasma) upon the universe." It is not unlikely that, owing to their opposition to the Christian cross, the Jewish interpreters adopted the *kaph* form instead of the χ—the original *tav* of Ezek. ix. 4.

Rules Governing Anointment.

The rule is stated that every priest, whether the son of a high priest or not, had to be anointed. The son of a king was, however, exempt, except for special reasons, as in the case of Joash, because of Athaliah (II Kings, xi. 12); Solomon, because of Adonijah (I Kings, i. 39); and Jehu, because of Joram's claims (II Kings, ix. 1 *et seq.*); or of Jehoahaz, because Jehoiakim was two years his senior (II Kings, xxiii. 30). This rule was, however, modified, as indicated by the statement that David and Solomon were anointed from the horn (I Sam. xvi. 13; I Kings, i. 39) and Saul and Jehu from the cruse—*pak* (I Sam. x. 1; II Kings, ix. 3: the A. V. has "vial" and "box" in these respective passages). Another rule is mentioned, according to which the kings of the house of Israel were not anointed with the sacred oil at all. In their cases pure balsam was used instead; nor could the last reigning kings of Judah have been anointed with the sacred oil of consecration, since Josiah is said to have hidden it away (see Hor. 11*b*; Yer. Soṭah, viii. 22*c*; Yer. Hor. iii. 4*c*). Rabbinical tradition distinguishes also between the regular high priest and the priest anointed for the special purpose of leading in war—*mashuaḥ milḥamah* (Soṭah, viii. 1; Yoma, 72*b*, 73*a*). According to tradition (see Josippon, xx.; Chronicle of Jerahmeel, xci. 3; compare I Macc. iii. 55), Judas Maccabeus was anointed as priest for the war before he proclaimed the words prescribed in Deut. xx. 1–9.

Anointing stands for greatness (Sifre, Num. 117; Yer. Bik. ii. 64*d*): consequently, "Touch not mine anointed" signifies "my great ones." All the vessels of the tabernacle, also, were consecrated with the sacred oil for all time to come (Num. R. xii.).

For Health and Comfort.

As a rule, Anointing with oils and perfumes followed the bath (see Shab. 41*a*; Soṭah, 11*b*), the head being anointed first (Shab. 61*a*). On the Sabbath, Anointing, whether for pleasure or for health, is allowed (Yer. Ma'as. Sh. ii. 53*b*; Yer. Shab. ix. 12*a*, based on Mishnah Shab. ix. 4; compare Tosef., Shab. iii. [iv.] 6).

It is forbidden, however, in both instances on the Day of Atonement (compare Yoma, viii. 1, 76*b*); whereas on the Ninth of Ab and other fast-days it is permitted for health only (compare Ta'anit, 127*b*), and is declared as enjoyable as drinking (Shab. ix. 4).

Anointing as a remedy in case of skin diseases is mentioned in Yer. Ma'as. Sh. ii. 53*a*; Bab. Yoma, 77*b*; and Yer. Shab. xiv. 14*c*; but at the same time incantations were used, the person anointing the head with oil also pronouncing an incantation over the sore spots (*lohesh 'al ha-makkah*) exactly as stated in the Epistle of James, v. 14, and Mark, vi. 13 (compare Isa. i. 6; Ps. cix. 18; Luke, x. 34).

Men should not go out on the street perfumed (Ber. 43*b*); but women perfume themselves when going out (see Josephus, "B. J." iv. 9, § 10). A wife could demand one-tenth of her dowry-income for unguents and perfumes; the daughter of the rich Nicodemus ben Gorion was accustomed to spend annually four hundred gold denarii for the same (Ket. 66*b*). These facts serve to cast light on the story of Luke, vii. 38-46, and John, xii. 3.

When Adam, in his nine hundred and thirtieth year, was seized with great pain during his sickness, he told Eve to "take Seth with her to the neighborhood of paradise and pray to God that He should send an angel with oil from the tree of mercy, in order that they might anoint Adam therewith and release him from his pain" (Apocalypse Mosis, 13; Vita Adæ et Evæ, 36-4). What follows here seems to be the work of a Christian writer or interpolator, and corresponds with "Evangelium Nicodemi," p. 19, "Descensus," p. 3. Compare the baptismal rite of the Elkesaites in Hippolitus' "Refutation of Heresies"; the baptismal formula of the Ophites in Origen, "Contra Celsum," vi. 27, "I have been anointed with the white ointment from the tree of life"; and the Ebionitic view of Christ and Adam as the first prophet anointed with oil from the tree of life, while the ointment of Aaron was made after the mode of the heavenly ointment in the Clementine "Recognitiones," xlv.-xlvii. "The pious anoint themselves with the blessed ointment of incorruption" ("Prayer of Aseneth," chaps. viii. and xv.). Compare also the mystery of the spiritual ointment, in the Gnostic books (Schmidt, "Gnostische Schriften in Koptischer Sprache," pp. 195, 339 *et seq.*, 377, 492, 509).

K.

ANONYMOUS WORKS: Hebrew anonymous literature is coeval with the literature of the nation. The Bible mentions two anonymous historical works: "Milḥamot Adonai" (Num. xxi. 14) and "Sefer ha-Yashar" (Josh. x. 13). The Hebrew writer of antiquity generally did not consider his work as his own property, but as the property of the whole nation whose ideas or traditions he noted. Assumption of authorship began after the Talmudical epoch; and then an author who deliberately omitted to put his name to his work had a motive for the omission.

Hebrew Anonymous Works, as to the reasons for their anonymity, may be divided into the following three classes: (1) Collectaneous works, such as the Midrashim, to which the editor, being a mere compiler, did not deem himself of sufficient importance to attach his name; (2) ancient works the authors of which, either because of modesty (see preface of "Sefer ha-Ḥinnuk") or, what is more frequently the case, because of the negligence of a copyist, are not given; (3) modern works not signed simply because their authors express ideas or criticisms they are unwilling to father.

The following is an approximate alphabetical list of all the printed anonymous Hebrew works known up to 1875:

ANSBACH (sometimes **Anspach**): Ancient town of Bavaria, Germany; the capital of Middle Franconia, situated on the Rezat, twenty-five miles southwest of Nuremberg. There was a Jewish settlement here in 1328, but it was annihilated by the Flagellants in 1349. In the municipal records of Nuremberg, about the middle of the fourteenth century, the Jews of Ansbach are often mentioned, and a certain Joseph de Onolzbach is recorded among the creditors of John II. (1343). From the fact that a "Judengasse" (Jews' Street) is mentioned at Ansbach between the dates of 1470–72, one may conclude that a large Jewish community existed here at that time, although only seven Jewish taxpayers are found recorded in 1470. Mention is also made in the records of a "Schulklopfer," or sexton, which shows that there must also have been a synagogue there. In 1564 the Jews were banished from Ansbach, and were only permitted to be there during the weekly and annual fairs. They were again heard of in 1643; for in that year a complaint was made that their presence was prejudicial to the Christian trade. The number of Jewish families in Ansbach in 1631 was 27. Among 8 Jews who in 1672 rendered homage to Margrave John Frederick here, there were 7 house-owners. The records for the year 1675 show that only 8 Jewish families with 57 persons dwelt in Ansbach at that time; in 1704 the number increased to 10 families; and by 1757 as many as 43 resided there. Notwithstanding the restrictions placed on their living in this city their number had risen to 60 families in 1789, and among them were 24 house-owners.

Until the year 1675 the Jews of Ansbach held divine service in a room in the house of Anton Model; but owing to dissensions a number of them separated and held their services at the house of Simon Model. Through the efforts of Isaac Nathan the community acquired a synagogue in 1746.

Among the notables who resided here from 1456 to 1458 the Judenmeister Pymann may be mentioned. About 1682 a rabbi of the name of Jeremiah Judah is mentioned. Of other rabbis there may be mentioned Samuel Zirndorfer (1754–92), Ullmann (1792–93), Hochheimer (1793–1835), Aaron B. Gruenbaum (1841–92), and Dr. P. Kohn (1900). In 1875 there were 200 Jews in Ansbach (Engelbert, "Statistik des Judenthums im Deutschen Reiche," p. 16), and in 1900, 295 out of a total population of 15,883. The congregation has a Jewish public school, attended by 40 children. The rabbinate of Ansbach has charge also of the communities in Colmberg, Egenhausen, Jochsberg, Lehrberg, Leutershausen, Obernzenn, and Dietenhofen.

A. F.

ANSCHEL: Rabbi at Cracow; flourished in the first half of the sixteenth century. He was the author of "Mirkebet ha-Mishneh" (The Second Chariot), a Judæo-German Biblical concordance, preceded by a lengthy introduction. The volume—now very rare—first appeared at Cracow in 1534, but was reprinted in the same city, in 1584, under the title "Sefer R. Anschel." Wolf (in "Bibl. Hebr." i. 359) confounds Anschel with Asher Anschel b. Joseph Mordecai of Posen, who translated into German the prayers for the three principal historic feasts of the Jewish year, published at Prague about the year 1600. Wolf's error was copied by Fuenn ("Keneset Yisrael," p. 147) and by Sternberg ("Geschichte der Juden in Polen," p. 184). But Zunz recognized the distinction between the two scholars, and furthermore suggested the possible identity of the latter with the grandfather of R. Meir Lublin (compare "Gesammelte Werke," iii. 85, 87). As far as chronology is concerned, Zunz's suggestion may be correct, for R. Meir's grandfather probably died about the year 1600. But it is doubtful whether a man of whom R. Meir Lublin speaks as a profound and pious cabalist would occupy himself with the rendering of the liturgy into a profane language. Unfortunately, the allusion of R. Meir to his grandfather, in his responsa ("Teshubot Maharam Lublin," § 83), and a similar reference to his sanctity and cabalistic attainments by R. Meir's son, in the preface to the same work, are all the information extant relating to this R. Asher, who was one of the pioneers of Jewish scholarship in Poland, and probably succeeded R. Jacob Pollak in the occupancy of the important rabbinical chair at Cracow. As an author, only the memory of a cabalistic dissertation on the prayers and benedictions written by him under the name of "'Emeḳ ha-Berachah" (The Vale of Blessing) has come down to us (Isserles, "Torat ha-'Olah," iii. 84; Meir Lublin, "Responsa," No. 83).

ANSCHEL, WORMS. See ASHER BEN WOLF.

ANSCHELM (called also **R. Anshel ha-Levi of Cologne**): Chief rabbi of several German provinces. He was appointed to the office of chief rabbi in the year 1435 by Conrad of Weinsberg, hereditary chamberlain and plenipotentiary representative in this particular matter of the Holy Roman Empire. Anschelm's sphere of activity was restricted to Mayence, Cologne, Treves, Bremen, Worms, Speyer, Basel, Strasburg, and a number of other prominent cities and districts. This was the second instance of such an appointment in the history of the German Jews, the first being that of R. Israel, who was nominated at Nuremberg, May 3, 1407, by King Ruprecht, to serve as Königlicher Reichs-Hochmeister (royal chief rabbi). Anschelm was the younger contemporary of that group of eminent rabbis to which Maharil (R. Jacob b. Moses ha-Levi Möllin) and R. Solomon Runkel belonged. R. Seligmann Bing Oppenheim alludes to him as a remarkable man. Still, we find in the Jewish sources no reference at all either to his appointment or to that of R. Israel, most likely because government nominations for communal positions, as well as all external interference in their religious affairs, were extremely unpopular among the Jews of the Middle Ages, and were very frequently ignored.

ANSHE KENESET HA-GEDOLAH. See SYNAGOGUE, GREAT.

ANSPACH, JOEL: French religious writer; born about 1800; died September, 1872. He was the only brother of Philippe Anspach. Joel was the first to translate the daily prayers from Hebrew into French. In 1842 he published his "Paroles d'un Croyant Israélite"—a polemical work directed against Catholic proselytism, and which, therefore, occasioned much comment.
I. B.

ANSPACH, PHILIPPE: Honorary counselor to the French Court of Cassation (court of appeal) and officer of the Legion of Honor; born in Metz, 1800; died Dec. 3, 1875. His father, Mayer Anspach, died in 1844, aged ninety-three years. Philippe studied law, and at the time of the July revolution, 1830, was a practising advocate in Paris. He took an active part in the events leading to the revolution of July, and was thereupon appointed deputy procurator of the department of Seine-et-Marne at Meaux by the government of Louis Philippe. After filling this office for a time, he was called to Paris, and successively became judge deputy to the Court of Justice, deputy attorney-general, counselor at the Court of Appeals, section-president thereof, and finally counselor to the Court of Cassation. A few years before his death ill health compelled him to resign the last office, after a legal career in which he displayed profound knowledge of law, together with remarkable eloquence and incorruptible firmness. Anspach was the first Jew to occupy a place in the supreme magistracy of France. He was a thorough Israelite and evinced an active interest in all matters pertaining to his coreligionists. Having held a seat in the Consistory of Paris for a long time, he was elected, in 1845, to the Central Consistory, where he distinguished himself by his intelligence and administrative ability. It was characteristic of the man that at court levees he would attend as one of the representatives of the Jewish consistory, rather than with his fellow dignitaries of the Court of Justice.

Anspach had two daughters, the elder of whom married Baron Gustave de Rothschild. He is the author of a pamphlet, "De la Procédure Devant les Cours d'Assises."
I. B.

ANT IN JEWISH LITERATURE, THE: In Hebrew נמלה, so also in Arabic *naml* (etymology doubtful); in Aramaic (Targum, Peshito, and Talmud) שומשמנא, which has its equivalent in the Arabic *sumsum*, *simsim*, and is used especially of the small red Ant, distinguished from *shumshemana gamla* (camel-ant), the large Ant (see Fleischer, in Levy's "Chal. Wörterb." ii. 578). This became by syncope *shumshana*, and by transposition *shushmana*. Another designation for the Ant in the Talmud is קמצא (see Rashi on Ber. 54*b*; and Kohut, "Aruch Completum," vii. 125*b*); though, according to some, this means the locust.

In the Old Testament.

The Ant is referred to twice in the Book of Proverbs as an example of provident and organized industry: "Go to the ant, thou sluggard; consider her ways, and be wise: which, having no guide, overseer, or ruler, provideth her meat in the summer, and gathereth her food in the harvest" (vi. 6-8); and "There be four things which are little upon the earth, but they are exceeding wise: The ants are a people not strong, yet they prepare their meat in the summer" (xxx. 24, 25). The passages refer to some species of harvesting-ant, probably either to *Aphænogaster* (formerly called *Atta*) *barbara*, or to *A. structor*, or to *Phreidode megacephala*, which are to this day found in Syria and all around the Mediterranean basin. These species wherever they are found, as the latest investigations of naturalists have proved, lay up stores for the winter.

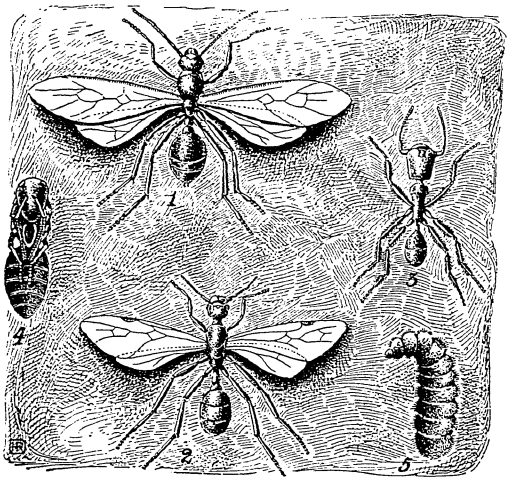
In the Talmudic Literature.

In connection with the passage in Prov. vi. the Ant is treated from an ethico-pedagogical point of view in Ḥul. (57*b*), where it is related that Simon ben Ḥalafta made experiments to ascertain whether the ants really lived without a ruler; in 'Er. (100*b*), where the industry of the Ant in procuring food is mentioned; and in Deut. R. v. and Yalḳ. on Prov. 938. In Ḥul. (63*a*) it is pointed out that the wisdom of the Creator is manifested in the fitness of the body and the wonderful life of the Ant.

The therapeutic use of the Ant to avert or cure ills is referred to in Yeb. 76*a*, Yer. Yeb. viii. 9*b*, and Shab. 66*b*. In connection with the last reference, it may be remarked that the Ant's juice is even to-day sometimes popularly recommended as a curative of jaundice.

As may be expected, the wise little animal is not absent from the folk-lore of the Talmudic literature. In Ber. (54*b*) it is related that when Og, king of Bashan, took up a mountain of three parasangs in extent in order to bury under it the entire camp of Israel, God caused white ants to bore a hole in the rock, so that it slipped over the head of Og and remained fastened upon his neck.

The Ant also comes in for a share of the legislation of the Talmud (Mak. 16*b*; compare Peah, ii. 7, iv. 11; Ma'as. v. 7; Men. 71*b*; M. Ḳ. 6*b*); it is forbidden as food. The passage in Peah (iv. 11) contains a quaint piece of legislation which would show that the seed-stores of the ants in Palestine were of considerable size and importance. It is said there that the granaries of ants found in the midst of a growing crop of corn should belong to the owner; but if these granaries are found after the reapers have passed, the upper part of each heap should go to the poor and the lower part to the owner. Rabbi Meir is of the opinion that the whole should go to the poor, because whenever there is doubt about a question of gleaning, the decision should be in favor of the gleaner. A description of the process of destroying ant-heaps is given in M. Ḳ. 6*b*.



Ants.

1. Male. 2. Female. 3. Worker (neuter). 4. Pupa. 5. Larva.

The halakic aspects of the Ant are discussed in the "Halakot Gedolot" (ed. Warsaw, p. 262*a*) of Simon of Kayara, and in the "Shulḥan 'Aruk, Yoreh De'ah," § 84, 12, 13; § 100, § 104).

In Post-Talmudic Writings.

In the post-Talmudic writings Arabic influence (compare Koran, sura xxvii., surnamed the "Ant") is conspicuous. To this we owe the pretty story of the meeting of King Solomon with the ants, in which the wise king was outwitted by the cunning little animals (compare "Ma'aseh ha-Nemalah," in Jellinek's "B. H." vol. v., Vienna, 1873; German part, pp. 11 *et seq.*; Hebrew part, pp. 22 *et seq.*).

Samuel ibn Ḥisdai, in "Ben ha-Melek weha-Nazir" (xv.), a Hebrew rendering from the Arabic version of "Barlaam and Josafat," holds up the Ant as an example, in the sense of the passages of the Book of Proverbs. Ḳalonymus ben Ḳalonymus in his "Iggeret Ba'ale Ḥayyim" (iv.), which is likewise a Hebrew version from the Arabic, describes at some length the habits of the Ant in building its abode and in gathering and preserving its food.

An elaborate panegyric on the Ant is contained in the *makama* of the Ant and flea in Judah Alḥarizi's "Taḥkemoni." The fable of the Ant and the wasp in the "Mishle Shu'alim" of Berechiah ha-Naḳdan is practically identical with Lafontaine's well-known fable, "Le Fourmi et la Cigale."

In passing over to the religious aspects of the Ant in post-Talmudic writings, the religio-philosophical and legal phases become apparent. As regards the former, Baḥya ibn Paḳuda, in his "Ḥobot ha-Lebabot," xi. 2, in dealing with the passage in 'Er. 100*b*, already cited, points to the divine wisdom which is manifested in the ants. In book v. the conduct of the Ant, as in Prov. vi. 6, is recommended as an example in the treatment of our own affairs, insignificant when measured by the greatness of the Creator, but still more contemptible when marred by disorder.

Maimonides, in his introduction to Seder Zera'im, deduces from the fact that the ants are sometimes winged, sometimes without wings, that it is due to the limitations of our mind that we can not gage the purpose of many things in the universe.

Joseph Albo, in his "Iḳḳarim," iii. 1, like Baḥya, utilizes 'Er. 100*b* to recommend the moral example afforded by the animals. The Ant especially teaches us industry and honesty by the manner in which it gains its food.

Among the exegetes, Levi ben Gershon, in his commentary to Proverbs, dwells at some length on the sagacity and resourcefulness of the Ant, and derives from Prov. xxx. 25 an admonition to humility.

Joshua ben Shuoi, a disciple of Solomon ben Adret, in his "Derashot" to Deut. xvi. 8 to xxi. 9, points out the wisdom of the ants, and adds that this wisdom is not due to reason, but is derived from the sparks of the Supreme Soul (*Neshamah ha-'Elyonah*), of the active intellect (*sekel ha-poel*, *νοῦς ποιητικός*), which God bestows on them in order to instruct man.

Isaac 'Arama, in his "'Aḳedat Yiẓḥaḳ," xxviii., shows that according to the passage Prov. vi. 6, while everything is determined by God's providence, man must nevertheless gain his livelihood by industrious work. In section 71 he points out that some beings attain to perfection, though they may not be endowed with all the four Aristotelian principles (compare Aristotle, "Physics," ii. 7; "Metaphysics," i. 3); and gives as an instance the Ant, which has no *εἶδος* or "form" in the technical sense. He thus derives the lesson that man, in whom all four principles are united, should strive by means of science to obtain mental perfection.

Scientific Treatment.

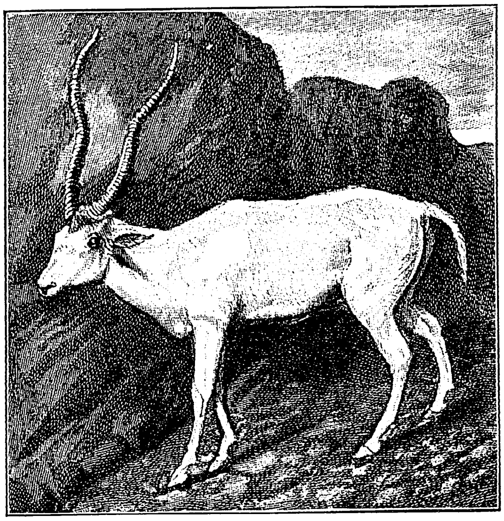
From a purely scientific (biological) point of view the Ant is treated by Gershon ben Solomon, father of the exegete Levi ben Gershon, in his work "Sha'ar ha-Shamayim." The Ant, he says, gathers its wheat in the harvest, biting off the germs of the grains in order to prevent them from sprouting, and thus preserving them from rotting—a fact verified by recent observation. Each Ant gathers seven grains, although one would suffice it for life. One who gathers more treasures than he can use is therefore called an "Ant." The Ant, he says further, is proportionately the strongest of all creatures, being able to carry from two to four times its own weight. Moreover, it can move both ways, forward and backward.

The "Sefer ha-Berit" (ed. Brünn, 1799, 74*a*) distinguishes male, female, and neuter (*sefeḳim*) ants. The first two, on reaching maturity, acquire wings and fly, while upon the neuters devolve not only all the work, but also the hatching of the eggs, of which a single female lays no less than 8,000.

M. Gr.—I. M. C.

ANTEDILUVIANS, BOOK OF. See Apocrypha.

ANTELOPE: One of a variety of ruminants resembling the deer in many respects. The Revised Version of the Bible has the word "Antelope" twice as a translation for "תאו" (Deut. xiv. 5, Isa. li. 20); but this translation can not be justified. For want of other sources tradition alone can establish the identity of the animal; and tradition translates *teo* as wild ox (Tosef., Kil. i. 9; Ḥul. 80*a*).



Antelope (*Oryx Addax*).
(From a photograph.)

G. B. L.

ANTHROPOLOGY: The science of man, especially in his physical aspects, and of the climatic and social environments determining those aspects. The Anthropology of the Jews, who, either racially or socially, form a separate portion of mankind, should be of special interest to students of the science as bearing upon its central problem; namely, whether the similarities observed among different classes of mankind are due to "nature" or to "nurture"; that is, to common ancestry or to common environment. If Jews are wholly of one race, the difference produced among them by variations of social environment should form a suitable sphere of inquiry: if they are not of one race, it is of interest to the scientist to ascertain how the marked similarities between Jews of different climes have been produced. Much turns upon the preliminary question whether contemporary Jews are of the same race as those mentioned in the Bible.

Purity of Race.

The general arguments hitherto advanced against the purity of the Jewish race are: (1) The evidence that in Bible times the Jews intermarried with surrounding nations; (2) the frequent reference to proselytes in early Christian literature; (3) the prohibition of intermarriage repeated in many of the councils of the Church implies frequent infringements; (4) the conversion to Judaism of the Chazars, a Turanian tribe in South Russia, from whom, it is suggested, most of the Russian Jews, who form about half of contemporary Israelites, are descended; (5) the marked difference in type to be observed among contemporary Jews. To these arguments the upholders of the purity of the race reply: (1) The intermarriages mentioned in the Bible are few in number and with cognate tribes; (2) proselytes were the chief sources from which the early Christian Church drew its members, thus removing them from contact with Judaism; (3) the severity of the punishment attached by the Church to intermarriage proves how infrequent intermarriages must have been; (4) the conversion of the Chazars was merely nominal, and it has left traces on only the few Karaites of South Russia: the other Russian Jews came from Germany, as is shown by the German dialect they use; (5) the differences of type may have been produced by social differences and are not so great when a series is taken into consideration. The upholders of the purity point out: (6) That *cohanim*, or members of the priestly caste, were and are not allowed to marry a proselyte, and must, therefore, have preserved their purity of descent; (7) that the marked resemblance of Jewesses throughout the world, showing as they do less variation among the females of the race, conforms to the biological test of purity of breed; (8) that mixed marriages in the present day are markedly infertile, which would reduce the influence of such intermarriages in an increasing geometrical ratio; (9) the rarity of instances in historical sources of proselytism in mixed marriages since the Middle Ages; (10) the prepotency of Jewish blood, as shown by the marked Jewish type of even the remoter offspring of Jews that have intermarried; (11) the stringent social separation, which can be historically proved throughout the Christian centuries; (12) the existence of marked Jewish type in the features and bodily measurements of contemporary Jews wherever found.

Anthropometry.

Measurements of Jews have been taken sporadically in most European countries with the following results: The average height of Jews is 162.1 cm.; span of arms, 169.1 cm.; and girth around the chest, about 81 cm.: so that they are the shortest and narrowest of Europeans. Their skulls are mainly brachycephalic; that is, the breadth is generally over 80 per cent of the length. This has been used as an argument against the purity of race, as most Semites—like the Arabs and Syrians—are dolichocephalic, or long-headed. But, as Jewish skulls are almost the broadest in all Europe, it is difficult to say how this characteristic could have arisen from any mixture: it is probably due to cerebral development.

As regards complexion, Jews are darker than the surrounding peoples in Europe, except Galicia. The hair is also darker; on the average 15 per cent having black hair as against 3 to 4 per cent in the general European populations. Curiously enough, there is a larger proportion of red-haired men among Jews than in any other race; possibly due to want of nutrition. Jewesses seem to be more keen-sighted and to have greater strength of grip than other women. Among Jews about one-fifth have blue eyes, against one-third in the general populations. Altogether about one-fourth of the Jews can be described as fair, as against one-half of the populations among whom they dwell. The nose is generally considered the characteristic feature of the Jews, who have, on the average, the longest (77 mm.) and narrowest (34 mm.). Its characteristic shape is due to the accentuation of the nostrils, which gives it the "figure 6" formation. The lips of Jews are also characteristic, as large a proportion as 48 per cent being thick. These features are the elements that go to make the marked Jewish type, which has been defined "as Semitic features with ghetto expression": it is found in the Assyrian bas-reliefs as well as in the ghetti of to-day. From composite portraits of Jewish lads, the Jewish face has been defined as possessing "accentuated flexible nostrils; largish mouth, with ends well marked, and pouting under-lip; heavy chin; broad forehead with prominent superciliary ridges scantily covered with hair toward the outer extremities; and large, brilliant, dark eyes, set closely together, with heavy upper and protuberant lower lid, having a thoughtful expression in youth, transformed to a keen and penetrating gaze in manhood."

The above results are averages taken from different numbers and different classes, and consequently vary in trustworthiness. The details as to hair, eye, and complexion are based upon the examination of no less than 120,000 individuals; those with regard to the nose, upon only 119. Differences in social position are found to affect results considerably; thus, while 12,000 Jews gave an average height of 162.1 cm., that of 130 English Jews of the better class was 170.8 cm. The predominantly narrow girth of Jews would give them what is technically known as the lowest "index of vitality"; but statistics prove otherwise.

Biostatics.

With regard to their vital statistics Jews show equal similarity among themselves and differences from the populations of which they form a part. Thus, as regards marriage, Jews in almost all countries have a lower marriage-rate than Christians when reckoned upon their total population; their average being about 6 marriages to every 100 inhabitants. They marry earlier than Christians (in Russia one-half of Jewish marriages are between persons under twenty); and, as a consequence, there is a larger proportion of Jewish marriages between bachelors and spinsters. Jews marry their cousins more frequently than other people do: probably three times as often. The rate of intermarriage between Jews and Christians varies in different localities, from 1 per cent in Algeria to 12 per cent in Berlin. Jews appear to seek divorce in slightly fewer numbers than the rest of the population.

Estimated upon the total population, the birth-rate of Jews is less—an average of about 33.5 per 1,000 per annum against 36.3 per 1,000 of the whole population—though this is opposed to the general impression, and appears to be contradicted by the fact that, as a rule, Jews have larger families than Christians. On the other hand, mixed marriages are remarkably infertile, resulting in only 15 births per 1,000. The sex of Jewish children is more predominantly male than in the general population, in the proportion of 112 to 105 (the female children being reckoned at 100); though, curiously enough, in Europe there is a larger proportion of Jewesses to Jews (106 to 100) than of other women to men in the general population (103 to 100). This predominance of male births among Jews has attracted the notice of naturalists, and appears to be due partly to the smaller number of illegitimate and still-births. It is found that a larger proportion of males occur among the still-births, so that if there are less still-births, the larger is the number of males born. Jews show an average of about 3 per cent still-births among all births as against 4 per cent for the general population: this difference, though only of 1 per cent absolutely, is 25 per cent relatively. The comparative infrequency of still-births may be due to the small proportion of illegitimate births among Jews, which is, on the average, only one-fifth of the normal proportion. The superiority varies in different places, and is growing less marked as the pressure of ghetto opinion is becoming less effective: in Prussia, for example, there has been a perceptible rise in the rate of illegitimacy.

The death-rate of Jews is lower than that of their neighbors: strikingly so in deaths under five years. This is the key to the whole of Jewish vital statistics, inasmuch as comparatively few deaths occur between five and twenty; hence, a relatively larger proportion of the Jewish population is living between these ages than is the case in general populations. Consequently when marriages or births are reckoned on the *whole* population they appear less among Jews than among their neighbors; though if reckoned upon the population over twenty years of age—which would be the proper method—they would be really larger. Thus in Budapest, the percentage of the Jewish population under twenty was 45, while that of the Christians was about 34. The low death-rate among infants is probably due to the fact that Jewish mothers rarely do anything but housework. A low death-rate is shown in almost all the remaining ages until the very highest age, which implies that Jews are longer-lived than their neighbors. It has been suggested that Jews should claim special life tables and premium rates from the insurance companies. Owing to the early date of marriage and the viability of children, the length of a generation (= average age of males at marriage + 1 year + half the number of years of female fertility) of Jews is less than among Christians (about 31 years to 36); so that there are a larger number of generations living together; their increase is more rapid; and tradition holds a stronger place among them.

Morbidity.

Little has been done in the collection of details as to the special morbidity of Jews, either as regards the diseases to which they are most susceptible or as regards those from which they die. Jews have been credited with immunity from tuberculosis; but this has been disproved by the experience of the overcrowded immigrants in New York. They are undoubtedly freer than others from alcoholism; the number of such cases at Jewish clinics being phenomenally small. Jews are said to be more liable than others to diabetes and hemorrhoids—due probably to their sedentary habits. They are less liable to venereal diseases. They are undoubtedly more liable to disease of the nervous system, as is shown by the larger percentage of deaf and dumb, blind and insane among them than among the general population. Jews are markedly more color-blind than their neighbors, at least one-half as much again. Their neurotic tendency is due either to racial peculiarities or to the fact that they are mostly town-dwellers and that they earn their living by relatively more brain-work. Curiously enough, Jews, while showing inferiority compared with Christians in regard to nervous diseases, show superiority with regard to suicide, few of them resorting to self-destruction.

The peculiarities of Jewish statistics may be due to racial unity or to similarity of social conditions. Even such measurements as those of height and growth may be due to nurture rather than to nature. It has been found, for example, that Jews in the East of London reach an average height of 64.3 inches, whereas in the West End the average is 67.5. The social condition of Jews has thus a direct bearing upon their anthropometry, and the key to this

Social Conditions.

is afforded by the fact that they live almost exclusively in towns, due in part to medieval persecution and in part to the needs of public worship. As a rule, only one-fifth of the Jewish population dwell outside of large towns, whereas two-thirds of the general population do so. This accounts in a large measure for their frail physique and shorter height, and for the larger proportion of mentally and physically afflicted. It also explains the small number of Jews in Continental armies, and, above all, the rarity of their employment as agricultural laborers. The peculiarities of their occupations are the predominance of commerce—over 50 per cent of the adult workers being thus engaged as against only 6 per cent of the general population—and the correspondingly small number of artisans, who are only one-half as numerous as among the Gentiles. Of the occupations most in vogue among Jewish artisans tailoring and shoemaking take the precedence, as they do in the general population; and these have been the occasion of much "sweating" in the United States because of the long work-hours which the Russian Jews are willing to accept. Owing to the prevalence of these ill-paid industries, Jews in the general mass are poorer than their fellow citizens, though a few exceptional persons have acquired great wealth. Taken as a whole, Jews are poorer than any European people. They appear to give more attention to the higher education of their children; and as a consequence are found among the professional classes in much larger proportion than their numbers warrant; for example, in Italy 8.7 per cent of Jews against 3.7 per cent of the general population. Here, again, correction has to be made, because of the fact that Jews are town-dwellers, from whom the professions are almost exclusively recruited. This is especially the case with regard to medicine. Jewish doctors on the Continent of Europe are, comparatively speaking, three times as numerous as Gentile doctors. There are fewer clergymen: an average of 1 Jew to 1,500 of the population as against 1 Christian to 1,000.

The results mentioned above have been compiled from a large number of statistics of various countries, and it may be desirable to illustrate the general results by the case of Prussia, which has collected statistics about its Jews for a longer period than any other country.

Statistics Relating to Jews in Prussia.

	Jews.	Others.
Living in towns, per 100	78.91	35.4
Women to 100 men	108	103
Marriages, percentage of, to population	6.5	8.2
Mixed, percentage of marriages	6.1	8.5
Unmarried persons over 14	48.95	54
Births per 1,000	22.7	38.2
Still-births, percentage of all births	3.4	4.1
Illegitimate, percentage of all births	2.9	7.9
To a marriage	3.5	4.6
To a mixed marriage	1.7	
Deaths per 1,000	14.9	22
Under 15, percentage of all deaths	40.1	56.2
Suicides per 100,000	9.6	20.2
Excess of births over deaths	7.8	16.2
Afflicted, per 10,000	63.45	41.98
Blind, per 10,000	13.34	9.45
Deaf-mutes, per 10,000	14.88	9.96
Insane, per 10,000	35.23	22.57
Color-blind, percentage	4.1	2.1
Eyes:		
Blue	18.7	43
Gray	28.8	32.7
Brown	53.5	24.3
Hair:		
Blond	22.4	72.2
Brown	55.5	26.1
Black	10.1	1.2
Red	0.5	0.3
Skin:		
White	77.7	93.5
Occupations:		
Agriculture	1.06	36.11
Industry	19.31	36.06
Commerce	55.68	12.52
Official and professional	6.26	7.18
Without occupation	15.79	8.23
Education:		
Higher	3.6	0.5
Unable to read	7.2	8.9
Criminals per 1,000	58.7	69.5
Paupers	6.46	4.19

The foregoing figures relate for the most part to the averages of the last quinquennial period (1891–95) for which statistics are available; but some of the details refer to earlier dates. They are similar to what is found among Jews of other countries in every case except with regard to births and marriages, and the excess of births over deaths, which is generally above the proportion in the general population.

Anthropologically considered, the Jews are a race of markedly uniform type, due either to unity of race or to similarity of environment. Their physical condition is mainly determined by their dwelling in towns. Their social position is the least fortunate, owing to the fact that they are crowded together, as in the Pale of Settlement in Russia, or are forced to immigrate to other countries, where they have to compete as foreigners. The general population is approaching the Jewish with regard to predilection for town life. The Russian Jews domiciled in other countries are bringing up a generation adapted to the newer environment. Jewish anthropological characteristics will therefore be likely to become more similar to that of the general population in the future. But the peculiarities due to race will still remain. J.

ANTHROPOMORPHISM and **ANTHROPOPATHISM** (ἄνθρωπος, "man"; *μορφή*, "form"; πάθος, "feeling"): The ascription to the Deity of human forms or modes and of human feelings or moods, respectively. Such ascription is as old as religion itself. If, as Zeller correctly observes ("Philosophie der Griechen," 2d ed., iii. 306), every conception concerning the Deity is, in its final application, dependent upon a posteriori evidence—that is, upon an inference from events and effects, or from things as they occur and exist, to their absolute ground or reason—and if any

Psychological Genesis.

more precise specification or definition of this Absolute can be derived only from the conscious contents of soul-experience and world-knowledge, then the origin of the ascription of human characteristics to the Deity finds an easy explanation; for nothing means so much, nothing is so important, as our own conscious possessions, as, for instance, our faculties of sensation, emotion, thought. Accordingly, in our search for and discovery of the Author of all things, we attribute to Him the most valuable traits we are aware of; namely, those possessed by ourselves incompletely, in mere segments of a circle, as it were, but possessed by Him in perfect measure, in the completed circle. With regard to primitive religions the well-known epigram is certainly true, that "men created gods in their own image." Anthropomorphism is, of course, met with among all the peoples of antiquity, not excluding the most advanced. Even Jahvism, before the great reformation by the Prophets, was not free from Anthropomorphism. It is unquestionably true that the Biblical expressions of an anthropomorphic nature, such as the hand of God, His arm, foot, mouth, ear, or eye, or His speaking, walking, and laughing, merely describe in naive fashion the activity of God as living and working after the manner of human beings. But such expressions would never have come into use had there not been a time when people actually had a sensuous conception of Deity. That this period of naive utterance was not limited to the pre-Jahvistic age is shown by numerous Biblical expressions, such as that He walked in the garden in the cool of the day (Gen. iii. 8); He ate with Abraham (Gen. xviii. 8); He wrote with His own hand upon the tables of stone (Ex. xxxi. 18), and the like. Nevertheless, this very anthropomorphic view, or, to be more exact, this anthropopathic attitude—this conception of the Deity as a being with affections similar to those of a human being—contained the germs for the development of the conception of YHWH as being a mere tribal deity into a universal, ethical Being.

Stages of Development.

It was just this conception of YHWH as a personality to whom neither wrath nor mercy nor love nor hate—to whom, indeed, "nothing human is alien"—that, when deepened and ennobled, led necessarily to the prophetic view of God; to the doctrine of a holy, spiritual Being, who, on the one hand, influences and actively maintains the orderly structure, organization, and system of the universe; and whose relationship to the individual and to the mass, on the other hand, is not conditioned by arbitrariness or momentary emotion, but is the outcome of eternal, divine law. This higher conception of Deity on the part of the Prophets determined also their attitude toward Anthropomorphism and Anthropopathism. Many passages of Hosea, one of the oldest Prophets who committed their prophecies to writing, will serve to illustrate this attitude. "The work of craftsmen," "the calf of Samaria," are some of the epithets which this prophet applies to the effigies on images of YHWH, held sacred by the people (Hosea, viii. 4, 6; x. 5; xiii. 2). Again, when the people, under the influence of their delusions, deemed it impossible that YHWH should withhold His pity from His people, he proclaimed in the name of YHWH: "But I am God, and not man" (Hosea, xi. 9). Thus YHWH is so exalted above everything earthly that He should not be represented by an effigy or image lest He be dragged down into the sphere of the sensuous. Besides this, His very spiritual constitution is so intrinsically different in its essence from that of man that no comparison can be made. Man may be overcome by a sympathetic heart or a censuring conscience; the character of YHWH is firmer: "for he is not a man that he should repent" (I Sam. xv. 29).

Beginning of Anti-anthropomorphism.

Isaiah was more practically successful in his efforts against the worship of sensuous representations of the Deity. He induced Hezekiah to destroy the brazen serpent, which may have dated back to the days of Moses (II Kings, xviii. 4). But before the Prophets, even David, "a man after God's own heart," as well as Laban of old, had *teraphim* (small household idols in human form, used as domestic oracles) in his house (I Sam. xix. 13, 16; Gen. xxxi. 34). The lofty and novel conception by the Prophets of the essential characteristic of YHWH as ethical—through which ethical nature, despite His sublimity and incomprehensibility, He has something in common with man—became a matter of fundamental importance in the development of the Jewish religion. With the prevalence of legalism the immediateness of the relation between God and man ceased; in other words, the "Law" made the transcendent nature of God a postulate. Hence there may be noticed, in a few books of the Old Testament, a certain aversion to bringing the Creator into direct relations with His creatures. To the people God was no longer visible in person—as described in the most vivid colors by the older sources—but He was visible in "majesty" and "glory" instead (Ex. xvi. 7, 10, xl. 34 *et seq.*; Lev. ix. 23; Num. xiv. 10, xvi. 19). It was no longer the actual personality of YHWH that dwelt in the Tabernacle, but the mental image called up by His "Name" (שם) that there abode (Deut. xii. 5, 11; xvi. 2, 6, 11; xxvi. 2); so likewise in the Temple dwells His name (II Kings, xxiii. 27; II Chron. xx. 9, xxxiii. 7). See Ginsburger, "Anthropomorphismus," pp. 262 *et seq.*

It is evident, therefore, that the theological problem regarding Anthropomorphism—that is, the endeavor to interpret the sensuous statements concerning God in the Bible so as to give them a spiritual meaning—is coeval with Jewish theology itself. For it is obvious that there is a definite method and purpose in the consistent efforts of the nomistic writers to substitute new terms for those found in the ancient authorities, or to remodel entire accounts. Such revision is to be seen, for example, in the so-called "priestly code" where all theophanies are consistently omitted, and "the word" or "the presence of God" substituted for them. This reluctance to offend the Deity by anthropomorphic utterances concerning His person grew stronger with time, so that the use of the name YHWH, which was felt to be a proper name, in contradistinction to the other appellations of the Deity in the Bible, was thereafter avoided (see Adonai).

Men of the Great Synagogue.

Aversion to Anthropomorphism exercised a great influence upon the men of the "Great Synagogue," who undertook to establish a sacred canon. For the more the belief in the letter increased, the more zealously did the leading spirits of Israel endeavor to bring the Scripture into harmony with their purer religious and ethical views. Quite unobjectionable as it had seemed to the old, naive Judaism that God should say, "I will dwell in your midst," in a later age, when the idea of the transcendence of God had become the prevalent one, and the ancient simplicity of thought had disappeared, offense was taken at such an expression, and the phrase "I shall cause you to dwell" was substituted for it. A favorite phrase of the ancient

Biblical writers is "to behold the face of God." By means of a slight vowel-change (*yirach* in place of *yireh*) this became "to appear before God."

This and similar emendations of the Scribes (see Geiger, "Urschrift," pp. 318 *et seq.*) show that the endeavor of the "Soferim" was to hold the Deity aloof from all contact with the merely human, and thus to avoid attributing human qualities to God even in interpreting the language of the Bible. Nevertheless, Anthropomorphism and even Anthropopathism, when not too gross and flagrant, did not appear to them seriously objectionable. Among the eighteen "Tiḳḳune Soferim" (emendations of the Scribes) in the Mek. (Ex. xv. 7, ed. Friedmann, 39*a*), which is the oldest source, not a single example of the changing of a real anthropomorphic expression is found. The older Targumim adduce a principle similar to the "Soferim." They always speak of the MEMRA ("word" of God)—if in the Hebrew text God is represented as speaking—but they retain in their translations such expressions as the hand, finger, or eye of God. The present text shows only traces of this tendency, but they are unmistakable, as Ginsburger has shown (*l. c.* p. 265). Ginsburger (p. 270) is accordingly right when he deduces the following rule for the employment of memra in the older Targumim: "Whenever a relation is predicated of God, through which His spiritual presence in an earthly being must be assumed, the paraphrase with memra is employed."

Septuagint.

The "fathers" of the Septuagint went much further than the "Soferim" or the "Meturgemanim" in their employment of interpretative expressions, by paraphrasing or spiritualizing (rendering less worldly or gross) the anthropomorphic or anthropopathic phrases of the Bible. The "image of God" becomes in the Septuagint "the glory of the Lord" (*δόξα κυρίου*); "the mouth of God," "the voice of the Lord" (*φωνὴ κυρίου*). Even human emotions are excluded from Deity. Repentance, wrath, and pity are suggested in such a manner that nothing human is stated of God. The customary assumption that this aversion to the predication of anything corporeal, or indeed human, of God is due to the influence of Greek philosophy is far from certain. Frankel, in his "Vorstudien," was the first to deny that any traces of Greek influence can be discovered in the Septuagint; and Freudenthal has fully demonstrated the correctness of this assertion. According to the latter's argument ("Jew. Quart. Rev." 1890, pp. 206 *et seq.*), no other traces of the alleged influence of Greek philosophy can be noticed in the Septuagint; and consequently the avoidance of anthropomorphisms and anthropopathisms in the Septuagint must be looked upon as a refinement of religious ideas which had its origin upon Jewish soil. Nor must it be forgotten that many anthropomorphic phrases are simply untranslatable into Greek; for instance, על פי יי "by God" (literally, "by the mouth of God"). Although the Septuagint, and later the Targumim, Onkelos and Yerushalmi, to the Prophets avoid anthropomorphisms and anthropopathisms, whenever the Biblical expressions seem such, no fixed rule for the avoidance of these phrases can be shown to have existed, as the same Targum sometimes renders an Anthropomorphism literally, and again, in another place, quite freely. (The elaborate rules which Maybaum sets up for Onkelos seem too complicated. Besides, Onkelos, despite its present uniform character, contains many originally extraneous elements.)

Earlier Rabbinical Literature.

In the older rabbinical literature there also occur a number of utterances which show a tendency to suppress low and sensuous conceptions of God by means of a new hermeneutics. Referring to the fanciful and figurative expressions of the Prophets, an old rabbinical saying remarks: "The Prophets show great daring in likening the Creator to the creature" (Gen. R. xxvii. 1). Rabbi Akiba sought a different interpretation of those passages in the Bible that seem to identify God and the angels. God, in His sublimity, must in His very essence differ from His holy angels. Compare Mek., Beshallaḥ, 6, where Akiba declares as heretical the certainly ancient explanation of the words "like one of us" (Gen. iii. 22) as referring to the angels. Compare his Christian contemporary Justin Martyr, who declares the interpretation Akiba rejected to be "Jewish heresy" ("Dialogus cum Tryphone," 62). Whenever actions similar to those of a human being are predicated of God, the older rabbis employed the term כביכול ("as though it were possible"); intending by this term to say that these expressions are not to be taken literally, but only as a mode of speech accommodated to the average intellect (Mek., Yithro, 4).

An entirely different tendency from the one just described in the treatment of anthropomorphisms and anthropopathisms is apparent as soon as philosophical speculation concerns itself with Jewish monotheism as a factor in determining the interpretation of the Scripture. Such a result was quite inevitable; for, as Frankel ("Vorstudien," p. 174) remarks, the ordinary intellect often regards what appears to the speculative reasoner as anthropomorphic, as a notion inseparable from the concept of God.

Aristobulus and Philo.

The manner in which Aristobulus, 150 B.C., endeavors to remove the anthropomorphic designations of God is, accordingly, no longer the same, nor is it even similar to the procedure of the Palestinians, as the existing fragments of his work show. The "resting" of God, of which the Bible speaks, means, according to Aristobulus, that He instituted a permanent self-maintaining order in the world. So God's "coming down" is not to be conceived as a bodily descent into space, but only as a vision or mental picture (see Siegfried, "Philo," p. 198). From this it is evident that Aristobulus stands with only one foot on the base of traditional Judaism; and of his successor Philo not even that much can be asserted. The God of Philo, owing to the influence of Platonism, is not only essentially different from man and the world—an idea which also coincides with the teaching of the Pharisees of this period—but He is entirely devoid of attributes. Philo opposes not only the literal understanding of the anthropomorphic and anthropopathic passages in the Bible, but also the doctrine of God as an active worker, inasmuch as activity can not be predicated of a Being devoid of attributes. This was the impelling motive of Philo's doctrine of the "Logos," which doctrine later on became a chief pillar of Christianity.

Alexandrianism had no material influence upon the development of Judaism, so that a long time passed before the experiment was repeated of reading the Bible with philosophical scrutiny. The antipathy of the Palestinian Jews to the Greeks and everything Grecian involved this consequence, that rabbinical literature shows no development whatever in the treatment of Anthropomorphism. Ḥanina, an amora of the third century, when rebuking a cantor for unduly multiplying the attributes of God in his prayers (Ber. 25*a*), added that he himself would use no attributes in praying, if it were not that some are employed in the Bible. But the example he gives to illustrate his point shows that his remark was not the outcome of philosophic reflection, but was based upon the old prophetic view of the Deity. It was, he said, like praising a Crœsus by saying "he has a few coins"; better no praise than inadequate epithets; against "Moreh," i. 59.

Saadia and the Medieval Philosophers.

The question became a matter for lively discussion in the various schools when, for a second time, there was forced upon the Jew the problem of reconciling prophecy and philosophy—by the latter term meaning Aristotelianism, the only philosophical system which prevailed among the Arabs, and therefore also with the Jews living among Moslems. It is interesting to notice how this second attempt to harmonize Judaism and Hellenism led to the same result. Judaism was in danger of being so intellectualized as to be no longer recognizable as a religion. The development of Jewish thought during the period from Saadia to Maimonides presents an exact parallel to that connecting the Septuagint and Philo; and this is most strikingly brought out by the changed attitude toward the Biblical Anthropomorphism and Anthropopathism. As regards Anthropomorphism Saadia is in full harmony with rabbinical Judaism when he maintains that the corporeality of God is contrary both to reason and Scripture—at least in so far as tradition would have it (see "Kitab al-Amanat wal' Itiqadat," ed. Landauer, p. 93, *l.* 10 *et seq.*, Leyden, 1881—ii. 2 of the Hebrew translation of the work). Following the Targum of Onkelos—which he esteems very highly—he sets up the following rules, according to which the ten anthropomorphic designations which occur in Scripture are to be explained: God's "head" indicates sublimity; "eye," providence; "face," favor or disfavor; "ear," heeding; "mouth" and "lip," command and instruction; "hand," power; "heart," insight; "bowels," compassion; and "foot," the act of conquering or subduing, conquest. But his treatment of the subject of Anthropopathism is dictated more by Greek philosophy than by Judaism, and is not remotely connected with his views on God's attributes (see ATTRIBUTES).

Baḥya and Judah ha-Levi.

Baḥya, the next Jewish philosopher after Saadia—he wrote his "Ḥobot ha-Lebabot" probably in the year 1040—mentions his great predecessor in a few words (chap. i., § 10) and accepts, in its entirety, his explanation of the Biblical anthropomorphisms. He lays more stress, however, than Saadia upon the negative character of the divine attributes, so that, had he been consistent, he would have arrived at the standpoint of Maimonides. But Baḥya did not possess a clear conception of the nature of negative attributes; for, while he taught that God is absolute unity, he also claimed that this fact involved the attributes both of being and eternity (see Kaufmann, "Die Theologie des Bachya ibn Pakuda," Vienna, 1874; and "Attributenlehre," p. 153).

Judah ha-Levi—not to mention Ibn Gabirol, whose views scarcely possess any Jewish characteristics—was far more consistent than Baḥya, and was the first Jewish philosopher to reject completely the doctrine of essential attributes, insisting on the fact that it is impossible to predicate anything of God. But his approach to Neoplatonism—the doctrine of God as "pure existence"—is after all not a real approach.

When uninfluenced by philosophic speculation Judah ha-Levi maintains a position nearer to traditional Judaism than any other religious philosopher. His pious convictions are not based upon speculative philosophy, but on historical facts, on revelation and prophecy, the representatives of which comprehended and recognized the higher world as clearly and distinctly as ordinary mortals do this mundane sphere. This philosophic mysticism determined also his attitude toward Anthropomorphism. While opposed to the conception of the corporeality of God, as contrary to Scripture, he would nevertheless consider it wrong to reject completely the sensuous concepts of Anthropomorphism—even the fantastic measurements of the physical dimensions of Deity (שיעור קומה)—as there is something in these ideas which fills the human soul with awe of God.

Maimonides and His Influence.

But this rather opportunist and indulgent attitude toward Anthropomorphism found, almost during the lifetime of Judah ha-Levi (died about 1150), a determined opponent in the person of Maimonides—the greatest of Jewish philosophers. Maimonides was the first Rabbinite Jew to set up the incorporeality of God as a dogma, and to place any person who denied this doctrine upon a level with an idolater. While his predecessors had contented themselves with rejecting Anthropomorphism as contrary to reason—treating it as a purely theoretic matter—Maimonides declared it a heresy that would deprive any one holding the doctrine of a share in the world to come ("Yad ha-Ḥazaḳah, Hilkot Teshubah," iii. 7). The first part of his religio-philosophical work (the "Moreh Nebukim") practically constitutes a treatise on Hebrew synonyms, the object of which is to explain away the anthropomorphisms in the Bible. But Maimonides was not content to restrict himself to opposing Anthropomorphism. Philosophy being to him not the handmaid, but the mistress, of theology, he pursued his thought until he arrived at the concept of God as a metaphysical being, withdrawn in cold sublimity and isolation from His creatures—with whose weal or wo He could no longer concern Himself—and void of a free will; a being, in short, to whom no attributes could be ascribed except those of a negative character. Thus Maimonides was confronted with a difficulty similar to that which Philo encountered when he propounded his doctrine of the "Logos": the question, namely, how to establish a communication between a God devoid of attributes and the material universe. In fact, his lack of success was as complete as that of Philo, at least as far as Judaism is concerned.

Despite the high esteem enjoyed by Maimonides among the great body of Jews, he was unable to achieve any success with his "intellectualization" of the notion of God. Only one of his teachings—that of the incorporeality of God—found favor in the eyes of his coreligionists, was accepted in all sincerity, and was even adopted in the ritual of the Synagogue; a proof that in this doctrine he had caught the true spirit of Judaism. That his warfare against Anthropomorphism was a matter of serious concern to the Jews is shown by the comment of Abraham ben David of Posquières—the only one who could rival Maimonides in rabbinical scholarship—on the passage in the "Yad ha-Ḥazaḳah," referred to above: "Greater and better men than he—Maimonides—have held this opinion."

It is difficult to determine whence the Jews of southern France—who bitterly opposed Maimonides—derived their antianthropomorphic views. (See Kaufmann, "Attributenlehre," p. 485. Even in northern France at an earlier date, Rashi on Mak. 12*a* remarks that the angels are not composed of flesh and blood, which, in philosophic phraseology, means the "angels are incorporeal.") The Jews of Provence were possibly influenced by the mystical literature in which the "measurements of the dimensions" of God play a great part, although this literature did not enjoy universal authority, even when, in later times, the Cabala had come to prevail among a great section of the Jews. Abraham ben David probably intended to suggest that the French Jews, with their belief in the literal meaning of Bible and Talmud, were led to anthropomorphic views by the fantastic descriptions which some of the Haggadot give of God and His actions. Compare, for instance, the remark (Sanh. 98) that the Almighty will shear off the beard of the king of Assyria, or the passage (Ket. 7*b*) where the Biblical expression צלם אלהים (image of God) is enlarged to צלם דמות תבניתו (the image of the likeness of His form); for according to Maimonides, "Moreh," i. 3, תבנית signifies "mathematical form."

Mention must also be made of Ḥasdai Crescas—the greatest Jewish philosopher after Maimonides—not only because he opposed the latter's doctrine of negative attributes, by asserting that it is possible to ascribe many attributes to Deity without injury to the idea of His unity, but because he exerted influence upon Spinoza, the greatest of all opponents of Anthropomorphism. Spinoza's views upon this subject, however, no longer belong to Jewish philosophy, but to philosophy in general. For the Karaitic views on the subject, see AARON BEN ELIJAH THE YOUNGER; the chief works specifically written by Karaites on Anthropomorphism are: Aaron b. Joseph, "Ez ha-Ḥayyim," ed. Delitzsch, and Judah Hadassi, "Eshkol ha-Kofer."

H. G. E.

ANTIBLA: A family of proselytes living at Jerusalem in the first century B.C., which had been in prosperous circumstances, but was afterward reduced to poverty. From allusions to them contained in four Talmudic passages, in which the spelling of the family name is corrupted (Yer. Peah, viii. 21*a*; Tosef., Peah, iv. 11; Sifre, Deut. 303, 110), Grätz restores the name to the Greek form, Agathobulos. It appears that, being unable to maintain their old standard of life, they proposed to emigrate. The representatives of Judaism, however, who at that time regarded hopefully the influx of heathen into the Jewish faith (Schürer, "Lehrbuch der Neutestamentlichen Zeitgeschichte," pp. 644 *et seq.*), did not like to see proselytes emigrating for lack of the means of subsistence; and the matter was submitted to the rabbis (חכמים), who awarded (פסקו) the family a certain sum. In three of the above-quoted passages this sum is said to have been six hundred talents of gold, which amount seems too exorbitant to be credible, in view of the fact that a talent weighed about sixty pounds. In another passage it is recorded that six hundred gold shekels (about $2,000) were awarded; and this would appear to be more probable. The rabbis based their decision on Deut. xxvi. 12 (R.V.): "Thou shalt give it unto the Levite, to the stranger [גר = proselyte] . . . that they may eat within thy gates"; laying stress on the words "thy gates," and interpreting this expression to mean that the Israelites must take care not to allow proselytes to emigrate when in needy circumstances. This account of the treatment received by the Antibla at the hands of the rabbis throws an interesting light on the attitude of the Synagogue toward proselytes.

M. B.

ANTICHRIST: Counterpart of the Messiah and opponent of God Himself; one of the most important personages in Christian eschatology. The name occurs for the first time in the Johannean Epistles (I John, ii. 18, 22, iv. 3; II John, 7); but the idea is met with in earlier New Testament writings, and, like the greater part of the eschatology of early Christianity, its beginnings are to be found in Jewish theology, and modern scholars even hold the opinion that its true origin is to be found in the Babylonian Chaos-myths. In II Thess. ii. 1-12—a passage probably of Pauline origin—it is stated that the day of the Lord shall not come before "the man of sin," the lawless one (ὁ ἄνομος), "the son of perdition," be revealed. This opponent will appear and seat himself in the Temple of God at Jerusalem, "showing himself that he is God"; but he, the wicked one, will then be consumed by the Messiah through the spirit of his mouth, who thus will make an end of him "whose coming is after the working of Satan with all power and signs and lying wonders." Paul declares further that "the mystery of iniquity doth already work," but that that which now restraineth will restrain until it be taken out of the way, and "that wicked [one] be revealed."

Antichrist in Pauline Writings.

This "little apocalypse," as this passage has well been called, has been variously expounded. It is, however, quite evident that Paul understood by Antichrist a personal opponent of the Messiah, this conception being compounded of ideas derived from the Old Testament and the Apocrypha (Dan. vii. 25, ix. 27, xi. 36; Isa. xiv. 13 *et seq.*; Ezek. xxviii. 2, 14; I Macc. xiv. 14). It is not, however, clear whether this description is intended to represent an opposing Messiah, or a Jewish pseudo-Messiah, or whether Paul had any definite historical personage in mind. His expression concerning the lawless one (ὁ ἄνομος), seating himself in the Temple (compare Ezek. xxviii. 14), and "showing himself that he is God," can hardly be understood of a Jewish Messiah; nor can, by any possibility, a Roman ruler, such as Caligula or Nero, be understood by it. Just as unreasonable is it to assume that by the expression "he who now restraineth" (A. V. "letteth") the appearance of Antichrist, it is intended to designate the Roman government or the emperor himself. The iniquitous one, the incarnation of evil upon earth, is not a political personage, held back by Roman power. The passage is to be explained by the aid of rabbinical eschatology, as for instance in Sanh. 98*a*, which teaches that the Messiah will not appear until the whole world is either entirely righteous (כולו זכאי) or entirely wicked (כולו חייב); a standpoint that explains not only the expression "that which restraineth"—the rabbis speak of various things which impede the redemption (מעכבין את הגאולה; Mek., Beshallaḥ, 1, ed. Weiss, p. 29; Niddah, 13*b*)—but also elucidates Paul's vacillation as to the period to be set for the "day of the Lord." In his earlier Epistles, Paul speaks as if he expected the promised time to arrive speedily, because he counted upon the rapid conquest of the world by Christianity, for him the first and essential condition of the world's perfect righteousness; but experience gradually showed him that his optimism was unfounded, and therefore he speaks of the power that prevents the dawning of the glad time.

The statement of Paul that the wicked one will be slain by the breath of the Messiah is based upon Isa. xi. 4, as interpreted in the Targum ארמלגוס רשיעא. Even the names of Antichrist in this passage are of Jewish origin; the "lawless one" (II Thess. ii. 8, R. V.) is none other than Belial—whom Paul mentions in another place as the opponent of the Messiah (II Cor. vi. 15)—a name interpreted by the rabbis as compounded of בלי without, and עול yoke, so that Belial is the one who will not accept the yoke of the Law (Sifre, Deut. 92; Tanna El. R. iii.; Midrash Sam. vi., ed. Buber, p. 64). It is thus evident that this "little apocalypse" represents not a Christian, but the Jewish view of the Anti-Messiah. The pseudepigraphic literature (see passages quoted by Bousset, pp. 86, 99, 100) informs us that in Jewish circles in the pre-Christian period the expectation was prevalent of the appearance of Belial (one of Satan's lieutenants) if not of Satan himself; and that his activity was imagined as being almost identical with that expected of the Antichrist in Thessalonians. There is a remarkable similarity between this New Testament passage and II Sibyl. 167 *et seq.*, and III Sibyl. 46 *et seq.*—the former a Sibylline of undoubted Jewish origin—the expression in ii. 188, the *τρισσὰ σήματα*, the three signs of Elijah, certainly referring to the Jewish tradition (found in Mekilta Beshallaḥ, 1, ed. Weiss, p. 60) that before the appearance of the Messiah, the prophet will reveal the whereabouts of the three holy utensils which disappeared at the time of the destruction of the Temple (compare Jellinek, "B. H." iii. 72 and Pirke Rabbenu ha-Ḳadosh, ed. Grünhut, 57).

Origin of the Idea.

As to the idea of the Antichrist, like Jewish eschatology itself, it is derived from three sources: prophetical teachings, later Midrash, and an admixture of heathen mythology. Ezekiel (xxxviii., xxxix.), speaking of a last great outpouring of the heathen powers against Israel—which outpouring is to introduce the new period foretold by the ancient prophets—names Gog, the prince of the land of Magog, as the representative of those powers. The same idea amplified is found in Zechariah (xii.-xiv.) where God is described as appearing upon Zion at the last hour with His hosts of angels to protect His own from the attacks of the heathen, and to give them victory. When, therefore, in the Maccabean period, the Jews first perceived the chasm between Judaism and heathenism, the idea of a presentation of the philosophy of the world's history was conceived and admirably carried out in Daniel. It was no more a question of the salvation of Israel in the future, but of the redemption of the whole world. The course of the world's history, as illustrated by the attitude of the heathen toward the Jews, was now viewed as a continuous triumph of powers hostile to God—a triumph which would not end until the whole world had become utterly corrupt, to be superseded by the kingdom of God and a new order of things.

The opposition between this world and the future world, between Satan and God, between heathen and Israel, naturally furnished representatives for the supreme struggle in the final hour of the world's existence. If God in His own proper person would appear at the decisive contest, His opponent could be no other than Satan; but if God were to be represented by Messiah, it must of necessity follow that Satan should be represented by one as close to him as was Messiah to God; that is to say, by Antichrist. Uncertain as is the characterization of Messiah in the new order of things, the personality of his counterpart is equally fluctuating. In the circles that expected the rule of Belial at the end of days, God was recognized as the chief personality in the final catastrophe; and Antichrist, as the worst tool of Satan, corresponds in his sphere with that conception of the Messiah current among the Pharisees in the age of Jesus, according to which Messiah was to be the one man whom God would endow with especial strength and influence, such as were vouchsafed to no other. Just as the Haggadah through its interpretations of ancient prophecies endeavored to furnish a close description of the personality of Messiah, similarly Antichrist received more and more definite forms derived from the descriptions and conceptions of the Old Testament. He was, for instance, very early identified with Gog—such a Midrash is clearly evident in the Septuagint translation of Num. xiv. 7 (compare also ‘Ab. Zarah, 3*b*; Sanh. 94*a*)—and his death expounded, as already remarked, according to Isa. xi. 4.

The conception of Antichrist no doubt also contains mythological elements, which, far from being uprooted from the national consciousness, became, through contact with Babylonia, Persia, and, at a later date, with Greece, more and more deeply ingrained in it. An eloquent proof that Antichrist meant no more than its name signifies—namely, the Anti-Messiah—is furnished by the fact that none of the Pharisaic literature has any word concerning him. The official teachings of the Pharisees in the post-Christian time endeavored, for reasons easy to understand, to negative all that was superhuman in the popular conception of Messiah (compare especially Justin, "Dialogus cum Tryphone," xlix.); so that no room was given for Antichrist to play any very eminent rôle. Thus Eliezer b. Hyrcanus—an eye-witness of the national catastrophe in the year 70—speaks only of a ruler after the style of Haman, who will usher in the pangs of the Messianic period (חבלי של משיח; Sanh. 98*b*).

The Apocrypha of Baruch (Syriac) and IV Ezra (= II Esdras), which originated in the same circle, knew nothing of an Antichrist; for what Baruch, xl. 1, 2, says of the last ruler of the heathens is simply that the latter will choose for themselves a leader for the last battle; and IV Ezra, while it contains explicit statements concerning the pangs of the Messianic period, has no reference whatever to an Antichrist. Both Bousset and Gunkel are probably wrong, therefore, when they refer to Antichrist the passage (II Esd. v. 6), "And even he shall rule, whom they that dwell upon the earth look not for"—words which, being based on Isa. xxiii. 13, may allude simply to Rome, as is apparent from Suk. 52*b* and Yer. Ta‘anit, iii. 4, where the Romans are meant by the euphemism "Chaldeans." It is true that there is no lack of references in Talmudic literature to the belief in a contest between God and the devil, or an evil angel, in the latter days (see Ahriman). To this class belongs the battle between Gabriel and the Leviathan; also the sea-monster (B. B. 74*b*), and the conquest of the prince of Edom, that is, Samael (Mak. 12*a*; compare also the triumph of Messiah over Satan, Pesiḳ. R. xxxvi.).

Nero as Antichrist.

The bitter feeling against Rome that actuated the Jews for the hundred years between 30 and 130 permitted no other conception than that it would be Rome's ruler who would marshal the heathen hosts for the final struggle and lead them to victory; and Nero—the vilest wretch that ever mounted a throne—filled the ideal of wickedness sufficiently to be considered the worthy leader of the heathen. The Jewish Sibyl, writing about the year 80, tells the story that Nero was at that time in concealment in the land of the Parthians, where he would remain for decades, returning thence to stir up a universal war (IV Sibyl. 119–150, in agreement with a Roman legend; see Zahn, "Zeitschr. für Kirchliche Wissenschaft und Leben," 1886, 337 *et seq.*, and Geffcken, "Göttinger Nachrichten, Phil.-Hist. Classe," 1899, pp. 441 *et seq.*). More of the demoniac character of Antichrist, and more, therefore, of the original conception concerning him as being either Satan or one of Satan's tools, is reflected in the reference to Nero in the fifth Sibylline (363 *et seq.*), written in 74: "Then from the ends of the earth shall return the matricidal man who has become fugitive, and who frames iniquitous plans in his mind; he will destroy the whole earth, and conquer all, and in all matters he will be wiser than all other men. . . . But the wise people shall have peace, the people that remaineth tried in sorrows in order that it may thereafter rejoice." But the complete metamorphosis of Nero into a devil—wherein he is no longer the representative of Rome, but the incarnation of the Evil One—is first to be found in a Jewish Sibyl of about 120–125 (V Sibyl. 28–34). Of Nero it is there said, "The one that received the letter for 50 [letter נ, N, as initial] will become ruler—a terrible dragon, breathing fierce war. . . . Thereafter he will return and make himself like unto God, but He [God] will convince him that he is as nothing." Here Nero is the true Antichrist, the Satan, the old Dragon (נחש הקדמוני), who measures himself against God.

This conception did not remain confined to Jewish circles, but as the Revelation of John (xiii., xvii.) shows, when rising Christianity suffered much at the hands of the Roman power, it spread among the Christians likewise. In any case, the last struggle of the heathen is conceived as a battle against God; and it appears thus in the Midrash Wayosha' (Jellinek, "B. H." i. 56), where it is declared of Antichrist: "And he shall say, 'I will first conquer their God, and after that will kill them [the Jews]'"; again the old conception of Antichrist as an opponent of God.

The Biblical narrative of the departure of the Israelites from Egypt afforded much material for the description of the latter days, inasmuch as the final redemption was conceived after the fashion of the first. Thus the Ephraimite Messiah—Messiah, the son of Joseph, as he is called—who plays a great part therein in conjunction with Armilus, originated in the legend preserved by the Haggadah of an attempted departure from Egypt made by the Ephraimites (Mek., Shirah, 9; Sanh. 92*b*; Pirke R. El. xlviii.); and inasmuch as prior to the first redemption there had been a prominent Ephraimite named Nun, who headed an attempt by the Israelites at self-emancipation and found a violent death at the hands of the Egyptians, parallelism demanded that there should be an Ephraimite Messiah, to be slain by Armilus.

The conception of Antichrist held by the Church of the early Christian age and throughout the Middle Ages is very much involved and in need of critical investigation. The passages concerning Antichrist in the New Testament were misunderstood at a very early date; and there seems to have been, moreover, a persistent oral tradition that modified the legend of Antichrist to a considerable degree. In John, v. 43, the popular Jewish conception of an Anti-Messiah has become transformed into a Jewish pseudo-Messiah, a presentation which was championed for many centuries in the Church (see Bousset, *l.c.* pp. 180 *et seq.*). It was particularly expected that he would be of the tribe of Dan (*ibid.* p. 112), which is probably connected with the Jewish conception of the Messiah, that he would be derived from that tribe on the maternal side (Gen. R. xcviii.; see also Zohar, Balak, 194*b*). On the other hand, there reigned for a certain time among Christians too some confusion of Antichrist with the legend of Nero (Bousset, *l.c.* pp. 49 *et seq*)., and there is likewise to be found an identification of Antichrist with Belial—Antichrist being often represented as the son of Satan, and even as an incarnation of Satan himself (see Belial).

The Modern Hypothesis.

The legend of the origin of Antichrist (= Belial) set forth by Gunkel and Bousset is that the Babylonian Tiamat, queen of the abyss of darkness and flood, aided by the powers of her infernal domain, rebels against the higher gods, but is defeated by the son of the gods, Marduk; and it gives rise to a human incarnation in the shape of the Antichrist with superhuman powers, the man who sets himself up as equal to God.

The idea of Antichrist has made its way beyond the confines of Judaism and Christianity and has entered into various literatures of the world—only, however, through the medium of Christianity. There are traces of it in the more ancient Edda literature; while the semi-Christian old-Bavarian poem "Muspilli" (ninth century) makes extensive use of the various Antichrist legends. The Parsee Pahlavi writings betray unmistakable evidences of the tradition, especially the apocalypse "Bahman Yast," written in Pahlavi and translated in "Sacred Books of the East," v. 191 *et seq.*, which is full of it. In Arabian literature, Antichrist is called "Al Dajjal" (the liar), or more fully, "Al Masiḥ al-Dajjal" (the false Messiah). The name shows its Christian-Syriac source; for "dajal" denotes "lying" almost exclusively in the Christian dialect of Aramaic. In the Mohammedan account, Dajjal is really the Jewish pseudo-Messiah, and is slain by Jesus after he had long maintained his imposture. Of the numerous details concerning him, it is interesting to note that he is represented as a one-eyed monster, of horrible mien, and that in some respects the picture agrees with the various descriptions of Armilus (see Abomination of Desolation; Ahriman; Armilus).

Bibliography: The literature on Antichrist is very extensive, so that only a small selection can be given here: Bornemann, *Commentar zu den Thessalonier-Briefen*, pp. 348–382, 400–537 (rich in references to literature); Bousset, *Der Antichrist*, Göttingen, 1895, translated into English by Keane, 1896; idem, *Commentar zur Johannes-Apocalypse*, pp. 415, 464–480; Friedländer, in *Rev. Ét. Juives*, xxviii. 19 *et seq.*; Geffcken, in *Preussische Jahrb.* 1900, pp. 383–399; Gunkel, *Schöpfung und Chaos*, 1895, pp. 221 *et seq.*; Holtzmann, *Lehrb. d. Neutest. Theologie*, i., ii. (see index; this work contains also valuable literary references); Haug, in *Theolog. Stud. aus Würtemberg*, v. 188 *et seq.*, 282 *et seq.*; Schneckenburger, in *Jahrb. für Deutsche Theologie*, iv. 405–467; Schürer, *Gesch.* ii. 532; Walstein, in *Zeitsch. f. Wissensch. Theolog.* xxxviii. 538 *et seq.*; Zahn, *Einleit. in das N. T.* (see index).

L. G.

ANTIGONUS (ANTONINUS): Palestinian scholar of the last tannaitic generation (second and third centuries). Only two Haggadot (Mek., Beshallaḥ, introduction; *idem* to Ex. xiv. 7) and one Halakah

(Yer. Hor. iii. 48*a*) have come down from him. In the first-mentioned passage he thus illustrates the verse (Ex. xiii. 21): "And the Lord went before them by day in a pillar of a cloud, to lead them by the way," etc., by a simile: "A king had held court till darkness set in, his sons all the while attending him. On leaving the tribunal, the king took up a torch and lighted the way for his sons; whereupon the courtiers said to him, 'We will take up the torch and carry the light before thy sons'; but the king replied, 'It is not because I have none to do it in my stead, but I wish to manifest my affection for my sons, that ye may honor them accordingly.' Thus did the Holy One, blessed be He, make known His love for the people of Israel that the world might learn to treat them with honor. But, alas! not only does the world not do so, but it decrees upon them one mode of death after the other, each one severer than the last." Mekilta in both instances gives "Antoninus" as the author, and so does Yalk., Ex. 228, 230, in which, through a transposition of words, Rabbi is introduced as telling something about Emperor Antoninus. "Yuḥasin" (ed. Filipowski, p. 115) has the same version; but Heilprin ("Seder ha-Dorot," *s.v.*) has "Antigonos"; in Yer. Hor. *l.c.*, R. Joshuah b. Levi reports in Antigonus' name.

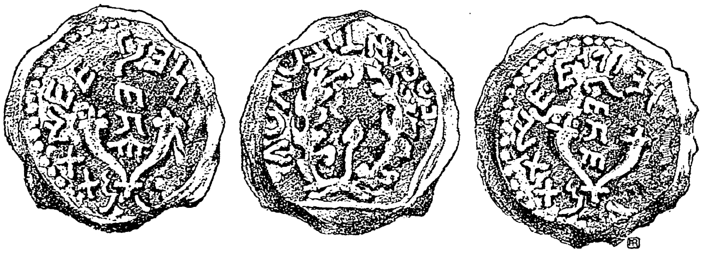
ANTIGONUS, Son of John Hyrcanus: Born about 135 B.C., died 103. He was Hyrcanus' second son, and, though young, proved an able soldier during his father's lifetime. In conjunction with his brother Aristobulus, he besieged and captured Samaria about 109 (Soṭah, 33*a*; Josephus, "Ant." xiii. 10, § 2), beating off successfully the Syrian Antiochus of Cyzicus and the Egyptian Callimander, general of Ptolemy Lathyrus, both of whom attempted to relieve the city. When Aristobulus became king about 105, though he imprisoned his other brothers, he not only left Antigonus at liberty, in appreciation of his merits, but even treated him as a sort of associate in the government. This favor shown by Aristobulus awakened the jealousy of a court cabal, at the head of which Queen Alexandra (Salome) is said to have stood, and which succeeded finally in having Antigonus slain at the king's command. The details of his death as given by Josephus are probably legendary, but historically certain is the fact that he owed his death to a court intrigue. Josephus' account runs that Aristobulus, who loved his brother warmly, was made suspicious of him by calumnious representations on the part of the queen and other enemies, who maintained that he was aiming at the crown. The king issued commands to his body-guard to cut Antigonus down should he ever appear before him in armor, and at the same time sent word to his brother to come to him immediately, but without armor. Antigonus' enemies prevailed on the messenger to inform him that the king had heard of his new armor and weapons, and desired to see him with them. Antigonus readily complied, and upon his entry to the royal castle, at the Feast of Tabernacles, about 104, was slain by the guard. An avenging Nemesis seemed, however, to exact atonement for his death, for when a servant spilt some blood from the veins of the king upon the very spot where Antigonus had been slain, the king saw the finger of God in the coincidence, and grieved himself to death over his brother's unfortunate fate. See also Judas the Essene.



Copper Coins of King Antigonus.
(After Madden, "Coins of the Jews.")

L. G.

ANTIGONUS (with the Hebrew name מתתיה) **MATTATHIAS:** The last Hasmonean king of Judea; died 37 B.C. He was the second son of Aristobulus II., and together with his father was carried prisoner to Rome by Pompey in 63 B.C. Both escaped in 57, and returned to Palestine. After Aristobulus' unsuccessful attempt to oppose the Roman forces there, the senate considered the king so little to be feared that it decreed his liberty. Antigonus, however, was not so ready to surrender ancestral rights. While his older brother Alexander was planning to secure them he remained quiet, but on Alexander's death Antigonus considered himself exclusive heir of the Hasmonean dynasty, and rightly judging his uncle Hyrcanus to be but a puppet in the hands of the Idumean Antipater, he set to work zealously to assert himself. He first attempted to attain his ends with the help and consent of the Romans; in pursuance of this plan he visited Julius Cæsar, who was in Syria in 47, and complained of the presumptuous usurpation of Antipater and Hyrcanus. He urged his own superior rights as the only remaining son of Aristobulus. But in spite of the fact that both his father and brother had suffered death in the cause of Cæsar, the latter rejected Antigonus' claims, possibly suspecting the sincerity of his professed friendliness toward Rome. Refused by the Romans, he turned to their opponents. His first attempt, in 42, to seize the government of Palestine by force with the assistance of his brother-in-law, Ptolemy Mennei (see Alexandra [Salome]), was defeated by Herod, but in the course of two years he succeeded in attaining his object. The state of affairs in Judea, as well as general conditions prevailing throughout the Roman empire, was most propitious. The excessive taxation wrung from the people to pay for the extravagances of Antony and Cleopatra had awakened so deep-seated a hatred against Rome that Antigonus had only to show himself to the people to win their allegiance away from Herod and other creatures of the Roman power. He gained the adherence also of the aristocratic class in Jerusalem, such as the "Bene Baba," and probably also assured himself of the hearty cooperation of the leaders of the Pharisees. Moreover, the Parthians invaded Syria in the year 40, and they much preferred to see an anti-Roman ruler on the throne of Palestine. Antigonus, who was genius enough to make use of such an excellent opportunity, promised them large

Defies Rome.

sums of gold, and, according to common report, five hundred female slaves besides, so that they immediately put a troop of five hundred warriors at his disposal. The appearance of these Parthians at the gates of Jerusalem, where daily riots took place between the partizans of Antigonus, who held possession of the Temple fortress, and those of Hyrcanus, or more correctly of Antipater, caused the balance to turn in favor of the former. Hyrcanus and Phasael in vain endeavored to win over the Parthians. The former was sent a captive to Babylon, after suffering the mutilation of his ears, which rendered him henceforth unfit for the office of high priest. Phasael beat out his brains against a stone wall. Herod, too weak for open resistance, fled from Jerusalem, and in the year 40 Antigonus was officially proclaimed king and high priest by the Parthians. His three years' reign, however, was one continuous struggle.

Crowned King.

His antagonist, Herod, succeeded in having himself declared king of Judea by Rome. The first year passed quietly enough; for Ventidius, Antony's legate, and his lieutenant Silo, were kept neutral by bribes and abstained from doing their duty in enforcing the rights of Herod. But on the latter's return in 39 from Rome he opened a brisk campaign against Antigonus, conquered Joppa, and occupied Masada, where his family were. He then laid siege to Jerusalem, but had to relinquish it toward winter, for Silo refused further cooperation, and dismissed his troops to their winter quarters; for which timely act Antigonus no doubt amply compensated him. In the spring of 38 Herod wrested the province of Galilee from Antigonus' possession, a victory of only temporary advantage, for when Herod shortly after went to Samosata to pay his respects to Antony, the Galileans rose against Herod's brother and representative Joseph, slew him, and drove away his army. Herod, who heard of this only upon his return to Palestine, was eager to avenge his brother. He dared not attack Antigonus' army near Jericho, for he had not yet the necessary strength, but when Antigonus foolishly divided his forces, Herod fell upon Pappus, Antigonus' general, and completely routed him, so that all Palestine as far as Jerusalem fell into his hands. The approach of winter compelled Herod to postpone until the next spring a siege of Jerusalem, whither Antigonus and the remnant of his army had fled. When the siege began it was marked by extraordinary bravery and fanaticism on the side of Antigonus' followers; full of hatred against Rome and Romanizers, they considered the struggle a religious one, in which the prophecies concerning the inviolability of the Temple and the nation would be triumphantly vindicated.

Besieged in Jerusalem.

In vain the Pharisees advised surrender to so powerful a foe, just as the Prophets of old had inveighed against the conviction of their contemporaries that God would protect His city against any besieging enemy, no matter how numerous. A stout defense, lasting three, possibly five, months, was made against the attacks of the enemy and the pangs of famine, which latter, owing to the year being one of release (see Shemittah), was more than ordinarily severe. Antigonus behaved most manfully during the siege, but after the final assault, when no hope was left, he fell entreating at the feet of the Roman general Sosius, who brutally mocked his grief by dubbing him "Antigone," after Sophocles' tearful heroine. At the suggestion of Herod, who was afraid to allow Antigonus to be taken to Rome in the triumphal train of Mark Antony, lest he should there successfully plead for his rights, this last king of the Hasmonean house was taken to Antioch, and there fell beneath the executioner's ax. It was the first time that the Romans had ever thus put a king to death. The last king of pure Jewish blood fell before the intrigues of the first king of Judea not entirely of Jewish birth.

L. G.

ANTIGONUS OF SOKO: The first scholar of whom Pharisaic tradition has preserved not only the name but also an important theological doctrine. He flourished about the first half of the third century B.C. According to the Mishnah, he was the disciple and successor of Simon the Just. His motto ran: "Be not like slaves who serve their master for their daily rations; be like those who serve their master without regard to emoluments, and let the fear of God be with you" (Ab. i. 3; see Grätz, "Gesch d. Juden," ii. 6, 239). Short as this maxim is, it contains the whole Pharisaic doctrine, which is very different from what it is usually conceived to be. Thus the first known Pharisee urges that good should be done for its own sake, and evil be avoided, without regard to consequences, whether advantageous or detrimental. The naive conception dominant in the Old Testament, that God's will must be done to obtain His favor in the shape of physical prosperity, is rejected by Antigonus, as well as the view, specifically called "Pharisaic," which makes reward in the future life the motive for human virtue. It is impossible that Antigonus could have been influenced by Hellenic views: chronology forbids the supposition. The cause of this ethical superiority was simply that the Pharisees carefully nurtured the germs of higher morality sown by the Prophets of the Old Testament and brought them to full fruition. Particularly Jewish is the second phrase of his maxim; the fear of God is the Jewish correlate to general human morality mentioned in the first half of the motto. Antigonus points out that men's actions should not be influenced by the lowly sentiment of fear of mortals, but that there is a divine judgment of which men must stand in awe. The expression "Heaven" for "God" is the oldest evidence in postexilic Judaism of the development of the idea of a transcendental Deity. It is also a curious fact that Antigonus is the first noted Jew to have a Greek name.

Later legend connects Antigonus with the origin of the Sadducee sect. See Sadducees. L. G.

ANTI-JUIF, L': A name assumed by nine different publications issued in France and Algiers and directed against the Jews. In nearly every case they were short-lived. The first "Anti-Juif," a weekly, published in Paris, describing itself as an "organ of social defense," only reached its fourth number (from Dec. 18, 1881, to Jan. 8, 1882). It was issued under the management of L. Panchioni. In the leading article, entitled "Our Aim," the editor calls the attention of his readers to the financial prosperity of France at that time—a boon which he attributes to "commercial feudalism"—for the manifest purpose of exciting the hatred of the working classes. He claims that "the Jew rules and governs." Therefore he deems it his mission to acquaint the public with the real condition of the country and to suggest how it can be improved. The second periodical in point of time was the "Anti-Juif" that appeared at Algiers in 1890, and was signed by its printer, Bouyer, as responsible editor. It was discontinued after a few numbers had been issued. After an interval of seven years, T. Macon, a printer, undertook the publication of a third "Anti-Juif," which also appeared in Algiers as the "organ of the Anti-Semitic League." The career of this biweekly began on July 14, 1897, at Mustapha, a suburb of Algiers, and lasted but a short time. No greater success attended the publication of the fourth of these anti-Semitic journals, styled the "Anti-Juif Bourguignon," which appeared March 12, 1898, at Dijon, after having dropped its original name, "Le Libre Bourguignon." It tried unsuccessfully to imitate the "Libre Parole," the anti-Semitic journal of Édouard Drumont. A fifth periodical of like purpose was the "Anti-Juif Marseillais et de la Région du Midi," which appeared on Aug. 6, 1898, at Marseilles, and was discontinued soon after. In Algeria the sixth paper devoted to anti-Semitism, "L'Anti-Juif Algérien," appeared, with an illustrated supplement, March 27, 1898. The "Anti-Juif Stephanois," the seventh, was published at Lyons, Sept. 18, 1898, but was immediately discontinued. The eighth, a weekly, describing itself as an "organ of the Anti-Semitic League," was published in Paris on Aug. 11 of the same year. Nineteen numbers appeared in 1898, and forty-one in 1899. The first numbers were signed by Chanteloube as responsible editor; the last were issued under the editorship of Jules Guérin, notorious for his escapade in the Rue Chabrol, where he defied arrest for some days in a dwelling-house (No. 51) that was ironically called "Fort Chabrol" (Aug. and Sept., 1899). With his imprisonment the publication ceased. The ninth, the "Anti-Juif du Midi," appeared June 11, 1899, at Montpellier; its publication ceased with the third number.

A small paper, more vituperative even than the preceding, and called "L'Anti-Youtre, Organe de Protestation Sociale" (Organ of Social Protest), was edited at Lille by Noël Gaulois (pseudonym of Emmanuel Gallian), and printed in Paris, in March, April, and May, 1891. Four numbers only of this sheet appeared. Parodying the well-known exclamation of Gambetta, it proclaimed as its motto: "The real enemy is the Jew!" (*Le Youtre c'est l'ennemi*). In its second number it printed some illustrations representing the so-called Damascus affair, in which a bleeding child was pictured. The editor did not even know that the Damascus affair was caused by the disappearance of an old monk. See DAMASCUS.

M. S.

ANTI-MAIMONISTS, THE. See MAIMONISTS.

ANTINOË: City in the south of Middle Egypt, on the eastern bank of the Nile: founded by the emperor Hadrian in the year 122. Jews seem to have come to the city at the same time as did the Greeks, drawn thither by the trade with the port of Myso Hormus on the Red Sea. In February, 1896, C. Schmidt discovered a Hebrew inscription of the second century in the old Christian cemetery of Antinoë. The letters of the inscription were originally covered with red paint; what remains of the inscription is

לעזר נוח נפשו
בצרור החיים

In addition to the inscription there are a candelabrum with seven branches, and a cypress-tree (see "Ægyptische Zeitschrift," xxxiv. 164).

G.

ANTINOMIANISM: A term generally used to denote the opposition of certain Christian sects to the Law; that is, to the revelation of the Old Testament. The apostles were compelled, in response to the urging of Paul and his friends, to accept the doctrine of the non-binding character of the Law for heathen Christians (Acts, xv. 8), but Paul set up in addition a theory concerning the Law which not alone posits its complete abrogation in the period after Jesus, but also diametrically opposes the fundamental principles of Jewish (and Judæo-Christian) thought concerning it. The latter taught that the Law was the only means by which man could be justified before God, as may be seen by the early utterance: "God desired to justify Israel, and therefore He gave him many laws and commandments" (Mak. Mishnah); Paul declared that "by the deeds of the law there shall no flesh be justified in his sight" (Rom. iii. 20, Gal. ii. 16). The Law, according to Paul, was calculated to multiply sin through the added opportunities for transgression which were afforded by its numerous precepts (Gal. iii. 19, Rom. v. 20). By reason of the Law, transgressions against it become positive disobedience to the divine will, and are felt as such; thus leading to the recognition of the true nature of sin (Rom. iii. 20, iv. 15, vii. 7). Being transgressions of divine commandments, transgression heaps up guilt upon guilt for man, who thus becomes subject to the rejection and the wrath of God, and to the "curse of the law" (Rom. iii. 19). Consequently this experience of the Law leads man to despair of the possibility of attaining to righteousness by his own acts, and thus the full destructive power of sin stands revealed to him. Then the cry of agony goes up from him, calling aloud for salvation from the state of death into which sin has plunged him. In this sense the Law may be said to be the negative preparation for the New Testament dispensation of grace through Jesus. From the pedagogic character of the Law, Paul further deduces its transitory purpose; for with the appearance of Jesus, with whom the era of grace begins, it ceased, and must cease, because grace and Law are irreconcilable opposites.

The Law a Source of Sin.

If it be asked how came it that Paul, the former Jew, the strict Pharisee, arrived at a conception of the Law so offensive to the Jewish standpoint, the reply must be made that he learned the art of destroying the Law by the Law, or, as the author of the Clementine writings has it, "ex lege discere quod nesciebat lex" ("Recognitiones," ii. 54), from his Pharisaic masters. It was altogether a practical motive which seems to have inspired Paul to attack the universal conception of justification through the Law, for he had been convinced, by his own strenuous endeavors, of the impossibility of complete obedience to it. Paul's conviction was prevalent in those days in many Pharisaic circles ("Monatsschrift," 1899, pp. 153, 154). His utterances with reference to the abrogation of the Law after Jesus had also some precedent, for there is no doubt that the assertions made by many rabbis concerning the abrogation of the sacrifices,* as also of the festivals,† opposed though they were to the dogmas of the later Pharisees who daily prayed for the restoration of the Temple, were simply older conceptions of the Messianic age developed by Paul, and therefore disavowed by the later rabbis. In his argument for his theory of the Law, Paul shows himself an apt pupil of Pharisee doctrine, a knowledge of which is essential to the complete understanding of Paulinism. Thus his statement in Gal. iii. 19, "it was ordained by angels," has long been under-

---

* "In the time of the Messiah the sacrifices will cease (except that of thanksgiving)" (Pesiḳ. ix. 79*a*, the oldest Midrash collection); the same sentence is repeated in many other Midrashim, as was pointed out by S. Buber, note *a. l.*

† "All festivals will in future be abolished" (Midr. Mishle, ix. 2). This same passage is repeated in Yer. Meg. i. 5, but there it is intentionally modified.

Paulinism and Pharisaism.

stood to be of rabbinical origin. Proof for this is not indeed to be found in the Septuagint (Deut. xxxiii. 2), or in Josephus ("Ant." xv. 5, § 3); for both passages describe the presence of angels on Mount Sinai during the revelation as contributing to the glory thereof, whereas Paul seeks to demonstrate the inferiority of the Torah in that it is the work of angels, and not of God. The following Talmudic passage, however, affords an interesting parallel to these words of Paul: "An unbeliever said to R. Idit, 'Why is it said in Ex. xxiv. 1, "And he said unto Moses, Come up unto the Lord"? It should say, "Come up unto me." The rabbi answered: 'God in this place is the Meṭaṭron, whose name is as the name of his Lord.' "[*] The "Meṭaṭron" is probably a Babylonian[†] interpolation, for the older sources mention some archangel, such as Michael, prince of Israel, as the actual giver of the Law, thus affording some foundation for Paul's disparaging reflection upon the Torah's origin. Similarly, his reference in Gal. iii. 11 to Hab. ii. 4, "The just shall live by his faith," from which he seeks to prove the superiority of faith over the Law, is not original with him. "Six hundred and thirteen commandments," says the Talmud in Makkot, 23*b*, 24*a*, "were given to Moses; . . . then came Habakkuk and reduced them to one, as it is said, 'The just shall live by his faith.'" The difference between the Talmud and Paul here is, of course, quite a fundamental one; the Talmud meaning only that the chief content of the Law is faith, without abolishing thereby a single precept. It is very instructive, however, to note how Paul adapts Pharisaic utterances to his own purposes.

Further Development of the Doctrine.

Pauline Antinomianism became the property of the Church only in a much restricted sense; namely, in its practical aspect, the non-binding nature of the Law. The reason for this is easily discerned. The Church had a very clear way out between Jewish nomianism and Paul's violent Antinomianism, by simply regarding the Jewish law as an imperfect, preparatory grade of revelation, which was to be fulfilled and completed in the higher Christian morality. Equally evident is the reason why Paul could not select this way. "He was too much of a Pharisee to distinguish critically between what was temporary and what was permanent, between the form and the contents of the Law; the Law was to him an inseparable whole of divine origin, which was either the sole and entire means to salvation or else the means, not to salvation, but to damnation (Pfleiderer, "Urchristenthum," 207). Paul was indeed too much of a Jew to draw the fullest consequences of his antinomistic doctrine, so that only through the artificial separation between Law and the promise to the forefathers, especially to Abraham, could he maintain a historical connection between Judaism and Christianity. The Gnostics developed Antinomianism more consistently. Regardless of their differences of opinion in other respects, they are all strictly antinomistic, and the opposition with them is no longer between Law and Gospel, but between the God of the Old Testament and that of the New Testament. They do not, like Paul, approach the topic historically, but from the side of their doctrine of dualism which originated in Platonism, or, properly speaking, in Parseeism. Hence the Gnostic view of the difference between the Supreme God and the World-Creator leads to the contrast of Redemption and Creation, as finding exposition in the New and Old Testaments respectively.

Gnostic Elaborations.

Paul's Antinomianism seems to have exercised most influence upon the Gnostic Marcion (who taught in Rome about 150), whose dualism, unlike that of other Gnostics, is not the cause, but the result, of his pronounced Antinomianism (Harnack, "Dogmengeschichte," iii. 256). Marcion proceeds from the strong Pauline antitheses: Law and Gospel, wrath and grace, works and faith, flesh and spirit, sin and righteousness, death and life; and as these opposites seem irreconcilable, he arrives at the dualistic doctrine of the just and angry God of the Old Testament, and of the God of the Gospels who is only love and mercy. Besides Marcion, his contemporary Tatian (came to Rome about 172) must be mentioned (compare Hilgenfeld, "Ketzergeschichte," p. 384). His dualism of the demiurge of the Old Testament and of the Supreme God of the New Testament is likewise an offshoot of Pauline Antinomianism. He differs from Marcion only in that he does not conceive the relation between the demiurge and God as a hostile one (Kurtz, "Lehrbuch der Kirchengeschichte," i. 79).

The influence exerted by Antinomianism on the conduct of life proved to be of a twofold nature: while Marcion and Tatian were led by it to extreme asceticism, with the Gnostics it resulted in libertine practises which contributed not a little to their ultimate downfall. Especially notorious in this regard were the Nikolaitans, the Simonians, the Carpocratians, and the Prodicians, to which must be added the Pseudo-Basilidians. L. G.

Joel ("Blicke in die Religionsgeschichte," i. 28, Breslau, 1880) says: "We claim that the antinomistic (and antinational) movement in Christianity originated among the Hellenistic Jews already in the days of Philo, and that its representatives were thus uninfluenced by Christianity." The interesting passage in Philo ("De Migratione Abrahami," xvi. 450), showing plainly that the allegorical system of interpretation had long before led to Antinomianism, reads as follows: "For there are those who, while taking the letter of the laws as a symbol of spiritual things, lay all the stress upon the latter, but neglect the former. I am inclined to blame them for their levity, inasmuch as they ought to pay regard to both the accurate investigation of the things hidden and the faithful observance of those laws which are manifestly stated. These men, however, conduct themselves as if they lived alone in a desert, or as if they were souls without connection with the body, as if they had no knowledge of the existence of a city, village, or house, or of any intercourse of men; they disregard everything that is pleasing to the majority, aiming only at the plain, naked truth by itself. Yet Holy Scripture warns such men not to despise a good reputation, nor to disregard any of the customs which holy men, of greater wisdom than any of our time, have established. For we are far from thinking that because the Sabbath is inwardly a lesson to teach us the power of the Uncreated and the inactivity of the things created, we should therefore have the laws of the Sabbath abrogated and so light a fire, till the land, carry burdens, or bring suits before the court and give judgment, or demand the restoration of deposits, or exact the payment of debts, or do other things permitted only on other days not sacred. Nor should we, because the festivals are the symbolic expression of spiritual joy and of the thanksgiving we owe to God, abolish the annual festival convocations. Nor does it follow because the rite of circumcision is an emblem of the excision of pleasures and passions, and of the refutation of that impious opinion according to which the mind considers itself able to produce by its own power, that we are to annul the law which has been given regarding circumcision. . . . We take heed of the laws given in plain words in order to more clearly understand those things of which the laws are the symbols, and thus we shall escape blame and accusation from men in general." M. Friedlaender goes further still and considers the *Minim* to have been Jewish Gnostics of antinomistic views. See his "Der Vorchristlicher Jüdischer Gnosticismus," pp. 67–123. His opinion is not shared by Bacher ("R. E. J." 1899, pp. 38 *et seq.*). It would seem, however, that the life and teaching of Elisha ben Abuyah place him in the same category with the Hellenistic antinomians to whom Paul and Apollos belonged.

---

[*] Sanh. 38*b*. The correct explanation of this passage is that, according to R. Idit, YHWH does not always mean God in person, but sometimes an angel. This is also maintained by the Jew in Justin Martyr, "Dialogus," lvi., and Gen. R. li. 2.

[†] Metatron is never found in any rabbinical work of Palestinian origin; Targ. Yer. Gen. v. 24 is a later gloss. R. Idit, who is usually called R. Idi, lived in Babylonia (see Bacher, "Ag. Pal. Amor." pp. 707 *et seq.*).

K.

ANTIOCH: Ancient capital of Syria, situated in the northern part of that country, fifty-seven miles west of Aleppo, on the left bank of the river Orontes, about fifteen miles above its mouth. Antioch was founded in 300 B.C. by Seleucus Nicator (Josephus, "Ap." ii. 4), who named it after his father, or, according to others, after his son (see Gen. R. § 23: "Antioch is called after Antiochus"). According to "Midr. Tehillim" (ix. 8), and "Seder 'Olam Zuṭṭa," Antiochus was the founder, but this is incorrect (Rapoport, "'Erek Millin," p. 148). From "Megillat Antiochus" it is evident that the Jews considered Antiochus Epiphanes the founder ("Rev. Ét. Juives," xxx. 218). Antioch, as the chief city of Syria, was the seat of the Roman governor, whose jurisdiction extended over Palestine also. A large number of Jews resided in Antioch from its foundation (Josephus, "B. J." vii. 3, § 3), and received from Seleucus Nicator all the rights of citizenship (Josephus, "Ant." xii. 3, § 1). Their privileges were inscribed upon tablets of brass and carefully guarded. Their communal head bore the title of archon; and the Syrian kings succeeding Antiochus Epiphanes gave many votive offerings to the Synagogue. When the heathen inhabitants of Antioch besieged Demetrius Nicator in the royal palace, they were put to flight by the Maccabean Jonathan (*ib.* xiii. 5, § 3). To the credit of the Antiochians be it said, that they lamented, no less sincerely than the Jews, the death of the upright high priest Onias, who was murdered by command of Menelaus, in Daphne, a beautiful suburb of Antioch (II Macc. iv. 33; somewhat differently, "Ant." xii. 5, § 1). Mark Antony commanded the Antiochians to return to the Jews everything of which they had deprived them ("Ant." xiv. 12, § 6).

Early Settlement of Jews.

When war broke out in 66, and Greeks and Jews were everywhere engaged in bloody strife, the Antiochians did no harm to their Jewish fellow-citizens ("B. J." ii. 18, § 5). Perhaps they considered themselves under obligations to the Jews, because Herod the Great had adorned their city with a street twenty stadia in length and paved with marble ("B. J." i. 21, § 11). After the fall of Jerusalem and the subjugation of the Jews, however, bitter hatred arose between the Antiochians and the Jews. The chief of the Jewish community, a certain Antiochus, became the accuser of his own brethren, and the legate Cæsennius Petus was hardly able to protect them against the wrath of the people ("B. J." vii. 3, § 3). The victorious Titus was received by the Antiochians with enthusiasm, but they could not induce him to expel the Jews from their city, nor even to destroy the brazen tablets upon which the franchises of the Jews were inscribed.

Vespasian maintained a powerful garrison in Antioch, and the city served henceforth as the stronghold over Judea ("claustrum quoddam Judææ," the expression of Hegesippus, iii. 5, 23, who is on this point independent of Josephus). The Jews in Antioch, as everywhere else in the Diaspora, made many converts, so that Christianity gained foothold there quickly. A Christian congregation, composed of Jews and Gentiles, was early organized (Acts, xi. 19), and the name "Christian" first came into use in this city (Acts, xi. 26). There was also a synagogue in Antiochia Pisidæ (Acts, xiii. 14).

Antioch now became a chief center of Christianity; but it also long retained its importance for the Jews. The Biblical "Hamath" is considered by the Jerusalem Targum (Gen. x. 18, Num. xiii. 21) to be Antioch. In the Babylonian Talmud (Sanh. 96*b*) the Biblical Riblah is explained as Antioch, or, rather, Daphne near Antioch. The latter is also mentioned in other connections in the Midrash, the Targum, and the Talmud, both in the Haggadah and the Halakah. In the Halakah (Giṭ. 44*b*) the Antiochians are quoted as a type of non-Palestinians. Several teachers of the Law lived in Antioch or had occasion to be there; among others was Isaac Nappaḥa (Ket. 88*a*). Here R. Tanḥuma had a discussion on religion, probably with Christians (Gen. R. xix. 4). Here, too, R. Aḥa, "the prince of the citadel" (see Aḥa Sar ha-Birah), and R. Tanḥuma effected the ransom of Jewish captives taken by the Romans (Yeb. 45*a*; see the correct readings in Rashi) in the campaign of Gallus in 351. Judaism still attracted Christians to its rites in Antioch. In consequence, the first synod in Antioch (341) declared in its first canon that Easter should not be celebrated at the same time as the Jewish Passover (Mansi, "Synopsis," i. 51). The attachment of the Christian to Jewish customs may be particularly inferred from six sermons, delivered against the Jews in Antioch (about 366–387) by John Chrysostom, later patriarch of Constantinople. On Sabbaths and holidays, Christians, especially women, visited the synagogue in preference to the church. They also preferred to bring their disputes to Jewish judges and took their oaths in the synagogue.

In Rabbinic Literature.

The Jews felt so secure in their position that, in Inmestar, a small town situated between Chalcis and Antioch, they scoffed at Jesus and the Christians, but were severely punished (Socrates. "Historia Ecclesiastica," vii. 16; compare "Codex Theodosianus," xvi. 8, 18). The Antiochians revenged the wrong of Inmestar by depriving the Jews of their synagogue (423). The emperor Theodosius II. restored the synagogue to them; but on the protestations of the fanatical monk Simeon Stylites, he ceased to defend the cause of the Jews (Evagrius, "Hist. Eccl." i. 13). During the reign of the emperor Zeno, in brawls between the factions of the blue and the green, many Jews were murdered by the greens (Malalas, "Chron. Pasch." Bonn, p. 389). When Persia threatened the Eastern Empire, the emperor Phocas vainly endeavored to force the Jews to be baptized, and those of Antioch were driven to rebellion, in the course of which many Christians were killed and the patriarch Anastasius was condemned to a shameful death (610).

The newly appointed governor, Bonosus, suppressed the rebellion only by dint of great efforts. He slew many Jews and banished the rest from the city (Malalas, "Theophanes" and "Chronicon Paschale" for the year 610). Antioch suffered much from earthquakes, and from incursions of the Persians, the Arabs, and the Crusaders. When Benjamin of Tudela visited it in the twelfth century, it contained only ten Jewish families, who supported themselves by the manufacture of glass. There are said to have been twenty-five families in 1839, all following the Sephardic ritual ("Isr. Annalen," i. 218). The British consul here in 1888 was a Jew (Pal. Explor. Fund, Statement, 1888, p. 67). In 1894 it contained between 300 and 400 Jews (Baedeker, "Palestine and Syria," 2d ed., p. 415). The modern name of the city is Antakieh.

S. KR.

ANTIOCHUS II. (surnamed by the flattery of the Greeks "Theos" [God]): King of Syria (261–246 B.C.); date of birth unknown, but set by some chronologists at 286 B.C.; died 246. He is the first of the kings of this name referred to in the Bible. For many years he waged war against Ptolemy II., Philadelphus, king of Egypt, and on the conclusion of peace married his daughter Berenice, having for that purpose divorced his wife, Laodice (248). Two years later he took Laodice back again. The reinstated queen poisoned him and Berenice, and had their son executed. These events are referred to clearly enough, though in an indirect manner, in Dan. xi. 6. Antiochus II. was probably well inclined toward the Jewish people, but the statement made by modern scholars, that he granted full citizenship to Jews residing in Hellenic cities, is founded upon a misunderstanding of a passage in Josephus ("Ant." xii. 3, § 2).

L. G.

ANTIOCHUS III. THE GREAT: King of Syria; born about 242 B.C.; reigned from 223; died 187. Eleven verses of Daniel (xi. 10–21) are supposed by critics to refer to the wars and fate of this monarch, who was the first Greek ruler to exercise considerable influence on both the internal and external affairs of Palestine. He was accordingly the first Seleucid to occupy the attention of Jewish historians, both Palestinian and Alexandrian; and the first book of the Maccabees (vii. 6), as well as Josephus, who draws upon older Jewish-Hellenic sources, devotes considerable attention to this monarch. It was through him that Judea's long and peaceful quietude amid constant warfare all around, from the days of the Persians down to Antiochus, was interrupted. About 218 B.C. the Jews were made to feel what it was to be the bone of contention between two powerful neighbors. Antiochus considered Palestine as a portion of his Seleucid dominion, invaded the land, and seized a large number of its fortified places. A great number of the Jews were of the opinion that Seleucid rule was to be preferred to the Egyptian, since the yoke of Egypt had been severely felt in recent years in the shape of the pitiless taxation of the TOBIADS. The Tobiad family naturally favored Egypt, and through their influence Jerusalem did not fall into the power of Antiochus. But when Antiochus vanquished the Egyptian general Scopus at Paneas in northern Palestine (198), the gates of Jerusalem were opened to the conqueror by its citizens, who likewise rendered valuable assistance in the subsequent siege of the citadel while it remained in Egyptian hands. In the interval between Antiochus' entry into Palestine (218) and the formal incorporation of the country with the Seleucid empire (198), Judea was, as Josephus says, like a storm-tossed ship on the ocean.

Decrees of Antiochus.

In addition to the turmoil of war, there arose in the Jewish nation pro-Seleucid and pro-Ptolemaic parties; and the schism exercised great influence upon the Judaism of the time. It was in Antioch that the Jews first made the acquaintance of Hellenism and of the more corrupt sides of Greek culture; and it was from Antioch that Palestine henceforth was ruled, although the defeat of Antiochus by the Romans at Magnesia (190) materially crippled his power. The source of information concerning the attitude of this Seleucid toward the Jews is Josephus, but unfortunately his accustomed desire to represent all great rulers as friendly to the Jews has led him to incorporate in his history much that is legendary. He mentions three decrees issued by Antiochus concerning the Jews. In the first, addressed to an unknown Ptolemy, the king lauds the Jews, and in recognition of their merits he grants them freedom of religious worship and practise, immunity from taxation for all elders, priests, Temple-scribes, and singers, and for all who settled in Jerusalem before a certain time. The attitude of Antiochus was especially favorable to the Temple. Such things as wine, oil, incense, wheat, wood, salt, etc., that were needed for sacrificial use, were to be supplied at the king's expense. The decree closes with the king's command to his general to set free all Jewish prisoners. Objections raised to individual provisions of this decree are not sufficient to prove it spurious; the assurance of free religious practise suggests an anachronism, for no restrictions in this regard were imposed before Antiochus Epiphanes; and Wellhausen ("Israelitische u. Jüdische Geschichte," p. 238) asks how the Syrians could have Jewish prisoners at this period (although in point of fact Jews fighting in behalf of the Egyptians may have been meant). But the whole tone of the decree, certainly in its present form, stamps it as a Jewish-Hellenic fabrication, drawn up on the model of Persian and Roman public proclamations. Equally difficult is it to account for the origin of the second decree, promulgated throughout the entire empire, according to Josephus as a *ἱερόν πρόγραμμα* (sacred proclamation). It debars heathens from entering the Sanctuary at Jerusalem, forbids the introduction of prohibited meat into the city, as well as the keeping of unclean animals there, under a penalty of three thousand silver drachmæ to be paid to the priests. No prohibition of the use of horses, asses, etc., in the streets of Jerusalem ever existed, and it is hard to imagine any reason for the fabrication of such a prohibition. Büchler's suggestion, in his "Tobiaden und Oniaden," that these ordinances refer to the Samaritan sanctuary does not remove the difficulty. The Mishnah, B. K. vii. 7 (see also Ab. R. N., ed. Schechter, xxxv. 106), forbade the maintenance of poultry and sheep in the city; and probably Josephus' decree may be connected with this prohibition, which was considered an ancient ordinance. Even more unintelligible is the third of these decrees, touching "two thousand Jewish families" brought by Antiochus from Mesopotamia and Babylonia to Phrygia and Lydia for the pacification of those districts. The settlement of Jews there by Antiochus may well be historical, but that passage of the edict is surely fictitious in which he says: "I am convinced that they, the Jews, will be well-disposed guardians of our interests, because of their piety toward God, and I know that they have received an example of fidelity and willing obedience from their ancestors." Antiochus was hardly in a position to know much about Jewish piety, nor was their loyalty to the Seleucid house of very ancient date.

L. G.

ANTIOCHUS IV., EPIPHANES ("the Illustrious"): King of Syria; reigned from 175 B.C.; died 164. He was a son of Antiochus the Great, and, after the murder of his brother Seleucus, took possession of the Syrian throne which rightly belonged to his nephew Demetrius. This Antiochus is styled in rabbinical sources הרשע, "the wicked." Abundant information is extant concerning the character of this monarch, who exercised great influence upon Jewish history and the development of the Jewish religion. Since Jewish and heathen sources agree in their characterization of him, their portrayal is evidently correct. Antiochus combined in himself the worst faults of the Greeks and the Romans, and but very few of their good qualities.

The Tobiads and Oniads.

He was vainglorious and fond of display to the verge of eccentricity, liberal to extravagance; his sojourn in Rome had taught him how to captivate the common people with an appearance of geniality, but in his heart he had all a cruel tyrant's contempt for his fellow men. The attempt of modern phil-Hellenes to explain Antiochus' attitude toward the Jews as an endeavor "to reform a stiff-necked people" receives no confirmation from the fact that a Tacitus first formulated it. Antiochus had no wish to Hellenize his conquered subjects, but to denationalize them entirely; his Aramean subjects were far from becoming Hellenes simply because they had surrendered their name and some of their Semitic gods. His attempt to level all differences among the nations he ruled arose not from a conviction of the superiority of Greek culture, the true essence of which he can scarcely be said to have appreciated, but was simply a product of his eccentricity. The Jews themselves afforded Antiochus the first opportunity to interfere in their domestic affairs. The struggle of the Tobiads against the high priest Onias III., originally a personal matter, gradually assumed a religio-political phase. The conservatives siding with the legitimate high priest approached the king of Egypt; for they relied more on that monarch than on Antiochus, sometimes nicknamed Ἐπιμανής (madman), while the Tobiads well understood that Antiochus' favor was to be purchased with gold. The Tobiads caused the deposition of Onias (173), and the appointment of their own partizan, Jason. In order to ingratiate himself with the king, this new high priest established an arena for public games close by the Temple. But the king cared very much more for gold than for the Hellenizing of Palestine, and a certain Menelaus made use of the fact so shrewdly that he received the high-priesthood in place of Jason, in the year 171. But when false tidings came to Jerusalem that Antiochus had died on a campaign in Egypt, Menelaus could not maintain himself in the city, and together with the Tobiads fled to Egypt. On his return homeward, Antiochus came to Jerusalem to reinstate Menelaus, and then the true character of the Hellenism that Antiochus desired was revealed to the Jews. He entered the Temple precincts, not out of curiosity, but to plunder the treasury, and carried away valuable utensils, such as the golden candlestick upon the altar and the showbread table, likewise of gold. This spoliation of the Sanctuary frustrated all the attempts of Jason and the other Tobiads to Hellenize the people, for even the most well-disposed of Hellenizers among them felt outraged at this desecration. They must have given vent to their sentiment very freely; for only thus can the policy of extermination waged by Antiochus against the Jews and Judaism, two years later, 168, be explained. As long as he was occupied with preparations for his expedition against Egypt, Antiochus had no time for Palestine; but when the Romans compelled him to forego his plans of conquest, his rage at the unexpected impediment was wreaked upon the innocent Jews. An officer, Apollonius, was sent through the country with an armed troop, commissioned to slay and destroy. He first entered Jerusalem amicably; then suddenly turning upon the defenseless city, he murdered, plundered, and burnt through its length and breadth. The men were butchered, women and children sold into slavery, and in order to give permanence to the work of desolation, the walls and numerous houses were torn down. The old City of David was fortified anew by the Syrians, and made into a very strong fortress completely dominating the city. Having thus made Jerusalem a Greek colony, the king's attention was next turned to the destruction of the national religion. A royal decree proclaimed the abolition of the Jewish mode of worship; Sabbaths and festivals were not to be observed; circumcision was not to be performed; the sacred books were to be surrendered and the Jews were compelled to offer sacrifices to the idols that had been erected. The officers charged with carrying out these commands did so with great rigor; a veritable inquisition was established with monthly sessions for investigation. The possession of a sacred book or the performance of the rite of circumcision was punished with death. On Kislew (Nov.–Dec.) 25, 168, the "abomination of desolation" (שקוץ משומם, Dan. xi. 31, xii. 11) was set up on the altar of burnt offering in the Temple, and the Jews required to make obeisance to it. This was probably the Olympian Zeus, or Baal Shamem. See ABOMINATION OF DESOLATION.

Antiochus, however, had misunderstood the true character of Judaism, if he thought to exterminate it by force. His tyranny aroused both the religious and the political consciousness of the Jews, which resulted in the revolution led by the MACCABEES. After the passive resistance of the Ḥasidim (pious ones), who, much to the surprise of the Hellenes, suffered martyrdom by hundreds, the Hasmonean Mattathias organized open resistance in 167–166, which, through the heroic achievements of his son and successor Judas the Maccabee in defeating two large and well-equipped armies of Antiochus, grew to formidable proportions. Antiochus realized that a serious attempt must be made to put down the rising, but was himself too busily occupied against the Parthians to take personal charge. Lysias, whom he had left as regent in Syria, received instructions to send a large army against the Jews and exterminate them utterly. But the generals Ptolemæus, Nicanor, and Gorgias, whom Lysias despatched with large armies against Judah, were defeated one after the other (166–165), and compelled to take refuge upon Philistine soil. Lysias himself (165) was forced to flee to Antioch, having been completely routed by the victorious Jews. But although he began to gather new forces, nothing was accomplished in the lifetime of Antiochus, who died shortly thereafter in Tabæ in Persia, 164.

ANTIOCHUS V., EUPATOR ("Well-born"): King of Syria, son of Antiochus IV.; born 173 B.C.; died 162. He succeeded his father at the age of twelve (according to some at the age of nine), and reigned for two years (164–162 B.C.). Lysias made himself guardian of the young king and regent of the empire. He thought the time had come to retrieve the losses suffered under the preceding monarch, and with an enormous army, accompanied by the young king, he set out against Judea. Against such an overwhelming array of force, the heroism of the comparatively small band of Judas Maccabeus could avail nothing. On the field of Beth-Zechariah, between Jerusalem and Bethzur, the Jewish army was defeated, Bethzur was captured, and the dwellers on the Temple-mount (Zion) in Jerusalem were brought near to capitulation by lack of food, due to the fact that it was a Sabbatical year. But in their extremity the Jews were unexpectedly helped by the political disturbances in the Seleucid empire. In order to oppose Philip, who had been designated by the preceding king as the guardian of his son and regent of the kingdom, and who was then threatening Antioch, Lysias proclaimed full religious freedom for the Jews. Antiochus V., or rather his guardian, may thus be said to have subjugated the Jews, but the latter at least gained all that they had successfully fought for against Antiochus IV.; namely, the free exercise of their religion. This pacification of Palestine was not long enjoyed by Antiochus V., for he and his guardian were murdered in 162 by Demetrius I.

ANTIOCHUS VI.: King of Syria, son of ALEXANDER BALAS; died 142 B.C. Like his predecessor, Antiochus VI. was king only in name. He was proclaimed king while still a minor, 146 B.C., by Diodotus, called Tryphon, former general of Alexander Balas. The Jews at first sided with Demetrius II., Nicator, his rival for the throne; but in view of the vacillation and the treacherous character of Demetrius, they held it advisable to give their allegiance to Antiochus VI. Like his father, Antiochus VI. was well disposed toward the Jews. He not only confirmed the Hasmonean Jonathan in possession of all that Demetrius had granted him, but he also appointed his brother Simon as military commander over the district reaching to the Egyptian frontier. Antiochus' confidence in these brothers was not in vain; Jonathan defeated Demetrius' military commander in the plain of Ḥazor, while Simon captured the fortress of Bethzur, which had declared for Demetrius. These and similar enterprises of the Hasmoneans were undertaken as much in the interest of the Jews themselves as of the king, for Demetrius was foe to both. The growth of Jewish military power, however, seemed to alarm Tryphon, Antiochus' guardian, for he justly apprehended the ultimate breaking away of the Jewish people from Seleucid rule. It appears, moreover, that Tryphon was just then (144–143) meditating the removal of his ward and the seizure of his throne; he feared, however, that Jonathan would oppose him in this plot on both moral and political grounds. He therefore gained possession of Jonathan's person by treachery, and murdered him (end of 143). One year afterward, Tryphon threw off the mask, murdered Antiochus VI., and seated himself upon the throne.

ANTIOCHUS VII., SIDETES (from Side in Pamphylia): King of Syria, son of Demetrius I; born 164; died 129 B.C. In 138 B.C. he declared against the usurper Tryphon, who had taken the place of his brother Demetrius II., then a prisoner with the Parthians. One of the first acts of Antiochus Sidetes was to write to the Hasmonean Simon, confirming him in all the privileges conferred by his predecessors. The object of this friendliness was of course to secure Simon's assistance, or at least neutrality, in the campaign against Tryphon, and just as soon as he gained some slight successes over the latter, he radically altered his demeanor toward the Jews. He not only revoked all previous promises, but demanded of Simon possession of the conquered cities of Jaffa and Gazara and of the citadel of Jerusalem, or, in default, a payment of 1,000 talents. Simon refused either alternative, whereupon Antiochus sent his general Cendebæus against him, but he was defeated by Simon's sons, Judah and John (137). Home affairs took up so much time in the succeeding years that Antiochus left the Jews in peace, but as soon as he found leisure he invaded Judea, devastated the country, and besieged in Jerusalem John Hyrcanus, who had meanwhile succeeded his father in the government. The siege lasted several years. The final terms of peace granted by Antiochus were the surrender of all weapons, the payment of a tax by all cities outside of Judea, 500 talents, and hostages for security. Hard as these conditions seemed, they were in reality moderate, for Judea lay completely in Antiochus' hands. The supposition advanced by modern scholars that Rome interfered on behalf of the Jews, though not impossible, is hardly probable; nor is it likely that the decree of the Senate in Josephus, "Ant." xiii. 9, § 2, refers to Antiochus Sidetes. As a result of Hyrcanus' vassalage to Antiochus, he was compelled to take part in the latter's expedition against the Parthians, 129; but the death of the king next year put an end to this state of subjection.

ANTIOCHUS VIII., GRYPHUS ("Handle"—from the shape of his nose): King of Syria from 125 to 113 and from 111 to 96 B.C. Born in the year 141; died 96 B.C. For the first three years of his reign he was actively opposed by Alexander Zabinas, his rival for the throne. Of necessity, therefore, he lived on terms of amity with the Jews, who in a measure possessed the balance of power. After the defeat of Alexander Zabinas, he enjoyed eight years of undisturbed possession of the government and continued in his attitude of friendship toward the Jewish people, for he did not yet feel himself sufficiently strong to insist upon the terms of the treaty made by Antiochus Sidetes; nor was he any better able to do so in the years 113–96; for although he managed to wrest a part of Syria from his opponent Antiochus IX., the portion of the country which bordered on Palestine was not included.

L. G.

ANTIOCHUS IX., CYZICENUS (from Cyzicus): King of Syria; died 95 B.C. He was the half-brother of Antiochus VIII., the preceding king. He rose against him in 113, and for two years was sole ruler of Syria. He was then, however, compelled to be satisfied with the district of Cœle-syria, since Antiochus VIII. obtained possession of all the rest. According to the description given by Diodorus, Antiochus IX. was like the fourth Antiochus in character and certainly resembled him in hostility to the Jews. Circumstances, it is true, were different; the relative strength of Syria and Judea had in the meantime undergone changes, very much to the advantage of the latter. When in 110–107 B.C. he attempted to lend assistance to the Samaritans, then hard pressed by the Jews, he was easily beaten off. A second attempt to subjugate Judea with the help of Egyptian soldiers failed. He was compelled to retreat after suffering great losses, and the generals whom he left in command fared no better. Thereupon Antiochus desisted from further hostilities.

L. G.

ANTIOCHUS XII., DIONYSUS: King of Syria. He was the youngest son of Grypos, and the last of the Seleucids to come in contact with Jews. In a campaign against Aretas, king of the Arabs, Antiochus intended to march through Judea, but Alexander Jannæus would not permit it; nevertheless Antiochus persisted in his purpose, and took no notice of the obstacles Alexander set in his way. The episode had no further results, for Antiochus died in the campaign.

ANTIOCHUS, SCROLL OF (Megillat Antiochus): Name of a pseudepigraph, written in Hebrew, describing the revolt of the Maccabees, and depicting its glorious course. Saadia (892–942) was the first to make mention of this little book. He referred to it as "Ketab Bene Ḥashmonai" (translating doubtless the Hebrew "Sefer Bene Ḥashmonai"), and cited a verse from it (Harkavy, "Zikkaron la-Rishonim," v. 150, 180), which leaves no doubt concerning the identity of the Megillah with this "Book of the Hasmoneans." But the much-discussed "Scroll of the House of the Hasmoneans," which, it is alleged, the "Halakot Gedolot" quotes (middle of the eighth century), is purely imaginary; for not only does the manuscript read in this passage, "Megillat Ta'anit" ("Halakot Gedolot," ed. Hildesheimer, p. 615), but, even if the expression, "Megillat bet Ḥashmonai," of the printed text be adopted, the passage would then bear the very opposite meaning to the one that has been deduced from it since the time of Rapoport. The passage should be translated: "The oldest of the pupils of Shammai and Hillel wrote 'Megillat Bet Ḥashmonai.' But up to the present time nothing is known of the Megillah; and this state of incognizance will last until the priest shall appear with the Urim and Thummim."

"Book of the Hasmoneans."

The last words of the passage originate in Neh. vii. 65, and leave no doubt concerning the obscure expression עלה לדורות; since the words of Nehemiah or the similar expression, "when Elijah shall appear," were used to express the idea that what has disappeared, or lies hidden, will some time make its reappearance (I Macc. iv. 46; Mek., Beshallaḥ, Wayassa', 5, ed. Weiss, p. 60). This view also nullifies all speculation that the Talmud and the Midrashim drew upon a "Book of the Hasmoneans." At any rate, it may be asserted that the Megillat Antiochus was written at a time when even the vaguest recollection of the Maccabeans had disappeared. An additional proof of the same fact is furnished by the language and subject-matter of the work itself.

Contents of the Scroll of Antiochus.

The scroll begins with a description of the greatness and power of Antiochus, who was mighty and victorious, and built Antioch, a city on the seacoast (a misunderstanding of Gen. R. xxiii., beginning). His general Bagras also founded a city beyond Antioch, and called it after himself. In the twenty-third year of his reign, Antiochus determined to begin the religious war against the Jews. To that end he sent to Jerusalem his general Nicanor, who raged furiously against the pious Jews, and set up an idol in the Temple. When the high priest John, son of Mattathias, saw this, he appeared before Nicanor's house and demanded entrance. Admitted to Nicanor's presence, he declared himself willing to comply with the king's demand, and to offer a sacrifice to the idol. He expressed the wish, however, that all present should leave the house; since he feared that if the Jews heard of his deed he would be stoned. When left alone with Nicanor, John thrust into the general's heart the dagger that he had concealed under his garments.

After this John waged a victorious war against the Greeks; and, as a memorial of his great deed, he erected a column with the inscription, "Maccabee, the Slayer of the Mighty." Antiochus now sent his general Bagris (a distorted form of the name Bacchides), who at first killed a number of Jews for observing their religious precepts; but he was at length compelled by the five sons of Mattathias to flee. He boarded a vessel, and set sail for Antioch. When, for the second time, he moved with a mighty host against the Jews, he was not much more successful. The five sons of Mattathias opposed him valiantly, and although Judas and Eleazar lost their lives, the Jews were triumphant. Their success was in no small measure due to the aged Mattathias, who, after the fall of Judas, himself undertook the guidance of the battle. This third battle was also the last; for Bagris was burned by the Jews, and Antiochus, after a revolt of his subjects, fled to Asia Minor and drowned himself.

The Jews then purified the Temple. They were fortunate enough to find clean oil, which was needed for the holy lights, and although the quantity seemed sufficient for one day only, it lasted miraculously during eight days. For this reason the Maccabees instituted the eight-day Ḥanukkah feast.

This outline of the subject-matter of the Scroll suffices to determine its historic value. That Antioch is mentioned as a coast city; that John, with the surname "Maccabee," is called a high priest; and that the reign of Antiochus is said to have lasted twenty-three years, all go to prove that the Megillah is a spurious work of fairly recent times. Since no Palestinian ever called Antioch a coast city, the statement concerning its position shows also that the work is a Babylonian product.

The determination of the exact date of the Scroll is more difficult. If the above-mentioned passage in the "Halakot Gedolot" really refers to a "Book of the Hasmoneans," the only possible period could have been from the middle of the eighth to the middle of the ninth century; for, as has been said, the "Halakot Gedolot" does not presuppose a book that existed contemporaneously with itself.

Sources.

The sources drawn upon by the author of the Megillah were unhistoric, with the one exception of the First Book of the Maccabees (probably the Syriac version), of which passages were copied letter for letter (see "Megillat Antiochus," ed. Jellinek, verse 59; I Macc. iii. 46). The idea of the high priest John was derived from the Talmud, in which, however, John Hyrcanus is always called יוחנן כהן גדול; and the writer of the Megillah confuses him with John, son of the Hasmonean Mattathias, mentioned in the Book of the Maccabees. The miracle of the cruse of oil likewise sprang from the Talmud, which itself drew it from the Megillat Ta'anit.

The wholly legendary character of the Scroll did not prevent it from being held as of consequence at certain periods; in fact, this legendary character may have contributed to its appreciation. In Saadia's time it must have been greatly esteemed; otherwise he would not have attributed its authorship to the five sons of Mattathias (*l.c.* p. 150); and Nissim b. Jacob, at the beginning of the eleventh century, invests it with almost canonical dignity (introduction to "Sefer Ma'asiot," ed. Warsaw, p. 5). During

Held in High Estimation.

the thirteenth century, as is known, it was publicly read on Ḥanukkah in the Italian synagogues (Isaiah de Trani, in his "Scholia" on Suk. 44*b*, ed. Lemberg, 31*b*), probably in the Hebrew translation that had been made at a quite early date. This part that it had in the ritual seems to have been peculiar to Italy; and to this is due the fact that the Megillah is contained in one of the oldest Italian Maḥzorim (1568). A number of manuscript Torah scrolls, of various origins and dates, also contain the Megillah, which either follows the Pentateuch or is found among the Five Megillot. From this it is evident that the Megillah was classed almost in the same rank as the canonical books. Except in the ritual that at present obtains in Yemen, the Megillah has disappeared from the liturgy.

L. G.

ANTIPAS (HEROD ANTIPAS): Seventh (not sixth, as stated in Graetz, or third, as in Dean Farrar's biography of the Herods) and, at the time of his father's death, youngest son of Herod the Great by his Samaritan wife, Malthace. The exact date of his birth can not be ascertained, but it must certainly have occurred before 20 B.C. He died in exile about the year 39. Antipas, like most of the other members of his family, was educated at Rome, and kept in close touch with the imperial court. Little is known of his mode of life or of his activity before his accession to power, though his later acts do not lead to the supposition that he had been superior in virtue to his half-brothers, or, indeed, to most of the patrician youths brought up near the palace. From two Greek inscriptions—one from the island of Kos, and the other from Delos ("C. I. G." No. 2502; "Bulletin de Correspondances Helléniques," iii. 365)—it is apparent that he traveled extensively, though it can not be ascertained at what period of his life.

Becomes Tetrarch.

Upon the discovery of Antipater's attempt to poison his father, Herod the Great appointed Antipas his successor to the throne of Judea; but either, as some state, on account of the severe illness that had again befallen him, or owing to the fear of dire consequences in leaving the whole kingdom in the hands of his youngest son, Herod divided Judea into several districts, and in his last will (about 4 B.C.) bequeathed to Antipas nothing but the tetrarchy of Galilee and Perea, which brought its ruler an income of 200 talents; giving to another son by Malthace, Archelaus, the right to the title of "king of Judea." Antipas did not acquiesce in this new partition of his father's dominions. He went to Rome, accompanied by the rhetorician Ireneus, and claimed the kingdom in accordance with Herod's earlier will; but though a deputation of fifty Jews had reached the imperial court to plead against Archelaus—and incidentally against Antipas—Augustus ratified the terms of the last will.

Upon several occasions, during his rule of the tetrarchy, Antipas appealed to Rome for extension of his territory. But his scheming and petitions were of no avail, and his final appeal to Caligula for further addition to his dominion was fruitless and only hastened his ruin. It is, therefore, either as a general expression of authority and power, or in cognizance of the fact that the royal title was always borne by some member of the Herodian family (Archelaus was then no longer ruling), that the epithet "king" is used (only once) in the New Testament in speaking of Antipas (Mark, vi. 14). Wherever else in the New Testament he is mentioned, the title given to him is, generally, "tetrarch": the name Antipas never occurs there, Herod being the only name used (Matt. xiv. 1; Luke, iii. 1, 19, and ix. 7). Josephus, who, in the first part of the "History of the Jewish War," speaks of him as Antipas, calls him Herod in relating the division of Judea; adding to the name the phrase, "he who was called Antipas" ("B. J." ii. 9, § 1), but using simply the patronymic throughout the rest of his work. In the English translation of Graetz (ii. 114), Herod is spoken of as Antipas I.; but this use of the Roman numeral is evidently unwarranted.

Makes Extensive Improvements.

Though Antipas was by nature pusillanimous, cringing before higher authority, and at times savagely cruel, he seems, nevertheless, to have allowed to his subjects a certain amount of independence. His main efforts as a ruler were directed toward the adornment of towns that already existed, and the establishment of new ones. He rebuilt Beth-Haran (Betharamptha), in the south of Perea, and called it Livias; he next reconstructed and enlarged his capital, Sepphoris; and then made into a town the fortress Macherus, on the eastern shore of the Dead Sea, rebuilding the fortress itself and erecting a magnificent palace. It was probably in this palace that John the Baptist preached and was afterward imprisoned. Antipas' crowning effort in this direction was the building (24-26) of the town of Tiberias on Lake Gennesaret in Galilee, which he arranged more on the plan of a Greek than of a Judean city, with a stadium and a splendid palace; the walls of the latter being adorned with figures, and even the government of the town being on Greek lines, with a council of 600 members, an archon, and a committee of the ten first (*οἱ δέκα πρῶτοι*). The name given to the town was in honor of the ruling emperor, Tiberius. As soon as its construction was completed Antipas moved his court thither; and Tiberias thereafter became the permanent capital of Galilee.

The relations of Antipas with the court of Rome and with its various emissaries in Asia were never cordial. Augustus, it has been said, openly expressed his contempt for the tetrarch; though the marriage of Antipas with the daughter of Aretas was contracted, probably, for the sole purpose of pleasing the emperor, who greatly favored the alliance of Roman officials with foreign princesses, and though the new name (Livias) given to Beth-Haran was intended as a mark of honor to Livia, the wife of Augustus. Under Tiberius constant intrigues to gain the emperor's favor were carried on between Antipas and the other influential Roman officials. In this way he in one instance brought upon himself the enmity of Vitellius. This proconsul had arranged an expedition against Artabanus III., king of Parthia; but being ordered by Tiberius to come to peaceful terms, he met the Parthian on a bridge thrown across the Euphrates for this very purpose.

Reasons for His Unpopularity.

Here Antipas prepared a magnificent tent for them and entertained them sumptuously; but before Vitellius could inform the emperor of the negotiations the tetrarch had sent messengers to Rome with the necessary despatches. The exact date of the meeting between Vitellius and Artabanus has been the subject of much dispute, and is still a moot question. Antipas was continually intriguing against Pontius Pilate also. At one time Antipas sent a complaint to the emperor against Pilate because the latter had put up an unwelcome votive tablet in the palace of Jerusalem (about 36). Nor was Antipas popular among the Judeans. It is true that, at least ostensibly, he complied with the more important ordinances of the Jewish faith, and that he went to Jerusalem to celebrate the feasts. But the house of Herod had become an object of hate and suspicion; and Antipas himself had done nothing to counteract the spreading of these sentiments. On the contrary, he had adorned his palace walls with the figures of animals, even though there had been no effigies on the coins he minted; and, above all, he had violated the Mosaic law in marrying Herodias. John the Baptist denounced him publicly (Matt. xiv. 4; Mark, vi. 18); and even Jesus called him "that fox" (Luke, xiii. 32).

Concerned in Deaths of John and Jesus.

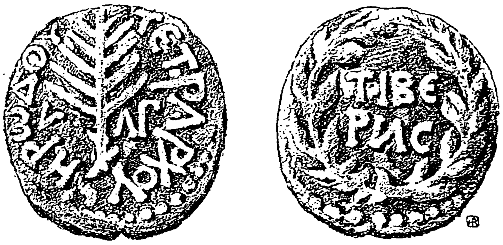
In the history of the Messianic movement Antipas plays a most important part; for he is the Herod of the Gospels who slew John, and who was partly responsible for the execution of Jesus; though the story of the presentation of John's head on a charger, by the daughter of Herodias, is probably an exaggeration. It is possible that John's imprisonment and death were inspired by Herodias, whose marriage, as has been said, he had denounced. Antipas' part in the fate of Jesus consisted in the preliminary hearing of the latter; for Pontius Pilate, to whom the accusations against Jesus were brought, handed over the preacher of Galilee to the tetrarch of that district, who was then sojourning in Jerusalem. Jesus answered neither the charges of his accusers nor the questions of Antipas; and he was handed back to the higher authorities, to be tried according to Roman law and custom.

Abandons First Wife.

Antipas married twice, his first wife being the above-mentioned daughter of Aretas VI., king of Arabia Petræa. During one of his visits to Rome he met Herodias, his own niece and the wife of his half-brother Philip, and persuaded her to leave her husband and to accompany him to Tiberias. His Arabian wife, upon hearing of her impending disgrace, obtained permission from Antipas, on the plea of ill health, to go to Macherus, which then belonged to Aretas; and there she met her father, whom she induced to pick a quarrel with her husband and to invade his tetrarchy. Antipas' army was defeated, and his lands were threatened (37). He was obliged to order Vitellius against Aretas; but before the Roman proconsul had left Judea the emperor died; and Vitellius, in revenge for Antipas' treachery on the occasion of the peace negotiations with Artabanus III., promptly desisted from his march. Fortunately, Aretas withdrew to his own lands.

Is Banished.

Antipas' marriage with Herodias was neither of long duration nor very happy. She was ambitious, and wished to see her husband in the possession of greater territorial power. After the death of Tiberius she induced her husband to make a personal appeal to the new emperor for the possession of the royal title; but Agrippa, whose first appointment to imperial function (as overseer of the markets) had been brought about through the influence of Herodias and Antipas, sent a messenger, Justinianus, to Caligula, who was then at Baiæ, and accused the tetrarch of plotting against Rome. Antipas could not deny that he had collected a vast stock of arms; and he was stripped of all his lands and wealth, which Caligula gave to Agrippa, banishing Antipas (39) to Lugdunum, in Gaul, whither Herodias followed him. He died shortly afterward. Whether this Lugdunum be the modern St. Bertrand de Comminges, near the Spanish border, or whether the ex-tetrarch removed from Lyons to Spain, can not be ascertained. Josephus states definitely that Antipas died in Spain. The assertion in Dio Cassius (lix. 8) that Caligula put Antipas to death is certainly untrue, unless the phrase is intended in a general and not in a literal sense.



Copper Coin of Herod Antipas.

Obverse: ΗΡΩΔΟΥ ΤΕΤΡΑΡΧΟΥ, surrounding a palm-branch, and L.ΛΓ (year 33—of his reign). *Reverse:* TIBEPIAC in wreath.

(After Madden, "Coins of the Jews.")

"Antipas" is a contracted form of "Antipater," or "Antipatros"; and its meaning is, therefore, not "against all," as has sometimes been asserted.

W. M.

ANTIPATER (abridged form, **Antipas**): Father of Herod I.; died 43 B.C. He was the son of Antipas, a convert to Judaism, who was governor of Idumæa under the reigns of Alexander Jannæus and his queen dowager Alexandra, and rendered himself serviceable to the Jewish rulers, through his connections with his former congeners, of Arabia Petræa. Antipater, who seems to have succeeded his father as governor of Idumæa, had reason to fear that King Aristobulus II. would not retain him in his position. He therefore tried his utmost to dethrone Aristobulus, and to restore the weak Hyrcanus II., who would be an easy tool in his hands, to the throne which was rightfully his.

Plots Against Aristobulus.

With this view Antipater tried to persuade Hyrcanus, who was not only of a peaceful and kindly disposition but altogether free from suspicion, that his brother was plotting his death in order to secure himself upon the throne. Hyrcanus at first refused credence to Antipater, but finally allowed himself to be gained over. Antipater, who felt no attachment for Judaism or the Jewish state, and who stood ready to sacrifice their interests in order to serve his own ends, had made previous arrangements with Aretas, an Arabian chief, to give his help to Hyrcanus in return for a large sum of money and possession of twelve cities, which had been conquered from the Arabians by the Hasmoneans after long and hard fighting. Antipater then took Hyrcanus with him to Aretas, who forthwith proceeded with a large army against Aristobulus, and defeated him. Thus

Antipater succeeded in gaining his objects, although the Jewish state lost its independence in consequence. The dispute was referred to Rome, and decision was given against Aristobulus.

Hyrcanus and Antipater.

The remnant of independence which Pompey had allowed to Judea, whose nominal king was now Hyrcanus II., proved of great advantage to Antipater, as he now held Hyrcanus completely under his control. Hyrcanus needed a crafty and skilful counselor at his side, such as Antipater, to meet the difficulties of party opposition from within and of Roman greed from without. Antipater, however, retained his position of influence even after Hyrcanus was stripped of all political power by Gabinius (57 B.C.). His proconsul arranged "all affairs of Jerusalem according to the will of Antipater," a phrase which seems to indicate that Antipater was made the tax-collector of the Jewish realm.

Changes of Policy.

Antipater in Jewish Legend.

When his personal interests did not conflict with those of the Jews the crafty Idumean was of great service to them. Thus, after the battle of Pharsalia (Aug. 9, 48 B.C.), he was quick to take sides with Cæsar; and the latter's friendship to the Jews was mainly due to the services rendered him by Antipater, in Egypt, nominally under the authority of Hyrcanus. Cæsar rewarded Antipater by appointing him governor (ἐπίτροπος) of Judea in the year 47 B.C.; and, what was of still greater advantage to Antipater, Hyrcanus was made ethnarch instead of Antigonus, son of Aristobulus II. Entirely ignoring Hyrcanus, he appointed his own sons, Phasael and Herod, governors of Jerusalem and of Galilee respectively. During the subsequent struggle between Cæsar and the Pompeians, Antipater exhibited great statesmanship in steering little Judea skilfully through the troublous times. As long as Cæsar lived he remained his partizan, foreseeing the ultimate victory of the great general; but after his assassination, Antipater sided with Cassius because the latter had seized Syria, and Judea could not have stood against him. He was as energetic in his services to Cassius as formerly to Cæsar, and was most prompt in delivering the 700 talents which the Jews had to contribute for Cassius' army. In the midst of his activity and rising success Antipater was poisoned (43 B.C.), while feasting with Hyrcanus, by the hireling of a certain Malich, who, like Antipater, was aspiring to an influential position in Judea. No good, however, came to Judea by his death, for the power of the Idumean house was not annihilated thereby, and his sons, particularly Herod, carried on the work of the destruction of Judea. So much was this the case that the hatred of the Jews concentrated itself mainly against the son, and legend has little to say of the actual founder of the Herodian dynasty. A fragment of a legend concerning the life of Antipater has, however, been preserved by Julius Africanus. According to this writer, Idumean robbers attacked Ascalon, and plundered a shrine of Apollo, taking with them the son of the temple-attendant Herod, because he was too poor to redeem his son Antipater. Antipater was thus brought up as an Idumean and later won the friendship of Hyrcanus II. (Julius Africanus, "Epistola ad Aristidem," v.; Migne, "Patrologie," x. 59). The Jewish origin of this legend is attested by Justin Martyr ("Dialogus cum Tryphone," lii.), who characterizes this statement of Herod's origin from Ascalon as Jewish. That this account is fabulous is shown by the manner in which the narrative endeavors to prove the Idumean origin of Herod. The legend refuses to regard him even as a half-Jew (Deut. xxiii. 8), but calls him a Philistine, a member of a race which owes its existence to unchastity (Gen. R. xxxvii. 5), and then seeks to reconcile its statement with actual fact. The non-Jewish origin of the Herodians is also demonstrated by the Mishnah Soṭah, iv., at end. See also HEROD I. and HYRCANUS II.

L. G.

ANTIPATER: Eldest son of Herod the Great and of the Idumean Doris, who soon after Antipater's birth was discarded by her husband; born about 38 B.C.; executed 4 B.C. He was first brought up in obscurity and penury; but Pheroras and Salome, brother and sister of Herod, fearing that the influence of Alexander and Aristobulus, the two sons of Mariamne, would be detrimental to their own designs upon Herod, induced the latter, after the death of Mariamne, to recall to his palace both his former wife and his first-born son. Antipater, with his half-brothers, was then sent to Rome, under the care of Agrippa, to receive an education befitting a prince and patrician (13 B.C.).

His Machinations.

Antipater's life, from the day of his mother's return to favor and of his own recall to the palace of Jerusalem, was one continuous endeavor to supplant in the favor of his father all the other members of the Herodian family, and finally, when this object was well-nigh achieved, to gain possession, through parricide, of the throne of Judea. While at Rome, Antipater tried to influence Herod against Alexander and Aristobulus, who were apparently the favorites; insinuating that these sons of Mariamne were scheming to avenge their mother's death on the person of their father. He succeeded so well in his calumnies against them that Herod brought them to Rome, accused them before Augustus of plotting his overthrow, and begged of the emperor permission to punish them. Augustus probably saw through the plot, and temporarily reconciled Herod with his sons.

Herod returned with the three princes to Jerusalem; and there Antipater began his machinations afresh. Common ambition had united him with Pheroras and Salome; and a plot was concocted to poison Herod. Antipater had also succeeded in gaining the confidence of Alexander and Aristobulus, especially of the former, and could consequently pursue with ease his plan for their ruin. After casting suspicion upon the two princes by innuendos and secret accusations, he persuaded Herod to torture the servants of the palace into revealing what they knew of the alleged infidelity of his sons. Some of these confessed that the sons of Mariamne were plotting to assassinate the king; and Alexander and Aristobulus were consequently cast into prison. The former pretended to acknowledge his guilt, and implicated in his confession Pheroras, who was thereupon banished to his tetrarchy; but not a word did he breathe against Antipater, so well had the latter beguiled him. Augustus reluctantly granted Herod permission to banish or execute his two prisoners; and it was on the occasion of this peculiar request that Augustus is said to have exclaimed: "I would rather be of Herod's swine than of his sons" (Macrobius, "Saturnalium Conviviorum Libri Septem," ii. 4).

Shares the Government of Judea.

Upon the execution of his sons in the year 7 B.C., Herod nominated Antipater as successor to the throne of Judea, and immediately gave him a share in the government; but, in the fear of a possible discovery of his plots and of a further change in the disposition of the kingdom, Antipater sought to arouse Herod's suspicions against the other two sons, Philip and Archelaus. He sent letters to some influential friends at Rome, requesting them to ask Herod to despatch Antipater to Rome. Herod complied with their request, and sent by him many costly presents to the emperor. Safe now from detection Antipater could more easily prepare the execution of his plots and counterplots. He sent Bathyllus, one of his freedmen, to Jerusalem with letters accusing Philip and Archelaus; and he allied himself with Acme, a Jewish slave of Livia, as he knew that Salome corresponded with the empress, and that, through the information he would thus gain, he could accuse Salome of treachery against Herod, to whom he even sent a letter purporting to be from Herod's sister, exposing her guilt. At the same time, he was plotting with Salome and Pheroras against Herod, and is said even to have sent to Pheroras poison which either he or his sister was to give to Herod.

Meets His Fate.

But an incident occurred that upset all of Antipater's heinous plans, and brought him to his deserved fate. It was at an investigation into the death of Pheroras, whose wife had been accused of having poisoned him, that, in establishing her innocence, the villainy of Antipater was laid bare. In the meantime, correspondence between Acme and Antipater having been intercepted, Herod sent a letter to Rome in most affectionate terms, asking Antipater to return to Jerusalem, which he unsuspectingly did. On his way, while in Cilicia, he heard of Pheroras' death, of his mother's second banishment, and vague rumors of the accusations that awaited him. He nevertheless continued on his journey to Jerusalem; hoping, probably, to allay his father's suspicions. On his arrival Herod accused him before a tribunal headed by Quintilius Varus; but though Nicolas of Damascus laid bare the whole plot, and though the deadly poison itself was produced and tested in open court, Antipater's speech in answer to the accusers—which moved Varus and even Herod himself—must have had its effect, since a verdict was not pronounced. Antipater was provisionally cast into prison, and Herod sent letters to Augustus, with full information of his son's machinations, and with the request that he be authorized to punish him. The emperor's reply stated that Acme had been put to death, and that Herod was at liberty to deal with his son as he deemed best.

The execution of Antipater (4 B.C.) took place under somewhat peculiar circumstances. Herod, in an attack of frenzy, had attempted suicide, and Archiabus with a loud cry had torn the knife from the king's hands. Antipater, whose prison was only a little distance away, heard the cry, and, thinking Herod dead, tried to bribe the jailer to liberate him. Herod learned of Antipater's action, and the execution of the latter was ordered and carried out on the spot.

ANTIPATER, SON OF JASON. See JONATHAN THE HASMONEAN.

ANTIPATRIS: City founded about the year 10 B.C. by Herod the Great in the plain of Kefar Saba. From a passage in Josephus it appears that there had been, in the time of Alexander Jannæus, a town on this site called Kefar Saba ("old village"), which name reappears in the modern Kefr-Saba. It is true that Talmudic authorities distinguish between Antipatris and Kefar Saba; but in all probability they intend by the latter name to designate the whole plain. This plain is no doubt identical with the "coast of Antipatris" (Tosef., Dem. i. 11) alluded to by the rabbis about the middle of the second century. From such passages it appears that Antipatris was inhabited mainly by Samaritans. The expression "coast" does not necessarily imply that the city was in proximity to the sea (as Neubauer thinks), inasmuch as Josephus describes the city as surrounded by a river; and the term used may also denote the banks of a river. Josephus defines the location of Antipatris as 150 (another reading has 160) stadia from Joppa, at the entrance into the mountains, and 26 miles south of Cæsarea, upon the highroad from that city to Lydda—a definition which applies very well to the modern Kefr-Saba. In Talmudic writings, Antipatris figures as the most northerly limit of Judea (Tosef., Giṭ. vii. [v.] 9; Yoma, 69*a*), which probably indicates that at that period—about 150 to 300—Antipatris was an important city. In the fourth century, however, it had evidently fallen into decay; and Jerome designates it as a "semi-demolished little town." It was in existence, nevertheless, as late as the eighth century. See also KEFAR SABA.

ANTIPHONY. See CHOIR.

ANTI-SEMITISM: A modern word expressing antagonism to the political and social equality of Jews.

The term "Anti-Semitism" has its origin in the ethnological theory that the Jews, as Semites, are entirely different from the Aryan, or Indo-European, populations and can never be amalgamated with them. The word implies that the Jews are not opposed on account of their religion, but on account of their racial characteristics. As such are mentioned: greed, a special aptitude for money-making, aversion to hard work, clannishness and obtrusiveness, lack of social tact, and especially of patriotism. Finally, the term is used to justify resentment for every crime or objectionable act committed by any individual Jew.

Its recent origin is proved by the fact that David Kaufmann, in 1874, speaks of the ethnic theory of Semitism as "allerneueste Weisheit" ("Magazin für die Literatur des Auslandes," 1874, No. 44), and Ludwig Bamberger, in his essay, "Deutschtum u. Judentum ("Unsere Zeit," 1880, i. 194), says, "The war-cry against the Semites is, as the word indicates, of very recent date." In his memoirs, too, referring to 1858 or shortly before, Bamberger says that the word "Semitism" had not then been invented ("Erinnerungen," ii. 311, Berlin, 1899). In February, 1881, a correspondent of the "Allgemeine Zeitung des Judenthums" speaks of "Anti-Semitism" as a designation which recently came into use ("Allg. Zeit. d. Jud." 1881, p. 138). On July 19, 1882, the editor says, "This quite recent Anti-Semitism is hardly three years old" (*ib.* 1882, p. 489). So far as can be ascertained, the word was first printed in 1880. In that year W. Marr published "Zwanglose Antisemitische Hefte," and

Wilhelm Scherer used the term "Antisemiten" in the "Neue Freie Presse" of January.

History of the Term.

It is, however, impossible to trace with certainty the first use of the word. It does not appear to have been coined before the end of the seventies, when the German empire entered upon a course widely different from its former policy. The nature of the word implies the preexistence of the word and idea of Semitism, which has itself a history that must be traced. August Ludwig von Schlözer (1735–1809) and Johann Gottfried Eichhorn (1752–1827), both professors in Göttingen, were the first to use the term "Semitic nations" (Eichhorn, "Historisch-Kritische Einleitung in das Alte Testament," 2d ed., 1787, p. 45; *idem*, "Repertorium," 1781, i. 61; "Ausland," 1872, p. 1034) in a philological sense; but the ethnical distinctness of Semitic nations was not a generally accepted theory until Franz Bopp (1791–1867), in his "Comparative Grammar" (1833–52), had created the correlative term of "Indo-Germanic languages," called by the French school "Indo-European," and by the English "Aryan." What was originally a merely linguistic term soon became an ethnical designation based on the results of comparative philology. The first who attempted to draw a picture of the ethnical character of the Semites as contradistinguished from the Aryans seems to have been Christian Lassen (1800–76), professor at Bonn, who, in his "Indische Altertumskunde," Bonn, 1844–61, i. 414, says:

> "Civilization has been the gift of but a few nations. Of other races only Egyptians and Chinese, and of the Caucasian only Semites and Aryans, have built up human civilization. History proves that Semites do not possess the harmony of psychical forces which distinguishes the Aryans. The Semite is selfish and exclusive. He possesses a sharp intellect which enables him to make use of the opportunities created by others, as we find it in the history of the Phenicians and, later on, of the Arabs."

Renan on the Jews.

Independently of Lassen, Ernest Renan (1823–92) asserted the same principle of the inferiority of the Semites, which inferiority he claims to have been the first to recognize ("Histoire Générale et Système Comparé des Langues Sémitiques," 5th ed., 1878, p. 4). "The two words," he says, "which have served until now as a symbol for the progress of the human mind toward truth, science, and philosophy, were foreign to them" (*ib.* p. 3). Stronger still are Renan's expressions in his essays on the history of religion ("Études d'Histoire Religieuse," 5th ed., Paris, 1862). Therein he claims for the Aryans all the great military, political, and intellectual movements in the world's history; while the Semites must be credited with the religious movements (p. 85). The Semites have never had any comprehension of civilization in the sense in which *we* understand the word; they were at no time public-spirited (p. 88). Intolerance was the natural consequence of their monotheism (p. 87), which, if not imported from the Semitic world, would have remained foreign to the Aryans, who were impressed with the variety of the universe (p. 85). The Jewish people, while not progressive, claimed that the future was theirs; and this illogical position accounts for the hatred which eighteen centuries were unable to mitigate (p. 130).

Application to Ethnology.

While Renan, in the preface to his history of the Semitic languages, warned against wresting individual passages from the context, and insisted that the racial element was counterbalanced by many other influences; while he said that the Jews of our age are not Semites, but modern men; and while he even denied the existence of a Jewish race ("Le Judaïsme comme Race et comme Religion," Paris, 1883), it was, nevertheless, he who had forged the arms which the anti-Semites used in their attacks on Jews and Judaism. For they could refer to the testimony of a scholar and a freethinker, when they repeated in reference to the Jews what he had said of the Semites—namely, that they lacked personal courage; that their moral ideal was different from "ours"; that they were selfish, chiefly negative, and altogether "une race incomplète." Many other representatives of the young science of ethnology—which was constantly advanced by the development of comparative philology—proceeded to draw lines of demarcation between Semitic and Aryan civilization (Philippson, "Weltbewegende Fragen," i. 31, Leipsic, 1868). Of the immense literature on the subject an article, published in the "Ausland," a weekly edited by Friedrich von Hellwald, 1872, pp. 901 *et seq.* and 957 *et seq.*, seems to have exercised a great influence upon the growth of the anti-Semitic movement, although the anonymous author (afterward acknowledged by von Hellwald to be himself) is in no way original, but has mainly copied the words of Renan. He says:

> "The Jews are not merely a different religious community, but—and this is to us the most important factor—ethnically an altogether different race. The European feels instinctively that the Jew is a stranger who immigrated from Asia. The so-called prejudice is a natural sentiment. Civilization will overcome the antipathy against the Israelite who merely professes another religion, but never that against the racially different Jew. The Jew is cosmopolitan, and possesses a certain astuteness which makes him the master of the honest Aryan. In eastern Europe the Jew is the cancer slowly eating into the flesh of the other nations. Exploitation of the people is his only aim. Selfishness and lack of personal courage are his chief characteristics; self-sacrifice and patriotism are altogether foreign to him."

It is claimed that, although the Jews have amalgamated to a considerable extent with their surroundings, they no longer adopt commercial pursuits exclusively, have their children educated in the public schools, and are eager to give up their peculiarities, the Jew remains a separate individuality, and, while he participates in the spiritual and political work of the nation, his desire is to make it subservient to the rule of Judaism (Roeder, "Zeitschrift für die Gesammten Staatswissenschaften," 1871, No. 3; Jules Richard, in "Le Constitutionnel," Nov. 24, 1872).

The Old Hatred of the Jews.

While the term Anti-Semitism should be restricted in its use to the modern movements against the Jews, in its wider sense it may be said to include the persecution of the Jews at all times and among all nations as professors of a separate religion or as a people having a distinct nationality. Its history begins with the period of the Book of Esther, when the charge was first made that the Jews are a "people scattered abroad and dispersed among the people in all the provinces of thy kingdom; and their laws are diverse from all people; neither keep they the king's laws; therefore it is not for the king's profit to suffer them" (Esth. iii. 8). The Jews, having met with nations who disputed their claim of superiority, were, in the Hellenized Orient and later on in the Roman world, the targets of hatred combined with contempt. The charges preferred against them were that they hated all other men; that they were clannish (ἀμιξία) and irreligious (ἀθεότης); that they had not participated in the work of civilization; that they had become a menace to the Roman empire; that their bodies emitted a peculiar odor; that they sacrificed annually a Greek; and that they were descendants of lepers, who had been expelled from Egypt (Schürer, "Gesch." 3d ed., iii. 397–420, Leipsic, 1898; Reinach, "Textes d'Auteurs Grecs et Romains Relatifs au

Judaïsme," 1895; Vogelstein and Rieger, "Gesch. der Juden in Rom," Berlin, 1896). See Apion.

The medieval literature on the subject is foreign to this article, as its attacks on Judaism are principally on religious grounds, although the Jews were also proclaimed as dangerous from an economic point of view and denounced as enemies of all Christians. What is properly known as Anti-Semitism had its roots in the age following the French Revolution, when religious liberty had become a more or less accepted dogma in political science, and a new basis had to be found for the attacks on the Jews, more particularly for the opposition to their full enfranchisement. The years following the battle of Waterloo saw a deluge of anti-Jewish pamphlets (Jost, "Neue Gesch. der Israeliten," Breslau, i. 43 *et seq.*; Grätz, "Gesch. d. Juden," xi. 318 *et seq.*).

Frederick William IV. of Prussia and the Jews.

Reactionary tendencies which molded the political physiognomy of Europe until the French Revolution of 1830, and of eastern Europe down to the forties, aroused a strong democratic opposition. The opponents of reform combining the reactionary forces in both the political and ecclesiastical camps received valuable encouragement by the accession to the throne of King Frederick William IV. of Prussia (1840). In a "Cabinetsordre" of 1841 the king defined his views on a new law, which was to regulate the status of the Jews; to treat the Jews as a colony of foreigners; to give them autonomy in their congregational affairs; and to take from them the municipal franchise which they had possessed since 1812. Small vexatious measures—for example, when Minister of Justice von Mühler issued a circular recommending that every court should buy a copy of a pamphlet directed against the Jews (Thiele, "Die Jüdischen Gauner in Deutschland")—gave further encouragement to the reactionaries. (On this period see Wilh. Freund, "Die Gegenwärtig Beabsichtigte Umgestaltung der Bürgerlichen Verhältnisse der Juden im Preuss. Staate," 1842; and Isidor Keim, "Ein Wort über die Rechtlichen Zustände der Juden im Preuss. Staate," Leipsic, 1842.)

The opposition against granting to the Jews all political rights came from various quarters. It was natural that those who believed in the ideal of "a Christian country" should be opposed to it, and that these should be joined by the advocates of the autocratic form of government, based on the principle of classes, which is a diluted feudalism. The representative of the latter party was Hermann Wagener (1815–89), who in his "Staatslexicon," and in his pamphlet, "Das Judentum und der Staat" (1857), defended its doctrine. From an ecclesiastical point of view, the necessity of keeping the Jews on an inferior level of political and civil rights was defended by A. Th. Hartmann, professor at Rostock (1774–1838), in various pamphlets, among which was "Gegen Gleichberechtigung der Juden" (1834). The liberal Christians also furnished opponents of the emancipation of the Jews; for example, Joh. Fr. Röhr (1777–1848), head of the Protestant Church in Saxe-Weimar, who was one of the foremost rationalists of his age; H. E. G. Paulus (1761–1851), professor at Heidelberg, the most outspoken representative of rationalism. In his "Jüdische Nationalabsonderung" (1830) he advocated the denial to the Jews of all political rights until they would give up their ritual practises. The same position is taken by Karl Streckfuss (1778–1844), a poet and government official in Prussia, in his pamphlets, "Ueber das Verhältniss der Juden in den Christlichen Staaten" (Berlin, 1843), in which he says (p. 115): "As long as all Jews do not renounce their ceremonial law, emancipation can not become an accomplished fact." Similarly, Bruno Bauer (1809–82), one of the most radical of German theologians: "The only logical position of the Jew in the Christian state is that of a separate corporation" ("Die Judenfrage," 1843, p. 59). Even the modern tendency to label as Jewish everything that is disliked is found in the works of Wolfgang Menzel (1798–1873), an influential literary critic, who calls the literary movement known as "Young Germany" by the name of "Young Palestine," and in Richard Wagner's pamphlet "Das Judentum in der Musik" (1869).

Jesuit Hostility Toward Jews.

In 1870 a complete change had taken place. Liberalism had become predominant in western Europe. The North-German Confederation had adopted in 1869 the liberal principle that a man's creed should not in any way affect his civil or political rights. What is called Anti-Semitism was limited to those who opposed the fundamental principle of the modern state, the equality of rights regardless of creed and nationality, and yet even the "Kreuzzeitung" of Berlin, the organ of the feudal autocracy, "Junker-Partei," spoke of the Alsatian Jews as a Jewish branch of the German nation ("Allg. Zeit. d. Jud." 1871, p. 805), when political interest made the friendship of the Jews a desirable object. The most persistent advocates of papal infallibility, the Jesuits, in their organ, "Voce della Verità," said at the time: "If a reconciliation between the pope and the kingdom of Italy should ever take place, the Jews will have to return to the Ghetto" ("Kölnische Zeitung," April 6, 1873). The Duc de Broglie, then the leader of the monarchical and Clerical party in the French Chamber, proclaimed, as the chief misfortune of France, that there should be more than one religion ("Allg. Zeit. d. Jud." 1873, p. 107). Bishop von Ketteler of Mayence, one of the founders of the "Centrum," or Catholic party, in the Reichstag, mocked at the German "Michel" who allowed Jews to teach him what Teutonism was—a hit at Ludwig Bamberger, who was deputy to the German Reichstag from Mayence (*ib.* 1872, p. 265).

The most peculiar and contradictory charges were brought against the Jews in the clerical newspapers. The "Volksbote" of Munich said that the Jews were responsible for the fraudulent business methods of the Dachauer Bank, which was an enterprise founded and patronized by the Clerical party. The Jews had ruined it by their control over the law courts. The "Univers" of Paris and the "Vaterland" of Vienna (April 6, 1873) claimed that the "Old Catholic Church" was the work of the Jews, while Hermann von Scharff-Scharffenstein in his "Das Entlarvte Judenthum der Neuzeit" (ii. 61, Zurich, 1871) claimed that the wickedness of the Jesuits was due to the large number of Jews in the order. This policy was not confined to the Catholics. When the Prussian Diet passed the law of Feb. 8, 1872, which placed the control of the school system in the hands of the state, von Senfft-Pilsach, a member of the Conservative party, said, referring to Lasker, the law was the work of a "little Semitic gentleman." In a literary controversy on the subject of socialism Adolf Wagner, who subsequently was one of the leaders of the Christian-Socialists, dwelt, as an argument against his opponent H. B. Oppenheim, on the fact that the latter was a Jew. The leader of the Czechs in Austria, Francis Palacky (1798–1876), a Protestant, said, in his farewell address to the Czech nation, that the Jews were Shylocks. The soil was ready to receive the seed of Anti-Semitism which from 1878 became a distinct political program.

Attitude of Bismarck.

The German Elections of July 30, 1878.

It was, therefore, not difficult for Prince Bismarck, when in 1878 he changed his liberal policy and returned to his former reactionary principles, to wake an echo in the hearts of the people which was soon answered in Hungary, Austria, and France. In order to comprehend this fully, we must understand the political condition of Germany, where Anti-Semitism originated ("L'Antisémitisme moderne—c'est une importation allemande," says A. Leroy-Beaulieu, in "Israel chez les Nations," p. 25, Paris, 1897). Bismarck had always been an advocate of autocracy and an opponent of a parliamentary form of government. When he adopted the latter, it was partly because of the exigencies of the times, and partly because the Liberals stood for a united Germany, while the Conservatives opposed it as an encroachment upon the sacred rights of the legitimate princes, and the Ultramontane party dreaded it on account of the hegemony of Protestant Prussia. From 1867 Bismarck allied himself with the Liberals—to which party most of the German Jews belonged—and thus obtained the required parliamentary support in founding the German empire. When the empire had been firmly established, the danger of a restoration of the monarchy in France and of a war of revenge had passed entirely away. When President MacMahon had resigned (1879), and the Liberals had done their part in assisting Bismarck in his war against the Catholic Church, the "iron chancellor" grew tired of his allies. Accidental events had aided him in producing the impression that his change of policy was necessary. On May 11, 1878, Hödel, a vagabond, made an attempt upon the life of Emperor William. As Hödel had some leanings toward the Socialist party, the government introduced a bill in the Reichstag against Socialistic agitations. This bill was rejected; but shortly afterward (June 2, 1878) sympathy with the "glory-crowned" monarch, who was then in his eighty-second year, and the great prestige which the government gained through the Congress, held in Berlin, which followed the war between Russia and Turkey, strengthened the case of the government, which dissolved the Reichstag. The new elections (July 30, 1878) brought an increase of Conservative members. This may be considered the birthday of Anti-Semitism. The word had not yet been uttered; but a "Neuer Wahlverein" (New Electoral Society), which had been formed in Breslau, drew up a platform which proclaimed the necessity for a revision of the Liberal legislation of previous years. Two years before this, the "Deutsch-Konservative Partei" had been formed, which proclaimed the necessity for the Christianization of school and state. This party was a reactionary one of moderate tendencies. In 1878 an attempt was made to win over the masses of the people to the conservative program by the foundation of the Christian-Socialist Party (Christlich-Sociale Partei), which adopted some parts of the Socialistic program, in combination with conservative principles. The real founder of this party was the court chaplain Adolf Stöcker. The object of this organization was to provide a vent for the political dissatisfaction of the people.

Anti-Semitism 1878-1900.

Officially, Anti-Semitism did not show itself at first in its true colors. It was, however, the moving force of the Christian-Socialist party, at the head of which was the court chaplain Adolf Stöcker. Bismarck had wearied of the Liberals, upon whose support he could not rely for his new policy, which demanded special laws against the Socialists, a protective tariff, measures against the abuse of commercial freedom, and increasing demands for the army. The Christian-Socialists soon received enthusiastic support from many quarters, especially from teachers and journalists. One of the most important acquisitions to their cause was Heinrich von Treitschke (1834-96; professor of history in the University of Berlin, a member of the National-Liberals), from whose remarks two bitter phrases gained wide currency. He spoke of "Hosenverkaufende Polnische Jünglinge" (Polish youngsters who sell trousers), and said: "In the circles of educated Germans, who would protest indignantly against the charge of religious or national intolerance, one single cry is heard, 'The Jews are our misfortune' [*Die Juden sind unser Unglück*]" (see "Preussische Jahrbücher," Nov. and Dec., 1879, and Jan., 1880; reprinted as a pamphlet under the title, "Ein Wort über Unser Judentum," Berlin, 1880). The importance of these articles is demonstrated by the fact that the minister of public worship, von Puttkamer, a prominent member of the Reactionary party, whom Bismarck had appointed in the place of the Liberal Falk, referred to it, in a debate in the Prussian Diet, Feb. 12, 1880, as a proof of the necessity of preserving the denominational character of the public schools. The excitement continued and reached such a pitch that in Berlin Jews were assaulted in public places. On one such occasion a Jew named Kantorowicz was insulted in a street-car by two high-school professors and slapped one of his assailants in the face; this brought about a debate in the Diet which lasted two days (Nov. 20-22, 1880). Hänel, a member of the Liberal party, had interpellated the government as to the position it intended to take with regard to the anti-Semitic movement, which had assumed tangible shape in a petition to the government to restrict the civil and political rights of the Jews. Minister Count von Stolberg replied that, while the government had not yet received the petition, he was ready to declare that it had no intention of altering the existing laws. Professor Virchow replied, however, that the anti-Semitic movement, started by the Clericals and the Feudalists, had received encouragement and material aid from the secret funds of the government, which desired to see some Jewish deputies defeated.

Anti-Semitism an Issue in Elections.

Public meetings, at which Stöcker and his adjutants, Förster and Henrici, harangued the audience, denouncing the Jews as a danger to the German nation, were of daily occurrence. In all municipal elections Anti-Semitism was made an issue. Women's associations were formed with the object of boycotting all Jewish merchants. A strong agitation was set on foot to enlist the interest of the students. The petition to disfranchise the Jews obtained 1,400 signatures among the students of Berlin, and 1,022 among those of Leipsic. In spite of the strict rule enforced by the Prussian police, serious riots occurred at Neustettin, July 17, 18, 1881. Not long afterward the synagogue of that place was burned down, and the Jews being charged with having set fire to the building, some of them were arrested as incendiaries on charges preferred by the anti-Semites; though declared innocent, they were attacked by a mob, and only the timely interference of the police saved them from being killed (March 7, 1884). The language of mobs was heard in the parliaments. A priest named Frank, a deputy to the Bavarian Diet, said (Jan. 30, 1880) in an address: "If you wish to assist the starving population in the Spessart, make one brief law:

'Every "Handelsjude" [Jewish pedler] is to be shot or hanged.'"

At the same time the organized anti-Semites lost no opportunity to bring about practical results through their agitation. Their chief aim was to exclude Jews from public office; and this idea was emphasized by the refusal of Pastor Hapke, in Berlin, to take oath before a Jewish judge (Jan. 8, 1883), which Stöcker called the justified outcry of an outraged conscience ("berechtigter Ausdruck der Gewissensnoth"). The Conservative party, whose spokesman, von Rauchhaupt, declared, "We have taken upon ourselves the whole odium of the anti-Semitic movement," introduced a bill in the Reichstag providing that Christians should have the right to ask for a Christian judge when taking an oath. Although the government did not accede to these demands, it gave them indirect encouragement. Bismarck answered very courteously telegrams sent to him by anti-Semitic meetings. The administration of the minister of public worship, von Puttkamer, as far as was compatible with existing legislation, complied with the demands of the Conservatives; and the bill introduced into the Prussian Diet by the minister of public worship, von Zedlitz, 1892, even proposed to divide the school children according to their religion. The bill was, however, defeated by the strong opposition of the best elements of the country.

Exclusion of Jewish Immigrants.

The demand of the anti-Semitic petitioners to prohibit all Jewish immigration from Russia was not directly granted, but the government recognized it so far as to exercise a strict supervision of the Russian refugees who arrived in Germany in large numbers. A law of 1847 was unearthed, which, as the government acknowledged, had become superseded by subsequent legislation. Still, from it the government deduced the right to expel all foreigners employed by a Jewish community (Oct., 1884). Similarly, an edict (May, 1885) to expel all foreign Poles from the eastern provinces of Germany seems to have been aimed at the Russian Jews who were residents of Germany, many of whom had been living there for years. Bismarck's refusal to transmit to the Reichstag the expressions of sympathy passed by the House of Representatives at Washington, upon the death of Eduard Lasker (Jan. 5, 1884), was interpreted as an anti-Semitic demonstration. Various attempts were made to take from the Jews, in an underhand way, the rights which the constitution had given them. Fiscal legislation, such as an increased tax on stock-jobbing, was often prompted by anti-Semitic motives. The regularly repeated motions of anti-Semitic parties in the Reichstag and in the Diets of the various states, to investigate the text-books of the Jewish religion, to have the Talmud or the Shulḥan 'Aruk translated at the expense of the government, and to prohibit, on the ground of cruelty, the killing of animals according to the Jewish rite, were received by the governments with little complacency in the Prussian House of Lords (March 22, 1893), in the Diet of Baden (Feb., 1894), and in the Reichstag (April 25, 1899). As long as Bismarck was in power Anti-Semitism was checked; for though an anti-Semite by birth, as he himself confessed, he never permitted the turbulent elements to gain the upper hand. In fact, after his retirement he said that the Conservatives, in their attempt to fight Socialism with anti-Semitism, "had got hold of the wrong insect-powder" ("Allg. Zeit. d. Jud." Nov. 11., 1892). The accession of Emperor William II. to the throne (June 15, 1888) soon gave encouragement to the anti-Semites and their allies. An attempt was made to induce the emperor to refuse his confirmation of the election of Prof. Julius Bernstein as rector magnificus of the University of Halle. Bismarck evidently advised the emperor to decline so to act. It was also Bismarck's influence that brought about Stöcker's retirement as court chaplain.

Bismarck's Retirement Encourages Anti-Semites.

Bismarck's retirement (March 20, 1890) gave a new impetus to the anti-Semitic agitation in Germany. Ahlwardt appeared upon the scene; and his pamphlets—especially the "Judenflinten," in which he claimed that the firm Ludwig Löwe & Co. had been hired by the Alliance Israélite Universelle to furnish inefficient guns to the German army in order that Germany might be defeated in the war of revenge—created a great stir. The government took a firm position against Ahlwardt, but in other cases displayed more weakness. When the Oberlandesgerichtspräsident of Breslau, a high official in the department of justice, issued a circular (1891) advising the judges not to put Jews on a jury, and the Liberals made this fact the basis of an interpellation in the Reichstag, the government defended the proceeding. The "Kreuzzeitung," the organ of the Feudalist party, said (Oct. 1, 1892) that the charges brought against the Talmud in the anti-Semitic literature ought to suggest to the government the necessity of examining the text-books of the Jewish religion (Strack, "Die Juden: Dürfen sie Verbrecher von Religionswegen genannt werden?" Berlin, 1893). The matter was brought up in the Prussian Diet (Feb. 13, 1893), and Minister Bosse replied to the effect that he had already ordered the revision of these books, but could say no more for the present, the reports not having been handed to him.

The Blood Accusation made its appearance in connection with the murder of a child in Xanten, June 29, 1891. The government did all in its power to suppress the rumor that the local *shoḥet* (Jewish butcher) had committed the murder; and the accused was acquitted. But other events showed that the government displayed much forbearance in cases of anti-Semitic offenses. Referring to a trial of a society of gamblers, in which some Jews were implicated, the "Tägliche Rundschau" (March 3, 1893) said: "This state of affairs shows that all Jewry should either be forced back to the conditions of the eighteenth century or be expelled from the country." Some Jews brought a libel-suit against the paper, as the law, in such cases, gives every member of a libeled community the right to prosecute. The court, however, decided (Oct. 15, 1893) that the article did not attack all Jews, but only those who had been guilty of the actions which the writer characterized as revolting.

Among other instances of an anti-Semitic tendency may be mentioned the avowed practise of the Hessian minister of justice, Dittmar, to appoint no Jews as judges—the "Frankfurter Zeitung" (Oct., 1899) had made this the subject of an article, accusing the minister of a violation of the constitution; a decision of the Bavarian minister of the interior that Jews could not hold any position in schools frequented by Christian children ("Mittheilungen aus dem Verein zur Abwehr des Antisemitismus," 1899, p. 357); and a decision of the court in Glogau, May 12, 1899, dismissing the case against Count Pückler-Muskau, who had said in a public address that it was time to drive the "Judenbande" (Jew-gang) out of the country.

In Germany a society for the protection of the rights of the Jews, "Verein zur Abwehr des Antisemitismus," formed in 1891 by some of the most prominent German authors, scientists, and statesmen, has so far had more moral than practical results.

Hungary.

When, in the Hungarian Parliament, Victor de Istóczi, a deputy unknown up to that time, made a motion (July 12, 1878) that the government should force Turkey to give up Palestine and should deport there all the Jews of Hungary, it was considered a joke. Even as late as Nov. 27, 1880, the Hungarian minister Trefort could declare in Parliament: "Our country shall never witness a spectacle similar to that presented in Germany." Events soon proved that his optimism was not justified. Anti-Semitism was favored both by the Slavonic nationalities, which were oppressed by the government, and by the Clerical party, which saw the time approaching when the government would have to abrogate the canonical law, which was still recognized in the marriage legislation. Seventeen members of the House of Deputies made, Feb. 18, 1882, a motion to repeal the act which had emancipated the Jews. The disappearance of Esther Solymosi in Tisza-Eszlár, April 1, 1882, aroused such an excitement that the Jewish deputy Morris Wahrmann and Istóczi came to blows in Parliament (June 5, 1882). In many places riots occurred; Jews were mobbed, and in some instances were killed or seriously wounded. Such riots occurred in Presburg, Sept. 28, 1882; in Budapest, Oedenburg, and other places (Aug. 8, 1883), after the discharge of the Jews accused of the murder of Esther Solymosi; the most serious of all, in Zala-Egerszeg, on Aug. 23, 1883. A petition to the Parliament, asking that the act for the emancipation of the Jews be repealed, received only a few votes; even the independents who were in opposition to the government voted against it (Jan. 20, 1883).

The Esther Solymosi Case.

Not long afterward (Oct., 1883) an anti-Semitic party was organized in Parliament. It consisted of four members, Ónody, Széll, Istóczi, and Simonyi. Its platform demanded the restriction of economic liberty, withdrawal of the right to sign promissory notes, and exclusion of the Jews from the liquor trade. The elections of 1884 increased the number of anti-Semites to 17, but the government, in the address from the throne at the opening of the session, Sept. 9, 1884, declared itself strongly against the anti-Semites. The minister-president, Tisza, lost no opportunity to define his position during the debate on the address. The year 1884 marked the height of the anti-Semitic movement; and with the new ecclesiastic legislation of 1894, which abrogated the privileged position of the Roman Catholic Church and recognized the Hebrew faith, Anti-Semitism in Hungary received a crushing blow.

Austria.

The defeat of Austria in 1866 and its financial condition, which bordered on bankruptcy, had brought the German-Liberal element to the front. The consequence of this change of policy was the promulgation of the Constitution (Staatsgrundgesetze) of 1867, which declared the principle of religious liberty. What might be called Anti-Semitism came from the ranks of those who were opposed to the principle of religious liberty and political equality, or could be heard among those who, while liberal in principle, drew the line of distinction in the social life. Thus Anton von Schmerling, a former minister-president in the Austrian House of Lords (1880), urged the necessity of instruction in German in schools in order to overcome the advantageous position of the Jewish soldiers in the regiments of Galicia, who, owing to their knowledge of the German language, had better chances of promotion to the position of non-commissioned officers; he added, "Personally, I am not in sympathy with the Jews." The serious financial crisis of 1873, which struck Austria severely, produced there as in Germany ill-feeling against the stock-exchange and consequently against Liberalism in general, and against the Jews in particular. This ill-feeling became a political factor when, with the formation of the Taaffe ministry (1879), the Czechs, who had hitherto refused to acknowledge the constitution of 1867, sent their delegates to the Reichsrath. As the German-Liberal element (Verfassungspartei) opposed the ministry, the latter formed a majority out of the Slavic element, combined with the German Clericals. Without being anti-Semitic the ministry tried to win the favor of the majority by some concessions to the Reactionary program. This was the tendency of the school-law, passed in 1883, which required that the principal of every public school should belong to the same church to which the majority of the school-children belonged. This law debarred the Jews from all teaching positions in country districts, and served to deter Jewish students from entering the normal schools. The law made an exception in favor of Galicia, where, in the cities, the Jews were often in the majority. Restrictions upon peddling and upon the clothing trade were further concessions to the political parties demanding a revision of the constitution in a reactionary sense.

Georg von Schönerer.

The first one, however, to make Anti-Semitism a political program was Georg von Schönerer, an ambitious politician and millionaire, who had inherited his wealth from his father, a railroad contractor in the employ of the Rothschilds. He renounced the anti-German policy of Count Taaffe, and, together with two other members of the Reichsrath, Schöffel and Fürnkranz, formed the nucleus of an anti-Semitic party. In the Diet of Lower Austria he demanded (Oct. 3, 1882) a legal solution of the Jewish question, threatening that otherwise the people would take the law in their own hands. Previously (May 11, 1882) he had brought into the Reichsrath a petition against the immigration of Russian Jews, and had found the support of 22 members. He obtained still more ardent support among the students of the university of Vienna; and the largest of the students' societies, the Deutsche Lesehalle, was responsible for turbulent meetings at which the Jews were insulted. The larger and more respectable element of the population did not participate in this movement; nor did the government as yet tolerate its excesses. Meetings, at which violent speeches were delivered, were promptly dissolved by the police; and inflammatory pamphlets were suppressed. The most prominent citizens in Vienna and of other large cities, following the example of Berlin and Paris, formed committees for the purpose of assisting the Jewish refugees from Russia. The affair of Tisza-Eszlár also exercised its influence upon the conditions in Austria. Rohling, who in 1871 as professor in the Catholic Academy of Münster had published his notorious pamphlet, "Der Talmudjude," had in the meantime been called to Prague, where he continued his agitation, adding to his former charges against rabbinical literature the odious one that the Talmud makes it the duty of the Jews to use the blood of Christians in certain religious rites (Rohling, "Die Polemik und das Menschenopfer des Rabbinismus," Paderborn, 1883; "Meine Antworten an die Rabbinen oder Fünf Briefe über den Talmudismus und das Blutritual der Juden," Prague, 1883). This agitation was taken up in the Reichsrath, where the Polish deputy

Merunovicz made a motion, January, 1883, to have the Talmud translated under the supervision of the government.

Liechtenstein and Lueger.

The elections to the Reichsrath of 1884 brought several anti-Semitic candidates into the political arena. Even in Vienna, hitherto a stronghold of Liberalism, one candidate, Pattai, presented himself to the electors on the basis of an anti-Semitic platform, but he was defeated.. The municipal council demonstrated its liberalism through a congratulatory message sent to Sir Moses Montefiore upon his hundredth birthday (Oct. 24, 1884). But Anti-Semitism made constant progress; and in 1891 the elections to the Reichsrath brought thirteen anti-Semitic members, who were divided into three groups, the Ultra-Nationals, with Schönerer at their head, who were in favor of annexation of the German part of Austria to Germany; the Loyal Austrians, led by Pattai; and the Clericals, under Prince Liechtenstein and Schneider. Similarly, the provincial Diets, especially that of Lower Austria, showed an increased number of anti-Semitic members. The debates in these bodies, the speeches in public meetings, the pamphlets and newspapers indulged in language which breathed a violence perhaps only equaled in the literature of the Jacobins during the French Revolution. Schneider, in the Diet of Lower Austria, said that the government should offer a premium for the shooting of Jews similar to that offered for shooting wolves. Lueger, who was the leader of the Clerical anti-Semites, admonished the various factions of his followers to amalgamate, saying that it was not worth while to quarrel over such minor details as to whether the Jews should be hanged or beheaded. Gregorig said in the Diet of Lower Austria, "These are not human beings; they are Jews," and Edward Suess, the famous geologist, and Liberal leader in the Reichsrath, was prompted to the remark, April, 1894: "What has been spoken, written, and done against the Jewish people during the last few years has been in flagrant violation not only of our Constitution, but of the principles of human justice and Christianity."

The Polna Affair.

The worst part of the drama, which has not yet come to an end, began when the anti-Semites in 1895 succeeded in electing a majority to the municipal council of Vienna, and when Lueger, after the government had twice refused to confirm him, was made burgomaster in 1897. The elections to the Reichsrath of 1897, which were held on the basis of a new law enlarging the franchise, brought losses to the Liberals and gains to the anti-Semites of the different shades, notably to the Christian-Socialists. The weakness of the government, manifested in the frequent changes of ministries, encouraged the turbulent element, and riots against the Jews occurred, among which those at Prague, December, 1897; Nachod, April, 1899, and Holleschau, October, 1899, were very serious ones, resulting in bloodshed. The murder of Agnes Hruza in Polna, Bohemia, March 29, 1899, caused great excitement. The charge of ritual murder was revived; and a Jew named Hülsner was indicted and found guilty by a jury. Hülsner was retried and again found guilty Nov. 14, 1900 (see Polna Affair).

France.

In the meantime Anti-Semitism was asserting itself with great vehemence in France. Public sentiment with regard to the Jews had indeed undergone a great change since the death of Crémieux. When he died, the French Chamber of Deputies, by 344 votes to 91, passed a resolution (Feb. 2, 1880) to have him buried at the public expense. In a lecture "On the Jews as a Race and as a Religion," delivered Jan. 27, 1883, by Ernest Renan, who had been instrumental in popularizing the ethnical theory of Semitism, he said: "Let us be glad that these theories, so interesting for the historian and the ethnographer, have no practical meaning in France." In the same year the essayist Victor Cherbuliez in speaking of the conditions in Germany said: "We experience some difficulty in France in realizing that there is a Jewish question in Germany; that this question should excite the soundest minds, and should furnish material for virulent polemics. Thank heaven, there are plenty of things settled forever in France, as to which one would try in vain to reopen discussion" (G. Valbert, pseudonym for Cherbuliez: "Hommes et Choses du Temps Présent," p. 76, Paris, 1883). The publication of Édouard Drumont's book, "La France Juive" (1886), proved the falsity of all this. But the change in public opinion was not so surprising as it may at first sight seem. The Republican party always considered Clericalism its enemy. Gambetta, who had coined the battle-cry, "Le cléricalisme, voilà l'ennemi," led a crusade against the Catholic Church. While he was unsuccessful in his attempt to carry an amendment to the school law of 1880, which would have forbidden Jesuits to engage in educational work, he and his friends were nevertheless able to pass a law which ordered the expulsion of certain monastic orders. This law, by which 261 monasteries were closed and 4,350 monks and nuns were rendered homeless, created a great deal of bitterness against the dominant party of freethinkers. The school laws of 1881 ordering gratuitous tuition were a blow against the schools maintained by the friars. The freethinkers were denounced as Jews in disguise. In 1881 a weekly paper, called "L'Anti-Juif," was founded in Paris. When Baron Rothschild clothed poor school-children his act was denounced as that of a Jewish propaganda. The agitation in favor of a bill permitting divorce, which the Code Napoléon had prohibited, created great commotion within the ranks of the Church, and was used as a weapon against the Jews, because the chief agitator for it, Naquet, was a Jew. Bishop Freppel of Orléans called the bill in the chamber a "Semitic law" (August, 1884).

Drumont's "La France Juive."

The elections of 1885 nearly brought a majority of Monarchists into the Chamber. This party had seized the opportunity to denounce the persecuting spirit of atheism. A riot in Château-Villaine, where the prefect had ordered the closing of a chapel in a manufactory, was made the subject of an interpellation in the Chamber (April 13, 1886), and during this heated discussion Drumont's book, "La France Juive," already referred to, was published. The phenomenal success of the book showed that the great masses of the population shared the view of the author; namely, that the Jews were the cause of all the misfortunes that had befallen France. F. Brunetière, editor of the "Revue des Deux Mondes," himself, as he confesses, not prejudiced in favor of the Jews, sums up Drumont's book as follows: "If the France of M. Grévy, as everybody will admit, does not resemble that of Louis XIV., and still less that of St. Louis, the fault, or rather the crime, lies with the Jews. They are as guilty for what they have done as for what they have left undone." Brunetière accuses Drumont of "being blinded by hatred" and speaks of his "sereine audace de fanatisme" ("Revue des Deux Mondes," 1886, pp. 75, 693). Other books by Drumont followed in rapid succession; and his paper, "La Libre Parole," soon became a very influential and widely read journal.

The Dreyfus Affair.

Political scandals, and especially the venality of an incredibly large number of politicians and journalists, brought France to the verge of civil war. The collapse of the Panama Canal Company, and the publication of the scandals connected with it, were a new source of danger to the republic. In that colossal swindle several Jews were prominent; and although they were merely the agents, the venal politicians being the real culprits, the fact of their participation, constantly reiterated by the clerical and the anti-Semitic press, fomented the hatred against the Jews. The anti-Semitic agitators had especially protested bitterly against the Jews holding administrative offices or commissions in the army. In 1892 Captain Mayer was killed in a duel which he fought with Marquis de Morès, one of the fiercest leaders in the anti-Semitic movement. In 1895 the DREYFUS AFFAIR brought the excitement to a dangerous pitch. In Algeria the demonstrations led to bloodshed. The anti-Semites elected Max Régis, one of the most rabid Jew-haters, as mayor of Algiers; and although the government deposed him, Anti-Semitism still raged in Algeria. During the revision of the Dreyfus trial in 1899, Guérin, the editor of "L'Anti-Juif," defied the authorities for a time by barricading himself in a house and refusing to yield to the law. While the fear lest an outbreak might endanger the success of the Exposition of 1900 served to subdue political passion, the municipal elections in Paris and in Algeria, in the month of May, 1900, resulted in a victory for the Nationalists, who, being a composite of Clerical Monarchists and opponents of the government in power, are mainly cemented together by their common Anti-Semitism.

Russia.

In Russia the effect of the assassination of Alexander II. (March 13, 1881) was the strengthening of reactionary tendencies. The late emperor had in various ways tried to mitigate the despotic form of government which was the traditional policy of the empire. The restrictive laws against the Jews were to some extent moderated by exceptions and otherwise were less rigorously enforced. Alexander III., haunted by the specter of Nihilism, gave himself entirely into the hands of the Slavophiles, whose policy was that of unrestricted tyranny. POBYEDONOSTZEV, head of the Holy Synod; Count IGNATIEV, AKSAKOV, and such men possessed his unbounded confidence. An improvement of the sad condition of the Jews was part of the Liberal program, and, consequently, could not be countenanced. Soon after the accession of the new emperor, serious riots broke out (April 27, 1881) in Elizabethgrad, in the southern part of the empire, and in Kiev (May 5). Property of immense value was destroyed; Jews were expelled from several cities; and a considerable number were killed or seriously injured. Similar scenes occurred in Warsaw in December, 1881. More than two thousand families were made homeless, and property estimated at from 767,000 to 1,119,000 rubles in value was destroyed. Imperial ukases of Aug. 22 and Oct. 19, 1881, restricted the Jews' right of residence to the towns of the so-called Pale of Settlement, and so produced a pale within the Pale; prohibited the sale of liquor; the right to hold land; and limited the number of Jewish students in colleges and universities.

The fanatic population showed a full perception of the intentions of the government. Serious riots were of almost regular occurrence—at Rostov on the Don, May 22, 1883; in Nijni-Novgorod, June 7, 1884; and recently in Nikolaiev, April, 1899. The expulsions continued, and assumed serious proportions in 1891 and 1892; so that President Harrison, in his message to Congress, spoke of the concern created by these measures in the United States.

The death of Alexander III. (Nov. 1, 1894) brought no decided change in the status of the Jews; and while persecutions have abated, the restrictive laws are still in force. One result of these conditions has been the scheme for settling the Jews in Palestine, advocated by Laurence Oliphant, and subsequently taken up by the ZIONISTS; and a similar attempt by Baron de Hirsch to found homesteads in Argentina for the Jewish refugees. Large numbers of them settled in England, in the United States, and in South Africa.

Rumania.

Ever since the dethronement of Prince Cusa of Rumania in 1866, that country has been the theater of serious outbreaks of mob violence against the Jews. The persecutions of December, 1871, caused by the trial of a Jew accused of buying sacred vessels stolen from a church, evoked protests in almost every civilized country. When Rumania's independence was recognized by the Congress of Berlin (July 1, 1878), it was on condition that the constitution of the new country should grant equal rights to all citizens, regardless of creed. Rumania submitted, but did not fulfil its obligation, and the Rumanian government declared all Jews to be aliens and made the naturalization of foreigners dependent upon a special act of the legislature. Naturalization was granted in but very few instances, and the lot of the Jews in Rumania grew steadily worse. They were the victims of frequent mob-violence (as in Bucharest, Dec. 12, 1897, and in Jassy, May 28, 1899), and their assailants went unpunished when brought before the courts. As in Russia, Jews were expelled from villages, and in many other ways restricted in their economic activity; they were debarred from the public schools, and at present (1901) the government is putting every imaginable obstacle in the way of the Jewish schools with the evident object of preventing the Jews from improving their condition. Large numbers of emigrants left the country during 1900, notwithstanding the accession to power of a more liberally minded premier, Minister Carp.

Other Countries.

This article is limited by the definition of Anti-Semitism as the opposition to Jews on the ground of their ethnical inferiority. Therefore it is unnecessary to refer to the condition of the Jews in countries like Persia and Morocco, where religious fanaticism needs no scientific pretext. However, the blood accusations of Corfu, April, 1891, resulting from the murder of a Jewish child, and the subsequent riots may be referred to in this sketch, but will be treated more appropriately under BLOOD ACCUSATION. Another instance of Anti-Semitism is given by the enactments which have been passed prohibiting the killing of animals according to the Jewish rite in Saxony, by an order of the minister of the interior March 23, 1893, and in Switzerland by a referendum, Aug. 20, 1893.

While it may be stated that Anti-Semitism as such does not exist either in England or in the United States, still amid the general class distinctions maintained in social intercourse in those countries, a feeling against the Jews manifests itself in social discriminations. A prominent expounder of the anti-Semitic theories in the English-speaking world, and, according to Lucien Wolf ("A Jewish View of the Anti-Jewish Agitation," in "Nineteenth Century," 1881, ix. 338-357), their originator, is Prof. Goldwin Smith, of Toronto. His charges against the Jews are the same that are found in the works of the German authors on the subject. He accuses them of tribal exclusiveness and cosmopolitanism; he calls them intruders and parasites, and an unassociable race. He looks upon commerce as the only motive of their activity, and says of Disraeli: "A Jewish statesman got up jingoism much as he would get up a speculative mania for a commercial purpose" (Goldwin Smith, "The United Kingdom," i. 46, 108, 137, 185, New York, 1899; "The Jewish Question" in "Nineteenth Century," 1881, pp. 10, 494–515; "Can Jews be Patriots?" *ib.* ix. 875–887).

Pettiness of Charges by Anti-Semites.

It can not, however, be denied by any fair-minded person that some of the anti-Semitic charges are monstrously absurd, as when Ahlwardt said that Sanitätsrath Lewin—who happened to be near the place where Emperor William was shot by Nobiling—had been advised by the Alliance Israélite Universelle of the attempt to assassinate the emperor; or the story that Crémieux had offered a prize of one million francs for the emperor's head. On the one hand the accusation was spread that the firm of Ludwig Löwe had furnished bad guns, because the Alliance wished to see Germany defeated; on the other hand, Captain Dreyfus was accused of having betrayed army secrets to Germany, because the Jews desired that country to be victorious. A German author has even accused the Jews of having caused the stylistic carelessness of modern German writers (G. Wustmann: "Allerhand Sprachdummheiten," Leipsic, 1891). Anti-Semitic pamphlets and journals have constantly published circulars purporting to be issued by the Alliance, which were forgeries, and they have fabricated a letter of the German ambassador to Paris—Count von Wimpfen, who committed suicide Dec. 24, 1882—in which he had charged Baron Hirsch with being the cause of his misfortune; whereas, actually, the unfortunate man had asked the baron as his best friend to take care of his family. They have untiringly published an alleged address of an English chief rabbi, Readclif, in which the Jews were admonished to put themselves in the possession of all the money of the world, so that God's promises to Abraham should be fulfilled. The source of this alleged address was a novel, "Gaeta, Düppel, Warsaw," by Hermann Goedsche, who had been dismissed from the Prussian postal service because of forgeries that he had committed, and who wrote under the pseudonym, "Sir John Ratcliffe." So whether right or wrong the anti-Semitic cause was only too frequently advocated by such methods.

Bibliography: The German weekly *Mittheilungen aus dem Verein zur Abwehr des Antisemitismus*, Berlin, since 1891, is a repertory of the history of Anti-Semitism. The general literature on the subject is so immense that it is impossible to give more than a list of the most prominent works: A bibliography up to 1885 was given by Joseph Jacobs, *The Jewish Question*, London, 1885, supplemented by I. Loeb in the *Rev. Ét. Juives* for the same year; Glagau, *Der Börsen- und Gründungsschwindel in Berlin*, 1877; the second part under the title, *Der Börsen- und Gründungsschwindel in Deutschland*, Berlin, 1877; H. von Treitschke, *Ein Wort über Unser Judenthum*, Berlin, 1880; W. Marr, *Der Sieg des Judenthums über das Germanenthum*. 12th ed., Bern, 1879; E. Dühring, *Die Judenfrage als Racen-, Sitten- und Culturfrage*, Carlsruhe and Leipsic, 1881; Ed. von Hartmann, *Das Judenthum in Gegenwart und Zukunft*, Leipsic, 1885; Ad. Stöcker, *Das Moderne Judenthum*, Berlin, 1880; *Christlich-Social*, Berlin, 1890; H. Ahlwardt, *Der Verzweiflungskampf der Arischen Völker mit dem Judenthum*, Berlin, 1890; *Judenflinten*, part i., Dresden, 1892; A. Wahrmund, *Das Gesetz des Nomadenthums und die Heutige Judenherrschaft*, Carlsruhe, 1887; Liebermann von Sonnenberg, *Beiträge zur Gesch. der Antisem. Bewegung*, 1885; A. Rohling, *Der Talmudjude*, Münster, 1871; Dr. Justus (A. Brimann), *Judenspiegel*, Paderborn, 1883; Ed. Drumont, *La France Juive*, Paris, 1886; *La Dernière Bataille*, Paris, 1889; *Le Testament d'un Antisémite*, Paris, 1891; P. Constant, *Les Juifs devant l'Église et l'Histoire*, Paris, 1897; Sir Richard F. Burton, *The Jew, the Gipsy, and El Islam*, Chicago and New York, 1898. Of the apologetic literature may be noted: *Antisemitenspiegel. Der Antisemitismus im Lichte des Christenthums, des Rechts und der Moral*, Danzig, 1892 (Eng. trans. by Mrs. Hellmann); A. Leroy-Beaulieu, *Israel chez les Nations*, Paris, 1893; Th. Mommsen, *Auch Ein Wort über Unser Judenthum*, Berlin, 1880; Fr. Delitzsch, *Schachmatt den Blutlügnern Rohling und Justus*, Erlangen, 1883; B. Lazare, *Contre l'Antisémitisme*, Paris, 1896; N. Chmerkine, *Les Conséquences de l'Antisémitisme en Russie*, Paris, 1897; Schrattenholz, *Der Antisemiten Hammer*, 1892; further literature in the *Theologischer Jahresbericht*, which is published annually by Schwetschke in Brunswick.

ANTI-SHABBETHIANS. See Shabbethai Ẓebi.

ANTISLAVERY MOVEMENT IN AMERICA: The institution of negro slavery in America has been traced back to the suggestion of a pillar of the Church, Las Casas, who proposed it as a substitute for the enslavement of the American Indians, since the latter were being rapidly exterminated by Spanish oppression. Experience showed that the negroes were better able to endure the hardships of slavery. Given the institution, it is not hard to account for the fact that so receptive and assimilative a people as the Jews should have adopted it from the people among whom they were living. Thus the Maranos, who settled in the New World soon after its discovery, held slaves, and numerous references are made to Jewish slaveholders in Brazil, Mexico, the West Indies, New York, and New England, long before and down to the American Revolution. There are several early references even to American-Jewish slave-dealers. The growth of democracy and changed economic conditions had gradually put an end to slavery in the North soon after the beginning of the nineteenth century; but in the South slavery remained common, among Jews as well as among others. Shortly before the Civil War there were among the aggressive Southern sympathizers some Jews who used, as conclusive proof that it was not wrong to keep slaves, the alleged fact that noble philanthropists like Judah Touro sanctioned slavery. The whole argument, in reality, rested on a false assumption regarding Touro's attitude toward the institution. He evinced his antislavery views in no uncertain manner; for the negroes who waited upon him in the house of the Shepards—with whom he lived for forty years—were all emancipated by his aid and supplied with the means of establishing themselves; and the only slave he personally possessed he trained to business, then emancipated, furnishing him with money and valuable advice.

Jewish Slave-holders.

Anti-slavery Jews.

As a body, the Jews in America took no action either for or against the slavery question, though individual Jews were numbered among members of American abolition societies in the early forties, and the American and Foreign Anti-Slavery Society in its report, in 1853, noted that some Jews in the Southern states "have refused to have any right of property in man, or even to have any slaves about them," and that the cruel persecutions they themselves had been subjected to tended to make them friends of universal freedom. But such tendencies were at least partially checked by the fact that the Oriental customs and antecedents of the Jew did not incline to make him per se an enemy of slavery, that certain precepts in the Maimonidean code of laws were specifically antagonistic to the emancipation of non-Jewish slaves, and that pecuniary and political considerations frequently dictated an attitude friendly toward slavery among Jewish citizens. Appeals to religion and

Einhorn Against, Raphall for, Slavery.

morality, however, could not fail to produce their effect, and Jews as well as people of other denominations were destined to contribute greatly to the development of antislavery sentiment in America, in spite of the pronounced repugnance of a number to "carrying politics into the pulpit." Dr. David Einhorn, for instance, shortly after he arrived in Baltimore as minister of the Har Sinai congregation, took strong ground against slavery, first in his monthly "Sinai," in 1856, and afterward in the pulpit. He contended that if it were true, as asserted, that the Union rested on slavery, then with so thoroughly immoral a basis it would be neither capable of surviving nor fit to survive; and he pointed out that the spirit of Judaism, as opposed to its letter, demanded the abolition of slavery. An address delivered by Dr. Morris J. Raphall, a New York rabbi (Jan. 4, 1861), on the national fast-day designated by the President, aroused much attention and comment; for in it he contended on behalf of Judaism that slavery had the divine sanction of the God of Israel, and that only ignorant babblers invoked the alleged "higher law" against slavery, since there could be no higher law than the Bible, and this ordained slavery. Numerous antislavery leaders immediately protested against these views on behalf of Judaism, and refuted Raphall's arguments. Dr. Einhorn attacked them so strongly and unmistakably that he aroused the ire of the proslavery leaders, and his life was in danger during the Baltimore riots in April, 1861. He was forced to flee from Baltimore, and, rather than permit himself to be muzzled, he surrendered his position. Other Jewish pulpit-leaders also took strong ground on the subject, especially after the outbreak of the Civil War. This was particularly true of Benjamin Felsenthal and Liebman Adler of Chicago, Sabato Morais of Philadelphia, Benjamin Szold of Baltimore, and Samuel M. Isaacs of New York.

Heilprin, Pinner, Benjamin.

For a number of years before the war, Jewish laymen as individuals had been active in the same cause. Chief among these was Michael Heilprin, the distinguished Jewish scholar. He had taken an active part in the course of antislavery meetings in Philadelphia a few years before the war, and was roused to immediate action by Dr. Raphall's sermon. On Jan. 16, 1861, he contributed a fiery denunciation and an exhaustive scholarly refutation of Raphall's views to the "New York Tribune," which at once recognized the article editorially. Thus indorsed, it commanded the widest attention; and owing to this vehement but convincing repudiation of alleged proslavery views, Heilprin succeeded in arousing the public in a more marked degree than any other American-Jewish antislavery champion. During the five years preceding this time, Moritz Pinner had also done yeoman's work in the same cause by circulating antislavery literature and developing antislavery propaganda. In 1857 he started an abolitionist newspaper in Kansas City, a proslavery region; and was an antislavery delegate to the state and national Republican conventions of 1860, which latter included other Jewish members. In Chicago as early as 1853 Jews were active in liberating an imprisoned fugitive slave, and soon after in securing German recruits for the Republican party in the West. Nor did the South, which produced such brilliant Jewish workers in the proslavery cause as Judah P. Benjamin, fail to contribute a fair quota also of Jewish antislavery workers, in some instances as early as 1849. Numerous other examples of Jewish antislavery activity in America are at hand. In the West Indies some Jewish antislavery sympathizers were to be found early in the nineteenth century; others actually devised efficient methods for rendering emancipated slaves self-supporting and independent. In the United States these various tendencies which developed and aroused a sentiment in favor of the antislavery movement among Jewish residents are responsible in a large degree for the enormous number of Jewish soldiers who enlisted in the Union army during the Civil War.

M. J. K.

ANTISLAVERY MOVEMENT AND THE JEWS: The movement against slavery is one of the most important efforts in the development of civilization; and the relation of the Jews to this subject merits special attention.

J. K. Ingram, in his valuable work on the "History of Slavery," has well pointed out that "our great horror for some aspects of slavery must not prevent us from recognizing that institution as a necessary step in social progress," by the immense advance involved in the substitution of servitude for the immolation of captives; by making possible the system of incorporation by conquest and by developing regular and sustained industrial life. Each of these advantages was thereby realized in a marked degree in Jewish life. But it is important also to observe that among the Hebrews the evils of the institution were greatly minimized in theory and in practise, which Ingram refers to when he states that "when we consider its moral effects, whilst endeavoring to the utmost to avoid exaggeration, we must yet pronounce its influence to have been profoundly detrimental." The pronounced manner in which the evils of the system were minimized and the hardships of the institution were ameliorated by Jewish law more clearly appears in the article on Slavery. Such amelioration is naturally to be anticipated among a people believing in the common descent of all human beings and in the brotherhood of man.

While it is important to note the precepts enjoining kind and humane treatment of both Jewish and Gentile slaves which are found in Jewish law, we must not forget that the feeling of racial affinity, and the idea that the perpetual physical subserviency of any one Jew involved a partial denial of the sovereignty of God, tended to restrict especially the enslavement of Jews. The tendency to abolish slavery among Jews, even in early times, is clearly indicated by the following customs: Unless a Hebrew slave consented to prolong his term of service, it expired at the beginning of the seventh year; a general emancipation of slaves took place in the fiftieth or jubilee year; on restoring the sum paid for his purchase or ransom, a slave received a certificate of manumission; on the death of a master without heirs the slaves were in certain cases set free; sometimes they were tacitly emancipated, as when they were numbered among the free Hebrews selected to participate in religious service.

The Bible, indeed, records the emancipation of all Hebrew slaves in King Zedekiah's time, at the instance of the prophet Jeremiah (Jer. xxxiv. 8), during the first siege of Jerusalem by Nebuchadnezzar; but after the withdrawal of that conqueror, the more powerful masters again forced their emancipated slaves into servitude. After the downfall of the first monarchy the right to hold a fellow Hebrew as a slave was regarded as at an end, although an attempt was made to reintroduce the enslavement of Hebrews

Emancipation in the Bible.

immediately after the restoration. Nehemiah, however, successfully resisted the endeavor (Neh. v. 5–10). Herod aroused much indignation by reestablishing the old law under which a Jew could be sold into slavery for crime; and, as the people refused to purchase such Hebrew slaves, he overstepped the old law by selling them into foreign countries, to the exasperation of the people. After the destruction of the first monarchy, therefore, Hebrews, generally speaking, were not held as slaves by fellow Hebrews, though non-Jewish slaves continued to be common possessions among the Jews. But prior to the common era the principle of the abolition of all slavery, whether of Jews or of non-Jews, was adopted in theory and in practise among the Essenes. Thus, we learn from Philo (and similar testimony is furnished by Josephus): "And they [the Essenes] do not use the ministrations of slaves, looking upon the possession of servants or slaves to be a thing absolutely and wholly contrary to nature; for nature hath created all men free; but the injustice and covetousness of some men who prefer inequality, that cause of all evil, having subdued some, have given to the more powerful authority over those who are weaker" (Philo, "On a Contemplative Life," ix.). It is interesting to observe that the French statesman Isaac Adolphe Crémieux, in an address before the general International Antislavery Congress held in London (1840), proudly said on this point:

> "I feel great pleasure in joining this convention, because I am a descendant of those Hebrews who were the first to proclaim the abolition of slavery; and I this day only repeat what the Jews have always admitted in principle. Indeed, it is not without interest that I now recall to your recollection that it was the sect of the Essenes which first declared slavery to be a crime, and that it was, to use the expression of Josephus, a perpetual cause of perturbation for the state. In this assembly this must entitle them to the highest glory."

The dispersion of the Jewish race among the nations resulted in checking for a time the Antislavery Movement which Judaism had been developing. Both Greece and Rome familiarized the Jews, as never before, with slavery as a gigantic and apparently indispensable system; and the Jews soon learned in Rome to do as the Romans did. Roman inroads among the barbarians resulted in the enslavement of an ever-increasing number of captives; and it was, in fact, from such treatment of Slavonic captives that the term "slave" was derived. In this, as in other fields of commerce, Jews became conspicuous during the later eras of the Roman empire; and it is therefore not surprising to find numerous explicit references to Jews as slave-traders and possessors of slaves. Particularly in the history of Rome and Spain are references encountered to Jewish slave-dealers and slave-owners prior to 800 of the common era. Charlemagne and Louis the Pious seem to have specifically sanctioned such conditions. These dealings brought with them their own punishment for the Jews, however; for it is to Jewish relations to slavery that one can trace a number of outbreaks against the Jews on the part of the common Church and the Christian state of the early Middle Ages. There was the obvious danger that Christian slaves in the households of Jewish masters were liable to become converts to Judaism; and so Emperor Constantine, the Theodosian code, Pope Gregory I., and various other Church and secular authorities, forbade such conversions, and thereafter prohibited the acquisition or even the retention of Christian slaves by Jews. These measures were directed not against slavery generally, but more and more against the enslavement of Christians. It was not till about 1200 that the Church took strong ground against slavery generally. Of course the Jews abandoned slavery as it came to be abandoned by law or custom in the various countries where they were living. Jewish law seems throughout to have assured quite generally humane treatment for slaves among Jewish possessors.

Ransom of Jewish Slaves in the Middle Ages.

The movement in favor of the abolition of the enslavement of Jews became marked in character in the time preceding the commencement of the common era. When the Jews were living in a land not their own the feeling displayed itself in the establishment of societies and funds for the ransom of Jewish slaves. Israel Abrahams, in his "Jewish Life in the Middle Ages," p. 96, says, "that Jews from the earliest periods regarded the duty of ransoming Jewish captives as one of their most pressing obligations." The payment of money for this purpose was always made a first charge upon the synagogal funds. Among Spanish Jews such ransoms were taken quite as a matter of course. Rabbi Moses ben Ḥanok in the tenth century was ransomed by the Cordovan Jews; and somewhat later Don Isaac Abravanel devoted much money and labor to redeeming large numbers of Jewish slaves. Numerous other instances, even to the present day, are recorded in every quarter of the globe in which Jews have settled. In fact, the generosity and sense of obligation of Jews in this respect became so well known that Jews were captured and enslaved for the sake of securing these ransoms. Traces are found, too, of purchases by Jews during the Dark Ages of heathen slaves solely for the purpose of converting them to Judaism and liberating them.

Abolitionist Movement in the Nineteenth Century.

When African slavery was introduced in America, early in the sixteenth century, we again find Spanish, Portuguese, and Dutch Jews engaged in the slave traffic, and holding slaves in common with their non-Jewish brethren. In view of the historical attitude of Judaism to slavery, we are not surprised, however, to learn that Jews, like Crémieux, logically and zealously threw themselves as such into the antislavery struggle. In the case of Crémieux himself, we find that for many years he had been an earnest, impassioned, and indefatigable abolitionist before it became his privilege, as a member of the French Provisional Government (1848), to announce, on behalf of the Cabinet, the abolition of slavery throughout the French possessions.

In England there were Jewish members of the abolition societies, and Granville Sharp, in his "Law of Retribution," and Wilberforce, in his "A Letter on the Abolition of the Slave Trade," freely employed Jewish teachings as arguments against slavery. When at the outbreak of the American Civil War it became important for the Jewish pulpit and press to give expression to Jewish views on the subject, men like Rabbi G. Gottheil of Manchester, and Dr. L. Philippson of Bonn and Magdeburg, forcibly combated the view announced by Southern sympathizers, that Judaism regarded slavery as divinely ordained. Rabbi M. Mielziner's "Die Verhältnisse der Sklaverei bei den Alten Hebräern," published in German at Copenhagen and Leipsic in 1859, was rapidly translated and published in the United States in many quarters, and rendered valuable service in the same direction. Similarly, in Germany, Berthold Auerbach in his work, "Das Landhaus am Rhein," closely imitated Mrs. Stowe in arousing public opinion against slavery and the slave trade through the medium of fiction; and Heinrich

Heine did not hesitate to avow the fact that it was the establishment of the slave system in America that induced him to give up his intention, formed in his early years, of migrating to the United States.

ANTI-TALMUDISTS. See FRANKISTS, KARAITES.

Refused Admission to Judaism.

ANTOINE, NICOLAS: French-Christian theologian who became converted to Judaism; born of Catholic parents in 1602 or 1603 at Briey, a small town of Lorraine; suffered martyrdom at the stake in Geneva, April 20, 1632. For five years he attended the college at Luxemburg, and was then sent to Pont-à-Mousson, Treves, and Cologne for higher instruction under the Jesuits. Their influence, however, seems to have been nil; for when Antoine returned to Briey, at the age of twenty, he was no longer an ardent Catholic. The doctrines of Protestantism attracted him, and he allowed himself to be converted by the fervent eloquence of Ferri, a preacher of reputation, and pastor of the Reformed Church in Metz. The young convert then attended the academies of Sedan and Geneva in order to study the Reformed faith, but the deeper he delved into the study of Protestantism the less fervent became his enthusiasm; and he very soon arrived at the most unexpected conclusion; namely, that the Old Testament alone contained the truth. The rabbinate of Metz refused to receive the young man into Judaism, offering as an excuse the fear of reprisals on the part of the authorities; and Antoine was advised to go to the Netherlands or to Italy, where Jews enjoyed more liberty. Accompanied by a Christian clergyman whom he had known in Sedan, and whom he attempted to convert to Judaism on the way, he repaired to Venice. There he found that the prevailing conditions had been too favorably depicted. The Jews were tolerated by the Venetian republic merely for commercial reasons; they were huddled into a gloomy ghetto, and were obliged to wear a yellow disk, which exposed them to the wanton raillery of the populace. The Venetian Jews could offer Antoine no more encouragement than their brethren of Metz. At Padua he met with a similar check. According to the documents produced at his trial, the Italian Jews gave him the "diabolical advice" to pursue the life of a pious Jew under the cloak of the Church. Antoine proceeded to Geneva, where he accepted a position as tutor in the family of the pastor and professor Diodati. For some time he also taught the upper class of the college, but, being an apostate from Catholicism, he was not considered sufficiently orthodox to be entrusted with the chair of philosophy at the Academy of Geneva.

Protestant Pastor, Though a Jew.

Antoine, desiring to marry, sought another appointment. A new Protestant parish had just been formed at Divonne, a little village of the district of Gex, which had belonged to France since 1602, but was now under the religious jurisdiction of Geneva; and there Antoine obtained the position of pastor. Once installed, he sought to pacify his conscience. Revealing his inmost convictions to no one, he secretly observed a thoroughly Jewish mode of life, saying his prayers in Hebrew and observing all the Mosaic rites. In his public services he pronounced the name of Jesus as seldom as possible. He was never known to read the apostolic confession audibly. In the communion service, instead of the words "This is my body, this is my blood," he was once heard to say, "Your Savior remembers you." His sermons, the texts for which were taken exclusively from Isaiah and the other prophets, became celebrated far and wide; yet they lacked any peculiarly Christian characteristics. The peasants of Divonne were perfectly satisfied with their pastor, who was eloquent in the extreme and full of kindness toward them; they were not shocked by the vague form of his sermons. But the lord of the adjoining manor was outraged. One Sunday, Antoine preached on the second Psalm, which, according to orthodox Christian theology, announces the coming of the son of God. Antoine, on the contrary, permitted himself to declare that God had no son and that there was but the one God. This was too much for the lord; he remonstrated loudly with the heretical pastor and threatened to denounce him to the synod. Antoine fell into gloomy despair; a nervous attack deprived him of his reason. To several colleagues from Geneva who had come to see him he began to chant the seventy-fourth Psalm; then he suddenly stopped, and, exclaiming that he was a Jew, blasphemed Christianity. His condition was recognized at once, and he was put to bed; but he escaped his watchers, passed the night wandering through the country, and was found the next morning in Geneva in a most pitiable condition, kneeling in the streets and calling loudly upon the God of Israel. He was placed in an asylum for the insane Feb. 11, 1632. Medical treatment accomplished but little for him. His clerical colleagues did all they could to induce him to change his religion; but he never ceased to proclaim that he was a Jew and desired to remain a Jew.

His Imprisonment and Execution.

A charge of heresy could no longer be avoided; the chief of the Geneva police arrested Antoine, and instituted proceedings. While he was in prison the clergy were tireless in seeking his reconversion, trying in vain to make him sign a declaration of orthodox faith. Bidden to formulate his religious belief, he drew up twelve articles, which were submitted to an ecclesiastical court. In them he gave the tenets of Judaism in the style of Maimonides' thirteen articles of faith, and added "eleven philosophical objections against the dogma of the Trinity." At the same time he addressed to the judges three memorials, two of which have been preserved. In spite of the exertions of Metrezat, a pastor of Paris, and others, the judges were immovable. The trial commenced April 11; Antoine's attitude, full of dignity, aroused much sympathy. The threats of the judges were of no more avail than the persuasions of his colleagues. He repeated constantly: "I am a Jew; and all I ask of God's grace is to die for Judaism." The court sought to show that he had promulgated his heretical doctrines at Geneva: this he contradicted most forcibly. All the efforts of the judges were met with the unchanging reply, "With the help of God I am determined to die in my present belief." Fifteen clergymen or professors of theology were summoned as witnesses. Several of them begged for a light sentence, since, in their opinion, Antoine had committed no sin by becoming a Jew, though for his hypocrisy he deserved unfrocking or banishment, or, at the worst, excommunication. Furthermore, they said that the matter ought not to be hastened, and that the advice of the various churches and academies should be sought. A fanatical majority, however, insisted that the judges should seize the present opportunity to demonstrate their faith, since it was most dangerous to absolve one who had professed Judaism while wearing the garb of a Christian priest. For some days longer the judges waited for Antoine to recant. As his recantation was not forthcoming, they pronounced sentence April 20, 1632; condemning him to be loaded with chains, placed upon a pyre, to be there strangled, and then burned. In vain the clergy petitioned for a respite; Antoine was executed the same day. He went to his death serenely, and died imploring the mercy of the God of Abraham.

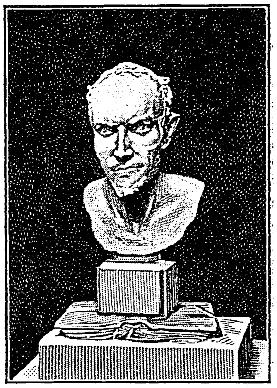
Mark Antokolski.
(From a photograph.)

ANTOKOLSKI, MARK MATVEYEVICH: Russian sculptor; born in Wilna in 1842. As a young child he displayed a talent for art, and after a short term in the *ḥeder* (Hebrew school) applied himself to the study of carving in wood. Artistic carvings in wood executed by him attracted attention, and the youthful artist was presented to General Nazimov, then governor-general of Wilna. At the age of twenty-one he went to St. Petersburg, where, with the aid of Mme. Nazimov, he was enabled to enter the Imperial Academy of Fine Arts. While there he maintained himself by working in a turner's shop, receiving a very scanty compensation. In 1864 the silver medal of the first order was awarded to him by the academy for his wood-carving, "The Jewish Tailor," which promptly gained for him a reputation. In the following year "The Miser Counting His Money," a work executed in ivory, brought him the large silver medal of the academy and a pension from the emperor. In 1866-67 he produced a bas-relief, "The Judas Kiss," and a group modeled in clay entitled "The Descent of the Inquisition on a Jewish Family at the Feast of Passover." For certain reasons the academy would not elect him a member, but offered him the unusual title of honorary citizen, which he declined. In 1868 Antokolski went to Berlin, and after a short stay returned to St. Petersburg, and produced the famous statue, "Ivan the Terrible," for which he was appointed an academician at the express command of Emperor Alexander II., who purchased the statue and ordered a bronze casting of it to be placed in the Hermitage at St. Petersburg. The statue represents the tyrannical czar in one of the intervals of remorse.

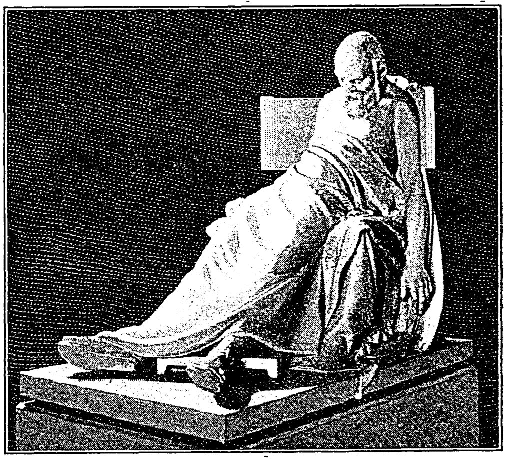
Soon after the completion of this work Antokolski went to Rome, where he produced the colossal statue of "Peter the Great" (1872), and projected "Dmitri Donskoi," "Yaroslav the Wise," and "Ivan III." In his autobiography Antokolski speaks of the extraordinary popularity that "Ivan the Terrible" had among his countrymen, whereas his statue of Peter the Great was not appreciated in Russia till after its successful exhibition at the Paris Salon. According to his opinion the half-mythical Ivan speaks more feelingly to the national heart than the epoch-making and energetic Peter.



Bust of "Mephistopheles," by Antokolski.
(From a photograph.)

In 1874 Antokolski produced "Christ Bound Before the People," which was received with great enthusiasm. In 1875 he returned to St. Petersburg, and while there produced in quick succession "The Death of Socrates" (1876), "The Last Sigh" (1877), and "The Head of John the Baptist" (1878). In the same year his works were exhibited at the Paris Exposition, when the jury awarded him a first-class medal. He was also created by the French government Knight of the Legion of Honor. In 1880 he received the title of professor of sculpture and settled permanently in Paris. In 1882 he produced "Spinoza," and later "Yermak" (the Cossack conqueror of Siberia) and "Nestor, the Annalist." At the Paris Exposition of 1900 he exhibited "The Sleeping Beauty" and "Pax," the latter a young blind Christian girl in front of the Coliseum.

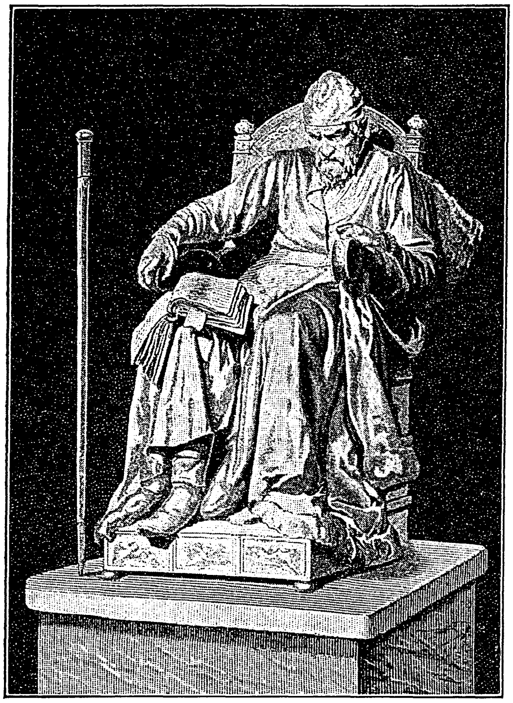
Of Antokolski's career and works the celebrated Russian art-critic Stassov gives the following description:



"Death of Socrates," by Antokolski.
(From a photograph.)

> "Antokolski's preeminence in Europe was universally acknowledged at the Paris Exposition in 1878, where an international jury, composed of artists—delegates from all nations—awarded him the first and highest prize for sculpture; and in hundreds of articles in the journals the foreign critics never weary of speaking of the great [importance of] Antokolski. Many favorable opinions of this kind have been given in the foreign press about Antokolski. But for us it is a matter of secondary importance what Europe thinks of him. Much more significant is the question of what he is to us Russians. He is the greatest sculptor of our age. He represents in his personality something altogether different from what all the rest of

our sculptors stand for—both ancient and modern. This has been manifest from the very beginning of his career when he was yet a student. The Russian art press then welcomed him joyfully. But when as a youth he created his 'Ivan the Terrible' he astounded every one. . . . Since that time his reputation has steadily grown, and our sympathies are more and more with him. Antokolski can not be classed with the rest of our artists, not even with the most conspicuous among them. It must not be forgotten that he is a Jew and what this means in Russia; that before achieving anything he was compelled to undergo hardships which no artist of any other race would have been made to undergo. The bold fearlessness of Antokolski was the greater because, instead of hiding his Jewish origin, instead of causing it to be forgotten, he loudly proclaimed it. From the very first he appeared before the judges of the academy and the Russian public with subjects and types of a purely Jewish character. Fortunately at that time Russian society, at least a great part of it, began to relieve itself of the shameful views and opinions of former epochs. The preachings of Pirogov, that the Jews had a right to live, resounded throughout Russia and found a ready response in many hearts. This time even the academy was not to be outdone in generosity, and it granted Antokolski, in 1864, the second silver medal for his carving in wood, 'The Jewish Tailor'" ("Vyestnik Yevropy," 1883, i. 690-692).



"Ivan the Terrible," by Antokolski.

ANTON, SANCHEZ. See Sanchez Antonio.

ANTON, CARL (originally **Moses Gershon Cohen**): Author; born in Mitau (Courland), of Jewish parentage; lived in the eighteenth century. He claimed descent from Ḥayyim Vital Calabrese. After studying for seven years at Prague under Jonathan Eibenschütz, Anton traveled in the East, and on his return became a convert to Christianity, and was baptized at Wolfenbüttel. The duke of Brunswick appointed him professor of Hebrew at Helmstedt. He was distinguished from the usual Jewish convert to Christianity by the fact that, though he occasionally reviled his former coreligionists, he also spoke well of them, even vindicating them in his book on the Jewish oath ("Einleitung in die Jüdischen und Rabbinischen Rechte, dabey Insbesonderheit von einem Judeneide," etc., Brunswick, 1756), against some of Eisenmenger's aspersions. Anton took part in the well-known dispute between Jacob Emden and Jonathan Eibenschütz, in which he warmly defended the latter—some say at Eibenschütz' request ("Kurze Nachricht von dem Falschen Messias, Shabbethai Ẓebi," etc., Wolfenbüttel, 1752; "Nachlese zu Dieser Nachricht," Brunswick, 1753). He wrote a Latin tract on the legend of "The Wandering Jew," entitled "Commentatio Historica de Judæo Immortali in qua hæc Fabula Examinatur et Confutatur," Helmstedt, 1756; translated Abraham Jagel's catechism, "Leḳaḥ Ṭob" (Good Instruction), Brunswick, 1756; and gave a description of a rare copy of "Shulḥan 'Aruk Eben ha-'Ezer," to be found in manuscript in the City Library, Hamburg. He also wrote "Fabulæ Antiquitatum Ebraicarum Veterum," etc., Brunswick, 1756. His "Sammlung einiger Rabbinischer Oden nebst einer Freyen Übersetzung," Brunswick, 1753, is a curious production, as the odes are written neither in Hebrew nor in Rabbinic, and would be unintelligible but for the accompanying German translation.

ANTON DE MORTORO ROPERO. See Ropero, Anton de Mortoro.

ANTONIA: The name given by Herod the Great to a fortress on the north side of the Temple at Jerusalem. It formed a projection on the northwest, so that it was not till it was destroyed that the Temple area became a square (Josephus, "B. J." v. 5, § 2 and vi. 5, § 4). According to the historian, the circuit was large enough to enclose broad spaces for quarters for troops, with courts and baths resembling a palace. These courts adjoined the north and west cloisters of the outer enclosure of the Temple. There were four corner towers, and the main citadel, on a lofty scarped rock, was said to be 50 cubits high. The corner towers were of the same height, but that on the southeast, rising from lower ground, was 70 cubits high. A deep ditch separated the fortress from the hill of Bezetha to the north ("B. J." v. 4, § 2), and the rock hid the Temple from view on this side, while a secret passage led from Antonia to the inner Temple ("Ant." xv. 11, § 7). The rock so described is evidently that on which the modern barracks are now built, at the northwest corner of the Ḥaram enclosure. This block of rock is scarped on either side, and rises 30 feet above the inner court, and about 60 feet above the ancient ditch to the north, which is 165 feet wide. The block is about 140 feet thick north and south, and extends for 350 feet eastward from the northwest angle of the Ḥaram. The buildings erected upon it are comparatively modern, but the ancient Temple wall, of large masonry adorned with projecting pillars, adjoins the scarp on the west. The remains of the underground passage (cut in the rock) are found still to the north of the present "Dome of the Rock" in the Temple enclosure, leading northward in the direction of the east end of the scarp, toward the position of the southeast corner tower, which has, however, disappeared in consequence of alterations in this part of the Ḥaram. The entire area of Antonia appears to have been a quadrangle of about 500 feet north and south by 350 east and west, or four acres.

Though rebuilt and perhaps enlarged by Herod, this citadel had existed much earlier. The *Birah* belonging to the Holy House (Neh. ii. 8) was probably a "fortress"—according to the Aramaic and Assyrian meaning of the word—rather than a "palace," and the corner towers, Hananeel and Meah, are mentioned to the north of the Temple (Zech. xiv. 10, Neh. iii. 1, Jer. xxxi. 37). Josephus ("B. J." i. 3, § 3) gives the name Baris to the fortress which preceded Antonia on this site; and in the Mishnah (Mid. i. 9; Tamid, i. 1; Zeb. xii. 3) the Birah is noticed, with the passage leading to the gate Ṭadi on the north side of the Holy House. This Birah was fortified by the Hasmoneans (Josephus, "Ant." xv. 11, § 4) and became the palace of John Hyrcanus ("Ant." xvii. 4, § 3). The northwest corner tower seems to have been known, rather later, as Strato's Tower ("Ant." xiii. 11, § 2; "B. J." i. 3, § 4), and here was a narrow underground passage in which Aristobulus was killed. This may be represented by the rock-cut passage leading from the ditch northwest of Antonia, which now ends at the Ḥaram Wall built by Herod, and probably once communicated by steps with the interior of the Antonia courtyard, south of the great scarp above described. The ditch existed at the time of Pompey's siege ("B. J." i. 7, § 3), and was artificially cut through the hill (v. 4, § 2). It was partially filled in by Pompey ("Ant." xiv. 4, § 3), and at the present day the street runs over the "Twin Pools," which appear to have been built in the foss after Hadrian's rebuilding of Jerusalem—the modern level being some 40 feet higher than the bottom of the ditch. Thus Antonia replaced a citadel guarding the Temple on the north, which existed even before the destruction of Jerusalem by Nebuchadnezzar, and it had to be taken by Titus before the Holy House could be attacked from the north.

C. R. C.

ANTONIA: The younger daughter of the triumvir Mark Antony and sister-in-law of Tiberius. She was on friendly terms with Berenice (the daughter of Salome) and also with her son, afterward King Agrippa I. When Agrippa had dissipated his fortune at Rome and returned penniless to Judea, Petrus, a freedman of Berenice, bequeathed by her to Antonia, advanced him a sum of money. Although the promissory note was drawn for 20,000 Attic drachmas, Petrus gave him 2,500 less. Being unable to pay his debt of 300,000 silverlings to the Roman treasury, Agrippa fled from Jamnia to Alexandria, where the alabarch, Alexander, who was at the same time the guardian of Antonia's property (Josephus, "Ant." xix. 5, § 1), supplied him with money. Agrippa then went to Italy, and in order to appease the anger of Tiberius, borrowed the sum of 300,000 silverlings from Antonia and paid his debt to the treasury. Soon after he also paid the money back to Antonia. Her son, afterward Emperor Claudius (41–54), was educated together with Agrippa, and their mutual friendship proved to be a permanent one.

Bibliography: The accounts of Josephus in his *Ant.* and *B. J.* are perhaps taken from the lost works of Claudius Rufus (Mommsen, in *Hermes*, iv. 322).

ANTONIA, PRINCESS OF WÜRTEMBERG: A Christian Hebraist and cabalistic scholar, born in the first half of the seventeenth century; died 1679. One of the effects of the Reformation in Germany was an increased interest in the Hebrew language among Christian scholars, and royal and noble families included it sometimes even in the curriculum of their daughters' education. In the seventeenth century many German women attained to quite a considerable knowledge of Hebrew. One of the best known of them was Antonia, the daughter of Duke Eberhard III. of Würtemberg (1629–74). She acquired a remarkable mastery of Hebrew, and, according to contemporary evidence, was well versed in rabbinic and cabalistic lore. Esenwein, dean of Urach and professor at Tübingen, wrote as early as July, 1649, to John Buxtorf at Basel that Antonia, "having been well grounded in the Hebrew language and in reading the Hebrew Bible, desires to learn also the art of reading without vowels," and three years later he wrote to Buxtorf that she had made such progress that she had "with her own hand put vowels to the greatest part of a Hebrew Bible." Philipp Jacob Spener, another pupil of Buxtorf, during his temporary stay at Heidelberg, was on friendly terms with the princess, and they studied Cabala together. Buxtorf himself presented her with a copy of each of his books. There is a manuscript extant in the Royal Library of Stuttgart, entitled "Unterschiedlicher Riss zu Sephiroth," which is supposed to have been written by Antonia. It contains cabalistic diagrams, some of which are interpreted in Hebrew and German. Her praise was sung by many a Christian Hebraist, and one poem (in twenty-four stanzas with her acrostic) in honor of the "celebrated Princess Antonia" has been preserved in the collection of manuscripts of John Buxtorf.

ANTONINUS IN THE TALMUD: A Roman emperor, and the hero of Jewish legends that recount wonderful things about his attitude toward Jews and Judaism, and more particularly concerning his friendship with Rabbi. He is called "the son of אסוירוס" (Severus) by the Babylonian Talmud, but which Roman emperor is actually meant by this name can hardly be determined. He has in turn been identified with Marcus Aurelius (Rapoport and Bodek), Septimius Severus (Graetz, who identifies Rabbi with Judah ha-Nasi II.), Caracalla (Jost and N. Krochmal), Elagabalus (Cassel), and Lucius Verus (Frankel). The account in the Talmud is legendary, not historical, and no heed is given to details, or difficulties of a chronological or psychological nature. The traditional religious discussions between Hadrian and Joshua ben Hananiah, between Akiba and Tinnius Rufus, between Shabur I. and Samuel Yarhinai, as well as the legendary interviews between Alexander the Great and the high priest Simon, or between Ptolemy and the priest Eleazar, may serve as parallels to the various Antonine legends. Jewish folk-lore loved to personify the relations of Judaism with heathendom in the guise of conversations between Jewish sages and heathen potentates.

The legend of Antoninus begins with his earliest youth. The mother of Rabbi exchanged her son soon after his birth for Antoninus—the child of an intimate acquaintance. In this way she and her child managed to escape the officers of Hadrian, who were persecuting the woman because she had her son circumcised. As a consequence Antoninus imbibed with his milk a love for Jews and Judaism (Tos. 'Ab. Zarah, 10*b*); and it was Rabbi, the son of this vicarious mother, who served as the guide and friend of Antoninus; succeeding finally in getting him to embrace Judaism (Yer. Meg. i. 72*b*; B. H. vi. 130, 131).

Antoninus and Rabbi.

However, Antoninus, the "king," did not positively accept Judaism in its entirety until he had, with the help of his Jewish friend, thoroughly investigated its fundamental principles. Thus he challenged the Jewish conception of punishment after death by alleging that it was very easy for both body and soul to exculpate themselves. The body could say, "It is the soul that transgresses, for just as soon as it leaves me I am inert as a stone." The soul on its part could reply, "The fault is in the body, for since I have separated from it I hover like a bird in the air" (Sanh. 91*a* *et seq.*; a shorter form, Mek. Beshallah, Shirah ii.). Rabbi's answer explained the right relationship between body and soul by the parable of the blind man and the lame one ("Monatsschrift," 1873, p. 75). Rabbi also instructed Antoninus concerning the resurrection, which would take place quite differently from the usual belief which included even the intact condition of the grave-clothes (Yer. Kil. ix. 32*b*, Yer. Ket. xii. 35*a*, where the name appears as Antolinus). Antoninus puts questions to Rabbi concerning the cosmos—as, for instance, what meaning there is in the sun's setting in the west (Sanh. 91*b*)—as well as questions concerning Judaism proper.

In like manner Antoninus could not see why the Jewish law appointed certain hours for prayer, since the latter should be offered at any time that the impulse to devotion was felt (Tan. ed. Buber i. 196); Rabbi accordingly showed him by an apt illustration. But sometimes, on the other hand, it was Antoninus who instructed Rabbi, making, for instance, the statement that while the unborn child receives its vital principle at conception, the germ of mentality and its concomitant, evil inclination, are received at birth only (Sanh. *l.c.*).

Legend has many details concerning the personal relations between the two. There were sumptuous banquets given in honor of each other, of which the menus have been preserved (Gen. R. xi. 4, Esther R. i. 3). The emperor would take counsel of his friend prior to any warlike enterprise, as, for instance, concerning his intended campaign against Alexandria (this is told regardless of the absurdity of a war at that period between Rome and Egypt). He is said to have undertaken this expedition relying upon Rabbi's assurance, based upon Ezek. xxix. 15, that he had nothing to fear from the Egyptians (Mek., Beshallaḥ, Shirah 6). It appears that, owing to political circumstances, the exchange of views between these friends was attended with positive danger, although it was arranged that there should be no third person present when Antoninus visited Rabbi, and that upon each occasion the emperor should slay with his own hand the two servants that knew of the conference ('Ab. Zarah, 10*a*). The friends were also compelled to have recourse to a species of sign language. Thus the emperor's emissary brought Rabbi the question as to what he should

Intimacy of Antoninus and Rabbi.

do to better the financial condition of the state. Rabbi led the messenger into his garden, and without saying a word pulled up some of the large radishes and replaced them with young ones. The emperor understood the intimation; and by the removal of the heads of his financial administration he effected a wholesome change (Gen. R. lxvii.). Antoninus had two wishes most at heart: one was the elevation of Tiberias to the rank of a "colony"—probably because it was a Jewish town; and the second was to assure the succession of his son to the throne. He could obtain either but not both of these requests from the Senate; and he applied to Rabbi for counsel. Rabbi brought two men into the presence of the messenger, put a dove in the hand of one of them and bade him mount the back of his fellow. Then he said to him that supported the other, "See that he whom thou carriest lets the dove go free!" Antoninus understood the intimation: his son, once emperor, would have it in his power to raise Tiberias to the position of a colony ('Ab. Zarah, 10*b*). A similar answer was returned to the emperor by Rabbi in reply to his inquiry as to what he should do concerning his unprincipled daughter, whose name was Gira. The inquiry came in the shape of a plant called Gargira; that is, "Gar Gira": Gira hath gone astray. Rabbi's answer consisted of the plant Kusbarta (meaning "Kus," slay, "brata," the daughter). Antoninus replied again by sending the plant Karrathe, which word means "my extinction"; whereupon Rabbi, appreciating the emperor's unwillingness to cut off his posterity, replied by sending the plant Ḥasa, "Have mercy" (*ib.* 10*b*).

The emperor's appreciation of Rabbi took the form of the richest presents, tracts of land (Yer. Sheb. vi. 36*d*), even sacks of gold, the mouths of which were covered with grain in order not to excite the jealousy of the Romans. Rabbi did not wish to accept these presents until Antoninus pointed out to him that the time would come when his posterity would be very glad of the gold in order to appease the greed of those that should be descended from him (Antoninus) ('Ab. Zarah, 10*b*).

His Alleged Conversion.

The earlier legend sees in Antoninus only the God-fearing non-Jew, so well inclined toward Judaism that he erected an altar to the Jewish God, without actually becoming a Jew (Yer. Meg. i. 72*b*; thus also probably Midr. Teh. xxii. 24). The later legend, however, regards him as the type of the true proselyte, גר צדק, and it is affirmed that at the resurrection he will arise and be the leader of all proselytes (Yer. Meg. *l.c.*, Lev. R. iii.). The cause of his conversion is said to have been his inquiry of Rabbi whether he would be entitled to partake of LEVIATHAN in the future world. Rabbi assured him he would be considered worthy, but Antoninus would not believe him, because the law concerning the paschal lamb (Ex. xii. 48) states distinctly that no uncircumcised one shall partake of that. He accordingly entered the covenant of Abraham and became a Jew (Yer. Meg. *l.c.*).

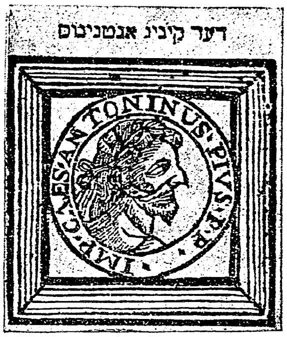
L. G.

ANTONINUS PIUS (Titus Aurelius Fulvus Boionius Arrius Antoninus): Roman emperor; born in the year 86; died in 161; ruled from 138 until his death. The reign of this just and humane emperor came like a blessing to the Jews, particularly to those of Palestine. The religious persecutions of Hadrian had devastated the country, depopulated the cities, and made the intellectual development of the Jews impossible. Had these conditions lasted much longer, there would have been an end to the Jewish people in the Roman empire. As soon as the Jews knew of the change of rulers, they sent an embassy, with R. Judah b. Shamu'a at its head, to Rome to negotiate for improvement in their condition (Meg. Ta'anit, xii.). Through the intercession of an influential matron they succeeded in procuring milder treatment. On the fifteenth of Ab (Aug., 138 or 139) the emperor permitted the burial of the Jewish soldiers and martyrs who had fallen in battle against the Romans, and whose interment had been put under severe penalty (Yer. Ta'anit, iv. § 5, 69*a*; Ta'anit, 31*a*). Half a year later (March, 139 or 140) Antoninus repealed the edicts of Hadrian—which had prevented the Jews from exercising their religion—on the condition that they should not receive proselytes (Meg. Ta'anit, xii.; "Digesta" of Modestinus, xlviii. 8, 11). Moreover, they were forbidden, on penalty of death, to enter Jerusalem. Those Jews who had fled to foreign countries in order to escape the persecutions of Hadrian gradually returned to their homes. The intellectual stagnation of the Jewish people came to an end; and the disciples of Akiba founded a new center of Jewish culture at Usha, whither the patriarch Simon b. Gamaliel II. also repaired.



Curious Picture of Antoninus Pius from the Jüd.-German "Josippon," Fürth, 1768.

It is stated to have been in Antoninus' reign that the Jews were deprived of the right to have their own courts, which prerogative was by the Pharisees considered essential to religion (Yer. Sanh. vii. § 2, 24*b*). Those that dared to criticize the measures of the emperor were banished or put to death (Shab. 33*b*). It is not surprising, then, that even under Antoninus the Jews attempted to throw off the Roman yoke ("Scriptores Historiæ Augustæ, Antoninus Pius," ch. v.). The strained relations existing between the Parthians and the Romans may have encouraged the Jews to revolt and to expect assistance from the Parthians. But such assistance was not rendered, and the revolt was probably nipped in the bud: Jewish sources do not even allude to it. See also ANTONINUS IN THE TALMUD; SIMON B. YOḤAI; VARUS.

ANTONIO, DIOGO: A physician who lived in Lisbon in the first half of the sixteenth century. In 1539 he succeeded Duarte de Paz as representative of the Portuguese Maranos at Rome, charged with the mission of endeavoring to prevent, or at least to postpone, the establishment of the Inquisition in Portugal. For this purpose certain sums of money were entrusted to him, but he used them for obtaining papal briefs of protection for himself and his family. Diogo was succeeded in office by his brother Hector. See Antonio, Hector.

M. K.

ANTONIO, DOM: Prior of Crato, pretender to the throne of Portugal; died 1595. He was a natural son of Dom Luis, brother of King Henry of Portugal, and of the converted Jewess Iolanthe, Henry's mistress; but was legitimated by his father. The numerous secret Jews of Portugal naturally looked forward to his accession with satisfaction, as it was not likely he would continue the persecution of his own mother's relatives and coreligionists. After the death of Dom Henry (Jan. 31, 1580), Philip II. of Spain claimed the Portuguese crown, and offered in vain to Dom Antonio an annual income of 40,000 ducats, in addition to the receipts of the priory, if he would relinquish his claims. As soon as Philip began to wage war with Portugal, Antonio had himself proclaimed king. The Duke of Alba, the commander-in-chief of the Spanish troops, attacked the adherents of Antonio with the utmost fury. In the battle of Alcantara, Antonio with difficulty avoided falling into the hands of the pursuing foe, and fled with a few thousand followers to Oporto. Pursued thither, he was again obliged to seek safety in flight, and died in exile. He visited England, where, it has been conjectured, his presence gave particular point to the character of Shylock. Philip, the new ruler of Portugal, revenged himself most cruelly on the Maranos.

M. K.

ANTONIO, HECTOR: Brother of Diogo Antonio. He was the representative of the Portuguese Maranos in Rome about the middle of the sixteenth century, commissioned to adjust the finances of his brother, and to convey to Pope Paul III. a complaint against the inquisitor-in-chief, the Cardinal-Infante Don Henrique. The Portuguese ambassador at the Vatican urged the immediate imprisonment of the fugitive Marano, but he was saved by the intercession of the pope. Antonio's efforts on behalf of his suffering brethren met with no success.

ANTONIO DE MENDES. See Mendes, Antonio de.

ANTONIO DE VERONA (called also **Maria Antonio**): Italian Jew, resident in England from 1623–25, who seems to have been a teacher—probably of Hebrew—at King's College, Cambridge, the books of which record a grant of £2 ($10) to him in 1623–24. Queen Henrietta Maria gave him a letter of recommendation to Oxford University, Jan. 19, 1625. He is probably the same Jew who had a pension of £40 ($200) granted him at Cambridge (Calendar of State Papers—Domestic, 1625–26, p. 98).

J.

ANTUNES: Family name of several prominent Jews.

Aaron Antunes: Ḥakam of Amsterdam; lived about the year 1715. He is known as a correspondent of many rabbis of his day, among them Jacob Mähler, rabbi of Düsseldorf. He left a commentary on the "Sayings of the Fathers" (written at Naerden, 1723), and a halakic treatise, "Maṭṭeh Aharon" (Aaron's Rod), both of which are still extant in manuscript.

Luis Antunes: A victim of the Inquisition at Coimbra; born in 1672. He was sentenced to imprisonment for life for his profession of Judaism.

Manuel Antunes, of Lamego, his brother **Raphael,** and his sisters **Clara** and **Beatriz,** met with the same fate.

Others known under this name are: **David Antunes,** author of a poem on the martyrs Marcos da Almeyda Bernal and Abraham Nunes Bernal; lived in Amsterdam, 1655; **Gabriel Antunes,** a relative of David, settled in Barbados in 1680; and **Aaron de Solomon Antunes,** printer in Amsterdam from 1715 to 1720.

Bibliography: *Revue Orientale*, i. 280.

M. K.

ANTWERP: Chief seaport of the kingdom of Belgium; capital of the province bearing the same name.

It is impossible to say at what time Jews commenced to settle in the city, as all early data are wanting. In the fourteenth century, however, a certain number of Jews must have resided in Antwerp; for in the Memorbuch of Mayence, as well as in that of Deutz, mention is made of a place called "Antdorf," in connection with Brabant, Mechlin, and Brussels, as one of the places where the Jews suffered martyrdom at the time of the Black Death, in 1348–50. There can be no doubt that Antwerp is intended ("Rev. Ét. Juives," viii. 136; Salfeld, "Das Martyrologium des Nürnberger Memorbuches," p. 286; Koenen, "Geschiednis der Joden in Nederland," p. 74).

It is uncertain whether or not the Jews of Antwerp suffered with those of Brabant and Luxemburg who were driven out of these districts in 1359 after the famous trial at Brussels, at which several had been charged with desecrating the Host of Saint Gudule. A more humane spirit seems to have prevailed here; for in 1480 the authorities succeeded in obtaining a charter permitting Jews to settle among them, upon the express condition, however, that they should give no occasion for scandal.

Maranos Granted Domiciliary Rights.

Antwerp reached the height of its prosperity in the early part of the sixteenth century. As a commercial city it became the center of the East Indian trade of the Portuguese; and many of the rich merchants and bankers of Lisbon had branch houses here. In 1536, according to a document in the Belgian state archives, Charles V. gave permission to Maranos to settle in the Netherlands. This document, as well as many others relating to the Jews of the period, is not to be found in the "Plakaatboek" of Brabant; but it has been shown that this collection, made in 1648, was at a later time expurgated. The magistrates of Antwerp must have been overjoyed at this promise; for not only was the welfare of the city a matter of their concern, but they seem always to have been actuated by a spirit of tolerance not common at this period. When the letters patent of this decree reached them in 1537, they, in affixing their official seal to the document, added the words "Le tout sans fraude ou mal engin." The Maranos were only too willing to make use of this permission, and proceeded to acquire houses and set up their businesses in their new home. One of these was the rich Marano Francisco Mendes, a member of the well-known Nasi family. At the head of the branch of his bank, which he had established at Antwerp, was a younger brother, Diego Mendes. When the Inquisition was introduced into Portugal the chief business of the firm was relegated to Antwerp, and many of the Maranos of Portugal, fearing the Holy Office, came and settled in this city.

Gracia Mendesia.

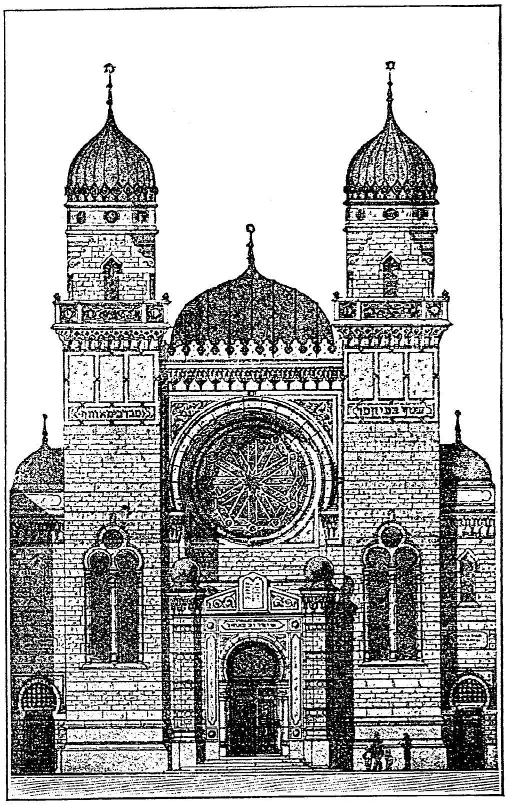
It was at Antwerp that Gracia Mendesia, wife of Francisco Mendes, lived for many years, having fled there some time before the year 1535. Her nephew, João Miguez (afterward Don Joseph Nasi), is said to have occupied a prominent place among the citizens of Antwerp and to have been well received by Maria, sister of Charles V., who was at that time regent of the Low Countries. When Joseph moved to Italy, he tried to interest the Protestants in Antwerp, as well as Sultan Selim II., in his scheme for acquiring an island in the Grecian Archipelago, in which to settle the unfortunate Jews that were driven out of Spain. But the people of Antwerp did not seem to have thought much of the project, and lent him no helping hand. It was at Antwerp that large sums of money were collected and sent to Portugal and to Italy in the hope of influencing the Inquisition to relax its vigilance in the case of the secret Jews. Gracia Mendesia, after a few years, found the burden too great of trying to live up to a religion with which she did not sympathize; and with much trouble she escaped to Italy, where she could openly profess Judaism, and there continued her noble work in behalf of her oppressed brethren (Grätz, "Gesch. der Juden," ix. 366).

There are accounts of other notable exiles from the Spanish peninsula living in this, perhaps the oldest, Flemish settlement of the Maranos. Most prominent among them were the renowned physician Amatus Lusitanus (1511), and, in the next century, the traveler Pedro Teixeira, who, after having completed his journey, settled here, returned to the Jewish faith, and wrote an account of his travels (Kayserling, "Gesch. der Juden in Portugal," p. 301; *idem*, introduction to J. J. Benjamin, "Eight Years in Asia and Africa," pp. 1 *et seq.*, Hanover, 1859).

The Inquisition in the Netherlands.

There are only a few data relating to the fate of the Jewish inhabitants of Antwerp in the second half of the sixteenth century. It is quite probable that the introduction of the Inquisition into the Netherlands by Philip II. and his agent, the duke of Alva, was sorely felt by them, though the city authorities did all in their power to keep these secret Jews among them. It is known that the city councils of Arnheim and Zütphen answered Alva that there were no Jews in their towns; and this was in a measure true also of Antwerp. This treatment of the Jews, especially at Antwerp, was of great assistance to its particular commercial rival, Amsterdam, which so greatly benefited by the large influx of Spanish-Portuguese Jews.

Many Maranos could not come to Antwerp, for the path to this haven was not always free; and at Vlissingen, where they had to pass the customs officials, many hindrances were put in their way. Such difficulties, for instance, arose (February, 1541) in the case of a certain Don André de Carvajal, although he energetically denied being even a New-Christian. He said that he was of noble birth, a native of Toledo, a good Catholic, a doctor of theology of the University of Salamanca, and that he had never entered the Abrahamic covenant. No wonder, then, that the converted Jews addressed a memorial to the emperor in that same year, in which they explained that, although they wished to come to Antwerp to engage in useful occupations, they were molested by the government officials, who accused them of being Jews, Maranos, heretics, and apostates. If they had in any way unwittingly transgressed any of the emperor's ordinances, they begged to be judged on these counts by the burgomasters and judges of Antwerp.



Antwerp Synagogue.

(From a drawing in possession of Prof. Richard Gottheil.)

No answer seems to have been given by the emperor. The officials of the city took up the cause of the converted Jews, and in 1545 refused to publish an imperial decree ordering all merchants that had come from Portugal to leave the country within a month. When, in 1549, this edict was reissued, the burgomasters at first refused to sign the document. Their head, Nicolas Van der Meeran, even went so far as to demand an interview with the regent Maria (who happened to be at Rupelmonde), in order to plead the cause of the Maranos and to exculpate the city for having disobeyed such unjust commands. He was unsuccessful, however, and the margrave of Antwerp, Van der Werve, received an order to arrest Gabriel de Neigro, Emmanuel Manrequez, and Emmanuel Sarano, three of the most prominent of the Maranos. Van der Meeran received small thanks for his pains, the queen ordering Du Fief, the procurator general of Brabant, to cite him before a tribunal. Though the charge fell through for want of the necessary proof, its effect was seen in the removal of most of the Maranos from Antwerp; only those being allowed to remain who had resided there for six years, and who promised thereafter to follow all the prescriptions and ceremonies of the Catholic Church. The reason for this severe treatment, which was due to Alva, is probably to be found in the fact that many of the Maranos were glad to escape the yoke of the Catholic Church and to join the Protestants. This, at least, was the case with the families of Marc Perez and Emmanuel Tremellius.

Return of Maranos Discountenanced.

The Peace of Westphalia, in 1648, enabled a large number of Maranos to return to Antwerp; and, together with the establishment of the Calvinist conventicles, secret synagogues in the city are mentioned. Among these Maranos may be mentioned Don Manuel Alvarez Pinto y Ribera, owner of Chilveches, Abulleque, and La Celada, nobleman of Spain and knight of St. Jago, from whom the widely spread family of Pinto takes its origin (Israel da Costa, "Adelijke Geslachten" in his "Israel en de Volken," 2d ed., p. 469). There are accounts of a debating and literary society in 1681, called "Academia de la Virtud," founded by Spanish Jews, similar to the many societies of this kind founded at Amsterdam (Da Costa, *ib.* p. 469).

The state government, however, did all in its power to prevent a large increase in the number of Jews at Antwerp, and in 1672 it denied their request to take up their permanent quarters at Bilborde, though they offered five million florins a year for the privilege. This refusal was probably due to a priest named Coriache, who presented to the privy council a memorial, written by the bishop of Antwerp, complaining that for the last twenty-five years or more some of the richest Jews of the city had removed their goods to Amsterdam and had there reentered the Jewish community, after having lived for many years outwardly as faithful and obedient Catholics. Such a one was Dr. Spinoza, who for several years had practised medicine at Antwerp (Carmoly, "Revue Orientale," i. 176). The authorities even went further: in 1682 they forcibly baptized a child born to Diego Curiel, on the pretext that, having been born in a Catholic country, he by right belonged to the Church. This Curiel was a member of a well-known Portuguese family; one of his relatives, Jacob Curiel, otherwise called Nunez da Costa—who had been ennobled by John IV.—was for many years the agent of Portugal at Antwerp. Another Marano, Francisco de Silva, happening to pass the host as it was being carried to a sick-chamber, neglected to kneel before it. He was thrown into prison, although the council of state refused to allow him to be brought up in court on the charge. The bishop of Antwerp, Ferdinand de Beughen, made strenuous demands for the punishment of the culprit, and the clergy even went so far as to demand the total expulsion of Jews from Antwerp. The burgomasters, when asked for their opinion by the council of state, answered that the Jews had brought to their city the diamond trade, that they were prosperous, and that they lived quietly for themselves; so that there was not much ground for complaint. But they added that it might be well to force the Jews to adopt certain marks and a distinctive dress, and to live in a portion of the city separated from the rest of the inhabitants. Whether this was done or not, history does not record.

Respite.

The wars of Louis XIV. gave the Jews a certain respite. In 1694 the officers of the bishop and the magistrates attempted to put the seals on the secret synagogue; but Elijah Andrada, one of the Jews, defied them to reestablish the Inquisition in the Netherlands. The Jews seem to have been successful this time; and they even brought the matter before the courts, demanding a restitution of certain property confiscated in the name of the king of Spain.

Readmission to Citizenship.

The Jews in Antwerp are again referred to in the eighteenth century, when the Spanish Netherlands, by the Peace of Utrecht (April 11, 1713), became part of the Austrian monarchy. On Sept. 16, 1715, Abraham Aaron, a Jewish merchant, received the rights of citizenship in Antwerp, which rights were essential to the carrying on of trade by him without restriction. On June 13, 1732, a certain Jacob Cantor, who had lived for thirty years in Brussels, received a certificate of citizenship from the magistrates of Antwerp. This grant was annulled later, as one of the qualifications for citizenship was the profession of the Catholic faith. In August, 1769, Abraham Benjamin, another Jew, who for many years had lived in London, desired to settle with his family in Antwerp and to carry on trade between England and the Netherlands. The magistrates were unwilling to grant such permission; fearing, perhaps, that as the government was trying to raise the status of manufactures in the Netherlands, it would not look with favor upon the reception of a man who would benefit English rather than Belgian trade. The fear was also expressed that in virtue of his rights as a citizen, Benjamin might set up a retail business. The privy council (in whose hands was the granting of citizens' rights), therefore, proposed to the governor-general to authorize the granting of citizens' rights to this Jew on condition that he pledge himself not to trade in retail; should he thus trade, a fine of a thousand florins was to be imposed over and above the ordinary penalties that might be prescribed by the magistrates of Antwerp. Accordingly the governor-general, on Oct. 28, 1769, authorized the magistrates to admit Benjamin; but they at the same time stipulated that this act should not be considered a precedent, and that the decree of 1758, which excluded the Jews from citizenship, should continue in force. In October, 1782, Benjamin Joel Cantor and his brother, Samuel Joel Cantor, merchants, made a similar request to be admitted as citizens of Antwerp. They were the grandchildren of the Jacob Cantor mentioned above; and in their petition they alleged that their father, Joel Jacob, who was a native of Amsterdam, had lived for more than eighteen years in Antwerp, and that their grandfather had been admitted as a citizen of the place. The facts alleged by these two brothers were officially confirmed; and, on the advice of the governor-general, the magistrates of Antwerp admitted the applicants to citizenship (Dec. 11 and 24, 1782), their names being registered in the Plakaatboek. Two years later Levi Abraham, a Hanoverian Jew, who had resided in Antwerp for fifteen years, made an attempt to secure the rights of citizenship, in order to carry on his trade in jewelry and in other branches. The privy council reported adversely, however, on this petition, alleging that the business he desired to carry on—namely, that of a second-hand dealer—was suspicious, at any rate one not to be recommended, and the grant was refused (Dec. 4, 1784).

Reestablishment of Jews.

In 1794 the French became masters of Belgium, and the new ideas sown by the Revolution made themselves felt here also. The Jews were freer to settle at Antwerp, which they did very soon after this; though no trace can be found of their having had a synagogue of their own. The imperial edict of March 17, 1808, divided off the Jews living in French countries into consistorial conscriptions, and these again into synagogue districts.

Antwerp, together with the nine other departments of Belgium, was included in the consistory of Crefeld; but, strange to say, no delegate seems to have been sent from any one of these communities, either to the meeting of notables in Paris in 1806, or to the Sanhedrin in 1807. On the overthrow of Napoleon, Belgium was united with Holland; and Jews came in large numbers both from the Rhine district and from Holland. The organization of the various communities planned by the Austrian governor in 1814 was carried out by the Dutch. Antwerp, as a province, belonged, together with South Brabant, East and West Flanders, Namur, and Hainaut, to the fourteenth district, the chief synagogue of the district being at Brussels. The Jews of Antwerp acquired possession of a cemetery in 1828.

The revolution of 1830 again made a change, and Antwerp became part of the Belgian consistory, of which Brussels was the head. This consistory at first was made up of five, and in 1832 of seven members, Antwerp having one seat therein. Three dependent synagogues of the first class were established at Antwerp, Ghent, and Liège. Although this consistory has general charge of Jewish affairs in the country, and although the government contributes toward the annual expenses, the individual communities have a large amount of freedom. Shortly before the beginning of the second half of the nineteenth century a private collection was made and a synagogue, together with a school, worthy of the community, which was now continually increasing, was built. In 1849, according to official statistics, Antwerp had 52 registered Jewish households and 25 non-registered, which last term probably refers to those who were unable to pay regular taxes. In 1900 the Jewish population of Antwerp was 8,000. At the large synagogue the old Amsterdam Portuguese *minhag* is followed; but during the exodus of the Russian Jews in the years following 1881 several thousands of them settled in Antwerp, and there erected a number of synagogues and meeting-houses with a minhag closely allied to the German-Polish.

The present (1901) rabbi of the Portuguese synagogue is D. S. Hirsch, who bears the official title "Ministre Officiant du Culte Israélite."

One of the chief industries practised by the poorer Jews of Antwerp is that of diamond-cutting, the rose diamond being a specialty of their work. The diamond-cutters number between 600 and 700.

A Hebrew printing-press was established at Antwerp in 1565 by Christopher Plantin (1514–89). The type and specimens of the work done there may still be seen in Plantin's house (in the Marché du Vendredi), which is now the "Musée Plantin." Permission to print Hebrew books was given to Plantin by the emperor Maximilian II. on Feb. 21, 1565. The first book with Hebrew characters printed in Antwerp seems to have been "Hebræa, Chaldæa, Græca et Latina Nomina Virorum, Mulierum . . . suis quæque characteribus restituta, cum latina interpretatione." In the following years there were published here (אנווירשה = Anversa):

1566 "Biblia Hebraica," cum punctis: 1 vol. 4to: 2 vols. 8vo; 4 vols. 16mo.
1567 "Pentateuchus seu quinque Libri Mosis, Hebraice," cum punctis, 1 vol. 8vo.
1568 Stanislai Grespii "De Multiplici Siclo et Talento Hebraico," 1 vol. 8vo.
1569 "Biblia Sacra Hebraice, Chaldaice," 1 vol. 4to (part of the Polyglot).
"Psalmorum Liber," 1 vol. 8vo.
"Alphabetum Hebraicum," 1 vol. 8vo.
1570 "Biblia Sacra Hebraice, Chaldaice" (part of the Polyglot).
"Grammatica Hebræa" . . . auctore Johanne Isaaco, 1 vol. 4to.
1572 "Thesaurus Hebraicæ Linguæ—Grammatica Chaldæa," etc. (parts of the Polyglot).
1573 "Biblia Sacra Hebraice, Chaldaice, et Latine," 8 vols. fol. (Polyglot).
"Biblia Hebraica," sine punctis, 1 vol. 8vo.
1574 "Hagiographa Hebraice" (Psalms, Proverbs, Job, Daniel, Ezra, Nehemiah, Chronicles), sine punctis, 1 vol. 12mo.
"Psalterium Hebraicum," sine punctis, 1 vol. 24mo.
1575 "Itinerarium Benjamini Tudelensis . . . ex Hebraico Latinum factum Bened. Aria Montano interprete," 1 vol. 8vo.
1580 "Biblia Hebraica," 4to.
1581 "Psalterium Hebraice," 1 vol. 16mo.
Joannes Drusius—"Interpretum Veterum Græcorum, Aquilæ, Symmachi, Theodotionis . . . quæ extant fragmenta in Psalmos Davidis, Hebraice, Græce, et Latine," 1 vol. 8vo.
1582 "Biblia Hebraica," 1 vol. 4to.
Jani Drusii, "Ad Voces Ebraicas Novi Testamenti Commentarius . . ." 1 vol. 4to.
1584 "Biblia Hebraica. Eorundem Latina interpretatio Xantis Pagnini Lucensis, recenter Benedicti Ariæ Montani Hispaniæ," . . . 1 vol. fol.
"Psalmi Hebraice," sine punctis, 1 vol. 16mo.
"Interpretum Veterum Græcorum, Aquilæ, Symmachi, Theodotionis . . . quæ extant fragmenta in Psalmos Davidis, Hebraice, Græce, et Latine ex Editione Joannis Drieschii," 1 vol. 8vo.
1588 "Prophetæ Minores, Hebraice," 1 vol. 12mo.

G.

ANUSIM. See Maranos.

APAMEA: Among the many towns bearing this name, the following are of importance with reference to Jews:

1. Capital of the province of Apamene, Syria; situated on the Orontes, south of Antioch. Like the other cities of Syria (Josephus, "B. J." vii. 3, § 3), Apamea probably had a large Jewish population, though there are no records extant as to the settlement of Jews there. According to Josephus ("B. J." i. 10, § 10), Antipater sent his sons to Apamea with soldiers to Julius Cæsar, who was hard pressed at the time. The rabbis considered Syria, and especially Apamea, as, in a certain degree, belonging to Palestine. Both the Jerusalem Targumim considered the city of Shepham (Num. xxxiv. 11), situated on the northern border of Palestine, to be identical with Apamea. The similarity of sound in the two names is no doubt accountable for the identification; and it was because of this similarity that אפמיא was sometimes written אספמיא. But, since the latter word means also Spain, this has led to many errors.

Of the tribes of the Kenites, Kenizzites, and Kadmonites (Gen. xv. 19), the rabbis said that they will belong to Israel only in the Messianic age; and R. Simon b. Yohai (second century) refers the last-named tribe to Apamea (Gen. R. xliv. 23; see "Monatsschrift," xxxix. 50). Since Apamea virtually belonged to Palestine, the first-fruits brought by Ariston from that town were accepted for sacrifice in Jerusalem (Mishnah Ḥal. iv. 11). On the outbreak of the Jewish war, the inhabitants of Apamea spared the Jews who lived in their midst, and would not suffer them to be murdered or led into captivity (Josephus, "B. J." ii. 18, § 5). The subsequent history of the Jews in this vicinity is unknown. Under the name Fami, Efamia, the town still flourished during the Arabian middle ages; but is now a mass of ruins near Kal'at el-Medik, in the pashalic of Tarablus (Ritter, "Erdkunde," xvii. 1077 *et seq.*).

2. City in Phrygia, a country to which Antiochus the Great transplanted many Hebrews (Josephus, "Ant." xii. 3, § 4). By order of Flaccus, a large amount of Jewish money—nearly 100 pounds of gold—intended for the Temple in Jerusalem was confiscated in Apamea in the year 62 B.C. (Cicero, "Pro Flacco," ch. xxviii.). According to the Jewish "Sibylline Books" (i. 261), Ararat, where Noah's ark rested, was in Phrygia; and the exact spot is pointed out as the source of the great Marsyas. At this place was situated the ancient city of Celenæ, whose inhabitants were compelled by Antiochus Soter to move farther down the river, where they founded the city of Apamea (Strabo, xii. 577). Coins minted in Apamea in the third century bear the effigy of Noah and his wife, together with the word "Noah" (Reinach, "Les Monnaies Juives," p. 71, Paris, 1887). Besides the legend of Noah, the Enoch legend was also current in Apamea, as in the whole of Phrygia (Stephen of Byzantium, *s.v.* Ἰκόνιον). The two are, however, interwoven; and perhaps "Annakus" or "Nannakus," as the hero of the Enoch legend is called, is a combination of the names Noah and Enoch. The legend seems to have taken shape from the circumstance that Apamea had the additional name Κιβωτός = "ark" (Ramsay, "The Cities and Bishoprics of Phrygia," I. ii. 669–672; Schürer, "Gesch." 3d ed., iii. 14–16).

The passages in the Talmud relating to witchcraft in Apamea (Ber. 62*a*) and to a dream in Apamea (Niddah, 30*b*) probably refer to the Apamea in Phrygia which was looked upon as the fabulously distant habitation. Similarly the much-discussed passage, Yeb. 115*b*, which treats of the journey of the exilarch Isaac, should also be interpreted to mean a journey from Carduene to Apamea in Phrygia; for if Apamea in Mesene were meant (Brüll's "Jahrb." x. 145) it is quite impossible that the Babylonians should have had any difficulty in identifying the body of such a distinguished personage.

3. Town of Mesene. Stephen of Byzantium describes it (*s.v.* Ἀπαμεία) as surrounded by the Tigris at the point where the river divides. Ptolemy, ("Geographike," v. 18) says it is situated at the confluence of the Euphrates and the Tigris (compare Pliny, vi. 146). Apparently these were two different cities, which seem to have been close together—as is expressly stated in Ḳid. 71*b*—the upper and the lower; one, probably the upper, was, so far as its Jewish inhabitants were concerned, pure; that is, its inhabitants were, in the rabbinical sense, of legitimate Jewish descent; the other was mixed. Nöldeke ("Mandäische Grammatik," p. 26) suggests that the dialect spoken in lower Apamea was akin to the Mandæan. The place is now called Korna (Ritter, "Erdkunde," xi. 1021).

S. KR.

APELLA: A real or fictitious name of a Jew referred to by Horace as extremely credulous. Credulity seemed to the Roman writers synonymous with Jewish beliefs in general, and "Apella," from Horace's expression "credat Judæus Apella" ("Satires," I. v. 100), became the by-name for a credulous man. It has been suggested that the name is merely an epithet (from *a*, privative, and *pellis*, skin) equivalent to the Latin "curtus" (see Porphyry's commentary on Horace, ed. W. Meyer, Leipsic, 1874). This etymology was accepted by Geiger ("Quid de Judæorum moribus, etc.," p. 42) and by Renan ("Les Apôtres," p. 113), but is altogether fictitious, as has been shown by J. A. Hild ("R. E. J." xi. 37) and T. Reinach ("Auteurs Grecs et Romains," p. 245), who see in it a very common Greek name of the period, contracted from Apollodorus. Josephus ("Contra Apionem," ii. 7) speaks of an excellent historian of that name; Petronius ("Satyricon," p. 64) mentions another; and Apella is the name of a freedman mentioned by Cicero. Indeed, it does not seem to be a Jewish name at all.

S.

APELLES OF ASCALON: Counselor and companion of the emperor Caligula (37–41). After a career of debauchery he went on the stage and became a tragic actor (Philo, "De Legatione ad Caium," xxx.). Apelles was imbued with a deep-seated hatred of the Jews, which, through constant companionship, he was enabled to transmit to Caligula. In this he was aided by another courtier, HELICON of Egypt, who was the emperor's fool, and who made a specialty of deriding and burlesquing the Jews (*ib.* xxvi. *et seq.*). When the embassy of Alexandrian Jews, headed by Philo, arrived at Rome to plead before Caligula for the equal rights on behalf of the Jewish community, it was opposed by Apelles and his companion, who lent their support to Apion and his anti-Jewish delegation. Philo and his friends were dismissed in anger by Caligula. Apelles, whom his eccentric master frequently submitted to whimsical tortures (Suetonius, "Caligula," xxxiii.), may, at length, have met his death on such an occasion (Philo, *l.c.* xxx.), though, on the other hand, it has been suggested that he may have been living in the reign of Vespasian (Suetonius, "Vespasian," xix.; where "Apollinari" or "Apellari" may really stand for "Apelli").

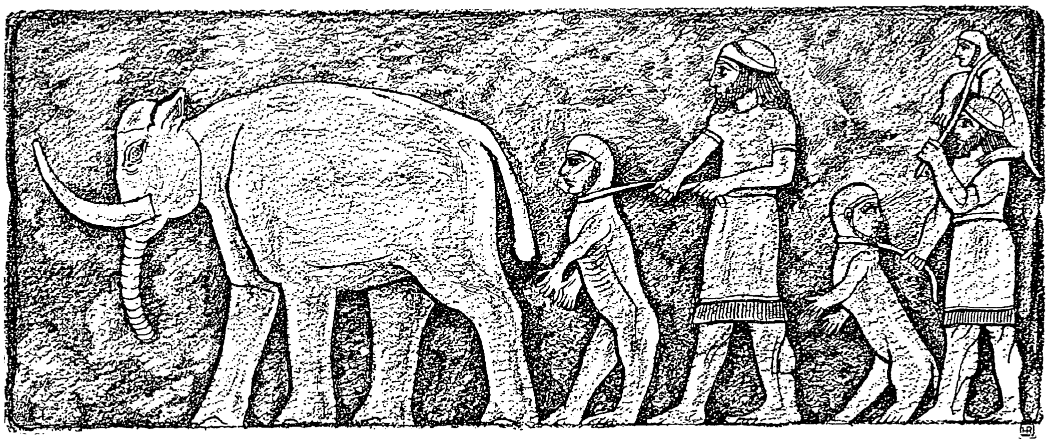
APES.—Biblical Data: These animals are mentioned in I Kings, x. 22, and the parallel passage in II Chron. ix. 21, as having been brought, with gold, silver, ivory, and peacocks, by ships of Tarshish from OPHIR (compare II Chron. viii. 18). The Hebrew name *ḳof* is a loan-word from the Tamil *kapi*, from which indeed the Teutonic *ape* is also a loan with the loss of the guttural, so that the Hebrew and the English words are identical. In Egyptian the form *gôfê* occurs. The Indian origin of the name has been used to identify Ophir with Abhira at the mouth of the Indus (see Vinson, "Revue de Philologie," iii.). The Assyrians, however, were acquainted with Apes, which were brought to them as tribute. Apes are not now and almost certainly never were either indigenous to Palestine or acclimatized there.

——**In Rabbinical Literature:** The rabbis appear to have had some acquaintance with Apes. They knew that they were like man, and for that reason the blessing on Him "who varieth his creatures" was to be said at sight of an ape (Ber. 58*b*). They compared man in old age to an ape (Eccl. R. i. 2; Tan., Peḳude, 3). To see an ape in a dream is unlucky, because of his ugliness (Ber. 57*b*). Apes were regarded as a luxury (Eccl. R. vi. 11), and were trained to perform as servants, to clear out vessels (Yoma, 29*b*), or to pour water on the hands (Yad. i. 5). On the other hand, it was erroneously thought that it took them three years to bring forth (Bek. 8*a*), and they were included in the class of beasts, with the dog, wild ass, and elephant (Kil. viii. 6). To harness any of these would not be reckoned an infringement of Deut. xxii. 10. There was a legend to the effect that of the three classes of men that built the Tower of Babel, one was turned into Apes (Sanh. 109*a*; compare Yalk., Gen. 62). Apes were used as a method of disadvantageous comparison; thus, Sarah was to Eve as an ape to man; Eve to Adam; and Adam to God (B. B. 58*a*).

In the days of Enosh the human race degenerated and began to look like Apes (Gen. R. xxiii.). The Mohammedans have a legend, referred to in the Koran (suras ii. 61, 62; vii. 163), to the effect that certain Jews dwelling at Elath on the Red sea in the days of David, who yielded to the temptation to fish on the Sabbath, were turned into Apes as a punishment for Sabbath-breaking (Lane, "Thousand and One Nights," iii. 550).

There is another animal mentioned in the Talmud which would appear to be of the same category as the ape; since its resemblance to man was so great that its dead body, like that of a man, would render a tent unclean (Kil. viii. 5). Its name אדני השדה has been interpreted variously as a chimpanzee or orangutan; while some regard the animal as altogether fabulous and identical with אבני השדה, "stones of the field" (Sammter, Mishnayot [translation], i. 77; Job, v. 23).



Apes Led and Carried as Tribute.

APHARSACHITES: A tribe living in Samaria, who objected to the building of the Temple by the Jews, and brought the matter to the attention of Darius (Ezra, iv. 9, v. 6, vi. 6). They had been transported to Samaria by Asnapper (Ezra, iv. 9). Their identity has not been fully established. It appears probable that the term has been misunderstood and designates in reality certain officials. See Apharsites.

G. B. L.

APHARSITES: Assyrian subjects transplanted into Samaria by Asnapper. In Ezra, iv. 9, they are found intriguing against the Jews, and this led Artaxerxes to issue orders for the building of the Temple to cease.

G. B. L.

APHEK: The name of several places mentioned in the Old Testament, of which the most famous was the scene of a severe defeat of Ben-hadad II. of Damascus by Ahab, king of Israel (I Kings, xx. 29 *et seq.*). See Aphek, Battle of. The site is disputed. The common opinion is that the town lay east of the Jordan and that the name is preserved in the modern Fek, three miles east of the Sea of Galilee, on the edge of the plain of Jordan. Latterly the opinion has gained credence that it was the same Aphek as that mentioned in Josh. xii. 18 and I Sam. iv. 1, in the north of the plain of Sharon, the supposition being that the Syrians were invading Israel from the western side as being the most vulnerable. In the same place Joash also gained a victory over the Syrians under Ben-hadad III. (II Kings, xiii. 17). See also illustration, p. 664.

APHEK, THE BATTLE OF: This event, described in I Kings, xx. 26–34, was one of the most notable in the prolonged warfare between northern Israel and the Arameans of Damascus. The Syrians, who, under Ben-hadad II., had been defeated by Israel the year before in a conflict among the hills of Samaria (I Kings, xx. 23), stationed themselves in the lowland, which they believed a more advantageous position. Their rendezvous was probably Aphek, in the north end of the great plain of Sharon. They were again defeated, and after being blockaded in Aphek they surrendered to Ahab, who treated them mercifully and allowed them to return to Damascus. One result of the victory was that a truce, lasting over two years, was concluded between Israel and Damascus, so that the following year (854 B.C.) Ahab and Ben-hadad were found fighting side by side against the Assyrians. War, however, broke out again in 853, when Ahab was killed at Ramoth-Gilead.

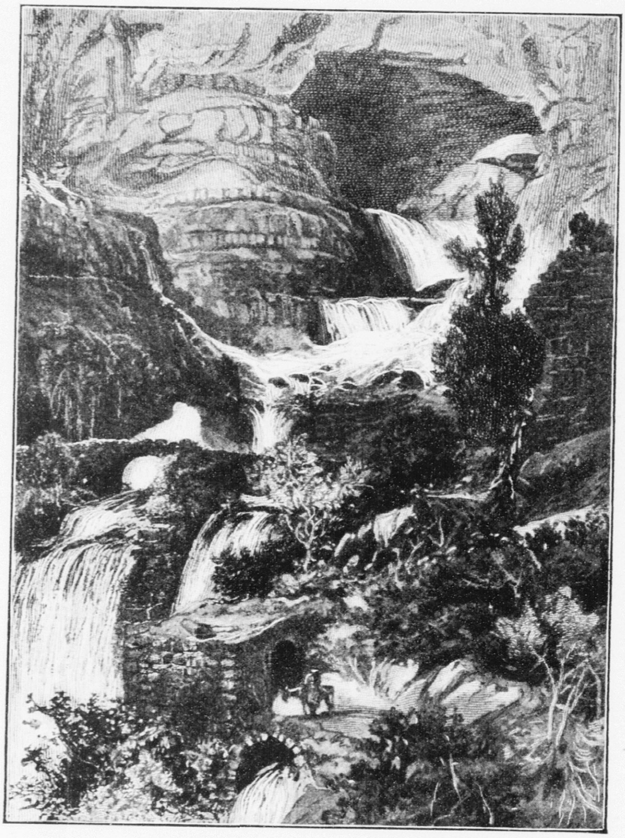
APHORISMS. See Maxims.

APHRAATES, THE PERSIAN SAGE: The name by which a Syrian homilist of the fourth century was known. His homilies, written between the years 337 and 345, are valuable to the Jewish historian; for it may be confidently asserted that no church father was ever so strongly influenced by rabbinical Judaism as this defender of Christianity against the Jews. Georgios, bishop of the Arabs (about 780), notes Aphraates' dependence upon Jewish doctrine (see his letter about Aphraates in Wright, "The

Homilies of Aphraates," v. 36). Wellhausen has noted "how completely the Syriac Church was bound to Jewish tradition, even in the fourth century," and has pointed out that this "is shown strikingly by the 'Homilies of Aphraates'" (Bleek, "Einleitung in das Alte Testament," 4th ed., 1878). Funk and Ginzberg ("Die Haggada bei den Kirchenvätern," i. 1, 76, Amsterdam, 1899, and in "Monatsschrift," pp. 64, 119, 153, 155, 158, 221, 228) both show many parallel passages from Rabbinical literature with which the Scriptural explanations of Aphraates coincide. In certain very important questions concerning the soul, God, retribution, etc., he shows himself a docile pupil of the Jews.



Afka (Ancient Aphek), Near Sidon; on the Source of the River Adonis (Now Nahr Ibrahim).

(From a photograph.)

His Doctrine of the Attributes of God.

His doctrine of the two attributes of God—justice and mercy—is decidedly Jewish (see hom. vi. 6, 114, and other passages); it is often encountered in Rabbinical literature under the familiar designations of "Middat ha-Din" and "Middat ha-Raḥamim"; its oldest rabbinical source is Sifre to Deut. (ed. Friedmann), § 27, p. 71; and it is also found in Philo, as Siegfried ("Philo," p. 213) has shown. Aphraates, in agreement with the rabbis, declares that God's mercy is for men living; while His justice is administered after their death. He holds also that divine justice—the activity of the Middat ha-Din—does not begin immediately after death, but only on the day of judgment. Aphraates' eschatology—still adhered to by the Nestorians—is based upon the theory that the human soul has a double entity: (*a*) the "natural" soul, which is immortal, but is buried with the body after death, remaining without consciousness until the resurrection, and (*b*) the "heavenly" soul, which after death reverts to its heavenly nature (hom. vi. 13). This peculiar conception of a soul-slumber (*ψυχοπαννύχια*), it has been shown ("Monatsschrift," 1899, p. 64), was widespread among the Jews in Aphraates' time. In the Talmud (Shab. 152*b*) it is stated that the soul resides in the body during the first year after death.

Now, since neither reward nor punishment can be predicated of a sleeping soul, Aphraates, to be consistent, is compelled to adopt the position contended for by him, which is that only on the day of judgment is recompense dealt out (hom. viii. 7, end).

Future Condition of Pious and Wicked.

The difference between the pious dead and the wicked dead lies in the fact that the sleeping condition of the former is free from any unpleasant feeling, while that of the latter is punished by disagreeable dreams (hom. viii. 8). Thus, Aphraates refers to the godless rich, "who sit in sorrow and the shadow of death, and think not of this world" (hom. xxii. 423, 1, 15, 16), which is not to be interpreted as meaning retribution such as the doctrine of purgatory would imply. In the same manner Aphraates, with his description of life in paradise, based upon rabbinical haggadic lines (Funk, p. 158), does not intend to depict the condition of the pious after death, but to portray their state after resurrection.

This is clearly evident when the transition from the description of the dead to that of paradise is made in the words, "until the time when all the just shall rise again." In this way also is he to be understood when he says "that the earlier ones, who were strong in the faith, will not receive their reward until the later ones come" (see Funk, p. 156; hom. ix. 8); that is, all who die must wait for their recompense until the resurrection. The suggestion must therefore be rejected that Aphraates herein teaches the rabbinical theory that the resurrection will take place only when the full number of souls appointed by God shall have received their bodies (Yeb. 62*a*); for there is no trace of this in his works.

The last judgment, according to Aphraates, does not exist either for the perfectly pious, who arise immediately and at once participate in eternal life, or for the absolutely wicked, who are delivered over to the torments of hell without judgment; therefore, "the judgment will be only for the rest of the world who are called sinners; . . . those who have few faults the Judge will reproach . . . and assign them to eternal life as their portion after the judgment. And those sinners whose transgressions are manifold will be sentenced in the judgment and go into suffering [hell] unto eternity" (hom. xxii. 433, line 2; p. 434, line 7). This conception of Aphraates is none other than the familiar theory of Hillel (R. H. 16*b*) concerning the divine mode of judgment. While, then, the condition of man at the resurrection depends upon the grace of God, the existence of the world depends upon man; that is, upon the pious. Therefore, Aphraates holds the opinion that "in all times, from the beginning and unto eternity, there will be pious and upright men on earth." *

This is also of rabbinical origin; for the rabbis teach that the world's existence depends upon the presence of the pious in it; the only disagreement is in the necessary number of these "pillars of the universe." † A fixed period is set for the world: "For the world will exist for 6,000 years, like to the six days of the Lord, and then the Sabbath of God will begin" (hom. ii. 13, p. 36, line 5). This millennarianism is, however, not to be ascribed to rabbinical influence upon Aphraates; for it belongs to the oldest elements of Christianity, taken over from Judaism; indeed, Aphraates refers to "the tradition of *our* sages." This is mentioned because it is characteristic of the whole method of Aphraates, who herein also teaches consonantly with the rabbis (compare Sanh. 97*a*).

Defends Christianity Against Judaism.

The knowledge of Aphraates' personal relations with Jews is limited to what may be learned from his writings. For instance, he maintains that the homily "Upon Persecution" (hom. xxi.) owes its existence to the arguments against Christianity made to him by a Jewish sage (the epithet "ḥak-kima" here is not a title, like the old "ḥakam," but "sage" in general). His frequent vigorous attacks on Jewish sages and disputants also show that, in spite of the great influence that the rabbinical teachings exercised over him, he entered the lists against his teachers more than once. One-half of this collection of homilies is an avowed defense of Christianity against Judaism; and his characteristic principle is that attack is the best defense. Therefore, he inveighs (homs. xi., xii., xiii., xv.) against circumcision, Passover, the Sabbath, and dietary laws, the chief portions of the Jewish ceremonial law, in order to proceed to the rejection of the doctrine of the "chosen people" (hom. xvi.). In his apologetics for Christianity, next to the defense of the designation "Son of God" for Jesus (hom. xvii.), it is celibacy that he mainly upholds against Jews and heathen (hom. xviii.). In hom. xix. he disproves the Messianic hopes of the Jews. But to his honor be it said, that, unlike other ancient Christian apologetes, such as Origen and Jerome, who owed much to Jewish teachers, his writings are almost entirely free from any bitterness toward them personally, a characteristic which Nöldeke ("Göttinger Gelehrte Anzeiger," 1867, p. 1512) was the first to indicate. It should not be concluded that, because Aphraates attacked Judaism only in the last ten of his homilies (which were composed after the war between the Persians and Romans in 337), this attack was the result of ill-feeling between Jews and Christians, the former favoring the Persians, the latter opposing them. Aphraates showed not the slightest traces of personal ill-feeling toward the Jews; and his calm, dispassionate tone proves that it was only his firm conviction of Christianity that caused him to assail Judaism. The fact that in the first half of his work he did not attack it is easily explained; the themes he treated, such as fasting, love, faith, prayer, etc., furnished no basis for polemics against Jews.

APHRASCHUS RACHMAILOWICZ. See Affras Rachmaelovich.

APHRODITE: Greek name for the goddess of love. Among Orientals, addicted to sensuality, she was worshiped under many forms and figures. The word 'Αφροδίτη (*Aphtoret, Aphrotet, Aphrodet*), which can not be satisfactorily derived from Greek, plainly shows its Semitic origin; for upon closer inspection it is proved to be identical with *Ashtoret* (עשתרת) (F. Hommel, "Neue Jahrbücher," cxxv. 176; H. Levy, "Die Semitischen Fremdwörter im Griechischen," Berlin, 1895, p. 250). Aphrodite was considered so peculiar to Syria that she was worshiped there as 'Αφροδίτη Συρία, or the Syrian Aphrodite (see Pauly-Wissowa, "Realencyklopädie der Classischen Alterthumswissenschaft," i. 2774).

There existed in Palestine a recognized Aphrodite cult: (1) in Jaffa (Pliny, "Historia Naturalis," v. 129); (2) in Acre (ancient Acco), which city possessed a bath adorned with a painting of the goddess, where even the patriarch Gamaliel did not on that account refuse to bathe (Mishnah 'Ab. Zarah, iii. 4; Yalḳut, Deut. 888); (3) in Bozrah at the time of R. Simeon ben Laḳish (Talmud Yerushalmi, Sheb. viii. 38*b*). These cities were for the most part inhabited by pagans. When, under Emperor Hadrian, even Jerusalem became a pagan city with the name Ælia Capitolina, the strong heathenish inclination of its inhabitants displayed itself in the erection of a temple to Venus upon Mount Golgotha just outside the city (Sozomen, "Hist. Eccl." ii. 1; Hieronymus, "Epistolæ," 13).

Probably connected with the worship of Aphrodite was the bird which, it is alleged, was worshiped by the Samaritans and which may have been the dove, an attendant of the goddess of love.

APIḲOROS (pl. **APIḲORSIM**): In common Jewish parlance this word is used to signify that a man is a heretic, unsound in his belief, or lax in his religious practise. The word is derived from the Greek 'Επικύρος, but Maimonides (Commentary on the Mishnah, Sanh. xi. 1), deriving it from the New Hebrew הפקר = freedom, explains it to mean one who refuses obedience to the Law. In the Mishnah (see also Acts, xvii. 18) the word אפיקורוס evidently means an adherent of the Epicurean philosophy: the context shows this clearly. It reads: "All Israelites have a share in the future world. The following, however, have no share in the future world: He who says there is no resurrection [the words מן התורה are, as Rabbinowitz has proved, interpolated], he who says the Law has not been given by God, and an אפיקורוס" (Sanh. x. 1, Gem. 90*a*). There can be no doubt that Apiḳoros, in this connection, refers to a man who refuses to believe in life after death. In commenting upon Num. xv. 31, Sifre (Num. 112) says: "For the word of the Lord he has despised; this is the Sadducee: and his commandment he hath broken; this, the Apiḳoros."

---

* Hom. xxiii. 455. Aphraates quotes in proof a Biblical verse which does not exist in our Bible. The quotation, p. 461, of which neither Wright nor Bert could find the source, is Psalm lxxxix. 2: "The world is built upon mercy" (A. V. "Mercy shall be built up forever").

† See Suk. 46*b*, where the number is placed at 36; but in Yoma, 38*b*, *one* is held sufficient. See "Monatsschrift," *l.c.*, p. 546, and the passages quoted from Diogenes and Justin Martyr.

The first mention of Epicureans in relation to Judaism is found in Josephus, "Ant." x. 11, § 7:

> "Those who read the prophecies of Daniel may thence discover how the Epicureans are in error who cast Providence out of human life and do not believe that God takes care of the affairs of the world, nor that the universe is governed and held by that blessed and immortal being, but say that the world is carried along of its own accord, without a ruler and provider; which, were it destitute of a guide to conduct, as they imagine, it would be like ships without pilots which we see drowned by the winds, or like chariots without drivers which are overturned—so would the world be dashed to pieces by its being carried without a providence and so perish and come to naught."

Undoubtedly this is the original meaning of Apiḳoros. See also Frankel, "Monatsschrift," 1852, p. 212, who finds Epicureanism to have affected Judaism in the time of Antigonus of Soko.

Meaning of the Term in Talmudic Literature.

The Talmudic authorities of the third and fourth centuries either did not know the real meaning of the term or extended it intentionally. Some say: "Apiḳoros is one who despises a rabbi, or who insults his neighbor in the presence of a rabbi, or one who says, 'What good did the rabbis do to us? They study Bible and Mishnah לדידהו [for their own pleasure or for their own benefit].'" Another opinion sees the type of the Apiḳoros in the school of Benjamin the Physician, who taught: "What good did the rabbis do to us? They have neither permitted the raven nor prohibited the dove," evidently meaning that their whole work was of little consequence. Another opinion sees an Apiḳoros in a man who speaks of the rabbis disrespectfully as "these rabbis," or addresses his teacher by his name instead of calling him "Rabbi" (Sanh. 99*b*, 100*a*).

In the Tosefta (Sanh., ed. Zuckermandel, xiii. 5, p. 43) the term is evidently used in the stricter sense of the materialist where it is said: "The Minim [Judæo-Christians], the apostates, the informers, and the Apiḳorsim are punished in hell forever." The same passage, with slight changes, is found in the Talmud (R. H. 17*a*); and from it the doctrine of the eternity of hell for the Apiḳorsim is taken into the codes of Alfasi (*ad loc.* ed. Vienna, 209*b*) and of Maimonides ("Yad ha-Ḥazaḳah, Hilkot Teshubah," iii. 5; see also Lampronti, "Paḥad Yiẓḥaḳ," *s.v.* גיהנם, who upholds the belief in the eternity of hell against Leon di Modena).

The Midrash sees a type of the Apiḳoros in the snake (Gen. R. xix.). In Talmud Yerushalmi (Sanh. x. 27*d*), Korah appears as a type of the Apiḳoros by his ridicule of the Law. He asks Moses whether a blue garment requires fringes; and when Moses answers in the affirmative, Korah says: "How ridiculous! One blue cord suffices to comply with the Law, while a garment which is all blue does not" (see also Num. R. xviii. 2 and Tan., Korah, 2, where the word "Apiḳoros," however, does not occur).

In Rabbinical Codes.

The "Shulḥan 'Aruk" defines Apiḳoros as one who does not believe in the divine origin of the Law and in prophecy ("Yoreh De'ah," § 158, 2). The laws concerning such an unbeliever are very strict. He may be killed directly, or his death may be caused indirectly (*ib.*). A scroll of the Law, otherwise a sacred object, if written by an Apiḳoros, shall be burned (*ib.* § 281, 1). A rabbi of recognized standing can not be excommunicated, even if he be a sinner; but if he read a book written by one of the Apiḳorsim his immunity ceases (*ib.* § 334, 42). A man suspected of being an Apiḳoros is not permitted to read the prayers before the congregation ("Oraḥ Ḥayyim," § 53, 18). If an Apiḳoros says a benediction, it is not permitted to respond with "Amen" (*ib.* § 215, 2).

The later rabbis extend the term "Apiḳoros" still further than the Talmudic rabbis. Moses Chages, in his "Leḳeṭ ha-Ḳemaḥ" ("Yoreh De'ah," p. 103*a*, Amsterdam, 1697), thus inveighs against those who refuse to accept blindly the authority of the medieval rabbis: "Satan enters through a needle's eye and teaches people first to refuse obedience to the rabbis of their age, and having become accustomed to this, they reject what displeases them even of the words of great men like Maimonides, saying, 'He was also merely a man of flesh and blood and subject to error like one of us; but it is a fundamental principle of our religion that every one who denies the authority of a religious work, great or small, is called an Apiḳoros.'" Similarly, Eliezer Papo (rabbi in Silistria, Bulgaria, at the beginning of the nineteenth century) says in his very popular text-book of religious ethics, "Pele Yo'eẓ," p. 18*b*, Vienna, 1876: "One who doubts or ridicules one word of the Torah or of the rabbinical authors is an Apiḳoros in the fullest sense, an infidel who has thrown off the yoke; and there is no hope for him."

D.

APION: A Greek grammarian and sophist of Alexandria, noted for his bitter hatred of the Jews; born in the Great Oasis of Egypt between 20 and 30 B.C., died probably at Rome between 45 and 48. As Joel ("Angriffe des Heidenthums," etc., p. 8) points out, his name, derived from the Egyptian bull-god Apis, indicates his Egyptian origin. He was surnamed also Pleistonikides, or son of Pleistonikes (Suidas, and in his epitaph in "Corpus Inscript. Græc." iii., addenda 4742*b*), "the man of many victories"; also Mochthos ("the industrious one"). Apion himself claimed to have been born in Alexandria (see Willrich, "Juden und Griechen vor d. Makkabäischen Erhebung," p. 172), but it seems that he was only brought thither when very young, and educated in the house of Didymus the Great, the grammarian (born 63 B.C., died about 1). He was a pupil of the centenarian Euphranor, while Apollonius, son of Archibius, was his pupil rather than his teacher. When Theon, head of the Homeric grammar school at Alexandria, died, Apion succeeded him in that position, preferring, however, the fanciful etymological method of Didymus and the allegorical one of Krates to the rigid traditional system of Aristarchus. But it was chiefly as an itinerant lecturer on Homer that he gained his great popularity (Seneca, "Epistolæ," p. 88). In this capacity he traveled through Greece and Italy, first during the reign of Tiberius, who, disdaining his unscholarly manner, called him the "World's Drum" (*cymbalum mundi*). In Rome his charlatan methods (*vitium ostentationis*, Gellius, "Noctes Atticæ," v. 14) failed to impress the people favorably. It was in the tumultuous and excitable city of Alexandria, chiefly under Caligula, that his opportunity for using his superficial knowledge to advantage came to him. He utilized both tongue and pen in appealing to the prejudices of the populace, and sedulously fanned the flame of discord during the conflict that broke out between the Jews and Jew-haters in Alexandria, upon Caligula's imperial decree to have his image set up and worshiped by the Jews as well as the rest of the people. Apion labored against the Jews with growing success, and his fellow citizens appointed him at the head of the delegation to the emperor Caligula in the year 40 to

His Political Activity.

present the formal charge of disloyalty against the Jews of Alexandria. It was a foregone conclusion that he would defeat Philo (the philosopher), the head of the Jewish delegation (Josephus, "Ant." xviii. 8, § 1). After this he seems to have settled down in Rome, and opened a school there, numbering Pliny among his disciples. He probably died there, suffering, as Josephus narrates, from an ugly disease to remedy which he vainly resorted to circumcision, the operation he had so often derided in his writings (Josephus, "Contra Ap." ii. 14).

Claim of Universal Knowledge.

Apion was a man of great versatility of intellect, superficially familiar with all branches of knowledge (*περιεργότατος γραμματικῶν*, Julius Africanus). He lectured on the Pyramids and on Pythagoras, on the virtues and vices of Sappho and Anacreon, on the birthplace of Homer as well as on Lais, the noted courtezan. He loved to dwell on the miraculous things in natural science, whereof he eagerly accumulated facts to illustrate all sorts of mythological and superstitious views. He was also a magnetic orator who knew how to appeal to the imagination of the people. Of his extreme vanity both Josephus and Pliny the Elder give ample proofs. He held out the promise of glorious immortality to any one to whom he should inscribe a work of his. "Thus," says Pliny, "speaks one who is the trumpet of his own fame rather than that of the world, as Tiberius called him" (Pliny, preface 25). Again, after enumerating the remarkable men the Greeks produced, he proclaims Alexandria happy in possessing a citizen like himself (Josephus, "Contra Ap." ii. 13). More serious is that trait of his character for which he was called a "Cretan," as synonymous with impostor (see Von Gutschmid, "Kleinere Schriften," iv. 357). He pretended (Pliny, "Historia Naturalis," xxx. 6) to have raised up Homer's shade from the dead by the help of some magic plant, and to have received from it information about the poet's place of birth and parentage, which he was not permitted to disclose; to have received from Kteson, an inhabitant of Ithaca, during his stay there, an exact description of Penelope's suitors' game of draughts (Athenæus, i. 16); to have heard from Egyptian sages the true account of Moses and the Exodus, an account which he simply copied from Manetho (Josephus, *ib.* ii. 2); to have been an eye-witness of the scene at the Circus Maximus when the lion recognized Androclus as his benefactor (Gellius, *l.c.* vi. 4); and of the scene at Puteoli when the dolphin displayed love for a youth (Gellius, *l.c.* vii. 8). It is almost inconceivable how Von Gutschmid (*l.c.* p. 360) can defend Apion against the charges of charlatanism made by Lehrs. Trustworthy contemporaries like Pliny the Elder, Seneca, Gellius, and Athenæus represent him exactly as does Josephus, as a man upon whose statements little reliance can be placed. In the "Clementine Homilies" (iv. 8 *et seq.*, v. 5 *et seq.*) he is introduced both as a believer in magic—if not a fraudulent practitioner of the art—and a defender of Greek mythology.

His Egyptian History.

Apion was a voluminous writer, but few of his writings have been preserved except what is found in the quotations of Josephus, his adversary. He wrote a treatise on the Latin language, and was one of the first to compose a glossary on Homer, probably, as Von Gutschmid says, embodied in the "Lexicon Homericon" of his disciple Apollonius, and hence in the "Etymologicon." He wrote a eulogy on Alexander the Great, as Gutschmid supposes, in recognition of the honor of citizenship conferred upon him by the Alexandrians. Another book of his bore the title "On Homer as a Magician," wherein he treated of the superstitious side of Homeric life, such as the magic plant *μῶλυ*, Circe and Hades, in a manner in keeping with the taste of his age. Apion was the author of "comments" on Homer and on Aristophanes, and also wrote a discourse on Apicius, the gourmet. But his chief work was on Egyptian history, written in close imitation of Manetho's work of the same title, "Ægyptiaca," and embodying the contents of Manetho's other works, the one on the ancient life and worship of the Egyptians, and the other on their theology. It was divided into five books, the first three corresponding with the three of Manetho's books, the other two books with two other works of Manetho, and presented in popular style whatever seemed to be marvelous and interesting to a credulous age. While collecting his stories thus from the most dubious sources in Egyptian history, he assumes to speak with the authority of one who has made personal researches regarding the things which he relates, and on the very spot where they occurred. It appears that he made it his especial object to explain animal-worship and other religious practises of the Egyptians by observations of the marvels of nature, and so he wrote a special work on the study of nature and its forms, wherein he also follows Manetho's example and adopts his pantheistic view. As has been clearly shown by Schürer ("Gesch. d. Jüd. Volkes," iii. 2, 408), it was in the third book of his "Ægyptiaca" (and not in a special book against the Jews, as was erroneously assumed by the Church fathers, and asserted ever since) that those slanders were made by Apion against the Jews which found their way to Tacitus ("History," v. 1–5) and many other writers in Rome, and against which Josephus wrote the second part of his splendid apologetic work, known by the title "Contra Apionem." In the polemical portion of his book, Apion repeated whatever Manetho, Apollonius Molo, Posidonius, Chæremon, and Lysimachus had ever written against the Jews. He first attacks them from the point of view of an Egyptian. He reiterates with considerable embellishment the slanderous tale told by Manetho, of the Jewish people having been led out of Egypt, a horde of lepers, blind and lame. He pretends to have heard from the ancient men of Egypt that Moses was of the city of Heliopolis, the city of the sun, and that is why he taught his people to offer prayers toward the rising sun. To account for the origin of the Sabbath, he tells a story current among the people of the time (if not invented by him) as follows: When the 110,000 lepers (this is the number also given by Lysimachus), expelled from Egypt, had traveled for six days, they developed buboes in their groins, and so they rested on the seventh day for their recuperation. The name for this malady being *Sabbo* in the Egyptian language, they called the day of rest *Sabbath* (Josephus, "Contra Ap." ii. 2–3).

Type of an Anti-Semitic.

Apion next assails the Jews from the point of view of an Alexandrian. He asks how these Jews, coming from Syria, could claim the name and title of Alexandrian citizens, and he upbraids them for not worshiping the same gods as the Egyptians, and specifically for not erecting images to the emperors as all the rest were content to do.

Finally, he derides the religion of the Jews by reiterating all sorts of ridiculous slanders concerning the Temple of Jerusalem. Thus he writes that when Antiochus Epiphanes entered the holy place, he found there an ass's head, made of gold and worth a

Tales About Jewish Worship.

great deal of money. To make the fable still more interesting, he relates that when the Jews were at war with the Idumeans, a man by the name of Zabidus, a worshiper of Apollo, the god of the city of Dora, had come forth promising that he would deliver up the god into the hands of the Jews if they would come with him to the Temple and bring the whole multitude of the Jews with them. He then made a wooden instrument and put it around him, placing three rows of lamps therein, so that he appeared to the men in the distance like a walking star on earth; and while the people, affrighted by the sight, remained quiet and afar off, he went into the Temple, removed the golden head of an ass, and went in great haste back to the city of Dora ("Contra Ap." ii. 10). But as the worst of all calumnies, he lays the charge of human sacrifice upon the Jewish faith—a charge which despite all better knowledge of the fact has so often been repeated. He narrates the following story: "Antiochus found in the Temple a bed and a man lying upon it, with a small table before him laden with dainties, from the fish of the sea and the fowl of the land; the man, on being asked by the king the reason for his being there, told him amid sobs and tears that he was a Greek, who had been traveling through the land to earn his livelihood, when he was suddenly seized and brought to the Temple, and there locked up and fattened on those dainties before him. Wondering at these things, he learned upon inquiry that, according to a law of the Jews, they contrive each year at a certain time to capture a Greek foreigner, fatten him up, and then bring him to a certain forest, where they slay him with religious rites; then, tasting of his entrails, they take an oath upon the sacrifice to be at everlasting enmity with the Greeks, and afterward cast the carcass into a pit. And then the man implored Antiochus, out of reverence to the Greek gods, to rescue him from this peril, inasmuch as he was to be slain within a few days."

Hatred Against All Nations.

Finally, as denoting their hatred of all non-Jews, he makes the statement that "the Jews swear by God, the Maker of heaven, earth, and sea, to bear no good-will to any foreigner, and particularly to none of the Greeks" ("Contra Ap." ii. 11). He ridicules the Jewish sacrifices, their abstention from swine's flesh, and the rite of circumcision (*ib.* ii. 14). As special proof that the Jews have neither good laws nor the right worship of God, Apion singles out the fact that they are never rulers of other nations, but always subjects; wherefore their own city (Jerusalem) had often suffered siege and misfortune. But while Rome was always destined to rule them, the Jews would not even submit to her dominion, notwithstanding her great magnanimity (*ib.* ii. 12). Nor, says Apion, have they ever produced among them any pronounced genius nor inventor of any kind, nor any one at all eminent for wisdom (*ib.* ii. 13).

The few excerpts preserved by Josephus exhibit systematic defamation of the Jew, and are all the more remarkable as they have been repeated almost in the same form, *mutatis mutandis*, throughout the anti-Semitic writings of the centuries, from Tacitus, who reechoed these charges in his "History," v. 2–5, down to these days. They comprise, first, aspersions cast upon the Jewish race; secondly, derogatory statements concerning their patriotism and loyalty as citizens; and, thirdly, malicious misrepresentations of their faith, their religious beliefs and rites—accusations originating in old pagan legends and made by a prejudiced multitude ever anew against the Jews, and for some time also against Christians (see Mueller, "Contra Apionem," pp. 258–260, 263–264; and articles on Ass Worship and Blood Accusations).

Refuted by Josephus.

Apion, however, found a powerful antagonist in Josephus, who, with great skill and fine sarcasm, refuted every one of his statements. His work has become for both Jewish and Christian writers the model of a systematic defense of the faith. Josephus writes: "I had my doubts whether I should refute this demagogue, but as there are so many people who are more easily caught by superficial talk than by accurate knowledge and delight in denunciation more than in commendations, I thought it to be necessary not to let that man off without examination into his accusations; for, after all, people might wish to see a traducer like this once for all exposed to public contempt."

Clement and Apion.

Quite characteristic is the portrait of Apion given in the "Clementine Homilies," v. 2–26 (written about the end of the third century), where Clement relates that he knew Apion to be a great hater of the Jews—one who had written many books against them, and indeed had made friendship with Simon Magus, the Jew-hater, in order to learn from him more against the Jews—and that when, therefore, Apion once called to see him while he was confined to his bed, he pretended that he was sick from love of a woman he could not have. Thereupon Apion, as one proficient with the art of healing, promised to put him in possession of his desired object within six days by the help of magic, and wrote a love-letter or philter, in which he dwelt on all the loves of Zeus and other gods, and showed that to the initiated, as well as to the gods, all illicit loves are permitted. Clement, pretending that he had actually sent the letter to his lady-love, wrote a fictitious reply, purporting to come from the woman, in which she ridiculed and severely censured the gods for their immoral conduct, and closed with the remark that she had learned from a certain Jew to understand and to do things pleasing to God, and not allow herself to be entrapped into adultery by any lying fables; she prayed that Clement too might be helped by God in the effort to be chaste. Apion was enraged upon hearing the letter read, and said: "Have I not reason to hate the Jews? Behold, some Jew has converted her and persuaded her to chastity, and she is no longer accessible to my persuasions. For these fellows, setting God before them as the universal inspector of men's actions, are extremely persistent in chastity, holding that the opposite can not be concealed from Him." Clement then told him that he was not in love with any woman at all, but that after a thorough examination of all other doctrines, he had adopted the doctrine of the unity of God taught him by a certain Jewish linen-merchant, whom he had been fortunate enough to meet in Rome. "Apion then with his unreasonable hatred of the Jews, neither knowing nor wishing to know what their faith was, and being senselessly angry, forthwith quitted Rome in silence."

K.

APOCALYPSE: § I. The Terms "Apocalypse" and "Apocalyptic." An "Apocalypse," in the terminology of early Jewish and Christian literature, is a revelation of hidden things given by God to some one of his chosen saints or (still oftener) the written account of such a revelation. The word is derived from the Greek *ἀποκάλυψις*, "uncovering," "disclosure"; a noun which does not appear at all in classical Greek, and in the later profane writers is not employed in any way that corresponds to the use above mentioned; it seems to have originated among Greek-speaking Jews, and then passed from them to the Christians, who developed it still further.

The Greek verb *ἀποκαλύπτειν* is occasionally employed in the Septuagint to translate the Hebrew גלה ("reveal"); thus, of a secret, Prov. xi. 13; compare Ecclus. iv. 18, xxii. 22, xli. 23 [xlii. 1]; of future events disclosed by God, Amos, iii. 7, and especially in the idioms גלה אזן, "uncover the ear," גלה עינים, "uncover the eyes," meaning "reveal," Num. xxii. 31, xxiv. 4, 16 (compare Enoch, i. 2); compare further I Sam. ii. 27, iii. 21, etc. So also Theodotion's translation of the Aramaic גלא, Dan. ii. 19, 22, 28 *et seq.*, 47. The noun *ἀποκάλυψις* appears in the Greek translation of Ecclus. with the meaning "disclosure" of what is unknown, Ecclus. xxii. 22 (*μυστηρίου ἀποκάλυψις*, "revealing of a mystery"—compare Theodotion's translation of Dan. ii. 19, 28 *et seq.*), xli. 23 [xlii. 1], xi. 27. The nearest approach to this usage which has been observed in a profane writer is the passage in Plutarch, "Moralia," 70 F: *δεῖ γὰρ . . . τῆς ἁμαρτίας τὴν νουθέτησιν καὶ ἀποκάλυψιν ἀπόῤῥητον εἶναι, κ.τ.* (the reference in Stephanus, "Thesaurus"); but it must also have been in use among Greek-speaking Jews at the beginning of the common era in the sense "revelation from God." Thus, when Paul speaks of "visions and revelations [*ἀποκαλύψεις*] of the Lord" (II Cor. xii. 1, 7; I Cor. xiv. 6, 26; compare Justin, "Trypho," p. 81), he is plainly using a term well known to Hellenists, in its history directly connected with the Septuagint use of the verb in such passages as Num. xxii. 31, I Sam. iii. 21, and such use of the noun as that found in Ecclesiasticus (Hermas, "Vision," iii. 3 should perhaps also be compared here). The same may be said of its use in Rev. i. 1; it illustrates Jewish usage. Further evidence of the same kind may be found in the words of Luke, ii. 32, *φῶς εἰς ἀποκάλυψιν ἐθνῶν* (compare the Greek of Ps. xcviii. 2), "a light for revelation to the Gentiles," occurring in a context which is Hebrew through and through. Hellenistic Jews, then, employed the noun *ἀποκάλυψις* in speaking of visions and revelations sent from God. No etymological equivalent of the word in this signification was in use, however, either in Hebrew or in Aramaic. The term commonly used in the Old Testament is חזון (also חזיון, מחזה) "vision";. see, for example, Dan. viii. 1.

Use of the Term.

The use of *ἀποκάλυψις* to designate the written account of such a vision, or the book containing it, was the next step. This usage apparently had its origin in the title given to the New Testament Apocalypse; which title was itself obtained, very naturally, from the opening words *Ἀποκάλυψις Ἰησοῦ Χριστοῦ* (see above), in which the term "revelation" is of course used simply to describe the contents of the book, not as a literary designation. The name Apocalypse was then given to other writings of the same general character, of which many appeared at about this time. From the second century it was applied to a number of books, both Jewish and Christian, which show the same characteristic features. Besides the Apocalypse of John (thus named in some of the earliest of the Christian Fathers), the Muratori fragment, Clement of Alexandria, and others mention an Apocalypse of Peter. Apocalypses of Adam and Abraham (Epiphanius) and of Elias (Jerome) also begin to be mentioned; see, for example, the six titles of this kind in the "List of the 60 Canonical Books" (published, *e.g.*, in Preuschen, "Analecta," p. 159). The use of the Greek noun to designate writings belonging to a certain class of literary products is thus of Christian origin, the original norm of the class being the New Testament Revelation.

In recent times the designation apocalyptic literature, or apocalyptic, has commonly been used to include all the various portions of the Jewish and Christian Scriptures, whether canonical or apocryphal, in which eschatological predictions are given in the form of a revelation. That the term is at present somewhat loosely used, and often made to include what is not properly apocalyptic, is due in part to the fact that the study of this literature as a distinct class is comparatively recent.

§ II. Characteristic Features. Both because of the origin of the name apocalyptic, and still more because of the prominence with which certain well-marked characteristics appear in the typical writings of this class, there is justification for giving the Apocalypse a place by itself, as a distinct branch of literature; and it is both possible and desirable to mark off the boundary lines with some distinctness. As characteristic features of the Apocalypse the following may be noted:

1. It is a revelation of mysteries, things which lie beyond the ordinary range of human knowledge. The Most High gives to His saints definite instruction in regard to hidden matters, whether things altogether foreign to human experience, or merely events in human history which have not yet come to pass. Some of the secrets of heaven are disclosed, in greater or less detail: the purposes of God; the deeds and characteristics of angels and evil spirits; the explanation of natural phenomena; the story of Creation and the history of primitive man; impending events, especially those connected with the future of Israel; the end of the world; the final judgment, and the fate of mankind; the Messianic age; pictures of heaven and hell. In the Book of Enoch, the most comprehensive Jewish Apocalypse, the revelation includes all of these various elements.

2. The disclosure of hidden wisdom is made through a vision or a dream. Because of the peculiar nature of the subject-matter, this is evidently the most natural literary form. Moreover, the manner of the revelation, and the experience of the one who receives it, are generally made more or less prominent. Usually, though not always, the account is given in the first person. There is something portentous in the circumstances, corresponding to the importance of the secrets about to be disclosed. The element of the mysterious, often so prominent in the vision itself, is foreshadowed in the preliminary events. Some of the persistent features of the "apocalyptic tradition" are connected with the circumstances of the vision and the personal experience of the seer. As Daniel after long fasting stands by the river, a heavenly being appears to him, and the revelation follows (Dan. x. 2 *et seq.*). John, in the New Testament Revelation (i. 9 *et seq.*), has a like experience, told in very similar words. Compare also the first chapter of the Greek Apocalypse of Baruch; and the Syriac Apocalypse, vi. 1 *et seq.*, xiii. 1 *et seq.*, lv. 1–3. Or, as the prophet lies upon his bed, distressed for the future of his people, he falls into a sort of trance, and in "the visions of his head" is shown the future. This is the case in Dan. vii. 1 *et seq.*; II Esd. iii. 1–3; and in the Slavonic Book of Enoch, i. 2 *et seq.* As to the description of the effect of the vision upon the seer, see Dan. viii. 27; Enoch, lx. 3; II Esd. v. 14.

3. The introduction of Angels as the bearers of the revelation is also a standing feature. The Most High does not speak in person (contrast the early Hebrew narratives, the visions in Amos, vii.–ix. etc.), but gives His instruction through the medium of His heavenly messengers, who act as the seer's guides or interpreters, bringing the mysteries of the unseen world before his eyes, explaining to him what he sees, answering his questions, and disclosing to him the future. There is hardly an example of a true Apocalypse in which the instrumentality of angels in giving the message is not made prominent. In the Assumption of Moses, which consists mainly of a detailed prediction of the course of Israelite and Jewish history, the announcement is given to Joshua by Moses, just before the death of the latter. So, too, in the Sibylline Oracles, which are for the most part a mere foretelling of future events, the Sibyl is the only speaker. But neither of these books can be called truly representative of apocalyptic literature in the narrower sense (see below). In another writing which has sometimes been classed as apocalyptic, the Book of Jubilees, an angel is indeed the mediator of the revelation, but the vision or dream element is wanting. In this case, however, the book is not at all apocalyptic in its nature.

4. In the typical compositions of this class the chief concern of the writer is with the Future. The Apocalypse is primarily a Prophecy usually with a distinctly religious aim, intended to show God's way of dealing with men, and His ultimate purposes. The writer presents, sometimes very vividly, a picture of coming events, especially those connected with the end of the present age. Thus, in certain of these writings the subject-matter is vaguely described as "that which shall come to pass in the latter days" (Dan. ii. 28; compare verse 29); similarly Dan. x. 14, "to make thee understand what shall befall thy people in the latter days"; compare Enoch, i. 1, 2; x. 2 *et seq.* So, too, in Rev. i. 1 (compare Dan. ii. 28 *et seq.*, LXX.), "Revelation, . . . that which must shortly come to pass." Past history is often included in the vision, but usually only in order to give force and the proper historical setting to the prediction, as the panorama of successive events passes over imperceptibly from the known to the unknown. Thus, in the eleventh chapter of Daniel, the detailed history of the Greek empire in the East, from the conquest of Alexander down to the latter part of the reign of Antiochus Epiphanes (verses 3–39, all presented in the form of a prediction), is continued, without any break, in a scarcely less vivid description (verses 40–45) of events which had not yet taken place, but were only expected by the writer (see next page, § III.); viz., the wars which should result in the death of Antiochus and the fall of his kingdom. All this, however, serves only as the introduction to the remarkable eschatological predictions in the twelfth chapter, in which the main purpose of the book is to be found. Similarly, in the dream recounted in II Esd. xi. and xii., the eagle, representing the Roman empire, is followed by the lion, which is the promised Messiah, who is to deliver the chosen people and establish an everlasting kingdom. The transition from history to prediction is seen in xii. 28, where the expected end of Domitian's reign—and with it the end of the world—is foretold. Still another example of the same kind is Sibyllines, iii. 608–623. Compare perhaps also Assumptio Mosis, vii.–ix. In nearly all the writings which are properly classed as apocalyptic the eschatological element is prominent. In fact, it was the growth of speculation regarding the age to come and the hope for the chosen people (see next page, § III.) which more than anything else occasioned the rise and influenced the development of this sort of literature.

5. Still another characteristic of the Apocalypse is found in certain literary properties which are always present to some extent, and usually are quite prominent. The element of the mysterious, apparent in both the matter and the manner of the writing, is a marked feature in every typical Apocalypse. The literature of visions and dreams has its own traditions, which are remarkably persistent; and this fact is unusually well illustrated in the group of Jewish (or Jewish-Christian) writings under consideration. This apocalyptic quality appears most plainly (*a*) in the use of fantastic imagery. The best illustration is furnished by the strange living creatures which figure in so many of the visions—"beasts" in which the properties of men, animals, birds, reptiles, or purely imaginary beings are combined in a way that is startling and often grotesque. How characteristic a feature this is may be seen from the following list of the most noteworthy passages in which such creatures are introduced: Dan. vii. 1–8, viii. 3–12 (both passages of the greatest importance for the history of apocalyptic literature); Enoch, lxxxv.–xc.; Slavonic Enoch, xii., xv. 1, xix. 6, xlii. 1, etc.; II Esd. xi. 1–xii. 3, 11–32; Greek Apoc. of Bar. ii., iii.; Hebrew Testament, Naphtali's, iii.; Rev. iv. 6 *et seq.* (compare Apoc. of Bar. [Syr.] li. 11), ix. 7–10, 17–19, xiii. 1–18, xvii. 3, 12; Hermas, "Vision," iv. 1. Certain mythical or semimythical beings which appear in the Old Testament are also made to play a part of increasing importance in these books. Thus "Leviathan" and "Behemoth" (Enoch, lx. 7, 8; II Esd. vi. 49–52; Apoc. of Bar. xxix. 4); "Gog and Magog" (Sibyllines, iii. 319 *et seq.*, 512 *et seq.*; compare Enoch, lvi. 5 *et seq.*; Rev. xx. 8). As might be expected, foreign mythologies are also occasionally laid under contribution (see below).

The apocalyptic quality is seen again (*b*) in the frequent use of a mystifying symbolism. This is most strikingly illustrated in the well-known cases where *gematria* is employed for the sake of obscuring the writer's meaning; thus, the mysterious name "Taxo," Assumptio Mosis, ix. 1; the "number of the beast," 666, Rev. xiii. 18; the number 888 ('Ιησοῦς), Sibyllines, i. 326–330. Very similar to this is the frequent enigmatic prophecy of the length of time which must elapse before the events predicted come to pass; thus, the "time, times, and a half," Dan. xii. 7; the "fifty-eight times" of Enoch, xc. 5, Assumptio Mosis, x. 11; the announcement of a certain number of "weeks" or days (without specifying the starting-point), Dan. ix. 24 *et seq.*, xii. 11, 12; Enoch xciii. 3–10; II Esd. xiv. 11, 12; Apoc. of Bar. xxvi.–xxviii.; Rev. xi. 3, xii. 6; compare Assumptio Mosis, vii. 1. The same tendency is seen also in the employment of symbolical language in speaking of certain persons, things, or events; thus, the "horns" of Dan. vii., viii.; Rev. xvii. *et seq.*; the "heads" and "wings" of II Esd. xi. *et seq.*; the seven seals, Rev. vi.; trumpets, viii.; bowls, xvi.; the dragon, Rev. xii. 3–17, xx. 1–3; the eagle, Assumptio Mosis, x. 8; and so on. As typical examples of more elaborate allegories—aside from those in Dan. vii., viii., II Esd. xi., xii., already referred to—may be mentioned: the vision of the bulls and the sheep, Enoch, lxxxv. *et seq.*; the forest, the vine, the fountain, and the cedar, Apoc. of Bar. xxxvi. *et seq.*; the bright and the black waters, *ibid.* liii. *et seq.*; the willow and its branches, Hermas, "Similitudines," viii.

To this description of the literary peculiarities of the Jewish Apocalypse might be added that in its distinctly eschatological portions it exhibits with considerable uniformity the diction and symbolism of the classical Old Testament passages (see below). As this is true, however, in like degree of the bulk of late Jewish and early Christian eschatological literature, most of which is not apocalyptic in the proper sense of the word, it can hardly be treated as a characteristic on a par with those described above.

§ III. Origin and Materials. The origin of the Jewish Apocalypse is to be sought chiefly in the natural development of certain well-defined tendencies in the national literature; possibly also in part, as some have thought, in the influence of foreign religious ideas and literary models. The earliest known example of a Jewish Apocalypse is the Book of Daniel (middle of the second century B.C.), with which book the distinct beginning of a new branch of literature is made (though some hold that a part of the Book of Enoch is anterior to Daniel). But the author of Dan. vii.-xii., though a pioneer and an originator in this department, could hardly be called the creator of the Jewish Apocalypse. Nearly every one of the characteristic features of his work is to be found well established in the earlier literature of his people. Furthermore, the subsequent compositions of this class were not wholly or even largely developed from the materials provided in this book. Like Daniel, and together with it, they were a characteristic product of the times (see below). The extensive Enoch literature, which begins to make its appearance soon after this, is in itself a sufficient demonstration of the fact. It is evident that the materials for this sort of composition were at that time ready to hand. On the other side, the Book of Daniel certainly did determine, to a considerable extent, how the existing materials should be used in the apocalyptic tradition and in the popular eschatology. Its influence on both the religious and the literary side was very great.

Late Hebrew Prophets.

The most nearly related precursor of the Jewish Apocalypse was the characteristically developed eschatological element in the later Hebrew prophecy. The Hebrew ideas concerning the last things were in many respects very similar to those which were held by the surrounding peoples; but the same fundamental beliefs which shaped the religious life of the nation, and determined the development of every other department of its religious literature, showed themselves to be fully operative here also. It was the doctrine of the chosen people, especially, which was the controlling influence in the growth of Hebrew and Jewish eschatology; and this is easily recognized also as the dominant idea in the Jewish Apocalypse.

The hope for Israel cherished by the later prophets finds its completest and most exalted expression in Isa. xl.-lxvi., where the future of the nation is painted in vivid colors and on a magnificent scale: "Israel is the chosen people of the one God, who has plainly declared His purpose ever since the beginning. Though it is now a despised race, trodden under foot, its glorious future is certain." As the horizon of the Jews gradually widened, and they saw more plainly their relative position among the nations of the earth, and the impossibility of gaining any lasting political supremacy, the belief in an age to come, in which righteousness and the true religion should hold undisputed possession, came more and more prominently into the foreground. In the Maccabean age, especially, under the stress of severe persecution, this belief, and the various doctrines connected with it, received a mighty impulse. Thus out of the hope nourished by "Deutero-Isaiah" and his fellows (who are only less eloquent than he in giving voice to it) there grew of necessity the doctrine of "the world to come" (*ha-'olam-ha-ba*); the ever-present contrast between which and "this world" (*ha-'olam-hazeh*) is one of the fundamentals of apocalyptic literature throughout its whole history, though these particular forms of expression are late in appearing (see, however, Enoch, lxxi. 15). Thus, the purpose of the whole elaborate symbolism of Dan. vii. is to be found in the final antithesis between the successive empires of this world and the "everlasting kingdom" of the saints of the Most High (verses 18, 27). Compare also especially II Esd. vii. 50, viii. 1.

"Day of the Lord."

The more unlikely it seemed that Israel would ever be able to get the upper hand of the surrounding nations, the stronger grew the feeling that the final triumph would be preceded by a complete overthrow of the existing order. The present age would come to a sudden end; and a new age, ushered in by the "day of the Lord," would take its place. This "end" (אחרית הימים) would be announced by great portents, and convulsions of nature, "signs" on the earth and in the heavens; and in speaking of these things, a phraseology highly figurative and mysterious became fixed in use. See, for example, Isa. xxiv. *et seq.*, xxxiv. 4, lxvi. 15; Zeph. i. 15; Zech. xiv.; Joel, iii. 3 *et seq.* [ii. 30 *et seq.*], etc.; and compare in the New Testament Matt. xxiv. 29, and the synoptic parallels. These ideas and images were a fruitful source of material for the apocalyptic writings; compare, for example, Sibyl. iii. 796–807; II Esd. v. 1–12, vi. 20–28; Apoc. Bar. xxvii., liii., lxx.; Enoch, xci.-xciii., c.; II Esd. ["5 Ezra"] xv. 5, 20, 34–45; xvi. 18–39.

Moreover, the day of Israel's triumph was to be a day of judgment on the Gentiles. The various phases of this idea made so prominent by the later prophets—a series of final bloody wars, in which the oppressors of Israel shall fall: "Gog and Magog" (Ezek. xxxviii. *et seq.*), the judgment and punishment of the nations by Jehovah (Zeph. iii. 8; Joel, iv. [iii.] 2, 9 *et seq.*)—are elaborated in characteristic manner by the apocalyptic writers. The most striking example is the prediction in Dan. xi. 40–45 (see above, § II. 4).

The idea of a final triumph of God and His heavenly hosts over evil spirits also followed naturally, and kept pace with the development of the Jewish angelology. The "guardian angels" of Dan. ix.-xii., and the punishment of the "fallen stars," which occupies so much space in the Enoch literature, are only elaborations of beliefs which had already received distinct expression; compare Isa. xxiv. 21 *et seq.* (a most important passage), xxvii. 1; Ps. lxxxii.; Deut. xxxii. 8 (Greek); Job, xxxviii. 7, etc. The appearance of the evil spirit "Azazel" in Lev. xvi. 8 *et seq.* is proof that the names of angels and demons were in common use before the days of Daniel and Enoch.

But the eschatological teachings current among the Jews at the beginning of the second century B.C. were not concerned merely with the fate of the nations, and of the people Israel in particular. As the coming "day of the Lord" was looked upon as a time when wrongs were to be set right, it was natural—indeed necessary—that the expected judgment should also appear as the final triumph of the righteous over the wicked, even in Israel. Thus Mal. iii. 1–5, 13–18, 19–21 [iv. 1–3]; Zeph. i. 12; Zech. xiii. 8 *et seq.* Hence the doctrine of the resurrection of the

Doctrine of Resurrection.

righteous Israelites—already formulated in Isa. xxvi. 19 (as the context shows), xxv. 8—which assumed such importance in the hands of the apocalyptic writers, beginning with Dan. xii. 2 and Enoch, xxii. In both of these latter passages, the resurrection of at least a part of the wicked among the Jews is also predicted; and the fact well illustrates the growing prominence of the individual, as contrasted with the nation, in the type of theology which these writings represent. So, too, the picture of a hell of fire, in which those who have done wickedly shall burn, begins now to take a prominent place; *e.g.*, Enoch, lxiii. 10, xcix. 11, c. 9, ciii. 7 *et seq.* Here, also, the Apocalypse was anticipated by the prophet, Isa. lxvi. 24 (compare Isa. xxx. 33).

On the literary side also, as well as on the side of theology, the Apocalypse was in the main a new adaptation and elaboration of recognized Jewish models. Hebrew literature had its "visions" and "dreams," and the popular beliefs as to their importance were like those commonly held among other ancient peoples. The influence of Gen. xl. *et seq.* on the author of the Book of Daniel is easily recognizable. The mysterious visions of Zechariah and Ezekiel contributed much to the traditional pattern of the later group of writings, with which they have so many affinities. The interesting passage Gen. xv. 9–18 (compare verse 1) might almost be called a miniature Apocalypse; notice the way in which it is spoken of in II Esd. iii. 16; Apoc. Bar. iv. 4. Numerous other passages might be mentioned which in some respects mark the transition to the genuine Apocalypse, and may have served to some extent as models. Among these are the Balaam prophecies, Num. xxiv., and the many predictive passages in the Prophets in which the future course of history, the "day of the Lord," or the Messianic age, are pictured in highly poetical and often mystifying language. With these, Vergil, "Ecloga," iv. 4–47, deserves to be compared. Some of the writings commonly classed as apocalyptic, on the other hand, really belong to this same "transition" stage; for example, the principal part of the Sibyllines, and the Assumption of Moses, which are hardly more than specimens of supernatural predictive power, or clairvoyance. Even the second chapter of Daniel may be included here, for it has more affinities with the older literature (for example, the allegories of Ezekiel) than with chapter vii., in spite of its very similar contents.

Mythological Creatures.

The marvelous "beasts" of the apocalypses (see § II. 5) also have their prototypes in the earlier literature (compare the very simple representation in Isa. vi. 2 with Ezek. i. 5 *et seq.*). The frequent employment of mythological creatures and conceptions already familiar in the Old Testament has received notice above (§ II. 5). It is to be observed also that the incorporation of this mythology into Jewish eschatology had already taken place; see especially Isa. xxvii. 1: "In that day the Lord with his sore and great and strong sword shall punish Leviathan the piercing serpent, and Leviathan the crooked serpent: and he shall slay the dragon that is in the sea." Foreign mythological material not found in the Old Testament is also occasionally introduced. Thus, the "dragon with the seven heads" (Rev. xii.) seems to have been derived from the Babylonian mythology (Gunkel, "Schöpfung und Chaos," p. 361, note 2; Bousset, "Offenbarung Johannis," pp. 394, 398). The idea of the creation of the universe in the form of an egg, and the description of the process, in Slavonic Enoch, xxv., are plainly borrowed. Very close parallels are found in both the Hindu and the Egyptian cosmogonies.

Origin of Jewish Apocalypse.

The question whether the origin of the Jewish Apocalypse was to any considerable extent due to foreign literary models is one that can not at present be answered with certainty. The second century B.C. was a time when considerable gains were made for the Jewish religion and literature through the influence of the surrounding nations. The possibility naturally suggests itself that this new adaptation of existing materials, and the fusion of them into so well defined a product, was due to an impulse received from without. Persian influence has generally been looked for first of all, both because of what is known of its contributions to Jewish theology at about this time, and also because of the distinctly Babylonian character of most of the mythological elements incorporated in this literature. But these Babylonian myths had undoubtedly been more or less widely current among the Jews for a long time; with nearly all of them we know this to have been the case. Such mysterious and fantastic elements as these are sure to be taken up, by a natural process, into the literature of the "hidden wisdom." Furthermore, among the ideas which make their appearance in the earlier apocalypses there is hardly anything distinctively Persian; nor, finally, do we know of any Persian writings of this nature which could have furnished the model. So far as literary parallels are concerned, the hypothesis of a Greek or Egyptian source would have more in its favor. Some of the Greek (especially Orphic) eschatological compositions that were current at this time have much in common with the Jewish "Enoch" writings; see Dieterich, "Nekyia," 1893, pp. 217 *et seq.* In the oldest strata of the Sibylline oracles passages of unmistakably heathen origin have been preserved, which present the exact counterpart of such writings as the Assumption of Moses. Another interesting parallel is afforded by a certain Egyptian demotic "chronicle," written in the time of the Ptolemies, which is in fact a "prophecy after the event" of distinctly theological character, couched in mysterious language (Wachsmuth, "Einleitung in das Studium der Alten Geschichte," p. 357). But in regard to these parallels, it must be said again that the evidence of any direct borrowing from Greek or Egyptian sources is wanting. The most probable theory of the origin of the Jewish Apocalypse would seem to be this, that it was a characteristic product of the national religious literature, directly produced and given shape by external conditions; namely, the terrible distress under Antiochus Epiphanes. Like other branches of Jewish literature in the Greek and Roman periods, it certainly assimilated, from the beginning, more or less foreign material; but in its essential features it seems to have been truly Jewish in its origin, as it continued to be in its subsequent history.

§ IV. Development and Influence. One of the most noticeable features in the history of this literature is the constancy with which its own traditions are maintained. Phraseology, imagery, and modes of thought or interpretation are passed on from hand to hand. Numerous illustrations of this fact have already been given; see above, § II. 5. Among still other characteristic examples the following may be mentioned: the "seven heavens," Testaments of the Patriarchs, Levi, iii.; Ascension of Isaiah, vii.–x.; Slavonic Book of Enoch, iii.–xx.; Greek Apoc. Bar. ii.–xi. (in its original form, probably); the "seven angels," Enoch, xx. (see Greek MSS.; Testament Patriarchs, Levi, viii.; Rev. viii. 1, etc.; compare Hermas, "Simil." ix. 6, 12; the "watchers" (ἐγρήγοροι, עירין), Dan. iv. 14 (20 Masoretic text); Enoch, i. 5, xii. 2, etc.; Slav. Enoch, xviii. 3; Testament Naphtali, iii.; the great beasts which "came up out of the sea," Dan. vii. 3; II Esd. xi. 1; Rev. xiii. 1; the traditional employment of such monsters to symbolize the heathen world-powers, successive rulers being represented by a series of heads, horns, or wings, and so on. In point of theological teaching, also, there is to be observed the same noteworthy transmission of material (see the examples in § III.). It is plain that the fixity of this "apocalyptic tradition" is due to the nature of the subject-matter. The writer of such visions of the future was obliged to deal to some extent with definite things—persons, events, times, and places. The end of the world, for example, could take place in but one way; and after the scene had once been described, a subsequent writer on this theme could not disregard or contradict the former description without throwing discredit upon his own work. In no other branch of literature is it so indispensable—and so easy—to have the support of tradition. It was this desire for authenticity, chiefly, that caused the most of these writings to be put forth under the names of former great men of Israel. Only in the case of the Christian "Shepherd" of Hermas does the author write in his own name.

In spite of this uniformity of tradition, the books of this group exhibit very considerable diversity.

Controlling Motives.

In the development of Jewish apocalyptic literature two controlling motives may be especially observed: interest in the future—especially the future of the true Israel—and interest in the secrets of the universe. The two oldest apocalypses that have been preserved—Daniel and Enoch—may serve to represent these two main divisions. The Book of Daniel is the most strongly patriotic of all the apocalypses. Very little attention is paid in it to the unseen world; no great interest in the current mythology is apparent; here alone among all the writings of this class there is no reference to the ancient Hebrew history. The eschatology of the book—immensely important as it is, and strongly emphasized by the author himself—is crowded into the briefest possible space, vii. 13 *et seq.*, 27, xii. 1-3. Angels are made prominent only for the purpose of emphasizing the fact that God and His hosts are in direct control of all that has come upon the Jews. That to which everything else is subordinated is the prediction of the immediate future. The Jews are soon to be delivered from their oppressors, and the faithful will triumph forever. Another book, to be associated with Daniel in the above classification, but of a very different character, is II Esdras. In this another and most important line of development is exemplified. Theological interests are in the foreground. Questions concerning the dealing of God with His people, and His ultimate purposes for them, are asked and answered. The doctrine of the Messiah is plainly set forth. In all these respects, the (Syriac) Apocalypse of Baruch is the counterpart of II Esdras.

The Book of Enoch, representing the other main division of this literature, is chiefly concerned with the heavens above, and the mysteries of the universe. Interest in the future of Israel is by no means wanting, but it occupies a very subordinate place. Angels and demons, the heavenly bodies, the places and conditions of departed spirits, are among the subjects which receive most attention. The book is composite, consisting, in fact, of several independent books of different dates; its national apocalyptic portion belongs in time near the Book of Daniel. A number of apocalypses, generally of minor religious value, follow in this track. The most noteworthy example of degeneration along this line is furnished by the Greek Apocalypse Baruch.

Both of these varieties of apocalyptic exercised a profound influence on the nation. Such doctrines, common to both of them, as those of the resurrection, the millennium, and the Messianic kingdom, were soon given an assured place in the common belief. The elaborate mythology and occult science of the Enoch literature were inherited by the Jewish Midrash and the early Christian writings. As for the more distinctly patriotic apocalypses, especially Daniel and II Esdras, there is abundant evidence that they gave in full measure what they were designed to give: encouragement, and a new religious impulse to the pious in Israel. For the detailed evidence of their great influence on the development of both Jewish and Christian theology, see the articles devoted to the separate books.

The Jewish apocalyptic writings were not the property of any sect or school. Their point of view was in general that of Palestinian orthodoxy, of the type of which the Pharisees were the best representatives. Most of them, but probably not all, were written in Palestine. Most of them, but not all, were composed in the Hebrew language. It is a mistake to regard the writers as men of a pessimistic turn of mind, or to contrast them sharply, as a class, with the prophets. So far as religious teaching is concerned, it is not possible to draw any distinct line between prophecy and Apocalypse. The development in this regard was continuous, as some, at least, of the writers themselves felt; see the use of προφητεία, Rev. i. 3, xxii. 7 *et seq.* The appearance of the successive apocalypses did not mark successive periods of persecution, or unusual distress, as has sometimes been assumed. After the Book of Daniel, there is no evidence that any writing of this kind was called forth by the immediate circumstances of the people.

From the Jews this type of composition passed over to the Christians, who both wrote books of their own on this model, and still oftener appropriated existing Jewish books in their entirety or interpolated them. The additions to II Esdras (chaps. i., ii., xv., xvi.; called also "5 Ezra") are perhaps the most striking illustration of the last-named process. Other examples will be mentioned below.

§ V. The Jewish Apocalypses. The following is a list of the chief representatives of Jewish apocalyptic. As the several books are treated at length elsewhere, only the briefest description of them is given here, the aim being to present in each case such particulars as will best illustrate the history of the growth of this literature.

1. **Daniel.** The latter part of this book (written probably 165 B.C.) is the oldest Jewish Apocalypse known to us. Chaps. i., iii.-vi. have little or none of the "apocalyptic" character. For a characterization of chaps. vii.-xii., see above, § IV.

2. **Enoch.** Oldest portion written about 120 B.C.; the remainder within a period of perhaps fifty years. Original language was certainly Semitic, probably Hebrew. For the most part it is typically apocalyptic, and a mine of characteristic material; see § IV. Especially prominent features are angelology, secrets of the unseen world, explanation of natural phenomena, the history of the world, arranged in its successive "periods," and the Messianic kingdom.

3. **Slavonic Enoch** (or **Book of the Secrets of Enoch**). Written probably in the former half of the first century of the common era. Original language

was probably Greek. General character like that of the older book, but much more influenced by Greek thought. It contains some philosophical speculation. There are marked Gnostic elements, especially in the very detailed account of the Creation. Noteworthy features: the seven heavens, the millennium, and the condition of souls after death. The book is Jewish throughout. Some writers have attempted, but without sufficient reason, to show that it contains Christian additions and interpolations.

4. **Assumption of Moses.** Written, probably in Hebrew, at about the beginning of the common era. In form, not a vision or dream, but a prediction of the future history of Israel delivered to Joshua by Moses. The material which is more or less apocalyptic in character is contained in chaps. vii.-x., with which Dan. xi. 40-xii. 13 may be compared. The book as known to us is incomplete.

5. **II Esdras** (also **4 Ezra**). The Semitic (apparently Hebrew) original was composed about the year 90. In all respects a typical Apocalypse of the theological type, of which it is the best specimen. The instruction in hidden things here has to do chiefly with matters of religion and faith. Teaching by allegory is a prominent feature. The influence of Daniel (referred to by name in xii. 11) is very noticeable, especially in the dream-visions, chaps. xi.-xiii. The "signs of the end," v. 1-13, vi. 18-28. Messianic predictions, xii. 31 *et seq.*; xiii. 32 *et seq.*; 51 *et seq.*; xiv. 9, etc. The general resurrection, and last judgment, vii. 30-35. Extended account of the condition of souls after death, vii. 78-98. The standpoint of the book throughout is that of Palestinian Judaism (contrast, *e.g.*, the account of the Creation, vi. 38-54, with Slavonic Enoch, xxv.-xxx.), but the author is decidedly original, as well as orthodox. Chaps. i., ii., xv., xvi. are a later addition, apparently of Christian origin (see ii. 42-48).

6. **Apocalypse of Baruch** (preserved entire only in Syriac; hence sometimes termed the "Syriac Apoc. Bar."). Beginning of the second century. Original language Hebrew or Aramaic. A series of visions, connected by narrative, hortatory, or sometimes highly rhetorical passages. In its general character, the book is the inferior counterpart of II Esdras, to which it also sustains a very close literary relationship, the correspondence extending even to the phraseology. The features mentioned above as characteristic of II Esdras are present here also. The appended letter (chaps. lxxvii.-lxxxvii.) contains nothing of an apocalyptic nature.

7. **Greek Apocalypse of Baruch.** Greek text first published in 1897; an abridged Slavonic recension known since 1886. A work dating from the latter part of the second century. Originally Jewish, but now containing Christian additions. A good example of a degenerate Apocalypse of the Enoch type (see § IV.). Baruch is conducted by an angel through the five (originally seven?) heavens, and sees strange sights, the account of which is grotesque rather than impressive. Next to nothing is said about the future; and the religious element, usually so prominent in this literature, is almost wholy wanting. There is evident dependence on the Slavonic Enoch, as well as on the earlier Baruch literature.

8. **The Sibylline Oracles,** Books III.-V. A Jewish adaptation and expansion of similar heathen "oracles." The hypothesis of still further Christian additions is without sufficient ground. The plainly Jewish portions date from 140 B.C. down to about 80 of the present era. These Oracles lie quite outside the course of the characteristic apocalyptic tradition; but furnish in part a good example of the nearly related class of prophetical-eschatological writings (see § III.). Thus, in Book III., which contains the passages most nearly resembling the true Apocalypse: prediction of the successive kingdoms which are to bear rule over the Jews; the woes to come upon the various lands; the signs of the end of the world; the judgment day; the blessed age to come: lines 71-92, 167-198, 295-561, 608-623, 767-806. Similar passages in Book IV.: 40-48, 172-183. In Book V.: 155-161, 260 *et seq.*, 344-385, 414-433, 512-531. With all these, the familiar passages in Joel, Zech. xiv., Malachi, Isa. xxiv. *et seq.* should be compared.

9. **Testaments of the Twelve Patriarchs.** Probably a work of the first century of the common era, originally written in Hebrew. Chiefly haggadic Midrash, combined with some predictive prophecy. The only apocalyptic portions are in the Testaments of Levi and Naphtali. In Levi two visions are described: the seven heavens, ii.-v.; the seven angels, viii. See also xviii., prediction of the Messianic age. In Naphtali, v., vi. (Hebrew text, ii.-vi.), two dreams are narrated, which have something of the apocalyptic character. The whole book, in the form known to us, has been edited by Christian hands.

10. **Life of Adam and Eve** (or, in another recension, the **Apocalypse of Moses**). Original language probably Hebrew; date uncertain. It has received some Christian additions. The book contains hardly anything apocalyptic in the narrower sense; see, however, Apoc. Mosis, xiii.; prediction of the resurrection and of the future bliss in paradise (compare Dan. xii. 1 *et seq.*); and the fantastic visions in Apoc. Mosis, xxxiii.-xlii.; compare also Life of Adam and Eve, xxv.-xxviii. See ADAM, BOOK OF.

The following also deserve mention:

The Book of Jubilees. Sometimes classed with this literature, and in Syncellus (ed. Dindorf, i. 5) called the **Apocalypse of Moses.** It purports to have been given, through angels, to Moses on Mount Sinai, but in the character of its contents it is very far removed from being an Apocalypse. **Ascension of Isaiah** (also Vision of Isaiah). A brief Apocalypse, found combined with the older Jewish "Martyrdom of Isaiah," of which it forms chaps. vi.-xi., and also existing separately. It is a Christian product, however; the theory of a Jewish kernel is hardly tenable. **Apocalypse of Abraham.** A true Apocalypse, of the second century. Apparently Jewish, with Christian additions. Preserved only in a Slavonic version (ed. Bonwetsch, 1897). **Apocalypses of Elias** and **Zephaniah.** Coptic fragments, ed. Steindorff, 1899. Both probably Jewish in origin, but worked over by Christian hands. The **Apocalypses of Moses** and **Esdras** published by Tischendorf, "Apocalypses Apocryphæ," 1866, are Christian works. **Apocalypse of Sedrachis,** a late production, dependent on Tischendorf's "Apocalypsis Esdræ," and also upon II Esdras. Ed. by James, "Apocrypha Anecdota," 1893, pp. 127-137. **Apocalypse of Adam** is a Greek fragment described by James, *l.c.* 138-145. **Testament of Abraham,** and **Testaments of Abraham, Isaac, and Jacob** are published, or translated in extract, by James and Barnes, "Texts and Studies," ii. 2, 1892. These all contain some apocalyptic material, perhaps Jewish.

For a partial account of some characteristic medieval apocalypses, see Bousset, "Antichrist" (English trans.), pp. 72-78. Of the early Christian writings of this class, the most important for the history of Jewish apocalyptic literature are the New Testament **Revelations** and the **Shepherd of Hermas.** See also APOCRYPHA, ESCHATOLOGY, and the literature on the several apocalypses.

C. C. T.

Growth Out of the Older.

APOCALYPTIC LITERATURE, NEO-HEBRAIC: The Neo-Hebraic apocalyptic forms but one branch of Apocalyptic Literature, a species of literature exhibiting many ramifications, and represented in a complex but unbroken chain, from the time of the Maccabean War down to the close of the Middle Ages. It is characteristic of Apocalyptic Literature from its very beginning that it did not remain confined to its native Palestine. It made its way almost immediately to Hellenistic Alexandria, where it appears in the Greek language under the mask of the heathen Sibyl and with other mythological embellishments. The same thing occurred again when, at the rise of Christianity, the Church took over the apocalyptic without change in essence or even in artistic form from the Synagogue, and made it her own—a fact admitted by all modern New Testament critics—and the apocalyptic writings, thereafter naturalized in the literatures of the Occident as of the Orient, may be traced through the centuries. Nor did this transplanting process take place only in apostolic times. In the course of its development the Christian apocalyptic drew freely from later Jewish sources, which, on the other hand, were often influenced directly or indirectly by the apocalyptic of the Church. Considering this uninterrupted flux and reflux of Apocalyptic Literature during upward of a millennium and a half, it seems on the face of the matter improbable that the Neo-Hebraic apocalyptic should date no farther back than the middle of the eighth century, as Zunz (compare "L. G." pp. 603 *et seq.*; "G. V." 295, ix. 417 *et seq.*) and Grätz ("Gesch." v. 441; "Monatsschrift," viii. 67 *et seq.*, 103 *et seq.*, 140 *et seq.*, ix. 60 *et seq.*) maintained, and still more improbable, that it should exhibit, as these scholars believed, an entirely new character and trend of thought, the resultant of the specific influences and tendencies operating in medieval times. The apocalyptic research and discoveries of the last few decades have proved, indeed, that quite opposite conclusions as to date and character must be drawn. It has been shown ever more convincingly, that the characteristic feature of Apocalyptic Literature is constancy in ideas, the same set of thoughts being handed down from generation to generation without undergoing any material modification. It has been pointed out further, that the intricate connection among the different apocalypses, where direct literary influence is frequently out of the question, can be explained only by the assumption of an apocalyptic tradition, transmitted orally as an esoteric doctrine. In the same way as Christianity created no new and characteristic apocalyptic expectations, so a later age adopted its apocalyptic material ready for use from the past; the Middle Ages did not create nor invent in this province, they merely worked over the material handed down to them, putting merely a new stamp on the old coin; their task was, on the one hand, to apply the old hopes and promises to the present, and, on the other, to interpret the present according to these hopes. In the case of the Neo-Hebraic apocalyptic it was precisely the same.

The nature and object of the Neo-Hebraic are the same as those of the older apocalyptic. The great question in it, too, is, how and when will the period of Messianic glory be realized: a natural question in postexilic times, in the face of the unfulfilled promises of the Prophets. The answer—identical with that given in Daniel and the succeeding apocalypses—lay in the dualistic conception of two worlds: a present world (עולם הזה), corrupt by reason of the evil powers inherent in it; and a future ideal world (עולם הבא)—a conception of things due, in part at least, to foreign influences. The logical consequence of this dualistic belief was (1) that God's plan of salvation can be realized only after all the evil powers—the host of Satan and the heathen subject to them, together with the world itself—shall have been annihilated, and (2) that the future world, with all its blessings preexisting from eternity in heaven, shall then, at the end of time, descend thence and replace the old world, having the perfect, glorious New Jerusalem for its center. In the Neo-Hebrew, as in the older Apocalyptic Literature, the eschatological drama is enacted not in one era, but in two: the temporary Messianic interim, and the everlasting kingdom of heavenly bliss—the latter offset by the everlasting torments of hell in store for the wicked.

General Tone.

In general tone and coloring the older apocalypse served as model for the Neo-Hebrew. It shows the same particularism and narrow nationalism that predominate in the later, according to which the kingdom of God means salvation for faithful Israel alone, but for the unrepentant heathen world damnation. Similarly the Christian apocalyptic grants future bliss only to the faithful adherents of the Church. In like manner, the gross sensuousness in the detailed description of the joys of the Messianic and supramundane world is quite common in the older apocalyptic. So also is the fact that besides the revelations regarding the end of time, and the occurrences in that period, there are not infrequently other revelations concerning supernatural subjects—for example, heaven, hell, and paradise, the mysteries of the Creation, the course of the universe, angels, and the whole world of spirits, even God Himself—and in these revelations, the fantasy in the older apocalyptic is quite as unrestrained and extravagant as that in the later. Similarly, the one-sided emphasis laid in the Neo-Hebraic apocalyptic upon the ideal way in which the Torah is to be fostered in the future world, and on the pouring out of the Holy Spirit over all men, is in conformity with the spirit of the older apocalyptic; in fact, is in accord with the whole development of the religious life and thought of the Jews from the time of the Maccabees, according to which the Torah is not only the creative, preservative principle, which existed ages before the creation of the world as the essence of God's consciousness, but is also the sum and center of God's design with man (compare Sirach, xxiv.; Baruch, iii. 14 to iv. 1; Enoch, xlviii. 1; Sibylline, iii. 757 *et seq.*, 769 *et seq.*, 787; Abot, vi. 10; Pes. 54*a*; Zeb. 116*a*; Mekilta, 68*b*—ed. Weiss; B. B. 75*a*; Pesik. 107*a*—ed. Buber—etc.). Schürer's remark is to the point, that fulfilment of the Law and hope of future glory were the two poles around which the whole religious life of later Judaism revolved ("Gesch." 3d ed., ii. 466 *et seq.*). This also accounts for the fact that the apocalypses repeatedly contain legal instruction and exposition of the Law besides the revelation of the future and other supernatural mysteries; see Book of Jubilees and Testaments of the Twelve Patriarchs for the older literature, and the "Alphabets of R. 'Akiba" and "Otot" or "Milḥamot Melek ha-Mashiaḥ" for the Neo-Hebrew.

Finally, the Neo-Hebrew apocalypses likewise show all the external characteristics of the older. Like these, they claim to be revelations made through the medium of angels, and their authors conceal their real identity by pseudonyms, borrowing for this purpose the names of celebrated holy men of the past—hence the name *Pseudepigrapha* for the apocalyptic writings. The authors skilfully add plausibility to the claim that their writings are ancient prophecies, by making a review of contemporary, and frequently also of past, history, in the guise of a vision of the future. In this way every apocalypse contains the key to the date of its origin, this date coinciding with that period at which such "prophecy after the event" breaks off, and the real prophecy of the future begins, the prediction of the immediate approach of judgment for the wicked and of salvation for the good. This pious deception on the part of the writers was for the purpose of awakening in the hearts of their readers, who were living in a period of gloom and bitter trial, that belief in the blissful future promised them, which filled their own souls. For in times of oppression and persecution the apocalypse was essentially the literary medium through which the minds of the faithful were appealed to, and it could attain such power only through an alleged sanctity as an ancient revelation.

External Characteristics.

This leads to the corollary that every age of great political agitation had its apocalypses, and that it would seem impossible that all productive activity in this sphere should have lain utterly dormant during the Talmudic period. The oldest apocalyptic monument, the Book of Daniel, is the direct fruit of the fanatical religious persecution exercised by Antiochus Epiphanes (see Apocalypse). When the Jews came into conflict with the Roman empire, a conflict lasting for two centuries, every phase of this varying drama was accompanied by apocalypses, from the conquest of Jerusalem by Pompey to the despotic rule of Antony and Cleopatra in Egypt, and down to the last desperate struggle and bloody persecution under Hadrian. In like manner, as will be mentioned, there are apocalypses contemporaneous with the great political vicissitudes of the Sassanian period (227–642). But apart from independent apocalypses themselves, the Talmud contains much apocalyptic matter that not only attests the interest with which the Jews followed the wars against Rome waged by Sapor I. (died 271) and Sapor II. (died 379), believing that these wars were the unmistakable signs of the imminence of God's kingdom, but proves also beyond doubt that apocalyptic writing flourished no less in Talmudic than in post-Talmudic times. For example, a passage in Yoma, 10*a*, for which Joshua b. Levi, a contemporary of Sapor I., is mentioned as the authority, shows how, in the face of the victorious wars of Sapor I. against Rome, the prophecy contained in Dan. viii. (about the war between the Medo-Persian and the Grecian kingdoms) was believed to refer to Sapor's wars with Rome. To determine the ultimate issue of these wars, an old and familiar apocalyptic tradition was there cited, according to which, before the advent of the Messiah, Rome, the fourth and last world-monarchy, would extend her godless dominion over the whole world for the space of nine months. Similarly, in Shebu. 6*b* there is a passage dating from the time of Sapor II.'s wars with Rome, in which the statement in Dan. vii. 23 about the fourth world-monarchy is quoted to show conclusively that no other outcome is possible than that Rome should triumph over Persia. In Sanh. 97*a*–98*b* there are preserved a number of apocalyptic calculations of those times; also, among other things, excerpts from revelations which the above-mentioned R. Joshua b. Levi—who also figures as the author of an apocalypse (see below)—was supposed to have received from the mouth of the prophet Elijah as well as from the very Messiah himself.

In the Talmudic Age.

The entire Apocalyptic Literature is of great historical value. Toward the close of antiquity and through the Middle Ages it exercised extensive and permanent influence on the thought of the times. It reflects the hopes and fears which swayed the masses for over fifteen hundred years, and reflects them more directly than any other class of contemporary literature. All the strange erratic thoughts—which seem now but the outgrowth of a morbid fantasy, so grotesque and unmeaning do they appear—were once full of life and keen significance, and had the power to move the readers to the depths of their being. The uneasiness and solicitude about the approaching end of the world, which were of constant recurrence during the Middle Ages, were nothing more than the impression made by the threats and promises of the apocalypses upon minds already susceptible and excited by external events. And in the history of the Jews in particular, the apocalypse was one of the most telling factors, contributing, as it did in such large measure, to determine the unique course of its development until long after the close of the Middle Ages. The courage and persistency in their belief which the Jews have shown from the time of the Maccabees down to modern times, their indomitable hope under persecution, their scorn of death, were all nourished by the Apocalyptic Literature. The darker their present grew, the more desperate their condition in the later medieval period, the more eagerly did their minds turn to the comfort offered by the apocalyptic promises which predicted the end of their suffering and the dawn of their delivery.

Historical Value.

The following outlines of the separate apocalypses will illustrate the characteristics of the Neo-Hebrew apocalyptic. Only certain general points, however, are treated here, as the preliminary investigation, upon which any exhaustive treatment would have to be based, has not yet been made in this branch of Apocalyptic Literature.

1. Book of Enoch (Ḥanok), ספר חנוך: Even up to the present day this book has been confounded with "Pirḳe Hekalot," also said to have been written by R. Ishmael, and hence has been called erroneously ספר היכלות. That the "Book of Enoch" is the original title is established by a manuscript in the Bodleian Library, and by the fact that the apocalypse is quoted under that name in the older medieval literature. There are two editions of this book, one by Jellinek, bearing the title ספר היכלות ונקרא גם כן ספר חנוך ("Bet ha-Midrash," 1873, v. 170–190), giving the text of the Munich Codex, No. 40, f. 121*b*–132 (not f. 94–102, as there described by Jellinek). The other appeared under the title ספר היכלות מהתנא ר׳ ישמעאל כהן גדול (printed together with a prayer attributed to R. Ishmael), in Lemberg, 1864, and was reprinted in Warsaw, 1875. According to the title-page, the latter gives the text of a very old manuscript, and in many cases has better readings than Jellinek's edition. An unedited manuscript of this apocalypse is in the Bodleian Library (Op-

Book of Enoch.

penheimer, 556, old number 1061), and bears the title ספר חנוך לר׳ ישמעאל כהן גדול (see Neubauer, "Cat. Bodl. Hebr. MSS." No. 1656, 2; Steinschneider, "Cat. Bodl." pp. 532 *et seq.*). Both the printed editions are incomplete, but fortunately they supplement each other.

After chapter xvi. of Jellinek's edition six chapters are missing. The Lemberg edition breaks off suddenly in the middle of the apocalypse, what follows belonging to "Hekalot Rabbati" with the exception of the "addition" (תוספת) in chapter xxix., which is taken probably from one of the recensions of the Alphabet-Midrash of R. Akiba (see below). The number of chapters in Jellinek is forty-two, which, with the six missing chapters (supplied by the Lemberg edition) makes forty-eight, and this is also the number which, according to Neubauer, is contained in the Bodleian manuscript.

This apocalypse is quoted very often in the rabbinical literature of the Middle Ages, particularly in the cabalistic branch. In the Zohar it is even twice called "Sefer Razin de Ḥanok" ("The Book of the Secrets of Enoch") (at the beginning of section *Teẓawweh*, ii. f. 80*b*, ed. Amst.; for other passages in the Zohar in which the book is quoted, see Zunz, "Etwas über Rabbinische Literatur," p. 13). Excerpts of chaps. i. to xvi. are contained in the manuscript works of Eleazar of Worms (Cod. Munich, 81) "with many better readings" than in Jellinek (Steinschneider, "Hebr. Bibl." xiv. 32 *et seq.*). A new critical edition is much to be desired, and in connection with the preparation of such, it would be necessary to determine to what extent the quotations from the Book of Enoch in the rabbinical literature of the Middle Ages belong to the present book, or are taken from other books of Enoch. There are, for example, lengthy quotations from the Book of Enoch in the manuscript work, "Mishkan ha-'Edut" of Moses de Leon, which are not in the book under consideration (given by Jellinek, "B. H." ii. 31, iii. 195 *et seq.*, and variants by Steinschneider, "Hebr. Bibl." iv. 152 *et seq.*).

This book is an interesting specimen of the apocalypse, and illustrates strikingly many of the characteristics of the literature to which it belongs. It shows an intimate dependence upon the "Book of the Secrets of Enoch" discovered some years ago in a Slavonic translation. A brief synopsis of the book will best show the metamorphosis which the old pseudepigraphic writing underwent, and what new elements from other apocalypses were added in the process; it will also show that there is justification for considering it a genuine apocalypse and treating it altogether apart from the "Hekalot" literature.

The book opens with the verse Gen. v. 24 concerning Enoch's godly life. R. Ishmael narrates how he ascended into heaven to see the Merkabah, and how, after he had passed through six heavenly halls, Meṭaṭron came to meet him at the entrance to the seventh, and conducted him inside, leading him straight before the celestial chariot into the presence of God (compare "Secrets of Enoch," xxi. 2*b*–5). At the sight of the heavenly hosts Ishmael fell unconscious; but God motioned them back and Meṭaṭron restored Ishmael to consciousness. Ishmael then proclaimed the glory of the Lord, and all the angels joined him. In chap. ii. Meṭaṭron conquers the objection of the angels to Ishmael's approach to God's throne. In chaps. iii.–v. and vii.–xvi. Meṭaṭron relates to Ishmael that he is Enoch b. Jared, and that at the time of the Deluge God had him translated to heaven, by his angel 'Anpi'el, in a chariot of fire, that there he might bear eternal witness against his sinful contemporaries. Further, that God, overcoming the protests of the heavenly hosts, transfigured him with the rays of heavenly glory and made him as one of themselves, in order that he might serve before His throne as one of the highest angel-princes (compare "Secrets of Enoch," xxii. 6*b*–10); that first, however, the Angel of Wisdom, at God's command, had instructed him in all wisdom and knowledge (compare *ib.* xxii. 11, 12 and xxiii.) and had imparted to him all the mysteries of creation, of heaven and earth, of past and future things, and of the world to come (compare *ib.* xxiv.–xxxiii. 2). In chap. vi. Meṭaṭron tells Ishmael that, after Adam was driven out of paradise, God abode under the tree of life, and the angels and heavenly hosts descended to the earth in many divisions. Adam and his generation, sitting at the entrance to paradise, beheld the heavenly glory until, in the time of Enoch, 'Aza and 'Azael led men to idolatry (compare *ib.* xxxi. 2, where it is said, however, that at the time Adam dwelt in paradise "God made the heavens open to him that he might behold the angels," etc., and the following words, the meaning of which is obscure, occur: "and he was constantly in paradise").

Contents of "Enoch."

Chaps. xviii.–xxii. (not in Jellinek's edition) describe the seven heavens with their hosts of angels, and the courses of the sun, moon, and stars, dwelling with special minuteness on the highest heaven and its hosts. This account is an interesting mixture of the description of the seven heavens contained in "Ascensio Isaiæ" and of that given in the "Secrets of Enoch." As in the former, the seven heavens are represented as being inhabited by angels, and as increasing in glory in each successive heaven; and they are described in the descending order. And just as recension A of "Secrets of Enoch" mentions, besides the seven heavens, an eighth (*muzalot*) and a ninth (*kuchavim*) and above them all a tenth (*'arabot*), the seat of God's glory, so this book has a separate heaven for the sun and moon, together with the stations of the moon (*mazzalot*), another for the stars (*kokabim*)—with the difference, however, that these two are under the seven heavens—and a highest heaven over them all, called here also *'arabot*, the abode of God and of the highest angelic hosts.

In chap. xxiii. Meṭaṭron describes to Ishmael the winds issuing from the cherubim of the heavenly chariot, and tells how these, after traversing the universe, enter paradise to waft the fragrant odors and exquisite perfumes there unto the pious and just, for whom paradise and the tree of life are prepared as an eternal inheritance (compare "Secrets of Enoch," ix. and the somewhat obscure passage in viii. 5*d*–6). In chaps. xxiv.–xxvi. Enoch (Meṭaṭron) gives Ishmael a description of the chariot and of the many-eyed, radiant, God-praising Ofanim and Seraphim (compare *ib.* xx. 1, xxi. 1), the latter of which burn the accusations against Israel, which Satan, in conspiracy with the guardian angel of Rome and the guardian angel of Persia, continually sends in. In chap. xxvii. he describes the archangel Radveri'el, the heavenly registrar and keeper of the archives (compare *ib.* xxii. 11 *et seq.*); in xxviii.–xxix., the "Irin and Kaddishin," who daily sit in judgment with God; in xxx.–xxxiv., the judgment itself; in xxxv.–xl. he tells how the heavenly hosts pass into the presence of God to praise and glorify Him with the song, "Holy, Holy, Holy is the Lord Ẓebaot!" and how, at that, the Ofanim, Cherubim, Ḥayyot, and Seraphim standing around the throne prostrate themselves in adoration, responding with, "Praised be the glory of His Kingdom forever!" (compare *ib.* xx. 3*b*–xxi. 1).

In chaps. xli.-xlvii. Enoch (Meṭaṭron) reveals to Ishmael the mysteries of creation, and shows him the repositories of the rain, snow, hail, thunder, and lightning; the courses of the stars; the spirits of those angels who were punished because they did not give praise to God at the right time, and whose bodies were turned to great fiery mountains (in striking analogy to Ethiopic Enoch, xviii. 11-16, xxi.); the souls of the righteous departed, who hover around God's throne in the form of birds, and the souls of the righteous yet unborn; the places of punishment and the tortures of the wicked in hell (compare "Secrets of Enoch," x.). Then Ishmael sees how the souls of the Patriarchs and of all the righteous ascend out of their graves to heaven, beseeching God to deliver His people Israel from their bondage among the heathen. God answers them that the sins of the wicked hold back the delivery of His people and the realization of His kingdom. While the Patriarchs are weeping at this declaration, Michael, Israel's guardian angel, intervenes, pleading for Israel's delivery. Thereupon Meṭaṭron lets Ishmael survey all past and future ages from Adam to the end of time: he sees Messiah b. Joseph and his age, and Messiah b. David and his age, together with the wars of Gog and Magog and the other events of the Messianic era. In the concluding chapter (xlviii.), Meṭaṭron shows Ishmael the glorious future Jerusalem, where the souls of the righteous stand praying for its advent upon earth. At the same moment God's right hand pours forth five streams of tears which, falling into the ocean, cause the world to shake; and God avers, that, although there is no righteous man upon earth whose intercession could bring about Israel's delivery, yet He will save them for His own sake, for the sake of His justice and His own goodness. God prepares Himself to reveal His mighty power to the heathen; whereupon Israel will be immediately delivered and the Messiah will appear to them, in order to conduct them to Jerusalem, where they, to the exclusion of the tyrannical heathen, will share his kingdom, and God will be king over the whole earth.

Date of Composition.

Apart from the fact that R. Ishmael, of the period of the Hadrianic persecution, figures as the author, and from the allusion in the last chapter to the destruction of the Temple (through which data the earliest date possible is fixed), there are no definite references to historical events and conditions from which the date of the composition of the "Book of Enoch" could be more exactly determined. There is, however, a passage in Talmud Berakot about R. Ishmael which naturally suggests itself in this connection, and which admits of the adoption of at least a latest possible date. The passage (7*a*) reads:

> "R. Ishmael b. Elisha related: 'Once I entered into the inmost sanctuary to offer incense; there I saw Akatriel Yah YHWH Ẓebaot sitting upon the high and exalted throne of mercy, and He said to me: "Ishmael, My son, bless Me!" Thereupon I spoke: "May it please Thee that Thy mercy conquer Thy anger and that Thy mercy gush forth as is the way of mercy; mayest Thou deal with Thy children according to Thy mercy, and requite them, though contrary to the rules of the rigid law [compare the version of MS. Munich]."'"

Compare also the passage immediately preceding: "What does God pray? Raba says, 'May My mercy conquer My anger, and may My mercy gush forth as is the way of mercy, and may I deal with My children according to My mercy, and requite them, though contrary to the rigid rules of the Law.'" The parallel is obvious. The passages quoted compel the conclusion that the Hebrew Book of Enoch can not have been written later than the time of the completion of the Babylonian Talmud.

2. An apocalyptic fragment, in which R. Ishmael likewise figures as the author, is preserved in the "Siddur" of R. Amram Gaon (of the second half of the ninth century), 3*b*, 12*b*-13*a*. It is also contained in one of the recensions of the "Legend of the Ten Martyrs" (Jellinek, in "B. H." vi. 19-30), where, however, it does not fit in naturally, and is, therefore, to be considered as a later insertion. Gerson b. Asher Scarmela first printed it in "Yiḥus ha-Ẓaddikim," which appeared in Mantua in 1561, but with additions at the beginning and at the end, which additions in different versions are all to be found in the various recensions of the "Legend of the Ten Martyrs," and are contained in part also in chaps. iv.-v. of the "Hekalot Rabbati." These portions bear evidence of being later additions in the fact that the last of those at the end treats of the preparations which, in the legend, preceded Ishmael's ascension, but which, in the context here, would seem to be events following his return from heaven. On account of the relationship of these additions to chaps. iv.-v. of the "Hekalot Rabbati," Jellinek published them together with the fragment as "Hekalot-Zusätze" in "B. H." v. 167-169. Gaster gives a translation of the fragment in the "Journal of the Royal Asiatic Society," 1893, pp. 609 *et seq.*

In this fragment R. Ishmael relates that Ssngir, one of the chief angels, revealed to him the sufferings reserved for Israel; and when he expressed wonder that Israel could ever endure these, the angel showed him still greater sufferings in store—captivity, famine, and pillage. As Ishmael and the angel parted, the former heard a voice proclaiming in Aramaic:

> "The sanctuary will be destroyed, the Temple burned down, and the royal palace made desolate; the king's sons will be killed, his wife widowed, and youths and maidens dragged away as booty; the altar will be profaned and the table for the showbread be carried off by the enemy; Jerusalem will be turned into a wilderness, and the land of Israel will become a picture of desolation."

Upon this announcement Ishmael fell to the ground unconscious, but was restored by another of the chief angels, of whom he then asked if there were no remedy for Israel. For answer the angel led him to the place where salvation and comfort were prepared; and Ishmael saw there groups of angels weaving garments of salvation for the righteous of the future world, and making magnificent crowns out of precious stones and pearls, perfumed with nectar and all sorts of fragrant odors, one of which crowns was of especial brilliance. The angel informed Ishmael that the crowns were intended for Israel, the especially magnificent one being for King David. Amid the roar of the motion of the heavens with their armies of stars, and all the hosts of angels, and amid the sound of a great mysterious rustling which proceeded from paradise, Ishmael heard: "YHWH reigns forever: thy God, O Zion, to all generations! Halleluiah!" Ishmael then saw David, king of Israel, approach, followed by all the kings of his dynasty, each one with a crown on his head; David's crown outshining all the others, its brilliance radiating to the ends of the earth. David went up to the heavenly Temple, placed himself upon the throne of fire prepared for him near God's throne, and presented his homage to God in hymns of praise, proclaiming the eternal duration of His kingdom. Meṭaṭron with his angel-hosts, heaven and earth, and, last of all, the kings of the house of David, joined in the shout of praise: "YHWH will be king over the whole earth; on that day YHWH will be One and His name One!"

The Messianic doctrine in this fragment, in which David figures as the Messiah, is unique, not only as far as the Neo-Hebrew, but as far as apocalyptic in general is concerned. It compels the conclusion that this fragment is distinct from the "Book of Enoch" (treated above) as the work of an altogether different author. Further, it indicates a very early origin, which is fully confirmed by the "prophecy after the event"; the Ishmael in this apocalypse too can only be the rabbi Ishmael, extolled in legend as a martyr of the Hadrianic persecution. Hence the date of composition must fall after the destruction of the Temple; and the only event which can come into consideration as making such a prophecy comprehensible is the disastrous termination of the reign of Bar Kokba. At that juncture the conditions and events furnished a basis for the "prophecy after the event" contained in the apocalypse under consideration: that the Temple would be profaned and destroyed, the royal palace demolished, Jerusalem turned into a desert, and the whole land of Israel rendered desolate. Indeed the fragment reads as if it were written under the immediate impression of the Hadrianic persecution. It seems plausible that this book was the intermediary through which the peculiar metamorphosis of the "Secrets of Enoch," into the Neo-Hebrew Book of Enoch, was accomplished.

Ascension of Moses.

3. The Ascension of Moses: The Latin version of "The Assumption of Moses," which is preserved only as a fragment, must certainly have contained, in its missing part, an account of the death of Moses and of the dispute between the archangel Michael and Satan (or the angel of death) over the dead body. Among the Neo-Hebrew apocalypses there is an "Ascension of Moses," as well as a fragment which, besides revealing the future, tells of the death of Moses and of the dispute that ensued after his death. This apocalypse was published for the first time in Salonica in 1727, under the title גדולת משה, and has been printed several times since (in Amsterdam, 1754; Warsaw, 1849, etc.). It was translated by Gaster (*l.c.* pp. 572–588) under the title "The Revelation of Moses." An Arabic translation also exists in the Karaite manuscript, written in 1828, discovered by Tischendorf in the library of the University of Leipsic (Codex Tischendorf, xliv.), and described by him in "Anecdota Sacra et Profana," p. 74, and by Jellinek in "Monatsschrift," ii. 245, 360 *et seq.*, and "B. H." ii. 9 *et seq.*, 19. This Arabic version has a longer introduction, and varies somewhat in the text from our version. The contents of the book, according to Gaster's translation, are thus summarized. For the modesty displayed by Moses when summoned to appear before Pharaoh to demand the liberation of the Israelites, God commands Metatron (Enoch) to allow Moses to ascend into heaven. After Metatron has transformed Moses' body into a fiery figure like unto that of the angels, he leads him up through the seven heavens. In the first heaven Moses sees waters "standing in line," and windows to let in and out all the things pertaining to human life and its needs. In the second heaven he sees the angels who control the clouds, the wind, and the rain; in the third, the angels placed over vegetation; in the fourth, those over the earth, sun, moon, stars, planets, and spheres; in the fifth, angels half of fire and half of snow; in the sixth, the "Irin and Kaddishin"; in the seventh, 'Arabot, he sees first the angels "Wrath and Anger," then the angel of death, then the ḥayyot standing before God, and finally an angel engaged in teaching the souls which were created by God at the time of the Creation and placed in paradise. (At this point occur two passages of later interpolation, one from Pes. 54*a–b*, treating of Nebuchadnezzar's presumptuous desire "to ascend the heights of the cloud and to be like the Most High" [Isa. xiv. 14], and the other from the Zohar, intended to show that Moses really ascended to heaven.)

Hell and Paradise.

God then tells Moses that He will confer on him the further privilege of seeing hell and paradise, and, at God's command, the angel Gabriel conducts Moses to hell. There he sees the manifold torments and punishments of the different classes of sinners, those who were envious of their fellow men and bore false witness against them; women who exposed their charms to young men; sinners who committed adultery, theft, and murder; those who perjured themselves; those who desecrated the Sabbath, despised the learned, and persecuted orphans; those who committed sodomy and idolatry, or cursed their parents; those who took bribes, put their fellow men to shame, delivered up their brother-Israelite to the Gentile, and denied the oral law; those that ate all kinds of forbidden food; usurers; apostates, and blasphemers; those who wrote the ineffable name of God, and those who ate on Yom Kippur. Gabriel then leads Moses into paradise. Here he sees first the guardian angel of paradise, sitting under the tree of life, who shows him the several costly thrones erected in paradise, each surrounded by seventy angels—the thrones for the Patriarchs, for the scholars who studied the Law day and night for the sake of heaven; for the pious men, for the just, and for the repentant—and a throne of copper, prepared for the wicked whose sons are pious, as in the case of Terah. Finally, he sees the fountain of life welling forth from beneath the tree of life, and dividing itself into four streams, and four rivers flowing under each throne, "the first of honey, the second of milk, the third of wine, and the fourth of pure balsam." (Here another passage from the Zohar, interrupting the narrative, is inserted.) As Moses is leaving paradise a voice calls from heaven: "Moses, . . . as thou hast seen the reward which is prepared for the just in the future world, so also in the days to come shalt thou see the rebuilding of the Temple and the advent of the Messiah, and shalt behold the beauty of the Lord and shalt meditate in His Temple."

Up to the present no attempt has been made to ascertain the date of composition of this apocalypse; but the allusion in the last chapter to the rebuilding of the Temple places it after that event. The descriptions of the different classes of sinners in hell and their punishment are strikingly similar to (in fact, are in parts identical with) those found in a number of Christian apocalypses; namely, the "Apocalypse of Peter," that of "Pastor Hermas," and the second book of the "Sibylline Oracles" (all three written in the second century), and the later apocalypses of Esdras and Paul, both perhaps dependent upon the "Apocalypse of Peter." It is possible that a critical examination of these relations might throw further light on the date of composition of "The Ascension of Moses."

4. The Assumption of Moses: This is a fragment preserved in the "Midrash Bereshit Rabbati" of R. Moses ha-Darshan (a manuscript in the library of the Jewish congregation in Prague), which was published by Jellinek in "B. H." vi. § 22. It is intended as an exegesis to Gen. xxviii. 17*b*. The following is a synopsis of its contents:

As the time for Moses' death approached, God permitted him to ascend into heaven, and unveiled to him the future world. There Middat ha-Raḥamim (the Attribute of Mercy) came to him, saying: "I will announce good tidings." Turning his eyes to the throne of mercy, Moses saw God building the Temple out of precious stones and pearls; he saw also the rays of the Godhead, and Messiah the son of David with the Torah in his arms; also his own brother Aaron in priestly robes. Aaron imparted to Moses that his death was near at hand, whereupon Moses asked God for permission to speak with the Messiah. The latter then revealed to him that the sanctuary which God was then constructing was the Temple and the Jerusalem, which would be established for Israel in the future world to endure for all eternity, and that God had shown the same Jerusalem to Jacob in his dream in Beth-el. To Moses' question when the new Jerusalem would descend to earth, God replied: "I have not yet revealed the end to any one; should I reveal it to thee?" Thereupon Moses said, "Give me at least a hint from the events of history," and God answered: "After I have scattered Israel among all the nations, I will stretch out My hand to gather them in a second time from all the ends of the earth." Moses then joyfully departed from heaven, followed by the angel of death, who demanded his soul. Moses refused to yield it; but finally God appeared to him, and he surrendered his soul to God willingly and cheerfully.

5. The Revelation of R. Joshua b. Levi: It has already been noted that the Babylonian Talmud tells of revelations which R. Joshua b. Levi was supposed to have received from the prophet Elijah and from the Messiah. In this apocalypse R. Joshua himself figures as the author. The book first appeared in the collection "Liḳḳutim Shonim," published in 1519 at Constantinople, under the title מעשה דר' יהושע בן לוי (The Story of Rabbi Joshua ben Levi), and it has since been reprinted several times, under the same title; subsequently by Jellinek in "B. H." ii. 48–51. Gaster published a translation of it (*l.c.* pp. 591–596) with the correct title, "The Revelation of R. Joshua b. Levi"; for the contents leave no doubt that it really is an apocalypse. An Aramaic version also existed, a fragment of which is preserved in Moses b. Naḥman's "Torat ha-Adam" (it is to be found in different editions of the book and also in Jellinek's "B. H." v. 43 *et seq.*). Jellinek points out that this Aramaic version is a proof of the ancient origin of the apocalypse (*l.c.* ii. 18), of which the following is a summary:

As the time of R. Joshua b. Levi's death was drawing near, God sent the angel of death to him, commissioning him to fulfil whatever R. Joshua might wish. The latter requested to be shown the place awaiting him in paradise, and desired the angel to give his sword to him. Upon arriving in paradise, Joshua, against the will of the angel, leaped over the wall: God allowed him to remain there, but commanded him to return the sword. Elijah called out: "Make way for the son of Levi!" The angel of death thereupon related the incident to R. Gamaliel, who sent him back to R. Joshua with the request that he explore both paradise and hell and send him a description of them. R. Joshua carried out this request. Here follows a description of the different compartments of paradise, seven in number. In the first dwell the proselytes to Judaism; in the second, repentant sinners with King Manasseh presiding over them; in the third, the Patriarchs and the Israelites who came out of Egypt, David and Solomon, and all the kings of their house; in the fourth, the perfectly righteous. In the fifth, which is of special splendor and exquisite beauty, are the Messiah and Elijah, the latter caressing the Messiah and saying to him, "Be comforted, for the end draweth nigh!" The Patriarchs also speak in the same strain at certain times, as do Moses and Aaron, David and Solomon, and all the kings of Israel and Judah. In the sixth, dwell those who died in piety; and in the seventh, those who died for the sins of Israel.

Contents of "Revelation."

To his question, whether any of the heathen, or even any of his brother Esau's descendants, were in paradise, R. Joshua received the answer, that they obtained the reward for their good works in this world, and therefore in the other world must dwell in hell; in the case of the sinners in Israel, however, just the opposite principle is followed. Hell could not be viewed immediately, for just at that moment the news reached heaven of the execution of the Ten Martyrs.

When R. Joshua entered hell some time later, he saw there ten heathen nations, over whom, as a punishment for his disobedience to his father, Absalom, the son of David, is compelled to preside. Seven times a day these heathen are burned by angels in pits of fire, being brought out whole again every time. Absalom alone is excepted from this punishment: he sits upon a throne, honored as a king.

6. The Alphabets of R. Akiba (אלפא ביתא or אותיות דרבי עקיבא) comprise a number of writings treating the same theme. The chief center of thought of all of them is the mystical signification, already mentioned in the Talmud, of the letters of the alphabet and of their written forms, and the mysteries of the names of God made up of four, twelve, and forty-two letters. In the Jerusalem Talmud (Ḥag. ii. 77*c*) there is a dissertation on the letters by means of which the world was created; and there, as in these writings, it is stated that the present world was created with He (ה) and the future with Yod (י), and eschatological theories are built up out of the forms of these letters. In the Babylonian Talmud (Shab. 104*a*), also, all sorts of similar interpretations are given in regard to the names, forms, and combinations of the various letters, and are made to bear upon eschatological questions in the same way as in these apocalypses. In Ḳid. 71*a*, it is said that the mysteries of the three names of God were treated as esoteric doctrine, and that whoever became thoroughly initiated into the mystery of the name consisting of forty-two letters might be sure of inheriting both the present and the future world. Similarly, R. Akiba, the reputed author of the "Alphabets," is especially commended in the Talmud as interpreter of the strokes, dots, and flourishes of the letters (compare, for example, Men. 29*b*; see also Akiba ben Joseph). Up to the present time, the pseudepigrapha in question have been generally considered mystical writings treating upon some eschatological points, not as real apocalypses; but the different compositions, as far as they are known, show clearly that the real theme of all is the eschatological problem, and that the discussion of the other supernatural mysteries only goes hand in hand with this, as in the apocalypses hitherto noticed.

Theme of the Alphabets.

So far, two of the alphabets have appeared in print, one of which is three times as long as the other: the longer was published first in Constantinople, 1519 (in the above-mentioned collection), and again in Venice, 1546. Both editions are incomplete; but the gaps are filled in part by the Cracow edition, which was published in 1579, was reprinted in Amsterdam, 1708, and which contains also the shorter version. Jellinek published both in "B. H." iii. 12–

49, 50–64; the longer, based on the incomplete Constantinople-Venice edition. Several manuscripts of both have been preserved; as, for example, in the Munich Codex 22, folio 70–103, which supplies the gaps purposely left in the longer composition in the Cracow-Amsterdam edition; in the Vatican Codex, 228, 3 (see Wolf, "Bibl. Hebr." ii. 1258, and Steinschneider, "Hebr. Bibl." xiv. 7); and one manuscript in the Bodleian Library which is described in Neubauer, "Cat. Bodl. Hebr. MSS." No. 1927 (of this no exact information is given, but according to the number of its pages, it is probably the shorter alphabet). A fragment of the shorter is contained in the Bodleian Library manuscript, No. 1322 (Neubauer, *ib.*). There are, besides, three other manuscripts in the Bodleian Library containing alphabets of R. Akiba (compare *ib.* Nos. 1104, 3; 2287, 11; 2289, 7). The catalogue does not give any details of their contents; but the fact that none of them is marked "printed" would indicate that they are not identical with the published "Alphabets." A fragment consisting of two leaves יסוד אלף בית ("Mysterium"), also differing from the published alphabets, is in the Almanzi Library (Codex 195, xiv.), and deserves special notice because it furnishes strong support to the theory that the writings under the present heading are genuine apocalypses. It begins "Aleph stands for the Most High, who is the First" (which, in the Constantinople-Venice edition, is the beginning of § 10), and the conclusion contains the following passage:

> "Eighteen hundred years after the destruction of the second Temple, the Kedarenes will decrease in numbers; . . . at the end of 295 years, according to the calendar of the Gentiles [the Hegira is meant here], their kingdom will vanish from the earth; . . . at the end of 304 years, according to their calendar, the son of David will come, God willing!" (See Steinschneider, "Hebr. Bibl." v. 104, and "Apocalypsen," etc., in "Z. D. M. G." xxviii. 631, note 6.)

This fragment originated in the Orient, as is shown by the words "the calendar of the Gentiles," which signify "dating from the Hegira"; more exactly, it may be inferred from the concluding words which quote a Persian expression, that it originated in Persia.

Jellinek's distinction of the two published alphabets as "First Recension" and "Second Recension" ("B. H." iii., pp. xiv. *et seq.*; vi., pp. xl. *et seq.*) is misleading; for in respect not only of the length but also of the contents, they differ so radically that they must be considered as altogether distinct and independent of each other. In the longer of the published alphabets, as in the Hebrew Book of Enoch, Meṭaṭron (Enoch) is represented as the revealer of the secrets disclosed in these writings. There is also a very brief and condensed narration of Enoch's assumption into heaven, of his transformation into one of the angels at the heavenly throne, and of his initiation into all the mysteries of heaven and earth. This piece is not in the Constantinople-Venice edition, but is to be found in the Cracow-Amsterdam edition, and also in the Munich Codex. The latter has also the seventy or seventy-two names of God and the ninety-two names of Meṭaṭron, which, from religious scruples, were omitted in the Cracow-Amsterdam edition. The names of God are obtained from combinations of the different letters of the alphabets, already alluded to as characteristic of this group of writings.

Closely bound up with the relation of the above mysteries is the glorification of the Torah as the aim and end of creation and the center of future bliss. Because of its observance Israel will inherit the joys of paradise, whereas the heathen, having disregarded it, will be given over to hell. God Himself, surrounded by His host of angels, will expound the Torah to the righteous in paradise, whereupon Zerubbabel will proclaim God's glory, so that it will resound over the whole world; the sinners of Israel and the pious among the heathen in hell will add their "amen" to this glorification and will be found worthy of admittance to paradise. The pleasures of the righteous in paradise are described in a glowing, sensuous style: God Himself dwells among and associates with them like one of themselves, contributing actively to their entertainment. (As the materializing of God in this gross manner has hitherto been considered a sure proof of the later origin of a work, it may be well to call attention to the fact that there is a parallel to this description in the oldest Midrash, Sifra, ed. Malbim, 225*a*; compare also Ta'anit, 31*a*.) The circumstance, that in these writings the Torah is placed in such prominence, explains, too, their eminently parenetic character.

Their Parenetic Character.

In regard to R. Akiba's alleged authorship of these writings, it may be recalled, that, as early as the Jerusalem Talmud, a legend was current that R. Akiba enjoyed the superhuman privilege of ascending to heaven and having the secrets of God revealed to him (Yer. Ḥag. ii. 77*b*; compare Talmud Bab. *ib.* 14*b*). Further, it seems worthy of notice, that, in the fragment of an "Alphabet of R. Akiba" contained in the Lemberg edition of the Book of Enoch, xxix. 2, and referred to above, the story of Enoch's assumption, etc. (there condensed to a few sentences), is narrated as if Akiba had heard it in heaven. To conclude, with Jellinek and Steinschneider (compare "B. H." iii. 17, No. 2, and "Hebr. Bibl." xiv. 7), from the quotations which are found in the medieval literature—but which are not in the printed editions—anything more than that the "Alphabets of R. Akiba" are incomplete to the extent suggested here, would be premature until all the manuscripts have been published.

Brief reference may again be made to the views of Zunz and Graetz regarding the origin of the theosophical speculation contained in the apocalypses which have been discussed thus far. If both hold Islam responsible for the theosophy in these Neo-Hebrew apocalypses, because similar vagaries and stretches of imagination are found in its literature (see Zunz, "G. V." p. 171, and especially in "Monatsschrift," viii. 115 *et seq.*), the reply may be made that, as Steinschneider well observed—and Noeldeke, the foremost Arabist of the present time, corroborated him—later Jewish literature had the widest and deepest influence on the formation and development of the views and teachings of Islam (see "Hebr. Bibl." iv. 69 *et seq.*; "Göttinger Gelehrte Anzeigen," 1862, pp. 750 *et seq.*). From the presence of mystical speculations about the essence and being of God, etc., in the Arabic literature, similar to those in the Neo-Hebrew, it is quite impossible to conclude that they found their way from the former into the latter; rather would the opposite conclusion be justified.

7. The Hebrew Elijah Apocalypse: This apocalypse, ספר אליהו, appeared first in Salonica in 1743, printed in the same volume with several other pieces, and was reprinted by Jellinek in "B. H." iii. 65–68. A critical edition, according to a Munich manuscript, with translation, explanatory notes, and an attempt to ascertain the date of composition, was published by Moses Buttenwieser ("Die Hebräische Elias-Apocalypse," etc.). The result arrived at in this essay was that in this book it is necessary to distinguish between the original apocalypse and a later addition, which consists of a dispute among the doctors of the Law of the second and third centuries, concerning the name of the last king of Persia. The original apocalypse was written amid the confusion of the year 261, caused by the wars of Sapor I. against Rome and his capture of Valerian; but in its original form it was probably more voluminous. In all probability the author lived in Palestine. During the exciting period of the Perso-Roman wars waged by Chosroes I. (540-562) or Chosroes II. (604-628), the apocalypse was furnished with the addition mentioned above, in order to make the prophecies appear to accord with the changed times and conditions, for the outcome of the dispute is that "Kesra" (the Arabic form of "Chosroes") must be the name of the last Persian king. The contents of the book are as follows: Michael reveals the end of time to Elijah on Mt. Carmel. Elijah is first conducted through various heavenly regions, and the revelations regarding the end are imparted to him. The last king of Persia will march to war against Rome in three successive years, and will finally take three military leaders prisoner. Then Gigit will advance against him, "the [little] horn," the last king hostile to God who will rule upon earth, as Daniel beheld. This king will instigate three wars and will "also stretch out his arm against Israel." The three wars and the attack upon Israel are described in detail in the following part. Then the Messiah, whose name is Winon, will appear from heaven, accompanied by hosts of angels, and engage in a series of battles—first to annihilate the armies waging these wars, and secondly to vanquish all the remaining heathen. After this, Israel will enjoy the blessings of the Messianic kingdom for forty years, at the end of which time Gog and Magog will muster the heathen to war around Jerusalem; but they will be annihilated, and all the heathen cities will be destroyed. The day of doom will then come and last forty days; then the dead will be awakened and brought to judgment. The wicked will be delivered over to the torments of hell; but to the good the tree of life will be given; and for them the glorious Jerusalem will descend from heaven, and among them shall reign peace and knowledge of the Law.

Date and Where Written.

Book of Elijah.

From this summary will be noticed how closely the picture of the future world given in this apocalypse resembles the Revelation of John; the description also of Elijah's transportation through the heavenly regions shows a striking relation to the Ethiopic Book of Enoch (compare *ib.* xiv. 8, 9, 12-19, 22*a*, xviii. 13-15, xxii. 1, 11). Worthy of attention is the description of the adversary of the Messiah, the Antichrist, who before the advent of the Messiah shall subdue the world and persecute Israel. This description is a conventional feature of a great number of Neo-Hebrew apocalypses. It is found, for example, in much the same form in all those treated below. In the latter, however, the adversary is called Armilus (Romulus); while in the Elijah apocalypse he is called Gigit, which is an enigmatical designation of Odhenat, the duke of Palmyra (see Buttenwieser, *l.c.* p. 72).

The description of the adversary in the present apocalypse shows also, as Bousset has pointed out (*l.c.* p. 57), striking parallels to the description of the Antichrist in the Coptic Elijah apocalypse, discovered a few years ago, the manuscript of which can in no case be later than the beginning of the fifth century (see Steindorff, "Apocalypse des Elias," p. 6); while the apocalypse itself is probably of the third or fourth century. Of other Christian apocalypses with descriptions of the Antichrist, offering no less remarkable parallels to the apocalypses in the writings presently to be mentioned, and also in part to the Elijah apocalypse, may be enumerated: "The Testament of the Lord," "Apocalypse of Esdras," the "Pseudo-Johannis Apocalypse," and the Armenian "Seventh Vision of Daniel" (compare also Bousset, *l.c.* pp. 101 *et seq.* Descriptions of the Antichrist in these apocalypses—except the "Seventh Vision of Daniel"—may be found in James, "Apocrypha Anecdota," in "Texts and Studies," ii. 3, 151 *et seq.*).

8. The Apocalypse of Zerubbabel (ספר זרובבל): There are various recensions of this apocalypse. One was printed in Constantinople in 1519 in the collection mentioned above, and was reprinted in Wilna, 1819, together with "Sefer Malkiel" (excerpts from this edition are to be found in Eisenmenger, ii. 708 *et seq.*); another was edited by Jellinek ("B. H." ii. 54-57), based on two manuscripts in the Leipsic City Library, which, however, an examination of the manuscripts by Buttenwieser proved to be inexact; and a third recension, differing from both of the above, is in manuscript in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 160, 2). Besides these, the Bodleian contains a manuscript of one of the printed editions (*ibid.* No. 2287, 4). A new edition is most desirable. As this book foretells the year 990 or 970 after the destruction of the Temple by Titus as the time of delivery, it must have been written in the eleventh century at the very latest. This apocalypse describes how Zerubbabel is carried in spirit to Nineveh, the City of Blood, the Great Rome, where Meṭatron reveals to him the occurrences at the end of time. He sees the Messiah there, whose name is Menaḥem b. 'Amiël, and who was born at the time of King David, but was brought thither by the Spirit to remain concealed until the end of time. Apart from a few details, the description of the course of events in the end of time is very much the same as that in "The Wars of King Messiah," "Revelations of R. Simon b. Yoḥai," and "Prayer of R. Simon b. Yoḥai." In all of them, the name of the "Evil Adversary" is Armilus, the Aramaic form of Romulus. Except the "Revelations," they all contain the curious fancy that he is to be born of a marble statue in Rome. According to the "Apocalypse of Zerubbabel," he will be begotten out of the statue by Satan: in the "Revelations of R. Simon b. Yoḥai," he is represented as a creation of Satan and Diabolus. In "The Wars of King Messiah" the epithet "Satan" is applied to him. The description of Armilus in the "Revelations of R. Simon b. Yoḥai" has more resemblance to that in the Elijah apocalypse, whereas in the "Apocalypse of Zerubbabel," in "The Wars of King Messiah" and "Prayer of R. Simon b. Yoḥai," he is described as a human monstrosity.

Book of Zerubbabel.

"The Wars of King Messiah" and the "Prayer of R. Simon b. Yoḥai" also state that he will claim to be the Messiah and a god, and that he will be accepted by the heathen as such, whereas Israel will refuse to acknowledge him. In the Constantinople edition of the "Apocalypse of Zerubbabel," as Bousset has observed (*l.c.* p. 86, note 3), Satan is called בליעל, "Belial," the name by which the Antichrist is called in the "Sibylline Oracles," ii. 67, iii. 63; "Testament of the Patriarchs" (Dan) and "Ascensio Isaiæ." This circumstance is of great importance, inasmuch as by its means the Armilus legend, as it is found in the above-mentioned apocalypses, seems

Legend of Messiah b. Joseph.

particularly adapted to throw light upon various points in the Antichrist legend. All four apocalypses contain the legend of Messiah b. Joseph in common. They state that he will gather Israelites around him (among whom in "The Wars of King Messiah" and "Prayer of R. Simon b. Yoḥai" a part of the Ten Tribes will be found), march up to Jerusalem and there, after overcoming the hostile powers (in the "Apocalypse of Zerubbabel" the king of Persia is the hostile power; in "The Wars of King Messiah" and "Prayer of R. Simon b. Yoḥai," the Roman empire; in the "Revelations of R. Simon b. Yoḥai," there is no definite statement on this point), reintroduce the worship of the Temple, and establish his own dominion. This, however, will be of short duration; for Armilus, with the heathen, will appear before Jerusalem to battle against him and will slay him. Then the time of the last extreme suffering and persecution for Israel will begin, from which escape will be sought by flight into the wilderness. There Messiah b. David and the prophet Elijah will appear to them (in the "Revelations of R. Simon b. Yoḥai" the latter is not mentioned), and lead them up to Jerusalem, where the Messiah will destroy Armilus and all the armies of the heathen. In the "Apocalypse of Zerubbabel," as well as in "The Wars of King Messiah," the Messiah b. David, in company with Elijah, will resurrect Messiah b. Joseph, who lies slain at the gates of Jerusalem.

Another point common to the "Apocalypse of Zerubbabel" and the "Revelations of R. Simon b. Yoḥai" is, that on his advent the Israelites will not acknowledge Messiah b. David. The one point mentioned which only the "Apocalypse of Zerubbabel" contains is that besides the two Messiahs there is to be a woman, Hephzibah, the mother of Messiah b. David. According to the text in Jellinek's edition, she will come upon the scene five years before Messiah b. Joseph; and a great star will light up her path. She will slay two kings, and assist Messiah b. Joseph in his war against the king of Persia; and during the flight into the wilderness she will shelter Israel from the persecution of Armilus. This last feature of the description calls to mind the flight of the woman, as described in the Revelation of John, xii. 13-17, and the description of Tabitha in the Coptic "Apocalypse of Elijah." The picture of the future world in the Zerubbabel apocalypse is also distinctive; for in addition to the establishment of the heavenly Jerusalem upon five mountains (Lebanon, Moriah, Tabor, Carmel, and Hermon), nothing more is mentioned than the resurrection of the generation buried in the wilderness, and of the faithful who met death during the general persecution ("the ocean," which is spoken of in this connection, must be understood in its symbolical signification; as it is used as early as Dan. vii. 3 *et seq.*).

9. The Wars of King Messiah (מלחמות מלך משיח), (called also ספר מלחמות ה׳ "The Book of the Wars of YHWH," and אותות [אשר יתגאלו בביאת] המשיח "Occurrences at the Time of the Advent of Messiah," and, finally, "The Wars of Gog and Magog, of Messiah b. Joseph, Messiah b. David, and Elijah the Prophet"): This apocalypse must have had a very wide circulation, as evidenced by the many manuscripts in which it is preserved. It is contained in a Parisian manuscript (Codex Hebr. 716); in one in Leipsic (Codex Hebr. 12), and another at Halberstamm, and in three manuscripts at the Bodleian Library (see Neubauer, "Catalogue," Nos. 1466, 15; 2274, 6; 2360, 9. The first of these is complete; in the second the introduction and conclusion are missing; the third seems to be only a fragment)—in a Munich manuscript (Codex Hebr. 312; the introduction and conclusion are also omitted in this); and it was also included in the "Maḥzor Vitry," in which, however, as some pages in the manuscript are missing, only the first and last parts are preserved. This work was printed in the Constantinople collection mentioned above, in 1519, and also in "Abḳat Rokel" (Pedler's Spice-Box) by Jacob Machir. From the latter, Jellinek reprinted it in "B. H." ii. 58-63, omitting, however, the introduction and the conclusion, which he added in vol. vi. 117-120. The Munich manuscript was found by the present writer, who collated it with the text in "Abḳat Rokel," and with Jellinek, to contain a number of better readings and variants than the latter.

Its Wide Circulation.

The following may be added to what has been related above as explanatory of the contents of this book:

A parenetic discourse forms the introduction; after which the unusual phenomena that will usher in the end—unnatural and pestilence-producing heat, poisonous dew, and an eclipse of the sun lasting thirty days—are depicted. The Roman "kingdom" will spread its dominion over the whole world, and will persecute Israel most cruelly for the space of nine months, at the end of which time Messiah b. Joseph will appear. From here on, the description continues as outlined above. After Messiah b. David shall have destroyed Armilus and the heathen armies, together with the "wicked" Rome, then the dead will arise, and the Israelites, dispersed over all lands, will be gathered into Jerusalem. The heathen will convey them thither, and will offer homage to Israel; also, the Ten Tribes, together with the descendants of Moses, will return, enveloped in clouds, from the regions of Chaboras and Halach and from Media; and as they march, the earth will be transformed before them into a paradise. The conclusion contains the description of the glorious new Jerusalem and of the other blessings of the future world, which are here of a more spiritual character. According to the various editions, it is said of Armilus, that "the nations call him Antichrist." But the Munich manuscript reads here, "He is called Gog and Magog"; and for "palace of Julian," it reads "palace of Hadrian."

10. The Revelations of R. Simon b. Yoḥai (נסתרות ר׳ שמעון בן יוחי): This apocalypse was printed at Salonica in 1743, in the collection already mentioned, and was reprinted from it by Jellinek in "B. H." iii. 78 *et seq.* It is preserved also in the Munich manuscript (Codex Hebr. 222), which contains better readings in some places. The apocalypse really ends with "Thy people shall all be righteous," 81, 13 in Jellinek; what follows, as Graetz already recognized ("Gesch. der Juden," v. 446), was added later, probably from the "Prayer of R. Simon b. Yoḥai." As Graetz shows (*ib.*), this apocalypse was written during the stormy period of the deposition of the Ommiads (750). It describes plainly the wars of Merwan II., who is mentioned by name, his flight after the battle on the bank of the Great Zab, his capture, and his assassination. The revelations about the end are made by Meṭaṭron to R. Simon b. Yoḥai, while the latter is dwelling in a cave, hiding from the Roman emperor. The history of Islam is reviewed from the appearance of the prophet up to the events just mentioned. From this point on, the real prophecy of the future begins. It opens with the prediction that after Merwan's

Written About 750.

successor has reigned three months, the nine months' dominion of the "wicked empire" will set in for Israel; then the course of events is described as before set forth under the "Apocalypse of Zerubbabel"; and, finally, the picture of the future world is drawn. After the dispersed Israelites are gathered together, and the earthly Jerusalem in addition to the heathen part of its population is consumed by fire from heaven, the glorious new Jerusalem will descend from heaven; Israel will dwell in it for 2,000 years in perfect peace, and as in the "Apocalypse of Baruch" (xxix. 4), and IV Esdras (vi. 52), will feast on the Behemoth and the Leviathan. At the end of this time God will descend into the valley of Jehoshaphat to hold judgment, and heaven and earth will disappear; the heathen will be put into hell; Israel will enter into paradise; and for a year the sinners in Israel will suffer the tortures of hell and then be admitted to paradise.

Mention of the Crusades.

11. The Prayer of R. Simon b. Yoḥai (תפלת ר' שמעון בן יוחי): This apocalypse was published by Jellinek in "B. H." iv. 117–126, according to a manuscript of Mortara. It shows the closest relation to the preceding; and begins with a similar retrospect of the Mohammedan history, but carries it on to a later date, and finally refers to events which, Jellinek observes (*ib.* p. 8), may be unmistakably recognized as the Crusades. Graetz thought that this apocalypse contained allusions to the inroads of the Mongols in 1258–60, and believed that these events led directly to its composition (*l.c.* vii. 139, 449 *et seq.*). But this is out of the question; for the passage about the appearance of deformed, swift-footed men from the far East, upon which Graetz founded his argument, occurs in the middle of the historical retrospect, and not in the description of the events immediately preceding the end. In this part of the apocalypse the reference is solely to the Crusades, and could hardly be plainer. The point in question is a favorite one in apocalyptic description, and is simply taken from older writings; "The Wars of King Messiah" also contains it; but in the latter the picture of the monstrosities is still more horrible and bears more resemblance to the description in the Revelation of John, ix. 13 *et seq.*, which is the oldest example of the sort. גירון—written erroneously in one place נירון, and in another הגירדון—the collapse of which is taken in the "Revelations of R. Simon b. Yoḥai" and in the "Prayer of R. Simon b. Yoḥai," as well as in the apocalypse treated below (the "Midrash of the Ten Kings" which also has the corruption נירון), as an ominous prognostication of the imminent fall of the Islamic kingdom, is nothing else, as Steinschneider clearly proves ("Apocalypsen," pp. 639, 599), than the famous eastern gate, Bâb Girûn, of the Mosque in Damascus.

Describes Islamic Rulers.

12. The Midrash of the Ten Kings (מדרש עשרת המלכים): This belongs to the same class as the two preceding apocalypses. It has been published by C. M. Horowitz in "Sammlung Kleiner Midraschim" ("Bet 'Oked Agadot"), i. 37–55, according to a manuscript of De Rossi's. The apocalypse begins with a very diffuse description of the eight kings who have already ruled—the first being God; the last, Alexander the Great—and relates, in connection with this subject, the destruction of the Temple by Titus and the Hadrianic persecution, and leads over in this way to Simon b. Yoḥai's hiding from the Roman emperor in a cave, and to the revelations regarding the end, which he received while there. As in the two preceding books, the different Islamic rulers, beginning with Mohammed, are described. The two rulers mentioned at the beginning of page 53 are beyond doubt Hisham and his successor, Walid II. The references to the six following rulers are so vague that no certain conclusions can be drawn regarding their identity. The remainder of the book is taken up with prophecy of the future, in which, at first, occasional allusions to historical events seem to be interspersed. Here also the prophecies of the future begin with the announcement of the period of nine months of intense persecution, whereupon Armilus will reign forty days. At the termination of his reign, Messiah b. Joseph will appear and restore the Temple in Jerusalem, and will establish for Israel an epoch of peace. At the conclusion of this period, Gog and Magog will march upon Jerusalem, and Messiah b. Joseph will fall in battle against him. Three-fourths of the Israelites will wander into exile. God will then destroy the armies of Gog and Magog; and Israel, including the "nine and a half tribes," will return to Jerusalem. The rulership will recur to the house of David; Messiah b. David will rule as the ninth king over the whole world; and Israel will enjoy the blessings of the Messianic kingdom. At the end of 2,000 years God will Himself descend to judgment.

13. The Persian Apocalypse of Daniel: This apocalypse was published and translated by Zotenberg in Merx, "Archiv," i. 386–427. It also belongs to the group just treated; but at the same time it occupies, as Bousset observes (*l.c.* p. 69), a peculiar place within the Neo-Hebrew apocalypse, by reason of the rôle which Messiah b. Joseph plays in it. The account, however, is not perfectly clear. First comes a very diffuse legendary narrative of the events of the time of Daniel; that is, from the appearance of the prophet Jeremiah down to the time of King Darius I., Hystaspes (B.C. 485). Then it relates how Daniel mourns and fasts because of the destruction of the Temple, and how an angel appears to unveil the future to him. Here follows abruptly, regardless of the thousand intervening years, a transparent description of Mohammed and the Islamic rulers following him. In the ruler with three sons (p. 411, l. 12 from the bottom), as Bousset observes, Harûn al-Raschid and his three sons are with certainty recognizable.

Describes the Resurrection.

Two further rulers are mentioned, and then the prophecy of the future begins. The nine months' sovereignty of Rome is predicted, and the appearance of one who is not mentioned by name, but whose description corresponds exactly with that of Armilus in the preceding apocalypses. The army of Gog and Magog will unite with him, and, as in "The Wars of King Messiah" and the "Prayer of R. Simon b. Yoḥai," he will claim to be the Messiah. He will subdue the world and persecute Israel. "A man of the children of Ephraim" will then appear; and the Israelites will all gather around him and go with him to "that wicked one," and demand from him that he prove by miracles, particularly by waking the dead, that he is the Messiah. Enraged at this demand, he will persecute them anew, and the Israelites will flee before him into the wilderness. There Michael and Gabriel will appear and forthwith announce to them their delivery. Then they will kill him who claims to be the Messiah; and also the Messiah ben Joseph will be killed, and the flag of Messiah b. David will be raised. The latter will destroy the whole army of Gog and Magog. Then Elijah will appear; the dead will arise; and the Israelites will come to the Messiah from all quarters of the world on the wings of Simurg. The Messianic kingdom will endure for 1,300 years. The description of it and of the last judgment, which succeeds it, does not differ materially from that in the preceding apocalypses. Certain details in the description of the last judgment occur also in the alphabets of R. Akiba. The apocalypse has, besides, a brief account of the different divisions of hell. On the basis of the historical setting of this apocalypse, it is safe to conclude, with Bousset, that it was written in the first half of the ninth century.

14. Eschatological Descriptions: In conclusion the following eschatological descriptions may be mentioned: The one in Pesiḳta Zuṭṭarta, section Balak (ed. Buber, iv. 258 *et seq.*), included by Jellinek in "B. H." iii. 141–143, under the title אגדת משיח (Haggadah of the Messiah); the conclusion of "Midrash Vayosha'," in the recension edited by Jellinek ("B. H." ii. 55–57); פרקי משיח (Chapters on Messiah), in Jellinek, "B. H." iii. 68, 78; contained also with many better readings in the Munich Codex, No. 222 (see in regard to the beginning of this piece as given here, Buttenwieser, "Elias Apocalypse," p. 10); סעודת גן עדן (Repast in Paradise), סעודת לויתן (The Feast on the Leviathan), in Jellinek, "B. H." v. 45 *et seq.*, vi. 150 *et seq.*; אמירות לעתיד (Prophecies of the Future), existing only in manuscript form in Codex de Rossi, Nos. 1240 and 541 (compare Zunz, "L. G." p. 604 and Steinschneider, "Apocalypsen," p. 635, note 18); the description of Saadia in his "Emunot Vedeöt," viii.; that of Hai Gaon in "Ta'am Zeḳenim," pp. 59 *et seq.*, Frankfort-on-the-Main, 1854; and that of Meir Aldabi in "Shebile Emunah." Of the above-mentioned, the "Haggadah of the Messiah" is the only one which contains a description differing somewhat from all the other presentations met with in the course of this article: From the wilderness, whither the Israelites will flee after the fall of the Messiah, they will march to Rome at the command of a voice from heaven, and seize the city, whereupon Messiah b. David will reveal himself to them.

It is also worthy of note that the burning of Death and Satan in the lake of fire at the last judgment forms part of the description in "The Feast of the Leviathan" as in the Revelation of John. All the others offer nothing new. "Chapters on Messiah" is a very late compilation (compare Jellinek, "B. H." iii. 19), as is also "Prophecies of the Future."

END OF VOL. I.

LIST OF PATRONS

LIST OF PATRONS

The production of THE JEWISH ENCYCLOPEDIA has been made practicable by the cooperation which the publishers have received not only from editors and contributors the world over, but also from the thousands of subscribers, Jews and non-Jews, whose names appear below as PATRONS of the work. But for the faith of these thousands in the promises of the editors and publishers, and but for the company's reliance upon the pledges made by them in consequence, it is certain that the ENCYCLOPEDIA, while it might have been published, could not have been produced with anything like the present standard of completeness. To the Jewish public, therefore, as represented in the names that follow, no less than to the Jewish scholarship as represented on the BOARDS OF EDITORS, is due whatever degree of excellence has been attained in this work.

This list of names, with any corrections that may be found necessary, will be repeated in the twelfth (and final) volume of the series.

FUNK & WAGNALLS COMPANY.

CHARLES TAYLOR, D.D., LL.D.,
Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

PREFATORY NOTE

THE present volume of THE JEWISH ENCYCLOPEDIA has been carried out on the principles explained at length in the general preface in the first volume. Only in one particular has a deviation been made from the plan there adopted. The delimitation of the various departments in some instances having proved extremely difficult, it has been found desirable to indicate, in the case of each article, the department editor who is responsible for its appearance in the volume, by printing the initial of the editor on the left-hand side and the initials of the contributor or contributors in larger type on the right. When articles have been passed by the Executive Committee of the Editorial Board, instead of by the department editor, the initials "E. C." appear at the left.

NEW YORK, *June 20, 1902.* FUNK & WAGNALLS COMPANY.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise* ' *or by dieresis; e.g., Ze'eb or Meïr.*

ב *b*	ז *z*	ל *l*	פּ *with dagesh, p*	שׁ *sh*
ג *g*	ח *ḥ*	מ *m*	פ *without dagesh, f*	שׂ *s*
ד *d*	ט *ṭ*	נ *n*	צ *ẓ*	ת *t*
ה *h*	י *y*	ס *s*	ק *ḳ*	
ו *w*	כ *k*	ע '	ר *r*	

NOTE: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

◌ָ *a*	◌ֻ *u*	◌ַ *a*	◌ֵ *e*	וֹ *o*
◌ֶ *e*	◌ֱ *e*	◌ֳ *o*	◌ִי *i*	
◌ִ *i*	◌ְ *e*	◌ֲ *a*	וּ *u*	

Ḳameẓ ḥaṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ *a*	خ *kh*	ش *sh*	غ *gh*	ن *n*
ب *b*	د *d*	ص *ṣ*	ف *f*	ه *h*
ت *t*	ذ *dh*	ض *ḍ*	ق *ḳ*	و *w*
ث *th*	ر *r*	ط *ṭ*	ك *k*	ي *y*
ج *j*	ز *z*	ظ *ẓ*	ل *l*	
ح *ḥ*	س *s*	ع '	م *m*	

2. Only the three vowels—a, i, u—are represented:

◌َ *a* or *ā* ◌ِ *i* or *ī* ◌ُ *u* or *ū*

No account has been taken of the *imālah; i* has not been written *e*, nor *u* written *o*.

---

* In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al*; no account being taken of the assimilation of the *l* to the following letter; *e.g.*, *Abū al-Salt*, not *Abu-l-Salt*; *Nafīs al-Daulah*, not *Nafīs ad-Daulah*. The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah*; but, when followed by a genitive, *at*; *e.g.*, *Risālah dhāt al-Kursiyy*, but *Hī'at al-Aflāk*.

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g.*, *'Amr*, not *'Amru* or *'Amrun*; *Ya'akūb*, not *Ya'akūbun*; or in a title, *Kitāb al-amānāt wal-'itikādāt*.

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	*a*	Н н	*n*	Щ щ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h*, *v*, or *g*	Р р	*r*	Ь ь	halfmute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.*, Moses Nigrin under *Nigrin*; Moses Zacuto under *Zacuto*; Moses Rieti under *Rieti*; all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi*; Israel ben Joseph Drohobiczer under *Drohobiczer*. Cross-references are freely made from any other form to the most specific one; *e.g.*, to Moses *Vidal* from Moses *Narboni*; to Solomon Nathan *Vidal* from Menahem *Meiri*; to Samuel *Kansi* from Samuel Astruc *Dascola*; to Jedaiah *Penini*, from both *Bedersi* and *En Bonet*; to *John* of Avignon from Moses de *Roquemaure*.

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g.*, *Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* ha-Ḥasid; *Gershom* of Metz, *Isaac* of Corbeil.

3. Names containing the word *d'*, *de*, *da*, *di*, or *van*, *von*, *y*, are arranged under the letter of the name following this word; *e.g.*, de Pomis under *Pomis*, de Barrios under *Barrios*, Jacob d'Illescas under *Illescas*.

4. In arranging the alphabetical order of personal names *ben*, *da*, *de*, *di*, *ha-*, *ibn**, *of* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Ze'eb
Abraham Benveniste

5. In order to facilitate reference, complete groups of all persons bearing such common names as Aaron, Abraham, Jacob, are given in small type in a group immediately under the first key-word.

---

* When IBN has come to be a specific part of a name, as IBN EZRA, such name is treated in its alphabetical place under "I."

CONTRIBUTORS TO VOLUME II

A............**Cyrus Adler, Ph.D.,**
President of the American Jewish Historical Society; Librarian Smithsonian institution, Washington, D. C.

A. Bm......**A. Blum,**
Rabbi in New York.

A. Bü......**Adolf Büchler, Ph.D.,**
Professor Jewish Theological Seminary, Vienna, Austria.

A. D........**Abraham Danon,**
Principal Jewish Theological Seminary, Constantinople, Turkey.

A. E........**A. Eckstein, Ph.D.,**
Rabbi in Bamberg, Germany; Member of the Central Committee of the Alliance Israélite Universelle.

A. F........**A. Freimann, Ph.D.,**
Librarian of the Hebrew Department, Stadtbibliothek, Frankfort-on-the-Main, Germany.

A. Fe.......**Alfred Feilchenfeld, Ph.D.,**
Principal of the Realschule, Fürth, Germany.

A. Fl.......**A. Fleischmann,**
New York.

A. Ha......**Alexander Harkavy,**
New York.

A. H. N...**A. H. Newman, D.D., LL.D.,**
Professor of Hebrew and Cognate Languages and Old Testament Exegesis, McMaster University, Toronto, Can.

A. Kai......**Alois Kaiser,**
Cantor of Temple Oheb Shalom, Baltimore, Md.

A. L. L....**Albert L. Leubuscher,**
New York.

A. Lo.......**A. Loewenthal, Ph.D.,**
Rabbi, Tarnowitz, Germany.

A. P.......**Albert Porter,**
Associate Editor of "The Forum," New York; Revising Editor "Standard Cyclopedia."

A. R........**A. Rhine,**
Rabbi, Hot Springs, Ark.

A. S. C.....**Alexander S. Chessin,**
Professor of Mathematics, Washington University, St. Louis, Mo.

A. S. I......**Abram S. Isaacs,**
Professor of German Literature, University of the City of New York; Editor of "The Jewish Messenger," New York City.

A.V.W.J...**A. V. W. Jackson, Ph.D., L.H.D.,**
Professor of Indo-Iranian Languages, Columbia University, New York.

A. W. B...**A. W. Brunner,**
Architect, New York.

B............**Mrs. Bolaffio,**
Milan, Italy.

B. B........**Benuel H. Brumberg,**
Contributor to "National Cyclopedia of American Biography," New York.

B. D.........**Bernard Drachman, Ph.D.,**
Rabbi of the Congregation Zichron Ephraim, Dean of the Jewish Theological Seminary, New York.

C. F. K.....**Charles Foster Kent, Ph.D.,**
Professor of Biblical Literature and History, Yale University, New Haven, Conn.; Author of "A History of the Hebrew People."

C. J. M.....**Charles J. Mendelsohn,**
Philadelphia, Pa.

C. L.........**Caspar Levias, M.A.,**
Instructor in Exegesis and Talmudic Aramaic, Hebrew Union College, Cincinnati, Ohio.

C. R. C.....**Lieut.-Col. Claude R. Conder, LL.D.,**
Formerly Superintendent of the Survey of Palestine by Palestine Exploration Fund.

D............**Gotthard Deutsch, Ph.D.,**
Professor of Jewish History, Hebrew Union College, Cincinnati, Ohio.

D. B. M.....**Duncan B. MacDonald, B.D.,**
Hartford Theological Seminary, Hartford, Conn.

D. G........**Baron David von Gunzburg,**
St. Petersburg, Russia.

D. I. F......**D. I. Freedman, B.A.,**
Rabbi in Perth, Western Australia.

D. W. A....**David Werner Amram, LL.B.,**
Attorney at Law, Philadelphia, Pa.; Author of "The Jewish Law of Divorce."

E. Ba.......**Emanuel Baumgarten,**
Translator of "Ḥobot ha-Lebabot," Vienna, Austria.

E. Ban.....**Eduard Baneth, Ph.D.,**
Professor in the Hochschule, Berlin, Germany.

E. C.........Executive Committee of the Editorial Board.

E. G. H....**Emil G. Hirsch, Ph.D., LL.D.,**
Rabbi of Chicago Sinai Congregation, Chicago, Ill.; Professor of Rabbinical Literature and Philosophy in the University of Chicago.

E. Lé.......**Emile Lévy,**
Chief Rabbi of Bayonne, France.

E. Me......**Eduard Meyer, Ph.D.,**
Professor of Ancient History, University of Halle, Germany.

E. Ms.......**E. Mels,**
New York.

E. N........**Eduard Neumann, Ph.D.,**
Chief Rabbi of Nagy-Kanisza, Hungary.

E. Sch......Emil Schürer, Ph.D.,
Professor of New Testament Exegesis at the University of Göttingen, Germany; Author of "Geschichte des Volkes Israel im Zeitalter Jesu Christi."

E. Sd.......E. Schwarzfeld, M.D.,
General Secretary of the Baron de Hirsch Fund; Paris, France.

F. Bu...... Frants Buhl, Ph.D.,
Professor of Semitic Philology at Copenhagen University, Copenhagen, Denmark; Author of "Geographie des Alten Palästina."

F. C. B.....F. C. Burkitt, M.A.,
Editor of "The Fragments of Aquila," Cambridge, England.

F. H. K....Frank H. Knowlton, M.S., Ph.D.,
Assistant Curator of Botany, U. S. National Museum, Smithsonian Institution, Washington, D. C.

F. H. V....Frank H. Vizetelly,
Associate Editor of the "Columbian Cyclopedia," and on STANDARD DICTIONARY Editorial Staff.

F. L. C.....Francis L. Cohen,
Rabbi, Borough New Synagogue London, England. Coeditor of "Voice of Prayer and Praise."

Chief Rabbi of Casale-Monferrato, Italy; Editor of "Il Vessillo Israelitico."

F. de S.M..Frederick de Sola Mendes, Ph.D.,
Rabbi of the West End Synagogue, New York.

F. T. H.....F. T. Hannemann, M.D.,
New York.

G...........Richard Gottheil, Ph.D.,
Professor of Semitic Languages, Columbia University, New York; Chief of the Oriental Department, New York Public Library; President of the Federation of American Zionists.

G. A. B.....George A. Barton, Ph.D.,
Associate Professor in Biblical Literature and Semitic Languages at Bryn Mawr College, Bryn Mawr, Pa.

G. A. D.....G. A. Danziger,
New York.

G. A. K... George Alexander Kohut, Ph.D.,
Formerly Rabbi in Dallas, Texas.

G. B. L.....Gerson B. Levi,
Philadelphia, Pa.

G. F. M....George F. Moore, M.A., D.D.,
Professor of Biblical Literature and the History of Religions in Harvard University, Cambridge, Mass. Author of a Commentary on the Book of Judges, etc.

G. J.........Giuseppe Jaré,
Chief Rabbi of Ferrara, Italy.

G. L....... Goodman Lipkind, B.A.,
Rabbi in London, England.

H. B........H. Brody, Ph.D.,
Rabbi, Nachod, Bohemia, Austria; Coeditor of "Zeitschrift für Hebräische Bibliographie."

H. Ba.......H. Baar,
Formerly Rabbi in New Orleans and Superintendent of Hebrew Orphan Asylum, New York.

H. F........Herbert Friedenwald, Ph.D.,
Formerly Superintendent of Department of Manuscripts, Library of Congress, Washington, D. C.; Secretary American Jewish Historical Society, Philadelphia, Pa.

H. G. E....H. G. Enelow, D.D.,
Rabbi of the Congregation Adath Israel, Louisville, Ky.

H. Hir.....Hartwig Hirschfeld, Ph.D.,
Professor in Jews' College, London, England.

H. I........ H. Illiowizi,
Formerly Rabbi in Philadelphia, Pa.

H. M.......Henry Malter, Ph.D.,
Assistant Professor Hebrew Union College, Cincinnati, Ohio.

H. M. S....H. M. Speaker,
Gratz College, Philadelphia, Pa.

H. R........Herman Rosenthal,
Chief of the Slavonic Department of the New York Public Library.

H. S........ Henrietta Szold,
Secretary of the Publication Committee of the Jewish Publication Society of America.

H. Ve.......H. Veld,
Rabbi in Amsterdam, N. Y.

I. B.........Isaac Bloch,
Chief Rabbi of Nancy, France.

I. Be........Immanuel Benzinger, Ph.D.,
Professor of Old Testament Exegesis at the Berlin University, Berlin.

I. Ber.......Israel Berlin,
Chemist, New York.

I. Br........I. Broydé,
Diplomé of the Ecole des Hautes Etudes; Late Librarian of Alliance Israélite Universelle, Paris, France.

I. D.........Israel Davidson, Ph.D.,
New York.

I. Hu.......Isaac Husik,
Tutor, Gratz College, Philadelphia, Pa.

I. L.........Israel Levi,
Professor in the Jewish Theological Seminary, Paris, France; Editor of "Revue des Etudes Juives."

I. Lö........Immanuel Löw,
Chief Rabbi of Szegedin, Hungary.

I. Ly........Isidore Lévy,
Paris, France.

I. M. P.....Ira Maurice Price, B.D., Ph.D.,
Professor of Semitic Languages and Literature in the University of Chicago, Ill.; Author of "The Monuments and the Old Testament."

J............ Joseph Jacobs, B.A.,
Formerly President of the Jewish Historical Society of England; Corresponding Member of the Royal Academy of History, Madrid: Author of "Jews of Angevin England," etc.

J. Ba........Jules Bauer,
Rabbi in Avignon, France.

J. Ch.......J. Chotzner, Ph.D.,
Rabbinical Lecturer at Montefiore College, Ramsgate, England.

J. D. E.... J. D. E. Eisenstein,
New York.

J. D. P.....**John Dyneley Prince, Ph.D.,**
Professor of Semitic Languages, New York University.

J. F. McC..**J. Frederic McCurdy, Ph.D., LL.D.,**
Professor of Oriental Languages in the University College, Toronto, Canada; Author of "History, Prophecy, and the Monuments."

J. Fr........**J. Friedlander, Ph.D.,**
Rabbi in Beaumont, Texas.

J. G. L......**J. G. Lipman,**
Assistant Agriculturist, New Jersey State Agricultural Experiment Station, New Brunswick, N. J.

J. Hy.......**J. Hyams,**
Bombay, India.

J. Jr........**Morris Jastrow, Jr., Ph.D.,**
Professor of Semitic Languages, University of Pennsylvania, Philadelphia, Pa.; Author of "Religion of the Babylonians and Assyrians," etc.

J. L. S......**Joseph L. Sossnitz,**
New York.

Zionism: see Basel.
"Ẓiẓit," Fringes of the Arba‘ Kanfot 76

THE

JEWISH ENCYCLOPEDIA

APOCRYPHA: § **I.** The most general definition of Apocrypha is, Writings having some pretension to the character of sacred scripture, or received as such by certain sects, but excluded from the canon (see CANON).

The history of the earlier usage of the word is obscure. It is probable that the adjective *ἀπόκρυφος*, "hidden away, kept secret," as applied to books, was first used of writings which were kept from the public by their possessors because they contained a mysterious or esoteric wisdom too profound or too sacred to be communicated to any but the initiated. Thus a Leyden magical papyrus bears the title, *Μωϋσέως ἱερὰ βίβλος ἀπόκρυφος ἐπικαλουμένη ὀγδόη ἢ ἁγία*, "The Secret Sacred Book of Moses, Entitled the Eighth or the Holy Book" (Dietrich, "Abraxas," 169). Pherecydes of Syros is said to have learned his wisdom from *τὰ Φοινίκων ἀπόκρυφα βιβλία*, "The Secret Books of the Phenicians" (Suidas, *s.v.* *Φερεκύδης*). In the early centuries of our era many religious and philosophical sects had such scriptures; thus the followers of the Gnostic Prodicus boasted the possession of secret books (*ἀποκρύφους*) of Zoroaster (Clemens Alexandrinus, "Stromata," i. 15 [357 Potter]). IV Esdras is avowedly such a work: Ezra is bidden to write all the things which he has seen in a book and lay it up in a hidden place, and to teach the contents to the wise among his people, whose intelligence he knows to be sufficient to receive and preserve these secrets (xii. 36 *et seq.*). (see Dan. xii. 4, 9; Enoch, i. 2, cviii. 1; Assumptio Mosis, x. 1 *et seq.*) In another passage such writings are expressly distinguished from the twenty-four canonical books; the latter are to be published that they may be read by the worthy and unworthy alike; the former (seventy in number) are to be preserved and transmitted to the wise, because they contain a profounder teaching (xiv. 44-47). In this sense Gregory of Nyssa quotes words of John in the Apocalypse as *ἐν ἀποκρύφοις* ("Oratio in Suam Ordinationem," iii. 549, ed. Migne; compare Epiphanius, "Adversus Hæreses," li. 3). The book contains revelations not to be comprehended by the masses, nor rashly published among them.

Inasmuch, however, as this kind of literature flourished most among heretical sects, and as many of the writings themselves were falsely attributed to the famous men of ancient times, the word "Apocrypha" acquired in ecclesiastical use an unfavorable connotation; the private scriptures treasured by the sects were repudiated by the Church as heretical and often spurious. Lists were made of the books which the Church received as sacred scripture and of those which it rejected: the former were "canonical" (see CANON); to the latter the name "Apocrypha" was given. The canon of the Church included the books which are contained in the Greek Bible but not in the Hebrew (see the list below, § III.); hence the term "Apocrypha" was not applied to these books, but to such writings as Enoch, the Testaments of the Twelve Patriarchs, etc. (see below, § III.). Jerome alone applies the word to all books which are not found in the Jewish canon (see "Prologus Galeatus"). At the Reformation, Protestants adopted the Jewish canon, and designated by the name "Apocrypha" the books of the Latin and Greek Bibles which they thus rejected; while the Catholic Church in the Council of Trent formally declared these books canonical, and continued to use the word "Apocrypha" for the class of writings to which it had generally been appropriated in the ancient Church; for the latter, Protestants introduced the name "Pseudepigrapha."

§ **II. Apocryphal Books among the Jews.** Judaism also had sects which possessed esoteric or recondite scriptures, such as the Essenes (Josephus, "B. J." ii. 8, § 7), and the Therapeutæ (Philo, "De Vita Contemplativa," ed. Mangey, ii. 475). Their occurrence among these particular sects is explicitly attested, but doubtless there were others. Indeed, many of the books which the Church branded as apocryphal were of Jewish (sometimes heretical Jewish) origin. The Jewish authorities, therefore, were constrained to form a canon, that is, a list of sacred scriptures; and in some cases to specify particular writings claiming this character which were rejected and forbidden. The former—so the distinction is expressed in a ceremonial rule (Yad. iii. 5; Tosef., Yad. ii. 13)—make the hands which touch them unclean—כל כתבי הקדש מטמאין את הידים: the latter do not (see CANON). Another term used in the discussion of certain books is גנז, properly "to lay up, store away for safe-keeping," also "withdraw from use." Thus, Shab. 30*b*, "The sages intended to withdraw Ecclesiastes"; "they also intended to withdraw Proverbs"; *ib.* 13*b*, "Hananiah b. Hezekiah prevented Ezekiel from being withdrawn"; Sanh. 100*b* (Codex Carlsruhe), "although our masters withdrew this book" (Sirach), etc. It has frequently been asserted that the idea and the name of the Greek "Apocrypha" were derived from this Hebrew terminology. (See Zahn, "Gesch. des Neutestamentlichen Kanons," i. 1.123 *et seq.*; Schürer, in "Protestantische Realencyclopädie," 3d ed., i. 623, and many others; compare Hamburger, "Realencyklopädie," ii. 68, n. 4.) "Apocrypha" (*ἀπόκρυφα βιβλία*) is, it is said, a literal translation of ספרים גנוזים, "concealed, hidden books." Closer examination shows, however, that the alleged identity of phraseology is a mistake. Talmudic literature knows nothing of a class of ספרים גנוזים—neither this phrase nor an equivalent occurs—not even in "Ab. R. N." i. 1, though the error appears to have originated in the words גנוזים היו used there. Nor is the usage identical: גנז does not mean "conceal" (*ἀποκρύπτειν* translates not גנז, but סתר and its synonyms), but "store away"; it is used only of things intrinsically precious or sacred. As applied to books, it is used only of books which are, after all, included in the Jewish canon, never of the kind of literature to which the Church Fathers give the name "Apocrypha"; these are rather ספרים החיצונים (Yer. Sanh. x. 1, 28*a*), or ספרי המינים. The only exception is a reference to Sirach. The Book of (magical) Cures which Hezekiah put away (Pes. iv. 9) was doubtless attributed to Solomon. This being the state of the facts, it is doubtful whether there is any connection between the use of גנז and that of *ἀπόκρυφος*.

§ III. Lists of Apocrypha; Classification. The following is a brief descriptive catalogue of writings which have been at some time or in some quarters regarded as sacred scripture, but are not included in the Jewish (and Protestant) canon. For more particular information about these works, and for the literature, the reader is referred to the special articles on the books severally.

First, then, there are the books which are commonly found in the Greek and Latin Bibles, but are not included in the Hebrew canon, and are hence rejected by Protestants; to these, as has already been said, Protestants give the name "Apocrypha" specifically. These are (following the order and with the titles of the English translation): I Esdras; II Esdras; Tobit; Judith; The Rest of the Chapters of the Book of Esther; Wisdom of Solomon; Wisdom of Jesus, the Son of Sirach, or Ecclesiasticus; Baruch, with the Epistle of Jeremiah; Song of the Three Holy Children; History of Susanna; Destruction of Bel and the Dragon; Prayer of Manasses; I Maccabees; II Maccabees. These, with the exception of I, II (III, IV) Esdras and the Prayer of Manasses, are canonical in the Roman Church.

Secondly, books which were pronounced apocryphal by the ancient Church. Of these we possess several catalogues, the most important of which are the Stichometry of Nicephorus; the Athanasian Synopsis; and an anonymous list extant in several manuscripts, first edited by Montfaucon (see Schürer, "Gesch." 3d ed., iii. 262 *et seq.*); further a passage in the "Apostolical Constitutions" (vi. 16), and the so-called Decree of Pope Gelasius ("Corpus Juris Canonici," iii. Distinctio 15). References in the Fathers add some titles, and various Oriental versions give us a knowledge of other writings of the same kind. A considerable part of this literature has been preserved, and fresh discoveries almost every year prove how extensive and how popular it once was.

A satisfactory classification of these writings is hardly possible; probably the most convenient scheme is to group them under the chief types of Biblical literature to which they are severally related—viz.:

1. **Historical,** including history proper, story books, and haggadic narrative.
2. **Prophetic,** including apocalypses.
3. **Lyric;** psalms.
4. **Didactic;** proverbs and other forms of "wisdom."

The assignment of a book to one or another of these divisions must often be understood as only *a potiori*; a writing which is chiefly narrative may contain prophecy or apocalypse; one which is primarily prophetic may exhibit in parts affinity to the didactic literature.

§ IV. Historical Apocrypha. **1. First Maccabees.** A history of the rising of the Jews under the leadership of Mattathias and his sons against Antiochus Epiphanes, and of the progress of the struggle down to the death of Simon, covering thus the period from 175–135 B.C. The book was written in Hebrew, but is extant only in Greek and in translations made from the Greek.

2. Second Maccabees. Professedly an abridgment of a larger work in five books by Jason of Cyrene. It begins with the antecedents of the conflict with Syria, and closes with the recovery of Jerusalem by Judas after his victory over Nicanor. The work was written in Greek, and is much inferior in historical value to I Macc. Prefixed to the book are two letters addressed to the Jews in Egypt on the observance of the Feast of Dedication (חנוכה).

3. First Esdras. In the Latin Bible, Third Esdras. A fragment of the oldest Greek version (used by Josephus) of Chronicles (including Ezra and Nehemiah), containing I Chron. xxxv.–Neh. viii. 13, in a different, and in part more original, order than the Hebrew text and with one considerable addition, the story of the pages of King Darius (iii. 1–v. 6). The book is printed in an appendix to the official editions of the Vulgate (after the New Testament), but is not recognized by the Roman Church as canonical.

4. Additions to Daniel. *a.* The story of Susanna and the elders, prefixed to the book, illustrating Daniel's discernment in judgment.

b. The destruction of Bel and the Dragon, appended after ch. xii., showing how Daniel proved to Cyrus that the Babylonian gods were no gods.

c. The Song of the three Jewish Youths in the fiery furnace, inserted in Dan. iii. between verses 23 and 24.

These additions are found in both Greek translations of Daniel (Septuagint and Theodotion): for the original language and for the Hebrew and Aramaic versions of the stories, see DANIEL.

5. Additions to Esther. In the Greek Bible, enlargement on motives suggested by the original story: *a.* The dream of Mordecai and his discovery of the conspiracy, prefixed to the book; the interpretation follows x. 3; *b.* Edict for the destruction of the Jews, after iii. 13; *c.*, *d.* Prayers of Mordecai and Esther, after iv. 17; *e.* Esther's reception by the king, taking the place of v. 1 in the Hebrew; *f.* Edict permitting the Jews to defend themselves, after viii. 12. In the Vulgate these additions are detached from their connection and brought together in an appendix to the book, with a note remarking that they are not found in the Hebrew.

6. Prayer of Manasses. Purports to be the words of the prayer spoken of in II Chron. xxxiii. 18 *et seq.*; probably designed to stand in that place. In many manuscripts of the Greek Bible it is found among the pieces appended to the Psalms; in the Vulgate it is printed after the New Testament with III and IV Esd., and like them is not canonical.

7. Judith. Story of the deliverance of the city of Bethulia by a beautiful widow, who by a ruse deceives and kills Holophernes, the commander of the besieging army. The book was written in Hebrew, but is preserved only in Greek or translations from the Greek; an Aramaic Targum was known to Jerome.

8. Tobit. The scene of this tale, with its attractive pictures of Jewish piety and its interesting glimpses of popular superstitions, is laid in the East (Nineveh, Ecbatana); the hero is an Israelite of the tribe of Naphtali, who was carried away in the deportation by Shalmaneser ("Enemessar"). The story is related in some way to that of AHIKAR.

9. Third Maccabees. (See MACCABEES, BOOKS OF.) A story of the persecution of the Egyptian Jews by Ptolemy Philopator after the defeat of Antiochus at Raphia in 217 B.C.: their steadfastness in their religion, and the miraculous deliverance God wrought for them. The book, which may be regarded as an Alexandrian counterpart of Esther, is found in manuscripts of the Septuagint, but is not canonical in any branch of the Christian Church.

§ V. Historical Pseudepigrapha. The books named above are all found in the Greek and Latin Bibles and in the Apocrypha of the Protestant versions. We proceed now to other writings of the same general class, commonly called "Pseudepigrapha."

10. The Book of Jubilees, called also **Leptogenesis** ("The Little Genesis"), probably בראשית זוטא, in distinction, not from the canonical Genesis, but from a larger Midrash, a ב' רבה. It contains a haggadic treatment of the history of the Patriarchs as well as of the history of Israel in Egypt, ending with the institution of the Passover, based on Gen. and Ex. i.-xii. It is a free reproduction of the Biblical narrative, with extensive additions of an edifying character, exhortations, predictions, and the like. It gets the name "Book of Jubilees" from the elaborate chronology, in which every event is minutely reckoned out in months, days, and years of the Jubilee period. The whole is in the form of a revelation made through an angel to Moses on Mt. Sinai, from which some writers were led to call the book the "Apocalypse of Moses." (See APOCALYPSE, § V. 10.) It was written in Hebrew, probably in the first century B.C., but is now extant only in Ethiopic and in fragments of an old Latin translation, both made from an intermediate Greek version.

Brief mention may be made here of several similar works containing Haggadah of early Hebrew history.

a. "Liber Antiquitatum Biblicarum," attributed to PHILO. This was first published, with some other works of Philo, at Basel in 1527 (see Cohn, in "Jew. Quart. Rev." 1898, x. 277 *et seq.*; Schürer, "Gesch." 3d ed., iii. 541 *et seq.*, additional literature). Extends from Adam to the death of Saul, with omissions and additions—genealogical, legendary, and rhetorical—speeches, prophecies, prayers, etc. The patriarchal age is despatched very briefly; the Exodus, on the contrary, and the stories of the Judges, are much expanded. The author deals more freely with the Biblical narrative than Jubilees, and departs from it much more widely. The work is preserved in a Latin translation made from Greek; but it is highly probable that the original language was Hebrew, and that it was written at a time not very remote from the common era. Considerable portions of it are incorporated—under the name of Philo—in the Hebrew book, of which Gaster has published a translation under the title "Chronicles of Jerahmeel" (see Gaster, *l.c.*, Introduction, pp. xxx. *et seq.*, and below, *d*).

b. Later works which may be compared with this of Philo are the ספר הישר, דברי הימים של משה, and the מדרש ויסעו, on which see the respective articles.

c. To a different type of legendary history belongs the Hebrew YOSIPPON (*q.v.*).

d. The "Chronicles of Jerahmeel," translated by Gaster from a unique manuscript in the Bodleian (1899), are professedly compiled from various sources; they contain large portions excerpted from the Greek Bible, Philo (see above), and "Yosippon," as well as writings like the Pirḳe de R. Eliezer, etc.

e. Any complete study of this material must include also the cognate Hellenistic writings, such as the fragments of Eupolemus and Artapanus (see Freudenthal, "Hellenistische Studien") and the legends of the same kind in Josephus.

§ VI. Books of the Antediluvians. The Book of Jubilees makes repeated mention of books containing the wisdom of the antediluvians (*e.g.*, Enoch, iv. 17 *et seq.*; Noah, x. 12 *et seq.*) which were in the possession of Abraham and his descendants; also of books in which was preserved the family law of the Patriarchs (compare xli. 28) or their prophecies (xxxii. 24 *et seq.*, xlv. 16). These are all in the literal sense "apocryphal," that is, esoteric, scriptures. A considerable number of writings of this sort have been preserved or are known to us from ancient lists and references; others contain entertaining or edifying embellishments of the Biblical narratives about these heroes. Those which are primarily prophetic or apocalyptic are enumerated elsewhere (x., xi.); the following are chiefly haggadic:

11. Life of Adam and Eve. This is essentially a Jewish work, preserved—in varying recensions—in Greek, Latin, Slavonic, and Armenian. It resembles the Testament literature (see below) in being chiefly occupied with the end of Adam's life and the burial of Adam and Eve. According to an introductory note in the manuscripts, the story was revealed to Moses, whence the inappropriate title "Apocalypse of Moses." On the apocryphal Adam books see ADAM AND EVE, BOOK OF.

Other apocryphal books bearing the name of Adam are: The Book of Adam and Eve, or the Conflict of Adam and Eve with Satan, extant in Arabic and Ethiopic; and The Testament of Adam, in Syriac and Arabic. Both these are Christian offshoots of the Adam romance. Apocalypses of Adam are mentioned by Epiphanius; the Gelasian Decree names a book on the Daughters of Adam, and one called the Penitence of Adam.

Seven Books of Seth are said by Epiphanius ("Adversus Hæreses," xxxix. 5; compare xxvi. 8; also Hippolytus, "Refutatio," v. 22; see also Josephus, "Ant." i. 2, § 3) to have been among the scriptures of the Gnostic sect of Sethians.

On the apocryphal books of Enoch see Apocalypse, § V., and Enoch, Book of.

The Samaritan author, a fragment of whose writing has been preserved by Eusebius ("Præp. Ev." ix. 17) under the name of Eupolemus, speaks of revelations by angels to Methuselah, which had been preserved to his time. A Book of Lamech is named in one of our lists of Apocrypha.

Books of Noah are mentioned in Jubilees (x. 12, xxi. 10). Fragments of an Apocalypse of Noah are incorporated in different places in Enoch (which see). A book bearing the name of Noria, the wife of Noah, was current among certain Gnostics (Epiphanius, "Adv. Hæreses," xxvi. 1). Shem transmits the books of his father, Noah (Jubilees, x. 14); other writings are ascribed to him by late authors. Ham was the author of a prophecy cited by Isidore, the son of Basilides (Clemens Alexandrinus, "Stromata," vi. 6); according to others he was the inventor of magic (identified with Zoroaster; Clementine, "Recognitiones," iv. 27).

§ VII. Testaments. A special class of apocryphal literature is made up of the so-called "Testaments" of prominent figures in Bible history. Suggested, doubtless, by such passages as the Blessing of Jacob (Gen. xlix.), the Blessing of Moses (Deut. xxxiii.), the parting speeches of Moses (Deut. iv., xxix. *et seq.*) and Joshua (Josh. xxiii., xxiv.), etc., the Testaments narrate the close of the hero's life, sometimes with a retrospect of his history, last counsels and admonitions to his children, and disclosures of the future. These elements are present in varying proportions, but the general type is well marked.

12. Testament of Abraham. Edited in Greek (two recensions) by M. R. James, "Texts and Studies," ii. 2; in Rumanian by Gaster, in "Proc. of Society of Biblical Archeology," 1887, ix. 195 *et seq.*; see also Kohler, in "Jew. Quart. Rev." 1895, vii. 581 *et seq.* (See Abraham, Testament of, called also **Apocalypse of Abraham**). Narrative of the end of Abraham's life; his refusal to follow Michael, who is sent to him; his long negotiations with the Angel of Death. At his request, Michael shows him, while still in the body, this world and all its doings, and conducts him to the gate of heaven. The book is thus mainly Haggadah, with a little apocalypse in the middle.

The Slavonic Apocalypse of Abraham (ed. by Bonwetsch, "Studien zur Geschichte der Theologie und Kirche," 1897), translated from the Greek, gives the story of Abraham's conversion; the second part enlarges on the vision of Abraham in Gen. xv.

13. Testaments of Isaac and Jacob. Preserved in Arabic and Ethiopic. They are upon the same pattern as the Testament of Abraham; each includes an apocalypse in which the punishment of the wicked and the abode of the blessed are exhibited. The moral exhortation which properly belongs to the type is lacking in the Testament of Abraham, but is found in the other two.

14. Testaments of the Twelve Patriarchs. The parting admonitions of the twelve sons of Jacob to their children. Each warns against certain particular sins and commends the contrary virtues, illustrating and enforcing the moral by the example or experience of the speaker. Thus, Gad warns against hatred, Issachar shows the beauty of simple-mindedness, Joseph teaches the lesson of chastity. In some (*e.g.*, in the Testament of Joseph) the legendary narrative of the patriarch's life fills a larger space, in others (*e.g.*, Benjamin) direct ethical teaching predominates.

The eschatological element is also present in varying proportions—predictions of the falling away in the last days and the evils that will prevail; the judgment of God on the speaker's posterity for their sins (*e.g.*, Levi, xiv. *et seq.*; Judah, xviii. 22 *et seq.*; Zebulun, ix.); and the succeeding Messianic age (Levi, xviii.; Judah, xxiv. *et seq.*; Simeon, vi.; Zebulun, ix. *et seq.*). A true apocalypse is found in the Test. of Levi, ii. *et seq.* (see Apocalypse). This eschatological element is professedly derived from a book written by Enoch (*e.g.*, Levi, x., xiv., xvi.; Judah, viii.; Simeon, v., etc.). The work is substantially Jewish; the Christian interpolations, though numerous, are not very extensive, and in general are easily recognizable.

A Hebrew Testament of Naphtali has been published by Gaster ("Proceedings of Society of Biblical Archeology," December, 1893; February, 1894; see also "Chron. of Jerahmeel," pp. 87 *et seq.*), and is regarded by the editor and by Resch ("Studien und Kritiken," 1899, pp. 206 *et seq.*) as the original of which the Greek Testament is a Christian recension.

15. Testament of Job. When the end of his life is at hand, Job narrates to his children the history of his trials, beginning with the cause of Satan's animosity toward him. After parting admonitions (45), he divides his possessions among his sons, and gives to his three daughters girdles of wonderful properties (46 *et seq.*). The book is a Haggadah of the story of Job, exaggerating his wealth and power, his good works, and his calamities, through all of which he maintains unshaken his confidence in God. There are no long arguments, as in the poem; the friends do not appear as defenders of God's justice—the problem of theodicy is not mooted—they try Job with questions (see 36 *et seq.*). Elihu is inspired by Satan, and is not forgiven with the others. See Kohler, in "Semitic Studies in Memory of Alexander Kohut," pp. 264–338 and 611, 612, and James, in "Apocrypha Anecdota," ii. 104 *et seq.*).

16. Testament of Moses. The patristic lists of Apocrypha contain, in close proximity, the Testament of Moses and the Assumption of Moses. It is probable that the two were internally connected, and that the former has been preserved in our Assumption of Moses, the extant part of which is really a Testament—a prophetic-apocalyptic discourse of Moses to Joshua. See below, § x. 2.

17. Testament of Solomon. Last words of Solomon, closing with a confession of the sins of his old age under the influence of the Jebusite, Shulamite. It is in the main a magical book in narrative form, telling how Solomon got the magic seal; by it learned the names and powers of the demons and the names of the angels by whom they are constrained, and put them to his service in building the Temple; besides other wonderful things which he accomplished through his power over the demons. (See Fleck, "Wissenschaftliche Reise," ii. 3, 111 *et seq.*) A translation into English by Conybeare was given in "Jewish Quart. Rev." 1899, xi. 1–45.

The Gelasian Decree names also a "Contradictio

Salomonis," which may have described his contest in wisdom with Hiram, a frequent theme of later writers.

A **Testament of Hezekiah** is cited by Cedrenus; but the passage quoted is found in the Ascension of Isaiah.

§ VIII. Relating to Joseph, Isaiah, and Baruch. Other Apocrypha are the following:

18. Story of Aseneth. A romantic tale, narrating how Aseneth, the beautiful daughter of Potiphar, priest of On, became the wife of Joseph; how the king's son, who had desired her for himself, tried to destroy Joseph, and how he was foiled. The romance exists in various languages and recensions. The Greek text was published by Batiffol, Paris, 1889.

A **Prayer of Joseph** is named in the anonymous list of Apocrypha, and is quoted by Origen and Procopius. In these fragments Jacob is the speaker.

19. Ascension of Isaiah, or **Vision of Isaiah.** Origen speaks of a Jewish apocryphal work describing the death of Isaiah. Such a *martyrium* is preserved in the Ethiopic Ascension of Isaiah, the first part of which tells how Manasseh, at the instigation of a Samaritan, had Isaiah sawn asunder. The second part, the Ascension of Isaiah to heaven in the 20th year of Hezekiah, and what he saw and heard there, is Christian, though perhaps based on a Jewish vision. Extensive Christian interpolations occur in the first part also. A fragment of the Greek text is reproduced in Grenfell and Hunt, "The Amherst Papyri," London, 1900.

20. The Rest of the Words of Baruch, or **Paralipomena of Jeremiah.** (Ceriani, "Monumenta," v. 1, 9 *et seq.*; J. Rendel Harris, "Rest of the Words of Baruch," 1889; Dillmann, "Chrestomathia Æthiopica," pp. 1 *et seq.*; Greek and Ethiopic.) Narrates what befell Baruch and Abimelech (Ebed-melech) at the fall of Jerusalem. Sixty-six years after, they sent a letter by an eagle to Jeremiah in Babylon. He leads a company of Jews back from Babylonia; only those who are willing to put away their Babylonian wives are allowed to cross the Jordan; the others eventually become the founders of Samaria. Jeremiah is spirited away. After three days, returning to the body, he prophesies the coming of Christ and is stoned to death by his countrymen.

§ IX. Lost Books. Other haggadic works named in the Gelasian Decree are: the **Book of Og, the Giant,** "whom the heretics pretend to have fought with a dragon after the flood"; perhaps the same as the Manichean *Γιγάντειος βίβλος* (Photius, "Cod." 85), or *Πραγματεία τῶν Γιγάντων*; **The Penitence of Jannes and Jambres.** (See Iselin, in "Zeitschrift für Wissensch. Theologie," 1894, pp. 321 *et seq.*) Both of these may well have been ultimately of Jewish origin.

§ X. Prophetical Apocrypha. 1. Baruch. Purporting to be written by Baruch, son of Neriah, the disciple of Jeremiah, after the deportation to Babylon. The book is not original, drawing its motives chiefly from Jeremiah and Isaiah xl. *et seq.*; affinity to the Wisdom literature is also marked in some passages, especially in ch. iii.

The Epistle of Jeremiah to the captives in Babylon, which is appended to Baruch, and counts as the sixth chapter of that book, is a keen satire on idolatry.

2. Assumption of Moses. See above, Testament of Moses (§ VII. 16). What now remains of this work, in an old Latin version, is prophetic in character, consisting of predictions delivered by Moses to Joshua when he had installed him as his successor. Moses foretells in brief outline the history of the people to the end of the kingdom of Judah; then, more fully, the succeeding times down to the successors of Herod the Great, and the Messianic age which ensues. It is probable that the lost sequel contained the Assumption of Moses, in which occurred the conflict—referred to in Jude 9—between Michael and Satan for the possession of Moses' body.

3. Eldad and Medad. Under this name an apocryphal book is mentioned in our lists, and quoted twice in the "Shepherd of Hermas" (ii. 34). It contained the prophecy of the two elders named in Num. xi. 26.

§ XI. Apocalypses. Most of the prophetical Apocrypha are apocalyptic in form. To this class belong: Enoch, The Secrets of Enoch, IV Esd., the Apocalypses of Baruch (Greek and Syriac), Apocalypse of Zephaniah, Apocalypse of Elijah, and others (see Apocalypse, and the special articles). Apocalyptic elements have been noted above in the Assumption of Moses, the Ascension of Isaiah, the Testaments of the Twelve Patriarchs, and others.

§ XII. Lyrical Apocrypha. 1. Psalm cli., in the Greek Bible; attributed to David, "when he had fought in single combat with Goliath."

2. Psalms of Solomon. Eighteen in number; included in some manuscripts of the Greek Bible, but noted in the catalogues as disputed or apocryphal. Though ascribed to Solomon in the titles, there is no internal evidence that the author, or authors, designed them to be so attributed. They were written in Hebrew—though preserved only in Greek—in Palestine about the middle of the first century B.C., and give most important testimony to the inner character of the religious belief of the time and to the vitality of the Messianic hope, as well as to the strength of party or sectarian animosity. The five Odes of Solomon in "Pistis Sophia" are of Christian (Gnostic) origin.

3. Five apocryphal psalms in Syriac, edited by Wright ("Proceedings of Society of Biblical Archeology," 1887, ix. 257-266). The first is Ps. cli. (*supra*, § 1); it is followed by (2) a prayer of Hezekiah; (3) a prayer when the people obtain leave from Cyrus to return; and (4, 5) a prayer of David during his conflict with the lion and the wolf, and thanksgiving after his victory.

§ XIII. Didactic Apocrypha. 1. The Wisdom of Jesus, the Son of Sirach (in the Latin Bible entitled **Ecclesiasticus**). Proverbs and aphorisms for men's guidance in various stations and circumstances; a counterpart to the Proverbs of Solomon. The author was a native of Jerusalem, and wrote in Hebrew; his work was translated into Greek by his grandson soon after 132 B.C. The Syriac translation was also made from the Hebrew, and recently considerable parts of the Hebrew text itself have been recovered. The book is included in the Christian Bible—Greek, Latin, Syriac, etc.—but was excluded from the Jewish Canon (Tosef., Yad. ii. 13 *et seq.*). Many quotations in Jewish literature prove, however, its continued popularity.

2. Wisdom of Solomon, *Σοφία Σολομῶνος*. Written in Greek, probably in Alexandria; a representative of

Hellenistic "Wisdom." Solomon, addressing the rulers of the earth, exhorts them to seek wisdom, and warns them of the wickedness and folly of idolatry. Noteworthy is the warm defense of the immortality of the soul, in which the influence of Greek philosophical ideas is manifest, as, indeed, it is throughout the book.

3. Fourth Maccabees. The title is a misnomer; and the attribution of the work to Flavius Josephus is equally erroneous. The true title is *Περὶ αὐτοκράτορος λογισμοῦ*, "On the Autonomy of Reason." It is an anonymous discourse on the supremacy of religious intelligence over the feelings. This supremacy is proved, among other things, by examples of constancy in persecution, especially by the fortitude of Eleazar and the seven brothers (II Macc. vi. 18, vii. 41). The work was written in Greek; it is found in some manuscripts of the Septuagint, but is not canonical.

§ XIV. Apocrypha in the Talmud. There are no Jewish catalogues of Apocrypha corresponding to the Christian lists cited above; but we know that the canonicity of certain writings was disputed in the first and second centuries, and that others were expressly and authoritatively declared not to be sacred scripture, while some are more vehemently interdicted—to read them is to incur perdition. The controversies about Ecclesiastes and the Song of Solomon will be discussed in the article CANON, where also the proposed "withdrawal" of Proverbs, Ezekiel, and some other books will be considered. Here it is sufficient to say that the school of Shammai favored excluding Ecclesiastes and the Song of Solomon from the list of inspired scriptures, but the final decision included them in the canon.

Sirach, on the other hand, was excluded, apparently as a recent work by a known author; and a general rule was added that no books more modern than Sirach were sacred scripture.

The same decision excluded the Gospels and other heretical (Christian) scriptures (Tosef., Yad. ii. 13). These books, therefore, stand in the relation of Apocrypha to the Jewish canon.

In Mishnah Sanh. x. 1, R. Akiba adds to the catalogue of those Israelites who have no part in the world to come, "the man who reads in the extraneous books" (בספרים החיצונים), that is, books outside the canon of holy scripture, just as ἔξω, *extrinsecus*, *extra*, are used by Christian writers (Zahn, "Gesch. des Neutestamentlichen Kanons," i. 1, 126 *et seq.*). Among these are included the "books of the heretics" (מינים), *i.e.*, as in Tosef., Yad. quoted above, the Christians (Bab. Sanh. 100*b*). Sirach is also named in both Talmuds, but the text in the Jerusalem Talmud (Sanh. 28*a*) is obviously corrupt.

Further, the writings of Ben La'anah (בן לענה) fall under the same condemnation (Yer. Sanh. *l.c.*); the Midrash on Ecclesiastes xii. 12 (Eccl. R.) couples the writings of Ben Tigla (בן תגלא) with those of Sirach, as bringing mischief into the house of him who owns them. What these books were is much disputed (see the respective articles). Another title which has given rise to much discussion is ספרי המירם or המירום (*sifre ha-meram* or *ha-merom*), early and often emended by conjecture to המירום (Homeros; so Hai Gaon, and others). See HOMER IN TALMUD. The books of "Be Abidan," about which there is a question in Shab. 116*a*, are also obscure.

BIBLIOGRAPHY: Texts: The Apocrypha (in the Protestant sense) are found in editions of the Greek Bible; see especially Swete, *The Old Testament in Greek*, 2d ed.; separately, Fritzsche, *Libri Apocryphi Veteris Testamenti Græci*, 1871. Of the Pseudepigrapha no comprehensive corpus exists; some of the books are included in the editions of Swete and Fritzsche, above; and in Hilgenfeld, *Messias Judæorum*, 1869. See also Fabricius, *Codex Pseudepigraphus Veteris Testamenti*, 2 vols., 2d ed., Hamburg, 1722, 1723, which is not replaced by any more recent work. For editions (and translations) of most of these writings the literature of the respective articles must be consulted. Translations: The Authorized Version may best be used in the edition of C. J. Ball, *Variorum Apocrypha*, which contains a useful apparatus of various readings and renderings; the Revised Version, *Apocrypha*, 1895; Churton, *Uncanonical and Apocryphal Scriptures*, 1884; a revised translation is given also in Bissell's *Commentary* (see below). Of the highest value is the German translation, with introductions and notes, in Kautzsch, *Die Apokryphen und Pseudepigraphen des Alten Testaments*, 2 vols., 1899. Commentaries: Fritzsche and Grimm, *Kurzgefasstes Exegetisches Handbuch zu den Apokryphen des Alten Bundes*, 6 vols., 1851-60; Wace (and others), *Apocrypha*, 2 vols., 1888 (Speaker's Bible); Bissell, *The Apocrypha of the Old Testament*, 1890 (Lange series).

The most important recent work on this whole literature is Schürer's *Geschichte des Jüdischen Volkes*, 3d ed., vol. iii. (Eng. tr. of 2d ed.: *Jew. People in the Time of Jesus Christ*), where also very full references to the literature will be found.

T. G. F. M

APOLANT, EDUARD: German physician; born at Jastrow, city in Westpreussen, Prussia, Aug. 21, 1847. He was educated at the gymnasium at Deutsch-Krone and at the University of Berlin, where he received the degree of doctor of medicine in 1870. He was an assistant surgeon in the Franco-Prussian war (1870-71), and, on returning to Berlin, engaged in practise in that city. In 1896 he received the title of "Sanitätsrath."

Apolant has contributed numerous papers to Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin" ("Ueber das Verhältniss der Weissen und Roten Blutkörperchen bei Eiterungen," etc.); the "Berliner Klinische Wochenschrift" ("Ueber Applikation von Karbolsäureumschläge bei Pocken," etc.), and other medical journals.

APOLLINARIS or APOLLINARIUS, CLAUDIUS: Bishop of Hierapolis, Phrygia, in 170; author of an "Apology for the Christian Faith," which he addressed to Emperor Marcus Aurelius Antoninus. He wrote also two books "Pros Ioudaious" (Against the Jews) and other works against the pagans, and opposing the Montanist and the Encratite heresies, besides other books, all of which are now lost.

APOLLONIUS: One of the Judeans who, about 130 B.C., went to Rome to make a covenant or league of friendship with the Romans. He was called by Josephus "the son of Alexander." See JOHN HYRCANUS and ROMANS.

BIBLIOGRAPHY: Josephus, *Ant.* xiii. 9, § 2, xiv. 10, § 22.

G. L. G.

APOLLONIUS or APOLLONIUS MOLON: Greek rhetorician and anti-Jewish writer; flourished in the first century B.C. He is usually, but not always, designated by the name of his father, Molon. He was called by his patronymic mainly to distinguish him from his somewhat older contemporary Apollonius Malachos. Apollonius Molon was still praised as a distinguished master of the art of speech about the year 75 B.C. Josephus, however, concerns himself with him simply as one of the most prominent and most pernicious anti-Jewish writers.

Born at Alabanda, in Caria, Apollonius afterward emigrated to Rhodes, wherefore Cicero styles him "Molon Rhodius" ("Brutus," ch. lxxxix.). He soon eclipsed his contemporaries both as a master of oratory and as a practical advocate, and had as pupils both Cicero and Julius Cæsar.

Follower of Posidonius.

It was at Rhodes, no doubt, that Apollonius appropriated the Judæophobic ideas of the Syrian stoic POSIDONIUS (135-51 B.C.), who lived in that city, and thence circulated throughout the Greek and Roman world several wild calumnies concerning the Jews, such as the charges that they worshiped an ass in their temple, that they sacrificed annually on their altar a specially fattened Greek, and that they were filled with hatred toward every other nationality, particularly the Greeks. These and similar malevolent fictions regarding the Jews were adopted by Apollonius, who, induced by the fact that the Jews in Rhodes and in Caria were very numerous (compare I Macc. xv. 16-24), composed an anti-Jewish treatise, in which all these accusations found embodiment. While Posidonius had confined himself to incidental allusions to the Jews in the course of his history of the Seleucidæ (compare C. Müller, "Frag. Hist. Græc." iii. 245 *et seq.*), Apollonius outdid his master by undertaking a separate book on the subject. Such appears to have been the character of his treatise, which, according to Alexander Polyhistor, was a *συσκευή* (Eusebius, "Præparatio Evangelica," ix. 19), a polemic treatise—as Schürer renders the phrase—against the Jews. The polemic passages, however, must have been interwoven with a general presentation of a Jewish theme—probably a history of the origin of the Jewish people. For it is the complaint of Josephus that Apollonius, unlike Apion, far from massing all his anti-Jewish charges in one passage, had preferred to insult the Jews in various manners and in numerous places throughout his work (*l.c.* ii. 14). The assumption that Apollonius' book was of a historic character is confirmed by the fragment in Alexander Polyhistor, which gives the genealogy of the Jews from the Deluge to Moses; and by an allusion of Josephus which indicates that the exodus from Egypt was also dealt with therein (*l.c.* ii. 2). In connection with the exodus, Apollonius gave circulation to the malicious fable that the Jews had been expelled from Egypt owing to a shameful malady from which they suffered, while he took occasion to blacken the character of Moses also and to belittle his law, characterizing the lawgiver of the Jews as a sorcerer and his work as devoid of all moral worth. Besides, he heaped many unjust charges upon the Jews, reproaching them for not worshiping the same gods as the other peoples (*l.c.* ii. 7) and for disinclination to associate with the followers of other faiths (ii. 36). He thus represented them as atheists and misanthropes, and depicted them withal as men who were either cowards or fanatics, the most untalented among all barbarians, who had done nothing in furtherance of the common welfare of the human race (ii. 14). No wonder these groundless charges excited the anger of Josephus, who believed that they corrupted and misled the judgment of Apion (*l.c.* ii. 7, 15 *et seq.*), and who therefore zealously devoted the entire second part of his treatise against Apion to a refutation of Apollonius. The latter was thus paid back in his own coin. Josephus does not hesitate to accuse him of crass stupidity, vaingloriousness, and an immoral life (*l.c.* ii. 36, 37). See APION.

APOLLONIUS OF TYANA: Pythagorean philosopher and necromancer, born about the year 3 B.C.; died, according to some sources, in the thirty-eighth year of his age. In Arabic literature his name is cited in the form "Balinas" or "Belenus," which has often been mistaken for "Pliny." He is mentioned in connection with magical writings, and is called by the Arabs Ṣahib al-Ṭalismat ("The Author of Talismans"). They attribute to Apollonius "Risālah fi Tathir al-Ruḥamiyat fi al-Markabat," a work that treats of the influence of pneumatic agencies in the world of sense, and which also deals with talismans. An introduction ("Mebo") to this treatise on talismans, "Iggeret al-Ṭalasm," was composed by an anonymous writer; it is found in Steinschneider MS., No. 29. It is full of Arabic words, and contains a few Romance ones also. The translator says at the end that the whole book is of no value, and that he has translated (or copied) it merely as a warning against "serving strange gods." It is probable that a copy of this translation existed in the library of Leon Mosconi (Majorca, 14th century), where it seems to occur under the title "Bel Enus"—No. 37 of the catalogue ("Rev. Et. Juives," xxxix. 256, xl. 65). It is also cited by Joseph Nasi (16th century) and perhaps by Abba Mari. According to Johanan Allemanno (died 1500), Solomon ben Nathan Orgueiri (of Aix, Provence, about 1390) translated from the Latin another work on magic by Apollonius. The Hebrew title of this second work was מלאכת מושכלת ("Intellectual Art"); fragments of it are found in Schönblum MS., No. 79.

G.* xlvi. 466; on the Arabic and Hebrew translations see Steinschneider, *Hebr. Uebers.* § 520 (= *Z. D. M. G.* xlv. 439 *et seq.*); Fürst, *Canon des A. T.* p. 99, attempted to identify Apollonius with Ben La'anah, whose writings were condemned (Yer. Sanh. xi. 28 *a*).

G.

APOLLOS: A learned Jew of Alexandria, and colaborer of Paul. Of him the following is told (Acts xviii. 24-28): He came (about 56) to Ephesus, as "an eloquent man and mighty in the Scriptures," to preach and to teach in the synagogue; and his fervor of spirit and boldness of speech attracted the attention of Aquila and Priscilla—Jews who had espoused the cause of the new Christian faith in Corinth. They found him not sufficiently informed in the new doctrine; for he knew "only the baptism of John" when he spoke to the people of "the way of the Lord." So they expounded the way of God to him more fully; and, turned into a firmer believer in Jesus as the Messiah, he went to Achaia, where he converted the Jews to his new faith by his arguments from Scriptures. This is illustrated by another story which immediately follows: While Apollos was still at Corinth, Paul found in Ephesus about twelve disciples of John the Baptist who had never heard of the Holy Ghost, but had undergone baptism for the sake of repentance. Paul succeeded in baptizing them anew in the name of Jesus; and then, after "Paul had laid his hands upon them, the Holy Ghost came on them; and they spake with tongues, and prophesied" (Acts xix. 1-6).

The sect, then, to which Apollos, as well as these twelve men of Ephesus, belonged, were simply Baptists, like John; preaching the doctrine of the "Two Ways"—the Way of Life and of Death—as taught in the "Didache," the propaganda literature of the Jews before the rise of Christianity. They were thenceforward won over to the new Christian sect probably under the influence of such ecstatic states of mind as are described here and in the writings of Paul.

Whether Apollos belonged to the class of thinkers like Philo or not is, of course, a matter of conjecture. But it is learned from Paul's own words (I Cor. i. 10) that while working on the same lines as Paul, Apollos differed essentially from him in his teachings. Four different parties had arisen there: one adhering to Paul, another to Apollos, a third to Peter, and the fourth calling itself simply "of the Christ." "Who, then," says he, "is Paul, and who is Apollos, but ministers by whom ye believed, even as the Lord gave to every man? I have planted, Apollos watered . . . we are laborers together. . . . Let no man deceive himself. If any man among you seemeth to be wise in this world, let him become a fool that he may be wise. . . . Whether Paul, or Apollos, or Cephas, or the world, or life, or death, or things present, or things to come; all are yours; and ye are Christ's; and Christ is God's" (I Cor. iii. 5-23). Evidently Apollos betrayed more of that wisdom which Alexandrian philosophers gloried in. Wherefore, Paul contends that "not with wisdom of words" (I Cor. i. 17) was he sent to preach the gospel. . . . "The world by wisdom knew not God, it pleased God by the foolishness of preaching to save them that believe. For the Jews require a sign, and the Greeks seek after wisdom" (*ib.* 21, 22). Originally the people of Corinth were, according to I Cor. xii. 2, not Jews, but Gentiles. It is, therefore, easy to understand why Apollos' preaching appealed to them far more than Paul's. Still, the difference between the two "apostles" (I Cor. iv. 9) was not of a nature to keep them apart; for Paul, toward the close of his letter to the Corinthians, says: "As touching our brother Apollos, I greatly desired him to come unto you: . . . he will come when he shall have convenient time" (I Cor. xvi. 12). We have reason to ascribe to Apollos some influence in the direction which led to a blending of the Philonic Logos with the Jewish idea of the Messiah—a Hellenization of the Christian belief in the sense of John's Gospel; though many critics since Luther are disposed to attribute to him the Epistle to the Hebrews.

T. K.

APOLOGISTS: Men of pious zeal who defended both the Jewish religion and the Jewish race against the attacks and accusations of their enemies by writing, either in the form of dissertations or of dialogues, works in defense of the spirit and doctrines of Judaism, so that its essentials might be placed in the proper light. It was in the nature of things, therefore, that they were impelled to expose the general weakness of the positions of their antagonists, and to attack those positions rigorously; hence the apologies are, at the same time, polemical arraignments. So long as the Jewish state was independent and respected by neighboring peoples, and so long as religious reverence retained its hold upon the heathen nations with whom the Jews came into contact, it was unnecessary to ward off attacks on their nationality, on their religious teachings, or on their manners and customs. They dwelt in harmony with Persians when Cyrus established the Persian empire, and later with Greeks; they dwelt alongside of Parthians and New Persians, and their Judaism received no manner of offense. But when the Jewish state fell into internal decay, and the Greeks, with whom the Jews held the closest relations, lost their reverence for their own deities; when, furthermore, with the translation of the Bible into Greek, the Hellenes were introduced to a literature that claimed at least equality with their own; and, finally, when the Egyptians were by that translation informed of the pitiful rôle their ancestors had played at the birth of the Jewish nation, these peoples felt themselves severely wounded in their national vanity. It was, accordingly, in Alexandria that anti-Jewish literature originated, to withstand which the Jewish Apologists resident there devoted their energies.

The First Attacks in Egypt by Heathens.

Manetho, an Egyptian temple scribe at Thebes, was the first to assail the Jewish nationality with all manner of fables invented by himself. Opportunity to disseminate misinformation concerning the Jews had been afforded by the Syrian king Antiochus Epiphanes, whose wonderful stories concerning his experiences in the Temple of Jerusalem were seized upon and elaborated by the anti-Jewish writers of Alexandria. In this city, the capital of Egypt, dwelt numerous Jews who were distinguished for their intellectual activity and moral life, and many Greeks detested the Jews for their difference in moral ideals, founded as they were upon religious codes quite different from their own. Alexandria was accordingly the market where unscrupulous writers were certain of finding sale for their multifarious calumnies against the Jewish people. In Alexandria, consequently, the earliest Jewish Apologists made their appearance.

The First Apologists.

"Sibylline Books" and "The Wisdom of Solomon."

The first generation of Jewish Apologists flourished from the beginning of the first century B.C. to the middle of the second century of the common era. In this period are included those Apologists who encountered the attacks of the ancient heathens. The early Greek fashion of writing under a pseudonym had been transplanted to Alexandria; works were issued purporting to be productions of the great men of antiquity. The first Jewish Apologists were, therefore, strictly in the fashion when they used pseudonyms in their replies to the ceaseless libels with which the anti-Jewish writers assailed the religious literature, the manners, and the customs of the Jews. These Apologists drew a picture of the grandeur and moral elevation of Judaism, and, in accordance with the prevailing custom, ascribed their writings to heathen poets and prophets. The most important of these apologetic writings are the "Sibylline Books" and "The Wisdom of Solomon." The "Sibylline Books," composed partly in the middle of the second, partly in the first, century B.C., contrasted the lofty ethics of monotheism and the righteousness and morality of Judaism with the follies of idol-worship, and with the selfishness and sensuality of heathendom. "The Wisdom of Solomon" uses still darker colors to paint the immorality and viciousness, the utter corruption and shamelessness of the heathen world, and portrays, in contrast therewith, the moral atmosphere emanating from Jewish religious writings. The author of this book lived probably about the time of the Roman emperor Caligula (37–41). Among the Apologists in Alexandria mention must also be made of PHILO, one of the most eminent philosophical thinkers of Judaism, who flourished about 40. Philo sought to illustrate to the heathen world the beauty of the Jewish Scriptures by endeavoring to prove that both Judaism and the better Hellenic thought in the writings of Greek philosophers aimed at one and the same mark: that the Jewish prophets and the Greek speculative thinkers strove after one and the same truth, and that, therefore, the difference between Judaism and Greek philosophy was one merely of external appearance or expression.

Josephus.

The best apologetic work of this period, and indeed of any period, is that written in Rome by Flavius Josephus (born about 37), which he entitled "Against Apion, or Concerning the Ancient State of the Jewish Nation." APION, who was a contemporary of Philo, had, at the request of several Alexandrians, handed to the emperor Caligula a calumnious memorial full of the worst accusations and slanders against the Jews. He had simply compiled everything to be found in previous writings of this character, and added to it whatever he could devise in the way of malicious invention. This slanderous petition, no doubt, made its influence felt at the time Josephus was writing his history in Rome, and impelled him to publish his "Apology" (vindication), which consisted of two books. He controverts the allegation that the Jews have no history and are a new nation. The sting of the charge came from the circumstance that, according to the view then prevailing, the respectability and dignity of a nation were in direct proportion to its antiquity. He exposes the falsity of the calumnies circulated against Judaism, and illustrates the mental incapacity of his opponents to grasp historical truths. Through the whole work there breathes a spirit of warm admiration for Moses and his civil and religious legislation; it acknowledges appreciatively whatever is great and good among all ancient peoples. This "Apology" of Josephus furnished the model after which the Church fathers patterned all their apologetic treatises, the writing of which they were frequently called upon to undertake in defense of Christianity.

No further apologetics of this period have been preserved, although the venom that Apion injected into the minds of his contemporaries continued to work among Roman writers, who saw in the Jewish nation a stubborn enemy of Rome and an opponent of the national cult. But in the Talmud and Midrash many religious conversations have been preserved, in which prominent teachers like Johanan ben Zakkai, Joshua ben Hananiah, Akiba, and others defend Judaism and its doctrines. Dialogues, such as these, between cultured representatives of Judaism and heathenism, were, as a matter of course, quite free from fanaticism; they were, in fine, friendly contests of wit and wisdom without the least trace of animosity or bitterness.

Attacks by Christians and Mohammedans.

The second series of Jewish Apologists covered the period from the second to the fifteenth century, and was concerned in repelling the attacks of Christianity and, to a small extent, of Islam. Christianity, having received from Judaism its doctrines of pure morality and of love of one's neighbor, was constrained, in order to furnish grounds for its distinction, to proclaim that it had come into existence to displace, and to fulfil the mission of, Judaism. It endeavored to prove the correctness of this standpoint from the Bible itself, the very book upon which Judaism was founded. Wherefore Judaism had no further reason to exist! The Jews, however, were not yet ready to accept this decree of self-extinction, nor to permit Christendom to take possession of the religious and ethical ground held by the Jews. Here, then, was an occasion for some very sharp polemics between the offspring and the parent who declined to die. The fact that both sides appealed to the same source of authority—the Scriptures—served also to narrow and intensify the struggle. So long, however, as Christianity refrained from throwing the Brennus-sword of worldly power into the scales, the discussion partook of the same peaceful nature as those friendly passages of arms recorded in the Talmud and Midrashim, and displayed more of the nature of good-humored rallying than of serious debate. Jewish scholars, referring to Num. xxiii. 19, expressed their objections to Christianity in the single passage: "If a man say that he is God, he is deceiving thee; if he say that God is man, he will repent it. If he claim to ascend to heaven, he may say it, but he shall not do it" (Yer. Ta'anit i. 1).

But with the growth of political power in the Church, the attacks of the bishops upon Jews and

Silence of the Jews.

Judaism took on a harsher animus. The silence of the Jews for several centuries in the face of such attacks was a deplorable error, especially in view of the fact that the bitter effects of this anti-Jewish literature were felt in the keenest degree. This silence can be accounted for only by assuming that the Jews of those days were not afraid of any enduring consequences from these attacks, or from the influence of the Christian propaganda upon their own coreligionists. The fundamental principles of Christianity—Trinity, Incarnation, etc.—were deemed by them to stand in such direct contradiction to both the spirit and the letter of the Bible that it seemed like a work of supererogation to point out the contradiction. Aside from this, these attacks were written in Latin or in Greek, familiarity with either of which had been lost by the Jews. Whenever any vernacular discussions, founded upon such material, occurred, the crass ignorance of the Christian clergy of the day rendered the victory of the Jews an easy one. And it was because the Jews felt so sure of their own ground that they did not think it necessary to defend themselves.

So far as ascertained, the first to venture a defense in any degree was Saadia ben Joseph (died 942), who was gaon in Sura and a very prolific writer. In his translation of the Bible into Arabic, and in his commentaries upon it, as well as in his philosophical work, "Emunot we-De'ot" (written in Arabic and translated into Hebrew by Judah ibn Tibbon), he attacked the claims of Christianity and Islam; the former receiving from his pen greater attention than the latter, because Islam was not so insistent in its missionary zeal as Christianity. Saadia maintained that Judaism would always exist, and that its religious system, which allowed man to reach perfection as nearly as possible, would not be displaced by any other. In any case, Christianity, which transformed mere abstractions into divine personalities, was not qualified to supersede it; nor was Islam, which lacked sufficient proof to displace the undisputed revelation from God on Sinai.

From the period of Saadia polemical passages are encountered in Midrashic works and ritual poems directed against both Christianity and Mohammedanism; but although such passages usually close with some kind of a defense of Judaism, they seem to labor under a species of reserve and timidity. But when at the time of the Crusades fanaticism broke loose and the might of the Church grew rapidly; when, furthermore, the Christian clergy had learned to make use of the services of baptized Jews in aiding schemes for the wholesale Christianization of their brethren, the leading spirits among the Jews felt constrained to lay aside all hesitation and reserve, so that with the twelfth century Jewish polemics appeared more frequently and more numerously. In northern France, R. Samuel b. Meïr (Rashbam) and Joseph Bekor Shor demonstrated the weakness of the foundations sought for Christianity in the Bible; and Joseph b. Isaac Ḳimḥi wrote the "Sefer ha-Berit," in which he applied himself to the discussion of Christian dogmas and their scientific refutation. Moses ibn Tibbon, in Montpellier (1240), and Meïr b. Simon wrote polemical works; and the latter in addition compiled the apologetic book "Milḥamot Miẓwah." In Spain, although prominent Jewish scholars had embraced Christianity and placed their services at the disposal of the Church for public disputations and polemical writings, there were also Jewish Apologists that published their replies, either in special books or in the shape of letters addressed to the apostates. Against Abner of Burgos (called, as a Christian, Alfonso of Valladolid), Shem-Ṭob ibn Shaprut wrote his pamphlet "Eben Boḥan" (The Touchstone). To Maestro Astruc Raimuch (who, as a Christian, took the name of Francisco Dios Carne) Solomon b. Reuben Bonfed addressed his epistle, full of sharp points, against Christianity. The philosopher Ḥasdai Crescas singled out Solomon ha-Levi (who, as a Christian, bore the names of Paul de Santa Maria and Paul of Burgos) and replied most vigorously to his attacks upon Jewish doctrine. Possibly the most important apologetic writings of all are those of Profiat Duran, of the fifteenth century, and of Simon b. Ẓemaḥ Duran. Around these arrayed themselves a number of prominent Apologists, who wrote independently or quoted chapters from the works of the Durans. In Italy Abraham Farrissol (born 1451) wrote an apologetic book, "Magen Abraham" (Shield of Abraham), in which he proved that the popes had permitted the Jews to take usury in order to enable them to pay the high imposts laid upon them. In Germany, in the beginning of the fifteenth century, Lipman of Mühlhausen wrote his apologetic treatise, "Niẓẓaḥon" (Victory), which name was given also to many other books of similar scope published in Germany.

French and Spanish Apologists.

Mohammedan Attacks.

Much less fanatical were the attacks encountered by Judaism from the side of Mohammedanism. The far more favorable political and social position of the Jews among the Mohammedans of Persia and Egypt and among the Moors in Spain—the latter of whom possessed but a scanty knowledge of the Bible and of Jewish literature—hardly gave such scope to aggressive polemics as would call out the Jewish defense. In addition to Saadia and to the Karaite writers, the following were the chief Jewish authors who assailed Islam in defense of Judaism: Sherira b. Ḥanina Gaon, Judah ha-Levi (in his "Kuzari"), Abraham ibn Ezra, Moses b. Maimon, Moses of Coucy, and the author of the "Zohar." The whole range of Jewish literature contains but a single production of any extent (originally a portion of a larger work) that applies itself to an attack upon Islam. Under the title "Ḳeshet u-Magen" (Bow and Shield) it was published in the eighteenth century at Leghorn as a supplement to Simon Duran's work, "Magen Abot" (The Shield of the Fathers). This supplement was translated into German by Steinschneider in 1880 in "Magazin für die Wissenschaft des Judenthums."

The invention of printing was the signal for the outpouring of a veritable flood of anti-Jewish literature. Johann Christian Wolf, in the second part of his "Bibliotheca Hebræa," published in 1721, enumerates the titles of all publications by Christians against Jews and Judaism; and these titles alone

The Blood-Accusation and Other Calumnies.

fill fifty quarto pages of his book. Kayserling in his "Biblioteca Española-Portugueza-Judaica," pp. 114 *et seq.*, gives a list of anti-Jewish writings in Spanish. To the earlier common calumnies—and especially to that so often made by Spanish apostates, that the Talmudical passages directed against the heathens were in reality intended against Christians—there was added after the twelfth century (occasionally at first, but afterward more generally) the accusation that the Jews used the blood of Christians for ritual purposes. This is the identical accusation which the Romans of the second century made against the Christians. At the same time the charge is occasionally encountered that the Jews pierce the consecrated host until blood flows from it. Sad to say, Catholic churchmen themselves spread these calumnies in order to furnish collateral proofs of the doctrine of transubstantiation enunciated at the fourth Lateran council in 1215. Jewish Apologists henceforth had to take notice of this accusation as well. An apologetic book in the spirit of Lipman Mühlhausen's "Nizzaḥon" was written by the Karaite Isaac of Troki (near Wilna, died 1593), entitled "Ḥizzuḳ Emunah." The blood-accusation was taken up by Isaac Abravanel in his commentary upon Ezekiel; by Samuel Usque—who had escaped from the fangs of the Inquisition—in his "Consolaçam as Tribulaçoẽs de Ysrael" (1553); by Judah Karmi in his "De Charitate" (1643); by Manasseh b. Israel in his "Vindiciæ Judæorum" (1656), translated into German by Marcus Herz, with a preface by Moses Mendelssohn; by Isaac Cantarini in his "Vindex Sanguinis" (1680); by Jacob Emden in his open letter prefaced to his edition of the "Seder 'Olam Rabba we-Zuṭṭa" (1757); by I. Tugendhold in his "Der Alte Wahn," etc. (1831); by I. B. Levinsohn in his "Efes Dammim" (1837); by L. Zunz in "Ein Wort zur Abwehr" (1840), and by many others.

Apologies of a more extended scope were written by the above-mentioned Samuel Usque, who treats historically of the departed glory of Israel and of the end of the period of Jewish power and wisdom; by David d'Ascoli (1559), and by David de Pomis, who wrote the well-known apology "De Medico Hebræo" (1588), dedicated to Duke Francis II. of Urbino. Other Apologists were Solomon Ẓebi Uffenhausen, author of "Ẓeri ha-Yehudim," published in 1615; the proselyte Abraham Peregrino (גר, proselyte), who wrote "Fortaleza," translated by Marco Luzzatto in 1775 into Hebrew; Emmanuel Aboab, author of "Nomologia," written in Spanish, 1629; Simon Luzzatto, with his treatise upon the condition of the Jews; Jacob Lombroso (1640); Balthasar Orobio de Castro, who wrote apologetic essays in Amsterdam; Cardoso, with his work, "Excellencias de los Hebreos" (1679); Saul Levi Morteira (died 1660); Isaac Aboab; Judah Briel (1702); David Nieto, who wrote "Matteh Dan" (1714); Isaac Pinto (born in Bordeaux, 1715); and Rodrigues Texeira (died 1780).

Modern Polemics.

With Moses Mendelssohn's letter to Lavater, Jewish apologetic writings assumed another character: the question became one of political rights for the Jews. And it is indeed true that spiteful attacks upon Jews and Judaism have not yet ceased. Even the cultured classes among the most enlightened nations are not yet able to divest themselves of the ancient prejudices and traditions. Atavistic sentiments often show themselves stronger than the dictates of reason. But the apologetic writings of to-day are almost exclusively of a political character, and will be rendered wholly unnecessary only when political and social equality the world over is an accomplished fact. See Anti-Semitism, Blood-Accusation, Desecration of Host, Disputations, Polemical Literature.

APÔPHIS: The Egyptian king under whom, according to some early writers, Joseph came to Egypt, and who, according to Syncellus, flourished in the sixteenth century B.C. ("Chronographia," c. 115, § 7). Josephus names Apôphis as the second, and Julius Africanus enumerates him as the sixth king of the fifteenth, or Hyksos, dynasty. The monuments explain the confusion. They exhibit two Hyksos kings, called Apôpy, with the royal names 'A-ḳnon and 'A-user-rē, apparently corresponding with the second and sixth Hyksos (compare "Mitteilungen der Vorderasiatischen Gesellschaft," iii. 17; for a different sequence see, for example, Petrie, "History of Egypt," i. 241). Syncellus seems to have meant the second Apôphis, under whom the Hyksos were expelled from Egypt. This one reigned at least thirty-three years according to the monuments, forty-nine according to Manetho, to about 1570 B.C. The identification with Joseph's Pharaoh seems, however, only a hypothesis influenced by the erroneous Hyksos theory of Josephus, so that no reliance can be placed on the dates given by Syncellus for Joseph's arrival and elevation to his office, as corresponding with the years four and seventeen of Apôphis.

APOPLEXY: A sudden loss or diminution of sensation and of the power of motion, caused by the rupture or plugging up of a blood-vessel in the cranial cavity and effusion of blood on or within the brain. Ordinarily it is referred to as a "stroke of paralysis." The chief symptoms of this condition are sudden loss of consciousness, of motion, and of sensation, the affected person lying as if dead.

Proportion Between Whites and Blacks.

According to Dr. John Beddoe, Apoplexy appears to have no racial preferences. In New Orleans negroes and whites are said to die of Apoplexy in the proportions of 103 and 91 respectively. England, Scotland, Prussia, and Italy give each almost exactly the same figures, varying between 10 and 11 per 10,000 of inhabitants. Switzerland and Holland yield 8.5 and 7.9 respectively, but Ireland gives only 5.9 per 10,000. The rate of mortality from Apoplexy is certainly lower in quiet, rural districts than amid the hurry and worry, or excesses, of towns.

Lombroso, on analyzing the vital statistics of Italian Jews, found that deaths due to Apoplexy are

Predisposition of Italian Jews.

twice as frequent among them as among the general population of that country. He attributes it to the emotional temperament of the Jew, to his reputed avarice, his constant struggle with adverse conditions of life, and the ceaseless persecution of the race. Lombroso further intimates that the frequent marriages of near kin among Jews, and the greater development and use of their brains, are also predisposing causes.

The writer has compiled some statistics of American Jews, and finds that, in New York at least, the Jew is no more liable to Apoplexy than is the non-Jew. Thus, from Dr. John S. Billings' report on "The Vital Statistics of the Jews in the United States" it is seen that among a Jewish population of 10,618 families, comprising 60,630 persons, there occurred 68 deaths from Apoplexy during the five years from 1885 to Dec. 15, 1889; which means that the death-rate from Apoplexy among the Jews was 1.12 per 1,000 population during five years, or an annual death-rate of .224 per 1,000. On consulting the "Annual Report of the Board of Health" of New York city for 1898 it is found that during that year 1,059 persons died of Apoplexy in the Borough of Manhattan. The estimated population of Manhattan in that year was about 1,900,000, which gives a death-rate from Apoplexy of .55 per 1,000 of the general population; and, according to the census of 1900, the mortality from this disease in the United States was .666 per 1,000. These figures show that among Jews the death-rate from Apoplexy is less than one-half that among the general population of Manhattan.

From the "Report on Vital Statistics in New York City" of the Eleventh Census (1890) in the United States it appears that the death-rate from Apoplexy in New York city during the six years ending May 31, 1890, was as shown in the following table:

DEATHS PER 100,000, OF PERSONS WHOSE MOTHERS WERE BORN IN

France	78.56	Bohemia	36.08
Ireland	78.11	Scandinavia	32.83
Scotland	71.38	Hungary (mostly Jews)	19.10
England and Wales	69.15	Italy	16.59
Germany	58.67	Russia and Poland (almost all Jews)	14.22
United States	49.15		
Canada	46.21		

For the whole city the death-rate from Apoplexy was 59.37 per 100,000. From the above figures it is evident that the Russian and Polish Jews are far less frequently attacked by Apoplexy than are the peoples of other nations.

Further statistics collected by the writer from the annual reports of two Jewish hospitals, in comparison with two non-Jewish hospitals in New York city, give the following table:

Three Infrequent Factors.

This gives about an equal rate for Jews and non-Jews, as might have been expected to be the case when the chief etiological factors in the production of Apoplexy are considered. Syphilis, prolonged muscular exertion, and the abuse of alcohol are found to be important antecedents in a large number of cases of Apoplexy. These three factors are infrequent among the Jews, who might, therefore, rather be expected to be less liable to the affection. But the busy, anxious life of the Jew, his constant and hard struggle against adverse conditions, have been operative in producing among Jews a number of apoplectics equal in relative proportion to that of non-Jews.

APOSTASY AND APOSTATES FROM JUDAISM: Terms derived from the Greek *ἀποστασία* ("defection, revolt") and *ἀποστάτης* ("rebel in a political sense") (I Macc. xi. 14, xiii. 16; Josephus, "Contra Ap." i. 19, § 4), applied in a religious sense to signify rebellion and rebels against God and the Law, desertion and deserters of the faith of Israel. The words are used in the Septuagint for מרד: Num. xiv. 9; Josh. xxii. 19, 22; for מעל: II Chron. xxviii. 19, xxxiii. 19; for סורר: Isa. xxx. 1; and for בליעל: I Kings, xxi. 13; Aquilas to Judges xix. 22; I Sam. xxv. 17. Accordingly it is stated in I Macc. ii. 15 that "the officers of the king compelled the people to apostatize," that is, to revolt against the God of Israel; and Jason, the faithless high priest, is "pursued by all and hated as a deserter of the law" (*τοῦ νόμου ἀποστάτης*; II Macc. v. 8). As the incarnation of rebellion against God and the Law, the serpent is called apostate (LXX., Job xxvi. 13; and Symmachus, Job xxiv. 13; compare II Thess. ii. 3; Revelation of John xiv. 6; Gen. R. xix., אפיקורוס).

Hebrew Expressions.

The rabbinical language uses the following expressions for apostate: (a) מומר, from המיר: Jer. ii. 11; and המיר דת (Suk. 56*b*; 'Ab. Zarah 26*b*; 'Er. 69*a*). (b) משומד, from שמד ("to persecute or force abandonment of the faith") (Yer. Suk. v. 55*d*; Gen. R. lxxxii.; Yer. 'Er. vi. 1 [23*b*]; Sifra, Wayiḳra, ii.; Targ. Onkelos to Ex. xii. 43). The Apostates during the Syrian persecution are called "Meshummedaya" in Megillat Ta'anit vi. (ed. Mantua; in later editions the word "Resha'im" is substituted

[Grätz, "Gesch. der Juden," 3d ed., iii. 606]). This is equivalent to "Hellenists"; according to Cassel, ἄνομοι (see "Revue des Etudes Juives," xli. 268). (c) כופר ("a denier"), in Sanh. 39*a*, of the Law, *ib.* 106*a*, of the God of Israel (B. M. 71*a*); of the fundamentals (B. B. 16*b*). (d) פושע ישראל ("a rebellious transgressor in Israel"). (e) פורש מדרכי צבור ("one who has separated from the ways of the Jewish community") (Seder 'Olam R. iii.; R. H. 17*a*; Tosef., Sanh. xiii. 5). "No sacrifice is accepted from the apostate" (Sifra, *l.c.*; Lev. R. ii.; Ḥul. 5*a*; Yer. Sheḳ. i. 1[46*b*]; "nor have they any respite from eternal doom in Gehenna" (R. H. 17*a*; see especially Sifre, Bemidbar 112 to Num. xv. 31). These expressions all probably date from the Maccabean time, when to such men as Jason and Menelaus the words of Ezek. xxxii. 23, 24, were applied: "they who caused terror in the land of the living, and they have borne their shame with them to go down to the pit."

The Apostasy of these two men (II Macc. v. 8, 15) being a desertion of both their national and religious cause, filled the people with horror and hatred, and their fate served as a warning for others. The outspoken hostility to the law of the God of Israel on the part of the Syrians involved less danger for the kernel of the Jewish people than the allurements offered in Alexandria by Greek philosophy on the one hand and Roman pomp and power on the other. Here the tendency was manifested to break away from ancient Jewish custom and to seek a wider view of life (Philo, "De Migratione Abrahami," xvi.), while the tyranny of a Roman prefect like Flaccus, who forced the people to transgress the Law, seems to have had no lasting effect (Philo, "De Somnis," ii., § 18). Comparing the proselytes with the Apostates, Philo says ("On Repentance," ii.): "Those who join Israel's faith become at once temperate and merciful, lovers of truth and superior to considerations of money and pleasure; but those who forsake the holy laws of God, the apostates, are intemperate, shameless, unjust, friends of falsehood and perjury, ready to sell their freedom for pleasures of the belly, bringing ruin upon body and soul." Philo's own nephew, Tiberius Julius Alexander, son of Alexander the Alabarch, became an apostate, and to this fact he owed his high rank as procurator, first of Judea, then of Alexandria; becoming afterward general and friend of Titus at the siege of Jerusalem (Schürer, "Gesch." i. 473-474).

Alexandrian Apostates.

Against the many Apostates in the time of Caligula the third book of the Maccabees loudly protests; for Grätz ("Gesch. der Juden," 2d ed., iii. 358, 631) has almost convincingly shown that it was written for that very purpose. While the faithful Jews who denied the royal command and refused to apostatize from their ancestral faith were rescued from peril and reinstated as citizens of Alexandria, the Apostates were punished and ignominiously put to death by their fellow-countrymen (III Macc. ii. 32, vi. 19-57, vii. 10-15); and the declaration was made that "those of the Jewish race who voluntarily apostatized from the holy God and from the law of God, transgressing the divine commandments for the belly's sake, would also never be well disposed toward the affairs of the king."

The "Pastor of Hermas" ("Similitude," viii. 6, § 4; ix. 19, § 1), which is based on a Jewish work, says that "repentance is not open to apostates and blasphemers of the Lord and those who betray the servants of the Lord." The same idea is expressed in Tosef., Sanh. xiii. 5: "The doors of Gehenna are forever closed behind heretics, apostates, and informers"; with which compare Epistle to Heb. iii. 12, and Apocalypse of Peter 34.

It is a remarkable fact in the history of Christianity that, according to Acts xxi. 21, Paul was accused before the council of James and the elders of having taught the Jews Apostasy from the law of Moses; for which reason the early Christians, the Ebionites, "repudiated the Apostle Paul, maintaining he was an apostate from the law" (Irenæus, "Against Heresies," i. xxvi.). It was probably due to the influence of Pauline Christianity that "many of the Grecians," as Josephus ("Contra Ap." ii., § 11) tells, "had joined the Jews, and while some continued in their observance of the laws, others, not having the courage to persevere, departed from them again." The destruction of the Temple, which put an end to the entire sacrificial worship, was the critical period of Judaism, which, while greatly increasing the numbers of Pauline Christianity, gave other Gnostic sects an opportunity of winning adherents. In the Maccabean period the blasphemer that stretched out his hands toward the Temple announcing its doom (II Macc. xiv. 33 *et seq.*; compare I Macc. vii. 34 *et seq.*) was sure to meet the divine wrath. Now many sectaries or Gnostics (*Minim*) had arisen "who stretched out their hands against the Temple" (Tosef., Sanh. xiii. 5; R. H. 17*a*; compare II Macc. xiv. 33). Moreover, when the last efforts at rebuilding Temple and state ended in disastrous failure and in the persecution of the law-observing Jews, many of the new Christian converts became informers against their brethren in order to insinuate themselves into the favor of the Romans. This naturally increased their mutual hostility, and widened the gulf between the Synagogue and the Church. The prayer that the power of wickedness as embodied in heathenism might be destroyed (which destruction was believed to be one of the signs of the coming of the Messiah) was at this time transformed into an execration of the Apostates and slanderers ("Birkat ha-Minim," Ber. 28*b*; Yer. Ber. iv. 3, p. 8*a*; Justin, "Dial. cum Tryphone," xxxviii.). As a typical apostate, who, from being a great expounder of the Law, had become an open transgressor, a teacher of false doctrines, and a seducer or betrayer of his coreligionists, the Talmud singles out Elisha ben Abuyah, known as Aḥer, "changed into another one." The many traditions about his life, which became an object of popular legend, agree in the one fact that his Gnosticism made him a determined antagonist of the Law at the very time when Roman persecution tested Jewish loyalty to the utmost; and consequently he is represented as having heard a divine voice ("bat kol") issue from heaven, saying: "'Return, ye backsliding children, and I will heal your backsli-

Paul Called an Apostate.

Christian Apostates from Judaism.

Aher the Apostate.

dings' (Jer. iii. 22)—all except Aḥer!" Still the relations between the Apostates and the faithful observers of the Law remained tolerably good, as may be inferred from R. Meïr's continual intercourse with Aḥer, who honored the apostate as a man of learning, even after his death. However, from the time when the Church rose to power and directed the zeal of her converts against their former brethren, these conditions changed. This may be learned from the decree of Constantine in 315, to the effect that "all that dare assail the apostates with stones, or in any other manner, shall be consigned to the flames." While the Synagogue was prohibited from admitting proselytes, all possible honors were conferred by the Roman empire upon Jews that joined the Church. The rabbis refer the verse, "My mother's children are angry with me" (Song of Songs, i. 6), to the Christians, complaining that "those that emanate from my own midst hurt me most" (Midr. R. and Zuṭṭa *ad loc.*; also Tobiah b. Eliezer quoted by Zunz, "S. P." p. 13, and "Tanna debe Eliyahu R." xxix.).

Joseph of Tiberias.

An apostate, Joseph by name, a former member of the Sanhedrin of Tiberias, raised to the dignity of a comes by Constantine the emperor, in reward for his Apostasy, is described by Epiphanius in his "Panarium," xxx. 4–11 (ed. Dindorf, pp. 93–105). He claimed, while an envoy of the Sanhedrin, to have been cast into the river by the Jews of Cilicia for having been caught reading New Testament books, and to have escaped drowning only by a miracle. He must have done much harm to the Jews of Palestine, since the emperor had, in the year 336, to issue, on the one hand, a decree prohibiting Christian converts from insulting the patriarchs, destroying the synagogues, and disturbing the worship of the Jews; and, on the other hand, a decree protecting the Apostates against the wrath of the Jews (Cassel, in Ersch and Gruber, "Allg. Encyklopädie," iv. 23 and 49, note 59; Grätz, "Gesch. der Juden," iv. 335, 485). The very fact that he built the first churches in Galilee at Tiberias, Sepphoris, Nazareth, and Capernaum—towns richly populated by Jews and soon afterward the centers of a Jewish revolt against Rome—justifies Grätz in assuming that the dignity of comes conferred upon Joseph covered a multitude of sins committed against his former coreligionists in those critical times. The rabbinical sources allude only to the fact that Christian Rome, in accordance with Deut. xiii. 6—"the son of thy mother shall entice thee"—said to the Jews, "Come to us and we will make you dukes, governors, and generals" (Pesiḳ. R. 15*a*, 21 [ed. Friedmann], pp. 71*b*, 106*b*]). A decree of the emperor Theodosius shows that up to 380 the patriarchs exercised the right of excommunicating those that had espoused the Christian religion; which right, disputed by the Christian Church, was recognized by the emperor as a matter of internal synagogue discipline (Graetz, "History of the Jews," ii. 612, iv. 385).

That many joined the Church only to escape the penalty of the Jewish law is evidenced by a decree of the emperor Arcadius demanding an investigation of each applicant for admission into the Church, as to his moral and social standing, and by the story of a typical Jewish impostor told by the Church historian Socrates (Jost, "Gesch. der Israeliten," iv. 225).

The great persecution by Cyril, in 415, of the Jews of Alexandria induced only one Jew to accept baptism as a means of safety: Adamantius, teacher of medicine; the rest left the city (Grätz, "Gesch. der Juden," iv. 392).

In Christian Spain.

In France.

The stronger the power of the Church became, the more systematic were her efforts at winning the Jews over to her creed, whether by promises, threats, or actual force. As a rule but few yielded to persuasion or to worldly considerations, but more numerous were those that embraced Christianity through the threats and violence of enraged mobs. Such was the case with the Jews in southern France and in the Spanish peninsula. Here a new term was coined for the Jews that allowed themselves to be baptized through fear—*Anûsim*. It is interesting to observe that the Council of Agde was compelled to take measures against the Jews "whose faithlessness often returneth to its vomit" (compare Prov. xxvi. 11, and the rabbinical expression חוזר לסורו: Ḳid. 17*b*; Gen. R. lxxiv.; Jost, "Gesch. der Israeliten," v. 64 *et seq.*). The same measures were taken by the Council of Toledo in the year 633. Every single case of Apostasy under the influence of the powerful Church provoked the indignation of the Jewish community, where some inconsiderate act of a Jewish fanatic often led to riots, which always ended disastrously for the Jews, either in baptism or expulsion. A number of such instances are recorded by Gregory of Tours (Jost, "Neuere Gesch. der Israeliten," v. 66 *et seq.*, 87 *et seq.*; Cassel, *l.c.* pp. 57–62; Grätz, "Gesch. der Juden," v. 60 *et seq.*; compare also the edicts against the baptized Jews, in Grätz, "Die Westgothische Gesetzgebung, 1858"). In the Byzantine empire, also, forced conversion of the Jews took place under Leo the Isaurian in 723; many Jews becoming outwardly Christians while secretly observing the Jewish rites (Grätz, "Gesch. der Juden," iii. 123, v. 188; Cassel, *l.c.* p. 52). To none of these is the term "apostate," in its strict sense, applicable. When, at the first persecution of the Jews in Germany under Henry II., in 1012, many had been baptized and afterward returned to the fold, R. Gershom of Mayence insisted on their being treated with brotherly kindliness and sympathy; and when his own son, who had become a convert to Christianity, died, he mourned him as his son, just as if he had not apostatized (Grätz, "Gesch. der Juden," v. 410). Again, after the first Crusade, when many Jews, yielding to the threats of the mob, had been baptized, but with the permission of the emperor, Henry IV., had returned to their ancestral faith despite the protests of Pope Clement III., Rashi in his responsa ("Pardes," p. 23) protested against their being shunned as Apostates by their brethren, and declared them to be full Jews (Grätz, "Gesch. der Juden," vi. 111–114; Berliner, in "Kaufmann-Gedenkbuch," pp. 271 *et seq.*). Nor is it correct to enumerate in the list of Apostates those Jews of Spain, France, and other countries, who, under the influence of the teaching of the pseudo-Messiah Serene (or Soria?), had dropped the many Talmudic statutes and later on returned to the fold, having in the meanwhile remained followers of the law of Moses. Naṭronai Gaon expressly declared them to have been Jews (Grätz, "Gesch. der Juden," v., note 14, p. 482).

Famous Apostates.

The name "apostate," however, assumed a new meaning and character—that of bitter reproach—when a large number of baptized Jews of prominence used their knowledge and power as means of maligning their former brethren and the faith in which they had themselves been raised. Many of the Inquisitors were descendants of converted Jews; for example, Don Francisco, archbishop of Çoria, Don Juan de Torquemada.

The first apostate that is known to have written against the Jewish creed was Moses Sephardi, known by the name of Petrus Alfonsi (physician to Alfonso VI.), baptized in 1106, and author of the well-known collection of fables, "Disciplina Clericalis." He wrote a work against Jewish and Mohammedan doctrines, entitled "Dialogi in Quibus Impiæ Judæorum et Saracenorum Opiniones Confutantur." This book, however, seems to have had little influence. The harm which Petrus Alfonsi did to his former coreligionists can not be compared with that done by some other Apostates. Donin of Rochelle, France, in revenge for his having been excommunicated by the French rabbis because of doubts he had expressed concerning the validity of the Talmudic tradition, embraced Christianity, assuming the name of Nicholas. He then went to Pope Gregory IX., bringing thirty-five charges against the Talmud, stating that it contained gross errors, blasphemous representations of God, and insulting expressions regarding Jesus and the Virgin Mary. Moreover, he was the first to allege—what afterward became a standing accusation—that the Talmud allows all kinds of dishonest dealings with the Christian—nay, declares the killing of one a meritorious act. This led to a general rigorous prosecution of the Talmud.

Maligners of Judaism.

A public dispute of the apostate with R. Jehiel of Paris, and other rabbis of France, was held in Latin in the presence of the queen-mother Blanche and many Church prelates; but, notwithstanding the favorable opinion created by R. Jehiel and the intercession of the archbishop of Sens, twenty-four cartloads of the Talmud were consigned to the flames in 1442 (see Disputations). Pablo Christiani or Fra Paolo, of Montpellier, was another apostate, who, having in a public dispute with Naḥmanides in Barcelona, before James I. of Aragon, in 1263, failed to win laurels, denounced the Talmud before Pope Clement IV. In consequence of this a Christian censorship of the Talmud was introduced for the purpose of striking out all the passages that seemed offensive to the Church, Pablo being chosen one of the censors.

Still greater evil was wrought when Abner of Burgos, known also by the Christian name Alfonso Burgensis, a Talmudic scholar, philosopher, and practising physician, adopted Christianity to become sacristan of a wealthy church of Valladolid, and then wrote—partly in Spanish and partly in Hebrew—works full of venom against Jews and Judaism. Especially successful was he in charging Jews with reciting among their daily prayers one directed against the Christians, the "Birkat ha-Minim"; and King Alfonso XI., after having convoked the representatives of Judaism to a public dispute, issued an edict in 1336 forbidding the Jews of Castile to recite that prayer. This calumny of the Jews bore its poisonous fruit for generations to come (see Abner of Burgos).

Minor Apostates.

There were, however, some Apostates who were inspired by the Church to follow in her footsteps and to attempt the conversion of their former coreligionists. To this class belonged John of Valladolid, author of two works against the Jewish creed. In 1375, in a public debate with Moses Cohen of Tordesillas, held at the church of Avila in the presence of the entire Jewish community and many Christians and Mohammedans, he endeavored to prove the truth of the Christian dogma from the Old Testament; but he was no match for his learned antagonist, nor did his successor in the debate, a pupil of Abner of Burgos, fare any better in his attacks on the Talmud. Still more harmless were the following rather frivolous satirists: Peter Ferrus, who ridiculed his former coreligionists, the worshipers at the synagogue of his native town, Alcala, but evoked a pointed reply which alone has caused his name to survive; and his compeers Diego de Valensia; Juan d'España, surnamed "el Viejo" (the Old); Juan Alfonso de Baena, the compiler of the "Cancionero," and Francisco de Baena, of the fifteenth century, a brother of the former (Kayserling, "Sephardim," pp. 74 *et seq.*). To the same category belongs Astruc Raimuch, physician of Traga, Spain, who from a pious Jew became a fervent Christian, assuming the name of Francesco Dios Carne (God-flesh). In a clever Hebrew epistle he tried to win a former friend over to his new faith, and not only met with a mild protest on the part of the latter, but also evoked a vigorous ironical reply from the sharp pen of Solomon b. Reuben Bonfed.

Solomon Levi of Burgos.

Of all the Apostates of the twelfth century none displayed such delight in hurting his former brethren as did Solomon Levi of Burgos, known as Paul de Santa Maria. A former rabbi and a pillar of orthodoxy, on intimate terms with the great Talmudists of the age, he joined the Church together with his aged mother, his brother, and his sons—only his wife refused to renounce her faith—studied Christian theology, and quickly rose to the high position of archbishop of Carthagena, and then to that of privy councilor of King Henry III. of Castile and tutor of the infant Juan II. He devoted his great literary talents and mighty intellect only to calumniate Jews and Judaism, and he used his influence only to exclude his former coreligionists from every political office and position. His open letters and satirical poems, addressed to the most prominent rabbis in Spain, evoked many a reply, even from his pupils (see Crescas and Efodi). Strange to relate, however, one of these, Joshua ben Joseph ibn Vives of Lorca (Allorqui), although he had composed an epistle filled with reproof for the apostate, seems to have come under his influence and to have deserted the faith he at one time had so warmly espoused. Under the name of Geronimo de Santa Fe, he was body-physician and councilor of Pope Benedict XIII., and became the terror of the Jews of Spain. He induced the pope to summon the most learned rabbis of Aragon singled out by him to a religious disputation at Tortosa, for which he had prepared a treatise proving Jesus' Messianic character from Scripture and Talmud. The debate lasted over twenty-one months, from February, 1413, to November, 1414. A little later Geronimo published a treatise accusing the Talmud of teaching blasphemy, of counseling the Jews to break their oath by the Kol Nidre declaration, and of every kind of hostility toward the Christians, every reference to the heathen being by him interpreted as being directed against the Christians. From the initials of his name, Maestro Geronimo De Fe, he was called "MeGaDeF." (Heb. the Blasphemer). To the same class belong Levi ben Shem-Ṭob, called, as a Christian, Pedro de la Caballeria, who advised King Manuel of Portugal, in 1497, to take Jewish children by force and have them baptized; Astruc Sibili (of Seville), who testified to the slanderous charge of murder brought against the Jews of Majorca in 1435; and Henrique Nunes (de Firma Fe), who served as spy against the unfortunate Maranos, and was about to help Charles V. to introduce the Inquisition into Portugal when he was assassinated by some Maranos, and then canonized by the Church as a martyr. Sixtus of Sienna and Philip (Joseph) Moro incensed their Jewish kinsmen by traveling about in the Papal State preaching, at the bidding of Paul IV., sermons for their conversion; the former inciting the mob to burn every copy of the Talmud they could lay hands on after he himself had erected a pile for this purpose; the other forcing his way into the synagogue while the people were assembled for worship on the Day of Atonement, and placing the crucifix in the holy Ark, where the scrolls of the Law were kept, in order thus to provoke a riot.

The Burning of the Talmud.

This desire to calumniate the Jews and the Talmud seems to have become contagious among the Apostates of the time; for there are mentioned five others that instigated throughout Italy and in the city of Prague the burning of thousands of Talmudic and other rabbinic books. Two of these were grandsons of Elias Levita, Vittorio Eliano, and his brother Solomon Romano, afterward called John Baptista. The former, together with Joshua dei Cantori (ben Ḥazan), testified in Cremona against the Talmud, corroborating the testimony of Sixtus of Sienna; in consequence of which 10,000 to 12,000 Hebrew books were consigned to the flames in 1559. The latter, together with Joseph Moro, went before Pope Julius III. as a defamer of the Talmud, and these, with Ananel di Foligno, caused thousands upon thousands of copies of Hebrew books to be burned. A similar accusation, made by Asher of Udine in the same year, resulted in the confiscation of every Hebrew book in the city of Prague. Alexander, a baptized Jew, drew up for the tyrannical Pope Pius V. the points of accusation against the Jews, their faith, and their liturgy, upon which their expulsion was decreed in 1596.

In Germany the first that became an accuser of his former coreligionists was Pesach, who, as a Christian, assumed the name of Peter in 1399. He charged the Jews with uttering blasphemous words against Jesus in the prayer 'Alenu, the letters of וריק ("and vanity"), he said, being identical in numerical value with the name ישו ("Jesus"). The Jews of Prague were cast into prison, and many were killed because of the accusation.

In the calamity that befell the Jews of Trent and Ratisbon three Apostates took a leading part: Wolfkan, who brought against the Jews the charge of slaying children for the ritual use of their blood; Hans Vayol, who had the effrontery to accuse the aged rabbi of Ratisbon of this crime, and Peter Schwartz, who published slanderous accusations against his former coreligionists, and had the Jews of Ratisbon brought to the church to listen to his insulting harangues. As regards another apostate, Victor von Karben, a man of little Talmudic knowledge, he was merely a willing tool in the hand of the fanatical Dominicans of Cologne in their attacks upon the Talmud and the Jews, as is seen by the material he furnished for Ortuin de Graes's book, "De Vita et Moribus Judæorum," Cologne, 1504.

Joseph Pfefferkorn.

The climax, however, was reached by Joseph Pfefferkorn, of Bohemia. A butcher by trade, a man of little learning and of immoral conduct, convicted of burglary and condemned to imprisonment, but released upon payment of a fine, he was admitted to baptism about 1505, and, under the name of "John" Pfefferkorn, lent his name to a large number of anti-Jewish writings published by the Dominicans of Cologne. His first book, "Judenspiegel, oder Speculum Hortationis," written in 1507, contained charges, in somewhat milder form, against the Jews and the Talmud, though he rebuked them for their usury, and urged them to join Christianity, and at the same time admonished the people and princes to check the usury and burn the Talmudic books of the Jews. But this was soon followed by books each more violent than the other. These were: "Die Judenbeichte," 1508; "Das Osterbuch," 1509; "Der Judenfeind," 1509. He insisted that all Jews should be either expelled from Germany or employed as street-cleaners and chimney-sweeps; that every copy of the Talmud and rabbinical books should be taken away from the Jews, and that every Jewish house be ransacked for this purpose. But though Reuchlin was called upon to participate in this warfare against the Talmud, he exposed the Dominicans and the character of Pfefferkorn, their tool. Entire Christendom was drawn into the great battle between the Talmud defamers and the Talmud defenders, the friends of enlightenment siding with the Jews.

Nor were Von Karben and Pfefferkorn the only ones of their kind. The monks were only too willing to use others as their tools. One of these was Pfaff Rapp—by some said also to have been called Pfefferkorn—in Halle, for whom even John Pfefferkorn felt disgust. He was burned at the stake, having committed sacrilegious theft.

Luther's Source.

Antonius Margaritha, son of the rabbi of Ratisbon, published a German work: "Der Ganz Jüdische Glaub," Augsburg, 1530, wherein he repeated the charge that blasphemy against Jesus existed in the liturgy of the Jews, especially in the "'Alenu." Luther acknowledges having derived from this source the arguments in his polemical work against the Jews.

In 1614 Samuel Frederic Brenz of Osterberg, Swabia, who had been baptized in 1610 at Feuchtwang, Bavaria, published a book full of venom against the Jews under the title "Jüdischer Abgestreifter Schlangenbalg," an "exposition of the blasphemies the Jewish serpents and vipers utter against the guileless Jesus Christ"—a work in seven chapters, wherein the prayer "'Alenu" was made an especial object of attack. This attack was refuted by Solomon Ẓebi Uffenhausen in a work entitled "Der Jüdische Theriak," Hanover, 1615, and translated into Latin, together with Brenz's book and comments defending the Jews, by Johann Wülfer, Nuremberg, 1681.

Other Eminent Apostates.

As a rule the Apostates delighted in tormenting their former brethren, and this seems to have been the chief recommendation for their employment as censors of the Talmudic works. Wolf in his "Bibliotheca Hebræa" (ii. 1003-1013) has a list of 80 names of converted Jews that wrote against Judaism before 1720. It would be unfair, however, to bring all these under the category of such Apostates as were imbued with a spirit hostile to their ancestral faith. A number of them perhaps felt called upon to denounce Judaism and the Talmud in view of the lucrative positions as teachers and missionaries offered them, and not because of their zeal for their new faith. From the Jewish writings they could deduce arguments in favor of the Christian faith. Among these was Christian Gerson, baptized in 1600, at Halberstadt. He was prominent as a defamer of the Talmud, and was criticized for his unfairness by the great French Bible critic Richard Simon. He wrote a German work, frequently published and translated into other languages, "Jüdischer Talmud," published in 1607; and "Der Talmudische Judenschatz," published in 1610—being a translation of chapter xi. of Sanhedrin—as a specimen of Jewish superstition.

Paulus Ricio, who was professor of Hebrew in Pavia, and physician of the emperor Maximilian, prepared a translation of part of Joseph Gikatilla's cabalistic work "Sha'are Orah" in 1516, and thus awakened Reuchlin's interest in the Cabala. He commenced a translation of the Talmud in order to prove from it the Messianic character of Jesus. Moses Gershon Cohen of Mitau assumed the name of Carl Anton, professor of Hebrew in Helmstadt, and wrote on Shabbethai Ẓebi in 1753. He took a prominent part in the Jonathan Eibenschütz controversy, and published a number of books in the service of the Church. Aaron Margalita was another apostate who attacked the Talmud. By his charges against the Haggadah he caused Frederick of Prussia to put a ban upon an edition of the Midrash in 1705.

Christian Affiliation.

Many Jews, disappointed in the hopes raised by Asher Lämlein's Messianic predictions for the year 1502, took refuge in the haven of Christianity.

A number of Jews were, owing to their high social standing, so closely affiliated with the Christian world that, in critical times, they lacked sufficient self-abnegation to wear the badge of suffering along with their humbler brethren. Among these—and at the same time one of the victims of the great Spanish persecution of 1391—was, singularly enough, the ancestor of the Abravanel family, Samuel Abravanel, who, as a Christian, adopted the name of Juan de Sevilla. In the year of the expulsion, 1492, it was Abraham Benveniste Senior, chief rabbi and tax-collector of Seville, who with his son and son-in-law—also rabbis—went over to the Church, assuming the name of Coronel. King Ferdinand, Queen Isabella, and Cardinal Torquemada are said to have stood sponsors at their baptism.

Anti-Talmudical Mysticism.

The tide of the anti-Talmudical mysticism in Poland and the East, in the seventeenth and eighteenth centuries, which formed the undercurrent of the Shabbethai Ẓebi and Frankist movements, ended in a state of wild confusion and despair, and the consequence was the conversion of hundreds to Christianity. Chief among these Apostates were Wolf Levi of Lublin, a nephew of Judah Ḥasid, who assumed the name of Francis Lothair Philippi and became surgeon; and the son of Nehemiah Ḥayyun, the Shabbethaian, who became an opponent of his former brethren, and denounced, before the Inquisition at Rome, Talmudic and rabbinical works as inimical to the Church. Jacob ben Löb Frank of Galicia, the leader of the Podolian Shabbethaians, and the Frankists who took their name from him, became likewise public accusers of the Talmud in the very center of Talmudic study. After a disputation with the chief rabbis of Poland, they accepted baptism in Lemberg, 1759. A few weeks later Frank himself followed them, and assumed the name of Joseph. For those that apostatized in the eighteenth and nineteenth centuries, see Conversion to Christianity.

Apostates to Islam.

Islam, from the very outset, has emphasized the absolute monotheistic character of the faith of Abraham, in sharp distinction from the Trinitarian dogma and the divinity of Jesus (sura iv. 169; v. 76-77, 116; ix. 30; xix. 36, 91-95; ii. 110; vi. 101; lxxii. 3; cxii. 2. "He is God alone; He begets not; is not begotten. Nor is there like unto Him any one!"). Quite naturally, therefore, the Jews took a somewhat different attitude toward Islam than toward Christianity. They rejected Mohammed's claim to prophecy, but agreed with him in the fundamentals of his faith. It is doubtful how far those Jews of Medina who were numbered among the "Anṣar" (Helpers) really apostatized to the new faith. The most important of those who went over to Mohammed's side was undoubtedly 'Abd Allah ibn Salam, the most learned of all the Jews. With him were associated Ka'b al-Aḥbar and Wahb. When the Jews who still desired to remain true to their faith retired to Khaibar, Yamin ibn 'Umair and Abu Sa'd ibn Wahb remained at Medina and became Mohammedans. Later on Tha'labah ibn Saya, 'Usaid ibn Saya, and Asad ibn 'Ubaid yielded, fearing attack on the part of the prophet's men. A large number followed the example which had thus been set, and, when Khaibar was definitely taken, went over to the new faith. Among them was a woman, Raiḥanah, whom Mohammed at one time desired to marry. Most of these apostasies were due to force, very few to conviction (see Hirschfeld, "Revue des Etudes Juives," x. 10 *et seq.*). Arabic tradition knows also of an apostate Jew in Palmyra, Abu Ya'ḳub, who provided fictitious genealogies, and connected the Arabs with Biblical personages (Goldziher, "Muhammedanische Studien," i. 178). In the ninth century mention is made of Sind ibn 'Ali al-Yahudi, court astrologer of the calif Al-Ma'mun. In the same century lived Ali ibn Rabban al-Tabari, author of a work on medicine; as his name implies, the son of a rabbi, which fact, however, did not prevent him from joining the dominant church. Another Jew, however, Isma'il ibn Fadad (Spain?, eleventh century), was more steadfast. Ibn Ḥazm, author of the "Kitab al-Milal wal-Niḥal," had, indeed, persuaded him of the truth of Islam, but he refused to apostatize since "apostasy was a disgraceful thing" ("Z. D. M. G." xlii. 617).

Enlightened Apostates to Islam.

In the twelfth century many enlightened Jews joined Islam, partly owing, as Grätz thinks ("Gesch. der Juden," vi. 303; English ed., iii. 441), to the degeneracy that had taken hold of Eastern Judaism, manifesting itself in the most superstitious practises, and partly moved by the wonderful success of the Arabs in becoming a world-power. Among these Apostates that occupied a prominent position was Nathaniel Abu al-Barakat Hibat Allah ibn 'Ali of Bagdad, physician, philosopher, and philologist. Among his many admirers was Isaac, the son of Abraham ibn Ezra, who dedicated to him, in 1143, a poem expressing the wish that he might live to see the Messianic redemption in the risen Jerusalem. Both Isaac IBN EZRA and HIBAT ALLAH, his wealthy benefactor, became Moslems twenty years later.

Another apostate of this time was Abu Naṣr Samuel ibn Judah ibn ABBAS (Samuel of Morocco), the rabbi and liturgical poet of Fez, author of the "Ifḥam al-Yahud." Samuel makes the curious statement ("Monatsschrift," xlii. 260) that most of the Karaites had gone over to Islam, because their system is free from all the absurdities of the Rabbinites, and their theology not so different from that of the Mohammedans. The statement is, however, ungrounded. Some of the Jewish sects, however, that arose in the Mohammedan East went perilously near to the point where all distinction between them and Islam would be wiped out. Shahrastani, at least, speaks of one such sect, the 'Isawiyyah, that acknowledged the prophecy of Mohammed, but held that it referred only to the Arabs; and this is corroborated by other authorities (Shahrastani, translated by Haarbrücker, i. 254, ii. 421; "Monatsschrift," 1885, p. 139; "Z. D. M. G." xlii. 619).

Outward Conversions to Islam.

The year 1142 brought a great crisis to the Jews in southwestern Europe. The rise of the ALMOHADES (Almuwaḥḥidin = Unitarians) in northern Africa and the great wave of religious reform, mixed with religious fanaticism, which swept over Fez and into southern Spain, left them in most cases no choice but the adoption of Islam or death. Many submitted to outward conversion; and in a touching communication to his unfortunate brethren, sent in 1160 by Maimun ben Joseph, the father of Maimonides, he exhorts his brethren to remain firm in their faith, and advises those that have yielded to encourage one another as far as possible in the observance of the Jewish rites. The letter is directed especially to the Jews in Fez (Simmons, "Jew. Quart. Rev." ii. 62 *et seq.*). Then the controversy arose whether such as had publicly professed belief in Mohammed were any longer Jews or not. One rabbi denied it, insisting that since death was preferable to Apostasy, the prayer and religious observance of the forced convert had no merit whatsoever. This view is sharply criticized in a treatise ascribed to Moses Maimonides, the genuineness of which, though maintained by Geiger, Munk, and Grätz, has been convincingly refuted by M. Friedländer ("Guide of the Perplexed," i., xvii., xxxiii., *et seq.*), in which Islam is declared to be simply a belief in Mohammed, and that Islam is not idolatry, to avoid which only the Law demands the sacrifice of life.

Abraham ibn Sahl, a Spanish poet of the thirteenth century, was, however, distrusted by his new coreligionists, who did not believe that his conversion was sincere.

Among the Apostates that followed in the footsteps of Samuel ibn Abbas, denouncing their ancestral religion while pleading for the Islamic faith, are mentioned: 'Abd-al-Ḥaḳḳ al-Islami, in Mauritania, in the fourteenth century, who published a work proving the validity of Mohammed's prophecy from passages of the Bible which he quotes in the Hebrew language (Steinschneider, "Polem. Lit." p. 125); Abu Zakkariyah Yaḥya ibn Ibrahim b. Omar al-Rakili, who wrote, about 1405, "Tayit al-Millah," a work against the Jews, wherein passages from the Pentateuch, the Prophets, the Psalms, and the Koran are quoted (*ib.* pp. 34, 83).

The frenzy of the Shabbethaian movement ended in many Jews assuming the turban, the symbol of Islamism. To these belonged as leaders: Shabbethai Ẓebi; Nehemiah Cohen; Guidon, the sultan's physician; Daniel Israel Bonafoux, and finally Berakyah, son of Jacob Ẓebi Querido, regarded as successor of Shabbethai Ẓebi, who with his hundreds of followers founded a Jewish-Turkish sect still existing under the name of DONMEH.

The bloody persecution of the Jews during the Damascus affair in 1840 caused Moses Abulafia to yield and assume the turban in order to escape further torture.

In general it may be said that the Apostates to Islam exhibited no great animosity toward their former brethren. Those that went over to the side of Ishmael never forgot that he and Isaac were both sons of Abraham; and the reason for this is probably to be found in the tolerance which Mohammedans almost universally showed to the Jews. K.—G.

APOSTLE AND APOSTLESHIP: Apostle (Greek *ἀπόστολος*, from *ἀποστέλλειν*, "to send"), a person delegated for a certain purpose; the same as *sheliaḥ* or *sheluaḥ* in Hebrew, one invested with representative power. "Apostoloi" was the official name given to the men sent by the rulers of Jerusalem to collect the half-shekel tax for the Temple, the tax itself being called "apostolé." See Theod. Reinach, "Textes Grecs et Romains, etc.," 1895, p. 208, and also Grätz, "Gesch. der Juden," iv. 476, note 21, where Eusebius is quoted as saying: "It is even yet a custom among the Jews to call those who carry about circular letters from their rulers by the name of apostles"; Epiphanius, "Hæreses," i. 128: "The so-called apostoloi are next in rank to the patriarchs, with whom they sit in the Sanhedrin, deciding questions of the Law with them." The emperor Honorius, in his edict of 399, mentions "the archisynagogues, the elders and those whom the Jews call apostoloi, who are sent forth by the patriarch at a certain season of the year to collect silver and gold from the various synagogues" ("Cod. Theodos." xvi. 8, 14, 29. Compare Mommsen, "Corpus Inscr. Lat." ix. 648. See Apostolé).

Grätz, looking for parallels in Talmudical literature, refers to Tosef., Sanh. ii. 6; Bab. 11*b*, wherein it is stated that the regulation of the calendar or the intercalation of the month, the exclusive privilege of the patriarch, was delegated by him only to representative men such as R. Akiba and R. Meïr, to act for him in various Jewish districts. (Compare also R. H. 25*a* and elsewhere.) Such delegates in ancient times were also appointed by the communal authority, *sheluḥe bet din* (delegates of the court of justice), to superintend the produce of the seventh year of release, so that no owner of fruit, fig, and olive trees, or of vineyards, should keep more than was needful for his immediate use—for three meals; the rest was to be brought to the city storehouse for common distribution every Friday (Tosef., Sheb. viii.). The name "delegate of the community" ("sheliaḥ ẓibbur"), given to him who offers the prayers on behalf of the congregation (Ber. v. 5), rests on the principle of representation as it is expressed in the Mekilta on Exodus, xii. 6: "The whole assembly of Israel shall slaughter it." How can a whole congregation do the slaughtering? "Through the delegate who represents it." Accordingly, the elders of the Sanhedrin of Jerusalem addressed the high priest "*sheluḥenu usheluaḥ bet din*" (our delegate and the delegate of the tribunal) (Yoma 18*b*). (The "angels of the churches," Rev. ii. 1, 12, 18; iii. 1, 7, 14, are probably also the "delegates of the churches," not angels, as is the general opinion.) Other delegates—"sheluḥim"—are mentioned in the Talmud: "Those sent forth to accomplish philanthropic tasks ["sheluḥe miẓwah"] need fear no disaster on the road" (Pes. 8*b*). "Those delegated to collect charity ["gabbae ẓedakah"] were always appointed in pairs, and not allowed to separate in order to avoid suspicion" (B. B. 8*b*). As a rule two prominent men are spoken of as being engaged together in such benevolences as ransoming captives, and similar acts of charity (Abot R. Nathan [A], viii.; Lev. R. v. Compare the "Ḥaburot" of Jerusalem, Tosef., Megillah, iv. 15). Ḥama bar Adda was called "sheliaḥ Zion" (delegate of Zion), as being regularly sent by the authorities of Babylonia to Palestine charged with official matters (Beẓah 25*b*; Rashi and 'Aruk).

The apostles, known as such from the New Testament, are declared to have derived name and authority from Jesus, who sent them forth as his witnesses (see Luke, vi. 13; Herzog and Hastings, *s.v.* "Apostles"). But they were also originally delegated by the holy spirit and by the laying on of hands (Acts xiii. 3) to do charity work for the community (see II Cor. viii. 23). "At the feet of the apostles" were laid the contributions of the early Christians to their common treasury, exactly as was done in the year of release, in every city (Tos. Shebiit, viii. 1) and in every Essene community (Josephus, "B. J." ii. 8, § 3). "Two and two" the apostles were enjoined to travel (Mark vi. 7; Luke x. 2), exactly as was the rule among the charity-workers (B. B. 8*b*), and exactly as the Essene delegates are described as traveling, carrying neither money nor change of shoes with them (Josephus, "B. J." ii. 3, § 4; comp. Matt. x. 9, 10; Luke ix. 3, x. 4, xxii. 35; *bemaḳel we-tarmil*, Yeb. 122*a*). Thus Paul always traveled in the company of either Barnabas or Silas (Acts xi. 30; xii. 25; xv. 25, 30), and was entrusted with the charitable gifts collected for the brethren in Jerusalem (see also I Cor. xvi. 1; II Cor. viii. 4, ix. 5; Rom. xv. 25; Gal. ii. 10); while Barnabas traveled also with Mark (Acts xv. 39, 40). Paul even mentions as "noted apostles who joined the Church of Christ before him his kinsmen and fellow-prisoners, Andronicus and Junia" (Rom. xvi. 7), persons otherwise unknown to us, but who in all likelihood had received no other mission or Apostleship than that of working in the field of philanthropy among the Jewish community of Rome.

The meaning of the term "Apostle," still used in its old sense (Phil. ii. 25) of "Epaphroditus, your apostle [delegate] who ministers to my wants," was, however, already changed in the Christian Church during Paul's time. It became the specific term for the one sent forth "to preach the kingdom of God" either to the Jews, or, as Paul and his disciples, to the heathen world (Mark iii. 14, vi. 7; Luke vi. 13; Rom. xi. 13). "The gospel of the circumcision gave Peter the chief-apostleship of the Jews, the gospel of the uncircumcision gave Paul the apostleship of the Gentiles," according to Gal. ii. 7, 8; and so Paul calls himself an Apostle not of men but of Jesus Christ (Gal. i. 1). So the term "apostles of Christ" became a standing designation (I Thess. ii. 6), and it was confined to those who "saw Christ" (I Cor. ix. 1).

Finally, the number twelve, corresponding with the twelve tribes of Israel, was fixed in the Gospel records (Matt. x. 2; Mark iii. 14; Luke ix. 1; Acts i. 25) in opposition to the apostles of the heathen, who rose in number from one, in the case of Paul, to seventy (Luke x. 1). Even the act of preaching the good tidings concerning the coming Messiah on the part of the wandering delegates of the community (Luke iv. 18; because of which Jesus himself is once called the Apostle [Heb. iii. 1]) was not without precedent in Jewish life, as may be learned from the prayer for good tidings recited every new moon ("Seder Rab Amram," 33, Warsaw, 1865; compare R. H. 25*a* and Targ. Yer. to Gen. xlix. 21).

APOSTLES' TEACHING. See Didache.

APOSTOL, DANIIL PAVLOVICH: Hetman of the Cossacks on both sides of the Dnieper; born in South Russia in 1658; died Dec. 15, 1734. When Catherine I. expelled the Jews from the Ukraine (Little Russia) and from other parts of the Russian empire, May 7, 1727, Apostol was the first one to apply to the senate to modify the harsh law. The Cossacks, who eighty years before had massacred in the most cruel manner many hundred thousands of Jews in the Ukraine, Volhynia, Podolia, Poland, and Lithuania, and who under the leadership of Chmielnitzky had used their best endeavors to keep the Jews out of their country, had found out by this time that they could not get along very well without Jewish merchants, who were indispensable for the mediation of commerce between the Ukraine and the Polish and Lithuanian provinces. In response to Apostol's application, which was accompanied by his sworn statement, Jews were permitted by the edict of Sept. 2, 1728, to attend the fairs of Little Russia, provided they carried on wholesale business only. Three years later, Sept. 21, 1731, they were granted the same privilege under the same conditions in the government of Smolensk; and six years later they were also permitted, "for the benefit of the inhabitants," to carry on trade at fairs in retail.

H. R.

APOSTOLÉ, APOSTOLI: These two words, while similar in appearance, differ in signification. "Apostolé" was a term given to certain moneys or taxes for Palestine; "Apostoli," the designation of the men or apostles sent forth to collect it. The first record of them is in a joint edict of the emperors Arcadius and Honorius in the year 399 ("Codex Theodosianus," xvi. 8, 14) ordering the discontinuance of the custom of the patriarch of the Jews in Palestine to send out learned men, called Apostoli, to collect and hand to the patriarch money levied by the various synagogues for Palestine; that the sums already received be confiscated to the imperial treasury, and that the collectors be brought to trial and punished as transgressors of the Roman law. Five years later Honorius revoked the edict ("Cod. Theod." xvi. 8, 17). At about the same time Jerome (Comm. on Gal. i. 1) mentions the Apostoli (called in Hebrew *shaliaḥ*), showing that in his day they were still sent out by the patriarch; and in the first half of the fourth century Eusebius (Commentary on Isa. xviii. 1) writes of them as vested with authority by the patriarch.

In the letter—the genuineness of which is not unimpeached—written by Emperor Julian to the Jews in 362–63, he orders the patriarch Julos to discontinue the so-called *ἀποστολή*. The matter is most fully treated by the church father Epiphanius ("Adversus Hæreses," i. xxx. 4–11). He describes an apostolos, Joseph of Tiberias, of the first half of the fourth century, with whom he had associated and who later embraced Christianity. According to Epiphanius, the Apostoli were Jews of the highest rank, that took part in the councils of the patriarch which convened to decide questions of religious law. The aforesaid Joseph, provided with letters from the patriarch, went to Cilicia, collected the taxes of the Jews in every city, and removed a number of teachers and precentors from their positions. Thus the direction of affairs in the Jewish communities apparently fell under the authority of the Apostoli.

Apostoli were Jews of Highest Rank.

From Talmudic accounts (Yer. Hor. iii. 48*a*; Pes. iv. 31*b*; Giṭ. i. 43*d*; Meg. iii. 74*a*) it appears that the Apostolé was used to support teachers and disciples in Palestine. Another evidence that it was so used is that a similar system, doubtless tracing its origin to Palestinian examples, obtained in the Babylonian schools during the gaonic period ("Seder 'Olam Zuṭṭa," ed. Neubauer, in "Medieval Jewish Chron." ii. 87). The same point is made clear by an edict of the emperors Theodosius II. and Valentinian, of the year 429 ("Cod. Theod." xvi. 8, 29). It ordered that the annual contributions, which, since the extinction of the patriarchate, had been delivered to the heads of the Palestinian academies, should in future be collected for the imperial treasury, each congregation to be taxed to the amount formerly paid to the patriarch as *coronarium aurum*. The moneys paid by western provinces to the patriarchs were also to be handed over to the emperor.

Relation to the Temple Tax.

The exact date of the Apostolé is not known; but the account in the Talmud of the money-collections by teachers in the first century gives rise to the conjecture that the Apostolé was instituted upon the establishment of the school at Jabneh, in the year 70, though its organization may not at once have been fully developed. It probably grew out of the former Temple tax, with which it possesses several features in common. The Temple tax, however, was brought from the congregations to Jerusalem by messengers of high rank; while the Apostolé, in consequence of conditions due to the fall of the Temple, was collected by teachers sent to the various countries. See Apostle and Apostleship.

These teachers may at the same time have conveyed to the Jews outside of Palestine the arrangement of the calendar decided upon by the council of the patriarch. As the insertion of an extra month for the leap-year had to be determined upon, at the latest, in Adar ('Eduy. vii. 7), the messengers communicating the order of the calendar possibly found ready the contributions that were collected in Adar as the Temple tax of former days had been. The institution of the Apostoli continued after the introduction of the fixed calendar (359) until Emperor Theodosius II., in 429, forbade it in the Roman empire. The messengers probably journeyed to lands not belonging to Rome, even to South Arabia, if the account (525) of the Syrian bishop, Simon of Bet-Arsham, may be trusted (compare Halévy in "Rev. Et. Juives," xviii. 36, and "Rev. Sém.," 1900, p. i.).

APOSTOLIC CONSTITUTIONS. See Didascalia.

The Talmudic Account.

APOSTOMUS: Among five catastrophes said to have overtaken the Jews on the seventeenth of Tammuz, the Mishnah (Ta'anit iv. 6) includes "the burning of the Torah by Apostomus" (written also **Postemus** and **Apostemus**). Owing to this very vague mention, there is much difference of opinion as to the identity of Apostomus. At a first glance he may be associated with one of the following two incidents: (1) Josephus ("Ant." xx. 5, § 4; "B. J." ii. 12, § 2) relates that about the year 50 a Roman soldier seized a Torah-scroll and, with abusive and mocking language, burned it in public. This incident almost brought on a revolution; but the Roman procurator Cumanus appeased the Jewish populace by beheading the culprit. (2) The other incident of the burning of the Torah, which took place at the time of the Hadrianic persecutions, is recounted by the rabbis. Ḥanina b. Teradyon, one of the most distinguished men of the time, was wrapped in a Torah-scroll and burned (Sifre, Deut. 307; 'Ab. Zarah 18*a*; Sem. viii.). In connection with this a certain "philosopher," פילוסופום, is mentioned as the executioner of Ḥanina. It is quite possible that פילוסופום is a corruption of פוסטומום, and there are circumstances which lend plausibility to this assumption. According to the Jerusalem Talmud (Ta'anit iv. 68*c et seq.*), Apostomus burned the Torah at the narrow pass of Lydda (or, as another report has it, at Tariosa, which was probably not far from Lydda); and it is known that Ḥanina was one of "the martyrs of Lydda." Furthermore, a somewhat later authority (Addenda to Meg. Ta'anit, ed. Neubauer, in "Medieval Jew. Chron." ii. 24) gives the date of Ḥanina's death as the twenty-seventh of Tammuz, which is only a difference of a few days from the date assigned to the crime of Apostomus. The Mishnah referred to adds the following statement to its account of the burning of the Law: "And he put up an idol in the sanctuary." Here it is first necessary to determine that the reading והעמיד ("and he put up") is correct, and that it should not be והועמד ("and there was put up"), which the Jerusalem Talmud (Ta'anit iv. 68*d*) gives as a variant of the והעמיד in the accepted text, interpreting the fact mentioned in the Mishnah as referring to the idols put up in the sanctuary by Manasseh (II Kings xxi. 7). But the incorrectness of this interpretation is proved by the passage in the Mishnah on the five calamities of the Ninth of Ab, which are enumerated in strictly chronological order; so that it is quite impossible that any reference to the Temple desecration by Manasseh should be registered after the burning of the Torah by Apostomus. The Babylonian Talmud knows only the reading והעמיד ("and he put up") in the Mishnah, as the remark of the Gemara (Ta'anit 28*b*) proves, where the "abomination of desolation," of which Daniel (xii. 11) speaks, is connected with the image of the idol in the Temple. By this expression can only be meant the statue of Zeus Olympius set up by Antiochus Epiphanes (see Abomination of Desolation; and compare Grätz, "Dauer der Hellenesirung," in "Jahresbericht" of the Breslau Seminary, 1864, pp. 9, 10).

Another Name for Antiochus Epiphanes.

The reading והועמד, found in Rashi and in the Munich manuscript, has been simply drawn from the Jerusalem Talmud; and, indeed, in the Gemara the Munich manuscript has והעמיד. But the statement in the Babylonian Talmud, that the Mishnah source concerning Apostomus is a Gemara (tradition), shows that, according to the Babylonian authorities, the date of Apostomus can not be placed later than the Maccabean period. For Gemara is a technical term employed by the Talmud to designate tannaitic sayings connected with Biblical events or laws which are neither mentioned nor alluded to in the Scriptures, in contradistinction to those which can be derived from the Biblical text. Hence Apostomus must belong to a time in reference to which there existed also written sources that were known to the Talmudic authorities, the latest limit being the Maccabean period; and as it has been shown that the pre-Maccabean, the Biblical, epoch must be excluded, it follows that Apostomus was no other than Antiochus Epiphanes, of whom, moreover, it is known, also from other sources, that he set up an idol in the Temple. Apostomus, then, must be considered as a nickname for Antiochus Epiphanes. In fact, his name was transformed even by pagan authors into "Epimanes" = "the Insane" (see Antiochus Epiphanes, and, as told in I Macc. i. 56, Torah-scrolls were burned during the persecutions by Antiochus Epiphanes).

Meaning of the Name.

The meaning of the name "Apostomus" is not clear. Ewald (in his "History"), alluding to certain passages in the Bible and the Apocrypha (Dan. vii. 8, 20; viii. 23; and xi. 36; I Macc. i. 24), where reference is had to the boastful mouth of Antiochus Epiphanes, derives "Apostomus" from *αἰπύς* ("big") and *στόμα* ("mouth"). The appellation "big-mouth" is certainly very appropriate. Still this explanation can scarcely be accounted as correct; for *αἰπύς* is a rare word, used only in poetry. More probable perhaps is Jastrow's derivation (verbally conveyed) of "Apostomus" from *ἐπιστομίζω* ("to stop or stuff up the mouth") and *ἐπιστίμος* ("anything that stops up the mouth"), which may be connected with the Talmudic phrase עפרא לפומיה ("May his mouth be stuffed full with earth!"), applied in the Talmud to the name of a man who had spoken boldly against the Deity (B. B. 16*a*).

The following are other explanations of the word: Jastrow ("Dictionary of the Talmud") offers a suggestion that it may be a corruption of *ἀπόστολος* ("ambassador"), and makes it refer to the envoy spoken of in II Macc. vi. 1, 2 as having desecrated the Temple. Hochstädter sees in "Apostomus" a corrupted form of *ἀποστάτης* ("apostate") and identifies him with the high priest Alcimus. Schwarz and Derenbourg consider "Apostomus" the name of the Roman soldier referred to by Josephus. Brüll connects him with Cornelius Faustus, who under Pompey was the first to climb the wall of Jerusalem. Halberstamm is of opinion that "Apostomus" is the

Hebrew transcription for the Latin "Faustinus," and that the name, furthermore, is to be connected with Julius Severus, whose surname was Faustinus, and who perpetrated the crime described in the Mishnah when he was sent by Hadrian to put down the Bar Kokba rebellion, in which case the setting up of an idol in the sanctuary would have to be taken to refer to the dedication of a temple of Zeus upon the consecrated ground of the Temple.

[The name of the soldier that burned the Torah scroll, mentioned in Josephus, was Stephanos, which, written in Hebrew אסטפנוס, may have been corrupted into אפוסטמוס. K.]

APOTHECARIES, JEWISH. See Medicine, Physicians.

APOTHEKER, ABRAHAM ASHKENAZI: An apothecary ("aptheker," according to the customary Polish-Jewish syncopated pronunciation) and writer, whose name betokens both his nationality and his profession. He lived at Vladimir in Volhynia in the second half of the sixteenth century. He was the author of סם חיים ("The Elixir of Life"), a work, written in Hebrew and in Judæo-German, on the duties of Jews of both sexes and of all conditions, or as the author expresses it: "'Elixir of Life' is this book's name, to preserve every one against sin and shame." Through the efforts of his compatriot Moses ben Shabbethai, a native of Lokaczy (not far from Vladimir), it was printed in Prague (1590), under the direction of the son of Mordecai ben Gerson Cohen. Like most books printed in Prague for the edification of women, it has become rare. Jehiel Heilprin possessed a copy of it, as it is included in the list of works which he used in compiling his "'Erke ha-Kinnuyim," and also in his "Seder ha-Dorot," written about 1725. Another copy was owned by Rabbi David Oppenheim, a contemporary of Heilprin. This copy is at present in Oxford. A third copy, now in the British Museum, came from the Michael Library; a fourth is at Wilna, in Strashun's Library. It is not known whether a rare little work in Judæo-German, containing penitential prayers ("teḥinnot"), and printed at Prague at the same press as the "Elixir," is to be attributed to this author ("Cat. Bodl." col. 508).

APOTHEKER, DAVID: Judæo-German writer and printer at Philadelphia, Pa.; born in Ponievyezh, gov. Kovno, Russia, Aug. 28, 1855. In 1868 he went to Vilkomir, where he studied under the guidance of Moses Loeb Lilienblum; in 1877 he became involved in the nihilistic movement and was arrested at Kiev. Having escaped to Czernowitz, Austria, he wrote for Hebrew and Judæo-German papers, and published his first book, "Ha-Nebel" (The Harp), containing Hebrew and Judæo-German poems (1882). In 1888 he emigrated to the United States, joined the anarchistic movement in New York, and became a prolific contributor to the Judæo-German press. In 1895 he edited "Die Gegenwart," a short-lived Judæo-German weekly. In his writings the influence of K. J. Weber's "Demokritos" is often discernible.

Bibliography: Wiener, *Yiddish Literature*, p. 81.

APPEAL: "The carrying of a cause from a lower to a higher tribunal for a rehearing on the merits" is practically unknown to Jewish law. In the statute constituting courts of justice and setting forth the duty of the judges (Deut. xvi. 18–xvii. 13) is found a paragraph that has given rise to the belief that processes of Appeal were known in Biblical times (see Deut. xvii. 8–13). But this paragraph is simply an instruction to the judges, directing them, in case they have doubts as to the law in the case, to refer the matter to the High Court at Jerusalem, submitting to it a statement of the case, and taking its opinion. This course is also taken in cases where a judge dissents (Sanh. xi. 2, 88*b*). The opinion thus rendered by the High Court is binding upon the court that submitted the case, and judgment must be rendered in accordance with it. This is not strictly an Appeal, by either of the parties to the litigation, from the judgment of the court before which the case was heard in the first instance.

Indeed, the principle of the Biblical law is opposed to the idea of appealing from a judgment of a lawfully constituted court, because the judgment is of God; hence every final judgment pronounced in court is conclusive.

Courts were not subordinated to each other, as might be supposed from the use of the terms "higher and lower courts" or "great and lesser Sanhedrins." The rank of the court was not determined by its power to review the judgment of another court, but by the nature and character of the subject-matter falling within its jurisdiction.

The most important matters could be tried only by the Great Sanhedrin at Jerusalem, consisting of seventy-one judges; matters of less importance by the lesser Sanhedrin (provincial court) in the various towns of Palestine, consisting of twenty-three judges; and petty matters by local tribunals of three judges, or, in some cases, by a single judge.

According to the Talmudic civil law, the court of the domicil of the plaintiff had jurisdiction of the case, but the plaintiff was entitled to commence his action in the High Court at Jerusalem, whereas the defendant had no right to remove the cause against the will of the plaintiff (Sanh. 31*b*).

According to the later law, the parties were entitled to an opinion from the judge, giving his findings of fact and decision. An execution could issue immediately upon the judgment; and the losing party was obliged to satisfy it at once, without, however, losing his right to have the judgment reviewed thereafter, before the same court, on the ground of new evidence (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 14. 4, gloss). If, however, the judgment was that of the Great Sanhedrin, it was not necessary for the judges to give a written opinion, for such decision could not be set aside.

APPELLANTEN: A German word used to designate the assistants of the chief rabbi of Prague; called also "Oberjuristen"; generally three in number (see PRAGUE).

G. S.

APPLE.—Biblical Data: The word "apple" is the commonly accepted translation of *tappuaḥ*, from the root *napaḥ* (to exhale = the sweet-scented). It is of pleasant smell ("the smell of thy nose like apples," Cant. vii. 9 [A. V. 8]), and is used to revive the sick ("comfort me with apples, for I am sick of love," Cant. ii. 5). The tree offers a pleasant shade ("As the apple-tree among the trees of the wood, so is my beloved among the sons. I sat down under its shadow with great delight," Cant. ii. 3, Hebr.: "I raised thee up under the apple-tree: there thy mother brought thee forth," Cant. viii. 5). It is mentioned also in Joel i. 12, together with the pomegranate; and it gave the name "tappuaḥ" to a number of towns (Josh. xv. 34, 53; xvi. 8; xvii. 7). "Apples of gold in pictures ["baskets," R. V.] of silver" are mentioned in Prov. xxv. 11. Whether so called because of their red color, or whether oranges are here meant, is uncertain. The Septuagint renders it *μῆλον*, a fruit "sweet to the taste" (Cant. ii. 3).

In the time of the Mishnah the "tappuaḥ" was cultivated in large quantities and many varieties (Kil. i. 4; Ter. xi. 3; Ma'as. i. 4; Tappuḥim of Crete, Men. 28b). Apple-wine is spoken of in Tos. Ber. iv. 1 and Ab. v. 12. About the correctness of the translation of "tappuaḥ" there is a wide difference of opinion among botanists and linguists, especially as the Greek *μῆλον*, Latin *malum*, originally comprised the pomegranate, the quince, and other fruits similar to the Apple—all more or less symbolical of love, and therefore sacred to Aphrodite (see Hehn, "Kulturpflanzen," 1874, ii. 203–207). The Arabic name *tuffaḥ* is probably derived from the Syriac (see Frankel, "Aramäische Fremdwörter," p. 140). The tappuaḥ—distinguished in the Mishnah from the quince, which is called *parish* (Ma'as. i. 3), and from the *ḥuzor* (the crab-apple), (Kil. i. 4, Yer. Ter. ii. 3)—is declared by most authorities to be none other than the Apple that, if not as delicious as the European or the American Apple, is planted in orchards and near the houses in Palestine and Syria, and is especially prized for its aroma (see Credner, Commentary on Joel, pp. 135 *et seq.*, who refers to Ovid's "Metamorphoses," viii. 676; Winer, "B. R."—following Robinson's "Researches," [illegible] 355, iii. 1295; and with reference to Josephus, "Ant." xvii. 7, [where its use in case of sickness is testified to by the story of King Herod] and to Avicenna, quoted in "Harmar," i. 369; Immanuel Löw, "Aramäische Pflanzennamen," pp. 155 *et seq.*; W. R. Smith, in "Journal of Philology," xiii. 65). The Apple is handed to the sick or faint to revive them by its aroma. Rosenmüller ("Handbuch der Biblischen Alterthumskunde," iv. 308) and Houghton (in "Proceedings of the Society of Biblical Archeology," xii. 42–48), however, seek to identify it with the quince, which, according to Post, "has a sour, acrid taste, and is never sweet." Others identify it with the citron (see Delitzsch's Commentary to Cant.) and the article "Apfel" in Riehm's "Dict."); but the citron (a Persian fruit) was not transplanted to the Mediterranean shores before the common era (according to Pliny, "Naturalis Historia," xii. 3; Theophrastus, "Historia Plantarum," iv. 4). The same objections hold good against the identification of the Apple with the apricot, as proposed by Tristram, "Fauna and Flora of Palestine," p. 294.

J. JR. K.

——**In Rabbinical Literature:** The Apple mentioned in Cant. ii. 3 is taken symbolically; see the following examples from Cant. R. *ad loc.*: "'As the apple-tree among the trees of the wood' offers no shade in the heat like other trees, so would the nations not seek the shade of Sinai's God; Israel only would sit under His shadow with delight. Or, 'as the apple-tree unfolds blossoms before leaves, so did the Israelites show their faith in God before they heard the message' [Ex. iv. 31: "And the people believed; and when they heard"]. The same applies when on Sinai they said: 'All that the Lord said we will do and hearken' [Ex. xxiv. 7, Hebr.; compare with Cant. R. ii. 3, Shab. 88*a*, where the erroneous word *piryo* (its fruit), instead of *nizzo* (its blossoms), puzzled the Tosafists]. Or, 'as the apple-tree ripens its fruit in the month of Siwan, so did Israel display its fragrance at Mount Sinai in Siwan' [Ex. xix. 1, 2]. Again, 'as for the apple-tree the time from the first blossoming until the ripening of the fruit is fifty days, so was the time from the Exodus to the giving of the Law on Sinai fifty days.' Or, 'as for a small coin you may get an apple and derive enjoyment even from its sweet odor, so may you obtain your redemption easily with the help of the Law.' Or, 'as the apple excels in fragrance all trees, so does Israel excel the nations in good works.'" As the apple-tree among the trees of the wood, so even those that are void of merit are still full of good deeds, as the pomegranate is of seeds. The heathen are the trees in the wood without fruit, and Israel among them is as the apple-tree" (Yalḳ. Cant. 986). Ex. R. xvii.: "Why has God been likened to the apple-tree? Just as the apple offers its beauty to the eye without any cost, and has a delicious taste and perfume, so God's law (His mouth) is most sweet. He is altogether lovely." God had appeared to all the nations, but they would not accept the Torah, not realizing what is said in Ps. xxxiv. 9 [A. V. 8], "O taste and see that the Lord is good," and in Prov. viii. 19, "My fruit is better than gold, yea, than fine gold." But Israel said: "I sat down under his shadow with great delight and his fruit is sweet to my taste" (Cant. ii. 3). Also the words "Comfort me with apples" (Cant. ii. 5) are referred to the words of the Law, especially the Haggadot, which have delicious taste and fragrance combined like apples (Pesiḳ. R. K. xii. 101*b*; Cant. R. *ad loc.*).

Symbolical Meaning.

The Targ. translates "tappuaḥ" in Cant. ii. 3 "*ethrog*" (orange or citron); in ii. 5 and vii. 9 "*tappuaḥ di gintha di Eden*" (paradise-apple). In Cant. viii. 5 tappuaḥ is taken symbolically for Mount Olivet as giving forth all the dead at the time of the resurrection, or is taken for Sinai as in Cant. R. Aquila seems to take Cant. viii. 5 as referring to the fruit of the tree of knowledge, as he translates "*shamma* *ḥiblateka immeka*," "there hast thou been corrupted." Thus also Jerome (see Delitzsch, Commentary, p. 127). Here is probably the source of the common view that the forbidden fruit was an Apple (according to R. Abba of Acre [Acco], Gen. R. xv., an ethrog, the so-called "paradise-apple"). In church symbolism the story of Hercules with the apples of the Hesperides and the dragon wound around the tree served as the representation of Adam's fall, and Hercules as that of Jesus as deliverer, the Apple being often used as a symbol of the first sin (Piper, "Symbolik der Christlichen Kirche," i. 67, 128; Nork, "Mythologisches Lexikon," *s.v.* "Apfel").

Apples dipped into honey are eaten on the eve of the Jewish New-Year while the following words are spoken: "May it be Thy will, O Lord, that the year just begun be as good and sweet a year!" (Ṭur Oraḥ Ḥayyim, 583). In cabalistic literature tappuaḥ is an attribute of God, synonymous with *tiferet* (beauty), because, says the Zohar (Lev. xvi.), "tiferet diffuses itself into the world as an apple."

K.

Identified with Four Trees.

——**Botanical View:** There is perhaps no Biblical plant-name that has given rise to more discussion than has the identification of the תפוח. Four distinct fruit-bearing trees, the Apple (*Pyrus malus*), the citron (*Citrus medica*), the apricot (*Prunus Armeniaca*), and the quince (*Cydonia vulgaris*), have been suggested as its equivalent. Of these, two may be dismissed at once—the Apple and the citron. The Apple, far from being a native of Palestine, is, on account of the tropical climate, but rarely cultivated there, and with no success. The fruit is small, woody, and of very inferior quality.

The citron is beyond doubt a native of India, where it has been known and cultivated, even under different forms, from prehistoric times. At an early date its cultivation spread into western Asia, whence it was obtained by the Greeks, possibly as early as the time of Alexander's Asiatic campaign. It was cultivated in Italy in the third and fourth centuries, and by the fifth century had become well established; but it was not until the tenth century of the common era, according to Gallesio, that its cultivation was extended by the Arabs into Palestine and Egypt.

If viewed only in the light of present-day distribution and abundance, the apricot might lay undisputed claim to being the Hebrew תפוח [but see above], for, according to Canon Tristram, it "is most abundant in the Holy Land. . . . The apricot flourishes and yields a crop of prodigious abundance; its branches laden with golden fruit may well be compared (Prov. xxv. 11) to 'apples of gold,' and its pale leaves to 'pictures of silver.'" The apricot, as its specific name (*Prunus Armeniaca*) would imply, has been supposed to be a native of Armenia, and it has been reported in the neighborhood of the Caucasus mountains in the north, and between the Caspian and Black seas in the south, but grave doubt exists as to its being found wild there.

Difficulty of Identification.

According to De Candolle ("Origines des Plantes Cultivées"), it is now settled beyond reasonable question that the apricot is a native of China, where it has been known for two or three thousand years before the common era. Its cultivation seems to have spread very slowly toward the West, as supported by the fact that it has no Sanskrit or Hebrew designation, but only Persian names, *zardalu* (yellow plum) and *mishlauz*—under which latter designation, or its corruption *mishmush*, dried apricots are still exported from Syria—which has passed into Arabic. Among the Greeks and Romans the apricot appears to have been introduced about the beginning of the common era; for Pliny, among others, says that its introduction into Rome took place about thirty years before he wrote.

It is reasonable to suppose that the spread of the apricot may have been rapid and effective after its first introduction to the civilization of the West, for it is a delicious fruit, of the simplest cultivation and of great productiveness. The exact time of its introduction into Palestine can not be determined, but it very probably occurred before it became known to the Greeks and Romans, as the Hebrews had scant relations with Armenia, the country through which the apricot (*appanuth*) came. It may, therefore, be reasonably assumed that, although agreeing well with the description of the Biblical tappuaḥ, the apricot is not the tree referred to in the Scriptures.

Quince.

The claims of the quince to represent the tappuaḥ of the Hebrew Scriptures have been ably set forth by the Rev. W. Houghton ("Proceedings of Society of Biblical Archeology," xii. 42–48). This is the only one of the four species suggested that is undoubtedly indigenous to this general region. According to De Candolle:

> "The quince grows wild in the woods in the north of Persia, near the Caspian Sea, in the region to the south of the Caucasus, and in Anatolia. A few botanists have also found it apparently wild in the Crimea, and in the north of Greece; but naturalization may be suspected in the east of Europe, and the further advanced toward Italy, especially toward the southwest of Europe and Algeria, the more it becomes probable that the species was naturalized at an early period around villages, in hedges, etc."

The absence of a Sanskrit name for the quince is taken to indicate that its distribution did not extend toward the center of Asia, and, although it is also without a Hebrew name, it is undoubtedly wild on Mount Taurus. It is much more difficult to connect the quince with the Hebrew "tappuaḥ" than it is to identify the latter with the apricot. On this point Houghton says:

> "The tree [quince] is a native of the Mediterranean basin, and is, when ripe, deliciously fragrant, but, according to our western tastes, by no means pleasant to the taste when uncooked, but on the contrary austere and unpleasant. This latter fact is regarded generally as destructive of its pretensions, but for my part I hesitate to throw over the claims of the quince to denote the tappuaḥ, on account of its taste. The flavor and odor of plants or other things is simply a matter of opinion. Orientals set a high value on flavors and odors which to European senses are unpleasant moreover, we must seek for the reason why such and such a fruit was regarded with approbation."

In seeking a probable reason for this liking for the tappuaḥ, Houghton calls attention to the mandrake (*Atropa mandragora*), which, though to most Europeans it has a very fetid and disagreeable odor, is still highly regarded by the natives of Palestine as a love-philter to strengthen the affection between the sexes. The same argument may possibly apply to the quince, which came to be so esteemed for its flavor and odor, not as measured by European standards, but as tinged by Oriental conditions. The Hebrew word in the expression "its fruit was sweet to my taste" does not, it is said, imply either a saccharine or glucose sweetness; "the bitter waters which were made sweet" (Ex. xv. 25) were made pleasant, their bitterness was destroyed; "the worm shall feed sweetly on him" (Job xxiv. 20) must mean shall feed on him with pleasure; and so in Cant. ii. 5, "his fruit was sweet to my taste," meaning probably not only on account of the acid juice of the fruit, but because of its associations with friendship and love.

APPLE OF SODOM (called also **Dead Sea Apple**): A fruit described by Josephus ("B. J." iv. 8, § 4) and Tacitus ("Hist." v. 6) as growing near the site of Sodom, "externally of fair appearance, but turning to smoke and ashes when plucked with the hands." It has been identified by Seetzen, Irby, Mangles, and others (see especially Robinson, "Biblical Researches in Palestine," ii. 235–237) with the fruit of the *Asclepias gigantea vel procera*, a tree from ten to fifteen feet high, of a grayish cork-like bark, called *'osher* by the Arabs. It is found also in upper Egypt and in Arabia Felix; in Palestine it is confined to the borders of the Dead Sea. The tree resembles the milkweed or silkweed found in the northern part of America. "The fruit," says Robinson, "resembles externally a large, smooth apple, or orange, hanging in clusters of three or four together, and when ripe is of a yellow color. It was now fair and delicious to the eye and soft to the touch; but on being pressed or struck, it explodes with a puff, like a bladder or puff-ball, leaving in the hand only the shreds of the thin rind and a few fibers. It is indeed filled chiefly with air, which gives it the round form; while in the center a small slender pod runs through it which contains a small quantity of fine silk, which the Arabs collect and twist into matches for their guns." It is difficult to say whether the passage in the song of Moses, "their vine is of the vine of Sodom, and of the fields of Gomorrah: their grapes are grapes of gall, their clusters are bitter" (Deut. xxxii. 32), refers to a similar fruit (see Herzog "Real-Encyklopädie," xi. 748, under "Palestina").

APPRAISEMENT (שום in the later Hebrew): The setting of a value by a court of justice either upon property, or upon damage done to person or property. It differs from Estimate (Hebrew ערך), the fixing of values by the Law itself.

The Appraisement of damages, or "measure of damages" as it is termed in English law, can best be treated along with the rules for awarding compensation under the several heads dealing with wrongs and remedies, such as Accident or Assault. We have here to deal with the Appraisement that becomes necessary when property—principally land—is taken for debt, or is divided between joint owners.

In some New England States, even now, the land of the debtor may be turned over to the creditor at a valuation in satisfaction of his judgment, instead of being sold to the highest bidder, as elsewhere. This is called "extending" the land: a course more merciful to the debtor than a public sale; for there is no risk of the land being sacrificed. In the Talmudic law this was the only method for subjecting the land of adults to the payment of debts.

Appraisement of Land.

The Mishnah, in considering which part of a debtor's land shall be first taken to satisfy any demand, lays down this rule in Giṭ. v. 1: The injured are paid from the best (*'iddit*); creditors, from the middling (*benonit*); the widow's jointure, from the poorest (*zibburit*). The debtor's lands were deemed the main reliance for all claimants, movables being too uncertain and fleeting. That the favored claimant should be paid from the most available parcels shows that the debtor's land was not to be sold, but turned over in satisfaction; for otherwise it could make no difference which part of his lands was levied upon first.

The instrument by which the court awards to the creditor the debtor's land, as valued, is known as a "letter of appraisement" (*iggeret shum*) (Mishnah B. M. i. 8). In later practise (Ḥoshen Mishpaṭ, 103), following a baraita (B. B. 107*a*), we always find three appraisers mentioned, who are appointed for that purpose and who act in place of the judges. In the language of the Mishnah these are said to "go down" to appraise, meaning that they start from the seat of justice and go to view the field, or parcel, to be valued. Their valuation is reported to the court, and, when approved, becomes the act of the court.

The season of the year and the state of the land market must be taken into consideration; thus the Talmud assumes that there is a better market in Nisan than in Tishri (B. Ḳ. 7*b*).

When only two of the three appraisers agree, the opinion of the third is disregarded; but when each of the three names a different value, the early sages (B. B. 107*a*) disagree as to the mode of striking the mean: whether to add the three estimates together and divide by three, which would be the most natural course; or to give the preference to the two lower estimates, either at the arithmetical mean, or at two-thirds of the difference above the lowest. The Talmud decides for one of the latter methods—called by the early sages that of the judges of the Exile—but the later authorities (Ḥoshen Mishpaṭ, *l.c.*) favor the average estimate.

Advertisement of Sale.

The interest of orphans, that is, of infant heirs whose lands are to be taken for the obligation of their father, or, speaking generally, their ancestor, is further guarded by advertisement (*hakrazah*). The Mishnah ('Arakin vi. 1) says: "Appraisement of orphans' lands is thirty days: that of consecrated things is sixty days, and they cry it out every morning and evening." The commentary of Bertinoro—abridging the discussions of the Talmud on the subject—says: "The judges that go down to the estate of the orphans to sell it for debt appraise it, and cry out for buyers on thirty continuous days, day after day: in the morning when workmen go out to the fields—that any prospective buyer may direct his employees to look at the field and report; and in the evening when the workmen come back, so that he who hears the announcement may be reminded of the business in view and obtain the necessary information."

The advertisement states the boundaries of the land and its distinguishing marks, the amount of its product, and at what sum the court has assessed it; and the purpose for which it is sold, as it might interest the buyer to know. For instance, if to satisfy the jointure of a widow, she might be willing to take the price in driblets: if to satisfy a creditor, he might, if a merchant, be willing to receive part of his payment in broken or uncurrent coins. Then the court appoints a guardian (*apotropos*, a corruption of the Greek ἐπίτροπος) for the orphans, and in due time sells the land according to advertisement ('Ar. 21*b et seq.*). The Mishnah says (Ket. xi. 5):

> "On an appraisement by the judges, when they have gone too low by a sixth, or too high by a sixth, the sale is void [rather, voidable]. Rabban Simeon, son of Gamaliel, says the sale stands; otherwise, wherein lies the power of a court of justice? But if they have made a letter of examination [*iggeret bikkoret*] between them—even should they have sold what is worth a maneh [100 zuz = $15] for two hundred, or what is worth two hundred for a maneh—the sale stands." (The iggeret bikkoret is a written public notice, synonymous with hakrazah.)

After land has been "appraised" to the creditor, or (in New England legal language) after it has been "extended" to him, his title may be lost under the Talmudic law, upon a subsequent review and annulment of the judgment, under conditions for which see JUDGMENTS, REVIEW OF.

Appraisement of Slaves and Movables.

When slaves, movables, or written obligations were sold for debt there was no previous advertisement. Under the older Talmudic law movables of the debtor were not answerable at all in the hands of his heirs; but during the Middle Ages, when, in most countries, Jews were not allowed to own land, a remedy against the chattels and effects of the decedent had to be given as a matter of necessity. But in the Talmud no definite directions are found as to how movables or effects are to be appraised. Movables are supposed to be nearly akin to money, and to bear something like a fixed market value. When movables of the living debtor are turned over to the creditor in satisfaction, no commission of appraisers intervenes to fix the value; but the court seeks to bring about an understanding between debtor and creditor. However, obligations on third persons are appraised, the solvency of the obligor and the time of maturity entering as elements (Ḥoshen Mishpaṭ, 101, 2, 3, 5).

As has been said above, when a judicial sale is made in conformity with all the requirements in the matter of Appraisement and of advertisement, where law and custom demand it, it is binding on all parties. But where proper advertisement has been neglected, the law of "overreaching" applies, and the sale may be rescinded for an excess or shortage in the price of one-sixth over or below the true value (Ket. 100*b*); and this though in dealings between man and man, the law about "overreaching" applies to movables only.

Division of Estates.

In the division of an estate Appraisement becomes necessary; but, for the most part, a court will have to intervene only when some of the heirs are infants and the others are of full years. As long as all are under age no one can ask a division; when they are all of full age they can generally arrange a division among themselves.

In an Appraisement of shares, with a view to division, the same principle applies as to sale upon Appraisement; that is, a difference of one-sixth either above or below the true value, resulting from a mistake of the judges, is good ground for rescission on behalf of the infant heirs, within a reasonable time after coming of age, although the court may have appointed, as was its duty, a guardian for the infants. In such a case, there being no advertisement as in case of a judicial sale, there is nothing to correct the mistake (Ḥoshen Mishpaṭ, 289, 1).

In the division among the heirs, the garments they wear—given them by the dead father—also the Sabbath or holiday garments provided by the father, and worn by the wives and children of the heirs, are estimated and charged on their shares (*ib.* 288, 1 *et seq.*).

The Hebrew term for "appraisement" is also applied to the valuation of the bride's dowry in her marriage contract (*ketubah*): though this valuation is not made judicially, but by agreement of parties (see DOWRY).

APPROBATION or RECOMMENDATION

(in Hebrew הסכמה, derived from the Aramaic סכם, "to determine," "to agree"): Primarily, a favorable opinion given by rabbis or scholars as recommendation for a book composed wholly or partly in the Hebrew language. The Approbation is not of Jewish origin any more than the censorship. Blau correctly remarks: "Neither the Bible nor the Talmud nor the medieval Jewish literature knows of approbations. No prophet ever asked for the consent of any authority to his promulgations, nor any doctor of the Talmud to his opinion, nor any philosopher to his system. Even in the Middle Ages, when the Jewish religion, influenced by its surroundings, assumed more than ever the character of an authoritative religion, it did not, as far as I know, ever occur that any author had the excellence of his halakic work 'approved' by a recognized authority. Every literary production had to find the recognition which it merited by its own intrinsic worth. There was no previous approbation, just as little as there was no previous censure" ("Jew. Quart. Rev.," 1897, p. 175). It was the Christian clergy, anxious concerning the influence which might be exerted by certain thoughts and ideas over the multitude, who called both Approbation and censure into existence. Examples are to be found as early as the fourth century of certain books designated by the Church as being forbidden to the faithful for perusal.

Of Christian Origin.

The invention of printing materially helped the spread of bad books as well as of good ones, and therefore caused a still closer scrutiny by the Catholic Church of all publications. Alexander VI. (1501) decreed that a license for theological books appearing in any diocese in Germany must be secured from the respective bishop; and in 1515, at the fifth Lateran Synod, Leo X. extended the same rule to all Catholic countries with the threat of heavy penalties for non-compliance. But even these early papal bulls had been preceded by regulations concerning publications in Cologne, Mayence, and other German cities, also in Spain and in Venice. In 1480 a "Nosce te ipsum" with four approbations was published in Venice, and a book, with an Approbation by the patriarch of Venice, at Heidelberg (Reusch, "Der Index der Verbotenen Bücher," i. 56, Bonn, 1883–85). It is about this time that Jewish approbations (*haskamot*) first appeared. They are of three classes, embodying (1) Commendation; (2) Privilege; (3) License.

(1) Commendation: Commendatory haskamot are original approbations serving merely to describe the merits of the work, a purpose frequently attained by ordinary eulogies. In them it was sought to direct the attention of Jewish readers to the book. Of this kind are the haskamot to Jacob Landau's "Agur" (ed. Naples, 1487–92), by Judah Messer Leon, Jacob b. David Provenzalo, Ben Zion ben Raphael דנורים, Isaac ben Samuel Ḥayyim, Solomon Ḥayyim ben Jehiel Raphael ha-Kohen, and Nethanel ben Levi of Jerusalem. Leon's haskamah is as follows:

הנה ראיתי את אשר נתעורר האלוף כמהר'ר יעקב לנדא דחבר חבור טוב הנקרא אגור אשר אגר וקבץ דיני עבודת היום ומועדים וכל אסור והתר עם כל הנלוה אחריו והוא חבור הנותן אמרי שפר במנהגים ופוסקים הישרים להורא, ולכן שמתי חתימתי בצוף דבש אמרי נועם. הקטן יהודה הנקרא מסיר ליאן.

("I have examined the work submitted to me by the Reverend Jacob Landau, who has produced, under the title 'Agur,' a collection of the laws touching the daily ritual and that of the festivals and all that is permitted or prohibited thereon, together with all matters belonging thereunto. It is a work which 'giveth pleasant words' concerning the customs and observances and the decisions upon them by expert scholars; and therefore have I set my signature unto 'these droppings of the honeycomb,' these words of beauty.

"JUDAH, surnamed MESSIR LEON.")

(De Rossi, "Annales Hebræo-Typographici," § xv. 147; Steinschneider, in Ersch and Gruber, "Allg. Encyklopädie," xxviii. 31, note 41; *idem*, "Cat. Bodl." No. 5564; Wiener, "Friedländiana," pp. 142, 143.) Rosenthal's statement in "Yodea' Sefer," No. 1249, that the haskamah in "Sefer ha-Mekaḥ weha-Mimkar," is the first Approbation, as well as the suppositions of Perles, "Beiträge zur Gesch. der Hebr. und Aram. Studien," p. 202, note 1, and Kaufmann, in "Jew. Quart. Rev." x. 383, "that Elijah Levita's 'Baḥur,' the first edition of which appeared at Rome in 1518, contained the first approbation to be found in Jewish books," is therefore shown to be erroneous.

These approbations very soon attained considerable importance in the internal relations of the Jews; for they not only served to lay stress upon the excellencies of the works to which they referred, but were also the only protection against piracy 2 which the Jewish printers of that age possessed. They thus came to be, in the second place, a species of privilege.

(2) Privilege: Of this class is the haskamah in Elijah Levita's "Baḥur," ed. Rome, 1518, which Perles (*l.c.*) has reprinted. "It commences with an appreciation of the value of these books, dwells on the expense incurred in the printing, and then threatens with excommunication any one who should dare to reprint them within the next ten years." From this time the threat of excommunication became a standing formula in the haskamot furnished by reputable rabbis to literary productions. They strove to secure to the author or publisher all his rights in the book, under penalty of either the "greater" or "lesser" excommunication, for a term of five, ten, or fifteen years.

(3) License: Approbations of this class have their origin in the censorship. The outbreaks of persecution that arose in Venice in the middle of the sixteenth century, and were directed against the Talmud and other Jewish books, necessitated a censorship, which occupied itself not only with manuscripts and books about to be printed for the first time, but also with books which had already been printed and published. It was in the interest of the Jews themselves to remove all such anti-Christian expressions as might fan into flame the continuously glowing ashes of bigotry. Pope Julius III. decreed (Aug. 12, 1553), at the suggestion of the inquisitor-general, the confiscation and burning of all copies of the Talmud belonging to Jews. On the first day of the New-Year festival 5314, in order that the sorrow for their holy books might be made the keener, these autos da fé of the books began (Perles, p. 221, note 1; Steinschneider, in Ersch and Gruber, "Allg. Encykl. p. 30; Zunz, "S. P.," p. 336; Grätz, "Gesch. der Juden," ix. 336). On June 21, 1554 (Tammuz 21, 5314, as may be calculated from the Hebrew chronogram ואל שדי יתן לכם רחמים), a convention of Italian rabbis was held at Ferrara, presided over by R. Meïr Katzenellenbogen of Padua. They resolved, among other matters, that thereafter no Hebrew book, not then printed, should be published without the written approval of three rabbis and the president of the congregation, and that all Jewish purchasers of books printed without such Approbation should be liable to a fine of 25 gold scudi ($24.25), which was to be turned into the Jewish poor-box. (These resolutions, accompanied by notes by Levi and Halberstamm, were published in Brody in 1879 as a reprint from the journal "Ibri Anokhi." They were also published in "Pahad Yitzḥak," p. 158, Berlin, 1888, edited by the Mekize Nirdamim Society.) From this period the congregational authorities and rabbis were invested with the power to grant and to refuse permission to print in the chief cities where publishing-houses existed (Steinschneider, *l.c.* p. 30; Popper "Censorship of Hebrew Books," pp. 94 *et seq.*).

Publication Without Approbation Forbidden.

Paragraph 12 of the resolutions of the Frankfort Rabbinical Synod of 1603 prohibited the publication of any book in Basel or anywhere in Germany without permission of three rabbis (Horowitz, "Die Frankfurter Rabbinerversammlung vom Jahre 1603," Frankfort-on-the-Main, 1897; appended to the invitation issued by the Israel. Religionsschule). Paragraph 37 of the regulations of the Portuguese Talmud Torah community in Amsterdam reads: "No Jew shall print books in Amsterdam in a foreign or in the Hebrew language without permission of the 'Mahamad,' under penalty of the confiscation of the books" (Castro, "De Synagoge der Port. Israel. Gemeente te Amsterdam," appendix B, p. 40, The Hague, 1875). The manuscript, in Spanish, of these regulations is in the Rosenthal Library, Amsterdam. In the same way, several governments—for instance, in the case of books printed in Prague—decreed that the rabbinate of the country should be responsible through its Approbation for every Hebrew book published (Kaufmann, in "Jew. Quart. Rev." x. 384).

That the enemies of the Jews did not approve of the right to give or withhold haskamot thus conferred upon the rabbis and presidents of the congregations appears from the following passage in Schudt ("Jüd. Merkwürdigkeiten," iv. 206): "More harmful yet and more evil is it that the Jewish rabbis and presidents of their communities not only censor and approve the books printed or published for or by them, but also grant prohibitions preventing others from printing them, and place their haskamah or consent in front of the book; which certainly is a grievous and illegal encroachment upon the rights of the magistrates and the privileges of the sovereign." Wagenseil in his book "Prolegom. ad Tela Ignea Satani," p. 26, styles it sheer impudence on their part, and says, "It is an intolerable and shameful crime," attempting to show its unreasonableness, and the injury it works to the authorities, in most emphatic words.

Not Welcomed by the Jews.

In spite of all these regulations, the custom of asking for approbations from rabbis and congregational authorities did not at first secure much foothold among Jews, especially among the Jews of Italy. Regarded as a Christian custom, it was never welcomed. Thus, in spite of the solemn Ferrara resolutions, Shem-Ṭob b. Shem-Ṭob's "Sefer ha-Emunot", appeared in Ferrara itself in 1557 without any Approbation, and the *editio princeps* of Menahem Zion ben Meïr's commentary on the Pentateuch was published in 1559 by Vicenti Conti in Cremona, also without the requisite haskamah. But in the second half of the seventeenth century, owing to the excitement and tension induced by the appearance of the false Messiah, Shabbethai Ẓebi, there began to be quite a lively demand for approbations; and in the eighteenth century, with the exception of a few prayer-books and Judæo-German productions, there was scarcely a work published without a rabbinical haskamah. Faithful Jews would not read a book which lacked one. The fact that Moses Mendelssohn dared to publish his translation of the Pentateuch without a rabbinical Approbation appears to have been one of the reasons for its proscription by the rabbis in many places, and for its being publicly burned, as at Posen (Mendelssohn, "Schriften," vi. 447).

The examination of books submitted for Approbation was often a very superficial one. The bitter results of such carelessness are shown by the history of that sly rascal, Ḥayyun (see Grätz, "Gesch. der Juden," x. 315, and Kaufmann, in "Rev. Et. Juives," xxxvi. 256). Cautious rabbis, who looked with disfavor upon the popular mania for writing, avoided, as far as possible, issuing these licenses for new works. Thus in Poland the rabbis of "The Four Lands" agreed to grant them formally and only in exceptional cases, instead of giving them, as had hitherto been the case, at their casual meetings at fairs and annual markets, where large numbers of Jews came together (compare Steinschneider, in Ersch and Gruber, *l.c.* p. 31; and Dembitzer, "Abhandlung über die Synode der Vier Länder in Polen und Lithauen," Cracow, 1891; London, "Abne Zikkaron," in "Ha-Modia' la-Ḥodashim").

Of Historical Value.

Since approbations were frequently sought by traveling scholars, who depended for their livelihood upon the publication of their works, many a book is found to contain ten, twelve, and even more approbations by the various rabbis whom the author visited upon his travels. These haskamot, therefore, afford valuable contributions to the history of Jewish congregations and of particular rabbis. Many names of rabbis and presidents of the seventeenth century may be said to emerge from obscurity mainly through these printed approbations. Moritz Pinner was the first (Berlin, 1861) to register the names of signers of haskamot in his uncompleted catalogue of 389 manuscripts and publications. Zuckermann followed Pinner with his catalogue of the Seminary Library in Breslau (Breslau, 1870), giving the abodes as well as the names of signers. Meyer Roest, in his catalogue of the Rosenthal Library, sets down not only the names and abodes, but also the Hebrew day, month, and year of issue of the approbations, thus contributing a real service to Jewish literature. It is a pity that Samuel Wiener in his description of the Friedland Library, felt compelled to limit himself and did not follow Roest's example entirely. An index to approbations, which would be of great service to Jewish scholars, can be successfully accomplished only by the extension in this direction of Wiener's catalogue.

SPECIMEN OF A HASKAMAH (PERMIT OF THE RABBIS).

Whereas, there have appeared before us the wise, the perfect one,- etc., Isaac Gershon, and his worthy associate, Menahem Jacob Ashkenazi, and have testified that they have gone to much labor and trouble, have expended great sums, and have spared no expense, all in order that they may bring to light, in as beautiful and excellent an edition as possible, the secrets of a work of great worth, through which the public good will be advanced, viz., the book called "Sefer Bedeḳ ha-Bayit," by that sage, that wonder of his generation, our master and teacher, Joseph Caro of blessed memory;

And whereas, the work is to be completed, as a service to God, with the utmost beauty and perfection;

And whereas, they fear lest they sow and another reap, doing all their work in vain, and lest they make all their expenditures only "to leave to others their wealth";

Therefore they have sought and have been granted aid from the city through the uttering of a ban, and the publishing of a rabbinic notice to the effect that no injury or harm shall come to them through any man.

And whereas, permission has likewise been granted them by the nobles, the Cattaveri (may their majesties be exalted!), that their desire and wish should be fulfilled;

Now, therefore, we decree, under threat of excommunication, ban, and anathema through all the curses written in the Bible, that no Israelite, man or woman, great or small, be he who he may, shall purpose to publish this work, or to aid any one else in publishing it, in this or any other city within ten years, except it be by the will and permission of the associates above mentioned;

And let it be likewise understood that by this decree no Israelite is allowed to receive any copy of the book mentioned from any man, Jew or Christian, be he who he may, through any manner of deceit, trickery, or deception, but only from the above-mentioned Menahem Jacob Ashkenazi. For thus it is desired by the scholar, etc., mentioned above, that all copies of the above-mentioned book shall be published and sold by Menahem Jacob.

Upon any one who may transgress against this our decree—may there come against him "serpents for whose bite there is no charm," and may he be infected "with the bitter venom of asps"; may God not grant peace to him, etc.

But he that obeys—may he dwell in safety and peace like the green olive-tree and rest at night under the shadow of the Almighty; may all that he attempts prosper; may the early rain shower with blessings his people and the sheep of his pasture.

"And ye who have clung to the Lord your God are all of you alive this day."

Thus sayeth ZION SARPHATI,
and thus sayeth LEB SARVIL,
BARUCH BEN SAMUEL.

On the 17th day of Nisan, 1600, I published this ban, by command of the associates mentioned above, in every synagogue in the community of Venice.

ELIEZER LEVI,
Beadle of the Community.

G. J. M. H.

APT (אפט): A small town, not far from Avignon, in the department of Vaucluse, France. In the Middle Ages it was inhabited by Jews, who had a separate quarter assigned to them. About the end of the thirteenth century the poet ISAAC BEN ABRAHAM GORNI visited Apt and wrote afterward a poem in honor of its Jewish community, which had given him a very hearty welcome. In the responsa of Solomon ben Adret several Jews of Apt are mentioned. In the Bodleian manuscript No. 2550 there is found a correspondence with a certain R. Samuel ben Mordecai (Neubauer, in "Rev. Et. Juives," xii. 87). In the British Museum manuscript, add. 22,089, there occurs a letter signed by Massif Jacob of Lunel, Durant del Portal, Nathan Vidal Bedersi, Meïr ben Abba Mari, and "us, some of the other members of the community of Apt." A Don Massif Jacob is signatory to another responsum, dated 1340.

Apt being a monosyllabic word, the common noun עיר ("town") was sometimes prefixed to it, thus forming the compound word עיראפט ("Aptville").

APULIA: A district of southern Italy, the limits of which have varied. It is usually regarded as the region bounded by the Frentani on the north, Samnium on the west, Calabria and Lucania on the south, and the Adriatic on the east. Apulia is now one of the poorest provinces of Italy, but in the Middle Ages, by reason of its several excellent seaports, it was of considerable commercial importance. This probably accounts for its early attractiveness to Jewish immigrants; for in northern Italy commerce had been monopolized by a number of native Christian families. It is impossible to determine the exact date of the settlement of Jews in Apulia, though it must have been early. In Pozzuoli, in the neighboring province of Naples, which was the chief Italian seaport for Oriental commerce, there were Jewish inhabitants about the year 4 B.C., directly after the death of Herod (Josephus, "Ant." xvii. 12, § 1; "B. J." ii. 7, § 1). For such an early arrival of Jews in other parts of southern Italy all positive proof is lacking. On the death of Theodosius I., and the division of the Roman empire, in the year 395, Apulia was allotted to Honorius, the emperor of the West. In his days the Jewish population in Apulia and its adjunct Calabria must already have been considerable, for he abolished in those provinces the curial freedom of the Jews and interdicted the exportation of the patriarchal taxes; and, besides this, he complained in one of his edicts (of the year 398) that in numerous cities of Apulia and Calabria the communal offices could not be regularly filled, because of the refusal of the Jewish population to accept them—an attitude toward government appointments characteristic of the medieval Jews.

Early Settlement of Jews.

The catacombs of Venosa, in Apulia, the birthplace of Horace, have yielded to recent excavators a great deal of epigraphic material, consisting of inscriptions in Greek, Latin, and Hebrew, dating, according to the conclusions of Mommsen, from the sixth century. Seven Hebrew epitaphs of the ninth century, likewise, have been unearthed at Venosa, and their contents indicate the existence of a flourishing communal life among the contemporary Jews of Apulia, seeing that in one of them a certain R. Nathan b. Ephraim is eulogized as "an honored man, master of wisdom, chief of an academy, and leader of his generation" (Ascoli, "Iscrizione," p. 71).

The commencement of the settlement of Jews in Apulia is surrounded by legends. Yosippon, for example, traces them back to the five thousand captives transplanted by Titus from Palestine to Taranto, Otranto, and similar places. The most important contribution, however, to the early annals of the Apulian Jews has been obtained in recent years from the unique "Chronicle" of Ahimaaz ben Paltiel. The attention of Ahimaaz, as regards Apulia, was almost entirely confined to the community of Oria, to which his family had belonged, and the members of which he also regarded as the descendants of the captives of Titus. It was in Oria that the patriarch of the family, Amittai, became known about the middle of the ninth century, both as scholar and liturgical poet. In the age of his two sons, Shephatiah and Hananeel, the former of whom became particularly distinguished for his literary and communal activity, there appeared on the scene of Italian Jewish life the figure of Aaron the Babylonian. Under his influence the academies of Oria are alleged to have sprouted forth in unprecedented vitality, and the various branches of Jewish law and life to have burst into new activity.

"Chronicle" of Ahimaaz.

Eastern scholars probably were in the habit of visiting the flourishing communities of the Occident for the purpose of transplanting thither the traditions of scholarship and religion. Such a scholar is reported by Ahimaaz to have come to Venosa. He made it his practise to deliver public lectures every Sabbath, basing his expositions on the Midrashic interpretations of the weekly Scriptural sections. His lectures were given in Hebrew probably, as the services of an interpreter were needed to render them intelligible to the audience.

Thaumaturgy and Poetry.

Poetic and thaumaturgic talents were the favorite attributes bestowed by tradition on the Jews of medieval Apulia. Both are ascribed by Ahimaaz in a great measure to R. Shephatiah b. Amittai; whom ill-informed commentators had regarded as one of the captives of Titus and one of the authors of "We-hu Raḥum," a liturgic piece, but who probably flourished in the second half of the ninth century in Oria. According to the testimony of Ahimaaz, it was Shephatiah's argumentative ability and miracle-working power that had saved the Jews of Oria from a serious religious persecution.

Synchronously with this persecution occurred a disastrous Arabian invasion of Calabria and Apulia. In the year 872 Saudan, an Arabian conqueror, entered Bari, where he usurped the government and established a court, in which, as legend has it, Aaron the Babylonian was accorded boundless honors as counselor and oracle just prior to his departure for the East. From Bari, Saudan advanced upon Oria, to which he made the proposal of a siegeless settlement on condition of a certain voluntary tribute from the population. Here, again, Shephatiah, whom legend presents as the disciple of the wondrous Aaron, and who probably was familiar with the Arabic language, was delegated to negotiate with the invader. The Saracen terror, however, was frustrated by the confederacy of the emperor Basil I. with Louis II., the emperor of Germany.

That the conversion of the Jews was a prevalent ambition in Apulia in that age, is inferred, further, from what Ahimaaz records regarding Hananeel, the younger brother of Shephatiah. He says that Hananeel, too, was a noted miracle-worker and liturgical poet; that the archbishop of Oria summoned him to his palace on one occasion, and forced him into a religious dispute, in the course of which the archbishop impeached the correctness of the Jewish calendar with a view of inducing him to accept Christianity.

Astrology.

Astrology, also, was cultivated in Apulia. Paltiel, the son of Cassia—the great-granddaughter of Hananeel b. Amittai—owing to his distinction in astrology, became the intimate friend and counselor of the calif Abu Tamim Maad (called Muizz lidin-Allah or Al-muizz), the conqueror of Egypt and builder of Cairo. The friendship between the two, according to Ahimaaz, had begun in Italy on the occasion of one of the Apulian invasions led by Almuizz when Oria was besieged and taken. This emigrant from Apulia had certainly achieved communal distinction among the Jews of Egypt in the second half of the tenth century, since the title of "Naggid" is mentioned in connection with his name.

A cousin of Paltiel, Samuel b. Hananeel (died 1008), settled in Capua, where both he and his son Paltiel (988-1048) attained prominence as communal benefactors and leaders. It was Ahimaaz, the son of the latter, born in 1017, who not only returned to the ancestral dwelling-place in Oria, but also left a number of liturgic pieces, and rescued from oblivion the memory of his ancestors. His "Chronicle" mentioned above, being one of the very few literary monuments of that period, is of assistance in forming an idea of the literary fashions and influences of his age. Of course, the influence of the Apulian vernacular shows itself in many peculiarities of expression characteristic of the "Chronicle."

Shabbethai Donnolo.

Even prior to the discovery of the "Chronicle" of Ahimaaz, however, Apulia had the distinction of being considered the birthplace of the first Jewish scholar in Europe whose name had been inscribed in the history of literature, Shabbethai Donnolo. This noted physician and astronomer was born at Oria, in the district of Otranto, in the year 913. When he was twelve years old (925) an army of Fatimite Mohammedans, led by Ja'far ibn Ubaid, again invaded Calabria and Apulia, on which occasion, according to Donnolo's autobiographic note, the city of Oria was sacked, "ten wise and pious rabbis," whose names are given, and numerous other Jews, were killed, while a multitude of survivors, including himself, were taken captive. One of the victims was Ḥasadiah b. Hananeel, nephew of Shephatiah b. Amittai, to whom Donnolo refers as a relation of his grandfather ("Ḥakmoni," ed. Castelli, Hebr. part, p. 3). Several details of Donnolo's life throw light on the condition of Jewish culture in his time and country. Donnolo, for example, like his contemporary Paltiel, had become a devotee of astrology; but in all the surrounding provinces not a single Jewish scholar could be found able to interpret the astrological writings which avowedly had been copied by him from ancient Jewish works. It is interesting, however, to note that Donnolo had no hesitancy in seeking the instruction of Christian masters in matters of which the Jews were ignorant. This circumstance attests the early origin of that intimacy of relations for which Jewish and Christian scholars have been noted in Italy, and their frequent interchange of thought.

Intellectual Relations with Christians.

Donnolo, besides being private physician to the viceroy of southern Italy, was intimately acquainted with Nilus the Younger, the abbot of Rossana and Grotta Ferrata, to whom, on a certain occasion, he appears to have introduced another Jewish scholar. The latter attempted to draw the abbot into a religious controversy, which was, however, adroitly evaded by him. It is one of the first discussions of this character recorded in the European history of the Jews; and its significance lies in the aggressive part taken in it by the Jew, in contradistinction to the one into which, as stated above, Hananeel had been forced. Donnolo's allegorical method of exegesis adopted in his commentary on the mystic "Sefer Yeẓirah" (Book of Creation), as well as his knowledge of the Greek language displayed in it, also testifies to his intercourse with Christian scholars, among whom allegorism was highly popular, and whose spoken language, according to Mommsen, was very closely related to the Greek.

That there was an abundance of Jewish scholars in Apulia toward the end of the tenth century (according to Grätz, but in 750 according to Ibn Daud) is learned, furthermore, from a well-known legend alluding to that age. Four rabbis, as stated by Ibn Daud ("Sefer ha-Ḳabbalah," ed. Neubauer, in "Medieval Jew. Chronicles," i. 67 *et seq.*), were on a sea-voyage from Bari to Sebasteia, when their ship was overtaken by an Andalusian pirate (the admiral Ibn Romahis), and the scholars were made captive, the latter being in the end sold in several cities of Africa and Spain, where each rabbi ultimately became the founder of a Talmudic academy. The real origin and purpose of these traveling rabbis have been variously interpreted, but the historicity of the incident narrated by Ibn Daud can scarcely be doubted. The legend points distinctly to the fact that toward the end of the tenth (?) century certain rabbis emigrated from southern Italy and established schools in various Jewish communities in Africa and Spain (compare Hushiel b. Elhanan).

Centers of Learning.

Bari was particularly popular as a center of Jewish learning, as is witnessed by the fact that in the eleventh century, R. Nathan b. Jehiel, the author of the "'Aruk," made a pilgrimage thither to hear the lectures of R. Moses Kalfo (compare Kohut, "Aruch Completum," Introduction, p. 15), and that in the twelfth century the religious authority of the Apulian rabbis had been so firmly established even abroad, that in France the proverb came into vogue, in allusion to Isa. ii. 3: "Out of Bari goeth forth the law, and the word of God from Otranto" (Jacob Tam, "Sefer ha-Yashar," 74*a*). Benjamin of Tudela, who in the latter part of the same century traveled through Apulia, found flourishing Jewish communities throughout the province, Trani possessing 200, Taranto 300, and Otranto 500 Jewish families, while in the port of Brindisi ten Jews were engaged in the trade of dyeing.

During the renaissance of Talmudic learning in the thirteenth century, Apulia still had the good fortune of bringing forth one of the most noted Jewish savants of the age, in the person of R. Isaiah b. Mali di Trani, who not only became one of the most prolific and weighty rabbis of the Middle Ages, but also maintained the Italian tradition of friendly intercourse with Christian scholars, in favor of whose astronomic learning he at times even made bold to discard traditional rabbinic views. Di Trani's family produced several other noted men, among whom Isaiah's grandson and namesake attained to considerable distinction. Moses di Trani, in the sixteenth century, was one of the most distinguished disciples of Jacob Berab.

Alleged Wholesale Conversion.

Fra Giordano da Rivalto, in one of his sermons preached in the year 1304, alludes to a general conversion of Apulian Jews that, it was alleged, had taken place about the year 1290, in consequence of a ritual murder with the commission of which they had been charged. The king, Charles I. (1284–1309), is alleged to have left them the choice between baptism and death, whereupon, it is said, about eight thousand embraced Christianity, while the rest fled from the country. The proportion of truth in this statement is not ascertainable. Güdemann denies the assertion altogether on the ground of the friendly disposition toward the Jews manifested by Charles I., though he admits that, in the year 1302, certain property in Trani that had formerly been used as a Jewish cemetery was usurped by the Dominican Order, and that about that time several Jewish synagogues in the same city were converted into churches. Certain, however, it is that in the thirteenth and fourteenth centuries there were Jewish inhabitants in Trani as well as in the rest of Apulia; wherefore Giordano's statement concerning their wholesale apostasy or emigration must be regarded at least as exaggerated, unless, indeed, under improved circumstances, a return of the Jews had occurred.

In the sermons of another preacher from southern Italy, Roberto da Lecce, who flourished in the first half of the fifteenth century, there are allusions to friendly relations between Jews and Christians. That Apulia, however, had gradually lost its prominence as a center of Jewish learning, can not be gainsaid. In the early part of the sixteenth century, for example, there was in Constantinople a whole congregation consisting of Apulian immigrants, who exhibited, however, little of the Italian enlightenment, in that they were the leaders in an abortive attempt to exclude the children of the Karaites from the Rabbinite schools, and to build up a wall of separation between the two Jewish sects—a stroke of fanaticism thwarted by R. **Elias Mizrahi** (compare **Italy**).

AQUEDUCTS IN PALESTINE: Palestine, in contradistinction to Egypt, was a land of natural waters rather than of irrigation (Deut. xi. 10, 11), and there can be little doubt that the aqueducts, like the roads of the country, were constructed mainly by the Romans after the fall of Jerusalem. In four instances, however—at Tyre, Jericho, Cæsarea, and Jerusalem—earlier aqueducts seem to have been constructed to increase and improve the water-supply of the cities, and, in the case of Jericho, to extend the cultivation of the palm-groves.

Remains of Stone Aqueduct at Tyre.

Tyre is mentioned ("Travels of a Mohar"), even in the times of Rameses II., as an island city to which water was brought in boats. Shalmaneser IV. (II Kings xvii. 3–5) is said by Menander (Josephus, "Ant." ix. 14, § 2) to have cut off the water-supply of Tyre, which was brought near the island from the fine spring of Ras-al-'Ain (Palæ Tyrus), on the mainland to the south. The remains of an aqueduct, nearly four English miles in length, are still found leading from masonry reservoirs that dam up the springs to a height of eighty feet above sea level. Most of this work is of Roman masonry; but in one part of the course of the aqueduct there are "false" arches, which appear to represent an older structure. Similar false arches are found in Phenician buildings (with stones marked with Phenician letters) at Eryx, and this seems to indicate the existence of an aqueduct at Tyre, which may date from the age of the Assyrian king who began the siege of Samaria in the time of Ahaz of Judah.

The aqueducts of Jericho are channels cut in the rock, and sometimes carried on rubble masonry, at the foot of the mountains, southward from the spring of Docus ('Ain Duk) to the site of the city as it existed in the time of Herod, near the main road from Jerusalem, where it reaches the Jordan plain. About four miles further north there is another system of channels, carrying water from the springs at the foot of the mountains eastward into the Jordan plain, with branches which appear clearly to have been intended for irrigation. This answers to the system mentioned by Josephus ("Ant." xvii. 13, § 1), near the village of Neara (the ancient Naarath, Josh. xvi. 7), which was constructed by Archelaus to water his palm-groves, for Eusebius (in the "Onomasticon") places Neara five Roman miles north of Jericho.

Remains in Cæsarea of Two Aqueducts.

Cæsarea, the capital of Palestine under Herod the Great, was built on the seashore north of Joppa, on a site which had no good water-supply. It is, therefore, probable that aqueducts were built when the city was first founded. The two that are still traceable have a length of about four miles to the north, and conduct water from the spring of Mamas (an ancient "Maiuma," or place of water), near the Crocodile river. They are on different levels, and run on arches, which appear to be Roman work, across the swamps near the river. The low-level aqueduct is tunneled through the low sandy cliffs further south, and rock-cut well-staircases lead down to the channel at intervals. These aqueducts may have been repaired or rebuilt in the later Roman age, but the original rock channel is probably as old as the time of Herod.

The Aqueducts of Jerusalem.

At Jerusalem there were several aqueducts in the time of Herod, but perhaps the oldest was that to the west of the city. The "conduit of the upper pool, in the highway of the fuller's field" (II Kings xviii. 17) was the place where the Assyrians appeared before Jerusalem; and the camp of the Assyrians, according to Josephus ("B. J." v. 7, § 2), was to the northwest of Jerusalem, from which direction they would naturally approach, coming, as they did, from the plains. An aqueduct led later to the tower Hippicus on the west (Josephus, *ibid.*), and still leads from the Birket Mamilla, outside the city on this side, to the great interior rock-cut pool now known as "Ḥammâm el Batrak" (The Patriarch's Pool), which answers to the Amygdalon pool of Josephus ("B. J." v. 7, § 2; xi. 4) or "Pool of the Tower" (Ha-Migdalon).

As Jerusalem was naturally deficient in water-supply, it is probable that this large reservoir dated from the earliest times, and was fed through the aqueduct that collected the rain-water from the rocky ground west of the town. The pool of Gihon (I Kings i. 33, 38) rose in a cavern, partly natural, but enlarged artificially, on the west side of the Kidron, south of the Temple. The stream thence appears to have flowed at first down the Kidron valley; and the periodical overflow (due to a natural siphon in the rock) was a remarkable feature of this supply. Hezekiah is believed to have dammed up the waters, and to have cut the famous Siloam aqueduct through the Ophel hill, southward to the new pool of Siloam (II Chron. xxxii. 30). This channel, which is nearly a third of a mile (1,757 feet) in length, although the air-line between the points of beginning and ending is only 1,104 feet, gives clear evidence of the Hebrew engineering methods of Hezekiah's age; and the ancient rock inscription (see Siloam Inscription), on the east wall of the tunnel near its mouth, gives us an account of the method of excavation. Its height is very irregular, being about 16 feet at its southern exit, but only 3¾ feet at several points in its interior.

The Siloam Tunnel-Aqueduct.

The upper cave pool had, at its farthest recess, a staircase cut in rock leading up within the city near the "water-gate" (Neh. iii. 26). The tunnel was begun at the foot of these steps, and another tunnel was driven northward to meet it from Siloam. The excavators appear to have worked without instruments capable of keeping the direction straight, or perhaps they followed some softer vein of the rock. They are said, in the text, to have heard the sound of the picks of their fellows, and to have worked toward each other until they met, not exactly in a line. The point of junction is still marked by a sharp turn at right angles in the tunnel, the two channels having been about a yard apart—center to center of excavation. The tunnel is much more lofty at its mouth than elsewhere, and is very narrow in the middle, where it is now much silted up, and nearly impassable for a full-grown man. It was probably found that the lower end of the tunnel, when cut through, was not low enough to allow the water to flow into the pool; and the height of the excavation was due probably to subsequent lowering of the floor at this point. There is only one shaft leading from the surface of the hill, and in another part a sort of standing-place is formed by a recess in the roof; but throughout the greater part of the work the excavators must have labored on their knees, or even while lying flat. The whole of the work suggests very primitive methods, and it was probably carried out in a hurry on account of the threatened Assyrian invasion. The Siloam pool was outside the walls (Josephus, "Ant." vii. 14, § 5; "B. J." v. 9, § 4), but lay in a reentering angle, well within bow-shot. The water-supply was thus controlled by the garrison instead of running to waste in the valley. Similar cave springs, with rock stairs to the interior of the fortress, are found at Gibeon and elsewhere in Palestine, but the Siloam tunnel is the most important instance known of Hebrew engineering.

Other Aqueducts: Solomon's Pools.

Another short aqueduct, with a system of converging channels, gathered the rain-water north of the city, and brought it to the ditch of Antonia, and, through a lofty rock-cut passage, to the interior of the Temple. On the south were two other aqueducts, which appear to have been made by Pontius Pilate, the procurator (Josephus, "Ant." xviii. 3, § 2). One of them led from Etam ('Ain 'Atân), and from the three Roman reservoirs called "Solomon's Pools" (see Yoma 31*a*; Josephus, "Ant." viii. 7, § 3), to the city, probably entering near Hippicus. The second channel ran from these reservoirs along the south slopes to the Temple. The direct distance was about seven English miles. The water was conveyed in stone pipes laid in cement in parts where the channel is not rock-cut. The reservoirs were supplied from springs thirteen miles south of the city by another aqueduct; and the windings along the hillsides give a total length of forty-one miles from the head spring, 'Ain Kuei-Ẓiba.

These instances will suffice to show that, although the art of building aqueducts was introduced into Palestine by the Romans chiefly, yet the rock tunnels, providing water for cities, were, in some cases, constructed in the time of the Hebrew kings.

G. C. R. C.

AQUILA (Ἀκύλας, עקילס): Translator of the canonical Scriptures from Hebrew into Greek. He was by birth a Gentile from Pontus, and is said by Epiphanius to have been a connection by marriage of the emperor Hadrian and to have been appointed by him about the year 128 to an office concerned with the rebuilding of Jerusalem as "Ælia Capitolina." At some unknown age he joined the Christians, but afterward left them and became a proselyte to Judaism. According to Jerome he was a disciple of Rabbi Akiba. The Talmud states that he finished his translations under the influence of R. Akiba and that his other teachers were Eliezer ben Hyrcanus and Joshua ben Hananiah. It is certain, however, that Aquila's translation had appeared before the publication of Irenæus' "Adversus Hæreses"; *i.e.*, before 177.

The work seems to have been entirely successful as regards the purpose for which it was intended (Jerome speaks of a second edition which embodied corrections by the author), and it was read by the Greek-speaking Jews even in the time of Justinian (Novella, 146). It was used intelligently and respectfully by great Christian scholars like Origen and Jerome, while controversialists of less merit and learning, such as the author of the "Dialogue of Timothy and Aquila" (published in 1898 by F. C. Conybeare), found it worth their while to accuse Aquila of anti-Christian bias, and to remind their Jewish adversaries of the superior antiquity of the Septuagint. But no manuscript until quite recently was known to have survived, and our acquaintance with the work came from the scattered fragments of Origen's "Hexapla." The reason of this is to be found in the Mohammedan conquests; the need of a Greek version for Jews disappeared when Greek ceased to be the *lingua franca* of Egypt and the Levant.

Fragments in the "Hexapla."

The "Hexapla"—a colossal undertaking compiled by Origen (died about 254) with the object of correcting the text of the Septuagint—consisted of the Hebrew text of the Old Testament, the Hebrew text in Greek letters, the Septuagint itself as revised by Origen, and the Greek versions of Aquila, Symmachus, and Theodotion, all arranged in six parallel columns. With the exception of two recently discovered fragments of the Psalms, one coming from Milan, the other from Cairo,* the "Hexapla" itself is no longer extant, but a considerable number of extracts, including many readings from Aquila, are preserved in the form of marginal notes to certain manuscripts of the Septuagint. These have been carefully collected and edited in Field's great work ("Origenis Hexaplorum quæ Supersunt," Oxford, 1875), which still remains the chief source of information about Aquila's version.

Contrary to expectation, the readings of Aquila derived from the "Hexapla" can now be supplemented by fragmentary manuscripts of the translation itself. These were discovered in 1897, partly by F. C. Burkitt, among the mass of loose documents brought to Cambridge from the *geniza* of the Old Synagogue at Cairo through the enterprise of Dr. S. Schechter and Dr. C. Taylor, master of St. John's College, Cambridge. Three of the six leaves already found came from a codex of Kings (*i.e.*, they probably formed part of a codex of the Former Prophets), and three came from a codex of the Psalms. The portions preserved are I Kings xx. 7–17; II Kings xxiii. 11–27 (edited by F. C. Burkitt, 1897); Ps. xc. 17, ciii. 17 with some breaks (edited by Taylor, 1900). The numbering is that of the Hebrew Bible, not the Greek. The fragments do not bear the name of the translator, but the style of Aquila is too peculiar to be mistaken. The handwriting is a Greek uncial of the sixth century. Dr. Schechter assigns the later Hebrew writing to the eleventh century. All six leaves are palimpsests, and in places are somewhat difficult to decipher.

The special value of the Cairo manuscripts is that they permit a more just conception of the general effect of Aquila's version, where it agrees with the Septuagint as well as where it differs. It is now possible to study the rules of syntax followed by Aquila with far greater precision than before. At the same time the general result has been to confirm what the best authorities had already reported.

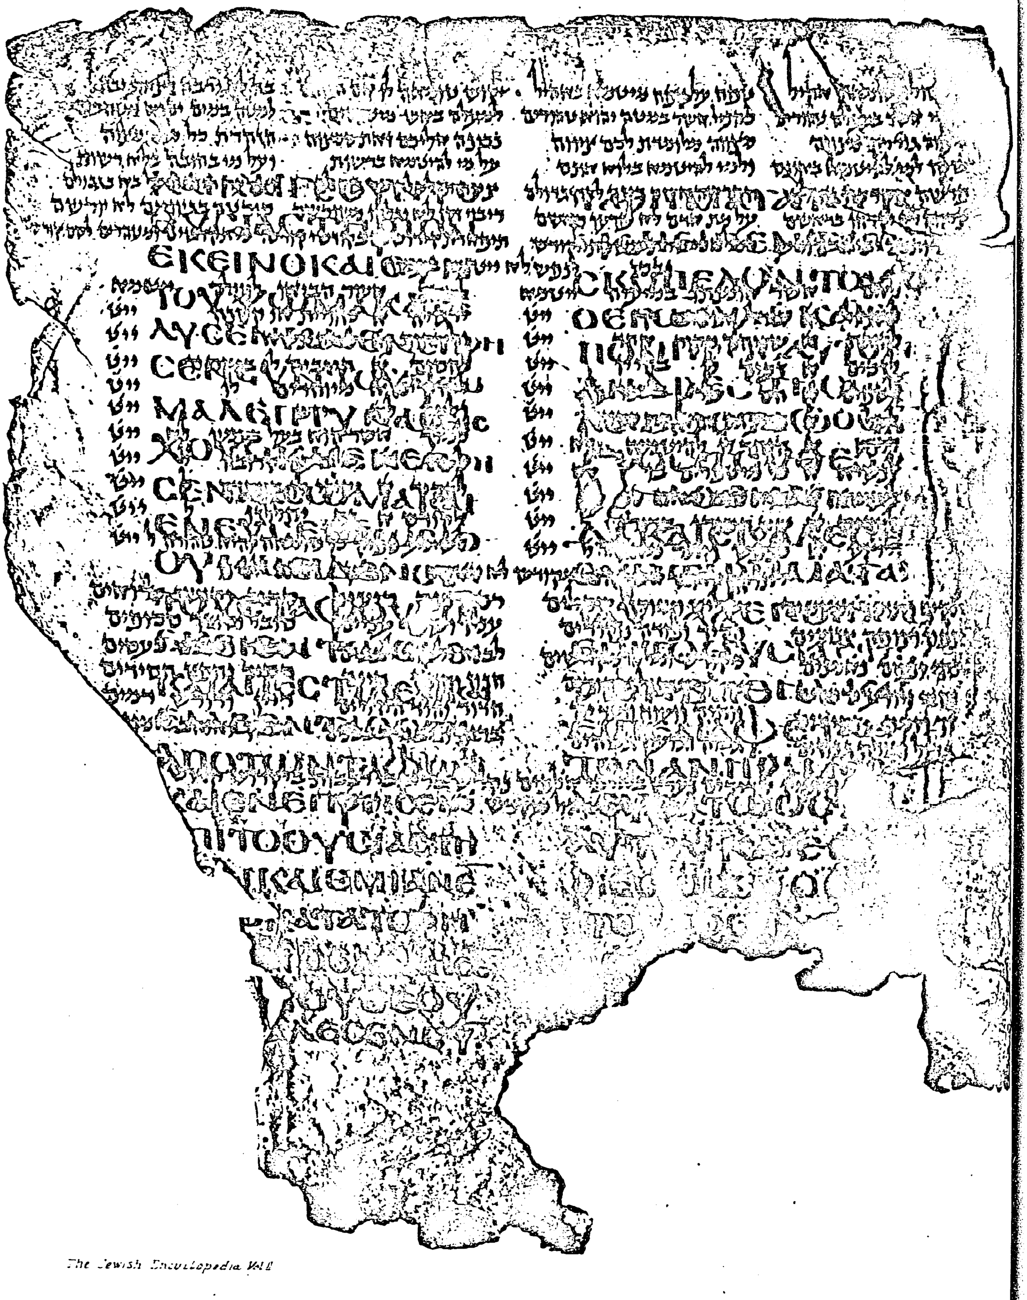
The main feature of Aquila's version is its excessive literalness. His chief aim was to render the Hebrew into Greek word for word, without any regard for Greek idiom. The same Greek word is regularly used for the same Hebrew, however incongruous the effect. Thus *καὶ* stands for ו in all its varied significations; and, as *καίγε* is used for גם, wherever וגם (*i.e.*, "and also") occurs, Aquila has *καὶ καίγε*. Similarly the preposition את means "with," and is translated by Aquila *σύν*.

Character of Aquila's Version.

Now את is also used before the object of the verb when the object is defined, an idiom rendered by Aquila, where possible, by the Greek article, so that *ὃς ἐξήμαρτεν τὸν Ἰσραήλ* stands for אשר החטיא את ישראל. But this can not be done where the Hebrew article and את stand together, or where the object is a detached pronoun. Aquila follows here Nahum of Gimzo and R. Akiba, who insisted on the importance of particles, especially את. In such cases he translates this את also by *σύν*; *e.g.*, *καὶ ἀνόητος οὐ συνήσει σὺν ταύτην* corresponds to וכסיל לא יבן את זאת (Ps. xcii. 7). Apparently *σὺν* is here meant for an adverb having the force of "therewith," or some such meaning, as it does not affect the case of the word that follows. Thus Aquila has *Ἐν κεφαλαίῳ ἔκτισεν ὁ θεὸς σὺν τὸν οὐρανὸν καὶ σὺν τὴν γῆν* (Gen. i. 1), but after a verb that naturally governs the dative one finds *καὶ ἐνετείλατο ὁ βασιλεὺς σὺν παντὶ τῷ λαῷ* (II Kings xxiii. 21). Other characteristic exam-

---

* The Milan fragments, discovered by Dr. Mercati, are described by Ceriani in "Rendiconti del Real Istituto Lombardo di Scienze e Letteratura," 1896, series ii., vol. xxix. The Cairo fragment (now at Cambridge) was edited by Charles Taylor in 1901.



The Jewish Encyclopedia Vol II

FRAGMENT OF AQUILA'S GREEK TRANSLATION OF II KINGS (xxiii 15-19).

A Palimpsest with Hebrew written over the Greek, the Tetragrammaton is written in archaic Hebrew script

By permission of the Cambridge University Press ples of Aquila's methods are *τῷ λέγειν* for לאמר, and *εἰς πρόσωπα* for לפנים (Ps. cii. 26).*

The general effect of this pedantry may be seen from the following specimen (II Kings xxiii. 25):

Masoretic Text.	*Aquila.*
וכמהו לא היה לפניו מלך	*καὶ ὅμοιος αὐτῷ οὐκ ἐγενήθη εἰς πρόσωπον αὐτοῦ βασιλεὺς*
אשר שב אל יהוה בכל לבבו	*ὃς ἐπέστρεψεν πρὸς* 𐤄𐤅𐤄𐤉 *ἐν πάσῃ καρδίᾳ αὐτοῦ*
ובכל נפשו ובכל מאדו	*καὶ ἐν πάσῃ ψυχῇ αὐτοῦ καὶ ἐν πάσῃ σφοδρότητι*† *αὐτοῦ*
ככל תורת משה—	*κατὰ πάντα νόμον Μωσῆ*
ואחריו לא קם כמהו :	*καὶ μετ' αὐτὸν οὐκ ἀνέστη ὅμοιος αὐτῷ.*

In both the Cairo manuscripts the Tetragrammaton is not translated, but is transcribed in letters similar to those used in the Siloam inscription and on Jewish coins.‡ This quite unexpected feature is in full accord with the express statement of Origen, who says in his comments on Ps. ii. 2 (Benedictine ed; ii. 539 = Lommatzsch, xi. 36): "There is a certain word of four letters which is not pronounced by them [the Jews], which also was written on the gold breastplate of the high priest; but it is read as *Adonai*, not as it is really written in the four letters, while among Greeks it is pronounced *Κύριος* [the Lord]. And in the more accurate copies this Name stands written in Hebrew characters—not the modern Hebrew, but the ancient." There can be little doubt that by "the more accurate copies" Origen here refers to manuscripts of Aquila's translation.

Literal Transmitter.

It would be a mistake to put down the harshness of Aquila's translation to ignorance of Greek. He resorted to mere transliteration less than any other ancient translator, and had command of a large Greek vocabulary. Field (introduction, xxiii. *et seq.*) has collected a number of expressions that show Aquila's acquaintance with Homer and Herodotus. It was no doubt from classical Greek literature that Aquila borrowed the use of the enclitic *δε* to express the toneless ה of locality; for instance, *νότονδε* for הנגבה (Gen. xii. 9), *Ὠφειρδε* for אופירה (I Kings xxii. 49). The depth of his Hebrew knowledge is more open to question, if judged by modern standards. But it is the special merit of Aquila's renderings that they represent with great fidelity the state of Hebrew learning in his own day. "Aquila in a sense was not the sole and independent author of his version, its uncompromising literalism being the necessary outcome of his Jewish teacher's system of exegesis" (C. Taylor, in Burkitt's "Fragments of Aquila," p. vi.).

Illustrations of Aquila's dependence on Jewish tradition are to be found in the Ḳeri readings adopted by him; *e.g.*, בא גד for בגד, Gen. xxx. 11, and the euphemism in Isa. xxxvi. 12. The scrupulous exactness with which Aquila translates the particles is to be explained by his having been a disciple of Akiba, whose methods of exegesis was to lay great stress upon the meanings hidden in the lesser parts of speech. Instances are *ὡς κατέναντι αὐτοῦ* for כנגדו, Gen. ii. 18; and *ἀπὸ ἐγκάτων σου* for בקרבך, Deut. iv. 3. This scrupulosity may be contrasted with the Targumic freedom of Aquila's *ἠπληστεύσατό μοι* for אכלני, Jer. li. 34, where the metaphor that Nebuchadnezzar had "eaten" Jerusalem has been turned into prose.

Aquila as a Witness: 1. *Consonantal Text.*—The extreme literalness of Aquila's methods enables the reader to restore with confidence the Hebrew from which he translated. There are a few instances where he preserves old readings found also in the Septuagint; *e.g.*, אדום for ארם (Symmachus and Masoretic Text) in Ezek. xxvii. 16, and הוי for היו (Masoretic Text) in Zeph. iii. 18. But as a rule he supports the ordinary Masoretic Text; *e.g.*, *ἡ προσβόλωσις στόματα* in I Sam. xiii. 21 implies הפצירה פים as in the Masoretic Text, and *κατεφέρετο καὶ ἅρμα καὶ ἵππος* in Ps. lxxvi. 7 agrees with the Masoretic Text against the better reading נרדמו רֹכְבֵי סוס attested by the Septuagint. The numeration of the Psalms agrees with the Hebrew against the Greek; in this article, therefore, Aquila is uniformly quoted by the Hebrew reckonings.

Vocalization and Interpretation.

2. Aquila represents a period in Jewish exegesis anterior to the Masoretic vocalization. Here priority in time does not invariably mean superiority of reading: where it is a question of knowledge of Hebrew rather than of purity of transmitted text, the later scholars often do better than their predecessors. Thus Aquila can hardly have been right in connecting יתקלס in Hab. i. 10 with *κλέος*, or in taking וירץ in II Kings xxiii. 12 as the Hiphil of רוץ ("to run"). Aquila also has an unfortunate habit of dividing rare Hebrew words into their real or imagined component parts; *e.g.*, in Isa. xviii. 1 he renders צלצל ("a rustling") by *σκιὰ σκιά*, and in I Sam. vi. 8 for בארגז of the Masoretic Text he has *ἐν ὕφει κουρᾶς*, as if he had read בארג גז. On the other hand, there is much to be said for his division of לשמצה (Ex. xxxii. 25) into two words. לשם צוא ("for a name of filth") is read or implied by the Targum, by the Peshiṭta, and by Symmachus, as well as by Aquila (compare Isa. xxviii. 8, 13; xxx. 22). The Samaritan has לשמצו. In Deut. xxxiii. 2 Aquila has *πῦρ δόγμα* for אש דת.

It is interesting to note that Aquila does not agree with the Masoretic punctuation in pointing the names of heathen gods (*e.g.*, סכות and כיון, Amos v. 26) with the vowels of שִׁקּוּץ ("abomination").

Aquila's renderings of the Hebrew tenses are often most inadequate. It is only on grounds of imperfect knowledge that the aorists can be defended in passages like *καὶ ἐπιβλυσμὸς ἀνέβη ἐκ τῆς γῆς καὶ ἐπότισε πᾶν τὸ πρόσωπον τῆς χθονός* for ואד יעלה מן הארץ והשקה את כל פני האדמה in Gen. ii. 6. Examples of pedantic mistranslation such as this suggest that Old Hebrew was very imperfectly understood when Akiba revived philological study by his allegorizing exegesis of the particles.

The transliterations of Hebrew words into Greek letters are of some interest as showing the pronunciation current in Palestine about the middle of the second century. The most noticeable points are the complete disappearance of all four gutturals and the

---

* It will be noted that Aquila uses the Greek article somewhat freely to express ל in cases where *εἰς* can not stand.

† A derivative of *σφόδρα*, "much," the regular rendering of the adverb מאד.

‡ See plate, left-hand column, three lines from bottom. It will be noticed that the same corrupt form is used both for *yod* and for *waw*, just as in the Hexaplar form ΠΙΠΙ, *i.e.*, יהוה, written in the *square* character.

Transliterations.

representation of צ (in the Cairo fragment of the Psalms) by τ; *e.g.*, τσιών for ציון. This feature reappears in the names of the Hebrew letters attached to the Book of Lamentations by the original scribe of "Cod. Vaticanus (B)." It may be conjectured that the scribe of the Vatican MS. took them through the "Hexapla" from Aquila's version. In some points Aquila agrees rather with the New Testament than with the older forms found in the Septuagint; *e.g.*, for בית אל he has Βηθήλ, not Βαιθήλ (compare Βηθανία in the New Testament). In Ezek. xxx. 17, where the Septuagint has Ἡλίου πόλεως, Aquila has Ὢν for אָוֶן, but Symmachus and Theodotion have Αὐν.

Aquila's translation occupied one of the columns of Origen's "Hexapla," and so was accessible to Christian scholars. Very considerable use of it was made by Jerome in preparing the Latin version now known as the Vulgate, though (as we might expect) the more pedantic features are dropped in borrowing. Thus in Ex. xxxii. 25 Jerome's *propter ignominiam sordis* comes from Aquila's εἰς ὄνομα ῥύπου (לשמצה), and for "Selah" in the Psalms his *semper* follows Aquila's ἀεί.

Original Text of the Septuagint.

More important for modern scholars is the use made of Aquila's version in Origen's revision of the Septuagint. The literary sources of the Latin Vulgate are merely a point of Biblical archeology, but the recovery of the original text of the Septuagint is the great practical task which now lies before the textual critic of the Old Testament. Recent investigation has made it clear that Origen's efforts to emend the Greek from the Hebrew were only too successful, and that every known text and recension of the Septuagint except the scanty fragments of the Old Latin have been influenced by the Hexaplar revision. One must learn how to detect Origen's hand and to collect and restore the original readings, before the Septuagint is in a fit state to be critically used in emending the Hebrew. The discussion of this subject belongs rather to the criticism of the "Hexapla" than to a separate article on Aquila. It will suffice here to point out that Aquila's version is one of the three sources by the aid of which the current texts of the Septuagint have been irregularly revised into conformity with a Hebrew text like that of our printed Bibles. For the association of the Targum of the Pentateuch with his name see ONKELOS. See also SEPTUAGINT.

T. F. C. B.

——**In Rabbinical Literature:** "Aquila the Proselyte" (עקילס הגר) and his work are familiar to the Talmudic-Midrashic literature. While "the Seventy" and their production are almost completely ignored by rabbinical sources, Aquila is a favorite personage in Jewish tradition and legend. As historical, the following may be considered. "Aquila the Proselyte translated the Torah (that is, the whole of Scripture; compare Blau, "Zur Einleitung in die Heilige Schrift," pp. 16, 17) in the presence of R. Eliezer and R. Joshua, who praised him and said, in the words of Ps. xlv. 3 [A. V. 2], 'Thou art fairer than the children of men: grace is poured into thy lips: therefore God hath blessed thee for ever.'" This contains a play upon the Hebrew word "Yafyafita" (Thou art fairer) and the common designation of Greek as "the language of Japhet" (Yer. Meg. i. 71*c*). In another place similar mention is made that Aquila announced his translation of the word נחרפת in Lev. xix. 20 in the presence of R. Akiba (Yer. Ḳid. i. 59*a*). The parallel passage in the Babylonian Talmud to the first-cited passage (Meg. 3*a*) shows that by "translated in the presence of" is to be understood "under the guidance of"; consequently, Eliezer, Joshua, and Akiba must be regarded as the three authorities by whom Aquila governed himself. This agrees with what Jerome says (in his commentary on Isa. viii. 11); viz., that, according to Jewish tradition, Akiba was Aquila's teacher—a statement which was also borne out by the fact that Aquila carefully rendered the particle את every time by the Greek σύν, the hermeneutical system first closely carried out by Akiba, although not original with him (B. Ḳ. 41*b*). This would place Aquila's period at about 100-130, when the three tannaim in question flourished.

This accords with the date which Epiphanius ("De Ponderibus et Mensuris," chap. xiii.-xvi.; ed. Migne, ii. 259-264) gives when he places the composition of Aquila's translation in the twelfth year of Hadrian (129). A certain Aquila of Pontus is mentioned in a tannaite source (Sifra, Behar I. 1 [ed. Weiss, 106*b*; ed. Warsaw, 102*a*]). And, seeing that Irenæus (*l.c.* iii. 21) and Epiphanius (*l.c.*) agree that Aquila came from that place, it is quite probable that the reference is to the celebrated Aquila, although the usual epithet, "the Proselyte," is missing. Aquila of Pontus is mentioned three times in the New Testament (Acts xviii. 2; Rom. xvi. 3; II Tim. iv. 19), which is only a mere coincidence, as the name "Aquila" was no doubt quite common among the Jews, and a haggadist bearing it is mentioned in Gen. R. i. 12. Zunz, however, identifies the latter with the Bible translator. Friedmann's suggestion that in the Sifra passage a place in the Lebanon called "Pontus" is intended has been completely refuted by Rosenthal ("Monatsschrift," xli. 93).

Relation to Onkelos.

A more difficult question to answer is the relationship of Aquila to the "proselyte Onkelos," of whom the Babylonian Talmud and the Tosefta have much to relate. There is, of course, no doubt that these names have been repeatedly interchanged. The large majority of modern scholars consider the appellation "Targum of Onkelos," as applied to the Targum of the Pentateuch, as a confusion (originating among the Babylonians) of the current Aramaic version (attributed by them to Onkelos) with the Greek one of Aquila. But it will not do simply to transfer everything that is narrated of Onkelos to Aquila, seeing that in the Tosefta (see index to Zuckermandel's edition) mention is made of the relation of Onkelos to Gamaliel, who (if Gamaliel II. is meant) died shortly after the accession of Hadrian, while it is particularly with the relations between the pious proselyte and the emperor Hadrian that the Haggadah delights to deal. It is said that the emperor once asked the former to prove that the world depends, as the Jews maintain, upon spirit. In demonstration Aquila caused several camels to be brought and made them kneel and rise repeatedly before the emperor. He then had them choked, when, of course, they could not rise. "How can they rise?" the emperor asked. "They are choked." "But they only need a little air, a little spirit," was Aquila's reply, proving that life is not material (Yer. Hag. ii. V. beginning 77*a*; Tan., Bereshit, ed. Vienna, 3*b*).

Concerning Aquila's conversion to Judaism, legend has the following to say: Aquila was the son of Hadrian's sister. Always strongly inclined to Judaism, he yet feared to embrace it openly in the emperor's proximity. He, therefore, obtained permission from his uncle to undertake commercial journeys abroad, not so much for the sake of profit as in order to see men and countries, receiving from him the parting advice to invest in anything the value of which was temporarily depreciated, as in all probability it would rise again. Aquila went to Palestine, and devoted himself so strenuously to the study of the Torah that both R. Eliezer and R. Joshua noticed his worn appearance, and were surprised at the evident earnestness of the questions he put to them concerning Jewish law. On returning to Hadrian he confessed his zealous study of Israel's Torah and his adoption of the faith, surprising the emperor, however, by stating that this step had been taken upon his, the emperor's, advice. "For," said he, "I have found nothing so deeply neglected and held in such depreciation as the Law and Israel; but both, no doubt, will rise again as Isaiah has predicted" (Isa. xlix. 7, "Kings shall see and arise, princes also shall worship"). Upon Hadrian's inquiry why he embraced Judaism, Aquila replied that he desired very much to learn the Torah, and that he could not do this without entering the Abrahamic covenant: just as no soldier could draw his pay without bearing arms, no one could study the Torah thoroughly without obeying the Jewish laws (Tan., Mishpaṭim, V. ed. Buber, with a few variations, ii. 81, 82; Ex. R. xxx. 12). The last point of this legend is no doubt directed against Christianity, which acknowledges the Law, but refuses obedience to it, and is of all the more interest if taken in connection with Christian legends concerning Aquila. Epiphanius, for instance, relates that Aquila was by birth a Greek from Sinope in Pontus, and a relation (*πενθεριδής*) of Hadrian, who sent him, forty-seven years after the destruction of the Temple (that is 117, the year of Hadrian's accession) to Jerusalem to superintend the rebuilding of that city under the name of "Ælia Capitolina," where he became first a Christian and then a Jew (see AQUILA).

A reflection of the alleged adoption of Christianity by Aquila, as related by Epiphanius, may be discerned in the following legend of the Babylonian Talmud in reference to the proselyte Onkelos, nephew of Titus on his sister's side. According to this, Onkelos called up the shade of his uncle, then that of the prophet Balaam, and asked their counsel as to whether he should become a Jew. The former advised against it, as the Jews had so many laws and ceremonies; the latter, with characteristic spitefulness, replied in the words of Scripture, "Thou shalt not seek their peace nor their prosperity" (Deut. xxiii. 7 [A. V. 6]). He then conjured up the founder of the Church, who replied, "Seek their peace, seek not their harm; he who assails them touches the apple of God's eye." These words induced him to become a Jew (Giṭ. 56*b*, 57*a*). The founder of the Church (according to the Jewish legend) and the mother-church in Jerusalem (according to the Christian version) were the means of Aquila's becoming a Jew.

The traces of the legend concerning Flavius Clemens, current alike among Jews and Christians, seem to have exerted some influence upon this Onkelos-Aquila tradition; but Lagarde goes so far as to explain Sinope in Pontus as being "Sinuessa in Pontia," where Dimitilla, the wife of Flavius Clemens, lived in exile. Irenæus, who wrote before 177, states that Pontus was Aquila's home. It is very questionable whether the account of Aquila in the Clementine writings ("Recognitiones," vii. 32, 33)—an imperial prince who first embraced Judaism, and then, after all manner of vagaries, Christianity—was merely a Christian form of the Aquila legend, although Lagarde supports the assumption. The following Midrash deserves notice: Aquila is said to have asked R. Eliezer why, if circumcision were so important, it had not been included in the Ten Commandments (Pesiḳ. R. xxiii. 116*b* *et seq.*; Tan., Lek Leka, end; ed. Vienna, 20*b*, reads quite erroneously "Agrippa" in place of "Aquila"), a question frequently encountered in Christian polemic literature. That Aquila's conversion to Judaism was a gradual one appears from the question he addressed to Rabbi Eliezer: "Is the whole reward of a proselyte to consist in receiving food and raiment?" (see Deut. x. 18). The latter angrily answered that what had been sufficient for the patriarch Jacob (Gen. xxviii. 20) should be sufficient for Aquila. When Aquila put the same question to Rabbi Joshua, the latter reassured him by expounding "food and raiment" as meaning metaphorically "Torah and ṭallit." Had not Joshua been so gentle, the Midrash adds, Aquila would have forsaken Judaism (Eccl. R. to vii. 8; Gen. R. lxx. 5; Ex. R. xix. 4, abbreviated). The purport of this legend is to show that at the time Aquila had not been firmly convinced.

His Work.

His work is less familiar in Rabbinical Literature than his personality; for not more than a dozen quotations from his translation are mentioned. The following are interesting evidences of its general character. He translates שדי, the name of God, by *ἄξιος καὶ ἱκανός*, "worthy and competent," a haggadic etymology (see Gen. R. xlvi. 3; compare Hag. 12*a*). The Hebrew word הדר in Lev. xxiii. 40 he translates by *ὕδωρ* ("water"), thus securing a resemblance to the Hebrew original, and at the same time supporting the Halakah (Yer. Sukkah iii. 53*d*; for parallel passages, see Friedmann, p. 45; Krauss, p. 153). A haggadic interpretation, it seems, is at the bottom of his translation of רקמה in Ezek. xvi. 10 by אפקלטורין .פליקטא, probably corrupted from *φυλακτήριον* (phylacteries).

The Midrash expounds the words ואלבישך רקמה as meaning the heavenly adornments which Israel received from the angels at Mount Sinai, and which were designed as amulets (*φυλακτήριον*) against all evils (Pesiḳ. R. xxx. 154*a*, ed. Friedmann, who gives many parallel passages).

Aquila's theology is illustrated by his translation of פלמוני (Dan. viii. 13) as "the inward spirit," agreeing herewith partially with Polychronius, who also takes the word for the name of an angel (Theodoretus on the passage). But that this spirit meant Adam, as the Midrash further interprets Aquila (Gen. R. xxi. 1; rightly explained by Jastrow, "Dictionary," *s.v.* פנימי), is highly improbable; the reference is rather to Michael or Meṭaṭron, who stands in God's presence (compare Tan., ed. Buber, i. 17), like the later Hebrew שר הפנים.

Whether Greek words found in Talmud and Midrash, other than those specifically stated to have been introduced by Aquila, really originated with him, as Krauss maintains, is more than doubtful. In Palestine there was little demand for a Greek Bible, in Babylonia absolutely none at all. Therefore all Greek expressions found in Jewish writings must have emanated from popular usage and not from literary sources. See Flavius Clemens; Clementine Writings; Onkelos; Targum.

L. G.

AQUILINO, RAFFAELE: Italian apostate who renounced his religion in 1545—eight years before the public burning of the Talmud in Rome (1553)—and who was one of those that denounced Hebrew books, as Steinschneider deduces from a dedicatory passage in Aquilino's "Trattato Pio." The historian Joseph ha-Kohen, in his "'Emeḳ ha-Baka" (transl. Wiener, p. 89), says that there were three of these apostates: Ananel di Foligno, Joseph Moro, and Solomon Romano. Joseph Moro was called Filippo, and Solomon Romano took the name of Giovanni Battista Romano Eliano. It may be conjectured that Aquilino was identical with the most wicked of the three, Ananel di Foligno. There has been ascribed to Aquilino a work (referred to above) entitled "Trattato Pio, nel quale si contengono Cinque Articoli pertinenti alla Fede Christiana, contro l'Hebraica Ostinazione, estratti dalle Sacrosante Antiche Scritture." This was twice printed at Pesaro—in 1571 and in 1581.

Aquilino seems also to have written a second anti-Jewish work, called "Magen David" (MS. Urbin. No. 1138 in the Vatican Library), which some have supposed to be identical with the book of Angelo Gabriele Anguisciola, entitled "Della Hebraica Medaglia detta Maghen David et Abraham," Pesaro, 1621. By a decree of the Roman Catholic Church, dated March 16, 1621, this book was placed in the Index. Steinschneider doubts the identity of the two works.

G. G. J.

AQUIN (called also **Aquinas** and **Aquino**), **LOUIS-HENRI D':** Writer and translator of the seventeenth century; son of Philippe d'Aquin. He was converted to Christianity at Aquino in the kingdom of Naples. He left many works relating to the Hebrew language and literature, among which were a translation into Latin of the commentary on the Book of Esther by R. Solomon ben Isaac, with extracts relating thereto from the Talmud and Yalḳuṭ (Paris, 1622), and a Latin translation of the first four chapters of Levi ben Gerson's commentary on the Book of Job (Paris, 1623).

AQUIN, PHILIPPE D': Hebraist; born at Carpentras about 1578; died at Paris in 1650. Early in life he left his native town and went to Aquino, where he became converted to Christianity and changed his name Mordecai or Mardochée to Philippe d'Aquin. In 1610 he went to Paris, and was appointed by Louis XIII. professor of the Hebrew language. He is mentioned among the accusers in the proceedings for "the crime of Judaism," instituted in 1617 against Concini, Marquis d'Ancre, and his wife Leonora Galigai, in whose household he had occupied some subordinate position (Léon Kahn, "Les Juifs à Paris," p. 40). The following is a list of his works: (1) "Primigenæ Voces, seu Radices Breves Linguæ Sanctæ" (Paris, 1620). (2) "Pirḳe Aboth, Sententiæ Rabbinorum, Hebraice cum Latina Versione" (Paris, 1620); a Hebrew-Italian edition, under the title "Sentenze: Parabole di Rabbini. Tradotti da Philippo Daquin," appeared in the same year in Paris (see Steinschneider, "Monatsschrift," lxiii. 417), and was reprinted in Paris in 1629. (3) "Dissertation du Tabernacle et du Camp des Israélites" (Paris, 1623; 2d ed., 1624). (4) "Interpretatio Arboris Cabbalisticæ" (Paris, 1625). (5) "Beḥinat 'Olam (L'Examen du Monde)" of Yedaiah Bedersi, Hebrew and French (Paris, 1629). (6) "Ma'arik ha-Ma'areket, Dictionarium Hebraicum, Chaldaicum, Talmudico-Rabbinicum" (Paris, 1629). (7) "Ḳina, Lacrimæ in Obitum Cardinalis de Berulli," Hebrew and Latin (Paris, 1629). (8) "י"ג מדות, Veterum Rabbinorum in exponendo Pentateucho Modi tredecim" (Paris, 1620).

Bibliography: Zunz, *Z. G.* p. 448; Léon Kahn, as above; Steinschneider, *Cat. Bodl.* col. 739; Idem, *Bibliographisches Handbuch*, No. 129.

G. S. K.

AQUINAS, THOMAS: Most eminent of the Christian theological philosophers of the Middle Ages; born 1227 at Aquino, kingdom of Naples; died 1274. Like his teacher Albertus Magnus, Thomas made philosophy his favorite study, and sought to harmonize it with religion. "All knowledge of principles, naturally possessed by us," he said, "comes from God, since God is the author of our nature. The divine wisdom possesses these principles in itself; therefore all that contradicts them is in contradiction to the divine wisdom and can not proceed from God" ("Contra Gentiles," i. 7).

Although, as a Dominican friar, Aquinas was not animated by kindly feelings toward the Jews (see Guttmann, "Das Verhältniss des Thomas von Aquino zum Judenthum und zur Jüdischen Literatur," pp. 3 *et seq.*; Geyraud, "L'Antisémitisme et St. Thomas d'Aquin," pp. 40 *et seq.*), he did not disdain to draw upon Jewish philosophical sources. His main work, "Summa Theologiæ," betrays a profound knowledge not only of the writings of Avicebron (Ibn Gabirol), whose name he mentions, but of all Jewish philosophical works then existing. His theodicy is modeled after that of the Jewish philosophers, and his arguments can easily be referred to Jewish sources. Thus he gives five proofs of the existence of God, three of which are directly taken from Jewish philosophers. The first runs as follows: "It is clear that there are in this world things which are moved. Now, every object which is moved receives that movement from another. If the motor is itself moved, there must be another motor moving it, and after that yet another, and so on. But it is impossible to go on indefinitely, for then there would be no first motor at all, and consequently no movement" ("Contra Gentiles," ii. 33). This proof is evidently taken from Maimonides, whose seventeenth proposition reads: "All that which is moved has necessarily a motor" ("Moreh," ii. 16).

Proofs of God's Existence.

Second proof: "We discern in all sensible things a certain chain of efficient causes. We find, however, nothing which is its own efficient cause, for that cause would then be anterior to itself. On the other side, it is impossible to ascend from cause to cause indefinitely in the series of efficient causes. . . . There must therefore exist one self-sufficient, efficient cause, and that is God" ("Contra Gent." i. 22). To this proof two Jewish sources seem to have contributed: Baḥya's "Duties of the Heart" (chapter on "Unity," 5) and Maimonides' "Moreh" (6th proposition, "Moreh," ii. 16).

The third proof runs: "We find in nature things which may be and may not be, since there are some who are born and others who die; they consequently can exist or not exist. But it is impossible that such things should live for ever, for there is nothing which may be as well as not be at one time. Thus if all beings need not have existed, there must have been a time in which nothing existed. But, in that case, nothing would exist now; for that which does not exist can not receive life but from one who exists; . . . there must therefore be in nature a necessarily existent being." This proof is based on Avicenna's doctrine of a necessary and possible being, and is expounded by Maimonides, from whom it is probably taken (see "Moreh," ii. 19).

In order to demonstrate God's creative power, Thomas says: "If a being participates, to a certain degree, in an 'accident,' this accidental property must have been communicated to it by a cause which possesses it essentially. Thus iron becomes incandescent by the action of fire. Now, God is His own power which subsists by itself. The being which subsists by itself is necessarily one" ("Summa Theol." i. 44, art. 1). The idea is expounded more clearly by Baḥya in his "Duties of the Heart." He says: "It is evident that all which exists in a thing as an accident must be received by the thing which has the accidental property only from one which already possesses it essentially, just as we see that the heat of the boiling water is communicated to it by the fire, of which this heat is an essential. . . . And in the same way we may prove the unity of God. Since the unity which occurs in every creature is accidental (not essential), as we have demonstrated, it must be derived from the essence of the efficient cause of all creatures" ("Duties of the Heart," on "Unity," 9).

Thomas pronounces himself energetically against the hypothesis of the eternity of the world. But as this theory is attributed to Aristotle, he seeks to demonstrate that the latter did not express himself categorically on this subject. "The argument," said he, "which Aristotle presents to support this thesis is not properly called a demonstration, but is only a reply to the theories of those ancients who supposed that this world had a beginning and who gave only impossible proofs. There are three reasons for believing that Aristotle himself attached only a relative value to this reasoning. . . ." ("Summa Theologiæ," i. 45, art. 1). In this Thomas copies word for word Maimonides' "Moreh," where those reasons are given (i. 2, 15).

Thomas, as a Christian, thinks it necessary to admit certain attributes which Maimonides and other Jewish peripatetics reject; but in all his reasoning on this subject the potent influence of Jewish theological philosophy predominates. His theories on Providence, God's omniscience, and the angels can be referred to Maimonides, and even his so-called original principle of individuation can easily be found in Jewish theological philosophy.

Aquinas' doctrines, because of their close relationship with those of Jewish philosophy, found great favor among Jews. Judah Romano (born 1286) translated Aquinas' ideas from Latin into Hebrew under the title "Ma'amar ha-Mamschalim," together with other small treatises extracted from the "Contra Gentiles" ("Neged ha-Umot"). Eli Hobillo (1470) translated, without Hebrew title, the "Quæstiones Disputatæ," "Quæstio de Anima," his "De Animæ Facultatibus," under the title "Ma'amar be-Koḥot ha-Nefesh," (edited by Jellinek); his "De Universalibus" as "Be-Inyan ha-Kolel"; "Shaalot Ma'amar beNimẓa we-biMehut." Abraham Nehemiah b. Joseph (1490) translated Thomas' "Commentarii in Metaphysicam." According to Moses Almosnino, Isaac Abravanel desired to translate the "Quæstio de Spiritualibus Creaturis." Abravanel indeed seems to have been well acquainted with the philosophy of Thomas Aquinas, whom he mentions in his work "Mif'alot Elohim" (vi. 3). The physician Jacob Zahalen (d. 1693) translated some extracts from the "Summa Theologiæ Contra Gentiles."

AR, or **AR MOAB**: Occurs as follows in the Old Testament: Num. xxi. 15, 28; Deut. ii. 9, 18, 29; Isa. xv. 1. It is generally identified with the Hebrew "*'ir*" (city), so that "Ar Moab" would be "city of Moab," a supposed ancient capital of the Moabites. But even if this interpretation be admissible in certain of the passages cited above, it would not be very appropriate in Deut. ii. 9, which reads: "Distress not the Moabites, for I will not give thee of their land for a possession, because I have given Ar to the children of Lot for a possession"; or again, verse 18, "Thou art to pass over through Ar, the coast (or the border) of Moab"; or, finally, verse 29: "The children of Esau which dwell in Seir, and the Moabites which dwell in Ar." It is obvious that "Ar" here must stand either for the land of Moab, or for the principal part of it: if, therefore, "Ar" were a city, it must here be used as representing the country. It would be simpler, however, to regard "Ar" as the actual name of a country, and this is appropriate also in Isa. xv. 1, 2; Num. xxi. 15, 28. Note also that the Septuagint translates Isa. xv. 1, "ἡ Μωαβῖτις." It is perhaps from this country that the capital of Moab (Rabbat Moab) derives the name of Areopolis ("Onomastica Sacra," edited by Lagarde, p. 277).

ARABAH: The Hebrew word Arabah (ערבה) denotes desert, steppe. With the article, it refers especially to that extensive depression the center of which is marked by the Dead Sea. In some passages it is applied to the southern portion of this depression, namely, that between the Dead Sea and the Gulf of Akabah (Deut. i. 1, ii. 8); in others to the northern part (Deut. iii. 17; Josh. xi. 2, 16; II Sam. iv. 7; II Kings xxv. 4; Ezek. xlvii. 8); again, to the district east of the Jordan (Josh. xii. 1, 3), and also to the west (II Sam. ii. 29). The breadth varies from 3 to 14 miles. The whole formation of this depression is one of the remarkable phenomena of the earth's surface. At the northern end, north of the Sea of Galilee, the ground rises 500 feet above sea-level, then falls, within a distance of 118 miles, to 2,600 feet below it (the greatest depth of the Dead Sea bed); then rises south of that sea to an altitude of 800 feet, and falls away gradually to the Gulf of Akabah. On both banks of the Jordan and in the neighborhood of springs (as, for instance, near Jericho) the Arabah is covered with a luxuriant vegetation, otherwise it consists of blinding white desert without a leaf. South of the Dead Sea, the Arabah is covered with sand, gravel, and boulders, and is traversed by ridges of sandhills. The intense heat common to the whole depression, and which gives to the vegetation its tropical character, reaches in this section a degree that makes sojourn almost impossible. The old name El-Arabah is still applied to the southern portion between the Gulf of Akabah and the watershed south of the Dead Sea; the northern portion is now called El-Ghor.

ARABAH. See Beth-Arabah.

ARABARCH, THE. See Alabarch.

ARABIA: Peninsula lying between the mainlands of Africa and Asia. It is separated from Africa on the south by the Red Sea and on the north by the Sinaitic peninsula and the strip of land which in modern times has been cut through for the Suez canal. On the south and southeast its shores are washed by the Indian Ocean, which has been constantly receding and allowing more of the land to emerge. On the east it is separated from Persia by the Persian Gulf, and on the north is bounded by the Syrian desert, which is but a continuation of the great desert lying in the heart of Arabia itself. This desert is relieved by a number of oases, on which grow palms and tamarisks in abundance, providing food and shade for the Bedouins. Arabia has no rivers, but is artificially irrigated. The land outside the desert is very fertile, especially on the western side; it is known on this account as Arabia Felix. Arabia has an average width of 600 miles and a length of about 1,200. Egress from the country is possible by the two land routes to the east and west; the eastern road leads into Babylonia and thence northward into Syria, the western into Egypt and thence southward, or directly north along the coast plain, which at some places furnishes an entrance into the interior of Palestine.

In Biblical Passages.

Conflicts with Arabs.

——**Biblical Data:** Arabia is mentioned in the Bible in the following passages: Ezek. xxvii. 21; Jer. xxv. 24*a*; Isa. xiii. 20, xxi. 13; Jer. iii. 2; Neh. ii. 19, iv. 1, vi. 1; II Chron. ix. 14, xvii. 11, xxi. 16, xxii. 1, xxvi. 7. To these might be added the doubtful passages: Jer. l. 37; I Kings x. 15; Ezek. xxx. 5; Jer. xxv. 24*b*. An examination of these, however, proves that the terms "Arabia" and "Arabians" are used in a number of senses. (1) In Jer. iii. 2 ("In the ways hast thou sat for them, as the Arabian in the wilderness") and in Isa. xiii. 20 ("Neither shall the Arabian pitch his tent there") reference is made to the wandering marauding Bedouin who looks for opportunities to plunder, or stops here and there to eat the fat of the land. In neither case is this "Arabian," strictly speaking, an inhabitant of Arabia. The passage in Isaiah presupposes frequent incursions into Babylonia of the tent-dwelling Bedouins referred to in the Assyrian inscriptions. Sometimes, however, the Bedouins traveled in companies large enough to do serious injury. To such is reference made in II Chron. xvii. 11, of whom Jehoshaphat exacts tribute, which they pay in rams and goats—the gold and silver of a nomadic people. The home of these marauding bands is vaguely indicated by the phrase, "which were near the Ethiopians" (II Chron. xxi. 16). They appear again in Jehoram's reign, when, owing to the weakness of the kingdom, they are able to make an incursion and, after plundering the land, escape with their booty. In Uzziah's reign they make a similar attempt, but with no success (II Chron. xxvi. 7). It would seem that these attacks were directed from the west, because the Arabians are named with the Philistines.

Trade with Arabia.

(2) In the strict sense of the word, Arabia is mentioned in Jer. xxv. 24*a*; but the addition, "All the kings of mingled multitude" ("Ereb"), to the phrase, "all the kings of Arabia," appears to be a dittography. From Arabia, gold and silver were sent to Solomon (II Chron. ix. 4), and, in accordance with this passage, in its parallel (I Kings x. 5) "Ereb" must be changed to "Arab." A similar change, suggested by Cornill, following Aquila, Symmachus, and the Peshitta, must be made in Ezek. xxx. 5 (Smend, on the passage), where Arabia is mentioned in connection with Lud, Put, and Egypt. The classic passage is Ezek. xxvii. 21, where Arabia is referred to as one of the contributors to the wealth of Tyre. As in the other citations, "Arabia" here means only the northern part. It contributed lambs, rams, and goats; other districts in Arabia sent their share, Kedar, Sheba, and Eden sending lambs, spices, gold, and precious stones. There is evidence that after and perhaps even during the Exile, Arabians made their fixed abode in Palestine. At the rebuilding of the walls they gave Nehemiah much annoyance (Neh. iv.), particularly Geshem, the Arabian (Neh. ii. 1; 19). Jer. l. 37 is a doubtful passage, but it can hardly refer to the Arabians. One other might be mentioned. In the Elijah story (I Kings xvii. 4), ravens ("'orebim") bring food to the prophet. The Talmud (Hul. 5*a*) reports an interesting discussion, wherein it is suggested that "'orebim" might be the name of men (Judges vii. 25), or perhaps men of a certain locality, this of course implying the reading "Arabians." And despite the fact that all the ancient versions read "ravens," the reading "Arabians" or "Bedouins" is still a possibility. The hiding-place of Elijah lay directly in the path of the bands who, in the period of drought, would have reason to remain near a brook (I Kings x. vii. 6).

(3) In later times "Arabian" signifies the more restricted Nabatæan. II Macc. v. 8 mentions Aretas, prince of the Arabians, who is known from other sources to have been a Nabatæan. The same restriction applies to the New Testament (Gal. i. 17, iv. 25; II Cor. xi. 32).

Arabs in Assyrian Inscriptions.

The Arabians are mentioned also on the Assyrian inscriptions with the same ambiguity (Bedouins or Arabians) as in the Hebrew sources, being variously given as "Aribu," "Arubu," "Arabi," or even "Arbi." They are first found in the days of Shalmaneser II. In a battle fought in 854 at Karkar, Gindibi the Arabian, with his 1,000 camels, took part. Tiglath-pileser III. makes an invasion into Arabia, and among others who pay homage and tribute are found the two queens, Zabibe and Samsi. In Sennacherib's reign the "tent-dwelling" Arabs have moved northward and, in conjunction with the Arami and the Kaldi, make trouble for the king. His son and successor, Esarhaddon, defeats them at Bazu. They are by no means destroyed, however, for they are still found in the empire in the reign of Asurbanipal.

Arabia as Home of the Semites.

The constant migration of the hordes from central Arabia into Babylonia, and thence along the Euphrates into Palestine, has been going on at all times, as appears from the Bible and the inscriptions. The episode of Abraham's journey is but one stage. From Arabia the wanderers poured into Babylonia and settled there. Pressure from Arabia dispersed them and they wandered north. On the west the Arabs entered Egypt and went south into Yemen and Abyssinia. It is quite probable that Semitic customs, mythology, and national traits were carried in successive stages from central Arabia to the other parts where Semites were found. Hommel, von Kremer, and Guidi assume that Mesopotamia was the original home of the Semite; but, as has been pointed out by De Göje, agriculturists and inhabitants of mountains never become nomads. The reverse is often true. Sayce, Sprenger, and Schrader favor Arabia. Schrader points out that on mythological, historical, geographical, and linguistic grounds Arabia must be the starting-point of Semitic culture. Nöldeke suggests Africa as the original home of the Semites—a view adopted by Brinton, Jastrow, and Barton; but this in nowise conflicts with Arabia as the Semitic center in Asia (see SEMITES, and Barton, "Semitic Origins," ch. i., New York, 1901).

——**Settlement of the Jews:** In the history of the Jews of Arabia three epochs may be noticed: (1) The pre-Islamic period; (2) Mohammed's lifetime; and (3) the period from Mohammed's death to the expulsion of Jews from the peninsula.

Pre-Islamic Period: Nothing certain is known as to the time of Jewish immigration into Arabia; but from various passages in the Mishnah (Shab. vi. 6; Ohalot xviii. 10) may be inferred the existence of Jewish settlements in northern Arabia (Ḥijaz) shortly after the destruction of the Second Temple. There is no doubt that whatever civilization existed in these parts in the first six centuries of the present era was fostered by the Jews. They evidently brought some knowledge of the Bible, the Talmud, and the prayer-book with them; but it does not appear that regular study had found a home among them, nor did they produce any rabbinic authority beyond those so considered by Mohammedan authors. Yet this sufficed to give them a much higher moral standing than that of their Arab neighbors.

The Jews not only tilled the soil and reared palm-groves, but were also skilled armorers and jewelers. Outwardly they hardly differed from the Arabs, whose customs they adopted, not only in the matter of tribal life, but also in other respects. From extensive lists of names it is seen that typically Jewish or Biblical names were in the minority. Even the names of the tribes are purely Arabic, and offer hardly any clue to their origin.

Early Accounts.

Although the settlement of the Jews did not extend further south than the town of Medina, the spread of their religion was not confined to that district. The accounts of this are rather fantastic and include the following: When Abu Karib, the last of the Tobba kings of Yemen, besieged Yathrib (the ancient name of Medina), he was persuaded by two rabbis (to whom later sources give the names of Ka'ab and Asad) not only to raise the siege, but also to adopt the Jewish creed. Taking the two rabbis with him, he converted his army and subsequently his people; but it was not till the time of D̮u Nuwas (sixth century) that Judaism was more widely spread in Yemen.

Medinian Jews.

Jewish colonies were probably to be found in the whole northwestern coast-line; but only a few are known to history. These were at Taima, Fadak, Khaibar, Wadi al-Kura, and in the immediate vicinity of Medina. It was in the last-named place that Jews lived in large numbers, forming three tribes, viz., the powerful Banu Kainuka, in the north of the town, where they possessed a market named after them; the Banu al-Nadhir, who were their neighbors, and the Banu Ḳuraiza, who occupied the eastern suburbs. The last two tribes claimed their descent from the family of Aaron, and therefore styled themselves Al-Kahinan (the two Priests). Besides building villages, all three tribes constructed a number of forts, which afforded them protection during the numerous feuds of the Arab tribes. Through recent discoveries of inscriptions the names of several "kings" of tribes have been unearthed, and Glaser has arranged them chronologically in the following order: Talmay, Hanaus (Al-Aus), Talmay, Lawdan, Talmay.

Such was the position of the Jews in North Arabia, when, about the year 300, two Arab tribes, the Banu al-Khazraj and Al-Aus, moving northward with the stream of immigrants from the southern shores, found habitations in the environs of Medina. Like the Jews, the intruders built a number of castles for themselves and sought to insure their own safety by making allies of the former. Peaceful times had, however, gone forever. The Arab historians—the sole source regarding these events—consider the acts of violence committed by one of the Jewish tribes to be the cause of the outbreak of hostilities; but this is only natural. Following their report it is learned that part of the Banu al-Khazraj had settled in Syria under the sovereignty of the Ghassanide prince Abu Jubaila. Malik, chief of the Medinian Khazrajites, invoked his aid against the Jewish oppressors. Glad of the opportunity, he marched with an army toward Medina, whereupon the Jews retired to their castles. Pretending to be engaged in an expedition against Yemen, he assured them of his peaceful intentions, and invited them to a banquet in his camp. Those who availed themselves of the invitation were assassinated, and the murderers seized their wives and children. The fate of the unhappy victims was bewailed in elegies by the Jewess Sarah and by another poet, whose name is not known.

The only revenge taken by the Jews was to manufacture an uncouth effigy of the traitor, which they are said to have placed in their synagogue—a most unlikely place—where they showered blows and curses on it. This, if true, would enable one to form some idea of their intellectual status, and would seem to show that, in spite of their religious views, they shared their neighbors' belief in magic. That Arabs regarded such punishment as effective can be proved by occurrences which took place even in Islamic times; but compare HAMAN IN RABB. LIT.

After this event, which considerably weakened the power of the Jewish tribes, nothing is heard of their affairs for about a century, except that they took part in the quarrels of the two Arab clans with whom they intermarried, and that they fought occasionally on both sides.

Samau'al b. Adiya.

In the middle of the sixth century there flourished the Jew Samau'al b. Adiya, who lived in his castle Al-Ablaḳ in Taima, eight days' journey north of Medina. "More faithful than Al-Samau'al" became a proverbial saying. The following is the circumstance which gave rise to it: When the famous poet Imr al-Kais fled from the King Al-Mundhir of Ḥira, he confided his daughter and his treasures to the care of his friend Samau'al. Al-Mundhir besieged Al-Ablaḳ, and having captured a son of Samau'al, threatened to kill him unless his father gave up the treasures of his friend. This Samau'al refused to do, allowing his son to be slaughtered before his eyes in preference. Samau'al alluded to the incident in verse, thus securing for himself a place among the ancient Arab poets. Of other Jewish contemporaneous poets the best known is Al Rabi ibn Abu al-Ḥuḳaiḳ, who competed in poetic improvisation with another prominent Arab minstrel.

Mohammed's Lifetime: The second period in the history of the Jews in Arabia, viz., the rise of Islam and its effect on their fate, may now be considered. When the news spread that a Meccan prophet had arisen who endeavored to replace paganism by a monotheistic belief, the curiosity of the Jews was naturally aroused. Their own political prestige had by that time declined to such an extent that they were daily exposed to acts of violence from their pagan neighbors. They looked forward to the advent of a Messiah; and Moslem historians, chronicling these hopes, point vaguely to Mohammed. About this time, ambassadors from Mecca arrived in order to learn the Medinian Jews' opinion of the new prophet. The report which they are supposed to have brought throws very little light on this subject. On the other hand, the curiosity of the Jews was so great that they could not rest, but sent one of their chiefs to Mecca to ascertain what they had to hope for or to fear. Mohammed was plied, directly or through an intermediary, with questions; but with no satisfactory results. Probably, as long as he lived in Mecca, the Jews thought but little of the whole movement; indeed, there was little prospect of Islam ever assuming large proportions in Medina.

Notwithstanding all that is related about Mohammed's having used the Medinian Jews as a source of information, their share in the actual building-up of Islam was but small. When Mohammed came to live among them, the essential portions of the faith had already been created. Such learning as he owed to Jews he had acquired at a much earlier period, probably in Syria. It was only natural, however, that Mohammed should be anxious to win the Jews over; but, being afraid of their intellectual superiority, he wished to accomplish this by intimidation rather than by persuasion. His first step was to advise the Medinians, who invited him to take up his abode with them, and dissolve their alliances with the Jews. The seemingly friendly attitude toward the Jews, that he at first assumed, and to which he gave expression in the treaty that he concluded with the Medinians, was but a stratagem. As soon as he perceived that they did not feel inclined to make advances, he covered them with abuse; this can be seen in the Medinian portions of the Koran. Observing that they remained obstinate, he proceeded to crush them as soon as his political power had become strong enough to enable him to do so with impunity. He commenced by expelling the Banu Kainuka, who retired to Adraat in the north. Subsequently he ordered the assassination of the poet, Ka'ab b. al-Ashraf, chief of the Banu al-Nadhir, who, by his verses, had incited the Meccans to revenge the defeat they had suffered at Badr. In the following year, to retrieve the disaster of the Moslem arms at Uhud, the whole tribe Al-Nadhir was expelled. Their expulsion formed the burden of an elegy by the Jewish poet Al-Samak. Finally, the Banu Ḳuraiza were besieged, and on their surrender were put to death by Mohammed. They numbered upward of seven hundred, and included the chiefs Ka'ab b. Asad and Ḥuḳaiḳ; their women and children were distributed among the Moslems.

Mohammed Crushes the Jews.

Mohammedan authors have much to say about the Jewish apostate, Abd Allah ben Salam, who is supposed to have become a follower of the prophet soon after the entry of the latter into Medina; but from more reliable sources it is gathered that the apostasy did not take place till shortly before Mohammed's death. Only a little of what Mohammed learned from this man appears in the Koran; but much more is given in the "Ḥadith," the traditional supplement to this book.

Lastly came the turn of the Jews of Khaibar to be attacked. After an unsuccessful fight they, as well as those of Fadak, Taima, and Wadi-al-Kura, surrendered. Being more skilled agriculturists than the Arabs, Mohammed permitted them to stay on the condition that they hand over one-half of their harvests to the Moslem authorities. But they lived in dread of ultimate expulsion; and this state lasted till Mohammed's death. His successor, Abu Bakr, also found it well to continue the same policy, from which the Moslem commonwealth derived considerable benefit. Omar, however, fearing that the danger Islam might undergo through continual contact with Jews would be greater than their material usefulness, drove them out of the country, and they left for Syria. For the history of the Jews in Arabia after Mohammed see Aden, San'aa, Yemen.

——**In Rabbinical Literature:** Both the land and the people of Arabia were familiar to the Jews of Palestine and Babylonia; and the notices of the Arabians, as given in the Talmuds and the Midrashim, are among the most valuable and reliable data extant concerning the pre-Islamic Arabians.

The Arabians are designated by the Jews ערבי, and more rarely ישמעאלי, the latter name being used principally to indicate the inhabitants of the desert (M. Ḳ. 24*a*) to emphasize their kinship to the Jews (Shab. 11*a*). In Babylonia the Arabians were also known by the name of טייעא ("Tayite"), after the great Arabian tribe of the Tayites; and the Hebrew transliteration with ע is based upon a popular etymology which connected this Arabic name with טעה and תעה ("to wander," "to wander about"). By the term "Arabians" the Jewish sources sometimes also indicate the Nabatæans, the Aramaized Arabians, although the word "Nabatæan" is also found.

It is impossible to tell to what extent the Arabian peninsula was known to the Jews during the first five centuries of the common era. With the exception of a passage in 'Erubin 19*a*, the Talmud and the Midrash speak of Arabia in a general way,

The Land.

without mentioning any particular locality. As regards the passage Lam. R. iii. 7, it is doubtful whether "Sugar" (thus in Buber's edition) is the name of a place at all, although Arabia has towns bearing the names of "Sajur" and "Sawajir." It is evident, from a remark in the Tosefta (Ber. iv. 16) and the Midrash (Gen. R. lxxxiv. 16), that the Arabs traded only in skins and naphtha, and not in spices and sweet-scented stuffs, and that southern Arabia must therefore have been altogether unknown to the Jews of Palestine.

The Arabs are spoken of as typical nomads. A very ancient source (Ohalot xviii. 10) speaks of their tents as unstable abodes, because the occupants wandered about from one place to another. Thus the settled Arameans looked down with contempt upon the Arabs, to whom, about the year 70, the phrase "contemptible nation" (אומה שפלה) came to be applied (Ket. 66*b*); and even in later times it was regarded as most humiliating for a woman to marry an Arab (Yer. Ned., end). Concerning the gods of the Arabs, mention is made ('Ab. Zarah 11*b*) of the idol Nashra (or Nishra), a deity revered by the tribes of both the south and the north (see Wellhausen, "Reste Arabischen Heidenthums," 2d ed., p. 23, and the literature cited there). The passage states that this god's temple was open the year round; and it is further recorded that the "ḥajj [annual pilgrimage] of the Tayites" (חגתא דטייעי) was not always held upon the same date, or (according to Rashi) not regularly every year. A peculiar religious custom is mentioned (Yer. Ta'an. ii. 65*b*; Midrash Jonah, in Jellinek, "B. H." i. 100, and Ta'anit 16*a*). The tribes are also especially characterized as being given to immoral excesses; and the proverb runs that "the Arabs are guilty of nine-tenths of all the immorality in the world" (Ḳid. 49*b*; Esther R. [i. 3], however, has "Alexandria" in place of "Arabia," and assigns to the Ishmaelites nine measures of "stupidity" [טפשות]).

Habits and Customs of the People.

In a passage badly mutilated by censors (Shab. 11*a*) Abba Arika (Rab), who lived about the first half of the third century, remarks that he would rather be ruled by an Ishmaelite than by a Roman, and by a Roman rather than by a Parsee. A century later, however, conditions seem to have changed for the worse. It is known that in the first half of the fourth century the Arabs seized the lands of both Jewish and non-Jewish inhabitants of Pumbedita, and compelled the rich proprietors to make out deeds of sale to them (B. B. 168*b*). Similar conditions at that time prevailed at Nehardea, where it was unsafe to leave cattle unguarded in the fields because the Arabs (Bedouins) that frequented the district stole whatever was within their reach (*ib.* 36*a*). Interesting, also, as bearing upon the life of the Arabs, are the allusions in the Mishnah to "the caldron of the Arabs," by which is meant an improvised fireplace for baking, and which consisted of a cavity, lined with clay, in the ground (Men. v. 9; Kelim v. 10). At a much later period, the chief food of the Arabs seems to have consisted of meat (Ḥul. 39*b*).

Weapons.

As to the garb of the Arabs, the Mishnah states (Shab. vi. 6; see Rashi's reference to the passage, p. 65*a*) that it was already then the custom for women—even for Jewesses living in Arabia—when they went out-of-doors, to cover the entire face, except the eyes, with a veil. In their journeys in the desert the men, too, used a face-cloth, about an ell square, as a protection from the flying sand (M. Ḳ. 24*a*; Mishnah Kelim xxix. 1; compare commentary of Hai Gaon). Among the Jews, however, this covering of the face was customary only as a sign of mourning (M. Ḳ. *l.c.*). There was, furthermore, a difference between the sandals of the Arabians and those of the Arameans, the latter being provided with an easy lacing arrangement, whereas the former were bound firmly to the feet with leather thongs (Shab. 112*a*; Yeb. 162*a*; compare Hananeel on the passage in Shab., which is also cited in 'Aruk, *s.v.* חמר, ed. Kohut, iii. 436*a*). Of the arms of the Arabs little is said in rabbinical literature. Their usual weapon on their travels through the desert was the spear (B. B. 74*a*); and a small shield is mentioned as having been also used in mock combats (Kelim xxiv. 1). Another Arabian custom noted in the Talmud is that of wrapping meat in the skin of the animal and carrying it home on the shoulders from the slaughter-houses (Pes. 65*b*). Mention is also made of the wonderful faculty the Arabs were held to possess, of ascertaining, by merely smelling the ground, how far removed they were from a spring or other source of water (B. B. 73*b*).

Religion and Language.

The Arabs are represented in Jewish sources as magicians and idolaters of the lowest type. An authority of the third century relates that he himself witnessed an Arab slaughter a sheep in order to make predictions from its liver (Lam. R., introduction, xxiii.). Another source of about the same period notes that the Arabs worshiped the dust that remained clinging to their feet (B. M. 86*b*). In regard to the language of the Arabs, Jewish sources contain more than twelve "Arabic" words, expressly designated as such, which have been collected by Brüll, not all of which, however, are really Arabic. Thus, for instance, for *'awila*, "boy" (Gen. R. xxxvi., beginning), is given the Arabic *'aiyil*; for *patia*, "youth" (*ib.* lxxxvii.), = Arabic, *fatan*; while the other words *adita*, "robbery," *sakkaia*, "prophet," and others, are originally Aramaic words used by the Nabatæans. Other words, again, like *yubla*, "ram," *ḳabaa'*, "to rob," can not be found either in the Arabic or in any dialect of the Aramaic, and can only refer to the dialect of Arabian Jews. See Ishmael and Rabba bar bar Ḥana.

ARABIAN NIGHTS: Popular name of a collection of tales written in Arabic under the title "Alf Lailat wa Lailah" (One Thousand and One Nights), and rendered familiar to all Europe by Galland's French adaptation of 1703-1717. The constituent elements of the collection vary in different editions; Burton's edition, which is the completest, contains more than 230 stories, many of which include other stories, making the total not far short of 400. Joseph Jacobs, in an introduction to a reprint of Lane's edition (London, 1896), suggested that these stories may be divided into four successive strata: (1) a Persic-Indian nucleus consisting of Indian tales translated into Pahlavi at the same time as similar collections of tales—BARLAAM and BIDPAI and SINDBAD—was adapted during the reign of Chosroes I. (531–79); this is set in a framework of local Persian origin; (2) an Arabic adaptation made at the court of Harun-al-Rashid in the ninth century, under the patronage of the Barmecides, by Abu Abdallah Mohammed al-Jahshiyari; (3) additions made in Cairo between the twelfth century and the fifteenth, and final redaction there which gave the whole collection an Egyptian tone; (4) additions found only in Galland's translation, including "Ali Baba," "Aladdin," and "Prince Aḥmad," which have been traced to the recital of a native Christian of Aleppo, named Hanna, who visited Paris in 1709. The Jewish interest in the "Arabian Nights" connects itself with the first and third of these sections.

Based on Book of Esther.

De Goeje has suggested that the framework story of the whole collection, in which the queen Shahrazad averts execution by telling tales for one thousand and one nights, is the same story as that of the Biblical book of Esther. Shahrazad, in the Persian tradition, is the mother-in-law of Ahasuerus, who in the Biblical story also beguiles his nights by having tales read to him; his wives also hold office only for one night, until Esther obtains a more secure tenure. M. de Goeje thinks that the "Arabian Nights" preserves a more original form of the story, as the writer of the Bible narrative has modified the fate of Esther's co-wives.

F. Perles, in a series of papers contributed to "Monatsschrift" (xxii.), has pointed out that several of the stories of the "Arabian Nights"—mainly those taken from the Cairene additions—deal with Jewish topics or are derived from Jewish sources. V. Chauvin, in a special treatise on the Egyptian recension of "One Thousand and One Nights" (Brussels, 1899), has suggested that these Jewish tales and others were introduced by one of the last redactors, a converted Jew, probably the author of the "Story of a Man of Jerusalem," sometimes attributed to Abraham, son of Maimonides. The Jewish tales themselves are probably extracted from a work of a Jewish convert to Islam, WAHB IBN MUNABBIH (638–738), entitled "Jewish Matters."

Tales from Jewish Sources.

The following are the tales of the "Arabian Nights" that appear from several investigations to be from Jewish sources. The numbers are those in W. F. Kirby's comparative list given in all forms of Burton's edition; the letters in parentheses refer to the identifications by Perles:

22. Ala Al-Din Abu Al-Shamat.
41. Ali Shah and Zumurrud.
52. Devout Israelite (F.).
114. Angel of Death and the Proud King.
115. Angel of Death and the Rich King.
116. Angel of Death and the King of the Children of Israel.
117. Izkander (Alexander the Great) and the Poor Folk.
119. Jewish Kaḍh (Kadi) and His Pious Wife (A.).
122. Devout Tray-Maker and His Wife (J.).
126. The Moslem Champion.
127. The Christian King's Daughter.
128. Prophet and Providence (C.).
130. Island King and Pious Israelite.
132. Queen of Serpents: (a) Adventures of Bulukuia; (b) Story of Jamshah.
133 gg. The Seventh Voyage of Sindbad.
136. Judar and His Brethren.
137. Ajib and Gharib.
155. Hassan of Bassorah.
161 k. The Blind Man and the Cripple (G.).
163. Abdallah the Fisherman.
168. Abdallah ibn Fazil and His Brothers.
183 a. Harun al-Raschid and Tichfat al-Culoub.
196. Story of Ali Cogia (K.—one of Galland's additions).
203. Sultan of Yemen and His Three Sons.
256. Story of Abdallah (E.).

Besides these stories, there are several others obviously inserted by the same hand. Thus, the whole collection from 114 to 132 appears to be by the hand of Wahb ibn Munabbih, while "The Blind Man and the Cripple" (161 k.) is part of a section of eighteen stories which are all told together under the title of "King Jali'ad of Hind." Altogether some forty-five stories—nearly one-ninth of the whole—can be traced to this Jewish editor of the Cairene edition, and Chauvin suggests that fifteen others were inserted, though not written, by him.

One of the tales can be traced to the Cairene redaction by a reference to Jewish customs. In the "Ensorcelled Prince" (2 b) the Peri transforms the fish of different colors into the former inhabitants of the city, the yellow fish being turned into Jews because the Jews of Egypt wore yellow badges, owing to the pact of Omar (see BADGE).

ARABIC-JEWISH PHILOSOPHY, General View of: So thoroughly were the writings of Arabic-speaking Jews influenced by what may be termed Mosaism, that it is necessary to bear this constantly in mind when considering the peculiar contribution of these Jews to the history of philosophy. Mosaism from its outset could scarcely claim to be called a philosophy. It was, in the most pointed sense of the word, a religion of law. If, as is quite reasonable, the Decalogue be accepted as the oldest portion of the Biblical canon—as the religious backbone, so to speak, of Mosaism—it becomes evident at once that a moral Will speaks therein with the "categorical imperative." The Mosaic religious system was therefore neither the product of cold intellect like the Greek religious

Mosaism a System of Mandates.

philosophy, nor an ardent emotional evolution like Brahmanism or Buddhism; nor was it the result of over-subtle cogitation like the teachings of Confucius and Zoroaster. It consisted of the imperative commands of an Omnipotent Will speaking in mandatory accents. The religions of intellect addressed their followers in the subjunctive; emotional religions in the optative; Mosaism, a Will- or Law religion, admonished its believers in terse, unconditional imperatives.

The sacred writings of no other of the great religions contain so little speculative reflection as the Old Testament; and if it be true that all religion is but imperfect philosophy—that is, philosophy in the guise of sentiment (Schleiermacher), and never in the form of the concept (Hegel)—then Mosaism affords a most imperfect system of metaphysics. History (Genesis as an attempt at the history of the world; Exodus as a national history, etc.), poetry (Deborah's Song, the Psalms, and the Prophetical writings), together with jurisprudence (Leviticus)—these are the vital elements in Mosaism. There is no room for philosophy. The philosophical tinge in the two books of the canon, Job and Ecclesiastes, is distinctly due to foreign influences: the former plunges immediately into the angelology and demonology of Parseeism, and the latter is dyed in the somber hues of the Hellenism of Alexandria.

Position of Philo.

Still more practical evidence of the aversion of Mosaism to philosophy is afforded by the fact that, when Jewish Hellenism in Alexandria evolved not only such fitful stars of small magnitude as Aristæus and Aristobulus, but also a great and enduring luminary like Philo, it was rudimentary Christianity that blossomed forth in response to the Jewish-Hellenic doctrine of the Logos: Judaism remained entirely uninfluenced by the Philonic philosophy. This accounts for the fact that Maimonides—the sole Jewish philosopher of the Middle Ages with a full appreciation of the historical sequence of his faith—knew as little of the existence of Philo as of the works of Josephus. Indeed, all medieval Judaism may be said to have remained in ignorance of Philo, the only philosopher produced by ancient Judaism, and the greatest one down to the present time, Spinoza alone excepted—a circumstance all the more significant when contrasted with the assiduous development of the historical sense in other fields. Even with Philo himself philosophy was not indigenous: it was a product imported from other climes; for Philo was absolutely dependent upon Plato, just as Maimonides and all Arabic-Jewish philosophers, with the exception of Ibn Gabirol, were upon Aristotle.

Authoritative Nature of Mosaism.

The explanation of this remarkable phenomenon—the cold and almost hostile attitude of Judaism, as a religion, toward philosophy—may perhaps be found in the fact that every religion based upon law is thereby necessarily authoritative in its utterances. The Jews did not need to speculate upon the origin of all things. The Babylonian legend of the creation was presented to them in Genesis as a dogma, as an unquestionable article of faith. All other religious systems had to think out for themselves a foundation for the world; in Judaism one was ready to hand. Thus, what elsewhere was the aim and object of all speculative philosophy—the account of the origin of the universe—was in Judaism posited at the very beginning of the Bible.

Optimistic Character of Mosaism.

One other fact remains to be mentioned; namely, that of all ancient religions Mosaism was the only optimistic one. All the others glorified death; Mosaism was alone in extolling life: ובחרת בחיים, "Choose life" (Deut. xxx. 19); "keep my statutes . . . which if a man do, he shall live in them" (Lev. xviii. 5). While pessimistic religions proclaimed as their watchword, "Choose death, choose non-existence" (Nirvana), Mosaism, on the contrary, never ceased to enjoin, "Choose life." "Serve the Lord with gladness, come before His presence with singing," joyously exhorts the Psalmist (Ps. c. 2); "I shall not die, but live," he exults in the delirium of happy existence (Ps. cxviii. 17). Buddhism was a religion of commiseration; Mosaism, one that shared the happiness and joy of all living creatures. Such a religion, whose God surveyed all creation with satisfaction, and emphasized each successive stage with the exclamation "It is good," "It is very good," needed no philosophy, and therefore produced none. All philosophy originates either in a puzzled incomprehensibility of things (*ἐπὶ τὸ θαυμάζειν*, as Aristotle says) or in a deep dissatisfaction with the existing arrangement of the world. Neither of these motives obtained with the Jews; for them there was neither theoretical impulse nor practical inducement. For them, acknowledging revelation as they did, there existed no mystery as to the origin of the universe; nor was there anything in its government crying out for improvement. Their faith, on the one hand, and their exemplary fortitude in life, on the other—in short, their native optimism—sealed for them all the sources of philosophy. Thus there was never an original Jewish philosophy, but only, as with Philo, a Helleno-Jewish, or, as in the Middle Ages, an Arabic-Jewish, philosophical system.

In the Arabic-Jewish philosophy four distinct types or tendencies may be discerned, all, however, dependent upon Greek models.

(1) The first of these is the rabbinical Kalâm (theology or science of the word), appearing first with Saadia, attaining its highest point with Maimonides in literary development, and with Ḥasdai Crescas in speculative attainment, and sinking with Joseph Albo to the level of mere pulpit-rhetoric. The scientific models for this school were, among Arabian philosophers, the Motazilites (who denied all limiting attributes of the Deity, and were champions, therefore, of His unity and justice); and, among Greeks, Porphyry and the so-called Aristotelian theology, that is, Plotinus' "Enneads." But as soon as Aristotle's actual writings became known, first through the medium of Arabic versions, and later through Hebrew translations, this Neoplatonic dilution of true Aristotelianism began gradually to give way, and approach was made to a purer form of it. As Boethius among Christian scholastic philosophers was alluded to as "the author," so Aristotle came to be termed

הפילוסוף, the philosopher *par excellence* among Arabic and Jewish thinkers. This tendency toward Aristotle was no less marked in the Byzantine and Latin-Christian scholasticism than in the Arabian and Jewish systems, the last of which conformed to the Arabic. Among the Arabs there was a continual and gradual ascent through Al-Kindi, Al-Farabi, Ibn Sina, and Ibn Roshd toward an ever purer and exacter presentation of the genuine Aristotle; in the last the ascent was through Saadia, Baḥya ben Joseph Ibn Paḳuda, Judah ha-Levi, Abraham ibn Daud, Maimonides, Gersonides, and Crescas. Throughout this school Aristotle remained the model and arbiter.

Tendencies of the Philosophy.

(2) The second school was that of the Karaite disciples of the Kalâm. An analogous development is discernible with them. While David ben Merwan al-Moḳammeẓ (about 900), and especially Joseph al-Basri, found their system exclusively upon the Motazilite Kalâm, the latest straggler of them all, the philosophizing Karaite, Aaron ben Elijah of Nicomedia (fourteenth century), reverts, in his "'Ez Ḥayyim," to Aristotle.

(3) A place by himself must be assigned to Avicebron (Avicebrol), long venerated as an authority by Christian scholasticism, but proved by Munk to be identical with the Jewish poet-philosopher Solomon ibn Gabirol (died about 1070). Gabirol was influenced by Plato exactly as Maimonides was by Aristotle. In Gabirol's work Plato is the only philosopher referred to by name; while in Maimonides' "Moreh Nebukim," Plato is quoted only four times in the whole course of the book—once from the "Timæus" (II. ch. xiii.; Munk, II. ch. cix.), probably the only Platonic work with which Maimonides was acquainted. Aristotle, on the contrary, whom Maimonides knows so thoroughly, is named at the outset (I. ch. v.) as ראש הפילוסופים ("The Chief of Philosophers"), and in II. ch. xvii. (Munk, II. ch. xxii. 179) occurs the unqualified declaration that "everything that Aristotle teaches of sublunary matters is the unconditioned truth" (see also book II. ch. xix. and xxiv.).

Ibn Gabirol's relation to Plato is similar to that of Philo, and that without his suspecting even the existence of the Alexandrian thinker. Characteristic of the philosophy of both is the conception of a Middle Being between God and the world, between species and individual. Aristotle had already formulated the objection to the Platonic theory of Ideas, that it lacked an intermediary or third being (τρίτος ἄνθρωπος) between God and the universe, between form and matter. This "third man," this link between incorporeal substances (ideas) and idealess bodies (matter, the μὴ ὄν), is, with Philo, the "Logos"; with Gabirol it is the divine will. Philo gives the problem an intellectual aspect; while Gabirol conceives it as a matter of volition, approximating thus to such modern thinkers as Schopenhauer and Wundt. For the rest, Gabirol suffered precisely the same fate as his predecessor, Philo; his philosophy made not the slightest impression on Judaism. Among Jews he is esteemed as a poet; while Christian scholasticism, in the persons of its two chief representatives, Albertus Magnus and his pupil, Thomas Aquinas, defers to him quite as frequently and gratefully as in their time the Gnostics and the Church Fathers—particularly Clement of Alexandria, Origen, and Ambrose—did to the Logos doctrine of Philo.

Gabirol's Conception of Intermediary Beings.

(4) Cabala, or the Jewish mysticism. This "secret lore" has always claimed descent from ages of hoary antiquity. There is some slight warrant for this assertion, since faint traces of cabalistic modes of thought have been detected by Frankel and by Munk among the Essenes. Nor may it be denied that the work that is at the foundation of the Zohar, namely "Sefer Yeẓirah," the so-called "Book of Creation" (see article), contains material reaching back to an older tradition.

Jewish Mysticism and the Cabala.

In sequence of thought, the Cabala is as completely dominated by Pythagoras—or rather by the Neopythagorean school—as Jewish Hellenism was by Plato, or the Arabic-Jewish Philosophy by the sage of Stagira. It matters really little whether the rise of the Jewish Cabala and of Christian mysticism, the Μυστικὴ θεολογία of Dionysius the Areopagite, be dated a few centuries back or forward; its vital elements are always the Pythagorean number-symbolism on the one hand, and the Neoplatonic emanation-theory on the other. Its distinguishing feature is the combination of both elements. The Cabala also looks for "middle beings," exactly as Philo and Gabirol do, upon whom it may be dependent. But while Philo found these intermediaries in the divine Logos, and Gabirol in the divine will, the Cabala sought them in fantastic arithmetic. The Unlimited ("En Sof"), or God, is the originally undifferentiated unity of the cosmos, entirely identical with the Indian Nirvana and the Πάντα ὁμοῦ of the Greeks. Differentiation began with the archetypal Man (Adam Ḳadmon) compounded of ten light-circles, spheres, or intelligences (Sefirot: to wit, Keter, Ḥokhmah, Binah, Ḥesed, Din, Tiferet, Neẓaḥ, Hod, Yesod, Malkut). God dissolves Himself into attributes. This feature is peculiar to the whole of the Middle Ages. Natural forces are transformed into attributes of God; and attributive thought takes the place of substantive. While in antiquity every natural force was a divinity, and while Monotheism condensed all these divinities into one personality, recourse was now had to the expedient of degrading the forces of nature into attributes of God. Trinity, Tritheism, Logos-doctrine, and Sefirot are the stammering utterances of ancient and medieval thought, endeavoring to explain the relation of multiplicity to unity, of natural forces to nature itself, of the attributes of God to God Himself.

The Cabala and Number-Symbolism.

The cabalists, however, occupied a proportionately small space in the history of Arabic-Jewish Philosophy. They were far more numerous in southern France or Languedoc than in Moorish Spain. There are no independent cabalistic works written in Arabic, though the philosophical works of the Arabic-Jewish philosophers were written in Arabic, the vernacular of every-day life in Moorish Spain. There seems to have been a certain system in the employment of Hebrew and Arabic. For halakic decisions (Saadia Gaon and Maimonides), for religious poetry (Ha-Levi and Gabirol), and especially for Biblical exegesis (Ibn Daud, Gersonides, Ibn Ezra, and Abravanel) the Hebrew language was used; while for philosophic writings the Arabic idiom was currently employed. The vulgar tongue seemed most appropriate for things profane; possessing as it did the advantage of a finely developed philosophical vocabulary, which the Hebrew acquired only after the school of the Tibbonides had accomplished their labors of translation.

Arabic Suited to Philosophical Terminology.

A fundamental difference between the cabalists and the exponents of pure philosophy in the conception of the philosophical problem may be found in the position assigned by either to human Reason. The former rejected the authority of the conclusions of Reason, and relied upon tradition, inspiration, and intuition. Those thinkers, on the other hand, who based upon Reason considered inspiration and "intellectual intuition" as pertaining to prophets only; for themselves and ordinary human beings Reason was the prior requisite for all perception and knowledge.

Reason and Tradition.

Saadia (892–942) in his "Emunot we-De'ot" (The Principles of Faith and Knowledge) posits the rationality of the Jewish faith with the restriction that Reason must capitulate wherever it contradicts tradition. Dogma must take precedence of Reason. Thus, for example, in the question concerning the eternity of the world, Reason teaches since Aristotle, that the world is without beginning; that it was not created; Dogma asserts a creation out of nothing. Again, Reason insists—also since the time of Aristotle—upon only a general immortality; Dogma, on the contrary, maintains the immortality of the individual. Reason, therefore, must give way.

While Baḥya ben Joseph (eleventh century) in his "Ḥobot ha-Lebabot" (Duties of the Heart)—a book still popular among Eastern Jews—maintained an almost hostile attitude toward rationalistic thought and was satisfied with mere pulpit-moralizing, the poet-philosopher Judah ha-Levi (twelfth century) in his religio-philosophical work "Cuzari" took the field with strenuous arguments against all philosophizing. He became thus the Jewish Algazali, whose "Destructio Philosophorum" was the model for the "Cuzari." Against Mohammedanism and Christianity his antagonism is somewhat milder than against Peripatetic philosophy: he inclines rather toward Sufi's skeptical mysticism. Human reason does not count for much with him; inward illumination, emotional vision, is everything. The "Cuzari" is interesting as a literary type. It describes representatives of the different religions and of philosophy disputing before the king of the Khazars concerning the respective merits of the systems they stand for, the palm of course being ultimately awarded to Judaism. Herein is the germ of those comparative studies of religion which the Frenchman, Jean Bodin (1530–96), developed in his "Heptaplomeres" (partially translated into German by Guhrauer, 1841), and which has been still further continued in our age as the science of comparative religion.

The "Cuzari."

But not even a Judah ha-Levi could bar the progress of Aristotelianism among the Arabic-writing Jews. As among the Arabs, Ibn Sina and Ibn Roshd leaned more and more on Aristotle, so among the Jews did Abraham ibn Daud and Moses Maimonides, whose "Moreh Nebukim" has remained the text-book for Arabian-Jewish Aristotelianism. The commentaries on the "Guide for the Perplexed" are always in Hebrew (by Falaquera, Ibn Caspi, Moses Narboni, and Isaac Abravanel), and are beyond the scope of an article dealing with Arabian-Jewish philosophers; these thinkers do not belong to Moorish Spain, but to Provence or Portugal. For similar reasons, the Aristotelian, Levi ben Gerson (RaLBaG) (1288–1345) who wrote "Milḥamot Adonai" (Wars of the Lord), can not be discussed here: he was a denizen of Bagnols, in southern France, and wrote in Hebrew. Among all scholastics, Levi b. Gerson (Gersonides) was by far the most advanced; for he, and he only, had the courage to place reason above tradition, or, to express it differently, to oppose the theory of creation out of nothing. Similarly, Ḥasdai Crescas (1340–1410), another writer in Hebrew, combated another dogma of Judaism, the freedom of the will, so energetically that he may be considered a rara avis among Jews; and so valiantly did he break a lance for fatalism that he enjoyed the honor of being appreciatively quoted by Spinoza. His "Or Adonai" (Light of the Lord) is one of the most original and independent works of scholasticism in general and not of Jewish scholasticism alone. Apart from its hardihood in openly and unreservedly attacking Maimonides' claims of infallibility for Aristotle in all matters pertaining to the sublunary world, it has the merit of projecting the problem of causes into the very foreground of philosophical thought. The mental heights of Crescas were by no means maintained by his pupil Joseph Albo, the last Jewish scholastic in the Spanish peninsula. In his "'Iḳḳarim" (Fundamental Doctrines) he sinks to the level of an ordinary philosophizing rhetorician and moralist. It is difficult perhaps to penetrate the depth of thought and deft language of Crescas; but it is just as difficult to work one's way through the pitiful shallows of Albo's unctuous commonplaces. These last-named philosophers wrote in Hebrew, and therefore can hardly be reckoned among Arabic-Jewish philosophers. The chief representative of Arabic-Jewish scholasticism, Maimonides, must now receive attention.

Gersonides and Ḥasdai Crescas.

Maimonides holds tenaciously, as against Aristotle, to the doctrine of creation out of nothing. God is not only the prime mover, the original form, as with Aristotle, but is as well the creator of matter. Herein Maimonides approaches more closely the Platonic "Timæus" than the Stagirite. Of God, the All-One, no positive attributes can be predicated. The number of His attributes would seem to prejudice the unity of God. In order to preserve this doctrine undiminished, all anthropomorphic attri-

Maimonides the Chief Scholastic.

butes, such as existence, life, power, will, knowledge,—the usual positive attributes of God in the Kalâm—must be avoided in speaking of Him. Between the attributes of God and those of man there is no other similarity than one of words (homonymy), no similarity of essence ("Moreh," i. 35, 56). The negative attributes imply that nothing can be known concerning the true being of God, which is what Maimonides really means. Just as Kant declares the Thing-in-itself to be unknowable, so Maimonides declares that of God it can only be said that He is, not what He is.

Finally, it may be stated that in the question of universals—the chief problem of scholasticism—Maimonides takes strict Aristotelian ground ("Moreh," i. 51, iii. 18; treatise on "Logic," ch. 10), in so far as he denies reality to the human species, but admits its true essence to exist only in the individual (according to the formula "Universalia in re"). In his "Ethics" (as systematized by D. Rosin, 1876) he follows the Stagirite in consistently insisting upon the "fitting mean" (μεσότης) as well as in the elevation of the intellectual virtues over the ethical. Thus, the Arabic-Jewish philosophy presents the same endeavor as the contemporary Arabian, Byzantine, and Latin-Christian scholasticism, namely, to bring about from the standpoint of the knowledge of the day a reconciliation between religion and science.

Position in the History of Thought.

However insignificant, compared with the fund of our present knowledge, this Arabic-Jewish philosophy may appear in its attitude toward the various problems and their solutions, two things must not be overlooked. In the first place, modern pride of culture should not prevent the confession that not a single step taken since the days of Maimonides has brought the solution of such problems any nearer. And, in the second place, it must not be forgotten that the scholastics preserved the continuity of philosophical thought. Without the activity of these Arabic-Jewish philosophers, especially of those Jewish translators of whose work Steinschneider has treated so exhaustively, the mental culture of the Western world could scarcely have taken the direction it has, and certainly not at the rapid rate which was made possible through the agency of the Humanists and of the Renaissance. The Arabic-Jewish philosophers were the Humanists, the agents of culture, of the Middle Ages. They established and maintained the bond of union between the Arabic philosophers, physicians, and poets on the one hand, and the Latin-Christian world on the other. Gabirol, Maimonides, and Crescas are of eminent importance in the continuity of philosophy, for they not only illumined those giants of Christian scholasticism, Albertus Magnus and Thomas Aquinas, but their light has penetrated deeply into the philosophy of modern times. Leibnitz speaks with no little respect of Maimonides, as does Spinoza of Crescas. Moses Mendelssohn and Solomon Maimon, the two Jewish friends of Immanuel Kant, took their point of departure from the Arabic-Jewish philosophy, as Baruch Spinoza had done. Sufficiently indicative of the bond of intellectual continuity is the fact that the same Solomon Maimon, who assumed the name Maimon simply out of reverence for Maimonides, was gratefully described by Kant in a letter to Marcus Herz as the critic who understood him best, and who had penetrated most deeply into his "Critique of Pure Reason."

Jews play merely a secondary rôle in the history of philosophy: they are transmitters of thought, apostles of culture, typical representatives of the intellectual continuity of the human race. The first Jew who was a real philosopher of prime magnitude, Spinoza, evolved his system not as a Jew; no more than Descartes framed his as a Frenchman and Catholic, or Leibnitz his as a Protestant and German. Philosophy has divested itself, more and more decisively, of all narrowing restraints of sectarianism and nationalism, and, like science itself, has become more and more cosmopolitan. The Arabic-Jewish philosophy was the last that could be designated Jewish. To-day there are still Jews who philosophize; but there are no Jewish philosophers.

BIBLIOGRAPHY: There is a mine of information in the annotations to Solomon Munk's *Guide des Égarés*; as also in Steinschneider's monumental *Hebr. Uebers.* Berlin, 1893. General treatises upon Arabic-Jewish philosophy exist only in the form of sketches, such as that of Munk, already mentioned, and in the manuals of the history of medieval philosophy by Ritter and Stöckl; Lasswitz, *Gesch. der Atomistik*; Prantl, *Gesch. d. Logik*; also in the Encyclopedias of Ersch-Gruber, Herzog, and Encyc. Britannica. Useful for the literary history is the Ueberweg-Heinze *Grundriss der Gesch. d. Philosophie*, 8th ed., 1898, ii. 237-253. The sketch of I. S. Spiegler, *Gesch. d. Philosophie d. Judenthums*, 1881, is of little practical value. Much that is valuable may be found in the larger histories of Jost, Graetz, and David Cassel. The essay on Jewish-religious philosophy by Philip Bloch in Winter-Wünsche, *Jüd. Lit.* 1894, ii. 699-793, is thoroughly reliable, as is also G. Karpeles, *Gesch. d. Jüd. Lit.* 1886, pp. 419 *et seq.* Of monographs may be mentioned: On the Cabala, Ad. Franck, *Système de la Kabbale*, 1843, 2d ed., 1889 (German by A. Jellinek, 1844); D. H. Joël, *Die Religionsphilosophie des Sohar*, 1849. Among works dealing with special problems and individual exponents of Arabic-Jewish philosophy, the most important are M. Joël, *Beiträge zur Gesch. d. Philosophie*, 1876, and David Kaufmann, *Gesch. d. Attributenlehre in d. Jüd. Religionsphilosophie*, 1877. See also the studies by Moritz Eisler and A. Schmiedl. Optimism and pessimism in Jewish religious philosophy have been treated by H. Goitein, 1890; the doctrine of the Freedom of the Will, by L. Knoller, *Das Problem der Willensfreiheit*, 1884, and by L. Stein, *Die Freiheit des Willens*, 1882. J. Guttmann has furnished excellent monographs upon Saadia, Ibn Gabirol, and Ibn Daud. A conclusive monograph upon Maimonides' philosophy has not yet been written; but his "Ethics" has been luminously treated by Jaraczewsky, *Zeitschrift für Philosophie*, 1865, and by D. Rosin, 1876.

K. L. S.

ARABIC LANGUAGE AMONG JEWS, USE OF: The precise period of the first settlement of Jews in Arabia is unknown, and it is therefore impossible to say when the Arabic language was first employed by them. Historical data concerning the Jews of Arabia do not reach further back than the first century of the common era; but, judging by the important positions which they occupied then in parts of Arabia (compare Yakut, "Geog. Wörterbuch," ed. Wüstenfeld, iv. 461 *et seq.*) and by the purely Arabic names which they bore, Jews must have already been settled in the country for several centuries.

Among the ante-Islamic poets there were a number of Jews; and a certain Sarah, a Jewess, wrote some Arabic verses, in which she poured forth her grief at the massacre of her tribe of Ḳoraiza (Nöldeke, "Beiträge zur Kenntniss der Poesie der Alten Araber," p. 54). A Jew, named Al-Samau'al, made himself as famous by his loyalty as by his poetry, and the Arabs to-day still use the phrase, "as loyal as Al-Samau'al," to express unswerving fidelity (Freytag, "Proverbia Arabum," ii. 828). The son of Al-Samau'al, Shoreikh, also occupied an honorable place among ante-Islamic poets.

In adopting the Arabic language, the Jews introduced into it a number of Hebrew words and expressions which, in certain portions of Arabia, where Jews were numerous and influential—as in the Yemen district, for example—have entered into the native vocabulary. It is owing to this that the Himyaritic inscriptions abound in Hebraisms and words which are altogether unintelligible to Arabs of other localities.

Adopted by Eastern Jews.

With the conquests that began immediately after the death of Mohammed, the Arabic language crossed the frontiers of Arabia and spread rapidly among the Jews of other countries. In Egypt, Syria, Palestine, and Persia, which were conquered by the second calif, Omar, the Jews soon learned to use the language of the conquerors and adopted it as their mother-tongue. As early as the beginning of the eighth century, scarcely fifty years after the conquest, a Babylonian Jew, Jawaih de Bassora, translated a medical work from Syriac into Arabic; it is thus evident that at that period the Babylonian Jews were already familiar with the Arabic language. As Babylonia then exercised a religious hegemony over the whole Jewish world, it became necessary for the Jews of other countries—at least for Jewish scholars—to understand the official language of Babylonia. Consequently, when Africa and Spain were conquered under Walid I., the Jews found no difficulty whatever in sustaining intercourse with the Arabs.

The adoption of the Arabic language by the Jews residing in Moslem countries had a salutary effect also upon the Hebrew tongue. The Arabs attached great importance to the correct use of their language; and thus the Jews, who always cherished a deep love for the Hebrew tongue, were led to turn their attention to the deplorable state into which their own language had fallen. They set about polishing it, as it were, and created a grammar for it, modeled after that of the Arabic. Hebrew poetry, which in the seventh century resembled nothing so much as a lyre with broken strings—it was without rime or meter—began, under the influence of the study of Arabic poetry, to assume elegant rhythmic forms, and soon surpassed the latter in sonorousness and polish.

Characteristics of Jewish-Arabic.

But upon the written or literary Arabic language the Jews likewise exerted a special influence which was not so wholesome. Jewish writers, treating of subjects pertaining to religion and Judaism, were forced in some degree to conform to the culture of the people for whom they wrote, the great mass of whom, though speaking Arabic as their mother tongue, were not able to read it, and were unfamiliar with its niceties of style and complicated grammar. Jewish authors were therefore compelled to transliterate the Arabic into Hebrew characters and to simplify the grammar. The system of transliteration was as follows: for each Arabic letter the corresponding Hebrew was given. The letters غ ظ ض ذ خ ث, which have no equivalents in Hebrew, were represented by ת̇ כ̇ ד̇ צ̇ ט̇ ג̣, with dots above or below the letters. The vowel-points were rendered either by the same signs as used in the Arabic or by the vowel-letters אוי. In regard to grammar, the Jews avoided whatever could embarrass a reader who was not well versed in Arabic literature. Thus, for example, the broken-plural forms, so numerous in literary Arabic, were reduced to a minimum, only such being retained as were familiar to all. The purely orthographic signs, like the *alif* in the third person of the plural, were generally omitted. Contrary to grammatical usage, the second or third radical letter of a weak verb was generally retained in the conditional and imperative moods, to indicate to the reader the three radical letters of which the verb was composed. The rules of syntax were very much relaxed; and the style of what may be conveniently termed "Judæo-Arabic" often presents the same characteristics of disorder and confusion that are met with in the Hebrew vernacular literature of the Middle Ages.

With the overthrow of the dynasty of the Almohades at the close of the thirteenth century, the Arabic language ceased to be spoken by the western Jews; but for many centuries it continued to be cultivated by Jewish scholars of all countries for the sake of the many beautiful literary relics which Jewish authors have left in that language. It is still spoken by the Jews of Algeria, Morocco, Tunis, Egypt, Tripoli, Yemen, and Syria.

Bibliography: Steinschneider, in *Jew. Quart. Rev.* xiii. 303-311.

G. I. Br.

ARABIC LITERATURE OF THE JEWS:

From the time that the Arabs commenced to develop a culture of their own, Jews lived among them and spoke their language. Gradually they also employed the latter in the pursuit of their studies, so that Jewish literature in Arabic extends over all the branches in which Jews took an interest. Indeed, the material is so vast that it is impossible to give a comprehensive survey of it in small compass; and it is owing to this circumstance that there is no work on the subject, although one by Steinschneider has been in preparation for many years (see "Z.D.M.G." liii. 418).

First Poem Is by a Woman.

1. Early Literature: The earliest literary productions are not of a specifically Jewish character, but are similar to those of the Arabs. They consist of poems composed in celebration of public or private events, and date from the second half of the fifth century of the present era. The first was composed by a poetess of Medina named Sarah, who bewailed the slaughter of a number of her people by an Arab chief. The same event is alluded to in some other verses by an unknown poet. About the middle of the sixth century there flourished in North Arabia Al-Samau'al (Samuel) b. Adiya, whose name is often mentioned and whose verses are to be found in the most notable compilations of ancient Arabic poetry. At the time of Mohammed there lived in Medina the poets Al-Rabi ibn Abi 'al-Ḥuḳaiḳ, Ka'ab ibn Asad, Asma (a woman), Ka'ab ibn al-Ashraf (assassinated by order of Mohammed), Al-Sammak, Aus of Kuraiza, Abu al-Diyal, Shuraiḥ, Jabal ibn Jauwal, and finally Marḥab of Khaibar. Toward the end of Mohammed's career the convert Al-Ḥusain, who assumed the name Abd Allah ibn Salam, wrote homilies and sacred legends drawn from Jewish sources, thus furnishing the first elements of the "Ḥadith" (Moslem tradition). He was followed by Yamin ibn Yamin (Benjamin), Ka'ab ibn Aḥbar, and Wahb ibn Munabbikh (the last two hailing from Yemen), all of them converts to Islam. Of other literary productions by Arab Jews in this early epoch there is no record, except of the so-called "Kitab al-Ashma'at," mentioned by an anonymous author of the ninth century. This work, which Sprenger ("Leben und Lehre Mohammed," i. 49) believes to have been an ancient book of revelation, was not an Arabic work, but was probably only a compendium of rabbinical discussions, which its author naturally styled "Shema'ata." Abd Allah ibn Saba, who is supposed to have been a Jew, was the first to ascribe divine honors to the calif Ali. He founded the Shiite sect of the Sabaiyya. This ends the first period, a special feature of which is that all its literary productions have been transmitted through Mohammedan channels (see Delitzsch, "Jüd. Arabische Poesien aus Mohamm. Zeit," 1874; Nöldeke, "Beiträge zur Kenntniss der Poesie der Alten Araber," pp. 52-86; Hirschfeld, "Essai sur l'Histoire des Juifs de Medine," in "Revue Etudes Juives," vii. 167-193, x. 10-31).

2. Karaites: It was in the second period that Arabic began to be used as a scientific language. The first to employ it for theological works were the Karaites. The founder and oldest teacher of this sect, indeed, still employed the rabbinic dialect; but later on, when the gulf between the Karaites and the Rabbinites widened, the former employed Arabic, not merely on account of the spread of that language, but apparently out of spite to the Rabbinites, whom they wished to prevent from reading their books. It was evidently for the same reason that the Karaites afterward employed Arabic characters for Hebrew quotations and translations.

There is not much variety in the Arabic writings of the Karaites, as they nearly all have the same tendency, and were composed in defense of narrow religious views. The branches chiefly dealt with are Biblical Exegesis, Halakah and Theology, Polemics against Rabbinites, and Linguistics. There is, however, still so much uncertainty as to many details, that final results can not in many cases be obtained till further researches shall have been made among the manuscripts in the various public libraries.

Apogee of Karaite Literature.

With the beginning of the tenth century Karaite literature enters its fullest period. The struggle was reciprocal, and is no doubt largely responsible for the growth of Arabic works among Rabbinite Jews. There was hardly one prominent Karaite writer of this period who did not attack Saadia. The first claiming mention is Sulaiman ibn Ruḥaim (Salomon b. Jeroham), who wrote commentaries on the Psalms, Lamentations, and Ecclesiastes (MSS. British Museum, 2515-17, 2520; Hirschfeld, "Arab. Chrestom." pp. 103-109). Next to him must be mentioned Yusuf Ḳirḳisani, whose "Kitab al-Anwar we al-Manaḳib" (ס׳האורים) forms an introduction to his commentary on the Pentateuch (Bacher, "Jew. Quart. Rev." vii. 687-710; Harkavy, "Mém. Russ. Arch. Soc. Sect. Orient." viii. 247-321; Poznanski, in Steinschneider, "Festschrift," pp. 195-218; *idem*, "Semitic Studies in Memory of A. Kohut," pp. 435-456; Hirschfeld, *ib.* pp. 116-121). The most fertile of all, however, is Jefeth ibn 'Ali ha-Levi (Ḥasan al-Basri) (Commentary on Daniel, ed. D. S. Margoliouth, Oxford, 1891). Besides his "Sefer ha-Mizwot," he wrote commentaries on all the Biblical books, and paid more attention to linguistic questions than his contemporaries. His son Levi (Abu Sa'id) commented on the Pentateuch and on Joshua, and composed a compendium of the "Agron" (dictionary) by David ben Abraham of Fez. David b. Boaz (993) wrote commentaries on the Pentateuch and on Ecclesiastes, and also a "Kitab al-Uṣul."

The beginning of the eleventh century is marked by Yusuf al-Baṣir (Ha-Ro'eh), who wrote several works on theology and halakah: for example, "Al Muḥtawi" (The Comprehensive One), several responsa, the "Kitab al-Istibṣar," on the law of inheritance, of which some fragments are still extant, and the "Kitab al-Isti'āna," of philosophic character (see P. F. Frankl, "Ein Mu'tazilit. Kalām," in "Sitzungsber. der Wiener Acad." 1872, pp. 169 *et seq.*). About 1026 Abu al-Faraj Harun ibn al-Faraj completed his grammatical work "Al-Mushtamil" (Poznanski, "Rev. Et. Juives," xxxiii. 24-39). He was also the author of a commentary on the Pentateuch. Ali b. Sulaiman, of the twelfth century, left, besides an exegetical work on the Pentateuch, an igron based on that of the above-named David ben Abraham.

Karaite Literature in Egypt.

Karaite literature, after its decay in Asia, found a new home, in the thirteenth century, in Egypt; but its productions were inferior to those of the preceding epoch. Israel b. Samuel ha-Dayyan of Maghreb composed a treatise on "Six Articles of Creed," another on the ritual slaughter of animals, and, finally, a "Sefer ha-Mizwot." A work similar to the last-named was written by his pupil, the physician Jefeth ibn Saghir (Al-Ḥakim al-Ṣafi); and another is known as the "Siddur of Al-Fadhil" (Isaiah Cohen ben Uzziyahu) (Steinschneider, "Cat. Berlin," ii. 48; other ritual works, MSS. Brit. Mus. Or., 2531-32, 2536). Judah ben Meïr (also called Al-Ḥakim al-Ṭhafi) wrote a commentary on Esther. Among commentators on the Pentateuch mention should be made of Al-Mu'allim Abu Ali (Sahl ben Maẓliaḥ al-Imam), Abu al Sari, Abu al-Faraj-Furḳan, and Al-Muḳaddasi.

The most important author of the fourteenth century is the physician Samuel of Maghreb, whose chief work was "Al-Murshid" (The Guide). Besides this, he wrote prolegomena to the Pentateuch. In 1415 Elijah ha-Dayyan wrote a work on the calendar rules, of which a Hebrew translation exists in St. Petersburg. An important "Chronicle of Karaite Doctors" was compiled at the beginning of the fifteenth century by Ibn al-Hiti (G. Margoliouth, "Jew. Quart. Rev.," ix. 429–443). As late as the seventeenth century David b. Moses Feirūz composed a treatise in imitation of Baḥyah ibn Paḳudah's "Guide to the Duties of the Heart." Even at the present day, Arabic is used, although not largely, by Karaites in Egypt: in that language they read the Passover Haggadah (ed. Presburg, 1868).

3. Saadia: The development of Arabic literature among Rabbinites is indirectly due to the Karaites. Saadia of Fayum (see SAADIA GAON) was the first to enter the lists against the latter with various polemical treatises, of which various fragments have lately come to light. His works not only extend over every branch of Jewish learning then in existence, but he even created a new one; namely, religious philosophy. It was evidently his intention to prevent Rabbinite Jews from making use of Karaite writings of any kind. His translation and commentaries on nearly the whole Bible earned for him the name of "The Commentator"; and his version of the Pentateuch in particular obtained such popularity that it was looked upon in the light of a Targum, and is still so considered in Arabic-speaking countries. It is found in Yemen MSS. side by side with the Targum Onkelos. Under the title "Agron," he also produced a philological work, the only existing fragment of which has recently been published by Harkavy, together with the remains of his "Sefer ha-Galuy" ("Studien und Mittheilungen aus der Kaiserl. Bibl. zu St. Petersburg," v.). He also wrote a treatise on "Ninety [seventy] Unique or Rare Words in the Bible" (the original is lost, but the Hebrew version has been edited by A. Jellinek) and a large grammatical work. For liturgical purposes he provided a prayer-book, which he enriched with many compositions of his own, whilst the directions were written in Arabic. He also wrote a chronological treatise, and another on the law of inheritance (H. Derenbourg and Mayer Lambert, ix., "Traité des Successions," etc., Paris, 1897). (For Saadia's philosophical writings see below.) To the number of pseudonymous writings under his name, belong a Midrash on the Decalogue (ed. Eisenstädter, Vienna, 1868; Joseph Shabbethai Farkhi, 1849)—which is, however, nothing but a paraphrase made for liturgical purposes—and a description of man (Steinschneider, "Cat. Berlin," i. 48).

4. Bible: Having thus briefly sketched the manner in which Jewish-Arabic literature was brought into existence among Rabbinites, it will be best to outline its further development according to subject-matter. Next to Saadia, Gaon Samuel b. Ḥofni of Bagdad (died 1034) wrote commentaries on various Biblical books, but only part of them survive (Samuel b. Ḥofni, "Trium Sectionum Posteriorum Libri Genesis Versio Arabica," 1886). The decline of Jewish learning in Iraḳ was followed by its rise in Spain; and Arabic appears as the favorite language for Jewish writings. Ḥafẓ al-Ḳuṭi, the Goth (1000-1050), composed a metrical paraphrase of the Psalms (A. Neubauer, "Revue Etudes Juives," xxx. 65–69). Moses ha-Kohen Giḳatilla of Cordova (1050-1080), stimulated by Abu al-Walid's grammatical and lexical writings, composed commentaries on the Pentateuch, the Prophets, Psalms, Job, Canticles, and Daniel; but only fragments of them have been preserved, in the form of quotations in the works of later authors (S. Poznanski, "Ibn Jiḳatilla Nebst den Fragmenten Seiner Schriften," Leipsic, 1895). To the same period probably belong two anonymous translations of Ruth. Isaac ben Judah ben Ghayat (1039) left a version of Ecclesiastes (ed. J. Loewy, Leyden, 1884). A younger contemporary but very bitter opponent of Moses Giḳatilla was Judah b. Balaam of Toledo (1070-1090). His commentaries on the Bible have likewise been but incompletely handed down (see Neubauer, "The Fifty-third Chapter of Isaiah," pp. 384–385; Bacher, Stade's "Zeitschrift," xiii. 129–155). Fragments of an anonymous commentary on the Psalms, dating from the twelfth century, are preserved in the library of St. Petersburg. In 1142 the physician Ḥibat Allah (Nathanael) commented on Ecclesiastes. He subsequently embraced Islam. At the beginning of the thirteenth century Joseph b. Aḳnin, Maimonides' renowned pupil, is supposed to have written a commentary on Canticles and a treatise on Biblical measures (Munk, "Notice sur Joseph b. Jehoudah," in "Journal Asiatique," 1842, xiv.; Steinschneider and Neubauer, in "Magazin," 1888). A commentary of his on the Pentateuch is mentioned by Al-Mwaḳḳit (MS. Brit. Mus. Add. 27294, p. 166). **Commentaries.** Somewhat later Tanḥum of Jerusalem composed commentaries on the Pentateuch and on many other parts of the Bible ("Commentary on Joshua," ed. Th. Haarbrücker, Berlin, 1862; "Comm. on Judges," ed. Goldziher). Isaac b. Samuel ha-Sefardi (end of the fourteenth century), who commented on the Prophets, likewise lived in Palestine (Steinschneider, "Hebr. Bibl.," xix. 135, xx. 10). A commentary on the second book of Samuel was written by Isaac b. Samuel (Margoliouth, "Jew. Quart. Rev.," x. 385–403). Part of this commentary is to be found in the Bodleian Library, Oxford. In the fifteenth century there flourished in Yemen Abraham b. Solomon, who compiled notes on the Prophets (Poznanski, *l.c.* p. 68). A commentary on Esther, regarded as a pseudonymous work of Maimonides, was edited (Leghorn, 1759) by Abraham b. Daniel Lumbroso. It probably dates from the sixteenth century, and is written in the dialect of Maghreb. The last century has witnessed a new awakening of literary interest among the Jews of Asia and Africa; and the printing-presses of Leghorn, Cairo, Algiers, Oran, Jerusalem, Bombay, Poona, and Calcutta are busy with translations, chiefly of those books of the Bible that are used in the liturgy, viz., Pentateuch, Haftarot, Psalms, the Five Scrolls, and Job ("Hebr. Bibl." xiii. 49). A translation of the whole Bible by Ezekiel Shem-Ṭob David was printed in Bombay in 1889, and one of the Apocrypha by Joseph David in 1895.

Following in the wake of exegesis there sprang up a literature of Midrashic and homiletic explanation of the Bible. The British Museum possesses manuscripts (Or. 66–70) of discourses on the Pentateuch, which are attributed to David b. Abraham, Maimonides' grandson. The bulk of the homiletic

Midrashim and Homilies.

literature belongs to Yemen. In the middle of the fourteenth century Nathanael ben Isaiah compiled a kind of Midrash under the title "Nur al Ṭhulm," specimens of which are still extant (*idem*, xii. 59; Alexander Kohut, "Light of Shade and Lamp of Wisdom," New York, 1894; Hirschfeld, "Arab. Chrestom." pp. 11–14). The physician Yaḥya b. Sulaiman (Zakariyya, about 1430) was the author of the Midrash Ḥefeẓ, written in a mixture of Hebrew and Arabic (Steinschneider, "Cat. Berlin," i. 64, 71); a commentary on which exists under the title "Al-Durrah al-Muntakhaba" (MS. Brit. Mus. Or. 2746). A few decades later Sa'id b. Da'ud al-Adani wrote homilies on the Pentateuch under the title "Kitab najat al-gharikin" (*ib.* 2785). Abu Manṣur al-Dhamari was the author of the "Siraj al-'Uḳul" (see Kohut, "Aboo Manzur al-Dhamâri," New York, 1892); and, finally, David al-Lawani composed a Midrashic work, "Al-Wajiz al-Mughni." Glosses on the Decalogue were written by Moses b. Joseph al-Balidah (MS. Brit. Mus. Or. 2746). Various anonymous compilations, belonging to the same class and written in vulgar dialect, also exist (Hirschfeld, *l.c.* pp. 14–19).

Philology.

5. Linguistics: Jewish philologists modeled their works on those of the Arabs. It is, therefore, not surprising that many of them were written in Arabic. The earliest Jewish grammarian is Judah b. Ḳoraish, of Tahort, in North Africa (ed. Bargès, Paris, 1859). His "Risalah" (Epistle), exhorting the community of Fez not to neglect the study of the Targum, embodies the first attempt at a comparative study of Semitic languages. He is, however, far outranked by Saadia, who was the first to make philological studies a special science. Saadia's first work, styled "Agron," of which only some fragments have been preserved, was partly lexicographical, partly grammatical. More details on the latter subject were to be found in his chief work, "Book on the [Hebrew] Language," in twelve parts; but unfortunately this is not now in existence. The only two works of his that have been preserved are his etymological essay on "Ninety [seventy] Unique or Rare Words in the Bible," and his commentary on the "Sefer Yeẓirah," which contains grammatical paragraphs. In the middle of the tenth century there flourished in Kairwan Dunash ben Tamim. Soon after Saadia, Abu al-Faraj Harun of Jerusalem, the Karaite, composed a work on grammar and lexicography under the title "Al Mushtamil" (Poznanski, "Rev. Et. Juives," xxx. 24–39, 197–218).

The oldest linguistic studies in Spain were not written in Arabic, but in Hebrew; and there is none of real importance till Judah Ḥayyuj (of Fez), who, at the beginning of the eleventh century, witnessed the famous struggle between the pupils of Menaḥem and Dunash ben Labrat. Ḥayyuj was followed by Abu al-Walid Merwan (Jonah) b. Janaḥ, whose writings are of a more comprehensive nature. The latter not only criticized and supplemented Ḥayyuj, but wrote important grammatical works and a dictionary ("The Book of Hebrew Roots," ed. A. Neubauer, Oxford, 1875; Hebrew version, ed. W. Bacher, Berlin, 1894). Judah b. Bal'am wrote on the accents of the first three books of the Hagiographa, on homonyms ("Kitab al-Tajnis"), and several smaller treatises. Prominent alike as commentator of the Bible and grammarian was Moses Gikatilla, who wrote on the "Masculine and Feminine"; but this work is lost. To the same century belongs Isaac b. Jashush, who was the author of a work on Inflections ("Kitab al-Taṣarif"). The twelfth century shows further development. Abu Ibrahim b. Barun wrote "Kitab al-Muwazana," a treatise on comparative Hebrew and Arabic philosophy (ed. with a Russian introduction and annotations, by P. v. Kokovzow, St. Petersburg, 1893). Judah ha-Levi's "Alkhazari" has a grammatical chapter with interesting features (ed. Hirschfeld, pp. 128–138). After this period Hebrew preponderated over Arabic for philological pursuits. In the fourteenth century there is only Tanḥum of Jerusalem, who wrote a dictionary on the Mishnah ("Al Murshid") in connection with Maimonides' commentary on the same. In the fifteenth century the African, Saadia ben Danan, composed a grammatical work and a Hebrew-Arabic dictionary. Another glossary on Maimonides' Mishnah commentary was compiled by David ben Yesha ha-Lewi of Aden (Steinschneider, "Cat. Berlin," No. 113). Of anonymous writings mention may be made of a grammatical compendium attached to a Karaite prayer-book (MS. Brit. Mus. Or. 25–36), an Arabic-Persian vocabulary (MS. Brit. Mus. Add. 7701), a treatise on difficult words in Bible and Mishnah (Hirschfeld, "Arab. Chrestom.," pp. 31–34), and a chapter on Biblical Aramaic (*ib.* pp. 54–60).

6. Talmud and Halakah: It was but natural that in the Talmud and Halakah Arabic did not become so popular as in other branches of Jewish literature. The rabbinic dialect for discussions on Halakah was too firmly established to suffer the intrusion of Arabic; and much that has been written on such subjects in Arabic has either perished, or has been chiefly studied in Hebrew versions. There is no sufficient evidence to prove that an Arabic version of the Mishnah by Saadia was ever written, since the short notice given by Pethahiah of Regensburg is too scant to admit of any definite conclusions. Some of his Arabic responsa have been preserved. The translation made by Saadia's Spanish contemporary, Joseph ben Abi Thaur, was not made to supply a want felt by Jews, but at the request of a bibliophile ruler. It is therefore not surprising that it should have been lost, as probably not more than one copy of it ever existed.

Maimonides.

Joseph b. Abraham b. Sheth and Isaac al-Faz wrote responsa in Arabic. Maimonides, while writing his commentary on the Mishnah in Arabic, left the text untranslated; and it was the Hebrew version of this commentary which became popular, although the original was also frequently copied. Many portions of the same exist in print; and its study is of the utmost importance in the verification of the version attached to present-day editions of the Talmud. Maimonides also wrote a "Sefer ha-Mizwot" in Arabic, to serve as a kind of introduction to his Mishnah Torah (introduction and the first three paragraphs edited, with German translation, by M. Peritz, Breslau, 1882; the whole edited, with French translation, by M. Bloch, Paris, 1888). Lastly, he used Arabic for numerous responsa; and the autographs of a few of these are fortunately still in existence (Margoliouth, "Responsa of Maimonides in the Original Arabic," in "Jew. Quart. Rev." xi. 553; Simonsen, "Arabic Responsa," *ib.* xii. 134–137; "Hebr. Bibl." xix. 113). His son Abraham, though not inheriting his father's genius, possessed much Talmudic learning, and endeavored to supplement the latter's writings by a work wherein religious observance was discussed in a semi-philosophical manner ("Kitab al-Kifayah"). In a correspondence with David b. Ḥisdai of Bagdad ("Maasē Nissim," edited by B. Goldberg, Paris, 1867), he defends the theories of his father. There also exists a collection of Arabic responsa by him under the title "Megillat Setarim" (MS. Montefiore [Halberstam], p. 56). Among the fragments brought from the Genizah in Egypt, there are a host of smaller Arabic essays and letters on matters of Halakah. Ritual commentaries in Arabic are attached to many prayer-books now in use in Asiatic and African communities. Samuel b. Jam‘ wrote on the slaughter of animals ("Karmel," iii. 215; Geiger's "Jüd. Zeit." 1862). A volume on the laws to be observed by women was published by Jacob Anḳawa (Algiers, 1855), who translated the "Sefer Dat Yehudit" (published Leghorn, 1827) from Spanish into Arabic.

7. Liturgy: The employment of Arabic for liturgical purposes commenced with the translation of such portions of the Bible as held a place in public worship. It has been stated above that Saadia supplemented his prayer-book with an Arabic text containing ritual regulations—a practise imitated in the Yemen prayer-books, the oldest of which date from the fifteenth century ("Hebr. Bibl." xxi. 54; "Cat. Berlin," i. 69, 117–130; W. H. Greenburg, "The Haggadah According to the Rite of Yemen," London, 1896). Although in the prayer itself Hebrew was adhered to, Arabic began to encroach upon the piyyuṭim in the sixteenth century, and was subsequently very largely employed. Some of these piyyuṭim enjoy great popularity, as, for example, the Habdalah "Song of Elijah" (Hirschfeld, "Journal Royal Asiatic Society," 1891, pp. 293–310), the tale of Hannah (*idem*, "Jewish-Arabic Liturgies," in "Jew. Quart. Rev." vi. 119–135, vii. 418–427), other "ḳinot," the Arabic version of Bar Yoḥai, etc. The prayer-books printed for use in Oriental and African communities have many Arabic piyyuṭim appended; and a survey of this neglected field of Jewish literature would well reward the labor bestowed on it, because it offers interesting linguistic problems besides. A special feature of these prayer-books is the (vulgar) Arabic version of the Aramaic Targums of some portions of the Pentateuch, such as the blessing of Jacob, the Song of Moses, and the Decalogue; also prominent Hafṭarot, as that of the last day of Passover and the Ninth Day of Ab; finally, of the Five Scrolls, and the Megillat Antiochus (*idem*, "Arab. Chrestom." pp. 1–6). Favorite subjects for translation are Ibn Gabirol's "Azharot," Judah ha-Levi's famous piyyuṭ, מי כמוך (Alexandria, 1879), for the Sabbath before Purim, and a legendary paraphrase of Abot, v. 9 (שיר שבחה, Leghorn, 1846). Besides the last-named, the whole of the Pirḳe Abot (רוכב ערבות, ed. Joseph Shabbethai Farḥi, Leghorn, 1849) has in many prayer-books its Arabic version side by side with the original. The Passover Haggadah has often been edited with Arabic translation and commentaries. Karaite prayer-books show similar features. Arabic directions are already to be found in Fadhil's (Isaiah Cohen b. Uzziyahu) "Siddur" (see above, par. 2), not to speak of later compilations. Isaac b. Solomon gave an Arabic version of "Ten Articles of Creed" (פנת יקרת, Eupatoria, 1840).

Ritual.

8. Philosophy and Theology: The employment of Arabic for philosophical discussion grew out of conditions that differed from those which affected most of the preceding branches. Jews would probably never have written on philosophy, had they not been impelled to do so by the Arabs, whose works formed their sole sources of information on this subject. These latter provided them with a terminology, for which the Hebrew language offered no facilities; and their influence is so apparent that the Hebrew translations from Arabic, as well as works written originally in Hebrew, bear a thoroughly Arabic stamp. All Jewish philosophical works that were epoch-making are written in Arabic, and most of them are evidently meant for Arab readers also.

Although not exactly the oldest philosophical author, Saadia was the first to form his ideas on Jewish theology into a system. He was therefore the father of Jewish philosophy. His method is that of the class of Mohammedan philosophers known as Motazilites. Somewhat earlier than Saadia was Abu Ya‘aḳub Isḥaḳ b. Sulaiman (Isaac Israeli the elder, died about 950), physician to Abu Muḥammed ‘Ubaid Allah al-Mahdi in Kairwan. He was the author of a "Book of Definitions"—probably the oldest of its kind—preserved in a Hebrew version only (ed. H. Hirschfeld, pp. 233, 234; Steinschneider, "Festschrift," pp. 131–141). The first period also includes Baḥya b. Josef b. Paḳodah (lived in Spain 1040), the author of "Duties of the Heart" and "Reflections of the Soul." His contemporary, Solomon b. Gabirol, was the first to introduce Neoplatonic ideas into Jewish philosophy. His Arabic works are "The Source of Life," "Improvement of Morals," and the ethical treatise "Choice of Pearls" (Munk, "Mélanges de Philosophie Juive et Arabe," Paris, 1859). Judah ha-Levi (1140) treats Jewish theology from quite a different point of view. In his famous "Kitab Alkhazari" (ed. H. Hirschfeld, with the revised Hebrew version, Leipsic, 1887) he discards the method of the Kalâm as well as Aristotelianism in general, and takes his stand on tradition. He also vigorously attacks the doctrines of the Karaites. Joseph b. Ẓaddiḳ of Cordova (died 1149), in his "Microcosm," discussed ideas fostered by Ibn Gabirol. Abraham ibn Daud (died 1180) paved the way toward absolute Aristotelianism in his "Emunah Ramah."

Development of Jewish Thought.

Jewish philosophy reached its apogee in Moses Maimonides. Maimun (the father) himself was the author of the "Letter of Consolation" (ed. L. M.

Maimonides.

Simmons, "Jew. Quart. Rev." ii. 335), in which he warned Jews not to forget their belief, although compelled to appear outwardly as Moslems. His son Moses, the greatest of Jewish thinkers, composed, when still young, a compendium of logic, and a treatise on the "Unity [of God]," in Arabic. The introduction to his commentary on Abot is also of philosophical character, and is known under the separate title, "Eight Chapters" (Pocock, "Porta Mosis," pp. 181 *et seq.*, ed. M. Wolff, with German translation, Leipsic, 1863). The commentary on "Heleḳ," the tenth chapter of Sanhedrin (*ib.* pp. 133 *et seq.*), contains the "Thirteen Articles of Creed" formulated by him. A system of his theology is laid down in his chief work, "Guide of the Perplexed" (ed. S. Munk, with French translation, Paris, 1856–66; compare H. Hirschfeld, "Kritische Bemerkungen zu Munk's Ausgabe des Dalälat al-Ḥairin," in "Monatsschrift," xxxix. 404–413, 460–473). Another work of his is the "Consolatory Epistle," sent to the Jews of Yemen. Maimonides was so exhaustive that after him not much was composed that could claim originality. Of those who followed in his steps, mention must first be made of his son Abraham, whose chief theological work has already been mentioned. His co-disciple, Joseph b. Judah b. Aknin (Abu al-Ḥajjaj Joseph b. Yaḥyah al Sabti al Maghrabi), to whom the "Guide" was dedicated, was himself the author of a work "Medicine of the Soul," and of another discovered by Munk. A kind of imitation of the "Moreh" is to be found in the anonymous work "Pearls of the Secrets." An abstract of Aristotelian philosophy in the style of Maimonides is given by Musa b. Tubi in his poem "Al-Sab'iniyyah," consisting of seventy verses (the original, with the Hebrew version and a commentary by Solomon b. Immanuel da Piera, edited and translated by H. Hirschfeld, Ramsgate, 1894).

With the decline of Jewish philosophy the employment of Arabic also diminishes. A commentary on Maimonides' "Sefer ha-Madda'" was written by 'Ala al-Din al-Muwaḳḳit (MS. Brit. Mus. Add. 27294). There still remains to be mentioned Judah b. Nissim b. Malka, whose work "Anas al-Gharib" contains a commentary on the "Sefer Yeẓirah" and the "Chapters on R. Eliezer" (Hirschfeld, "Arab. Chrestom.," pp. 19–31), and several anonymous treatises on "Macrocosm and Microcosm" ("Cat. Berlin," ii. 105), which Steinschneider believes to be an abstract from Joseph Kirkisani's work mentioned above. An ethical treatise exists in manuscript in the Bodleian Library, Oxford (Neubauer, "Cat. Bodl. Hebr. MSS.," No. 1422).

9. Polemics: Here may be recorded some works of a polemical character, because they are theological as well. These comprise not only the conflicts between Rabbinites and Karaites, but also treatises written to repel the encroachments of philosophy and the dogmas of other creeds. Among these writers is David al-Meḳammeẓ, to whom is attributed a work entitled "Twenty Treatises" (Steinschneider, "Cat. Bodl." col. 880). The writings of Sulaiman b. Ruḥaim and Jefeth (see above) abound in attacks upon the Rabbinites; but these were completely defeated by Saadia. Further attacks were made by Samuel b. Ḥofni (*ib.* col. 1034; "Z. D. M. G." viii. 551, ix. 838), by Samuel ha-Nagid (who also criticized the Koran), and especially by Judah ha-Levi. Affiliated to the "Alkhazari" of the last-named, and written in defense of Judaism, was Sa'ad b. Manṣur's (1280) "Tankiḥ al-Abḥath" (L. Hirschfeld, "Sa'ad b. Manṣur ibn Kammūna," Leipsic, 1893; Goldziher, in "Steinschneider Festschrift," pp. 110–114). Pseudonymously attributed to Sa'ad is a work dealing with the "Differences Between the Rabbinites and the Karaites" (H. Hirschfeld, "Arab. Chrestom." pp. 69–103). Another anonymous work is the "Report of the Discussion with a Bishop." Finally, mention must not be omitted of two Jewish renegades, viz., Ibn Ḳusin, a physician in Mosul, and an anonymous writer who pretended to prove the truth of Mohammed's prophethood.

10. Cabala: Arabic commentaries on the "Sefer Yeẓirah" were written by Isaac Israeli (Steinschneider, "Cat. Berlin," i. 55), Saadia (ed. with French translation by M. Lambert, Paris, 1891), and Judah b. Nissim b. Malkah (see above). Greater activity has been displayed in the present age. An Arabic translation of the "Sefer Yeẓirah" was made by Abraham David Ezekiel, in Bombay (Poona, 1888). He also translated into Arabic portions of the Zohar ("Idra Zuṭṭa") (*ib.* 1887; Algiers, 1853), "Joseph Ergas" (Bombay, 1888), "Shomer Emunim," and the sermons of Isaac Lopez of Aleppo (Bombay, 1888).

11. Poetry and Tales: Many productions that come under this heading have already been noticed at the commencement of this article and in the paragraph on Liturgy. Several poems by Karaite authors have been published by Pinsker. Single Arabic verses are to be found in many of Ibn Ezra's Hebrew poems (Rosin, "Reime und Gedichte des Abraham ben Ezra," Breslau, 1888); and in one of Al-Ḥarizi's Makamas (No. xi.) a poem is inserted in which each verse is divided into Hebrew, Aramaic, and Arabic portions. The Makamas are preceded by an Arabic preface (Steinschneider, "La Prefazione Arabica delle Makamat di Giuda Al-Harizi," etc., Florence, 1879). Abraham b. Sahl, although born a Jew, ranks among Mohammedan poets. The philosophical poem of Musa ben Tubi has already been mentioned. In the eighteenth century there flourished in Aden, Shalom b. Joseph Shabbezi (ספר עץ חיים. MS. Brit. Mus. Or. 4114), who compiled a diwan of Arabic poems, many of which are of his own composition. Of more recent works mention may be made of the interesting collection of epigrams, quatrains, and ditties, styled "Safinah Ma'luf," by Solomon b. Ḥayyim Bunan (Leghorn, 1877). For prose works on the subject of belles-lettres the chief place belongs to Moses ibn Ezra's "Kitab al-Muḥadharah wal-Mudaharah" (Schreiner, "Rev. Et. Juives," xxxi. 98–117, xxxii. 62–81, 236–249; R. K. Kokowzow, "Kitab al-Muḥadharah," St. Petersburg, 1895; portions of Arabic text with Russian introduction; H. Hirschfeld, "Arab. Chrestom." pp. 61–63). A collection of proverbs was printed in Bombay in 1889. Isaac Crispin's ethical treatise was translated by Joseph b. Ḥasn. A translation of ס' מוסר מלכים. by Abu Yusuf Ḥabib, was printed at Oran in 1889. There also exists a rich literature of tales, mostly of sacred character, both originals and translations, namely, legendary biographies of the Patriarchs, of Joseph, of Moses, and of Solomon (Bombay, 1886). Of more secular character is a volume entitled מעשה שעשעים (Leghorn, 1868), which contains a version of Sindabad's travels. An anonymous historical work was edited by Ad. Neubauer ("Medieval Jewish Chronicles," ii. 89 *et seq.*).

12. Medicine: Jews distinguished themselves early in medicine, partly by translating from Greek and Syriac, partly by independent works. The oldest is Meserjawaih (883), to whom Steinschneider has devoted a special article ("Z. D. M. G." liii. 428–434). The most prominent Jewish physician of the tenth century was Isaac Israeli (Wüstenfeld, "Gesch. d. Arab. Aerzte," p. 51; Steinschneider, "Hebr. Uebers." p. 761) of Kairwan, mentioned above, who made himself famous by his treatise on "Fevers." Moses b. Eleazer al Israili ("Ibn Abi Oseibia," ed. A. Müller, ii. 87), as well as his sons Isaac and Ishmael, and Jacob the son of the last-named, were physicians to the Vizier Muizz al-Din (end of the century). At the beginning of the twelfth century Jewish physicians in Spain also began to write in Arabic. Abu Ja'far Joseph Aḥmad b. Ḥisdai (a friend of the philosopher Ibn Baja) (*ib.* p. 51) translated the works of Hippocrates for Al-Ma'mun, vizier to the Egyptian calif, Amir bi aḥkam Allah. Likewise in Cairo flourished (1161) the Karaite, Sadid b. Abi al-Bayyan (Steinschneider, "Hebr. Bibl." xiii. 61–63). Maimonides was distinguished as a medical author: among other works on medicine he wrote a commentary on the Aphorisms of Hippocrates (*idem*, "Z. D. M. G." xlviii. 218–224; *idem*, "Hebr. Uebers." p. 769). His son Abraham (Wüstenfeld, *ib.* p. 111), also, was a medical authority, and so was Joseph b. Judah (Munk, "Notice sur Joseph b. Jehouda," p. 58). In the middle of the twelfth century flourished Amram al-Israili ("Ibn Abi Oseibia," p. 213; Steinschneider, "Zwei Jüd. Aerzte Imran b. Sadaga und Muwaffak b. Sebua," in "Z. D. M. G." 1871), born in 1165 at Damascus; died 1239 at Emesa (Ḥimṣ). Samuel b. Judah b. Abbas (see ABBAS) wrote a work styled "Kitab al-Mufid" (*ib.* p. 31). Abu al-Ḥayyaj Jusuf of Fez (*ib.* p. 213) studied under Maimonides. He lived later on in Aleppo and composed a commentary on Hippocrates, as well as a work on pharmacy. To the twelfth century belongs also Al-Asad al-Mahalli (b. Jacob ben Isaac), who lived in Egypt and afterward in Damascus (*ib.* p. 118). In the thirteenth century Ibn Abi al-Ḥasan al-Barkamani wrote on hygiene. A medical encyclopedia was compiled by Abu Mansur al-Haruni (end of the fourteenth century; Steinschneider, "Cat. Berlin," ii. 98, 102; see "Z. D. M. G." xlvii. 374) under the title "Al-Muntaḳib."

13. Mathematics: The oldest Jewish mathematician was Mashallah (Steinschneider, "Z. D. M. G." xlviii. 434–440), who was a prolific writer. An anonymous work on astronomy by a Yemen Jew is described by Steinschneider ("Cat. Berlin," p. 80).

G. H. HIR.

ARABIC PHILOSOPHY — ITS INFLUENCE ON JUDAISM: Arabic philosophy dates from the appearance of dissenting sects in Islam. A century had hardly elapsed after Mohammed revealed the Koran, when numerous germs of religious schism began to arise. Independent minds sought to investigate the doctrines of the Koran, which until then had been accepted in blind faith on the authority of divine revelation. The first independent protest was that of the Kadar (from the Arabic *kadara*, to have power), whose partisans affirmed the freedom of the will, in contrast with the Jabarites (*jabar*, force, constraint), who maintained the belief in fatalism.

Rise of First Radical School.

In the second century of the Hegira, a schism arose in the theological schools of Bassora, over which Ḥasan al-Baṣri presided. A pupil, Wasil ibn Atha, who was expelled from the school because his answers were contrary to tradition, proclaimed himself leader of a new school, and systematized all the radical opinions of preceding sects, particularly those of the Kadarites. This new school or sect was called Motazilite (from *itazala*, to separate oneself, to dissent). Its principal dogmas were three: (1) God is an absolute unity, and no attribute can be ascribed to Him. (2) Man is a free agent. It is on account of these two principles that the Motazilites designate themselves the "Asḥab al-'Adl w'al Tauḥid" (The Partizans of Justice and Unity). (3) All knowledge necessary for the salvation of man emanates from his reason; he could acquire knowledge before as well as after Revelation, by the sole light of reason—a fact which, therefore, makes knowledge obligatory upon all men, at all times, and in all places. The Motazilites, compelled to defend their principles against the orthodox religious party, looked for support to the doctrines of philosophy, and thus founded a rational theology, which they designated "'Ilm-al-Kalam" (Science of the Word); and those professing it were called Motekallamin. This appellation, originally designating the Motazilites, soon became the common name for all seeking philosophical demonstration in confirmation of religious principles. The first Motekallamin had to combat both the orthodox and the infidel parties, between whom they occupied the middle ground; but the efforts of subsequent generations were entirely concentrated against the philosophers.

From the ninth century onward, owing to Calif al-Ma'mun and his successor, Greek philosophy was introduced among the Arabs, and the Peripatetic school began to find able representatives among them; such were Al-Kindi, Al-Farabi, Ibn Sina, and Ibn Roshd, all of whose fundamental principles were considered as heresies by the Motekallamin.

Aristotle, the prince of the philosophers, demonstrated the unity of God; but from the view which he maintained, that matter was eternal, it followed that God could not be the Creator of the world. Again, to assert, as the Peripatetics did, that God's knowledge extends only to the general laws of the universe, and not to individual and accidental things, is tantamount to giving denial to prophecy. One other point shocked the faith of the Motekallamin—

the theory of the intellect. The Peripatetics taught that the human soul was only an aptitude—a faculty capable of attaining every variety of passive perfection—and that through information and virtue it became qualified for union with the active intellect, which latter emanates from God. To admit this theory would be to deny the immortality of the soul (see ALEXANDER OF APHRODISIAS). Wherefore the Motekallamin had, before anything else, to establish a system of philosophy to demonstrate the creation of matter, and they adopted to that end the theory of atoms as enunciated by Democritus. They taught that atoms possess neither quantity nor extension. Originally atoms were created by God, and are created now as occasion seems to require. Bodies come into existence or die, through the aggregation or the sunderance of these atoms. But this theory did not remove the objections of philosophy to a creation of matter. For, indeed, if it be supposed that God commenced His work at a certain definite time by His "will," and for a certain definite object, it must be admitted that He was imperfect before accomplishing His will, or before attaining His object. In order to obviate this difficulty, the Motekallamin extended their theory of the atoms to Time, and claimed that just as Space is constituted of atoms and vacuum, Time, likewise, is constituted of small indivisible moments. The creation of the world once established, it was an easy matter for them to demonstrate the existence of a Creator, and that He is unique, omnipotent, and omniscient.

Argument for Creation.

Toward the middle of the eighth century a dissenting sect—still in existence to-day—called Karaites, arose in Judaism. In order to give a philosophical tinge to their polemics with their opponents, they borrowed the dialectic forms of the Motekallamin, and even adopted their name (Mas'udi, in "Notices et Extraits des Manuscrits de la Bibliothèque Royale," viii. 349–351), and thus transplanted the Kalam gradually to Jewish soil, to undergo the same transformations there as among the Arabs.

Saadia.

The oldest religio-philosophical work preserved is that of Saadia (892–942), "Emunot we-De'ot" (Book of Beliefs and Opinions). In this work Saadia treats of the questions that interested the Motekallamin so deeply—such as the creation of matter, the unity of God, the divine attributes, the soul, etc.—and he criticizes the philosophers severely. For to Saadia there is no problem as to creation: God created the world *ex nihilo*, just as Scripture attests; and he contests the theory of the Motekallamin in reference to atoms, which theory, he declares, is just as contrary to reason and religion as the theory of the philosophers professing the eternity of matter. To prove the unity of God, Saadia uses the demonstrations of the Motekallamin. Only the attributes of essence (*sifat-al-datiat*) can be ascribed to God, but not the attributes of action (*sifat-al-af 'aliyat*). The soul is a substance more delicate even than that of the celestial spheres. Here Saadia controverts the Motekallamin, who considered the soul an "accident" (compare "Moreh," i. 74), and employs the following one of their premises to justify his position: "Only a substance can be the substratum of an accident" (that is, of a non-essential property of things). Saadia argues: "If the soul be an accident only, it can itself have no such accidents as wisdom, joy, love," etc. Saadia was thus in every way a supporter of the Kalam; and if at times he deviated from its doctrines, it was owing to his religious views; just as the Jewish and Moslem Peripatetics stopped short in their respective Aristotelianism whenever there was danger of wounding orthodox religion.

The Neoplatonic Philosophy.

Jewish philosophy entered upon a new period in the eleventh century. The works of the Peripatetics—Al-Farabi and Ibn Sina (Avicenna)—on the one side, and the "Encyclopedia of the Brethren of Purity"—a transformed Kalam founded on Neoplatonic theories—on the other side, exercised considerable influence upon Jewish thinkers of that age. The two leading philosophers of the period are Ibn Gabirol (Avicebron) and Baḥya ben Joseph ibn Pakuda—the former standing upon a purely philosophical platform, the latter upon a religio-philosophical one; and both attaining similar results. Both believe in a universal matter as the substratum of all (except God) that exists; but Baḥya goes further and determines what that matter is: it is Darkness ("Ma'ani al-Nafs," translated by Broydé, p. 17). But this matter did not exist from all eternity, as the Peripatetics claimed. It is easy to perceive here the growth of the Peripatetic ideas as to substance and form; but influenced by religion, these ideas are so shaped as to admit the non-eternity of matter. In all that pertains to the soul and its action, Gabirol and Baḥya are undoubtedly influenced by the "Brethren of Purity." Man (the microcosm) is in every way like the celestial spheres (the macrocosm). Just as the heavenly spheres receive their motion from the universal soul—which is a simple substance emanating from God—so man receives his motion from the rational soul—another simple substance emanating from Him (*l.c.*, p. 60; Munk, "Mélanges de Philosophie," p. 266). In fact, creation came through emanation, and in the following sequence: (1) The active intellect; (2) the universal soul—which moves the heavenly sphere; (3) nature; (4) darkness—which at the beginning was but a capacity to receive form; (5) the celestial spheres; (6) the heavenly bodies; (7) fire; (8) air; (9) water; (10) earth ("Ma'ani al-Nafs," 72; compare Munk, *l.c.*, p. 201). But as regards the question of the attributes which occupy the Jewish and Moslem theologians so much, Baḥya, in his work on ethics, "Hobot ha-Lebabot," written in Arabic under the title of "Kitab al-Hidayat fi faraidh al Kulub" (The Duties of the Heart), is of the same opinion as the Motazilites, that the attributes by which one attempts to describe God should be taken in a negative sense, as excluding the opposite attributes. With reference to Gabirol, a positive opinion can not be given on this point, as his "Fons Vitæ" does not deal with the question; but there is reason to believe that he felt the influence of the Asharites, who admitted attributes. In fact, in his poetical philosophy, entitled "Keter Malkut" (The Crown of Royalty), Gabirol uses numerous attributes in describing God.

By way of a general statement, one may say that the Neoplatonic philosophy among the Jews of the eleventh century marks a transitional epoch, leading either to the pure philosophy of the Peripatetics or to the mysticism of the Cabala.

The Apotheosis of Philosophy.

The twelfth century saw the apotheosis of pure philosophy and the decline of the Kalam, which latter, being attacked by both the philosophers and the orthodox, perished for lack of champions. This supreme exaltation of philosophy was due, in great measure, to Gazzali (1005–1111) among the Arabs, and to Judah ha-Levi (1140) among the Jews. In fact, the attacks directed against the philosophers by Gazzali in his work, "Tuhfat al-Falasafa" (The Destruction of the Philosophers), not only produced, by reaction, a current favorable to philosophy, but induced the philosophers themselves to profit by his criticism, they thereafter making their theories clearer and their logic closer. The influence of this reaction brought forth the two greatest philosophers that the Arabic Peripatetic school ever produced, namely, Ibn Baja (Aven Pace) and Ibn Roshd (Averroes), both of whom undertook the defense of philosophy.

Since no idea and no literary or philosophical movement ever germinated on Arabian soil without leaving its impress on the Jews, Gazzali found an imitator in the person of Judah ha-Levi. This illustrious poet took upon himself to free religion from the shackles of speculative philosophy, and to this end wrote the "Cuzari," in which he sought to discredit all schools of philosophy alike. He passes severe censure upon the Motekallamin for seeking to support religion by philosophy. He says, "I consider him to have attained the highest degree of perfection who is convinced of religious truths without having scrutinized them and reasoned over them" ("Cuzari," v.). Then he reduced the chief propositions of the Motekallamin, to prove the unity of God, to ten in number, describing them at length, and concluding in these terms: "Does the Kalam give us more information concerning God and His attributes than the prophet did?" (*Ib.* iii. and iv.) Aristotelianism finds no favor in his eyes, for it is no less given to details and criticism; Neoplatonism alone suited him somewhat, owing to its appeal to his poetic temperament.

But the Hebrew Gazzali was no more successful than his Arabian prototype; and his attacks, although they certainly helped to discredit the Kalam—for which no one cared any longer—were altogether powerless against Peripatetic philosophy, which soon found numerous defenders. In fact, soon after the "Cuzari" made its appearance, Abraham ibn Daud published his "Emunah Ramah" (The Sublime Faith), wherein he recapitulated the teachings of the Peripatetics, Al-Farabi and Ibn Sina, upon the physics and metaphysics of Aristotle, and sought to demonstrate that these theories were in perfect harmony with the doctrines of Judaism. "It is an error generally current," says Ibn Daud in the preface of his book, "that the study of speculative philosophy is dangerous to religion. True philosophy not only does not harm religion, it confirms and strengthens it."

Maimonides.

The authority of Ibn Daud, however, did not suffice to give permanence to Aristotelianism in Judaism. This accomplishment was reserved for Maimonides, who endeavored to harmonize the philosophy of Aristotle with Judaism; and to this end the author of the "Yad ha-Ḥazaḳah" composed his immortal work, "Dalalat al-Ḥairin" (Guide of the Perplexed)—known better under its Hebrew title "Moreh Nebukim"—which served for many centuries as the subject of discussion and comment by Jewish thinkers. In this work, Maimonides, after refuting the propositions of the Motekallamin, considers Creation, the Unity of God, the Attributes of God, the Soul, etc., and treats them in accordance with the theories of Aristotle to the extent in which these latter do not conflict with religion. For example, while accepting the teachings of Aristotle upon matter and form, he pronounces against the eternity of matter. Nor does he accept Aristotle's theory that God can have a knowledge of universals only, and not of particulars. If He had no knowledge of particulars, He would be subject to constant change. Maimonides argues: "God perceives future events before they happen, and this perception never fails Him. Therefore there are no new ideas to present themselves to Him. He knows that such and such an individual does not yet exist, but that he will be born at such a time, exist for such a period, and then return into non-existence. When then this individual comes into being, God does not learn any new fact; nothing has happened that He knew not of, for He knew this individual, such as he is now, before his birth" ("Moreh," i. 20). While seeking thus to avoid the troublesome consequences certain Aristotelian theories would entail upon religion, Maimonides could not altogether escape those involved in Aristotle's idea of the unity of souls; and herein he laid himself open to the attacks of the orthodox.

Ibn Roshd (Averroes), the contemporary of Maimonides, closes the philosophical era of the Arabs.

Averroism.

The boldness of this great commentator of Aristotle aroused the full fury of the orthodox, who, in their zeal, attacked all philosophers indiscriminately, and had all philosophical writings committed to the flames. The theories of Ibn Roshd do not differ fundamentally from those of Ibn Baja and Ibn Tufail, who only follow the teachings of Ibn Sina and Al-Farabi. Like all Arabic Peripatetics, Ibn Roshd admits the hypothesis of the intelligence of the spheres and the hypothesis of universal emanation, through which motion is communicated from place to place to all parts of the universe as far as the supreme world—hypotheses which, in the mind of the Arabic philosophers, did away with the dualism involved in Aristotle's doctrine of pure energy and eternal matter. But while Al-Farabi, Ibn Sina, and other Arab philosophers hurried, so to speak, over subjects that trenched on religious dogmas, Ibn Roshd delighted in dwelling upon them with full particularity and stress. Thus he says, "Not only is matter eternal, but form is potentially inherent in matter; otherwise, it were a creation *ex nihilo* (Munk, "Mélanges," p. 444). According to this theory, therefore, the existence of this world is not only a *possibility*, as Ibn Sina declared—in order to make concessions to the orthodox—but also a *necessity*. Driven from the Arabian schools, Arabic philosophy found a refuge with the Jews, to whom belongs the honor of having transmitted it to the Christian world. A series of eminent men—such as the Tibbons, Narboni, Gersonides—joined in translating the Arabic philosophical works into Hebrew and commenting upon them. The works of Ibn Roshd especially became the subject of their study, due in great measure to Maimonides, who, in a letter addressed to his pupil Joseph ibn Aknin, spoke in the highest terms of Ibn Roshd's commentary.

Influence on Exegesis.

The influence which the Arabic intellect exercised over Jewish thought was not confined to philosophy; it left an indelible impress on the field of Biblical exegesis also. Saadia's commentary on the Bible bears the stamp of the Motazilites; and its author, while not admitting any positive attributes of God, except those of essence, endeavors to interpret Biblical passages in such a way as to rid them of anthropomorphism. The celebrated commentator, Abraham ibn Ezra, explains the Biblical account of Creation and other Scriptural passages in a philosophical sense. Nahmanides, too, and other commentators, show the influence of the philosophical ideas current in their respective epochs. This salutary inspiration, which lasted for five consecutive centuries, yielded to that other influence alone that came from the neglected depths of Jewish and of Neoplatonic mysticism, and which took the name of CABALA.

K. I. BR.

ARABIC POETRY: The poetic literature of the Arab Jews, to judge from the specimens handed down, must be about as old as Arabic Poetry in general, and in the main is of the same form and stamp. Two epochs may be distinguished: viz.: (1) The pre-Islamic or lyrical, and (2) that which is coeval with Mohammed and entirely polemical. Of the first epoch the oldest verses known are by the poetess SARAH, of the tribe of the Banu Kuraiza, who, in a short dirge, bewailed the treacherous slaughter by an Arab chief of many of her compatriots. This incident, which took place toward the end of the fifth century, is also alluded to in a verse of an unknown Jewish poet. The Jewish poetry of this epoch culminates in the songs of the famous Al-Samau'al (SAMUEL) B. ADIYA, who inhabited the castle Al-Ablak in Taima (middle of sixth century). Among Arab authors of all ages he is the prototype

Pre-Islamic Poetry.

of fidelity; having sacrificed his son's life in order to keep a pledge given to a friend, who was no other than Imr al-Kais, the most eminent of the old Arab poets. The poem composed by Samau'al on the incident has often been printed, both in the original and in different translations, although various recensions obscure the true text. Another poem attributed to him is of doubtful authenticity. Samau'al's son Jarid is also said to have been a poet.

At the time of the birth of Mohammed there flourished in Medina the poet AL-RABI IBN ABU AL-HUKAIK, of the Banu al-Nadhir, of whose poems several are still extant. In one of them the sentence occurs: "There is a remedy for every illness; but folly is incurable."

The poet Shuraih, whose epoch is uncertain, is the author of a fine distich of which the following is a translation:

> "Associate thyself to the noble, if thou find a way to their brotherhood;
> And drink from their cup, though thou shouldest drink twofold poison."

To the pre-Islamic period belongs also a poet named Abu al-Diyal, who was not, however, a Jew by birth.

Poetry of Mohammed's Time.

A great change is noticeable in Jewish poetry in the second period, when Mohammed had settled in Medina. After the expulsion of the Banu Kainuka, the poet Ka'ab ibn al-Ashraf, of the Banu al-Nadhir, recognized the danger which now threatened all the Medinian Jews. He traveled to Mecca and incited the Kuraish in poems to revenge themselves for the defeat suffered at Badr. It appears that Mohammed alluded to Ka'ab's polemic poetry in the simile of "a dog which, if thou drive him away, putteth forth his tongue, or, if thou let him alone, putteth forth his tongue also" (Koran, vii. 174). The points of the simile are not only the alliteration of "Ka'ab" and "kalb" (dog), but also the putting forth of the tongue, which was regarded as a symbol of poetic satire. Ka'ab was soon afterward assassinated at the instigation of Mohammed. His poems have been preserved by Moslem biographers of Mohammed; and his death was bewailed in verse by another Jewish poet, Al-Sammak, whose effusions are also still in existence.

Shortly before Mohammed attacked the Banu Kuraiza—the last remaining Jewish tribe in Medina—a woman of this tribe embraced Islam. Her husband, named Aus, tried to entice her to return, and addressed a few lines of entreaty to her which are still extant. The murder of Hujaij, rabbi of the Banu al-Nadhir, was lamented in a poem by JABAL IBN JAUWAL, who also bewailed the fate of the expelled and massacred tribes. The last poet of this class was MARHAB. He was a native of Yemen who had adopted Judaism, and fought against the Moslems when they attacked Khaibar, the last Jewish stronghold. In a poem of three verses he challenged one of Mohammed's heroes to single combat, and fell in the contest. This closes the list of Arabic-Jewish poets of ancient times. The next centuries did not develop Jewish poetry in Arabia, save a few lines in one of Hariri's makamas (xi.) and Ibn Ezra's poems. At the beginning of the fourteenth century there lived in Seville Musa b. Tubi, who wrote a philosophic poem styled "Al-Sab'iniyya" (poem of seventy verses), following the lines of Maimonidean argumentation.

A number of Jewish poets writing in Arabic lived in Spain; but, unfortunately, hardly more than their names have come down. Among them are: Moses ben Samuel ibn Gikatilla (eleventh century; see Poznanski, "Ibn Gikatilla," p. 23, Berlin, 1895); Abraham ibn Sahl (Seville, thirteenth century); Nasim al-Israili (Seville); Abraham Alfakar (thirteenth century, Toledo); Ismail al-Yahudi and his daughter Ḳasmunah. All of these wrote Muwashshah poetry (Hartmann, "Das Arabische Strophengedicht," pp. 45, 63, 73, 74, 225, 244).

Revival at Close of Middle Ages.

A kind of revival took place in Arabic-speaking countries at the end of the Middle Ages; but the poetry of this epoch is almost entirely of a liturgical character, and the language is not classical, but is modeled on the dialect of the country in which the Jews happened to live. Many of these are printed among the collections of piyyutim for Maghrebine and Eastern rites; but a comprehensive and critical study of them has yet to be undertaken.

Within the last decades have come to light the collections of poems of the Yemenian poet Shalom b. Joseph Shabbezi, who largely made use of the later forms of Arabic poetry, notably the "Muwashshaḥ" (girdle rime).

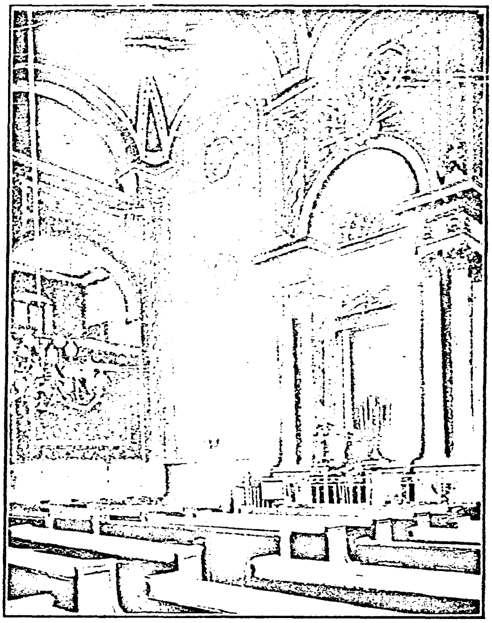
ARAD (ALT-ARAD): A royal free city and market town of Hungary, on the Maros, 145 miles southeast of Budapest. Among the Jewish communities of Hungary that of Arad holds a prominent place. Its history begins in the first half of the eighteenth century. The passport issued by Lieut. Field-Marshal Baron Cosa, May 1, 1717, to two Jews residing in the suburbs, is, so far as is known, the oldest historical document containing information concerning the Jewish community there. In 1741 there lived in Arad only one Jew, named Mandel, who purchased the right to sell, at first groceries, and then liquors, under the protection of Colonel Horvath of the boundary guard. Other Jews soon settled there. A census taken in 1743 showed that six of them lived in their own houses. The congregation, together with its associated "Ḥebrah Ḳaddishah," was organized about this time. In 1754 there were 24 Jewish families residing in Arad; among them Jacob Isaac, rabbi and teacher, with an annual salary of 36 florins. The year 1789 marks the turning-point in the history of the Arad community.

Early History.



Interior of the Synagogue at Arad.
(From a photograph.)

Aron Chorin and Moses Hirschl.

In May of that year Aron Chorin entered upon his duties as rabbi of the congregation. The whole history of the community and its struggles, its successes, and its renown thenceforth center in him. With touching devotion and patriarchal sentiment he applied himself to its elevation, and organized most of the benevolent institutions that are its pride to-day. Another man who, with the rabbi, deserved well of the congregation was Moses Hirschl, who for several decades devoted his attention mainly to its educational interests. Together with the principal, Lazar Skreinka, he succeeded in raising the intellectual grade of the school to the satisfaction of the governmental authorities. Of especial importance, however, for the true development of the congregation was the success attending Chorin's efforts to induce the youths in the community to acquire a knowl-

Diversity of Trades.

edge of handicrafts. The Arad congregation led those of Hungary, both in the number of its mechanics and in the variety of trades represented. The inspiration of the movement originated with Chorin, who in this matter took his stand upon Talmudic precepts. "From this congregation," he wrote in 1831, "seventy-eight young men have gone forth to follow various handicrafts, and in addition several have devoted themselves to such professions as the law permits. Some of these latter already have large practises as physicians and surgeons." In a letter to Gabriel Ullmann, president of the Pesth congregation, he names the trades that were followed by the Jews of Arad: there were goldsmiths, tanners, confectioners, furriers, coopers, watchcase-makers, braid-makers, soap-boilers, horseshoe-makers, smiths, locksmiths, gunsmiths, bookbinders, painters, tailors, pipe-mounters, glaziers, shoemakers, saddlers, etc.

Philanthropic interests were taken charge of by the Humanitätsverein, founded in 1830, and enlarged later by a women's society with similar aims; their special charge being the excellent Jewish hospital, a creation of the Hebrah Kaddishah, which was first organized in 1790 by Chorin. After Chorin's death, 1844, the Arad congregation, which in 1839 aggregated 812 souls, called Jacob Steinhardt as their temporary rabbi and school-superintendent. A year and a half later he became chief rabbi, and was followed in 1885 by Alexander Rosenberg, previously rabbi in Kaposvar. During the whole of the last half of the nineteenth century the Arad congregation developed and prospered. All branches of congregational activity kept pace with the numerical growth of the congregation, which in 1860 aggregated 2,700 souls, and which since then has doubled. The affairs of the congregation are conducted according to well-devised rules; schools have been reorganized; additional benevolent institutions have been established, of which the Orphan Home deserves especial mention; and a home for pensioned employees of the congregation has been opened.

ARADUS (Arados, I Macc. xv. 23): A Phenician city on the island now called Ruad, eighty miles north of Sidon. It is the Arvad of Ezek. xxvii. 8, 11, the Armad of Tiglath-pileser III., and is also mentioned on the Egyptian monuments. Jews had migrated thither in Maccabean times (I Macc. xv. 23). See ARVAD.

ARAG (ARAK): Village in the district of Kyurin, Daghestan, Transcaucasia, Russia. When the traveler Judah Chorny visited the place in 1868, he found eighty Jewish families there, who lived in a separate part of the village. Their chief occupation was the cultivation of tobacco on land rented from their Mohammedan neighbors. They had a synagogue, and used the Sephardic rite. Fifty school-children were instructed in religion and Hebrew by two teachers. Their language was a mixed dialect of Tataric and Persian. Under the rule of the Tatar Khans they were burdened with heavy taxes, their position being almost that of slaves. With the annexation of the province by Russia their condition improved somewhat. In 1900 the Jewish population of Arag was 710.

Polygamy is still practised among the inhabitants. Up to 1868 the names of the rabbis (who had succeeded one another) were: Moses, Mattithiah, Bezalel, Hanakah, Johai, Moses of Gursi, and Ezekiel, who was still holding office. Among their names the following are Caucasian: Valbikah, Vanavsha, Gulbahar, Desleyul, Zarungul, Momari, Mazali, Tzaatchair, Kuztaman, Luzergal, Shachatav, Tazagil, Tavriz.

ARAGON: An independent medieval kingdom, later a province of Spain, in the northeastern part of the Iberian peninsula. Its population included Jews as early as the ninth century. In Saragossa (which until 1118 was under the rule of the Moors), in Jaca, Huesca, Barbastro, Daroca, Tarazona, Calatayud, Monzon, Lerida, and other cities of Aragon, the Jews in early times lived under special *fueros* or laws. Aragon passed through the same phases of church development and culture as southern France, until the time of Jaime I.; and the circumstances of the Jews there corresponded exactly with those of their French brethren. Their industry, learning, and wealth secured for them the protection and favor of their rulers. Pedro II. of Aragon, who, owing to his frequent wars, was usually in debt, was often compelled to borrow money of his Jewish subjects, and to mortgage the greater portion of his possessions and revenues to them. Under Pedro's son and successor, Jaime I., surnamed "el Batallador" (the Fighter) and "el Conquistador" (the Conqueror), the political and legal position of the Jews was an enviable one. Jaime I. issued the following decree: "All Jews and Saracens dwelling in our domains belong to the king and are, with all their possessions, under the king's especial protection. Any one of them who shall place himself under the protection of a nobleman shall lose his head; and all his possessions, wherever they be, shall be forfeited to the king." As a consequence, no Jew or Saracen could become a bondman to any nobleman; nor could Jews or Saracens be called prisoners or serfs (*captivi* or *servi*) even of the king, because, according to the law, they had full liberty of movement.

Position Under Jaime I.

The Jews of Aragon thus stood in direct relation with the king and under the jurisdiction of the crown, as represented by the *baile-general*, under whose authority stood the *bailes* of all the towns and hamlets of the country. They were permitted to buy and sell among themselves; but for trade with Christians a special permission from the *baile* was necessary. Similarly, Christians were prohibited from buying or taking in pledge the goods of Jews. The Jews lived in the "Juderías," or Jews' quarters, outside of which they could not dwell without royal permission; nor were they at liberty to change the city of their abode. The permission of the king was also necessary to build synagogues, establish cemeteries, open schools, purchase or export wheat, and even to bake Passover bread. Besides the poll-tax, Jews were required to pay special taxes and to contribute toward the repair of walls and fortifications, as well as to the equipment of the fleet and the general expenses of war. Whenever the king visited a city, the Jews there had to provide beds for him and his retinue. The assessment of individual taxes was made by the representatives of the Jews, chosen by themselves and confirmed by the king. The division of the taxes among the various congregations was determined by the king, upon consultation with these representatives of the synagogue. Sometimes the king remitted these taxes for a time, as in the cases of Uncastillo and Monteluz, to which a respite was given by Jaime I. Some Jews received special privileges from the king. They were permitted to take four denarii per pound as weekly interest (about 86 per cent. per annum). But they were forbidden to lend to students. Frequently the king released all debtors of the Jews from their obligations, and declared the Jewish claims void. There existed for the Jews of Aragon two special forms of oath: one, upon the law of Moses; the other, much more formidable, called "the oath of curses." All such oaths had to be taken in the synagogue or other places of worship.

Enforced Social Isolation of Jews.

Religious Disputation at Barcelona.

In their social relations a sharp line of demarcation was drawn between Jews and Christians. Jews were forbidden to keep Christian slaves and servants, or to have Christian women in their houses in any capacity whatever. Christians and Jews were not permitted to dwell together: even Jewish prisoners were separated from Christians. Jaime I., whose confessor was the zealous missionary Raymundo de Peñaforte, ardently favored the conversion of the Jews to Christianity—conversion to Islam was prohibited—and gave his assistance to the work in every way. In 1249 he repealed an ordinance, then operative in many provinces, to the effect that Jews embracing Christianity must surrender their property, or most of it, to the treasury. The law protected those who had embraced Christianity from insult at the hands of their former coreligionists; and it was forbidden to call them renegades, turncoats, or any such disparaging names. Whenever a prelate, or a brother of one of the orders, announced a missionary sermon in a place where Jews resided, the latter were compelled by the king's officers to listen to it; and no excuse for absence was accepted, save a special royal dispensation, such as was granted to the Jews of Lerida. Baptized children of Jews could not reside with their parents. In 1263, in order further to facilitate the conversion of the Jews, Jaime I. arranged a public debate at the royal palace in Barcelona, under the presidency of Peñaforte, between the missionary Fra Paolo (or Pablo Christiani), a baptized Jew, and the eminent Spanish rabbi, Moses ben Naḥman (Bonastruc de Porta).

Jews in High Public Offices.

Aside from these clerical annoyances, the position of the Aragonian Jews under Jaime I. was not an unhappy one. They owned houses and estates, were permitted to farm the royal grist-mills, and to follow agriculture and trades, and, though they could not occupy judicial positions, other honorable posts were open to them. When Jaime conquered Majorca he was attended by Don Bahyel as his private secretary; and when he besieged Murcia he employed Don Astruc Bonsenyor as his interpreter of Arabic to negotiate with the inhabitants of the town. Jehudano de Cavalleria, the wealthiest and most influential Jew of Aragon, was head bailiff and royal treasurer; Bondia and a certain Abraham were bailiffs in Saragossa, and Vidal Solomon was bailiff of Barcelona. Maestros David and Solomon were the king's body-physicians; and Maestro Samson was physician to the queen. Pope Clement IV. in vain requested Jaime to remove Jews from all public offices; but his son, Pedro III., yielding to the stormy demands of the Cortes in Saragossa, decreed that no Jew should thenceforth occupy the position of bailiff. Pedro and his successors took the Jews under their protection, possibly for their own interests. In the wars of Africa and Sicily the material aid of the Jews was indispensable, and large sums were exacted from them for the equipment of the fleet and the conduct of the war.

Although Jaime II., like his grandfather, earnestly desired the conversion of the Jews, he showed himself tolerant toward them. He permitted a certain number of Jewish refugees from France to settle in Barcelona and other places; and, in recognition of their liberal contributions toward the equipment of the fleet, he released the Jewish congregations for several years from all taxes, according at the same time special privileges to the congregations of Barcelona, Saragossa, and Huesca. The king protected them, but the populace, repeatedly aroused by the clergy, continually annoyed them. In Barcelona in 1285, one Berenguer Oller, supported by several other ordinary citizens, instigated a serious riot against the Jews. On a certain day of Passover he announced that he would kill all the barons and the Jews and plunder their houses; but he was prevented from carrying out his plans through the timely intervention of the king.

The Jews of Aragon proved themselves generous and self-sacrificing in every emergency. When in 1323 the Infante Alfonso (afterward Alfonso IV.) embarked upon the conquest of Sardinia, they placed large sums of money at his disposal; and the congregation of Tortosa hired sailors to man the galleys furnished by the city. Alfonso IV. in return showed himself favorably inclined toward his Jewish subjects. He accorded special privileges to the Jews of Fraga, Barcelona, and Gerona, and put down the insurrection of the shepherds, which had extended to parts of Aragon. When a large number of Jews desired to leave the country, he attempted to retain them by reducing their taxes. Under his successor Don Pedro IV., who was devoted to astrology, which he studied under his body-physician Don Rabbi Menahem, the condition of the Jews was a very painful one, owing to the contest between the Aragonian Unionists and the king, and to the war between Aragon and Castile. The congregations of

Murviedro, Gerona, Tarazona, Daroca, and Calatayud were especially ill-treated.

Massacre of 1391.

Persecutions Under Pope Benedict XIII.

The great persecution of 1391, which began in Seville, affected the Jews of Aragon and Catalonia severely; entire communities, such as those of Valencia, Lerida, and Barcelona, were wiped out; thousands of Jews were slain; and 100,000 professed to embrace Christianity. The resulting large number of pseudo-Christians, or Maranos, was materially increased twenty years later by the exertions of the fanatical preacher Vicente Ferrer. All Jews who remained faithful to their ancestral religion were ordered by King Martin of Aragon to wear a mark of identification. Another public disputation took place between the rabbis of the more important congregations of Aragon, on the one side, and Joshua ha-Lorḳi, named after his conversion Jerome de Santa Fé, assisted by the converts, Andres Beltran and Garcia Alvarez de Alarcon, on the other. This discussion, which had the effect of still further increasing the number of pseudo-Christians, was held at Tortosa in 1413 in the presence of Pope Benedict XIII. Severer sufferings were in store for the Jews of Aragon in the last eighty years of their sojourn in the province. After the Tortosan disputation, Pope Benedict issued the bull, "Etsi Doctoribus Gentium" (see De los Rios, ii. 627), which was promulgated throughout Aragon in 1415. It interdicted the study or the reading of the Talmud and similar works, every copy of which was to be surrendered and destroyed. Jews were not allowed to possess antichristian literature. They were debarred from holding any office or from following the vocations of physician, surgeon, accoucheur, apothecary, broker, marriage-agent, or merchant. Christians were forbidden to live in the same house with Jews, to eat or bathe with them, to render them any services, such as the baking of Passover bread, or to buy from or sell for them meat prescribed by the Jewish law. Each congregation was permitted to have only a small and scantily furnished synagogue, and new synagogues were not allowed to be built or old ones repaired. Finally, all Jews of either sex over the age of twelve years were compelled to listen to three Christian sermons every year.

To all these sufferings were added the terrible epidemics of the plague which scourged Aragon in 1429, 1439, 1448, 1450, 1452, and 1457. Commerce and trade in the formerly flourishing cities of Saragossa, Huesca, and Daroca came to a standstill; the Jewish merchants and their trade became impoverished and could no longer pay taxes. In order to prevent their emigration, however, Queen Maria, consort of Alfonso V., and queen regent in his absence, reduced the royal imposts considerably. For instance, the Jewish congregation of Barbastro had only 400 sueldos jaqueses to pay; Calatayud and Monzon, 350; Saragossa and Huesca, 300; and Fraga and Tarazona, 200. The very wealthy Marano families of Saragossa, Huesca, Calatayud, and Daroca—the Caballerias, Santangels, Villanovas, Paternoys, Cabreros, Zaportas, Rivas, and others—occupied influential positions in the Cortes, in public life, and at the court of Juan II., and often intermarried with aristocratic families, and even with the Infantas. After Juan's death in 1479, the two kingdoms, Aragon and Castile, were united into one under the rule of Ferdinand and Isabella; and henceforward the history of the Jews of Aragon becomes one with that of all the other Jews of Spain.

The Aragonian Jews possessed a special ritual-liturgy (Maḥzor Aragon), which was preserved for a long time in several cities of the Orient by communities of fugitive Jews from Aragon. (See MAḤZOR.)

'ARAKIN (ערכין, "estimations"; the German-Polish Jews use the Aramaic form ערכין, pronounced by them 'Erchin or 'Erechin): A treatise of the Mishnah, the Tosefta, and the Babylonian Talmud in the order Ḳodashim.

Analysis of the Mishnah.

In the Mishnah the treatise 'Arakin consists of nine chapters (peraḳim), forming in all fifty paragraphs (mishnayot). It deals chiefly with an exact determination of the regulations in Lev. xxvii. 2–29, concerning the redemption, according to fixed rates (ערך, "estimation"), of persons or things consecrated to the sanctuary by a vow. It is presupposed by the Halakah that the above-mentioned Bible passage refers to the consecration not only of persons that belong to the one who consecrates them, but of any person; for the consecration of a person signifies nothing more than a vow to dedicate to the sanctuary the value which that person represents. Consequently, the first chapter treats of the persons capable of making such a vow, as well as of the qualifications of those whose value must be paid by the consecrator.

Following exactly the order of the Bible, the second chapter discusses the maximum and the minimum of the amount to be given to the sanctuary, according to the financial condition of the dedicator. The mention of this special case of a maximum and a minimum gives occasion for discussing the maximum and the minimum for various religious precepts. Incidentally, many an interesting item of information is imparted concerning Temple affairs; as, for instance, certain details about the Temple music.

In a similar way, the third chapter, discussing the uniformity of assessment of values of dedicated lands irrespective of their mercantile values, takes occasion to group together all such cases of indemnity for which the Biblical law prescribes a fixed amount to be paid, regardless of attendant conditions.

After this digression, the fourth chapter lays down detailed rules for the various "estimations" mentioned in Lev. xxvii. 2–8, and at the same time intimates wherein these rules differ from those applying to sacrificial vows and gifts.

The fifth chapter treats of particular instances; for example, the consideration of cases wherein the weight or the value of a limb of a person or a portion of his value is dedicated. This brings to an end the Halakot dealing with estimations put upon persons.

The sixth chapter is to be regarded as an appendix. It gives minute precepts relative to assessments in general, called "shum" (שום, in contradistinction to ערך), and concerning distraint for debts incurred by dedication.

After this exhaustive treatment of the estimation of persons, chapters vii. and viii. give a fuller explanation of the estimation of consecrated land found in Lev. xxvii. 16, and in addition—as in the Bible—the Halakot concerning Herem ("devoted thing)," that is voted to be the irredeemable property of the sanctuary or of the priests (Lev. xxvii. 28).

The ninth and last chapter consists chiefly of the regulations concerning the redemption in the jubilee year of landed property that has been sold (Lev. xxv. 25-34). These rules are given in this connection because they have points of contact with the valuation of a consecrated piece of ground.

The Tosefta.

The Tosefta to this treatise, comprising five chapters, is of great value for the comprehension of the single articles of the Mishnah, as well as for their composition. Thus Tosefta i. 1 illustrates the exegetical basis (Midrash) for the proposition in Mishnah i. 2; and, according to the reading of Tosefta iii. 1, the difficulty in Mishnah v. 1, which provides the Gemara 19*a* with much matter for discussion, is removed. This treatise of the Tosefta contains also a number of explanatory amplifications of the Mishnah, as well as many points not touched in the latter.

Mishnah in the Light of Tosefta.

The Tosefta also gives to some extent many a valuable intimation for distinguishing the older and the more recent constituent elements or strata of the Mishnah. Beginning with the first chapter, a comparison of the Mishnah 1-4 and the Tosefta 1-4 shows that of these paragraphs only 1 and 4 belong to the older Mishnah compilation, and that 2 and 3 emanate from a school later than Akiba. Similarly, the second chapter betrays the work of two redactors. The compilation of the maxima and the minima in this section is probably to be ascribed to Akiba, who was the first to attempt such an arrangement of the halakic material. To the later redaction, however, is to be attributed the discussion in Mishnah 1, between R. Meïr and the Hakamim (sages). Likewise, Mishnah 4 and the second half of Mishnah 6 must be regarded as later additions.

The whole of the third chapter must be regarded as belonging to the older Mishnah compilation, with the exception, however, of the second half of Mishnah 2, where "Eleazar [ben Shammua]" should be read instead of "Eliezer [ben Hyrcanus]."

It is noteworthy that in this chapter (Mishnah 2) the gardens of Sebaste (Samaria) are represented as very fruitful, a characteristic which could apply only to the time previous to Bar Kokba. For this reason R. Judah in the Tosefta (ii. 8) speaks of the gardens of Jericho instead of those of Sebaste.

The fourth chapter of the Mishnah seems to belong wholly to the more recent redaction. In the fifth chapter it is difficult to distinguish old and new. Here the beginning is derived from the time before Akiba, possibly even from the period during the existence of the Temple, or, at all events, not long after; but the second half of the very same Mishnah is of a much later date, whereas the Tosefta (iii. 2) preserves the old form of the Halakah, to which the Mishnah bears the relation of an explanation and discussion. Chapters vi.-ix. also contain various compilations of Halakot, which were so much altered by the redactor that attempts to trace them back to their sources have been unsuccessful.

The Gemara.

In the present article an analysis of the Gemara, which comprises thirty-four pages, can be given only in brief outline. Starting from the word הכל ("all"), with which the treatise begins, the discussion brings into array nearly all tannaitic Halakot, commencing with that word, to prove that this word is used to intimate that the tanna desires to include in the rule a class of subjects that otherwise would have been excluded.

This introduction to the treatise 'Arakin (pp. 2-4*a*) probably comes from the time of the Saboraim. Of importance are the elaborations of the Gemara on Mishnah i. 2, in regard to the sacrifices and gifts of the heathen (עכו"ם) (pp. 5*b*-6*b*).

In regard to the second chapter, special reference must be made to pp. 8*b*-13*b*, in which, along with explanations of the Mishnah, many details are given in regard to the construction of the calendar and to customs in the Temple service.

The third chapter of the Gemara is the only one in the treatise in which haggadic material is treated at length. Pages 15*a* to 17*a* contain admonitions and precepts concerning "the evil tongue," in which it is urged that man must be careful of speech.

Chapters iv. and v. contain chiefly elucidations and explanations of the corresponding Mishnayot.

Basing itself on the Mishnah, chapter vi. gives many important regulations concerning compulsory auctions and the legal procedure in regard to them, and with regard to legal attachments (pp. 21*b*-24*a*).

Chapter vii. is devoted to the regulations regarding the year of jubilee at a time when this Biblical institution is enforced (24*a*-27*a*).

Chapter viii. treats of the regulations governing landed estate devoted to the sanctuary, when the law of the jubilee year is no longer in force (27*a*-29*a*).

The last chapter deals mainly with the laws for the sale and redemption of land and houses that have been sold, on which subject the Mishnah in the corresponding chapter contains only a few particulars.

J. SR. L. G.

ARAM.—Biblical Data: The name of a group of kindred tribes scattered over portions of Syria, Mesopotamia, and Arabia. It is not the name of a country or of a politically independent people; for the Aramaic peoples were never all independent at the same period; neither did they form a large independent state. They are mentioned by Tiglath-pileser I., about 1110 B.C. (Schrader "K. B." i. 33), as dwelling east of the Euphrates; also by Shalmaneser II.

Location.

(*ib.* i. 165). Tiglath-pileser III. describes them as extending from the Tigris, the Euphrates, and the Surappi to the River Ukni at the shore of the Persian Gulf (*ib.* ii. 11). Sargon and Sennacherib attest this in part by stating that on their return from Babylon to Assyria they conquered various Aramaic tribes (compare Schrader, "K. G. F." pp. 109 *et seq.*); and the presence of Aramaic inscriptions in Assyria and Babylonia from the eighth to the third century B.C. confirms these statements (compare "C. I. S." ii.). The inscriptions found at Zenjirli and Nerab prove that Aramaic was spoken in the northern part of Syria as early as the seventh century B.C., though this region was largely occupied by Hittites. Aramaic tribes appear to have extended as far as the Taurus valleys, including Armenia and Cilicia (compare Dillmann, on Gen. x. 22). Aramaic inscriptions have been found in Arabia as far south as Teima, which date from about 500 B.C. These tribes had therefore penetrated Arabia at that date.

The part of this territory known in the Old Testament as Aram is the portion west of the Euphrates, to various parts of which were given different names, as described below (Aram-Zobah, Aram-Maachah, etc.). Greek writers applied to the people of this region the term "Syrians"—perhaps a corruption of Assyrians; hence the name "Syria."

Aramaic and Hebrew.

In Gen. x. 22 Aram is described as a son of Shem. Gen. xxii. 21 makes him a grandson of Nahor, Abraham's brother. The Aramaic dialects form a well-defined group of the languages classed as Semitic, and thus attest the fact, for which these traditions stand, that the Arameans were akin to the Hebrews. From II Kings xviii. 26 and Isa. xxxvi. 11 it would seem that by the end of the eighth century B.C. Aramaic had become the language of international communication between the nations of western Asia. Its influence on Hebrew diction may be detected in some of the books composed before the Exile, while in Esther, Ecclesiastes, and some of the Psalms the form of expression is largely Aramaic. Parts of Daniel and Ezra are extant only in this tongue, which before the beginning of the common era had quite displaced Hebrew in popular usage. The Aramaic peoples of northern Arabia introduced writing into that country some centuries before the Arabs of the region had their own system of writing; and the Aramaic inscriptions found by Euting in the Sinaitic peninsula, and shown to have been the work of Arabs, prove that for a time it was the language used for written communication in north Arabia. The Nabataeans, who were in reality Arabians, have also left in the neighborhood of Palmyra many Aramaic inscriptions dating back to about the beginning of the common era.

Aram in the Pentateuch.

Josephus calls Aram the grandson of Nahor, Abraham's brother (Gen. xxii. 21), and afterward defines his locality as Aram Naharaim (Gen. xxiv. 10). Gen. xxviii. 10 says that Jacob fled to Haran, where he went to his mother's kindred, thus making Aram Naharaim a region beyond the Euphrates. In the Pentateuch the country about Haran is no doubt the region designated. That Abraham resided in Haran is definitely stated in the Pentateuch (Gen. xii. 4, 5). The place to which Jacob fled is called Padan-Aram (Gen. xxviii. 6, R. V.). "Padana" in Aramaic signifies "yoke," or "plow," and may also have meant, as in some other tongues, "cultivated land." Some find in this meaning the origin of the name "Padan" in Genesis, and have supposed that "the field of Aram" (Hosea xii. 13 [A.V. 12]) is a Hebrew translation. It is tempting to identify it with the Aramaic "Paddānā" (Wright, "Catalogue Syriac Manuscripts," 1127*a*), called in Greek φαδανᾶ (Sozomen, vi. 33), and in Arabic "Faddain" (Yaḳut); but this town was situated in the Hauran, and can not have been the Padan of the Bible, unless it was there intended to say that Laban, like Abraham, had migrated far from Haran. It may be, as Nöldeke suggests, that this name arose from a localization of the patriarchal tradition by the early Christians. That a place in the neighborhood of Haran, or in that region, was intended, there can be little doubt. All the sources place the Aram of the patriarchs in the direction of Haran. Deuteronomy mentions Aram only when Jacob is called an Aramean (Deut. xxvi. 5).

Damascus.

By far the most important part of Aram, so far as the Hebrews were concerned, was Damascus. Amos (i. 5) and Isaiah (vii. 8) indicate this; the one by equating Aram with Damascus, the other by declaring that Damascus is the head of Aram. The name occurs in a list of cities conquered by Thothmes III. (W. Max Müller, "Asien und Europa," p. 227), and in two of the El-Amarna letters (139, 63 and 142, 21) of the fifteenth century B.C. David, some centuries later, made it tributary to himself (II Sam. viii. 6), and its kings, Rezin, Ben-hadad I., Ben-hadad II., Hazael, and Ben-hadad III., were at various times in conflict with the kings of Israel and Judah. Compare Damascus, David, Ben-hadad, Hazael, and Rezin. See also Aram-Geshur, Aram-Maachah, Aram-Naharaim, Aram-Rehob, and Aram-Zobah.

J. JR. G. A. B.

——**In Rabbinical Literature:** "Aramean" was from the earliest times the equivalent of "heathen" in the Jewish vernacular, because the heathen neighbors of the Jews used the Aramean tongue. An old Targum, mentioned by the Mishnah (Meg. iv. 9), employs the word "Aramiyu-uta" in the sense of heathendom; as does also R. Ishmael in the first half of the second century (Yer. Meg. iv. 75*c*). In Palestine the word "Aramean" was so tabooed that the Jews preferred to use the Greek word "Syriac" to designate their mother-tongue, rather than call it "Aramean." This usage also passed over to the Arabian-Jewish authors, as, for instance, Judah b. Koreish, who calls the Arameans of the Bible and of the Targum "Syrians." But to avoid misconception, in translating the Bible into Aramean, the word *Aramaa* (after the Hebrew "Arami") was employed for the national sense and *Armaa* for the religious sense of the word.

It is of historical interest to note that after the conversion of the Arameans to Christianity, the former Jewish significance attached to the word

"Aramean" was also given to it by Christians. With the Syrians, even in the Peshitta, "Armaia" means "heathen," while "Aramaia" means "one of the people of Aram." In Palestinian sources the terms "Aram" and "Arameans" are used to designate Rome and the Romans; the Palestinian pronunciation of the word "Aromi" may have served to screen what they dared not say against the Romans. In most cases, however, ארם, for Rome, is a mistake of the copyist; it should read אדום, Edom.

J. SR. L. G.

ARAM-GESHUR: An Aramean district and a small kingdom near Maachah (II Sam. xv. 8) (see ARAM-MAACHAH), and associated with it in Josh. xiii. 13. David married the daughter of its king (II Sam. iii. 3). She became the mother of Absalom, who fled thither after killing his brother Amnon (II Sam. xiii. 38).

J. JR. G. A. B.

ARAM-MAACHAH (I Chron. xix. 6): A district south of Damascus, bordering on the trans-Jordanic territory of Manasseh. Maachah is said in Gen. xxii. 24 to have been a descendant of Nahor, Abraham's brother, and the territory called after him is declared in Josh. xiii. 13 not to have been conquered in the first Israelitish settlement of Canaan. David made its petty king tributary (II Sam. x. 6–8), and by the time of the chronicler, Maachah was regarded as an ancestress of a Manassite clan (I Chron. vii. 16). Strangely enough, II Sam. x. 6 has "king Maacah," which makes it doubtful if Aram-Maachah is the correct form.

J. JR. G. A. B.

ARAM-NAHARAIM (translated as "**Mesopotamia**" in A. V.): A region somewhat ill-defined, mentioned six times in the Bible. In the title of Ps. lx., and in I Chron. xix. 6, it is used for the region beyond the Euphrates (compare II Sam. x. 16). It is stated in Judges iii. 8, 10, that the king of Aram-Naharaim invaded Palestine. Gen. xxiv. 10 calls the region of Haran, Aram-Naharaim (compare Gen. xxviii. 10); while Deut. xxiii. 5 calls Pethor, the home of Balaam, a city of Aram-Naharaim. Pethor appears as a city of the region near the Euphrates in a list of Thothmes III. in the fifteenth century B.C. (compare Müller, "Asien und Europa," p. 267), and in an inscription of Shalmaneser II. of the ninth century B.C. (compare Schrader, "K. B." ii. 163) as a city west of that river.

Aram-Naharaim, literally, "Aram of the two rivers," suggested to the ancients the region between the Euphrates and the Tigris; to some moderns, that between the Euphrates and Chaboras (Ḥabur) (see Kiepert, "Lehrbuch der Alten Geographie," p. 154); to others, the Euphrates and Orontes (Howorth, in "Academy," Jan. 17, 1891, p. 65); while still others select different rivers. Meyer ("Gesch. Ægyptens," p. 227), Müller ("Asien und Europa," pp. 249 *et seq.*), and Moore (Commentary on Judges, pp. 87, 89) are probably right in regarding the Hebrew dual as fictitious. If plural, it was no doubt the country called by the Egyptians "Naharin," an Aramaic name, meaning "the land of the rivers." It embraced a considerable extent on both sides of the Euphrates, extending east as far as the Tigris and west to the Orontes, running south not only to Hamath, but to Kadesh (compare Müller, *ib.* pp. 249–267). All the Biblical references are to places in this region. The name is not found in Babylonian or Assyrian inscriptions, but occurs as Nahrima in three of the El-Amarna letters. Nahrima is associated with the Hittites—a fact which confirms the view taken above.

J. JR. G. A. B.

ARAM-REHOB (II Sam. x. 6, 8): A district of Syria, of which the chief city was Rehob or Beth-Rehob, associated with ARAM-ZOBAH as hostile to David. Num. xiii. 21 and Judges xviii. 28 place a Beth-Rehob in the Lebanon region near Dan. Moore (Commentary on Judges, p. 399) conjecturally identifies it with PANEAS.

J. JR. G. A. B.

ARAM-ZOBAH (Ps. lx., title): The capital of an Aramean state, at one time of considerable importance. The statement in I Sam. xiv. 47, that its king fought with Saul, has hitherto been unconfirmed. No such doubt, however, attaches to the account of the war of its king Hadadezer with David, who made the kingdom tributary to Israel (II Sam. x.). In this war Hadadezer brought to his help Arameans from beyond the Euphrates (II Sam. x. 16). Upon the accession of Solomon, Zobah became independent of Israel (compare I Kings xi. 23 *et seq.*). Berothai, a city belonging to Hadadezer (II Sam. viii. 8) is identified by many with Berothah (Ezek. xlvii. 16), which was between Hamath and Damascus. Zobah was probably located near this city, though Halévy claims to have identified Zobah with Chalkis.

After the tenth century, Zobah is not mentioned in the Bible, but the city of Subiti, which is mentioned in the annals of Assurbanipal as having been conquered by him in the seventh century, is probably identical with it (compare Schrader, "K. B." ii. 217). The same city is mentioned in some broken cuneiform lists of towns in connection with Hamath and Damascus.

ARAMA, DAVID BEN ABRAHAM: Rabbinical author, born in Turkey, 1525; lived in Salonica. When barely twenty years old, he published "Perush 'al Sefer Mishneh Torah," a commentary on Maimonides' Yad ha-Ḥazaḳah (Salonica, 1546–1572; second edition, Amsterdam, 1706). He also is the author of "Teshubot," consisting of a commentary on difficult Talmudic passages (Constantinople, 1579), which seems to be entirely lost.

L. G. G. A. D.

ARAMA, ISAAC BEN MOSES: Spanish rabbi and author; born about 1420; died in Naples 1494. He was at first principal of a rabbinical academy at Zamora (probably his birthplace); then he received a call as rabbi and preacher from the community at

Tarragona, and later from that of Traga in Aragon. He officiated finally in Calatayud as rabbi and head of the Talmudical academy. Upon the expulsion of the Jews in 1492, Arama settled in Naples, where he died.

Arama is the author of "'Aḳedat Yiẓḥaḳ" (Offering of Isaac), a lengthy philosophical commentary on the Pentateuch, homiletic in style. From this work he is frequently spoken of as the "Ba'al 'Aḳedah" (author of the "'Aḳedah"). He also wrote a commentary upon the Five Rolls, and a work called "Ḥazut Ḳashah" (A Burdensome Vision), upon the relation of philosophy to theology; also "Yad Abshalom" (The Hand of Absalom), a commentary on Proverbs, written in memory of his son-in-law, Absalom, who died shortly after his marriage.

As Talmudist and Philosopher.

Arama was the very type of the Spanish-Jewish scholar of the second half of the fifteenth century. First of all he was a Talmudist. The study of the Talmud was of the utmost importance to him; so that he lamented deeply when his rabbinical pupils could not follow him from Zamora to Tarragona, because the latter community was unable to support them. In the next place, he was a philosopher. The study of philosophy was so universal in Spain at that period that no one could assume a public position who had not devoted himself to it. Arama had paid particular attention to Maimonides; but independent philosophical thought is hardly to be found in his work. His remarks concerning the nature of the soul ("'Aḳedah," chap. vi.) are noteworthy. After a detailed account of the various theories about the soul which had prevailed, he comes to the conclusion that the first germ of the soul, common to the whole human race, has its origin with and in the body. His theory is that of Alexander of Aphrodisias—that the soul is the "form" of the organic body—but Arama is able to adduce support for it from Talmud and Cabala. The third element in Arama's mental composition was Cabala as expounded in the Zohar, which he believed to have been written by Simon ben Yoḥai. He did not, however, occupy himself so much with the mystical side of Cabala as with its philosophy.

His earliest work, the "Ḥazut Ḳashah," presenting in a certain sense an enunciation of Arama's religious philosophy, includes also much that is interesting pertaining to the history of the Jews in Spain prior to their expulsion. The aim of the work was to furnish a rejoinder to the missionary sermons of the Church, to which, under the laws then prevalent, the Jews were compelled to listen. Hence his polemic against the Christian dogma of Grace is the *résumé* of an oral disputation between Arama and a Christian scholar. In support of his attack upon this Christian dogma, Arama adduces the doctrine of the freedom of the will as formulated by Aristotle, and the consideration of God's transcendent justice, which would make Grace to consist of nothing but the exercise of the will of a despot. Besides this instance of his polemics, his treatment of the Deluge contains several attacks upon Christianity. The greater portion of the work, however, is devoted to the confutation of that philosophy which refuses to recognize Jewish revelation, or recognizes it only as identical with philosophy. For his extensive use of the allegorical mode of interpretation, see ALLEGORY.

Sermons Models for Future Preachers.

Arama's chief work, which exercised great influence upon Jewish thought, and is still much read, is the "'Aḳedat Yiẓḥaḳ." This is considered by many as the classical work upon Jewish homiletics. The form of the sermons contained therein was closely imitated by the DARSHANIM. The old sermon was either didactic—among Germans, upon ritual matters; among Spanish and Provençal Jews, upon philosophy—or else it was of an edifying, moralizing nature, such as the Haggadot. Arama's sermons in this work were the first attempt to unite both these tendencies. Though not artistic, he should not be reproached therefor, but should rather be commended for having established a model for generations of darshanim and modern Jewish preachers. Beginning with a Biblical text, Arama constructs his sermon along the lines of some saying of the Haggadah, the connection of which with the text is expounded by means of a philosophic disquisition, popularly told, and interspersed with specifically rabbinical interpretations; each sermon thus satisfied the lovers of philosophy as well as of the Talmud. His commentary on the Five Scrolls partakes of the same philosophical and homiletic nature as the "'Aḳedat Yiẓḥaḳ"; it has not, however, received much attention at the hands of moderns.

Arama also attempted to write poetry, and is the author of a *Baḳḳashah* (supplication), which, although of no poetic excellence, has a certain charm.

Arama's writings enjoyed universal esteem immediately upon their appearance, to such an extent indeed that Isaac Abravanel, a younger contemporary of his, did not scruple to embody long passages in his own works. Arama himself, however, very often copied from Rabbi Abraham Bibago without mentioning him, as J. S. Del Medigo pointed out in his "Maẓref la-Ḥokmah" (Crucible for Wisdom). Arama's works were likewise esteemed by the Christian world; for in 1729 an academical dissertation by M. A. J. van der Hardt, of the University of Helmstedt, was published under the title "Dissertatio Rabbinica de Usu Linguæ in Akedat Ischak," treating of section 62 of Arama's work, giving it in Hebrew with Latin translation.

L. G.

ARAMA, MEÏR BEN ISAAC: Philosopher and Biblical commentator; born at Saragossa at the end of the fifteenth century; died about 1556 in Salonica. His father was exiled from Spain in 1492 and died in Naples. Meïr Arama, who had gone thither with his father, remained there until the French army invaded Naples in 1495. He then went to Salonica and settled there, devoting himself to literary pursuits.

Arama is the author of the following works: (1) "Urim we-Tumim" (Light and Perfection), a philosophical commentary on Isaiah and Jeremiah, published by Menahem Jacob ben Eliezer Judah, Venice, 1603; (2) "Me'ir Iyyob" (The Illuminator of Job), commentary on Job written in 1506, and published, together with the text, at Salonica, 1517; (3) "Meïr Tehillot" (The Illuminator of the Psalms), commentary on the Psalms, written in 1512, and published, together with the text, at Venice, 1590; (4) "Perush," commentary on Song of Songs, published in the Bible of Amsterdam 1724-27, which latter bears the title "Ḳehillot Mosheh"; (5) commentary upon Esther, still extant in manuscript (Codex Rossi, No. 727). Arama quotes in his works a commentary of his on the Pentateuch. It is no longer in existence. The commentaries of Arama are, like those of his father Isaac, full of allegories and moral aphorisms. He wrote also a pamphlet against Isaac Abravanel, accusing him of plagiarizing the works of his father, which pamphlet was republished recently by Gabriel Polak.

K. I. Br.

ARAMAIC LANGUAGE AMONG THE JEWS: Of all Semitic languages the Aramaic is most closely related to the Hebrew, and forms with it, and possibly with the Assyrian, the northern group of Semitic languages. Aramaic, nevertheless, was considered by the ancient Hebrews as a foreign tongue; and a hundred years before the Babylonian exile it was understood only by people of culture in Jerusalem. Thus the ambassador of the Assyrian king who delivered an insolent message from his master in the Hebrew language and in the hearing of the people sitting upon the wall, was requested by the high officials of King Hezekiah not to speak in Hebrew, but in the "Syrian language," which they alone understood (II Kings xviii. 26; Isa. xxxvi. 11). In the early Hebrew literature an Aramaic expression occurs once. In the narrative of the covenant between Jacob and Laban it is stated that each of them named in his own language the stone-heap built in testimony of their amity. Jacob called it "Galeed"; Laban used the Aramaic equivalent, "Jegar sahadutha" (Gen. xxxi. 47). This statement undoubtedly betrays a knowledge of the linguistic differences between Hebrews and Arameans, whose kinship is elsewhere frequently insisted on, as for instance in the genealogical tables, and in the narratives of the earliest ages. One of the genealogies mentions Aram among the sons of Shem as a brother of Arphaxad, one of the ancestors of the Hebrews (Gen. x. 23). In another, Kemuel, a son of Nahor, the brother of Abraham, is called "the father of Aram" (Gen. xxii. 21). Other descendants of this brother of the Hebrew Abraham (Gen. xiv. 13) are termed Arameans; as, for instance, Bethuel, Rebekah's father (Gen. xxv. 20, xxviii. 5), and Laban, the father of Rachel and Leah (Gen. xxv. 20; xxxi. 20, 24). The earliest history of Israel is thus connected with the Arameans of the East, and even Jacob himself is called in one passage "a wandering Aramean" (Deut. xxvi. 5). During the whole period of the kings, Israel sustained relations both warlike and friendly with the Arameans of the west, whose country, later called Syria, borders Palestine on the north and northeast. Traces of this intercourse were left upon the language of Israel, such as the Aramaisms in the vocabulary of the older Biblical books.*

Considered Foreign by Ancient Hebrews.

Aramaic was destined to become Israel's vernacular tongue; but before this could come about it was necessary that the national independence should be destroyed and the people removed from their own home. These events prepared the way for that great change by which the Jewish nation parted with its national tongue and replaced it, in some districts entirely by Aramaic, in others by the adoption of Aramaized-Hebrew forms. The immediate causes of this linguistic metamorphosis are no longer historically evident. The event of the Exile itself was by no means a decisive factor, for the prophets that spoke to the people during the Exile and after the Return in the time of Cyrus, spoke in their own Hebrew tongue. The single Aramaic sentence in Jer. x. 11 was intended for the information of non-Jews. But, although the living words of prophet and poet still resounded in the time-honored language, and although Hebrew literature during this period may be said to have actually flourished, nevertheless among the large masses of the Jewish people a linguistic change was in progress. The Aramaic, already the vernacular of international intercourse in Asia Minor in the time of Assyrian and Babylonian domination, took hold more and more of the Jewish populations of Palestine and of Babylonia, bereft as they were of their own national consciousness. Under the Achæmenidæ, Aramaic became the official tongue in the provinces between the Euphrates and the Mediterranean (see Ezra iv. 7); therefore the Jews could still less resist the growing importance and spread of this language. Hebrew disappeared from their daily intercourse and from their homes; and Nehemiah—this is the only certain information respecting the process of linguistic change—once expressed his disapproval of the fact that the children of those living in "mixed marriage" could no longer "speak in the Jews' language" (Neh. xiii. 24).

Aramaic Displaces Hebrew.

How long this process of Aramaization lasted is not known. About the year 300 B.C. Aramaic makes its appearance in Jewish literature. The author of Chronicles uses a source in which not only documents concerning the history of the Second Temple are reproduced in the original Aramaic (Ezra iv. 8-22; v. 1-6, 12; vii. 12-26), but the connecting narrative itself is written in Aramaic (Ezra iv. 23, v. 5, vi. 13-18). In the time of Antiochus Epiphanes, the author of the Book of Daniel begins his narrative in Hebrew, but when he introduces the Babylonian sages and scholars as speaking Aramaic to the king, as if only awaiting this opportunity, he continues his history in Aramaic (Dan. ii. 4, vii. 28).* The employment of the two languages in these Biblical books well illustrates their use in those circles in which and for which the books were written. In point of fact, at the time of the Second Temple, both languages were in common use in Palestine: the Hebrew in the academies and in the circles of the learned, the Aramaic among the lower classes in the intercourse of daily life. But the Aramaic continued to spread, and became the customary popular idiom; not, however, to the complete exclusion of the Hebrew. Nevertheless, while Hebrew survived in the schools and among the learned—being rooted, as it were, in the national mind—it was continuously exposed to the influence of Aramaic. Under this influence a new form of Hebrew was developed, which has been preserved in the tannaitic literature embodying the traditions of the last two or three centuries before the common era. So that even in those fields where Hebrew remained the dominant tongue, it was closely pressed by Aramaic. There is extant an almost unique halakic utterance in Aramaic ('Eduy. viii. 4) of Yose b. Joezer, a contemporary of the author of Daniel. Legal forms for various public documents, such as marriage-contracts, bills of divorce, etc., were then drawn up in Aramaic. Official messages from Jerusalem to the provinces were couched in the same language. The "List of the Fast-Days" (Megillat Ta'anit), edited before the destruction of the Temple, was written in Aramaic. Josephus considers Aramaic so thoroughly identical with Hebrew that he quotes Aramaic words as Hebrew ("Ant." iii. 10, § 6), and describes the language in which Titus' proposals to the Jerusalemites were made (which certainly were in Aramaic) as Hebrew ("B. J." vi. 2, § 1). It was in Aramaic that Josephus had written his book on the "Jewish War," as he himself informs us in the introduction, before he wrote it in Greek. That he meant the Aramaic is evident from the reason he assigns, namely, that he desired to make this first attempt intelligible to the Parthians, Babylonians, Arabs, the Jews living beyond the Euphrates, and the inhabitants of Adiabene. That the Babylonian diaspora was linguistically Aramaized is shown by the fact that Hillel loved to frame his maxims in that language.

---

* [Modern Bible critics have endeavored to determine accurately the influence of Aramaic upon the various authors of Biblical books, and to use the results thus obtained in determining the age and authorship of the books (see, for example, König, "Einleitung in das Alte Test." p. 149; Holzinger, "Einleitung in den Hexateuch," *passim*; D. Giesebrecht, "Zur Hexateuch-Kritik," in Stade's "Zeitschrift," i. 177 *et seq.*; and compare xiii. 309, xiv. 143; S. R. Driver, "Journal of Philology," xi. 201-236).—G.]

The Targum, the Aramaic Version of the Scriptures.

The oldest literary monument of the Aramaization of Israel would be the Targum, the Aramaic version of the Scriptures, were it not that this received its final revision in a somewhat later age. The Targum, as an institution, reaches back to the earliest centuries of the Second Temple. Ezra may not have been, as tradition alleges, the inaugurator of the Targum; but it could not have been much after his day that the necessity made itself felt for the supplementing of the public reading of the Hebrew text of Scripture in the synagogue by a translation of it into the Aramaic vernacular. The tannaitic Halakah speaks of the Targum as an institution closely connected with the public Bible-reading, and one of long-established standing. But, just as the translation of the Scripture lesson for the benefit of the assembled people in the synagogue had to be in Aramaic, so all addresses and homilies hinging upon the Scripture had to be in the same language. Thus Jesus and his nearest disciples spoke Aramaic and taught in it (see Dalman, "Die Worte Jesu").

When the Second Temple was destroyed, and the last remains of national independence had perished, the Jewish people, thus entering upon a new phase of historical life, had become almost completely an Aramaic-speaking people. A small section of the diaspora spoke Greek; in the Arabian peninsula Jewish tribes had formed who spoke Arabic; and in different countries there were small Jewish communities that still spoke the ancient language of their home; but the great mass of the Jewish population in Palestine and in Babylonia spoke Aramaic. It was likewise the language of that majority of the Jewish race that was of historical importance—those with whom Jewish law and tradition survived and developed. The Greek-speaking Jews succumbed more and more to the influence of Christianity, while the Jews who spoke other languages were soon lost in the obscurity of an existence without any history whatever.

Language of Amoraim.

In these centuries, in which Israel's national language became superseded by the Aramaic, the literature of Tradition arose, in which Aramaic was predominant by the side of Hebrew; it was a species of bilingual literature, expressing the double idioms of the circles in which it originated. In the academies—which, on the destruction of Jerusalem, became the true foci of Jewish intellectual life—the Hebrew language, in its new form (Mishnaic Hebrew), became the language of instruction and of religious debate. With but few exceptions, all literary material, written and oral, of the tannaitic age, whether of a halakic or non-halakic description, was handed down in Hebrew. Hence the whole tannaitic literature is strongly distinguished from the post-tannaitic by this Hebrew garb. The Hebrew language was also the language of prayer, both of the authorized ritual prayers and of private devotion, as handed down in the cases of individual sages and pious men. According to a tannaitic Halakah (Tosef. Ḥag., beginning; compare Bab. Suk. 42*a*), every father was bound to teach his child Hebrew as soon as it began to speak. It is no doubt true that there was a knowledge of Hebrew in non-scholarly circles of the Jewish people besides that of the Aramaic vernacular; indeed, attempts were not lacking to depose Aramaic altogether as the language of daily intercourse, and to restore Hebrew in its stead. In the house of the patriarch Judah I., the female house-servant spoke Hebrew (Meg. 18*a*). The same Judah is reported to have said that in the land of Israel the use of the Syriac (Aramaic) language was unjustifiable; people should speak either Hebrew or Greek (Soṭah 49*b*; B. Ḳ. 83*a*). This remained of course only a pious wish, exactly as that deliverance of Joseph, the Babylonian amora in the fourth century, who said that in Babylon the Aramaic language should no longer be used, but instead the Hebrew or the Persian (*ib.*).

---

* [Other explanations have been attempted in order to account for the appearance of both Aramaic and Hebrew in Daniel and Ezra. Prof. Paul Haupt supposes that Daniel was originally written in Hebrew, that portions of it were lost, and that these portions were supplied later from an Aramaic translation. See A. Kamphausen, "The Book of Daniel" ("S. B. O. T."), p. 16; J. Marquart, "Fundamente der Israel. und Jüd. Gesch." p. 72.—G.]

When the Mishnah of Judah I. provided new subject-matter for the studies in the academies of Palestine and Babylonia, the Aramaic language was not slow in penetrating likewise to those seats of Jewish scholarship. As shown in the two Talmuds—those faithful "minutes" of the debates, lectures, and deliberations of the colleges—the Amoraim partially adhered to the Hebrew form of expression for their propositions and explanations; but the debates and lectures in the academies, together with the deliberations and discussions of their members, were, as a rule, in Aramaic; and even the terminology of their exegeses and dialectics was Aramaized. The older collections of haggadic Midrash also evidence the fact that the language of the synagogue addresses and of the Scripture explanation in the amoraic time was, for the greater part, Aramaic. As a justification for the preponderance thus given to Aramaic within a field formerly reserved for Hebrew, Johanan, the great amora of Palestine, said: "Let not the Syriac (Aramaic) language be despised in thine eyes; for in all three portions of sacred Scripture—in the Law, the Prophets, and the Holy Writings—this language is employed." He then quoted the Aramaic fragments in Gen. xxxi. 47; Jer. x. 11; and Dan. ii. (Yer. Soṭah vii. 21*c*). The same idea is probably intended to be conveyed by Rab, the great amora of Babylonia, when he says that Adam, the first man, spoke Aramaic, which, therefore, was not inferior to Hebrew in point of antiquity (Sanh. 38*b*). But the same Johanan felt it his duty to oppose the possibility that Aramaic should ever become the language of prayer, by declaring that "He who recites his prayers in the Aramaic tongue, will receive no assistance from the angels in waiting; for they understand no Aramaic" (Shab. 12*a*; Soṭah 33*a*). This utterance, however, did not prevent the Ḳaddish-prayer—said at the close of the public addresses, and later of more general employment—from being recited in amoraic times in the Aramaic language, or the insertion, later, of other Aramaic portions in the prayer-ritual.

Arabic Displaces Aramaic.

For more than a thousand years Aramaic remained the vernacular of Israel, until the conquests of the Arabs produced another linguistic change, as a sequel of which a third Semitic language became the popular tongue for a large portion of the Jewish race, and the vehicle of their thought. The spread of Arabian supremacy over the whole country formerly dominated by the Aramaic tongue produced with extraordinary rapidity and completeness an Arabizing of both the Christian and Jewish populations of western Asia, who had hitherto spoken Aramaic (Syriac). At the beginning of the ninth century, in districts where the Jews had previously spoken Aramaic, only Arabic-speaking Jews were to be found; Arabic, as the daily language of the Jews, held sway even beyond the territory formerly occupied by Aramaic, as far as the coasts of the Atlantic Ocean; and Aramaic then became, in a certain measure, a second holy tongue, next to Hebrew, in the religious and literary life of the Jewish people.* It was especially to the Aramaic Targum that religious sentiment paid the highest regard, even after it had ceased to be useful as a vernacular translation of the Hebrew original—serving only as the subject of pious perusal or of learned study—and had itself come to require translation. In the ritual of public worship the custom survived of accompanying the reading from the Scriptures with the Targum upon the passage read, a custom observed for certain festival-readings down to the very latest centuries. To these Targum selections were added Aramaic poems, some of which have retained their places in the festival-liturgies. Aramaic, as the language of the Babylonian Talmud, of course always remained the principal idiom of halakic literature, which regarded the Babylonian Talmud as the source for all religio-legal decisions and as the proper subject for explanatory commentaries. In richer and more independent form this idiom of Aramaic appears in the Halakah in the responsa of the Geonim; whereas in the still later literature, the so-called rabbinical idiom is entirely dependent upon the language of the Talmud, although it but possesses a copious admixture of Hebrew elements. In the haggadic literature, which developed wonderfully from the close of the amoraic age until after the termination of the gaonic period, Aramaic predominated at first; but in the course of time it was entirely displaced by Hebrew.

The Zohar.

A new field was suddenly conquered by Aramaic when the ZOHAR, with its assumed antiquity of origin, made its entrance into Jewish spiritual life. This book, which became the most important text-book of the Cabala, made itself the Holy Bible of all mystical speculation, and owed not a little of its influence to the mystic-sounding and peculiarly sonorous pathos of the Aramaic tongue, in which it is mainly written. The Aramaic of the Zohar itself—a clever reproduction and imitation of an ancient tongue—served in its turn as a model; and its phraseology exerted a very marked influence over other than cabalistic writers. An Aramaic extract from the Zohar found its way into the prayer-book (Berik Shemeh), and is recited before the reading from the Law in the majority of synagogues of Ashkenazic ritual. In poetic literature, however, both liturgic and secular, Aramaic, apart from the above-mentioned poems belonging to the Targum, occupied a steadily decreasing place. Masters of Hebrew versification, especially under the influence of the Cabala, tried their skill now and then on Aramaic poems. An Aramaic poem by Israel Nagara ("Yah Ribbon 'Olam") is still widely sung at table after the Sabbath meal.

---

* In northern Mesopotamia, in Kurdistan, west of Lake Urmia, Aramaic dialects are still spoken by Christians and occasionally by the Jews, which dialects are termed "Neo-Syriac." [The Jews in those regions call their Aramaic tongue "Leshon Galut." For the literature on the subject, see R. Gottheil, "The Judæo-Aramæan Dialect of Salamas," in "Journal of Amer. Orient. Soc." xv. 297 *et seq.*—G.]

In Hebrew philology, Aramaic was especially useful in the explanation of Hebrew words in the Bible; and it served as the foundation for a comparative philology of the Semitic languages inaugurated by Judah ibn Koreish and Saadia. Nevertheless, Aramaic was never treated either grammatically or lexicographically by the Jews of Spain, in spite of the high development to which they otherwise carried philology. In Nathan ben Jehiel's Talmudical lexicon, the 'Aruk—which covers also the Targumim—Aramaic naturally occupies the most prominent place. The first Aramaic lexicon limited to the Targumim was compiled by Elijah Levita. Among Jewish scholars of the nineteenth century, Aramaic grammars have been written by Luzzatto, Fürst, Blücher, and C. Levias; Jacob Levy published a compendious lexicon of the Targums as well as a large dictionary of the Talmudic and Midrashic literature, which distinguishes throughout between Hebrew and Aramaic; G. Dalman has published a full glossary, and Marcus Jastrow has nearly completed a similar work.

Names and Dialects of Aramaic.

The Hebrew word "Aramit," employed in the Bible (Dan. ii. 4—"Syriac" in A. V.—and elsewhere) to designate the Aramaic language, is similarly used in later times, particularly in Babylonia; while in Palestine as early as the tannaitic period, the Aramaic language is also called Sursi by reason of the Greek designation of the Arameans as Syrians. The second book of Maccabees calls it "the Syriac tongue" (*ἡ Συριακὴ φωνή*); and the Septuagint translates "Aramit" (Dan. ii. 4, etc.) by *συριστί*; compare Yer. Ned. x. 42*a*, where read סוריסטין for סוריבטין. Among Christian Arameans, Syriac is the exclusive appellation for their language; and the Arabic form of this term, "Suryani," was the usual designation for Aramaic among the Arabic-speaking Jews. In addition to these two chief names for Aramaic, other terms were also employed in Jewish circles: Targum (literally "translation" of the Bible, specifically the Aramaic version) denoted the language of the Aramaic portions of the Bible. But the Syrian inhabitants of the town lying below the monastery on Mount Sinai were described by Benjamin of Tudela as speaking the "Targum language" (leshon Targum). The Aramaic of the Bible (Daniel and Ezra) was called the Chaldaic language because of Dan. i. 4 (Masora upon Onkelos; Saadia); Jerome, too, calls it "Chaldaicus Sermo." The term "Chaldaic" for the Biblical Aramaic, and indeed for Aramaic generally, is a misnomer, persisted in, moreover, until the present day. It is also called "Nabatæan"—denoting, according to Bar-Hebræus, the dialect of certain mountaineers of Assyria and of villagers in Mesopotamia—which is the term used by Saadia to denote Aramaic in his translation of Isa. xxxvi. 11. Likewise in his introduction to the book "Sefer ha-Galui" he complains that the Hebrew of his Jewish contemporaries had become corrupted by the Arabic and "Nabatæan." This designation is due to Arabic influence ("Jew. Quart. Rev." xii. 517).

Aramaic contributions to Jewish literature belong to both the eastern and the western branches of the language. West Aramaic are the Aramaic portions of the Bible, the Palestinian Targumim, the Aramaic portions of the Palestinian Talmud, and the Palestinian Midrashim. In Palestinian Aramaic the dialect of Galilee was different from that of Judea, and as a result of the religious separation of the Jews and the Samaritans, a special Samaritan dialect was evolved, but its literature can not be considered Jewish. To the eastern Aramaic, whose most distinctive point of difference is "n" in place of "y" as the prefix for the third person masculine of the imperfect tense of the verb, belong the idioms of the Babylonian Talmud, which most closely agree with the language of the Mandæan writings. The dialect of Edessa, which, owing to the Bible version made in it, became the literary language of the Christian Arameans—bearing preeminently the title of Syriac—was certainly also employed in ancient times by Jews. This Syriac translation of the Bible, the so-called Peshitta, was made partly by Jews and was intended for the use of Jews; and one book from it has been adopted bodily into Targumic literature, as the Targum upon Proverbs.

For detailed information concerning the Aramaic literature of the Jews, see the respective articles. Only a summary is proper here, as follows:

(1) The Aramaic portions of the Bible already mentioned.

Extent of Aramaic Literature.

(2) The Targum literature includes: (*a*) The two Targums to the Pentateuch and to the Prophets respectively, which received the official sanction of the Babylonian academic authorities. Both originated in Palestine, and received their final form in the Babylonian colleges of the third and fourth centuries. That to the Pentateuch, owing to the misunderstanding of a statement concerning the Bible translation made by Akylas (Aquila), was denominated the Targum of Onkelos ('Akylas). That to the Prophets is ascribed by ancient tradition to a disciple of Hillel, Jonathan b. Uzziel: (*b*) The Palestinian Targum to the Pentateuch, the full text of which has come down to us only in a late recension, where it has been combined with the Targum Onkelos. Instead of being called by its proper name, Targum Yerushalmi, this full text had erroneously been called by the name of Jonathan. A less interpolated form of the Targum Yerushalmi to the Pentateuch revealed numerous fragments that must have been collected at an early period. There are also Palestinian fragments of the Targum to the Prophets.* (*c*) The Targums to the Hagiographa vary greatly in character. A special group is formed by those of the Psalms and Job. According to well-founded tradition there was as early as the first half of the first century of the common era a Targum to Job. The Targum to Proverbs belongs, as already mentioned, to the Syrian version of the Bible. The Five Rolls had their own Targums; the Book of Esther several of them. The Targum to Chronicles was discovered latest of all.

(3) Aramaic Apocrypha: There was at least a partial Aramaic translation of the book of Sirach as early as the time of the Amoraim. A portion of the Aramaic sentences of Sirach, intermingled with other

---

* [On a peculiar Targum to the Hafṭarot, see R. Gottheil, "Journal of Amer. Orient Soc. Proceedings," xiv. 43; Abrahams, "Jew. Quart. Rev." xi. 295; "Monatsschrift," xxxix. 394.—G.]

matter, is extant in the "Alphabet of Ben Sira." The Aramaic "Book of the Hasmonean House," also entitled "Antiochus' Roll," contains a narrative of the Maccabeans' struggles, and was known in the early gaonic period. A "Chaldaic" Book of Tobit was utilized by Jerome, but the Aramaic Book of Tobit found by Neubauer, and published in 1878, is a later revision of the older text. An Aramaic Apocryphal addition to Esther is the "Dream of Mordecai," of Palestinian origin.

(4) Megillat Ta'anit, the Fast Roll, is a list of the historically "memorable days," drawn up in almanac form. It was compiled before the destruction of the Second Temple, edited in the Hadrianic period, and later on augmented by various Hebrew annotations mostly of the tannaitic age.

(5) The Palestinian Talmud (Talmud Yerushalmi), completed in the beginning of the fifth century.

(6) The Babylonian Talmud (Talmud Babli), completed at the end of the fifth century. The Aramaic contents of both Talmuds are the most important and also the most abundant remains of the Aramaic idiom used by the Jews of Palestine and Babylonia respectively. The numerous stories, legends, anecdotes, conversations, and proverbs reveal faithfully the actual language of the popular usage. Neither Talmud is, however, entirely an Aramaic work. As the utterances of the Amoraim and their halakic discussions retain a great deal of the New Hebrew idiom of the tannaitic literature, both idioms were employed in the academies. Moreover, a large proportion of the material contained in the Talmud is composed of the utterances of tannaitic tradition that were couched only in Hebrew.

(7) The Midrash Literature: Of this branch the following are especially rich in Aramaic elements: Genesis Rabbah, Leviticus Rabbah, Lamentations Rabbati, the Midrash Ḥazita upon the Song of Songs, and the old Pesiḳta. The Rabbot Midrashim on Ruth, Esther, and Ecclesiastes, and the Midrash on the Psalms, contain also much Aramaic. The younger Midrashim, especially those belonging to the Yelamdenu (or Tanḥuma) group, are, in part, the Hebrew revisions of originally Aramaic portions. The Aramaic parts of the older Midrashim are linguistically allied most closely to the idiom of the Palestinian Talmud.

(8) The Masorah. The terminology of the Masorah, which, in its beginnings, belongs to the amoraic period, and the language of the oldest Masoretic annotations and statements, are Aramaic.

(9) The Gaonic Literature: The legal decisions of the Geonim were for the greater part written in Aramaic, in harmony with the language of the Babylonian Talmud; but they possessed this advantage, at least in the first few centuries, that this was likewise the living language of the people. The same is true concerning those two works of the older gaonic period, the "She'eltot" and the "Halakot Gedolot," which contain some material not found in the vocabulary of the Talmud.

(10) Liturgical Literature: In addition to the Kaddish already mentioned, several liturgical pieces originating in Babylon received general acceptance throughout the diaspora. Such were the two prayers beginning "Yeḳum Purḳan" in the Sabbath-morning service, the introductory sentences of the Passover Haggadah, and certain older portions of the liturgy for penitential days.* The Aramaic poems introducing certain Targumic selections from the Pentateuch have been mentioned above.

(11) Cabalistic Literature: The revival of Aramaic as the literary language of the Cabala by the Zohar has already been mentioned.

(12) Rabbinical Literature: The Aramaic coloring of a large proportion of the works commenting upon the Babylonian Talmud, as well as of other productions of halakic lore continuing the literature of the gaonic age, was derived from the Babylonian Talmud, from which the terminology and phraseology were adopted at the same time as the contents.

ARAMAIC VERSIONS. See Bible Translations and Targumim.

ARANDA, PEDRO DE: Bishop of Calahorra and president of the council of Castile in the latter part of the fifteenth century; was a victim of the Marano persecutions. His father, Gonzalo Alonzo, who was one of the Jews that embraced Christianity in the period of Vicente Ferrer's missionary propaganda during the early years of the fifteenth century, adopted the life of an ecclesiastic. Aranda's brother, too, earned episcopal honors, being placed at Montreal, Sicily.

Torquemada, the inquisitor-general, in the course of the Marano persecutions, brought against Pedro the charge that his father had died a Marano. A similar accusation was made at the same time against another bishop, Juan Arias Davila, of Segovia. The inquisitor-general demanded, therefore, not only that the bones of the deceased suspects should be exhumed and burned, but that their sons, too, should be disgraced and deprived of their estates. Sixtus IV., however, resented such summary degradation of high ecclesiastics, fearing that it would lead to the dishonor of the Church. He further set forth in a letter directed against Torquemada's exaggerated zeal, that, in accordance with an old tradition, distinguished personages of the Church could only be tried for heresy by specially appointed apostolic commissions. It was ordered that specifications of the charges against Davila and Aranda be forwarded to Rome; and an extraordinary papal nuncio, Antonio Palavicini, was sent to Castile to institute investigations. As a result, both bishops were summoned to Rome, where subsequently several distinctions were accorded to Davila, who during the remainder of his life enjoyed high honors.

---

* It is curious to note that the Yemen Siddur contains a larger quantity of Aramaic than the Siddurim of other countries. A unique Targum of the 'Amidah (Tefillah) is to be found in a Yemen MS. (Gaster, No. 61) of the seventeenth or eighteenth century; it has been printed in the "Monatsschrift," xxxix. 79 *et seq.*—G.

Aranda, too, at the outset won apostolic favor, and was even advanced to the office of prothonotary; but on account of his wealth he soon fell a victim to the cupidity of the pope. He was arraigned for having taken food before mass and for having desecrated, by scratching, a crucifix and other holy images. Moreover, a delegation of seven Maranos from Portugal happened to be in Rome at the time for the avowed purpose of purchasing for their constituents the good-will of the pope and his advisers. They had managed to win the favorable consideration of the papal court, but their efforts were resolutely opposed by Garcilaso, the ambassador of Ferdinand and Isabella. Observing the pope's resolve to imprison Aranda, Garcilaso pointed out the suspicion that was likely to arise in the popular mind from the anomalous incarceration of Aranda while the Marano delegates, indubitable heretics, were granted favor and freedom. As a consequence, Aranda and five of the Maranos were arrested and thrown into prison; Pedro Essecuator and Aleman Eljurado, the two leading members of the delegation, succeeded in escaping (April 20, 1497). Thus bereft of his worldly and ecclesiastic estate, Aranda ended his days at the San Angelo.

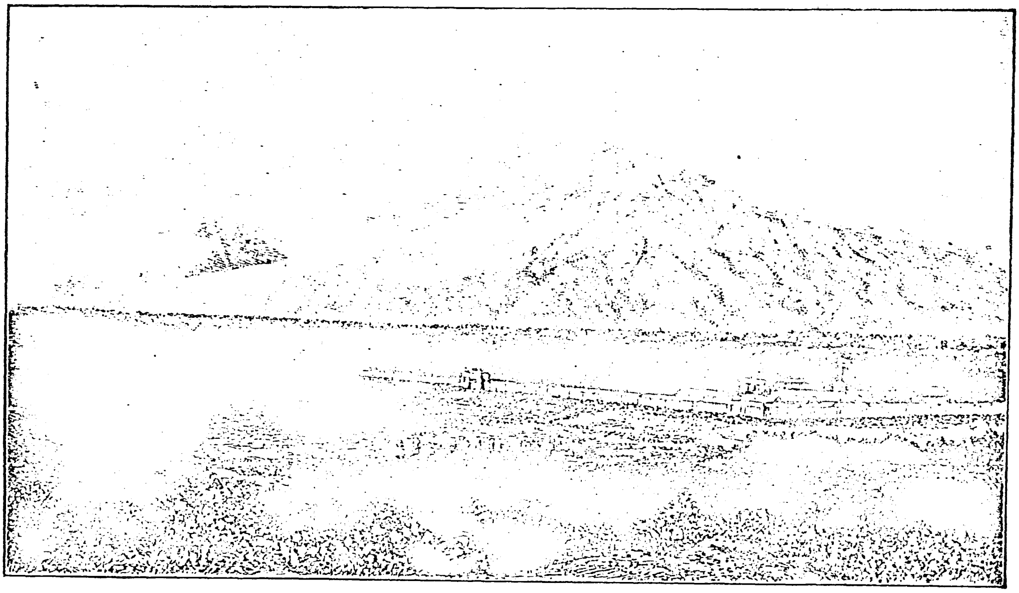
S. M. W.

ARARAT: A district in eastern Armenia lying between the lakes Van and Urmia and the river Araxes. The Biblical name corresponds to the Assyrian *Urartu*, a land invaded and partially conquered by Asshurnazir-pal and Shalmaneser II. The Assyrian cuneiform characters were introduced into the land of Urartu as early as the ninth century B.C., and many monumental inscriptions have been discovered within its boundaries. About the middle of the ninth century a strong native dynasty was established, and continued to rule until the Assyrian power was revived by Tiglath-pileser III., about 740 B.C. For a generation Urartu was invaded by Assyrian armies, until at last it again attained independence. This it retained until it was overrun by the Scythians about the end of the seventh century. Thus from the ninth to the sixth century B.C., the land of Urartu or Ararat occupied a prominent place among the minor states of southwestern Asia, and is referred to four times in the Biblical narrative. In II Kings xix. 37 (= Isa. xxxvii. 38) the fact is recorded that the assassins of the Assyrian king Sennacherib fled to the land of Ararat, where they found refuge with the reigning king Erimenas. In Jer. li. 27, Ararat is mentioned first among the hostile nations which are called upon to advance from the north and overthrow the power of Babylon. The most familiar reference, however, is that of Gen. viii. 4: "In the seventh month, on the seventeenth day of the month, the ark rested upon the mountains of Ararat."



Mount Ararat.

(From a photograph taken by special permission of the Russian government.)

In the older Babylonian story of the flood the ark (or "ship") is represented as resting on a peak of "the mountain of Nizir," situated east of the land of Assyria. Berosus, the Chaldean priest, in his history fixes the site in "the mountain of the Kordyæans" or Kurds, northeast of Mosul, in the direction of Urumiah (Josephus, "Ant." i. 3, § 6); and Nicolaus of Damascus states that the ark rested on a great mountain in Armenia, somewhere near the boundary between that land and Kurdistan. The principle determining these various identifications seems to have been that the ark rested on the highest point on the earth, which was, therefore, the first to emerge from the waters of the flood. Thus the peoples living between the Tigris and the Euphrates naturally decided that it was on the lofty mountains to the northeast in the land of the Kurds. This belief of the Babylonians, quoted by Josephus, is still held by the Nestorians and Moslems. The Biblical reference is indefinite; but of all the mountains in the ancient land of Ararat, the lofty peak which towers 14,000 feet above the encircling plain, reaching a total height of 17,000 feet above sea-level, is without a rival. Its steepness emphasizes its great elevation, and may well have impressed upon the minds of travelers of antiquity the fact that it was higher than the Kurdish mountains two hundred miles away. It may also explain why the writer in Genesis apparently abandoned the older conflicting Babylonian traditions and fixed upon this imposing, solitary peak far to the northwest.

The mountain itself is known as Ararat only among Occidental geographers. The Armenians call it Massis, the Turks Aghri Dagh, and the Persians Koh i Nuh, or "the mountain of Noah." Thus far it has been impossible to trace back to an early date an independent native tradition. Apparently the local legends which have clothed it with mystery, and which would place upon it the remains of the original ark, are based upon the passage in Genesis, and have been largely induced in comparatively recent times by the influence of Western Christianity. Superstitious fear and natural difficulties prevent the natives from attempting the ascent of the mountain; but its top has repeatedly been reached by Europeans, and its geological peculiarities have been noted. Its cone is the crater of an extinct volcano, and because of its great height it is snow-capped throughout the year.

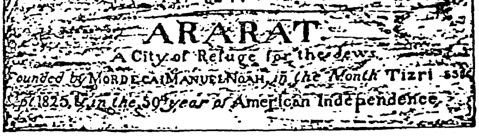
ARARAT.—A City of Refuge: A proposed city planned by Mordecai Manuel Noah in 1825. The reactionary policy adopted by many European governments after the battle of Waterloo led to the reimposition in many places of Jewish disabilities; and Jews laboring under them turned eagerly to emigration for relief. Mordecai M. Noah, in his journeys to and from his post of United States consul at Tunis, had occasion to familiarize himself with the conditions of Jews in various parts of Europe and Africa; and he could not refrain from contrasting the civil and political restrictions placed on the Jews abroad with the equality of rights and opportunities for enterprise and worldly success accorded to them in America. The consequence was that, in 1825, less than a decade after his return to New York, he conceived and published a plan for the establishment of "a city of refuge for the Jews," on a site which he selected upon Grand Island, in the Niagara river, near Niagara Falls, not far from Buffalo, N. Y. To this proposed city he gave the name "Ararat," thereby linking it with his own name and personality, and at the same time suggesting the nature of his scheme.

At that time Noah was perhaps the most distinguished Jewish resident of America; and his successful and varied activities as lawyer and editor, politician and playwright, diplomat and sheriff of New York, lent to his project considerable importance. Accordingly, he induced a wealthy Christian friend to purchase several thousand acres of land on Grand Island for this purpose. The tract was chosen with particular reference to its promising commercial prospects (being close to the Great Lakes and opposite the newly constructed Erie Canal); and Noah deemed it "preeminently calculated to become, in time, the greatest trading and commercial depot in the new and better world." Buffalo, at that time, had not grown to its present commercial importance, and Noah, in sober earnest, anticipated Carlyle's satirical prediction by describing the Falls of Niagara as "affording the greatest water-power in the world for manufacturing purposes." After heralding this project for some time in his own newspaper and in the press, religious and secular, generally, Noah selected Sept. 2, 1825, as the date for laying the foundation-stone of the new city. According to plan, impressive ceremonies, ushered in by the firing of cannon, were held, and participated in by state and federal officials, Christian clergymen, Masonic officers, and even American Indians, whom Noah identified as the "lost tribes" of Israel, and who were also to find refuge at this new "Ararat."



שמע ישראל יי אלהינו
יי אחד
ARARAT
A City of Refuge for the Jews
Founded by MORDECAI MANUEL NOAH, in the Month Tizri
1825, & in the 50th year of American Independence

Foundation-Stone of the Proposed City of Ararat.

Circumstances made it inconvenient to hold the exercises on Grand Island; so they were held instead in an Episcopal church at Buffalo. Noah was naturally the central figure; and, after having appointed himself "judge and governor" of Israel, he issued a "proclamation" in that official capacity. In this "state paper," he announced the restoration of a Jewish state on Grand Island, preliminarily to a restoration of a Palestinian state; commanded that a census of the Jews be taken throughout the world; levied a poll-tax of three shekels in silver per annum, to be paid into his treasury by Jews everywhere; graciously permitted such Jews as wished to remain in their adopted homes to stay there; directed Jewish soldiers in European armies to remain in such service till further "orders"; ordained certain religious reforms; made provision for the election every four years of a "judge of Israel," with deputies in each country; commanded the Jews throughout the world to cooperate with him, and appointed as his commissioners a number of distinguished European Jews.

Nothing came of the plan. The proposed city was never built, and it is even doubtful if Noah himself ever set foot on Grand Island. The letters of some of those nominated as European commissioners, declining the proffered appointments, have been handed down through the medium of the press of that day, which freely ridiculed the whole project. In the course of one of these letters, the grand rabbi of Paris said:

> "We declare that, according to our dogmas, God alone knows the epoch of the Israelitish restoration; that He alone will make it known to the whole universe by signs entirely unequivocal; and that every attempt on our part to reassemble with any political national design is forbidden as an act of high treason against the Divine Majesty. Mr. Noah has doubtless forgotten that the Israelites, faithful to the principles of their belief, are too much attached to the countries where they dwell, and devoted to the governments under which they enjoy liberty and protection, not to treat as a mere jest the chimerical consulate of a pseudo-restorer."

To-day, the only tangible relic of the entire project is the foundation-stone of the proposed city, preserved in the rooms of the Buffalo Historical Society, with the inscription of 1825 still legible upon its face. It is but fair to Noah to state that his plan was to establish "Ararat" as a merely temporary city of refuge for the Jews, until in the fulness of time a Palestinian restoration could be effected; and that he developed plans and projects for such Palestinian restoration both a few years before and twenty years after the year 1825, in which year this "Ararat" project began and ended.

ARAUNAH: A Jebusite whose threshing-floor in Jerusalem was pointed out to David by the prophet Gad as a fitting place for the erection of an altar of burnt offering to Jehovah after the great plague had been stayed, since it was there that the destroying angel was standing when the pestilence was checked (II Sam. xxiv. 16 *et seq.*; I Chron. xxi. 15 *et seq.*). David then went to Araunah, and for fifty pieces of silver bought the property and erected the altar. It is remarkable that Chronicles give the form Ornan for the Jebusite's name. A conjecture by Cheyne, founded on the slight emendation of ר to ד, makes the true form of the name to be Adonijah. According to I Chron. xxi. 31, Hebr.; xxii. 1, A.V., the threshing-floor must have been Mt. Moriah.

J. JR. J. F. McC.

ARAUXO, ABRAHAM GOMEZ DE: Lived in the seventeenth century. He was a member of a poetical academy in Amsterdam, Holland, in 1682, a good mathematician, and aroused the admiration of his associates by his clever solution of riddles.

G. M. K.

ARAUXO, DANIEL: Physician. Lived in the seventeenth century in the city of Amsterdam. In the year 1655 he composed an elegy on the martyr Isaac de Almeyda Bernal.

G. M. K.

ARBA: The hero of the Anakim, who lived at Kirjath-arba, a city named in his honor (Josh. xiv. 15). In Josh. xv. 13 and xxi. 11 he is called the father of Anak, which evidently means that he was regarded as the ancestor of the Anakim.

J. JR. G. B. L.

ARBA' ARAZOT. See COUNCIL OF THE FOUR LANDS.

ARBA' KANFOT ("four corners"): The "four-cornered garment"; a rectangular piece of cloth, usually of wool, about three feet long and one foot wide, with an aperture in the center sufficient to let it pass over the head, so that part falls in front and part behind. To its four corners are fastened the fringes (ẒIẒIT) in the same manner as to the ṬALLIT. It is therefore also called the "small ṭallit" (ṭallit ḳaṭon).

The Arba' Kanfot and the Ṭallit.

The Arba' Kanfot, like the ṭallit, is worn by male persons in pursuance of the commandment, as recorded in Num. xv. 37-41 and Deut. xxii. 12, to wear a garment with fringes. But while the ṭallit is thrown over the upper garments only in the morning service, the Arba' Kanfot is worn under the upper garments during the whole day. In putting on the ṭallit the benediction to be pronounced reads: "Blessed art Thou, Lord our God, King of the universe, who hath commanded us to wrap ourselves in fringes" (להתעטף בציצית). The conclusion of the benediction on the Arba' Kanfot reads: ". . . and hath commanded us the commandment of fringes" (Shulḥan 'Aruk, Oraḥ Ḥayyim, 8, 12). Among the Ashkenazim the ṭallit is used by males over thirteen, while the Arba' Kanfot is provided also for children as soon as they are able to put on their clothes without assistance.

Origin of the Arba' Kanfot.

There is no trace of the Arba' Kanfot among the Oriental Jews of the Middle Ages (compare Leopold Löw, "Gesammelte Schriften," ii. 320, Szegedin, 1890; Israel Abrahams, "Jewish Life in the Middle Ages," p. 287, Philadelphia, 1897). It may be assumed that it was adopted by the European Jews in the times of persecution, when they had to refrain from exhibiting the garment with fringes. The wearing of such a garment as an outer robe was therefore limited to the synagogue, while the precept to wear fringes at all times was fulfilled in the wearing of the Arba' Kanfot. Some superstitions have gathered round the wearing of the Arba' Kanfot in Eastern districts; the placing of a piece of "afiḳomen" in one of the corners of the Arba' Kanfot was supposed to avert the evil eye (see Afikomen). In Moravia the Arba' Kanfot is often left on the body in the grave.

[The oldest mention of the Arba' Kanfot is found in the code of Jacob ben Asher, about 1350 (Ṭur Oraḥ Ḥayyim, xxiv.), who refers to Mordecai as quoted in the "Bet Yosef"), where, however, the custom is merely alluded to (Mordecai's annotations to Alfasi, § 945, ed. Vienna, vol. i., 82c.).—D.]

J. JR. G. B. L.

——**In Rabbinical Literature:** Arbela is mentioned in rabbinical sources as the home of a scholar named Nitai (Mattai), who lived in the middle of the second century before the common era (Abot i. 6). The Galilean Arbela, not far from Lake Gennesaret, is intended, where, in the twelfth century, this scholar's grave was still pointed out (Pethahiah of Regensburg, "Travels," ed. Margolin, p. 53). According to an old Baraita, familiar to the poet Eliezer Kalir, Arbela was a priests' city at the time of the destruction of the Temple, and even in later centuries it seems to have been an important town. Mention is made of Arbelan linen (Gen. R. xix., beginning), which was of inferior quality; also, of Arbelan spindles (Tosef., Parah xii. 16). Talmud and Midrash speak frequently of the Valley of Arbela. Josephus also mentions the caves in the vicinity.

Medieval Jewish literature often refers to the ruins of the synagogue of Arbela (Carmoly, "Itinéraires de la Terre Sainte," p. 259), which are preserved today in the village of Irbid, as the Arabic form of the name runs. This Arbela, however, is undoubtedly distinct from the Arbela where the exilarch Mar Ukba dwelt (Yer. Soṭah iv. 19*d*), seeing that that scholar could hardly have ever been in Palestine. Accordingly, the Arbela in Adiabene, between the Lycus and the Caprus, 600 stadia (69 miles) from Gaugamela, must be understood; and it is probable that to this city Benjamin of Tudela refers ("Itinerary," ed. Asher, i. 52, below).

T.* pp. 219, 220, 374; Hirschensohn, *Sheba' Ḥokmot*, p. 43, Lemberg, 1883.

L. G.

ARBIB, EDUARDO: Italian deputy and author; born at Florence, July 27, 1840. On the death of his father he was obliged to discontinue his studies and earn his livelihood as compositor and corrector for the press. In 1859 he enlisted as a volunteer in the Piedmontese regiment of Alpine chasseurs, and took part in the war for independence. The war over, he returned to the printing-house, which he left again to follow Garibaldi to Sicily in 1860. He was promoted to the rank of lieutenant on the battle-field of Milazzo, and entered the regular army with the same grade. Arbib served in the campaign against Austria in 1866, and on the cessation of hostilities he retired from the army and found employment on the staff of "La Nazione," a newspaper published in Florence; subsequently he became editor-in-chief of the "Gazzetta del Popolo" in the same city. Ultimately he removed to Rome, where in 1870 he founded a daily newspaper, "La Libertà." His political career began in 1880, when he was elected by the citizens of Viterbo as their representative in the Chamber of Deputies; and some time later he was elected to the Chamber by the people of Perugia. His contributions to Italian literature are: (1) "L'Esercito Italiano alla Campagna del 1866"; (2) "Raconti Militari" (1870), in the "Biblioteca Amena" (vol. lxv.); (3) "Guerra in Famiglia" (1871); (4) "La Moglie Nera" (1874); (5) "Rabagas Bandiere" (1878).

ARBIB, ISAAC. See ARROYA, ISAAC BEN MOSES.

ARBUES, PEDRO: Spanish canon and inquisitor; called by certain Jews "the creature and darling of Torquemada"; born about 1441 at Epila, Aragon (hence sometimes styled "master of Epila"); died Sept. 17, 1485. He was appointed canon of Saragossa in 1474; and ten years later Torquemada appointed him and the Dominican Gaspar Juglar inquisitors for the province of Aragon. The zeal exhibited by Torquemada in his religious persecutions was emulated by Arbues, who in the first month of his office held two autos da fé, at which several Maranos were executed, and others were condemned to penance and loss of property. Though no record of further trials exists, he must have continued to be active in persecution, as the Maranos were so enraged that his assassination was determined upon. The offer of enormous sums to Ferdinand and Isabella to induce them to limit the activity of the Inquisition and the confiscation of property had been fruitless, and, after consultation with newly converted Jews—some of whom were men of high rank, like Gabriel Sanchez, the king's treasurer—the extreme step was taken by two wealthy Maranos, Juan de la Abadia and Juan Esperandeu, with the hired help of an assassin, the latter's French servant, Vidal, probably a Jew. Abadia's incentive was doubtless the execution of his sister and the condemnation of his father by the Inquisition. An attempt to enter Arbues' bedchamber failed; but the design was accomplished while he was attending mass. Two days later he died from his wounds.

The retaliation on the Maranos, not all of whom were implicated, was awful. Vidal and Esperandeu were cruelly put to death; and Abadia made an attempt at suicide while awaiting his auto da fé. On Arbues' death, popular belief invested him with miraculous power. A Jewess saved herself from death by proving that from Catholic zeal she had dipped her handkerchief in his blood. His canonization by Pius IX. (1867) aroused protests not only from Jews, but from Christians. The general sentiment against the act is illustrated by the well-known charcoal drawing of Kaulbach, "Peter Arbues Burning a Heretic Family." Arbues is represented as old and decrepit, and taking fiendish delight in the sufferings of his victims, who are probably Maranos.

G. M. K.—W. M.

ARCADIUS: Byzantine emperor from 395 to 408. He was too weak a ruler to be able to withstand the influence exerted by his court favorites upon his policy toward the Jews. Such privileges as were accorded them were due to his privy counselor, Eutropius (396–399), who easily allowed himself to be bribed into favoring the Jews. (See Pauly-Wissowa, "Realencyclopädie der Class. Alterthumswissensch." *s.v.*) The laws curtailing the various favors already granted to the Jews are supposed by Grätz ("Gesch. der Juden," 3d ed., iv. 359) to have been promulgated after the death of Eutropius. A law of the year 396 forbids, under penalty of imprisonment, any imperial officer from fixing the price on Jewish merchandise brought to market; the privilege is left to the Jews themselves (Codex Theodosianus, xvi. 8, 10). Still, in this law no reference is had to Jewish market-inspectors, as Grätz infers. It is a matter relating solely to the non-liability of the Jews to the law, *De pretio rerum venalium*, which was already in existence in the reign of Diocletian. The same spirit of justice manifests itself in another law of Arcadius: "It is sufficiently well known that the sect of the Jews is not limited in its rights by any law" (*ib.* xvi. 8, 9). In the same year (396), Arcadius issued an edict addressed to Claudianus, the "comes" of the Orient, wherein he is ordered to protect the "illustrious patriarch" against insult (§ 11). He also commanded the prefect of Illyria (in 397) to prevent any ill treatment of the Jews, and to guard their synagogues against any disturbance "of their wonted peaceful condition" (§ 12). Moreover, the Jewish patriarchs, as well as all of their legal functionaries, such as the archisynagogoi and presbyters, were to enjoy the same privileges as the Christian clergy, and be relieved of curial taxes. In the last clause, Arcadius refers to the measures of the emperors, Constantine the Great, Constantius, Valentinian, and Valens; but Gothofredus remarks concerning this law (§ 13) that the privilege was suspended under Valens in 383. In 404 Arcadius again confirmed these privileges to the patriarchs and other officials of the Jewish communities, and once more with reference to his father, the legislator, the emperor Theodosius (§ 14). All of these laws may be found chronologically arranged in the section of the Digest, "De Judæis, Cœlicolis et Samaritanis." But laws concerning the Jews emanating from Arcadius are also found in other portions of the codex of Theodosius. In February, 398, Arcadius ordered that in all civil contests, if both parties agreed, the Jews might elect their patriarchs or any other officers as judges; but the execution of their sentences was placed in the hands of Roman officials appointed for that purpose. In all matters not pertaining to religion, the Jews had to conform to the requirements of the Roman law ("Corpus," II. i. 10). The ordinance of 399 does not read as Grätz has it, that all Jews, including their religious officials, are subject to the curial taxation, but refers to all the Jews (quicunque ex Judæis), with the exception, of course, of the functionaries of the synagogues (xii. 1. 165); and thus this ordinance does not conflict with the other similar one. The so-called shipping law of the year 390, regulating the transactions of the Jews and Samaritans in Alexandria (xiii. 5, 18), was signed by Arcadius as well as by Valentinian and Theodosius; but at that time Arcadius was scarcely more than a child. Among the laws of Arcadius deserving particular mention is the one which gives warning against those baptized Jews who rush to the church from dishonest motives (xvi. 8, 2; Jost, "Gesch." iv. 226).

G. S. Kr.

ARCHA or **ARCA** ("chest"): Technical name in old English Treasury documents for the repository in which Chirographs and other deeds were preserved. By the "Ordinances of the Jewry" in 1194 it was arranged that "all deeds, pledges, mortgages, lands, houses, rents, and possessions of the Jews should be registered"; that only at six or seven towns contracts could be made in duplicate, one part to remain with the Jewish creditor, the other to remain in the Archa; and that the contents of the archæ were there to be recorded on a roll of transcripts so that the king by this means should know every transaction made by any Jew in the kingdom. From time to time a "scrutiny" of the Archa took place, when either the Archa itself, or more probably the roll or transcript, was sent up to Westminster to be examined by the treasurer there. Many deeds showing copies of the rolls made at these "scrutinies" still exist at Westminster Abbey and at the record office (Memoranda of the Queen's Remembrances—Jews' Rolls, Nos. 556 [3, 12], 557 [1, 7, 8, 10, 13–23]).

During the thirteenth century there appear to have been twenty-six towns in England at which archæ were kept; and it was only at these towns that any business could be legally transacted with Jews. These towns have been enumerated by Dr. Gross as follows: Bedford, Berkhampstead, Bristol, Cambridge, Canterbury, Colchester, Devizes, Exeter, Gloucester, Hereford, Huntingdon, Lincoln, London, Marlborough, Northampton, Norwich, Nottingham, Oxford, Stamford, Sudbury, Wallingford, Warwick, Wilton, Winchester, Worcester, and York.

Jews were allowed to dwell in towns only where there was an Archa, though exemptions were sometimes made. On Jan. 28, 1284, a royal mandate was issued ordering a general closure of the archæ, but commissioners were appointed to reopen the London Archa on Feb. 28, 1286 (Rigg, "Select Pleas of the Exchequer of the Jews," 1902, p. lxi.).

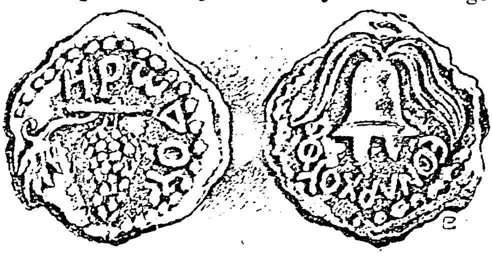
ARCHAGATHUS. See Cæcilius of Kalakte.

ARCHELAUS: Son of Herod I.; king of Judea; born about 21 B.C., his mother being the Samaritan Malthace. At the age of fourteen he was sent to Rome for education, and, after a stay of two or three years, returned home with his brothers Antipas and Philip, who likewise had attended the schools of the Imperial City. His return was possibly hastened by the intrigues of Antipater, who by means of forged letters and similar devices calumniated him to his father, in the hope of insuring for him the same sanguinary fate he had prepared for his brothers Aristobulus and Alexander. As a result of these slanders, Herod designated Antipas, his youngest son, as his successor, changing his will to that effect. On his death-bed, however, four days before his demise, the king relinquished his determination and appointed Archelaus to the throne, while Antipas and Philip were made tetrarchs merely. Nothing is known definitely of the occasion for this change, though there may be some foundation for the statement of Archelaus' opponents, that the dying king, in his enfeebled condition, had yielded to some palace intrigue in the latter's favor.



Copper Coin of Herod Archelaus.

Obverse: ΗΡΩΔΟΥ. A bunch of grapes and leaf. *Reverse:* ΕΘΝΑΡΧΟΥ. A helmet with tuft of feathers: in field to left a caduceus.

(After Madden, "History of Jewish Coinage.")

Archelaus thus attained the crown with little difficulty at the early age of eighteen. That aged plotter Salome found it convenient to abet Archelaus, and secured for him the adherence of the army; hence there was no opposition when he figured as the new ruler at the interment of Herod. The people, glad of the death of the tyrant, were well disposed toward Archelaus, and in the public assembly in the Temple the new king promised to have regard to the wishes of his subjects. It very soon became manifest, however, how little he intended to keep his word. Popular sentiment, molded by the Pharisees, demanded the removal of the Sadducean high priest Joezer (of the Boethus family), and the punishment of those former councilors of Herod who had brought about the martyrdom of the Pharisees Mattathias and Judas. Archelaus, professing always profound respect for the popular demand, pointed out that he could not well take any such extreme measures before he had been confirmed by the Roman emperor, Augustus, in his sovereignty: just as soon as this confirmation should be received, he declared himself willing to grant the people's desire. His subjects, however, seem not to have had confidence in his assurances; and when, on the day before Passover—a day when all Palestine, so to speak, was in Jerusalem—they became so insistent in their demand for immediate action, that the king felt himself compelled to send a detachment of the Herodian soldiery against them into the Temple courts; and when this detachment proved unable to master the enraged populace, he ordered out the whole available garrison. In the massacre that ensued, three thousand were left dead upon the Temple pavements.

His Harsh Treatment of the People.

As soon as the tumult had been somewhat allayed, Archelaus hastened to Rome to secure the required confirmation of his succession from Augustus. He found that he had to encounter opposition from two sides. His brother Antipas, supported by many members of the Herodian house resident in Rome, claimed formal acknowledgment for Herod's second will, that nominated him king. Besides, the Jews of Palestine sent a deputation of fifty persons—who were supported by about 8,000 Jewish residents of Rome—and petitioned for the exclusion of the Herodians from any share whatever in the government of the land, and for the incorporation of Judea in the province of Syria. Such was the disloyalty among the Herodians, that many members of the family secretly favored this latter popular demand. But Augustus, with statesman-like insight, concluded that it was better for Roman interests to make of Judea a monarchy, governed by its own kings tributary to Rome, than to leave it a Roman province administered by Romans, in which latter case there would certainly be repeated insurrections against the foreign administration. As it would be more prudent to make such a monarchy as small and powerless as possible, he decided to divide Herod's somewhat extensive empire into three portions. Archelaus was accordingly appointed ethnarch—not king—of Judea, Samaria, and Idumea, with the exception of the important cities of Gaza, Gadara, and Hippus, which latter were joined to the province of Syria. Antipas and Philip were made tetrarchs of the remaining provinces, the former receiving Galilee and Perea, and the latter the other lands east of the Jordan.

Division of the Kingdom by Rome.

While these negotiations were pending in Rome, new troubles broke out in Palestine. The people, worked up almost into a state of frenzy by the massacres brought about by Herod and Archelaus, broke into open revolt in the absence of their ruler. The actual outbreak was without doubt directly caused by Sabinus—the procurator appointed by Augustus to assume charge pending the settlement of the succession—owing to his merciless oppression of the people. On the day of Pentecost in the year 4 B.C., a collision took place in the Temple precincts between the troops of Sabinus and the populace. Sabinus utilized his initial success in dispersing the people by proceeding to rob the Temple treasury. But disorders broke out all over the province, and his forces were not sufficient to repress them. Judas, son of the revolutionary Hezekiah in Galilee, a certain Simon in Perea, Athronges and his four brothers in other parts of the land, headed more or less serious uprisings. It was only when charge was assumed by Varus, the Roman legate in Syria, with his numerous legions, assisted, moreover, by Aretas, king of the Arabs, and his auxiliaries, that any measure of peace was restored to the land, and this not without the loss of several thousand Roman troops. What the loss on the Jewish side must have been may perhaps be surmised from the rabbinical tradition that the outbreak under Varus was one of the most terrible in Jewish history.

Insurrectionary Outbreaks.

Archelaus returned to Jerusalem shortly after Varus suppressed the insurrection. Very little is known of the further events of his reign, which lasted nine years; but so much is clear, that instead of seeking to heal the wounds brought upon the country by himself and his house, he did much to accelerate the ultimate overthrow of Judean independence. In the year 6 of the common era, a deputation of the Jewish and Samaritan aristocracy waited upon Augustus in Rome, to prefer charges against Archelaus, with the result that he was immediately summoned to Rome, deprived of his crown, and banished to Vienne in Gaul, where—according to Dion Cassius Cocceianus, "Hist. Roma," lv. 27—he lived for the remainder of his days.

Banishment and Death.

Archelaus was a veritable Herodian, but without the statesman-like ability of his father. He was cruel and tyrannical, sensual in the extreme, a hypocrite and a plotter. He observed the customary seven days of mourning for his father, but in the midst of them gave to his boon companions a congratulatory banquet upon his accession. He carefully avoided placing his image upon his coinage in deference to pharisaic susceptibilities; but he nevertheless allowed his passion for his widowed sister-in-law, Glaphyra, to master him, and married her in defiance of the sentiment of the people and the Pharisees, who regarded the union as incestuous (Lev. xviii. 16, xx. 21). He deposed the high priest Joezer on his return from Rome, not in obedience to popular complaint, but for a money consideration. Joezer's brother was his successor, although the latter was of exactly the same type. Indeed, Archelaus, in his short reign, deposed three high priests for purposes of profit. Against this serious list of evils there is hardly anything good to set in contrast, beyond perhaps the fact that he inherited from his father a certain love of splendor and a taste for building. He restored the royal palace at Jericho in magnificent style, surrounding it with groves of palms; and also founded a city, that he called in his own honor Archelais.

L. G.

ARCHEOLOGY, BIBLICAL: The branch of archeology that has for its province a scientific presentation of the domestic, civil, and religious institutions of the Hebrews, in the lands of the Bible, especially in Palestine. It deals with these for the whole stretch of Judaic history down to the fall of Jerusalem in the year 70, the end of Judaism as a power in Palestine. The term "Archeology" was used by Josephus in his great work, Ἰουδαϊκὴ Ἀρχαιολογία (literally "Judaic Archeology," but usually translated "Antiquities of the Jews"), to cover the entire history of his people, their life, customs, religious institutions, and literature. This comprehensive sense remained current until the time of the Reformation. Indeed, writers like Eusebius, Jerome, and Epiphanius, while they produced neither history nor archeology as such, contributed material valuable for the enrichment of both. It is safe to say that no treatise on Biblical Archeology proper made its appearance until after the Middle Ages.

First Meaning of Biblical Archeology.

It was not until the sixteenth century that Carlo Sigonius (died 1584) gathered up and presented in his "De Republica Hebræorum" a discussion of sacred places, persons, and rites. This classification seemed to furnish scholars with a clue to what should be included in the term "Archeology" as applied to the Bible; so that De Wette (in 1814), followed by Ewald (in 1844), gives the first really systematic classification of the material that, up to the present time, is regarded as belonging to the field of Biblical Archeology. Even as late as Keil's work (1875), the main divisions of the subject are treated in the following order: (1) sacred antiquities; (2) domestic antiquities; and (3) civil antiquities.

The historico-critical method of investigating Old Testament history claims to have rectified a former error. It is now generally maintained that many of the records of the history of Israel originated at a date later than was formerly supposed, and that consequently many of the religious institutions, customs, and rites current among the Jews bear the marks of later ideas, conditions, and environments. It is further claimed that religious rites and customs owe their character largely to the domestic life and surroundings of a people. The recognition of this fact necessitates a reversal of the order of the themes usually included in the term "Biblical Archeology." Accordingly the present order of treatment is: (I.) Domestic Antiquities; (II.) Civil Antiquities; and (III.) Sacred Antiquities; but, as will be seen, there is still another section to add on the land of Palestine itself.

Archeology and History.

In the treatment of this topic, as of many other topics relating to ancient times, no hard-and-fast line can be drawn. History proper should cover the entire religious and political life of a people. It should present their laws, customs, and manners. It should also, when occasion requires, include their relations to neighboring peoples, politically, socially, and commercially. Archeology has to do with but a part of this material. It concerns itself with the interrelationships of the people in domestic, civil, and religious life. It goes further, and includes in itself a consideration of the character of the land where they live, and of their social, industrial, artistic, and literary organizations and features.

Biblical Archeology depends for its material upon a mass of ancient literature and antiquities. It will be impossible for the student of archeology to utilize to advantage the literary material, especially of the Old Testament, without due regard to the literary processes by which it was prepared. Much of the available material of archeology is secured from literature, but only after it has been subjected to the most searching critical processes. In fine, archeology at large finds in literature one of its best sources of information and one the testimony of which can not be set aside. Nevertheless, at the bottom, beneath all the literary activity of the people, lie, of course, the conditions under which the Israelites produced their literature. Hence, while much that is of value to archeology is found in Israel's literature, a knowledge of archeology will include information concerning the land which nourished that literature. There is, consequently, a kind of necessary interdependence between these two branches of knowledge—literature and its native soil.

Archeology and Religion.

The religious system of the Old Testament embraces both literary and archeological material; both ancient documents and monuments. Biblical Archeology includes only so much of this material as bears upon sacred places, persons, feasts, vessels, and ritual. It does not discuss religious ideas, either in their origin or their development. It does not present a systematized religio-legal system, nor the relations of that system to civil processes. Neither does it discuss the relation of Israel's rites and ceremonies to those of surrounding nations. These themes, proper in modern scientific subdivisions of material touching the ancient Jews, fall under the head of religion or of comparative religion.

The soil of the Orient is the treasure-house of one of the two great sources of Biblical Archeology. Palestinian ruins at Jerusalem, at Lachish, at Gaza, at the Dead Sea, and in the tombs on the hillsides, are all instructive teachers concerning the life and times of the ancient Jews. Fragments of documents of this people and of their neighbors are replete with information bearing upon the Archeology of the Bible. The Moabite Stone, for the ninth pre-Christian century, and the Siloam Inscription are valuable evidences of the character of the writing and of some of the customs of those early days (see Alphabet). The numerous small inscriptions from Phenician sources tell a fascinating story of tragical times contemporaneous with Israel. From Palestinian ruins, likewise, come many voices of the later periods, as the scattered and broken Greek and Latin inscriptions are deciphered and interpreted. Coins also tell their tale of the past, often with gratifying precision.

Monumental Sources.

The revelations from the mounds of Babylonia and Assyria, made within the last half-century, vitally touch the people of Israel. The close relationship existing between the social, political, and religious systems of that ancient West and East has now been clearly ascertained. The close racial kinship existing between Israel and the great powers centered on the Tigris and the Euphrates gives special significance to the antiquities exhumed from those eastern plains. The fact that Israel's ancestors migrated from Eastern centers, carrying with them the characteristics of their early home-land and people, points likewise to the essential importance of the "finds" brought from Mesopotamia.

Many items of considerable value to Biblical Archeology are discovered in the community of religious requirements and customs between Israel and her overland Eastern neighbors. The aggressiveness of Eastern political influence and power toward the West, in the later periods of Israel's history, carried with it other forces that largely affected the social and commercial fabric of the Palestinian kingdoms. Consequently, there is no land outside of Palestine whose ancient history and antiquities have a more noteworthy significance for Biblical Archeology than the great Mesopotamian region.

The imperishable character of the remains of ancient life found in the sands and tombs of Egypt, the proximity of that land to Palestine, and the association of that people and that land with Israel's history make the territory in question a fascinating field to the archeologist. The influence of Egypt's civilization upon the literature and life of the Jews is especially marked during the patriarchal, the bondage, and the wilderness periods. At intervals during the later stages of history—for example, in Isaiah's day—Egypt exercised no small influence over the life of the Israelites. While many points are still in dispute, some genuine increments of value from Egyptian monumental sources may be even now discovered.

Literary Sources.

The most fruitful sources of information germane to the subject are of course the literatures of the Old and New Testaments. As has been noted above, due regard must be had from the beginning to the assured results of Biblical criticism. The Old Testament material must be so used as to gain therefrom full advantage of the best-established results of the scholarship of to-day. It must be remembered, however, that a systematic archeology for each period of history can not yet be presented; merely the origin and growth of rites and customs through the entire stretch of time are all that have been traced. Uncertainty as to the dates of some of the books of the Bible aggravates the difficulties of the archeologist.

The New Testament material, less indefinite as to time, furnishes valuable data regarding the Jews of the first century, particularly those in Palestine. Certain rites and ceremonies prevalent among the sects of that age are relevant and instructive material. Even the circumstances that led up to the death of Jesus are full of interest for the student of archeology. The experiences undergone by Paul and other apostles in the establishment of the Christian Church often illuminate this subject.

The writings of Josephus, compiled, as they were, from many and uncertain sources, possess, nevertheless, because of their immense sweep through time, a multitude of apposite data. Josephus' partiality for his own people, and his desire to magnify their importance throughout their history, have to be guarded against; but he provides much material for the portrayal of the life of the ancient Jews.

The inter-Biblical apocryphal books, such as I and II Maccabees, III and IV Esdras, Judith, the Letter of Jeremiah, etc., abound in hints and items of importance in a systematic study of Biblical Archeology. Philo of Alexandria, though strongly influenced by Greek thought, was a serviceable chronicler of many things Jewish. This mass of literature yields much of genuine value to the archeologist of Sacred Scripture.

The early centuries of the Christian era have left several pertinent documents. The great mass of rabbinical literature (the two Talmuds and the Midrashic collections) is full of facts, statements, and hints concerning the life of the Jewish people. These are often of significant, illustrative importance in the elucidation of Old Testament conditions. The compilations of Manetho, Berosus, and Philo of Byblus yield facts that add materially to some phases of Biblical Archeology. The habits, customs, and religious characteristics of the Jews, as described in early Christian and Greek writings, are also of value. Arabic literature and antiquities reveal the common Semitic character of ancient times, and consequently some elements of Jewish life.

The unchangeable and permanent elements of the Oriental Semitic personality are surprisingly illustrative of the ancient Jewish character of the Bible. The habits, customs, and rites of the inhabitants of the East, and their mode of existence as a whole, are a living commentary on many passages of Scripture, the thought and significance of which are wholly foreign to a modern Occidental. Such portions of the Semitic world as are least modified by the aggressions of civilization, like those in the interior of Arabia, seem to maintain in their pristine purity the traits of two or three milleuniums ago. The closer one gets to the primitive Semitic man, the nearer in many cases is the approach to a true understanding of his life as it appears in Holy Writ.

Out of the material already indicated, Biblical Archeology claims for itself four general divisions, under which it may best be treated; they are (1) the land and people of Palestine; (2) domestic or individual antiquities; (3) public or civil antiquities; and (4) sacred or religious antiquities.

I. Palestine: The character of any land is an essential element in the determination of the characteristics of its inhabitants. The mountains and plains, the valleys and ravines, and the inspiring scenery of adjacent regions made Palestine a land of pleasing variety and of ever-refreshing beauty. Her wide range of climate, her immense list of fauna and flora, satisfied every reasonable demand of her restless people. Her comparative isolation, her natural defensive strength, and her relation to the great civilizations of the East and the West, especially during Israel's national history, emphasize her importance to the people that dwelt within her borders.

The Land and Its People.

Palestine was already the home of ancient peoples when the Patriarchs first trod upon her soil. The tribes of Israel settled down to live in close proximity to several different minor peoples. So close were their relations that intermarriages resulted, and an intermingling of every element of domestic, public, and religious life. The nation of Israel, built upon such a foundation as this, was a strange conglomeration of diverse elements. Clashes with her minor neighbors, and commercial and political relations with the great empires that oppressed her, affected domestic, civil, and sacred relations.

II. Domestic Antiquities: The every-day life of each person involves a large number of items. These embrace the food available and used, the material accessible for clothing and the method of its manufacture, as well as the usual clothing worn by the people, and the method of preparing and wearing the head-gear. The individual lived also in a dwelling of some kind; either in a hole in the rocks, a tent, a hut, a house, or in an elaborate structure in a city. How were these various dwellings prepared, and what was their internal arrangement? What led to the aggregation of such buildings, which later became cities? The replies to these questions will be of supreme moment in following the growth of individual rights and privileges.

The Jewish family has a most interesting history. The family formed the next step upward from the individual, and was probably the basis of the clan. The laws of marriage and their binding character were essentials in the perpetuity of the nation. The position and rights of the woman before and after marriage, in the condition of monogamy and of polygamy, and in case of divorce, fall under this theme. The relations of the children to the individual parents, the methods of naming them, the observance of the rite of circumcision, their training and education in and out of the home, must be noted. The constitution of the Oriental family involved slaves, with certain laws of purchase and retention, both Israelitish and foreign. Certain diseases also often attacked, and sometimes found victims in, the family. The treatment of the aged and infirm, of the helpless and unfortunate members of the household, is of especial interest. Death in the family was attended by peculiar national observances. See Family, Marriage, Patriarchate, Slavery.

Society and Amusements.

Families and individuals maintained a certain amount of social intercourse. These relations developed certain social obligations; established the respective rights and privileges of host and guest, and the methods of conversation and entertainment. Social gatherings at feasts likewise inaugurated special customs and requirements. These functions, as well as the more elaborate festivals of their heathen neighbors, were occasions for the forming of relations that to a large extent determined the character of Israel. The introduction of foreign customs gradually modified society in Israel, until, by the downfall of the northern kingdom, it assumed quite another complexion. The origin, organization, and conduct of society form an interesting theme in the department of Biblical Archeology. See Etiquette, Precedence, etc.

There is slight evidence that the Jews in early times, aside from banquets attended by musical instruments of various kinds, enjoyed any indoor amusement. Neither is there any extended description of outdoor sports, either for princes or populace. But the prevalence of many terms employed in hunting, such as the names of traps and weapons used in taking animals and birds, and the names of wild animals used for food, is evidence that this sport was commonly indulged in, and to good purpose. Several hints are also found in the Prophets, especially as to the sport (or possibly occupation) of fishing. Both of these out-door amusements, so popular in Egypt and in the East, were turned to good account by the Israelites. See Games, Sports, Pastimes.

The earliest records of the patriarchs and of the Israelites show them following the life of nomads. They raised herds of large and flocks of small cattle, and moved about according to the demands for new pasturage. The character of the country and their slight tenure of the soil led to such a mode of existence. Even when they settled down as occupants of Palestine and their life was mainly devoted to other things, they nevertheless reared extensive herds and flocks, comprising cattle, asses, sheep, and goats. The hills of some parts of Palestine were best adapted for such pursuits. See Animals, Cattle.

Pasture and Agriculture.

Israel's occupation of the new territory made possible another vocation besides cattle-raising. Permanent settlement led to the cultivation of the soil, to the planting of vines and fruit-trees. Wheat, barley, and rye became staple products, and by irrigation all parts of the land yielded profitable returns to the industrious husbandman. The methods of agriculture, the influence of this mode of life on the nation, and the importance of this industry on international relations occupy no mean place in the history of the life of ancient Israel. See Agriculture.

From the earliest times there are hints at the trades that were current among the Israelites. After their settlement in the land of Canaan especially, they became acquainted with methods of producing tools for the cultivation of the soil, and weapons for warfare. Carpenters and stone-masons were numerous at the time of the construction of Solomon's public buildings. Workers in metals of different kinds are found occasionally in the course of Israel's history. The ironsmith, the goldsmith, and the worker in bronze were not uncommon in Palestine. The preparation of skins for use as bottles and for sandals, the manufacture of the bow and of the different pieces of armor for the warrior called for skilful labor. The preparation of flax and wool for clothing required a method which in later years developed into great weaving establishments. The vessels of clay in use in Palestine in ancient times indicate that the potter's art had reached a high state of perfection. These crafts doubtless received many useful suggestions from Israel's neighbors in the different periods of her history. See Artisans, Handicrafts.

Commerce and Its Methods.

Exchange of commodities is one of the oldest occupations of men. Israel's continual contact with neighbors of all kinds, whose methods of life were as varied as their peculiarities, naturally led to some commercial activity. The caravans that crossed Canaan in Israel's day traded in Canaanitish cities, and furnished markets for Palestinian products in Egypt and in Babylonia. Israel exchanged her products of the soil for the wares of Phenicia and the perfumes of the south country. Commerce reached its climax in Solomon's day, when it extended as far as the undetermined port of Ophir, and brought back for him the gold, silver, apes, peacocks, and other luxuries and curiosities of distant climes. Phenicia was Israel's great trading-mart; for thence she secured much of the material and many of the workmen that made Jerusalem what it was in Solomon's reign.

The activity of exchange during the dual kingdom is shown on several occasions. When Ahab defeated Ben-Hadad at Aphek, one of the items in the treaty was the granting to Israel of "streets" [bazaars for trading] in Damascus, as Syria had formerly had "streets" in Samaria (I Kings xx. 34). The numerous references in Hosea are evidence that Israel in that period enjoyed the products of all lands. Egypt was likewise on the most intimate commercial terms with Palestine; and some of her choicest food and clothing was purchased by Israel. But it was not until after Israel's overthrow as a nation that she seemed almost entirely to abandon husbandry and many of the crafts, and to give her whole life to the pursuit of commerce. See Commerce, Trade.

The most convenient exchange was that of commodities for gold or silver or for some other precious article. This was accomplished at first by means of certain standards of weight for the metals, standards of capacity for grains, and the like, and standards of measurement (length, breadth, or thickness) for cloth, leather, stone, etc. The same tricks of trade as are found to-day—the light weight, the small measure, and the short line—appear in the charges that follow the arraignments of the Prophets. Late in history the metals were stamped or coined, thus greatly simplifying one of the most common articles of exchange. See Coin, Money.

Art in Israel.

Israel's growth as a nation was accompanied by a corresponding cultivation of the arts. The first notable exhibition is that seen in the elaborate architecture of the Solomonic era. Whether it was borrowed wholly from one nation or jointly from the leading nations of that day is immaterial. Israel adopted and executed some of the choicest specimens of ancient architecture. The pillars and their ornamentation, though executed by Phenicians, were according to the tastes and desires of Israel's king. Plastic art likewise received attention from the leaders in Israel, as is seen in the numerous fragments exhumed from Palestinian soil. Sculpture and fine stone-cutting added their part to the beautifying of the great Temple of the Lord. Painting is scarcely mentioned in the Old Testament (Ezek. viii. 10, xxiii. 14), in strange contrast with the evidence seen in Egyptian tombs. Music, on the contrary, received much attention from the leaders, and even from the common people. The shepherds in the mountains, the prophets on the hills, the singers in the Temple, made frequent and extensive use of many kinds of musical instruments. See Music, Temple.

Writing is almost as old as the race. Every nation around Israel had its method. The people of Israel, kin of these people by blood and language, had their own particular system of writing. The letters of the Hebrew alphabet had each a significance that helped to hold it in mind. The Israelites wrote on skins and clay, and carefully preserved their records for later generations. This work was done, however, by a particular class of men, who were later on designated as scribes. The different kinds of writing materials, and the tools wherewith this art was executed, were not unlike those of the great contemporaneous nations. See Alphabet, Scribes, Writing.

III. Civil Antiquities: The earliest show of authority is seen in the constitution of the family, with the father as head and chief. Several heads made up the body of elders, by whose decision affairs affecting several families were administered. Gradually these elders became a regularly established order, by or through whom the entire civil business of the community was conducted. In the time of the Egyptian bondage a class of men is found termed "officers," who though apparently scribes, were likewise underlings of their Egyptian taskmasters. The appointment of seventy elders in the wilderness was an extension of the earlier and possibly of the bondage scheme on a more elaborate scale. The method of government in vogue during the period of the judges was a modification of the same general plan under which Israel lived in the wilderness. The details of these systems are brought out with due faithfulness in the records of these periods. See Elders.

The system of government current among the great and small nations of Israel's day was that of monarchy. Every foreign influence that touched this people emanated from the environment of regal administration. These powerful tendencies finally crystallized into a demand by Israel for a king. A king, with all the paraphernalia of a monarchy, was finally established. The prerogatives of the ruler, the law of succession, and the whole administration of government henceforth accorded substantially with those of other nations. Sufficient events and items of the king's conduct are narrated to give a good picture of Israel's monarch. See King.

Post-exilian Government.

On the return of a body of Jews from the various lands into which they had been scattered, a new method of government was adopted. The province of which Judea was a part was ruled by a Persian satrap. Israel's new territory was ruled by a governor, Zerubbabel, and later by Ezra and Nehemiah, etc. These subrulers paid tribute to Persia; and only on especial appointments were they granted extraordinary prerogatives, for example, Ezra. How far down into the so-called inter-Biblical period these conditions prevailed, it is not yet possible to affirm. The Maccabean revolt against the Hellenizing edicts of the Seleucid rulers was a forcible protest against a violation of the favorable treatment accorded the Jews by Alexander the Great. Nearly one hundred years of practical independence resulted in the downfall of Jewish authority, brought about by Pompey in 63 B.C. Thenceforth Palestine as part of a province became subordinate to a Roman governor. Information as to the line of demarcation between the rights of the Jews and Roman authority, the methods of administration adopted by Roman appointees, and a multitude of other questions of local interest is abundantly supplied in the documents of this period. See GOVERNMENT, PROCURATORS, ROME, SANHEDRIN.

Public Administration of Justice.

References to law and its administration are found even in the patriarchal period, when the head of one family and his associates were supreme in authority. Legal processes were simple and effective. In the period of the judges, the so-called judge was the court of final appeal. But after the establishment of the kingdom the king occupied the supreme bench. In postexilian times the people elected their own judges. Numerous statements distributed in different periods of history are found as to the purpose, the method, and the results of various penalties inflicted by authority. The laws concerning all of these specifications are codified in the Pentateuch. See COURTS, JUDGE, etc.

As a subject of the state, each individual had certain property rights. When the tribes settled as husbandmen on their newly won territory, each family occupied its own land. This was its permanent possession. It could lease the same; but in the year of jubilee the land reverted to its first owners. The forfeiture of property rights for political offenses, such as is mentioned in Ezra, was unusual. Marriage also carried with it certain rights, carefully specified in the law. Personal property, the rights to buy and sell, regulations concerning debts, restitution, inheritance, etc., were amply protected or prescribed in the legal provisions of Israel. See CIVIL PROCEDURE, PROPERTY, SALE.

Warfare.

This condition met Israel very early in her history. The division of the host in the wilderness into companies of different numbers for internal civil convenience was doubtless the basis of army divisions. The military equipment of the armies of Palestine, east and west of the Jordan, and their power of resistance to Israel's aggression, are meagerly set forth in the Old Testament. Israel's method of levying and supplying troops, and almost uniform success in Joshua's day, add importance to the study of her military organization. The perfection of army methods in the regal period, and the great amount of money and energy devoted to the maintenance of the army, give added impetus to the investigation of military science among the great nations of Egypt and Mesopotamia. This investigation covers the kinds of armor and weapons used, methods of drilling and marching, encampments, movements for attack and battle, methods of sieges and defenses of fortresses and cities, and the treatment of prisoners. See WARFARE, WEAPONS.

IV. Sacred Antiquities: The earliest records of Israelitish ancestors refer to special places devoted to worship. While the Israelites were on the march through the wilderness, they were accompanied by a sacred tent. As soon as they had settled in the land of Canaan they adopted numerous sacred high places. There were also sacred trees, stones, fountains, etc. Altars, obelisks, and the ASHERAH were accompaniments of these places. At these shrines Israelites met to do homage to their Preserver and God. Solomon's Temple was a partial centralization of worship, which, however, did not become complete until the reign of Josiah. The captivity and the exile of the Israelites divorced them from such shrines. On the return, Zerubbabel's Temple once again made Jerusalem the actual center of worship. See ALTAR, ASHERAH, BAMAH, TEMPLE, etc.

Sacred Persons, Places, and Offerings.

The original purpose of the priest is not absolutely settled. He was probably the attendant on a heathen image, who uttered oracles on occasion, to instruct the worshipers. Gradually he became the offerer of the sacrifice, and therein stood as a kind of mediator between God and the person seeking a message. The functions of priest were apportioned between the priests proper, who stood nearest God, and the Levites, who were practically their servants. Later still, the priestly duties were narrowed down to sacrifice only, leaving to the Prophets the matter of oracular speaking and teaching. The various steps to these different functions, and the special devotees in service about these places, are found in numerous cases mentioned in the Old Testament. See LEVITES, PRIESTS.

The original purpose of the sacred offerings is wrapped in obscurity. For the non-bloody offering, the peace-offering, the burnt offering, the sin-offering, and the trespass-offering there are specific regulations and significance. The condition of the offering itself, the process of offering, and the result of the same upon the giver are all laid down in the codified rules of the Pentateuch. Few if any of the things connected with the life of Israel are so fully treated in the Old Testament as the subject of "offering." See SACRIFICE.

Like their neighbors, the Israelites had sacred feast-times. These are seen very early in the history. Hints and more are found of the feasts of the new moon and the Sabbaths. The yearly feasts were the Passover, the First-Fruits, and the Tabernacles or Ingathering. Each of these had its special regulations as to time, duration, and attendants. Upon the centralization of worship at Jerusalem, certain modifications took place both in the accompaniments of the festival days and in the places where they were formerly held. As time went by the number of such days increased. See FESTIVALS.

Israel was put under strict discipline in the matter of personal cleanliness, both in reference to worship and to every-day life. Obedience to these demands secured immunity from certain diseases and prevented the spread of others. Such discipline attached a wholesome sacredness to worship and enhanced the value of human life and health. It prepared the nation to conceive of a holy God, and to render Him a clean service. See CLEAN AND UNCLEAN.

The preceding sections have indicated merely in outline the main subdivisions of Biblical Archeology on the basis of the latest investigators. They point the reader to certain skeleton facts, which may be clothed with flesh and blood by careful painstaking research on the Old Testament.

For archeology in post-Biblical times, see BADGE, BATH, CEREMONIES, COSTUME, NUMISMATICS, MUSIC, SYNAGOGUE, etc.

J. JR. I. M. P.

ARCHER, ARCHERY: The bow as a weapon in war and the chase was familiar to the Hebrews from patriarchal times (Gen. xxi. 20, xxvii. 3, xlviii. 22). Jonathan and Jehu were expert archers (II Sam. i. 22; II Kings ix. 24); the tribe of Benjamin was renowned for its sons' skill with the bow (I Chron. viii. 40, xii. 2); and David, after the battle of Gilboa, sought to encourage archery practise in Judah (II Sam. i. 18). The impulse thus given seems to have taken root, so that 250 years later the prophet Hosea speaks of the bow as representing Israel's military power (ch. i. 5).

From the figures extant in Assyrian monuments it appears that the usual tactics with the bow were to overwhelm the enemy with repeated showers of arrows, and then close in with sword and spear upon the harassed ranks. In Ps. cxx. 4 there is a reference to the practise of affixing burning material to the arrow-head, no doubt for setting fire to a besieged town. For further details and Hebrew terms in connection with Archery, see ARMY; WEAPONS.

E. C. F. DE S. M.

ARCHEVITES (ארכוי): A people whom Asnapper brought from Erech or Uruk, a political and religious center of Babylonia, and settled in Samaria. They wrote to Artaxerxes concerning the building of the Temple at Jerusalem and had the work on it stopped (Ezra iv. 9). Erech (Uruk) is mentioned in Gen. x. 10.

J. JR. G. B. L.

ARCHEVOLTI, SAMUEL BEN ELHANAN ISAAC: Italian grammarian, and poet of the sixteenth century. Many of his piyyutim were embodied in the Italian liturgy, notably his "Song on Circumcision." He was an excellent Talmudist, and, when quite young, reedited or rather supplied with extensive textual references, the 'Aruk of Nathan b. Jehiel under the title "Sefer ha-'Aruk" (Venice, 1531). His book "Degel Ahabah" (The Banner of Love), an ethical work with commentaries, was printed in Venice (1551). The most notable of his works are (1) "'Arugat ha-Bosem" (The Bed of Spices), a Hebrew grammar (Venice, 1602; reprinted, Amsterdam, 1730), and (2) "Ma'yan Gannim" (A Fountain of Gardens), fifty metrical letters, designed to be models for students of this form of composition (Venice, 1553). Of these two books the more important is the Hebrew grammar, because the subject is exhaustively and originally treated. Twenty-five out of the thirty-two chapters are devoted to the rudiments of the language. Chapters twenty-six and twenty-seven treat of Hebrew accentuation; chapters twenty-eight and twenty-nine discuss perfect style; chapter thirty treats of steganography and Biblical cryptography, and chapters thirty-one and thirty-two treat of the neo-Hebraic meter, with original models of style and method. The last chapter pleased John Buxtorf the younger to such an extent that he translated it into Latin, appending it to his translation of the Cazari (1660). Archevolti, who loved the Hebrew language and delighted in its poetical phrasing and shading, was disinclined to uphold the ideas advanced by Judah ha-Levi, who, though one of the greatest Hebrew poets, did not care to treat Biblical subjects poetically, maintaining that they did not readily lend themselves to such treatment. Archevolti held the opposite view, and in respectful terms wrote against his famous predecessor, employing the Talmudic bit of satire, "The dough must be bad indeed if the baker says it is."

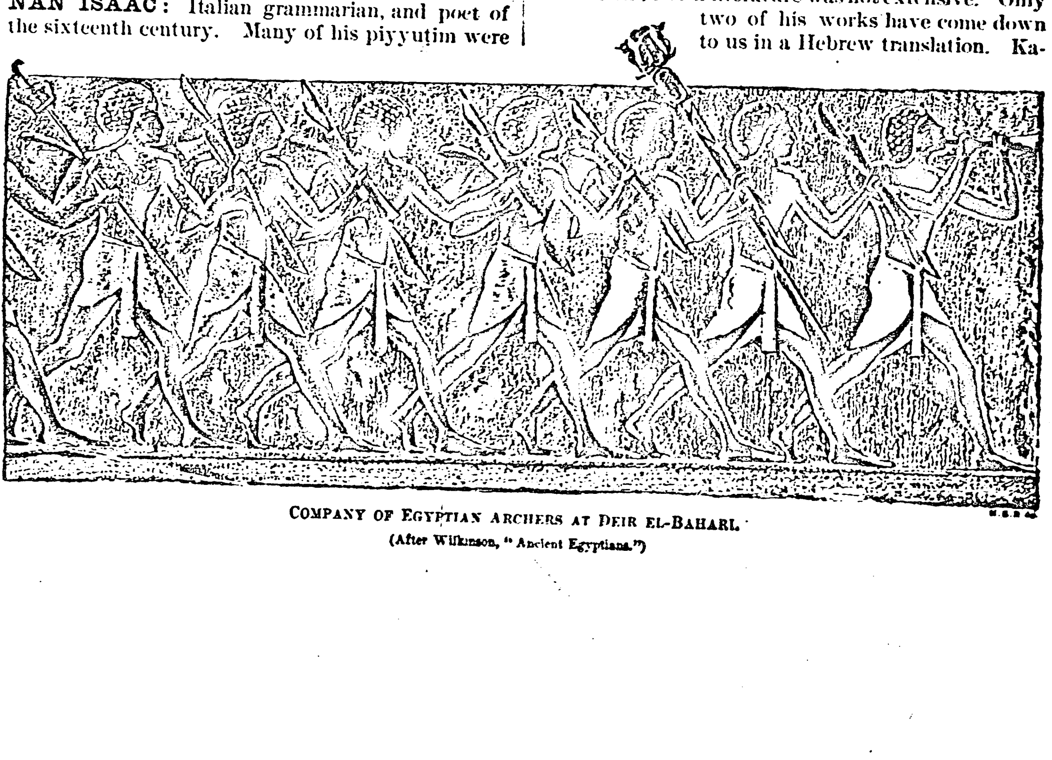
G. G. A. D.

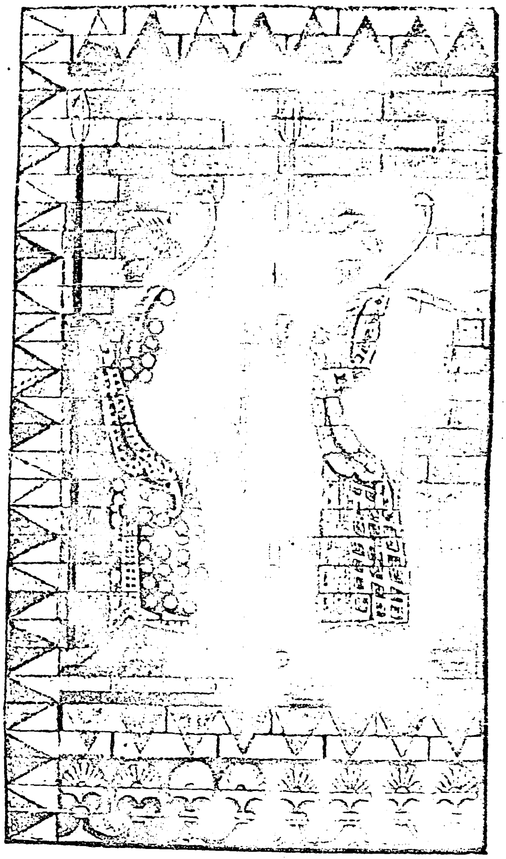
ARCHIMEDES: The greatest mathematician of antiquity; born in Syracuse about 287 B.C. His influence on Jewish literature was not extensive. Only two of his works have come down to us in a Hebrew translation. Ka-



COMPANY OF EGYPTIAN ARCHERS AT DEIR EL-BAHARI.

(After Wilkinson, "Ancient Egyptians.")

lonymus ben Kalonymus (after 1306) twice turned the treatise "On Conoids and Spheroids" into Hebrew, under the title בכדור ובאצטונא. He is said to have made use of an Arabic translation of Costa ben Luca, though Arabic bibliographers know nothing of such a translation. An unknown author—whom Steinschneider surmises to have been the same Kalonymus—translated *κύκλον μάθησις* under the title ספר ארכימידים במשיחת העגולה, from the Arabic of Thabit ibn Kurrah (the Hebrew title is to be corrected to במשיכת, which means "extension," and corresponds exactly to the Arabic "Masaḥat").



Archers as Body-Guard of Darius.

(From Maspero, "Passing of the Empires.")

Abraham bar Ḥiyyah shows a perfect knowledge of the theories of Archimedes in his "Encyclopedia of Mathematical Sciences" (compare Steinschneider, "Hebr. Bibl." vii. 92); and the same is true of Abraham ibn Ezra, in his astronomical work "Reshit Ḥokmah."

G. I. Br.

ARCHIPHERECITES (*ἀρχιφερεκῖται*): Grecized form of the Aramaic רישי פרקא = "heads of the school" (*pirḳa*, literally "chapter," hence "discourse"). The name occurs in Justinian's "Novella," No. 146, *Περὶ Ἑβραίων*, of the year 553, in which the Archipherecites, the elders, and the teachers are forbidden to use their power of anathema in order to prevent the reading of the Greek version of the Bible in place of the Midrashic or Targumic interpretation.

K.

ARCHISYNAGOGUE (*ἀρχισυνάγωγος*; Heb. ראש הכנסת): Synagogue-chief. The use of this name as the title of the officer who supervised matters pertaining to the religious services of the synagogue can be traced from the time of Jesus to about the year 300 (Pes. 49*b*). It occurs several times in the New Testament. The distinctive function of the Archisynagogue was to select suitable men for the reading of the Law, the reciting of prayers, and for preaching; since in ancient times the synagogue did not have regularly appointed officers for the performance of these duties. Despite the specifically Jewish character of the functions of the Archisynagogue, however, the name is borrowed from the Greek, and was therefore used throughout the Roman Empire where Jews were settled, but not in Babylonia. Hence, the Babylonian Talmud, when mentioning the Archisynagogue, finds it necessary to translate the word by פרנס (Ket. 8*b*; compare Yer. Ber. iii. 1, 6*b*). From the Jerusalem Talmud (*l.c.*) it further appears that in cases of necessity the Archisynagogue of a community had to act as its reader. In consonance with the nature of his office, the Archisynagogue was chosen for his piety and good moral character, while in the case of an archon the essential requirements were social position and influence. The Pharisees therefore regarded the Archisynagogues as inferior only to the תלמידי חכמים ("disciples of the wise"), the Jewish scholars (Pes. 49*b*. This passage is, however, of Palestinian origin). Like most of the offices of the pharisaic Jews, that of the Archisynagogue was not limited as to time, but was usually held for life, and not infrequently was hereditary: the Pharisees holding (see Torat Kohanim Aḥare Mot viii., ed. Weiss, p. 83*a*) that the son had a claim upon his father's office unless he had shown himself unworthy. This explains why the title Archisynagogue was sometimes attached to the names of the wife and the children, as found on some Greek inscriptions. It was used, no doubt, to indicate that they were members of an archisynagogal family.

A. L. G.

ARCHITE: Inhabitant of a town or district on the southern border of Judah probably connected with the Erech (A. V. Archi) of Josh. xvi. 2. Hushai, David's friend, was from that region (II Sam. xv. 32). It would appear to be somewhere in the neighborhood of Ataroth, but has not been identified with any certainty.

TERIES; GALLERIES; GRAVESTONES; HOSPITALS; MAUSOLEUMS; SYNAGOGUES, ANCIENT; SYNAGOGUES, MODERN; TOMBS, etc.

ARCHIVES ISRAÉLITES: A French Jewish review, founded in 1840 by Samuel Cahen, author of a French translation of the Hebrew Bible. The first number appeared in January, 1840, as an octavo pamphlet of sixty-four pages, entitled, "Archives Israélites de France: Revue Mensuelle Historique, Biographique, Bibliographique, Littéraire." Some of its first contributors were G. Weil (Ben-Levi), O. Terquem, Solomon Munk, Gerson Lévy, Rabbi M. Charleville, Ph. Luzzatto, Albert Cohn, A. Darmesteter, A. Widal, and E. Carmoly. In 1860 Isidore Cahen, son of the founder of the paper, became its editor.

The "Archives" has several times changed the periods of its appearance, its form, and its title. It has been a monthly and a semi-monthly; and in 1879 it became a weekly. It is now a quarto, more in the nature of a journal than of a review; short articles on topics of the day taking the place of longer articles. Isidore Cahen continued to be the "directeur" until his death, March 6, 1902; editor-in-chief is H. Prague.

In 1890 the "Archives" celebrated its fiftieth anniversary by the publication of a collection of essays, reminiscences, and letters, under the title "La Gerbe" (The Sheaf).

ARCHIVES, JEWISH, OF OLD CONGREGATION. See MEMORBUCH; PINKES.

ARCHON (ARCHONTES or ARCHONTEIA): The title of a member of the governing body in the independent Jewish communities throughout the Roman empire, as in Alexandria, Antioch, Berenice in Cyrenaica, Rome, Tlos in Lycia, and other cities. In Alexandria, where Emperor Augustus established a GERUSIA (Philo, "In Flaccum," § 10; compare Josephus, "Ant." xix. 5, § 2; Schürer, "Gesch." 3d ed., iii. 41) instead of a single ETHNARCH for the Jews, the archons constituted the gerusia (Philo, *l.c.*), as is especially evident from the construction of the sentence *τοὺς ἄρχοντας, τὴν γερουσίαν, οἱ καὶ γέρως καὶ τιμῆς εἰσίν ἐπώνυμοι* (see ALEXANDRIA for the contrary view, see Schürer, *l.c.*). At the end of the first century of the common era, nine archons were at the head of the community in Berenice in North Africa; in Alexandria, more than thirty-eight; while in Rome there were several communities each with its Archon, as appears from their epitaphs. At Rome, the archons were chosen in the month of Tishri, about the Jewish New-Year; in Berenice, probably during the Feast of Tabernacles. Besides those elected for a term, there were archons for life. The mere title was sometimes bestowed on women and children.

It may be generally accepted that the functions of the Archon were the same as those that Strabo ascribes to the Alexandrian ethnarchs (Strabo, quoted by Josephus in "Ant." xiv. 7, § 2), and those delegated to the gerusia under Augustus: "He governs the nation, metes out justice to them, and takes care of their contracts and of the laws belonging to them." The archons conducted political affairs; while religious matters were managed by the heads of the synagogue, who, at the same time, might be archons. Yet the gerusia probably met at the synagogue, the court of which was the place for public distinctions adjudged by the gerusia (compare Philo, "Legatio ad Cajum," § 20). These archons must be distinguished from those of cities in Palestine organized on the Greek plan; as at Tiberias, for instance, where the Archon was the head of a BOULÉ consisting of 600 members (Josephus, "Vita," §§ 27, 53, 54, 57; *idem*, "B. J." ii. 21, § 3).

ARCTURUS. See CONSTELLATION.

ARDASHAR: Village in the government of Erivan, Transcaucasia, Russia, about 16 miles south-southeast from the capital of Erivan; the site of the old Armenian capital Artaxata, or Artashat; Artaxata is said to have been built for King Artaxias I. (189-159 B.C.), by Hannibal, 180 B.C. It was destroyed by Nero's army, and was restored by Artashes (85-127 of the common era), who transplanted thither captive Jews from Palestine. When the Persians destroyed the city in 370, they took away as prisoners 40,000 Armenian and 9,000 Jewish families from Artaxata. See ARMENIA.

H. R.

ARDASHIR, PARTHIAN KING. See PARTHIA, JEWS OF.

ARDIT (ארדיט) or ARDOT (ארדוט): The name of a family that emigrated from Aragon to Turkey, where their descendants still live. The following members are known:

1. **Abraham Ardit:** Lived in 1483 at Barcelona.

2. **Ephraim Ardit:** Lived in Smyrna; wrote, under the title "Matteh Ephrayim" (Ephraim's Staff), a commentary on Maimonides' "Mishneh Torah." It was published in 1791 at Salonica, together with several of his responsa and sermons.

3. **Ḥayyim Abraham Ardit:** A resident of Smyrna; wrote additional notes to the work of his uncle, Ephraim Ardit (No. 2), and appended several sermons of his own.

4. **Ḥayyim Moses Ardit:** Was in possession (at Smyrna) of a manuscript of Joseph Caro's "Responsa," which collection was printed under the title "Abḳat Rokel" in 1791 at Salonica, 2d edition, Leipsic, 1859, very probably at Ardit's initiative.

5. **Isaac Abraham Ardit:** Possibly a son of No. 1; embraced Christianity, but retained the name of Ardit ("Rev. Et. Juives," iv. 59, 62).

6. **Isaac b. Solomon Ardit:** Author of a voluminous commentary on the Talmudic treatise 'Arakin (Salonica, 1823).

7. **Raphael Ardit:** Wrote "Marpeh Lashon" (Healing for the Tongue), a commentary on the Talmudic treatise Shebu'ot, with an appendix containing novellæ to Maimonides' "Mishneh Torah" (Salonica, 1826).

8. **Raphael Solomon Ardit:** A relative of No. 6, to whose commentary he added some notes.

9. Solomon ben Jacob Ardit: Cabalist, of Smyrna. Wrote, under the title "Lehem Shelomoh" (Solomon's Bread), a commentary on the Pentateuch; also novellæ, etc., which were published in 1751 at Salonica, together with the writings of Meïr Bekkayam, who, before he died, set apart money sufficient to cover the expenses of printing. Solomon was also in possession of a manuscript of Naḥmanides' novellæ to the Talmudic treatise, Baba Meẓi'a (Steinschneider, "Die Hebr. Handschriften der K. Bibliothek zu Berlin," i. 44).

Ardot, with the prefix **Cohen,** is the name of a family which also migrated from Aragon, and among whose members were the following:

10. Abraham Cohen Ardot: The learned son of Asher Cohen Ardot (No. 11); died 1634.

11. Asher Cohen Ardot: Great-grandson of Isaac Arama; lived at Salonica in the first half of the seventeenth century; died 1645. He was taught the Talmud by A. Brudo, and was instructed in other branches of Jewish learning by David ibn Shushan. Wealthy and learned, he presided over the Talmudic college at Salonica, and maintained a correspondence with several learned rabbis of his time.

12. Eleazar Cohen Ardot: A physician of the fourteenth century at Majorca, where he was on friendly terms with Joseph Caspi (Kayserling, "Gesch. der Juden in Spanien und Portugal," i. 168).

13. Joseph Ardot was delegated by the community of Alcañiz to the disputation with Geronimo de Santa Fé at Tortosa in 1413 (Ibn Verga, "Shebet Yehudah," § xl.).

14. Meshullam ben Solomon Cohen Ardot: A contemporary of Solomon ben Adret; lived at Barcelona toward the end of the thirteenth century (Solomon Adret, "Responsa," i. No. 415 *et seq.*).

15. Solomon Cohen Ardot: Lived about 1500 at Arta.

Bibliography: In addition to the authorities cited above, see Steinschneider, *Cat. Bodl.* No. 7119.

G. M. K.

ARDOTIAL (ANDRUTIL) SHEM-ṬOB BEN ISAAC: Spanish poet; flourished at Soria in the beginning of the fourteenth century. The name ארדוטיאל has been wrongly transcribed as Androtil, Adrutil, Ardothiel. Steinschneider connects the name with Ardot; the ending "ial" having either a relative or a diminutive significance. Shem-Ṭob was the author of the following works: "Milḥamot ha-'Am weha-Misparim" (Wars of the People and the Numbers), containing short literary and poetical articles; "Ma'aseh," an ethical story, published in the collection "Dibre Ḥakamim," Metz, 1849; "Yam Ḳohelet" (Sea of the Preacher), a prayer of two thousand words, each of which begins with the letter מ (*mem*); several piyyuṭim printed in the Maḥzor according to the Spanish rite. Under the title "Miẓwot Zemaniyot" (Temporary Injunctions), he translated into Hebrew an Arabic work of Israel Israeli of Toledo on the ritual, which is still extant in manuscript.

ARENDT, OTTO: German economist, author, and member of the Prussian Diet; born in Berlin, Oct. 10, 1854. He graduated as Ph.D. from the Berlin University and soon entered on a literary career, identifying himself with the Ultraconservative elements of Prussia. He was the foremost advocate of bimetalism, protective tariffs, and of that policy generally the trend of which is toward preservation of the quasi-feudal remnants of the Prussian State. So unswerving was his loyalty to the Conservatives that he abandoned his religion, embraced Christianity, and sometimes employed anti-Semitic phraseology. Arendt was editor of the "Deutsche Wochenblatt" and the author of many works and pamphlets, of which the following may be mentioned: (1) "Vertragsmässige Doppelwährung" (1878); (2) "Deutschland's Internationale Bilanz" (1881); (3) "Restitution des Silbers" (1881); (4) "Wider Soetbeer" (1882); (5) "Börsensteuer" (1885); (6) "Ziele Deutscher Kolonialpolitik" (1886); (7) "Erhöhung der Getreidezölle" (1887); (8) "Kaiser Friedrich und Fürst Bismarck" (1889); (9) "Leitfaden der Währungspolitik" (1893); (10) "Die Ursache der Silberentwerthung" (1899), etc. Some of these books went through several editions; the "Leitfaden" as many as seventeen.

His wife, **Olga Arendt,** daughter of Lina Morgenstern, was a teacher of elocution, and wrote: "Dramatisches Märchenbilderbuch" (1891); "Sylvesternacht" (1893); second edition, 1900; and "Freundschaftstag" (1894).

ARENS, LOUIS: Operatic singer (tenor); born in Mitau, Russia, March 23, 1865. He was educated at the Riga Gymnasium and studied music at the Imperial Conservatory of Moscow under the direction of Tschaikovsky, graduating in 1890. Arens sang at the Imperial Opera of Moscow, in Berlin, Milan, Naples, Turin, and at the Theater Royal, Covent Garden, London (1894), where he has since given many concerts. He is author of "The Quartet," a children's pantomime (for orchestra), and a song, "Die Erinnerung" (for tenor).

AREPOL, SAMUEL BEN ISAAC BEN YOM-ṬOB: Commentator on the Bible, lived in Safed and Salonica in the sixteenth century. He is author of the following books: "Imrot Eloah" (God's Sayings), homilies on the Pentateuch (Venice); "Wa'ad la-Ḥakamim" (The Assembly of the Wise), a commentary on the prayer-book (Venice); "Leb Ḥakam" (The Heart of the Wise), a commentary on Ecclesiastes (Constantinople, 1586); "Mizmor le-Todah" (A Song of Thanks), a commentary on Ps. cxix. and the fifteen "Songs of Degrees" (Venice, 1576); "Sar Shalom" (The Prince of Peace), a commentary on Canticles (Safed, 1579); finally he published

"Agudat Shemuel" (Samuel's Collection), consisting of extracts from his previously mentioned works (Venice, 1576).

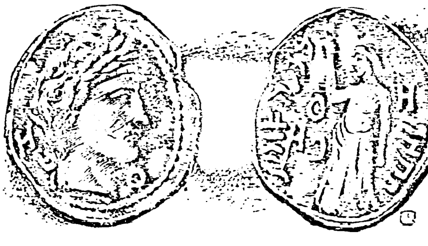
ARETAS (in Aramaic הרתת) **IV.:** Nabatæan king; reigned from 9 B.C. to 40 of the common era. His full title, as given in the inscriptions, was "Aretas, King of the Nabatæans, Friend of his People." Being the most powerful neighbor of Judea, he frequently took part in the state affairs of that country, and was influential in shaping the destiny of its rulers. While on not particularly good terms with Rome—as intimated by his surname, "Friend of his People," which is in direct opposition to the prevalent *φιλορώμαιος* ("Friend of the Romans") and *φιλόκαισαρ* ("Friend of the Emperor")—and though it was only after great hesitation that Augustus recognized him as king, nevertheless he took part in the expedition of Varus against the Jews in the year 4 B.C. (see ARCHELAUS and VARUS), and placed a considerable army at the disposal of the Roman general. It appears, however, that his relations with the Jews, or at least with the reigning family, became later more friendly; and Herod Antipas married his daughter. This marriage, however, led to a war between Aretas and Herod; the latter having conceived a fatal passion for his sister-in-law, Herodias, and having repudiated his wife, thus aroused the hatred of the Nabatæan king. Soon afterward there arose a quarrel between Aretas and Herod concerning the boundary of Gilead, which led to open warfare. In a battle between the two armies, Herod Antipas was defeated, and would have been completely overthrown but for the interference of Rome: it was against Roman interests to permit the spread of the power of Aretas. The emperor Tiberius commanded Vitellius, governor of Syria, to punish Aretas for his independent action. On account of the emperor's death (37), however, his order was never carried out.



Bronze Coin of Aretas IV. Philodeme of Nabathæa, with Inscription—. . . [ה]רתת מלך נבטו . . . שנת—"Aretas King of Nabathæa . . . Year . . ."

(After Vigouroux, "Dictionnaire de la Bible.")

Aretas IV. is probably identical with the Aretas whose governor at Damascus attempted to imprison Paul the apostle while the latter was on his missionary journey (II Cor. xi. 32). Since in a parallel passage (Acts ix. 23 *et seq.*) the Jews of Damascus are mentioned as lying in wait for Paul, it is very probable that Aretas made the attempt to capture Paul at the request of the Jews. From this it follows that the Jews must have been influential in the Nabatæan kingdom; otherwise the Nabatæans would have been careful to avoid any interference with Paul, who was a Roman citizen.

ARGENTINE REPUBLIC. See AGRICULTURAL COLONIES IN AMERICA, BUENOS AYRES.

ARGOB: 1. A district in Bashan which was taken from Og by the Jews (Deut. iii. 4), and together with the district of Gilead, was handed over to the half-tribe of Manasseh (Deut. iii. 14). One account of the renaming of the land is given in Deut. iii. 15, and another in Judges x. 3, 5. The latter account is to be preferred, since Deuteronomy speaks of Havoth Jair and Argob as identical, and it is known from I Kings iv. 13 that Havoth Jair was in Gilead. The district of Argob has not been located accurately, but a steady line of tradition points to the modern Leja, known to the Romans as Trachonitis, which is the word the Targums use in translating Argob. The land is of lava formation and very rocky; it is separated sharply from the surrounding fertile lands by a line of rocks and stones. This fact may explain the term, "cord of Argob." **2.** A place or a person mentioned in II Kings xv. 25. The passage is very obscure. Rashi holds that Argob was the royal palace. Others consider that the name refers to an accomplice of Pekah in the murder of Pekahiah. Still others are of opinion that Argob was an officer of Pekahiah who, with his master and one Arieh, was assassinated by Pekah.

ARIA, LEWIS: Merchant and philanthropist; died at Portsea in 1874. Of a Sephardic family, he was trained to business and devoted the fortune he made during a long career to the foundation of a theological college for the training of Jewish youth for the ministry. This was established at Portsea and has turned out several Jewish ministers. By a curious provision of the will, preference is to be given to candidates for admission that have resided in Hampshire, the county in which Portsea is situated. The incumbent of the post of principal of Aria College is Rev. I. S. Meisels.

ARIANISM: A heresy of the Christian Church, started by Arius, bishop of Alexandria (d. 336), who taught that the Son is not equivalent to the Father (*ὁμοούσιος* = consubstantialis), thereby provoking a serious schism in the Christian Church, which in turn affected the fortunes of the Jews in many countries. In view of the fact that most Germanic peoples—such as the eastern and western Goths, as also the Franks, the Lombards, the Suevi, and the Vandals—

were baptized into Arian Christianity, and that these tribes settled in widely spread districts of the old Roman empire, a large number of Jews, already resident in those lands, fell under Arian domination. In contrast with the domination of the orthodox church, the Arian was distinguished by a wise tolerance and a mild treatment of the population of other faiths, conduct mainly attributable to the unsophisticated sense of justice characterizing the children of nature, but also traceable in some degree to certain points of agreement between the Arian doctrine and Judaism, points totally absent in the orthodox confession. The very insistence upon the more subordinate relationship of the Son—that is, the Messiah—to the God-father is much nearer to the Jewish doctrine of the Messiah than to the conception of the full divinity of the Son, as enunciated at Nicæa. This, the Germanic form of Arianism, which deviates essentially from the Egyptian-Syriac, is hardly more Jewish than it is heathen (Helferich, "Der West-Gothische Arianismus," p. 16, Berlin, 1860; "Monatsschrift," ix. 117, 1860). Still, Borozus of Sardica, about the year 390, was accused of "Judaizing" ("Dionysius," ed. Benedict, ii. 11, 68). To the Catholic Gregory of Tours ("Hist. Franc." v. 43) the Arian bishop Agila replied: "Blaspheme not a doctrine which is not thine. We on our part, although we do not believe what ye believe, nevertheless do not curse it. For we *do not* consider it a crime to think either thus or so." "To such noble sentiment," remarks Helferich (*ib.* p. 50), "the Jews owed the humane treatment which they received at the hands of the West-Gothic Arians." But the laws of the Visigoths ("Lex Visigothorum," Madrid, 1815), formulated under Reccared (584) and his successors, when the tribes had become converted to Catholic Christianity, give evidence of a most bitter feeling against the Jews; and the enactments for the persecution of Israel present a striking picture, strongly contrasting with the former happy circumstances of the Jews in the empire of the Visigoths of Spain and France, while these Visigoths were still Arians. The Jews were not then the downtrodden people which the harsh and exceptional laws of the Roman Christian emperor made of them. In Spain they formed a distinct nation beside Goths, Romans, Syrians, and Greeks (enumerated in the "Concilium Narbonense," iv.), and as such were in the main upon exactly the same footing as all others. Indeed, the ruling Visigoths may have preferred the Jews to the Catholics, for the latter were politically Romans, and confessionally adherents of the Nicene Creed (Grätz, "Die West-Gothische Gesetzgebung," p. 6), while from the former they had to fear neither political enmity nor the fanaticism of the conversionist. Marriages between Arian Christians and Jews were not infrequent (compare canon xvi. of the Synod at Elvira; Hefele, "Conciliengesch." i. 162); and it appears that the Jews exercised some sort of jurisdiction over the Catholics (Helferich, *ib.* p. 6), although Helferich's supposition that the Catholics were openly opposed by the allied Arians and Jews has been amply disproved by Felix Dahn ("Die Könige der Germanen," vi. 413, 2d ed.).

Among the Goths.

Theodosius.

The Ostrogoths were similarly disposed, and, upon heir attainment to power in Italy, they treated the Jews there according to the laws of justice and equity. The golden words of Theodoric the Great are familiar: "We can not command religion, for no man can be compelled to believe anything against his will." As clearly appears from his decrees, the religion of the Jews was certainly no less odious to the Arian king than was the Catholic; but his duty as king demanded that he should treat his Jewish subjects as human beings. Theodoric's decrees in favor of the Jews are, therefore, not the outcome of his Arianism, and appertain to the general history of the Jews rather than to the subject of this article. The persecutions of the Jews by the Catholics in Milan, Genoa, and Ravenna are, however, in so far connected with the religious circumstances of the country, that the Catholics thereby designed to revenge themselves for their own oppression by the Arians. The enmity between both Christian parties was so great that King Theodoric is said to have harbored the design, at the instigation of a Jew, to uproot Catholicism in Italy with the sword. A fanatical source calls Triva, the præpositus cubiculi (captain of the dormitory) of the emperor, "a heretic and a friend of the Jews" (Sartorius, "De Occup. Provinciarum Roman. per Barbaross." p. 108; Dahn, *ib.* ii. 201). The Arian creed no doubt contributed somewhat to the fact that Theodoric's successor, Theodosius, maintained a Jewish sorcerer (Procopius, "De Bello Adv. Gothos." i. 9). It is no wonder, therefore, that in 537 the Jews sided with their protectors, the Ostrogoths, in their courageous defense of Naples against the besieging armies of the Roman emperor (Jost, "Gesch. der Israeliten," v. 57; Grätz, "Gesch. d. Juden," v. 50). A senseless story has it that the Jews fought against the Arian Christians at the Battle of Pollentia, on Easter, 403, being urged thereto by Stilicho, the opponent of Alaric. This legend owes its origin to the fact that the general of Honorius happened to be named Saul, although he is expressly stated (see "Orosius," vii. 37) to have been a heathen (Jost, "Geschichte der Israeliten," v. 330; J. Bernays, "Gesammelte Abhandlungen," ii. 128, n. 48, Berlin, 1885). On the other hand, the Jews took an active part in the defense of the town of Arles in Gaul, possession of which, in 508, was disputed with the Visigoths by Clovis, king of the Franks, who had become a Catholic (Jost, *ib.* v. 48). They also successfully defended for the Visigoths the passes of the Pyrenees against the hostile Franks and Burgundians (deduced from "Concilium Toletanum," xvii. 6; Grätz, "Gesch." v. 72).

The legislation of the Arian Lombards made no distinction between Jews and non-Jews. Further than this nothing is known of the history of the Jews among them; nor is there any information concerning the life of the Jews in North Africa under the Vandals, who were likewise Arians, and who treated the Catholics with great severity (Dahn, "Westgothische Könige," i. 251). In the speech of Augustine, Jews, heathens, and Arians were equally abused ("Concio ad Catechumenos Contra Judæos, Paganos, et Arianos"; "Sitzungsberichte der Wiener Academie," 1889, cxix. 63); but this speech, from which some information of earlier times might have been gleaned, is, unfortunately, no longer extant.

K. S. Kr.

ARIAS, JOSEPH ẒEMAḤ (SAMEḤ): Marano litterateur; flourished in the latter part of the seventeenth century. He belonged to the literary coterie of Joseph Penso, the dramatist, and held a high commission in the Spanish army at Brussels.

He attained the rank of captain and was at one time adjutant to Colonel Nicolas Oliver y Fullano. He is heard of in Brussels and in other Dutch cities as the companion of the poet De Barrios. He is better known, however, from his translation into Spanish of Josephus' "Contra Apionem," which appeared in Amsterdam, 1687, under the title, "Repuesta de Josepho Contra Apion Alexandrino, Traduzida por el Capitan Joseph Semah Arias." The translation was dedicated to Isaac Orobio de Castro, and was printed with the approbation of Isaac Aboab de Fonseca.

H. G. E.—G.

ARIAS MONTANUS (BENEDICTUS): Spanish priest and Orientalist; born in 1527 at Fresecnal, Estremadura; died 1598 at Seville. Philip II. entrusted him with the editing of the Polyglot Bible which was printed in Antwerp (1568-1572) under the title, "Biblia Sacra, Hebraice, Chaldaice, Græce, et Latine, Philippi II., Regis Catholici Pietate et Studio ad Sacrosanctæ Ecclesiæ Usum Chph. Plantinus Excudebat." Arias was accused of Judaizing, on account of his insertion in the Polyglot of certain Aramaic paraphrases tending to confirm the Jews in their claims; but he was acquitted of the charge through a favorable report on the matter by the inquisitor, P. Mariana (1580). He translated Benjamin of Tudela's "Masa'ot" into Latin (1575, 1636, 1764), and was the author of "Antiquitatum Judaicarum" (published, with engravings, in Leyden, 1593), and many other works.

G. T. S.

ARIEL—Biblical Data: 1. Proper name of a man (Ezra viii. 16). The name is recognizable in the name of the Gadite clan Areli (Gen. xlvi. 16; Num. xxvi. 17, Ariel in LXX.), and occurs also in II Sam. xxiii. 20, R. V., and in I Chron. xi. 22, R. V. The text is corrupt. LXX. in Samuel has "two sons of Ariel"; Targ. "two mighty men." Proposed emendations are: "two lions (or, lion whelps)" or "two sons of Uriel." The reference may be to persons or to beasts. Form and meaning are uncertain. Suggested interpretations are: "lion of God," or, by change of vowel, "light of God," or "God is my light." **2.** Poetic name for Jerusalem (Isa. xxix. 1, 2, 7), variously explained (Targ. "altar"). The illustration in verse 2 ("Ariel . . . shall be unto me as Ariel," the city shall reek with blood, like an altar) suggests that the second "Ariel" equals "altar" or "altar hearth"; so probably in Ezek. xliii. 15, 16, and in the inscription of Mesha, line 12. For a proposed sense, "cresset" or "candelabrum," see note on Ezek. xl. 49 in "Sacred Books of the O. T." (ed. Haupt). The etymology of the word is uncertain, possibly ארה, "hearth," with ל formative. The name of the city will then be an imitation of the name "Jerusalem" (perhaps properly *Urushalem*, "city of Shalem"), "city of God" (Uriel or Uruel). It is otherwise interpreted as "altar-hearth of God"; that is, the place devoted to the worship of God.

J. JR. T.

——In Rabbinical Literature: The name Ariel ("Lion of God") was applied not only to the altar (Targum, Isa. xxix. 1), but also to the whole Temple. The Talmud (Mid. iv. 7) points out that the Temple—that is, the Hekal—resembled a lion in being broad in front and tapering toward the rear. Concerning the name Ariel, a Midrash remarks that the Temple is called "lion" (Isa. *l.c.*), and so also is the house of David (Ezek. xix. 2-7) and Judah (Gen. xlix. 9). Nebuchadnezzar, likewise, is called "lion" (Jer. iv. 7); and it was this lion that destroyed the Temple, deposed the house of David, and carried Judah into captivity (Ex. R. xxix. 9).

J. SR. L. G.

ARIMATHÆA, JOSEPH OF. See Joseph of Arimathæa.

ARIOCH—Biblical Data: 1. King of Ellasar, one of the four kings who invaded Palestine in the days of Abraham (Gen. xiv. 1, 9). The style of the chapter in Genesis is such as to make it probable that the narrative, though embellished, rests on some historical tradition. Midrash Gen. R. xlii. seeks to identify Arioch with Yawan (changed by the censor into Antiochus), and remarks further that coins the name of which bore some resemblance to the name Ellasar were still in circulation. It is now, however, generally held that Arioch, king of Ellasar, is identical with Eri-aku, king of Larsa, found in cuneiform inscriptions, though it should be added that no account of Eri-aku's campaign has as yet been discovered, so that only the identity of the two names can be maintained with certainty. We know that Eri-aku was conquered by Hammurabi, the Amraphel of Gen. xiv. 1, and that he became a vassal to him. The ruins of Larsa cover the site known as Senkereh.

BIBLIOGRAPHY: Schrader, *K. A. T.* 2d ed., p. 135, Eng. ed., p. 121; Hommel, *Ancient Hebrew Tradition*, index, s.v. *Eri-aku*; Jensen, in *Z. D. M. G.* l. 247 *et seq.*

2. Captain of Nebuchadnezzar's guard, mentioned in Dan. ii. 14, 15.

3. A king of the Elymæans (Elamites) in alliance with Nebuchadnezzar (Judith i. 6).

J. JR. G. B. L.

——In Rabbinical Literature: In Arioch of Ellasar the Midrash finds an indication of the fate of the Jews under Antiochus Epiphanes [Arioch being construed as Antioch(us)] (Gen. R. xlii. 4). In the other Arioch, "the captain of the king's guard" (Dan. ii. 14), the Rabbis recognize Nebuzaradan, who was given this name because he roared like a lion (ארי) against the captured Jews (Lam. R. v. 5;

the reason for the identification is found in II Kings xxv. 8, which offers a parallel to Dan. ii. 14). It may be mentioned that the amora Samuel is often called by the name of Arioch (Shab. 53*a*, and elsewhere), which, however, is derived from the Old Persian *arjak* ("ruler").

J. SR. L. G.

ARISTAI (abbreviated form of **ARISTÆUS**): A Palestinian scholar of the third amoraic generation (third century): colleague of R. SAMUEL B. NAHMAN. The latter, commenting on Gen. xix. 24, "The Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven," remarks: "Wo unto the wicked who cause the seat of mercy to become a place of punishment! For in Ps. cxlviii. 1-6, David exhorts, 'Praise ye the Lord from the heavens,' and does not mention either fire or hail or brimstone as included in the heavens. Our colleague, R. Aristai, confirms our view by citing Ps. xcvi. 6, 'Honor and majesty are before Him: strength and beauty are in His sanctuary'" (Tan., Wayera, ed. Buber, 23). R. Aristai reports the following observation of R. Berechiah in reference to the Hadrianic persecutions: "Isaiah cries unto the Lord, 'Let thy dead live' (Isa. xxvi. 19), meaning 'those who have died for thee.' One man has been crucified; why? because he circumcised his son: another has been burnt; why? because he kept the Sabbath; a third was slain; why? because he was found studying the Torah. God's answer is: (Isa. *l.c.*) 'My dead shall arise'" (Tan., ed. Buber, p. 19; Bacher, "Ag. Pal. Amor." iii. 660).

J. SR. S. M.

ARISTEAS, THE HISTORIAN: Writer on Jewish history mentioned in Eusebius, "Præp. Ev." ix. 25, who quotes from Alexander Polyhistor's collection of fragments, a passage from a work of Aristeas (in many manuscripts "Aristaios"), entitled *Περὶ Ἰουδαίων*, which contains the history of Job almost as it is given in the Biblical narrative, but offers much that is noteworthy in regard to the names of personages. Job's original name was "Jobab"; that is, Aristeas identifies Job with the Jobab mentioned in Gen. xxxvi. 33, a great-grandson of Esau. He bases his identification on the fact that Eliphaz recurs in the generations of Esau in Gen. xxxvi. 10, 11; that his appellation "Temanite" (Job ii. 11) is found in Gen. xxxvi. 11, 34; that Job's dwelling-place, Uz, is suggested by Gen. xxxvi. 28; and that Zophar occurs at least in Septuagint of Gen. xxxvi. 11, 15. In point of fact, the author of Job simply borrowed the names from Genesis. Now, in the Septuagint "additions" to Job, which agree almost word for word with Aristeas, are found the same substitutions; Jobab stands for Job, Uz is placed in Idumea, and Job's friends are called kings. If the "addition" to Gen. xxxvi. 33, *Ἰωβὰβ υἱὸς Ζαρὰ ἐκ Βοσόρρας*, designates Job's parents, mistaking the last name for that of his mother, it enables us to remedy an error, not of Aristeas, but of Alexander (*τὸν Ἠσαῦ γήμαντα Βασσάραν ἐν Ἐδὼμ γεννῆσαι Ἰώβ*) (Freudenthal, p. 138). Freudenthal holds it for certain that the author of the "additions" made use of Aristeas. Possibly the reverse is more likely, that the translator supplemented his work with these "additions," as he himself says, *ἐκ τῆς Συριακῆς βίβλου*, from the Syriac, and that they were used by Aristeas. For, in the first place, all uncial manuscripts contain the "additions," and we have no tradition that any one has ever denied that they belonged to the Septuagint (Field, "Hexapla," ii. 82); secondly, Freudenthal (p. 137) points out that when the translator, in Job ii. 11, makes Job's friends kings, in opposition to the original text, he takes a liberty similar to many which appear in the "additions of the Septuagint."

Aristeas' era must be placed between the time of the translation of Job and the epoch of Alexander Polyhistor, probably, therefore, in the second century. Aristeas' work bears no relation to the Letter of Aristeas, although the author of the letter very probably borrows his name from the historian.

BIBLIOGRAPHY: The text of his work is given by C. Müller, *Fragmenta Historicorum Græcorum*, iii. 220; Freudenthal, *Alexander Polyhistor*, 1875, p. 231, compare pp. 136-143; Schürer, *Gesch.* 4th ed., iii. 356, 357.

K. P. W.

ARISTEAS, LETTER OF: In the guise of a letter to a brother Philokrates, "Aristeas" writes:

Contents of the Letter.

"By the advice of Demetrius Phalereus, chief librarian of Ptolemy Philadelphus, the king decided to include in his library a translation of the Jewish Lawbook. To secure the cooperation of the high priest Eleazar at Jerusalem, Aristeas advises him to purchase and set free the numerous Jews who had been sold into slavery after his father's campaign against them (312). He sends Andreas, a captain of his body-guard, and Aristeas, laden with rich presents, and entrusted with a letter, asking Eleazar to send him seventy-two elders to undertake the translation. The envoys see Jerusalem, inspect the Temple and the citadel, and admire the high priest and his assistants at their service in the sanctuary; they are instructed, moreover, by Eleazar in the deeper moral meaning of the dietary laws, and return, with the seventy-two elders, to Alexandria. The king receives the Jewish sages with distinction, and holds a seven-day banquet, at which he addresses searching questions to them daily, always receiving appropriate answers. The wisdom of their replies, though it seems to the modern reader rather trivial, arouses general astonishment. Three days after the feast, Demetrius conducts the sages to the island of Pharos, where in seventy-two days of joint labor they complete their work. Demetrius reads the translation aloud in a solemn assembly of the Jewish congregation; it is accepted and sanctioned by them, and any change therein officially forbidden. The king, to whom the translation is also read, admires the spirit of the Law-giver, and dismisses the translators with costly gifts."

The author of this letter declares himself (§ 16) a heathen; as such, in §§ 128, 129, he asks Eleazar concerning the purport of the Jewish dietary laws; and in § 306 consults the translators about the meaning of the ceremony of washing the hands before prayer (see Schürer, ii. 444, note 57). But it is universally recognized that in point of fact his panegyrizing tendency toward Judaism throughout shows him to be a Jew (Kautzsch, "Die Apokryphen," i. 16); it is also certain that he can not have lived in the time of Philadelphus. However important and reliable his general information may be concerning Egyptian affairs, government, and court-ceremonial in the times of the Ptolemies (Wilcken, in "Philologus," iii. 111), his historical statements about the time of Philadelphus are unreliable. In § 180 he changes Philadelphus' defeat at Cos into a victory; he does not know that Demetrius was banished on the accession of Philadelphus, or that the latter's marriage with his sister was childless (§§ 41, 185); he transplants the philosopher Menedemus arbitrarily to the court of the Ptolemies (§ 201), and lets the historian Theopompus and the

Errors in the Letter.

tragedian Theodektes relate incredible stories to Demetrius (§§ 314, 315). Of Theodektes, who died before 333 B.C., Demetrius can scarcely have had cognizance.

Opinions about the date of the letter vary considerably. Schürer ("Geschichte des Jüdischen Volkes im Zeitalter Jesu Christi," ii. 468) assigns it to about 200 B.C. He bases his opinion upon the acknowledged use made of the letter by Aristobulus, but Aristobulus' time is also a matter of divergent opinion (see ARISTOBULUS). Schürer thinks that in every aspect the letter presupposes the situation before the conquest of Palestine by the Seleucids (Syrians), when it stood in a state of lax dependence on Egypt. But this can not be proved; Palestine appears to have been in no way dependent upon Egypt. The high priest is represented as an independent ruler, with whom the king of Egypt negotiates as with an independent sovereign. He maintains a strong garrison in the citadel,* and gives the translators military escort (§ 172).

The Question of Date.

Although the title of king is not mentioned, Philo, who reproduces closely the contents of the letter, does speak of *βασιλεύς*. Schürer has to allow that if the period of the letter is conceived to be that of the Hasmonean independence, it is superfluous to suggest the hypothesis of "an artificial reproduction of bygone circumstances." And in truth, there are many indications pointing to the later Maccabean times. Can it be only chance that the names Judas, Simon, and Jonathan appear three times each, and Mattathias once, among the names of the translators (§§ 47 *et seq.*)? The names Sosibius and Dositheus (§§ 12, 50) are borrowed probably from Philopator's minister and from the Jewish general. It is also extremely probable that Aristeas borrows even his own name from the Jewish historian Aristeas, of whose work, Περὶ Ἰουδαίων, a fragment exists in Eusebius' "Præparatio Evangelica," ix. 25). Examination of the parallelism with the verbal usages of the Septuagint cited in the index to Wendland's edition of Aristeas' letter will show by the multitude of the resemblances that the letter was written at a period in which the translation of the whole Bible (not only that of the Law) had already exerted wide influence. Of special importance, however, is a passage in the prologue to Jesus Sirach, wherein the latter's grandson excuses the imperfections of his translation by stating that the Greek translation of the Law, the Prophets, and the other books varies considerably from the original Hebrew. If the Greek translation had still enjoyed, in the year 130 (when the translation of Sirach was probably made), that esteem which Aristeas (according to Schürer, seventy years earlier) presupposes, such condemnatory criticism could not have been offered to Egyptian Jews. All of this is testimony in favor of the later Maccabean age; and the possession of Samaria and parts of Idumea by the Jewish state (§ 107) proves the era to have been at least the time of John Hyrcanus. One can, therefore, readily understand how it is that Alexander Polyhistor was unacquainted with the work, if written in the first century B.C. That it was written before the invasion of Palestine by Pompey (63) and the loss of Jewish independence can not be doubted. These facts are sufficient to contradict the theory advanced by Grätz ("Gesch. der Juden," iii. 379, 582) that it was written in the time of Tiberius. The fact that, according to Aristeas (§ 301), the island of Pharos was built upon and inhabited, gives a definite date against Grätz, for according to Strabo, xvii. 6, Pharos remained waste and desolate after Cæsar's war. The *ἐμφανισταί*, "informers," mentioned by Aristeas (§ 167), whom Grätz imagines to be the Roman delators, are mentioned in early papyri of the Ptolemies. The visit which, in Aristeas (§ 304), the translators pay every morning of their seventy-two working days to the king, does not necessarily refer to the "salutatio matutina" of the Roman imperial court. This detail may well have been founded upon the court ceremonial of the Ptolemies, about which we know little, but which, as we learn from Aristeas himself (§ 175), was very elaborate. Nor does Grätz prove convincingly that Aristeas' description of the Temple and of the citadel refers to the Herodian Temple and the Antonia. That the author lived in Egypt has been mentioned; and it accounts for the rather superficial influence of philosophy upon him. His references to the Epicurean doctrine of pleasure (§§ 108, 223, 277), the recommendation of the *μετριοπάθεια*—restraint of the passions—(§ 197), and many parallels to Greek proverbial wisdom, never rise above the platitudes and commonplaces of an ordinary education. When Aristeas says (§ 132) that God's power reveals itself in everything, because His dominion fills the whole world (compare § 143), only strong prejudice would discern the conception of intermediary beings, or would interpret, as applied to "angels," the various attributes applied to God really only in their Biblical conceptions (Gfrörer and Dähne). To consider Aristeas the disciple of an Alexandrian school of philosophy is to do him too much honor. When he deems that the heathens pray to the one God, only under other names (§ 16), and interprets the dietary laws in the fashion of the allegorical Midrash, he shows simply how attenuated his Judaism has become. And if one fancies Biblical resemblances are to be detected in the sayings of the translators, doubt is awakened by their superficial conception, or by coincident resemblance to Greek proverbial wisdom, showing only how every characteristic and national feature had become reduced to vagueness.

Its Philosophy Only Commonplace.

The legend which forms the framework of the book has attained great importance in the Christian Church. However much the Jewish writer's fancy may have given itself play in its embellishment—as, for instance, in the quasi-legal style of the reports of the deliberations, and in the clumsy imitations of the accustomed forms of dinner-table philosophy—still the legend in its main features may easily have reached Aristeas through the channel of popular tradition. The threefold cooperation of king, high

---

* Nothing concerning the date can be learned from the description of the citadel. It is certain only that it lay north of the Temple. Schürer (in private correspondence) takes it to be the tower mentioned in Neh. ii. 8, vii. 2; Josephus, "Ant." xii. §§ 133, 138; II Macc. iv. 12, 27; v. 5; while Wendland understands it to be the large building (*βάρις*) built by the Hasmoneans, also north of the Temple. Schürer (p. 470) is right in holding that the mention of the harbors proves nothing.

Influence of Aristeas.

priest, and Palestinian sages, and especially the solemn sanction of the Greek translation, have for their sole objects the legitimation of the version, and the obtaining for it of equal authority with the original text. Philo, who otherwise follows Aristeas, goes beyond him in attributing divine inspiration to the translators, and in making them by divine influence produce an identical translation, and in calling them prophets ("Vita Mosis," ii. 7). This exaggeration must be considered simply as a popular development of the legend, and Philo's regard in his exegesis for the translation as a holy text testifies to the general appreciation in which it was held. When the use of the Septuagint in the synagogue service speedily surrounded it with an atmosphere of sanctity, pious belief easily accommodated itself to a myth, the material and form of which closely resembled the familiar legend of the restoration of the holy books by Ezra under divine inspiration; a legend which is found for the first time in IV Esdras, but which is certainly far older. The Christian Church received the Septuagint from the Jews as a divine revelation, and quite innocently employed it as a basis for Scriptural interpretation. Only when Jewish polemics assailed it was the Church compelled to investigate the true relationship of the translation to the original. Origen perceived the insufficiency of the Septuagint, and, in his "Hexapla," collected material for a thorough revision of it. But the legend long adhered closely to the Septuagint and was further embellished by the Church. Not only were "the Seventy" (the usual expression instead of Seventy-two) credited with having translated all the Sacred Scriptures instead of the Law only (according to Epiphanius, a whole mass of Apocrypha besides), but the miraculous element increased. At one time we are told the translators were shut up in seventy cells in strictest seclusion (pseudo-Justin and others); at another, in thirty-six cells, in couples. Epiphanius in his work, "De Mensuris et Ponderibus" (written 392), furnishes the most highly elaborated and most widely accepted form of the story. The legend became a weapon in the battle which was waged around the Bible of the Church; the "inspired" Septuagint was not easily surrendered. The rigid orthodoxy of the fourth century, which resulted in the ruin of all knowledge in the Church, did not scruple to set this legend in its crassest form in opposition to the promising beginnings by Origen of a proper Biblical text criticism, and so to arrest the latter completely at the start. Only Jerome, who as a philologist understood the value of Origen's work, made use of his material, and in the Vulgate preserved for the Western Church this most precious legacy, exercising, consistently with his usage, a rational criticism upon the legend.

Thus Aristeas plays a great, even a fateful, rôle in the Church. The varying opinions as to this legend very often reflect dogmatic views about the Bible in general, and the understanding, or the misunderstanding, of his critics concerning textual questions.

Bibliography: Various editions: The *ed. princeps* of the Greek text, by S. Schard, Basel, 1561, upon which all subsequent editions are based. M. Schmidt's ed. in Merx, *Archiv f. Wissenschaftliche Erforschung des A. T.* (Halle, 1868), 241-312; *Aristeæ ad Philocratem Epistula, cum Ceteris de Origine Versionis LXX Interpretum cum Testimoniis ex L. Mendelssohnii Schedis*, ed. P. Wendland, Leipsic, 1900. Schmidt depends mainly upon one Paris manuscript, but Mendelssohn compared all manuscripts extant. Wendland's index shows the importance of Aristeas for the study of Hellenistic Greek, by comparison with the LXX, with inscriptions, papyri in the Ptolemaic age, and Polybius. Paragraph references in the above article are those in Wendland's edition. Wendland, German translation with introduction, in E. Kautzsch, *Die Apokryphen und Pseudepigraphen des A. T.* ii. 1-31, Freiburg im Breisgau, 1899. Other literature is quoted by Schürer, *Gesch. des Jüdischen Volkes*, 3d ed., iii. 470.

T. P. W.

ARISTIDES MAREIANUS OF ATHENS:

Christian apologist; lived about the middle of the second century. He is described by Jerome as having been a most eloquent man. Both the author and his work—a defense of Christianity addressed to the emperor, Antoninus Pius—are, so to speak, new discoveries. Beyond a brief notice of Aristides and his "Apology" by Eusebius ("Hist. Eccl." iv. 3; *id.* "Chron. Ann." 2140), he remained until recently entirely unknown. Some Armenian fragments of the "Apology" had been published, in 1878, when, in 1891, Harris surprised the learned world with a complete Syrian text of the work; and at the same time Robinson pointed out the interesting fact that in "Barlaam and Josaphat" the Greek text of the "Apology" had been almost wholly preserved.

The "Apology" which he presented to the Emperor Hadrian between the years 123 and 126, is of great interest, not only for the early history of Christianity, but also for Judaism. For Aristides is one of the few Christian apologists, of ancient or modern times, who strive to be just to the Jews; and this not alone concerning their monotheistic faith—which he characterizes as the true one—but also as regards their religious practises, of which he remarks: "They imitate God by the philanthropy that prevails among them; for they have compassion on the poor, release the captives, bury the dead, and do such things as these, which are acceptable before God and well-pleasing also to man" (Syrian text, xiv.). The only thing to which he takes exception is that their ceremonial practises do not propitiate God—whom they wish to serve by them—but the angels (*l.c.*).

This complaint against the Jews is not made from actual observation of their life, but rests solely on a theory borrowed from the New Testament (Col. ii. 18; Gal. ii. 8, 10), and the New Testament Apocrypha Κήρυγμα Πέτρου; see Clement of Alexandria, "Strom." vi. 41). What Aristides defends so ably and so eloquently in his "Apology" is not specifically Christian doctrine, much less dogmatic Christianism, but the moral side of the religion, which, according to his own words, represents an excellence not to be denied to Judaism likewise. Aristides seems to be strongly influenced in his apologetics by the Jewish "Didache"; and his argument for monotheism (see chaps. i., ii., iii.) recalls the favorite Jewish Haggadot touching the conversion of Abraham to the true faith (see Abraham in the Apocrypha and in Rabbinical Literature). Directly or indirectly, Aristides must have learned of these traditions. His remarks upon the religious life of the Jews in Greece in his time (ch. xiv.) are interesting: he states that they do not observe the ceremonial laws as they should. These remarks perhaps refer to the results of the edict of persecution issued by Hadrian, when the Jews were compelled to transgress the Jewish ceremonial laws.

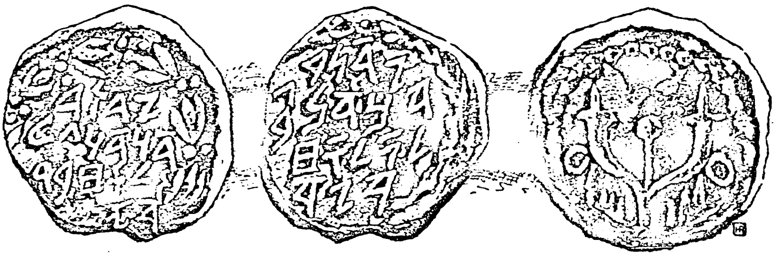
K. L. G.

ARISTO OF PELLA (in the **Decapolis**): A Christian controversialist who wrote against Judaism in the second century (135–170). He is the author of a "Dialogue Between Jason and Papiscus." The former is supposed to be a Jewish Christian, the latter an Alexandrian Jew. So overcome is the latter by his antagonist's arguments, that in the end he becomes a convert to Christianity. This dialogue was a favorite in the third century; "was known to almost everybody in the year 500" (Harnack, "Texte und Untersuchungen," i. 3 *et seq.*); and still existed in the seventh century, but it has now completely disappeared. Although this dialogue is preserved in great part in the similar Latin composition, "Altercatio Simonis Judæi et Theophili Christiani," it is impossible for any one to form a correct idea of its contents. It probably contained the information, attributed to Aristo by Eusebius, that by the prohibition of Hadrian the Jews were not permitted to touch the soil of Jerusalem ("Historia Ecclesiastica," iv. 6). It is also interesting to notice that Jerome claims to have read in the dialogue, that in the Hebrew text, Gen. i. 1, these words are to be found: "Through His son, God created heaven and earth" ("Quæstiones Hebraicæ Libri Genesis," i. 1, and commentary to Gal. iii. 13). This alleged Hebrew text, as Ginzberg explains, is nothing but an exegetical mistranslation of the first word in the Targum (בחכמה, "with wisdom" = Λόγος).



Copper Coins of Judas Aristobulus.

Obverse: Olive wreath, round (יהור הכהנגל ולוחבר הי (יהורה כהן גרול וחבר היהודים)) ("Judas High Priest, and the Confederation of the Jews"). *Reverse:* Two cornua-copiæ: in the middle a poppy-head.

(After Madden, "History of Jewish Coinage.")

T. L. G.

ARISTOBULUS I. (called **Judah** in Hebrew): King of Judea, eldest son of John Hyrcanus; born about 140 B.C.; died 104. He succeeded his father in the office of high priest, while his mother (or, according to Wellhausen, his stepmother) was, by the will of his father, to rule as queen. Immediately after the death of his father, Aristobulus threw his mother into prison, where she was starved to death; and to secure himself against further danger from his family, he imprisoned three of his brothers. Then he ascended the throne, and became the first Jewish king after the Babylonian exile—an interval of nearly five hundred years.

Aristobulus was not content with the mere title of king, but endeavored, in the brief period of his reign, to prove himself worthy of his position. He made war on Iturea, subjugated a large portion of the people, strove to convert them to Judaism, and forced circumcision upon them. This fact, which Josephus derives from Timogenes, a heathen writer, admits of no doubt, although it is not known exactly what territory of the Itureans was conquered for Judea by Aristobulus.

Palace Intrigues.

Successful as was his public career, Aristobulus was extremely unfortunate in his family relations. Being of feeble health, he gradually came under the complete control of a clique, at the head of which stood Alexandra Salome, the queen. Through its machinations, he was led to suspect his favorite brother, Antigonus—whom he had entrusted with a share in the government, and whom he treated almost as a coregent—of designs against him, and was finally induced to order his execution, though unwittingly, it is claimed. After this deed Aristobulus is said to have been seized with such bitter remorse at having caused the death of his mother and brother, that he broke down completely and died of grief, 104 B.C. If the account of Josephus concerning the family history be true, Aristobulus is the darkest figure in the Hasmonean dynasty; but not much credence can be attached to this portion of his narrative, by reason of the amount of legend that has gathered about it. It must be observed that it was out of regard for the Pharisees that he used only Hebrew inscriptions upon his coinage, and caused himself to be represented upon it as a high priest, because according to the Pharisees only a member of the house of David could legitimately hold the throne. Although strongly inclined toward Hellenism himself, he was careful, even in such comparatively small matters, not to offend the Pharisees; it is therefore highly improbable that he should have risked their certain antagonism by the murders imputed to him. See articles Alexandra Salome and Antigonus, Son of John Hyrcanus.

G. L. G.

ARISTOBULUS II.: King of Judea; born about 100 B.C.; died 49 B.C. He was the youngest son of Alexander Jannæus, whose political and religious predilections he inherited, while his elder brother, Hyrcanus II., seems to have leaned to the side of his mother. Although he had no rightful claim to the throne, he entertained designs upon it, even during the life of his mother. He courted the nobles and military party by constituting himself the patron of the Sadducees and bringing their cause before the queen. The many fortresses which the queen placed at the disposal of the Sadducees, ostensibly for their defense against the Pharisees, constituted in reality one of the preparatory moves of Aristobulus for the usurpation of the government. The queen sought to direct his military zeal outside Judea, and sent him (70-69) against Ptolemy Mennæi; but when the undertaking failed, Aristobulus resumed his political intrigues. He left Jerusalem secretly and betook himself to his friends, who controlled the largest number of fortified places, with the intention of making war against his aged mother. But the queen died at the critical moment, and he immediately turned his weapons against his brother Hyrcanus, the legitimate heir to the throne. The war resulted in victory for Aristobulus. After a reign of three months, Hyrcanus abandoned the royal title in favor of his brother, in return for which Aristobulus allowed him the unlimited use of his sources of revenue.

Supports the Sadducees.

This easily acquired peace did not long endure. Hyrcanus was prevailed upon by Antipater to induce Aretas, king of Arabia, to make war against Aristobulus. In consequence of the victory of Aretas, added to the abandonment of Aristobulus by the Pharisees—the most powerful party in Jerusalem—who had gone over to Hyrcanus, Aristobulus was compelled to withdraw to the Temple Mount. The distressing siege which followed, about which most wonderful stories are told (see HONI HA-ME'AGGEL and HYRCANUS II.), led to no decisive result. A third party—Rome—was therefore called in to unravel the complicated situation, and the effects of this intercession proved not only injurious to the brothers, but in the end brought about the destruction of the Jewish state. At that time (65) Pompey had already brought under subjugation nearly the whole of Asia, and had sent his legate, Scaurus, to Syria, to take possession of the heritage of the Seleucids. Ambassadors from both the Judean parties waited upon Scaurus, requesting his assistance. A gift of four hundred talents (three hundred, according to some) from Aristobulus turned the scale in his favor. Aretas was notified to abandon the siege of the Temple Mount. Aristobulus was victorious, and Hyrcanus retained but an insignificant portion of his power. The victorious brother had even the satisfaction of avenging himself upon Aretas; as the latter was withdrawing with his forces from Jerusalem, Aristobulus followed and inflicted severe losses upon him. But the spirit which he had conjured could not easily be laid, and the favor of the Romans, to which he had looked with so much confidence, soon became a factor in Jewish politics which worked most detrimentally against himself. When Pompey appeared in Syria (64), affairs took a turn quite different from the anticipations of Aristobulus. The golden vine, valued at five hundred talents, which Aristobulus presented to Pompey, and which excited the admiration of the Romans even in later generations, had no effect upon him; and when, in the year 63, the still hostile brothers, as well as delegates of the people's party, who desired the complete abolition of the Hasmonean dynasty, appeared before him, he refused to give any immediate decision. He had at that time contemplated the utter destruction of Jewish independence. Aristobulus saw through the aims of the Roman general, but although powerless to offer effective resistance, his pride did not permit him to yield without a show of opposition. He left Pompey in a burst of indignation, and betook himself to the citadel of Alexandrion. Pompey followed him and demanded the surrender of all the forts. Aristobulus capitulated, but straightway proceeded to Jerusalem to prepare himself for resistance there. When he saw, however, that Pompey pressed on against him, his courage failed him, and he came to the general's camp, and promised him gold and the surrender of Jerusalem if hostilities were suspended. But promises alone were of no avail with Pompey. He detained Aristobulus in the camp, and sent his captain Gabinius to take possession of the city. The war party in Jerusalem refused to surrender, and Aristobulus was made prisoner by Pompey, who proceeded to besiege the city. The capture of Jerusalem and of the Temple Mount, which followed, ended the independence of Judea as well as the reign of Aristobulus. In the triumph celebrated by Pompey in Rome (61), the Jewish prince and high priest was compelled to march in front of the chariot of the conqueror. The Pharisees saw in this circumstance a just punishment for the Sadducean proclivities of Aristobulus (see the apocryphal Psalms of Solomon i. and ii.). But a severer fate even than captivity was in store for this descendant of the Hasmoneans. In the year 56, he succeeded in escaping from prison in Rome, and, proceeding to Judea, stirred up a revolt. He was recaptured by the Romans and again taken to Rome. In 49 he was liberated by Cæsar, and sent at the head of two legions against Pompey in Syria, but on his way thither was poisoned by friends of the latter.

Appeal to Rome.

ARISTOBULUS III.: Last scion of the Hasmonean royal house; brother of Marianne and paternal grandson of Aristobulus II. He was a favorite of the people on account of his noble descent and handsome presence, and thus became an object of fear to Herod, who at first sought to ignore him entirely by debarring him from the high-priesthood. But his mother, Alexandra, through intercession with Cleopatra and Antony, compelled Herod to remove Ananel from the office of high priest and appoint Aristobu-

BIBLIOTHECA

lus instead. To secure himself against danger from Aristobulus. Herod instituted a system of espionage over him and his mother. This surveillance proved so onerous that they sought to gain their freedom by taking refuge with Cleopatra. But their plans were betrayed, and the disclosure had the effect of greatly increasing Herod's suspicions against his brother-in-law. As he dared not resort to open violence, he caused him to be drowned while he was bathing in Jericho (35 B.C.).

G. L. G.

ARISTOBULUS: Youngest brother of Agrippa I.; son of Herod's son Aristobulus; flourished during the first half of the first century. He was left an infant, together with his two brothers, Agrippa and Herod, when his father was executed (7 B.C.). He married Jotape, the daughter of Sampsigeram (שמשגרם), king of Emesa (Josephus, "Ant." xviii. 5, § 4). With his brother Agrippa he lived on bad terms; and when the latter came to the court of Flaccus, the governor of Syria, to find refuge after his escapades at Rome, Aristobulus managed to cause his banishment. Flaccus had been appealed to as judge in a dispute between the inhabitants of Damascus and those of Sidon concerning their boundary. The Damascenes, it appears, bribed Agrippa to intercede on their behalf with his patron. This intrigue was discovered by Aristobulus, who forthwith disclosed it to Flaccus; as a consequence Agrippa was bidden to leave the court ("Ant." xviii. 6, § 3). Aristobulus made an eloquent and successful plea also before Publius Petronius (40), the governor of Syria, against the erection of Caligula's statue at the Temple of Jerusalem ("Ant." xviii. 8, § 4).

G. H. G. E.

ARISTOBULUS: Son of Herod the Great and Mariamne the Hasmonean; born about 35 B.C.; died 7 B.C. Both he and his elder brother Alexander, by reason of their Hasmonean origin, were educated by Herod as successors to his throne; and for that purpose were sent to Rome (23 B.C.). Upon their return to Jerusalem (18 B.C.) they became an eyesore to the anti-Hasmonean faction at court. Herod's sister Salome, and brother Pheroras, who had been instrumental in the execution of Mariamne, were particularly apprehensive lest the two princes should succeed their father, as they would undoubtedly take vengeance upon the murderers of their mother. To prevent th', attempts were made at estranging the princes from their father by means of calumnies. Herod tried to discredit the evil rumors; and, to fasten the ties of affection, he procured distinguished alliances for both sons, Aristobulus being married to Berenice, the daughter of Salome.

This, however, failed to put an end to Salome's intrigues; and Herod, at last, was induced to recall to court Antipater, his repudiated son by Doris. Seizing his opportunity, Antipater straightway began, by means of hypocrisy, slander, and flattery, to supplant Aristobulus and Alexander in the esteem of their father, and ere long became the likeliest successor to the throne. Being sent to Rome, in order to gain the favor of Augustus, he continued thence to calumniate his brothers; so persistently that Herod at last resolved to arraign them before the emperor. Meeting Augustus at Aquileia, the capital of the province of Venetia (12 B.C.), he charged his sons with contemplated parricide. Augustus, convinced of their innocence, effected a reconciliation. Owing, however, to the ceaseless intrigues of Antipater, Salome, and Pheroras, and the strange relation of Glaphyra and Berenice, the position of the two brothers became more and more precarious. Finally, a number of the princes' followers were tortured into a public admission of the existence of a plot against the king's life. The real design of Aristobulus and Alexander was to flee for protection to the court of Archelaus. Herod succeeded in securing permission from Augustus to convene, at Berytus, a council, including C. Sentius Saturninus, the governor of Syria, to sit in judgment on the accused princes. The council, consisting of 150 of Herod's trusted friends, gave no opportunity of defense to the accused, who were detained in a neighboring village, Platana, and condemned them to death. Alexander and Aristobulus were brought to Sebaste and strangled in the year 7 B.C. Their bodies were taken for burial to Alexandrium, the burial-place of their maternal ancestors.

G. H. G. E.

ARISTOBULUS OF PANEAS: Alexandrian Peripatetic philosopher; lived in the third or second century B.C. The period of his life is doubtful, Anatolius (270) placing him in the time of Ptolemy Philadelphus (third century B.C.), Gercke in the time of Philometor II. Lathyrus (latter part of second century B.C.; see Pauly-Wissowa's "Realencyklopädie der Klassischen Alterthumswissenschaft," iii. 919); while more reliable testimony indicates that he was a contemporary of Ptolemy Philometor (middle of second century B.C.; see Schürer, "Gesch." iii. 384). He is the author of a book the exact title of which is not certain, although there is sufficient evidence to prove that it was an exposition of the Law. Eusebius ("Præp. Ev." viii. 10, xiii. 12) has preserved two fair-sized fragments of it, in which are found all the quotations from Aristobulus made by Clement. In addition, there is extant a small passage concerning the time of the Passover festival, quoted by Anatolius (Eusebius, "Historia Ecclesiastica," vii. 32, 17).

The Extant Fragments of Aristobulus' Work.

Following are the contents of the fragments of Aristobulus extant. In the first fragment he discourses, at the "king's" suggestion, on the anthropomorphic expressions in the Bible, and shows that they do not conflict with his previous definitions of the nature of God (Eusebius, "Præp. Ev." viii. 10). Interpreting these expressions in their true sense (φυσικῶς), and not mythically, one can but admire Moses' wisdom, from whom indeed philosophers and poets have learned much. "God's hand" means God's might. "God's resting" denotes the maintenance of the order of the universe. God's "coming down" to give the Law (Ex. xix. 18) was not a descent in a physical sense, but expresses God's condescension in sending down His law; the fire on the mountain, which burned but consumed nothing; the trumpet-sounds without human instruments (*ib.*), are outward manifestations of the Divine Power (δυναμις).

The second fragment ("Præp. Ev." xiii. 12) deduces from certain previous discussions (no longer extant) that both Plato and Pythagoras drew upon a translation of the Mosaic Law before the time of Demetrius of Phalerus (and this before the Septuagint; Aristeas, § 314, also refers to an older translation). God's creative "words" are stated to denote simply His activities. Similarly, Pythagoras, Socrates, and Plato, when they claim to hear "the voice of God," mean this creative power. Then follows, in testimony of the θεία δύναμις, the spurious Orphic quotation, in which the Stoic idea of God's permeating the world (v. 11, Abel) is especially remarkable (fragm. 6, Abel). The "quotation" is taken from the spurious poems of the forger Hecatæus (Schürer, *ib.* iii. 453 *et seq.*), as many resemblances indicate, but is considerably elaborated. Thus in fragm. 10, Abel, Aristobulus eliminates the original's pantheistic idea; in v. 11, 12, he substitutes for the inscrutability of God the Platonic concept of the knowledge of God through the νοῦς, reason, and interpolates this idea also in v. 40. In v. 13 *et seq.* he reverses the deduction of "evil" from "God." V. 14 should read αὐτοῖς δὲ κ' ἔρις, as in the Theosophy of Aristokritos. Against Schürer's putting Hecatæus in the third century B.C. is to be remarked, as Elter has pointed out, that v. 8 of the Æschylus quotation καὶ πᾶσα πηγὴ καὶ ὕδατος συστήματα is identical with Ezekiel, in Eusebius, "Præp. Ev." ix. 29, 12, πηγαί τε πᾶσαι καὶ ὑδάτων συστήματα. Since Ezekiel connects this verse with Ex. viii. 19, it must be said to have originated with him; and, therefore, Ezekiel's drama would also have to be placed in the third century before Christianity, along with pseudo-Hecatæus! This agrees with Aratus' pantheism (in the discussion of which Aristobulus admits that he has substituted God for Zeus), which he adopts in order to show that God's power penetrates and permeates all things. Reverent conceptions of God are demanded by all philosophers and especially by ἡ καθ' ἡμᾶς αἵρεσις, "our school," by which he no doubt means Judaism, not Peripatetic philosophy; for he immediately points out the earnest inculcation of virtue by the Jewish law.

In the next excerpt in Eusebius, the meaning of the Sabbath (ἑβδόμη) is discussed, designated also as the first day. The Sabbath is, as it were, the birthday of light and also of wisdom, for out of wisdom comes all light. Quite similarly to this, Peripatetic philosophers call wisdom a light (or lamp), and Solomon (Prov. viii. 22) teaches the existence of wisdom before creation. God's resting on the seventh day does not denote idleness, but the stable order of the universe; so the results of the creative acts do not signify the mere temporal results, but the lasting value of the creations. The ἑβδόμη (Sabbath) has also its deeper significance, because the human "Logos," called the ἕβδομος, is its symbol. The number "seven," moreover, exerts great influence upon the development of living beings and plants. Verses (genuine as well as spurious; see Schürer, *ib.* p. 461) from Homer, Hesiod, Linos, attest its holiness. When Homer says, ἑβδομάτῃ δ' ἠοῖ λίπομεν ῥόον ἐξ Ἀχέροντος, he means that through the λόγος as ἕβδομος man frees himself from forgetfulness and from the wickedness of the soul, and attains to a perception of truth.

It is to be supposed that Aristobulus was familiar with the abstract Platonic and Aristotelian idea of God. This conception necessarily implies a special Divine Power, acting on the world and in the world. In addition to this he makes use of the Pythagorean doctrine of numbers. The statement that he belonged to the Peripatetic school may be ascribed to the fact that, in xiii. 12, 10, he cites from a Peripatetic source (Schürer, p. 387). Taking into consideration again his reference to Orpheus and other poets, it is seen that he was an eclectic, the first partial approach to which is to be met with in Posidonius (Περὶ κόσμου), in the first century B.C., but which can not be traced to an earlier date (see Alexandrian Philosophy).

The desultory style of the work of Aristobulus, and the intentionally obscure and mystical mode of expression, offer considerable difficulty to the reader. This is not to be attributed to those who quote from it, but to the author himself, and has frequently led to grave misconceptions.

Quotations Probably Spurious.

A further examination of the works attributed to Aristobulus confirms the suspicion as to their genuineness aroused by their eclectic character. The exchange of thought between the king—who suggests the problems—and the Jewish scholar on the Torah is quite impossible. But if it is as fictitious as the reputed colloquy between the king and the "Seventy," narrated by Aristeas, a contemporary of Philometor can not have been its author, as also the pseudo-Orphic poetry in Aristobulus shows. A somewhat shorter and more original form of the same has been preserved among a large number of forgeries, all traceable to one source, the pseudo-Hecatæus, named by Clemens on first quoting him. This Orphic fragment ("De Gnomologiorum Græcorum Historia atque Origine," parts v.-ix.; Program of Bonn University, 1894-95) betrays a strong resemblance to the Sibylline Books (Abel, 23, 24; John, i. 18). That Aristobulus made use of Philo—a reference to whose works is the only means of rendering intelligible many of the passages—has been pointed out by Elter ("Sp." 229-234). Grounds for doubting Schürer's belief that the literary forger Hecatæus flourished in the third century B.C. are given in the "Byzantinische Zeitschrift," vii. 449, and the belief is expressed that Hecatæus and Aristobulus belong to the second century of the common era. The name of Aristobulus may have been taken from II Macc. i. 10. Schlatter's suggestion that the commentator of Ecclesiasticus derives his philosophy from Aristobulus ("Das Neugefundene Hebräische Stück des Sirach," pp. 103 *et seq.*, Gütersloh, 1897) is not convincing, for the agreement between them exists only in opinions which can not with certainty be ascribed to Aristobulus. Most historians, however, adhere to Schürer's view.

ARISTOTLE IN JEWISH LEGEND: As the Greek who most impressed his influence upon the development of the Jewish mind, Aristotle is one of the few Gentiles with whom Jewish legend concerns itself. Some 200 years B.C., the Jewish philosopher Aristobulus, made the positive assertion that Jewish revelation and Aristotelian philosophy were identical. Hardly had 200 years elapsed before this opinion was modified to such an extent that it was claimed that Aristotle derived his doctrine directly from Judaism. Josephus on this point says ("Contra Apionem," ii. 17): "I do not now explain how these notions of God are the sentiments of the wisest among the Grecians, and how they were reared upon the principles that he [Moses] afforded them." Of Aristotle himself Josephus has preserved ("Contra Apionem," i. 22) a very interesting passage from the writings of Clearchus, the pupil of Aristotle, the authenticity of which is maintained by such authorities as Lobeck, Bernays, von Gutschmid ("Kleine Schriften," iv. 578), and Theo. Reinach ("Textes d'Auteurs Grecs et Romains Relatifs au Judaïsme," 1895, pp. 10-12). This passage, prefaced by the remark of Josephus, is as follows:

> "In his first book on Sleep he relates of Aristotle, his master, that he had a discourse with a Jew; and his own account was that what this Jew said merited admiration and showed philo-

Fragment of Clearchus.

> sophical erudition. To speak of the race first, the man was a Jew by birth and came from Cœlesyria [Palestine]. These Jews are derived from the philosophers of India. In India the philosophers call themselves Kalani, and in Syria Jews, taking their name from the country they inhabit, which is Judea; the name of their capital is rather difficult to pronounce; they call it Jerusalem. Now this man, who had been the guest of many people, had come down from the highland to the seashore [Pergamus]. He was a Greek not only in language, but in soul; so much so that, when we happened to be in Asia in about the same places whither he came, he conversed with us and with other persons of learning in order to test our wisdom. And as he had had intercourse with a large number of sages, he imparted to us more knowledge of his own."

This is Aristotle's own account as recorded by Clearchus, and he adds more specific observations regarding his great and wonderful fortitude in diet and continent mode of living. Obviously it was the Jew's strict observance of the dietary laws that struck Aristotle. Gutschmid (pp. 579-585) thinks that the Jew here spoken of is the same wonder-working magician (exorcist; see Josephus, "Ant." viii. 2, § 5) who, by some sort of hypnotism, drew the soul out of the body of a sleeping child and brought it back again with his rod in the presence of Aristotle (Proclus, Commentary on Plato's Republic, x.), which part of the narrative Josephus intentionally omitted.

In the circles where the antagonism of Judaism and Hellenism was known and understood, Aristotle was reported by tradition to have said: "I do not deny the revelation of the Jews, seeing that I am not acquainted with it; I am occupied with human knowledge only and not with divine" (Judah ha-Levi, "Cuzari," iv. 13; v. 14). But when Aristotelianism became harmonized with Judaism by Maimonides, it was an easy step to make Aristotle himself a Jew. Joseph b. Shem-Ṭob assures his reader that he had seen it written in an old book that Aristotle at the end of his life had become a proselyte ("ger zedeḳ"). The reputed statement of Clearchus is repeated by Abraham Bibago in the guise of the information that Aristotle was a Jew of the tribe of Benjamin, born in Jerusalem, and belonging to the family of Kolaiah (Neh. xi. 7). As authority for it Eusebius is cited, who, however, has merely the above statement of Josephus.

Regarded as a Jew.

According to another version, Aristotle owed his philosophy to the writings of King Solomon, which were presented to him by his royal pupil Alexander, the latter having obtained them on his conquest of Jerusalem. With this legend of Alexander is associated the celebrated "Letter of Aristotle" to that monarch. Herein Aristotle is made to recant all his previous philosophic teachings, having been convinced of their incorrectness by a Jewish sage. He acknowledges as his chief error the claim that truth is to be ascertained by the reasoning faculty only, inasmuch as divine revelation is the sole way to truth. This "letter" is the conclusion of an alleged book of Aristotle, "two hands thick," in which he withdraws, on the authority of a Jew, Simeon, his views with regard to the immortality of the soul, to the eternity of the world, and similar tenets. The existence of this book is mentioned for the first time about 1370 by Ḥayyim of Briviesca, who expressly declares that he heard from Abraham ibn Zarza that the latter received it from the vizir Ibn al-Khatib (d. 1370). He does not state whether this apocrypha was written in Arabic or Hebrew; the Hebrew "Letter," as received, does not appear like a translation. It is safe to assume with Ḥayyim, that the Simeon mentioned was none other than Simeon the Just, about whose supposed relations to Alexander the Great the oldest Jewish sources give us information (Yoma, 69*a*; see ALEXANDER THE GREAT). Identical with this letter is the prayer of Aristotle which the Polish Baḥurim had in their prayer-books during the sixteenth century (Isserles, Responsa No. 6; ed. Hanau, 10*a*.

A second "Letter" by Aristotle to Alexander contains wise counsel on politics; he advises the monarch that he must endeavor to conquer the hearts, and not simply the bodies, of his subjects (preface to "Sod ha-Sodot"). See Samter, "Monatsschrift," (1901) p. 453.

The essay entitled "The Apple," also ascribed to Aristotle, is tinged with a similar tendency. In it Aristotle refers to Noah and to Abraham, "the first philosopher." It was these spurious writings of Aristotle which gained for him the esteem of the cabalists, as evidenced by the very flattering utterances of Moses Botarel (Commentary on "Yeẓirah," 26*b*).

The story of the love-affair between Aristotle and Alexander's wife, in which the former comes off very badly—current in the Middle Ages (see Peter Alfonsi, "Disciplina Clericalis," vii.) and originating in a Hindoo fable (see "Pantschatantra," ed. Benfey, ii. 462)—was also told in Jewish circles, and exists in manuscript by Judah b. Solomon Cohen (thirteenth century), in Spirgati's catalogue, No. 76 (1900), p. 18.

Uebers.* i. 229-273, contains an almost complete list of the pseudo-Aristotelian writings; Modlinger, *Ḥayye Aristo.* Vienna, 1883; A. J. Glassberg, *Zikron Berit*, pp. 280, 281.

K. L. G.

ARISTOTLE IN JEWISH LITERATURE:

One thousand years after his death, Aristotle, as his pupil Alexander had aforetime done, began to conquer the East, and finally ascended to the supreme rulership of the entire realm of medieval thought. Many writings of the Stagirite were translated from their Greek originals or from their Syrian versions into Arabic (especially by the Nestorian Christian Ḥonein ibn Isḥâḳ [809-873], and his son Isḥâḳ), in which language they were eagerly studied by Jews in all Arabic-speaking countries. Aristotle's influence upon Jewish thinkers, however, varied in different ages. Abraham ibn Daud (1160) was the first Jewish philosopher to acknowledge the supremacy of Aristotelianism. Earlier thinkers unquestionably were acquainted with Aristotle's philosophy, but the systems of Plato and other pre-Aristotelian philosophers then held the field. From Abraham ibn Daud until long after Maimonides' time (1135-1204), Aristotelian philosophy entered and maintained the foreground, only again to yield its position gradually to Platonism, under the growing influence of the Cabala.

Aristotle's name is found in the scanty details that have been handed down of the philosophy of David al-Moḳammez (about 920), whom the Karaites include

Saadia and Gabirol.

in their sect (see Pollak, "Halikot Ḳedem," p. 73; "Orient," 1847, pp. 620 *et seq.*; and Judah Barzilai, "Yeẓirah Commentar," ed. Berlin, pp. 65 *et seq.*). For Moḳammeẓ, as also for Isaac Israeli (who died about 950), Aristotle is always "the philosopher" *par excellence* (Steinschneider, "Hebr. Uebers." p. 391). Saadia Gaon (933) displays a minute acquaintance with the Stagirite's writings, though the name of Aristotle is not to be found in his works. But it is not his custom to mention his authorities, and he is familiar, for example, with Aristotle's definition of space and adopts it. In the third chapter of the first book of the "Emunot" he protests vehemently against the Aristotelian cosmology. He here omits the name of the Stagirite with evident intention, being unwilling to give the name of the philosopher who, claiming the existence of the world from eternity, opposes the Biblical account of Creation. In order to counteract the spreading influence of the Aristotelian theory of Creation, he is most careful to elucidate its weak points. But all these polemics do not hinder Saadia, whose philosophy is indeed of an eclectic nature, from accepting the Aristotelian definition of the soul as his own ("Emunot," iii. 5); his indebtedness to Aristotle's book, Περὶ ψυχῆς, betraying itself clearly in his "Treatise on the Soul."

It can be shown that Saadia does not disclose a very accurate knowledge of Aristotle in those works that precede his "Emunot," traces of Aristotelian methods appearing in his great work only. The Arab philosopher Alfarabi (died 950) popularized the Greek philosopher by his translation and commentaries, the reputation of which soon extended to Spain. The first representative of Arabian philosophy in Spain, and indeed in western countries in general, was not an Arab, but a Jew, Solomon ibn Gabirol. His "Meḳor Ḥayyim" shows a consistent amalgamation of Aristotelian principles with Neo-Platonic conceptions of the universe. But in spite of the unmistakable traces of Aristotelian philosophy in the "Meḳor Ḥayyim," the Greek's name is not mentioned. Aristotle is mentioned, however, in Gabirol's "Tiḳḳun Middot ha-Nefesh."

When the Stagirite's scientific works were prepared for Western readers, it was held necessary to popularize them. There is a work, written in Arabic, containing many moral maxims collected from Greek philosophers. This book, "The Dicta of the Philosophers," by the above-mentioned translator, Ḥonein ibn Isḥâḳ, afforded those to whom the study of exact philosophy was too difficult the possibility of familiarizing themselves with the best thoughts of the Greek philosophers, and it thus contributed much to Aristotle's popularity in Jewish circles. (Concerning this work and its influence upon literature, see Löwenthal, "Ḥonein ibn Isḥâḳ's 'Sinnsprüche der Philosophen,'" Berlin, 1896.) Unquestionably, it was from this book that Gabirol took the aphorisms that are quoted in the "Tiḳḳun" as by Aristotle. In the Tiḳḳun also, without mention of the author, are found several passages on the Aristotelian doctrine of the "ethical mean."

Pseudo-Aristotelian Writings.

In the period following Gabirol, the writings of Avicenna, a commentator upon Aristotle, became widely known throughout Europe, leading to the displacement of the older philosophy based upon Plato and Neo-Platonism. The Arabic expounders of Aristotle leavened his views more and more with monotheism; and thus through new interpretations and constructions the heathen character of his philosophy was gradually refined away. Then, too, many works passed under Aristotle's name that a more critical age would immediately have detected as spurious. But the lack of all critical sense in the Middle Ages, and the general prejudice in favor of Aristotle, whose genuine writings contain many passages in which he rises from heathenism to almost pure monotheism, blinded even the most discerning to the fact that many of the works ascribed to him could not possibly have been his. The most important works of this character are "Aristotle's Theology" (ed. by Dieterici) and "Liber de Causis" (ed. by Bardenhewer). Modern scholars have discovered the former to be a mere collection of extracts from the "Enneades" of Plotinus; in the Arabic version of which passages antagonistic to monotheism are paraphrased or entirely omitted. Similarly the "Liber de Causis" is nothing but an extract from the *Στοιχείωσις θεολογική* by Proclus.

Judah ha-Levi Against Aristotle.

One of the consequences of the false ascription of these works to Aristotle was that real Aristotelianism never prevailed lastingly with Arabs and Jews. Only isolated doctrines of Aristotle were of preponderating significance in the Arabic and Jewish thought of the Middle Ages. The first reaction against the influence of the Sage of Stagira is noticed toward the middle of the twelfth century, when Judah ha-Levi admonished his contemporaries with all the fervor of his ardent religious soul, not to be ensnared by the wisdom of the Greek at the cost of their own hereditary faith. True to his Arabic prototype, Ghazzali, he showed that Aristotle was not to be relied on in his scientific statements. Ha-Levi betrayed a curiously vacillating mind, distracted between veneration for the great sage and abhorrence for the false doctrines of his mighty intellect. He can not forbear maintaining that if Aristotle had, like the Jews, been possessed of tradition, he would not have set forth the impossibility of the creation of the world. Ha-Levi warns his readers against Aristotle's recognition of the unity of God; for the God for whom the spirit longs is a very different God from the one attained by cold speculative thought.

Twenty years after the completion of the "Cuzari," Abraham ibn Daud wrote his "Ha-Emunah Ramah" (The Exalted Faith). A dauntless philosopher, he controverted in fullest measure Ha-Levi's standpoint: "The study of the philosophy of religion is very detrimental to the true faith" ("Cuzari," v. 16). Abraham believed just the contrary: that the thoughtful one would find his faith strengthened by the study of philosophy. He is a rigid Aristotelian, following in the footsteps of Avicenna, and protesting with all his might against the disparagement of philosophy by Ghazzali. His book, published in 1160, is one of the first attempts at a compromise between Judaism and the Peripatetic philosophy of the Arabs.

Maimonides and Aristotle.

While the Arabs preferred Aristotle's logical and metaphysical works, Maimonides devoted his attention to his moral philosophy and sought to harmonize it with revelation. In his "Shemonah Peraḳim" (Eight Chapters), Maimonides adopts the Aristotelian four faculties of the soul. Both alike teach that two perfections dwell in the soul—the moral and the intellectual. The source of virtue and vice lies, with both philosophers, in the capability of thought and desire. The most weighty of the "Eight Chapters" is the fourth. In accordance with Aristotle, Maimonides defines virtue as the desired action "in the mean." Moral acts are those that hold the "mean" between two harmful "extremes," between the "too much" and the "too little." When the soul is sick and falls into one extreme, it can be cured only by bringing it into the other extreme. As regards the problems of the aim of mankind and the purpose of human existence, the Jewish philosopher necessarily differs from the Greek. According to Aristotle, true happiness consists in virtue; but with Maimonides the aim of mankind is divine perfection. Man must endeavor to approach the essence of the Deity as far as possible. What Maimonides expresses in the most exalted diction is found in the saying of the sages, "Let all thy actions be done in the name of Heaven!"

This theory of moral theology is the introduction to Maimonides' philosophical system as presented in the "Moreh Nebukim" (Guide for the Perplexed). Following generally in the footsteps of Aristotle, he deserts him only when approaching the domain of God's law. But here, too, it is Aristotelian doctrine, coinciding, it is true, with Revelation in the basic principle that men are incapable of comprehending God's being fully, on account of their imperfection and His perfection. Concerning the sphere of metaphysical thought, absolute truth must lie in Revelation; that is, in Judaism. All that Plato and Aristotle thought out had been already correctly and more deeply taught by the philosophical oral law, of the possession of which by the Prophets Maimonides is convinced ("Moreh," i. 71, ii. 11). While everything that Aristotle wrote concerning nature, from the moon down to the center of the earth, was founded upon positive proof and is therefore sure and irrefragable, all his ideas concerning the character of the higher spheres partake rather of the nature of opinions than of philosophical certainties ("Moreh," ii. 22). Aristotle posits the eternity of the world, but can not demonstrate it. It being thus a matter of conflicting opinions, the supposition of an actual commencement of the world in time is far more intelligible. Maimonides thus appears as a sharp critic of Aristotle in theology, and refuses allegiance to him whenever he treats the statements of religion with disdain. Recognizing the divine origin of the Law, he necessarily arrays himself in strong opposition to Aristotle, who sees in the law of nature the highest and immutable law; for it is the corollary of his acceptance of the eternity of the world. Consequently, Aristotle recognizes no miracles and no revelation, no selection by God of a peculiar people no mission to an individual, no choice of any one particular age. Maimonides expressly mentions that Aristotle denies all Special Providence, which certainly contradicts what Aristotle himself says in his "Nicomachean Ethics," x. 9. Maimonides' work evoked, as is well known, considerable party strife, which ended, however, in the acknowledgment by all parties of his authority.

Levi ben Gerson, an Aristotelian.

The distinction of having completed Maimonides' endeavor may be accorded to Levi ben Gerson (d. about 1344) of Provence, who possessed accurate knowledge of the Aristotelian and other philosophical writings. He took the commentator Averroes as his guide in expounding the Stagirite. Nevertheless, Levi is a decidedly independent thinker, by no means blindly "swearing to the words of his master." He holds that there is in a force tending toward humanity an impulse not operating in a circle so as to return constantly to the point of departure, but manifesting itself rather as a steadily ascending spiral. Accordingly, no older solution of a problem can claim unconditional acceptance as the truth, if later research conflict with it. He is thus an opponent of the Aristotelian conception of the eternity of the world. Had the world existed from eternity, the comparative youth of the various sciences could not be explained (and he maintains their comparative youth in opposition to the above-quoted opinion of Maimonides), inasmuch as striving after knowledge is an original characteristic of mankind. His innate acumen, which induces him to subject individual doctrines of Aristotle to close criticism, in order to advance his own views against him, and to substantiate them when necessary, is not inconsistent with a devoted and thorough study of the Stagirite. He is so thoroughly at home in Aristotle, that though, for instance, unable to quote any authentic passage from his master concerning immortality, he is yet able to formulate something entirely in harmony with his views (Joël, "Levi ben Gerson," p. 22). For Maimonides, and his successor Levi ben Gerson, Aristotle is throughout an undeniable authority. His deliverances are to them generally as unassailable and as indisputable as those of the Bible itself. This attitude sometimes led these two devoted Aristotelians to misinterpret certain Scriptural passages that seemed to conflict with the Stagirite. With all Maimonides' magnificent attempts to harmonize Judaism and Aristotelianism, and with all the achievements in this direction by Ben Gerson, they could not fail to awaken in discerning minds the conviction that all such endeavors started from vain premises. Levi ben Gerson's effort to reconcile the "creatio ex nihilo" (the creation out of nothing) with Aristotle's view, by claiming boldly the eternity of the Original Matter, only served, like other compromises, to expose the impossibilities of the undertaking.

Crescas Attacks Aristotle.

The first to shatter with daring hand the idolatry that the Middle Ages had paid to the Stagirite, was Ḥasdai Crescas of Saragossa (1377–1410). He made the first noteworthy attempt to demonstrate the untenableness of the Aristotelian conceptions. He especially protests against his statement of the finiteness of the world, and, starting from the supposition that an infinite retrogression of causes is unthinkable, proves the existence of a "primus motor," the existence of God therefore. He further contradicts Aristotle's view that God's happiness consists in the recognition of Himself, for knowledge has only value when it is preceded by ignorance, and where there never has been ignorance there can be nothing pleasurable. Crescas, though independent herein, was still only a continuator of those early attempts which were undertaken by Judah ha Levi in the "Cuzari," to secure full recognition for Judaism. In the age following Ḥasdai Crescas all traces of Aristotelianism gradually disappeared from Jewish philosophical literature; and in the cabalistic movement, which little by little assumed dominance, the characteristics of Platonism came more and more into prominence.

Aristotle's "Ethics."

The "Ethics" of Aristotle occupies an important place in the history of Jewish literature, although attention was directed to it comparatively late. The Jews possessed in their own religious writings an abundance of practical rules which rendered Aristotle's "Ethics" superfluous. Only when his system came to be studied as a whole was any attention paid to the "Ethics." The "Nicomachean Ethics," which alone of all Aristotle's ethical writings was known to the Middle Ages, was translated into Hebrew from a Latin version in the beginning of the fifteenth century. The translator, Don Meïr Alguadez, expresses the opinion in his preface that Aristotle's ethical writings contain an explanation of certain precepts of the Torah. A commentary upon this translation was written in 1584 by Moses Almosnino. But Aristotle was by no means unknown to the Jews of much earlier ages as an ethical writer. An "Ethical Letter," found among the ethical epistles of the physician Ali ibn Rodhwan (contained in Al-Ḥarizi's translation, in "Debarim 'Attiḳim," edited by Benjacob), was ascribed to him. Shem-Ṭob Palquera also reproduces the "Letter of Aristotle" in his "Ha-Mebaḳesh." The Stagirite's name is frequently met elsewhere in Jewish ethical literature. The ethical aphorisms quoted by Ḥonein ibn Isḥâḳ in his work already mentioned found their way into many specimens of popular literature. Aristotle's relations with Alexander the Great are frequently mentioned in this literature as exemplary in their way, and Jews eagerly accepted the legendary accounts of the conversion of Aristotle to the true faith, and of the repudiation by him of his theory of Creation. But Immanuel ben Solomon (about 1320), in his imitation of the "Divina Commedia," nevertheless locates Aristotle in the infernal regions, because he taught the existence of the world from eternity. Gedaliah ibn Yaḥyah (sixteenth century) claimed to have found a book in which Aristotle recanted all his errors. People were easily persuaded to believe that "the wisest of the wise" had given in his allegiance to the doctrines of the Torah; that Simon the Just, whose acquaintance he is said to have made upon the occasion of Alexander's visit to Jerusalem, had convinced him of his errors. (See Aristotle in Jewish Legend.) Prayers said to have been written by Aristotle have frequently been printed in devotional works of recent centuries; as, for instance, one handed down by Ḥonein ibn Isḥâḳ (see Löwenthal, "Honein's Sinnsprüche der Philosophen," p. 112).

Appreciation of Aristotle.

Aristotle was almost universally held in esteem by the Jews; at one time for his intelligence and mental power, at another as a penitent sinner. The following is Maimonides' verdict concerning him: "The words of Plato, Aristotle's teacher, are obscure and figurative; they are superfluous to the man of intelligence, inasmuch as Aristotle supplanted all his predecessors. The thorough understanding of Aristotle is the highest achievement to which man can attain, with the sole exception of the understanding of the Prophets." Shem-Ṭob ben Isaac of Tortosa (1261) styles Aristotle "the master of all philosophers." Elijah b. Eliezer of Candia, who edited the "Logic" about the end of the fourteenth century, calls Aristotle "the divine," because, having been endowed by nature with a sacredly superior intellect, he could understand of himself what others could receive only from the instruction of their teachers. See Aristotle in Jewish Legend.

TH. A. Lö.

ARITHMETIC: The art of reckoning. This must have been familiar to the ancient Hebrews. The sacred books mention large amounts, showing that the people were acquainted with the art of computation. Expressions are found even for fractions (see Gesenius, "Lehrgebäude," 704).

The Hebrews, like the Greeks and other people of antiquity, made use of the letters of the alphabet for figures. According to their alphabetical order, the letters were made to express the units, tens, and hundreds, as high as 400. In a later period, probably after contact with the Arabs, the final letters ך ם ן ף ץ were added, so as to furnish numerals up to 900; mention of this fact is made in many cabalistic writings, but seemingly they were not generally used.

The question arises whether, in computations with these letters, the ancient Hebrews had any fixed system taught in the schools, or whether each calculator was left to his own manipulation of them. The probabilities are in favor of the former hypothesis, in view of the high degree of mathematical knowledge found here and there in the Mishnah and Gemara. Nothing of such a system has, however, come down to us from the Talmudic times. Skilful Jewish arithmeticians are first mentioned in the eighth century. Sahl Rabban al-Tabari, the teacher of the physician Razi's father, was known as an excellent arithmetician (Wüstenfeld, "Aerzte," p. 20). About 997 the Jewish mathematician Bisher ben Pinḥas ben Shubeib wrote an arithmetical treatise. At the same epoch lived Josephus Hispanus, or Sapiens, from whom Gerbert (Pope Sylvester II.) borrowed his system of multiplication and division (see Cajori, "History of Elementary Mathematics," p. 179), and who is believed to have been the introducer of the so-called Arabic numerals into Europe (see Weissenborn, "Einführung der Jetzigen Ziffern in Europa," pp. 74 *et seq.*). In the beginning of the eleventh century there flourished Abraham ben Ḥiyya, who wrote an encyclopedia of mathematical sciences; he used Arabic numerals, but knew nothing of the zero. In the first volume of this encyclopedia he makes use of the Arithmetic of Nicomachus of Gerasa, a disciple of Pythagoras, which, translated from the Greek into Arabic under the title "Al-madhal ila 'ilm al-Adad," was held in great esteem by the Jews. Joseph ibn Aknin recommends this Arithmetic, and it was translated into Hebrew in the fourteenth century by Kalonymus ben Kalonymus. Abraham ibn Ezra composed an arithmetical treatise under the title "Sefer ha-Mispar"; he makes use of the zero, calling it in Hebrew "'iggul." His Arithmetic is the oldest extant in Jewish literature. Abraham ibn Ezra found many imitators, the most celebrated of whom were Levi ben Gershon and Elijah Misraḥi. To-day Hebrew literature contains about twenty arithmetical treatises. (See MATHEMATICS.)

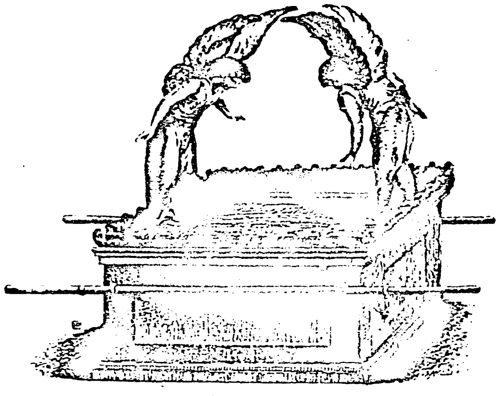
Dimensions and Construction.

ARK OF THE COVENANT (Hebrew, ארון ברית יהוה, etc.: for the complete list of names of the Ark, see below).—**Biblical Data:** The first mention of the Ark in the Bible is in Ex. xxv. 10 *et seq.*, where Moses on Mount Sinai is told to have an Ark of shittim-wood made for the Commandments which are about to be delivered. Minute directions are given for the plan of the Ark. It is to be 2½ cubits in length, 1½ in breadth, and 1½ in height. It is to be overlaid within and without with gold, and a crown or molding of gold is to be put around it. Four rings of gold are to be put into its corners—two on each side—and through these rings staves of shittim-wood overlaid with gold for carrying the Ark are to be inserted; and these are not to be removed. A golden cover (Hebr. כפרת; A. V., "mercy-seat"), adorned with golden cherubim, is to be placed above the Ark; and from here the Lord says He will speak to Moses (Ex. xxv. 10-22). The Ark is to be placed behind a veil, a full description of which is given (*ib.* xxvi. 31-33).



Ark of the Covenant.
(After Calmet.)

Sanctity and Consecration.

Even Aaron was forbidden to enter this place of the Ark too often; and he was enjoined to perform certain ceremonies when entering there (Lev. xvi. 2 *et seq.*). Moses was directed to consecrate the Ark, when completed, with the oil of holy ointment (Ex. xxx. 23-26); and he was also directed to have the Ark made by Bezaleel, the son of Uri of the tribe of Judah, and by Aholiab, the son of Ahisamach of the tribe of Dan (*ib.* xxxi. 2-7). These instructions Moses carried out, calling upon "every wise-hearted" one among the people to assist in the work (*ib.* xxxv. 10-12). Bezaleel made the Ark (*ib.* xxxvii. 1); and Moses approved the work (*ib.* xxxix. 43), put the testimony in the Ark, and installed it (*ib.* xl. 20, 21).

In Deut. x. 1-5 a rather different account of the making of the Ark is given. Moses is made to say that he constructed the Ark before going upon Mount Sinai to receive the second set of tables. The charge of carrying the Ark and the rest of the holy utensils was given to the family of Kohath, of the tribe of Levi; but they were not to touch any of the holy things until after the latter had been covered by Aaron (Num. iv. 2-15).

A Movable Sanctuary.

In the march from Sinai, and at the crossing of the Jordan, the Ark preceded the people and was the signal for their advance (Num. x. 33; Josh. iii. 3, 6). During the crossing of the Jordan the river grew dry as soon as the feet of the priests carrying the Ark touched its waters, and remained so until the priests, with the Ark, left the river, after the people had passed over (Josh. iii. 15-17; iv. 10, 11, 18). As memorials, twelve stones were taken from the Jordan at the place where the priests had stood (*ib.* iv. 1-9). During the ceremonies preceding the capture of Jericho, the Ark was carried round the city in the daily procession, preceded by the armed men and by seven priests bearing seven trumpets of rams' horns (*ib.* vi. 6-15). After the defeat at Ai, Joshua lamented before the Ark (*ib.* vii. 6-9). When Joshua read the Law to the people between Mount Gerizim and Mount Ebal, they stood on each side of the Ark (*ib.* viii. 33). The Ark was set up by Joshua at Shiloh (*ib.* xviii. 1); but when the Israelites fought against Benjamin at Gibeah, they had the Ark with them, and consulted it after their defeat (Judges xx. 27).

Captured by the Philistines.

The Ark is next spoken of as being in the Temple at Shiloh during Samuel's apprenticeship (I Sam. iii. 3). After their first defeat at Eben-ezer, the Israelites had the Ark brought from Shiloh, and welcomed its coming with great rejoicing. In the second battle the Israelites were again defeated, and the Philistines captured the Ark (*ib.* iv. 3-5, 10, 11). The news of its capture was at once taken to Shiloh by a messenger "with his clothes rent, and with earth upon his head." The old priest, Eli, fell dead when he heard it; and his daughter-in-law, bearing a son at the time the news of the capture of the Ark was received, named him Ichabod—explained as "Where is glory?" in reference to the loss of the Ark (*ib.* iv. 12-22).

The Philistines took the Ark to several places in their country, and at each place misfortune resulted to them (*ib.* v. 1-6). At Ashdod it was placed in the temple of Dagon. The next morning Dagon was found prostrate before it; and on being restored to his place, he was on the following morning again found prostrate and broken. The people of Ashdod were smitten with boils (Hebr. עפלים, A. V. "emerods"—that is, hemorrhoids); and a plague of mice was sent over the land (*ib.* vi. 5; the Septuagint, v. 6). The affliction of boils was also visited upon the people of Gath and of Ekron, whither the Ark was successively removed (*ib.* v. 8–12). After the Ark had been among them seven months, the Philistines, on the advice of their diviners, returned it to the Israelites, accompanying its return with an offering consisting of golden images of the boils and mice with which they had been afflicted. The Ark was put down in the field of Joshua the Beth-shemite, and the Beth-shemites offered sacrifices and burnt offerings (*ib.* vi. 1–15). Out of curiosity the men of Beth-shemesh gazed at [A. V. "looked into"] the Ark; and as a punishment over fifty thousand of them were smitten by the Lord (*ib.* 19). The Beth-shemites sent to Kirjath-jearim, or Baal-Judah, to have the Ark removed (*ib.* 21); and it was taken thither to the house of Abinadab, whose son Eleazar was sanctified to keep it (*ib.* vii. 1). Kirjath-jearim was the abode of the Ark for twenty years (*ib.* 2). Under Saul the Ark was with the army before he first met the Philistines, but the king was too impatient to consult it before engaging in the battle (*ib.* xiv. 18, 19). In I Chron. xiii. 3 it is stated that the people were not accustomed to consult the Ark in the days of Saul.

In the Days of David.

At the very beginning of his reign David removed the Ark from Kirjath-jearim amid great rejoicing. On the way to Zion, Uzzah, one of the drivers of the cart on which the Ark was carried, put out his hand to steady the Ark, and was smitten by the Lord for touching it. David in fear carried the Ark aside into the house of Obed-edom the Gittite, instead of carrying it on to Zion, and here it stayed three months (II Sam. vi. 1–11; I Chron. xiii. 1–13). On hearing that the Lord had blessed Obed-edom because of the presence of the Ark in his house, David had the Ark brought to Zion by the Levites, while he himself, "girded with a linen ephod," "danced before the Lord with all his might"—a performance for which he was despised and rebuked by Saul's daughter Michal (II Sam. vi. 12–16, 20–22; I Chron. xv.). In Zion he put the Ark in the tabernacle he had prepared for it, offered sacrifices, distributed food, and blessed the people and his own household (II Sam. vi. 17–20; I Chron. xvi. 1–3; II Chron. i. 4). Levites were appointed to minister before the Ark (I Chron. xvi. 4). David's plan of building a temple for the Ark was stopped at the advice of God (II Sam. vii. 1–17; I Chron. xvii. 1–15; xxviii. 2, 3). The Ark was with the army during the siege of Rabbah (II Sam. xi. 11); and when David fled from Jerusalem at the time of Absalom's conspiracy, the Ark was carried along with him until he ordered Zadok the priest to return it to Jerusalem (II Sam. xv. 24–29).

In Solomon's Temple.

When Abiathar was dismissed from the priesthood by Solomon for having taken part in Adonijah's conspiracy against David, his life was spared because he had formerly borne the Ark (I Kings ii. 26). Solomon worshiped before the Ark after the dream in which the Lord promised him wisdom (*ib.* iii. 15). In Solomon's Temple a Holy of Holies (Hebr. דביר, A. V., "oracle") was prepared to receive the Ark (*ib.* vi. 19); and when the Temple was dedicated, the Ark, containing nothing but the two Mosaic tables of stone, was placed therein (*ib.* viii. 1–9; II Chron. v. 1–10). When the priests came out of the holy place after placing the Ark there, the Temple was filled by a cloud, "for the glory of the Lord had filled the house of the Lord" (I Kings viii. 10–11; II Chron. v. 13, 14). When Solomon married Pharaoh's daughter, he caused her to dwell in a house outside Zion, as Zion was consecrated because of its containing the Ark (II Chron. viii. 11). King Josiah had the Ark put into the Temple (II Chron. xxxv. 3), from which it appears that it had again been removed by some predecessor.

The only mention of the Ark in the Prophets is the reference to it by Jeremiah, who, speaking in the days of Josiah (Jer. iii. 16), prophesies a time when the Ark will no longer be needed because of the righteousness of the people.

In the Psalms the Ark is twice referred to. In Ps. lxxviii. 61 its capture by the Philistines is spoken of, and the Ark is called "the strength and glory of God"; and in Ps. cxxxii. 8, it is spoken of as "the ark of the strength of the Lord." The Ark is mentioned in only one passage in the Apocrypha (II Macc. ii. 4–10), which contains a legend to the effect that the prophet Jeremiah, "being warned of God," took the Ark, and the tabernacle, and the altar of incense, and buried them in a cave on Mount Sinai, informing those of his followers who wished to find the place that it should remain unknown "until the time that God should gather His people again together, and receive them unto mercy."

The Ark is called by several names in the Bible, as follows:

I. "The ark" (הארון): Ex. xxv. 14 *et al.*; Lev. xvi. 2; Num. iii. 31 *et al.*; Deut. x. 2 *et al.*; Josh. iii. 15 *et al.*; I Sam. vi. 13 *et al.*; II Sam. vi. 4 *et al.*; I Kings viii. 3 *et al.*; I Chron. vi. 16 *et al.*; II Chron. v. 4 *et al.*

II. "The ark of the testimony" (1. הארון העדת): Ex. xxxi. 7: (2. ארון העדת): Ex. xxv. 22 *et al.*; Num. iv. 5 *et al.*; Josh. iv. 16.

III. *a* "The ark of the covenant" (1. ארון הברית): Josh. iii. 6 *et al.*; (2. הארון הברית): Josh. iii. 14.

- *b* "The ark of the covenant of the Lord" [YHWH]; compare IV. *a* (1. ארון ברית יהוה): Num. x. 33 *et al.*; Deut. x. 8 *et al.*; Josh. iv. 7 *et al.*; I Sam. iv. 3 *et al.*; I Kings iii. 15 *et al.*; I Chron. xv. 25 *et al.*; II Chron. v. 2 *et al.*; Jer. iii. 16; (2. הארון ברית יהוה): Josh. iii. 17.
- *c* "The ark wherein is the covenant of the Lord, which he made with our fathers, when he brought them out of the land of Egypt" (הארון אשר שם ברית יהוה אשר כרת עם אבותינו בהוציאו אתם מארץ מצרים): I Kings viii. 21.
- *d* "The ark wherein is the covenant of the Lord, that he made with the children of Israel" (הארון אשר שם ברית יהוה אשר כרת עם בני ישראל): II Chron. vi. 11.
- *e* "The ark of the covenant of the Lord of all the earth"; compare IV. *h* (ארון הברית אדון כל הארץ): Josh. iii. 11.
- *f* "The ark of the covenant of the Lord of hosts [or YHWH of hosts], who dwelleth between the cherubim"; compare IV. *i, j* (ארון ברית יהוה צבאות ישב הכרבים): I Sam. iv. 4.
- *g* "The ark of the covenant of the Lord [or YHWH] your God"; compare IV. *c, e* (ארון ברית יהוה אלהיכם): Deut. xxxi. 26; Josh. iii. 3).
- *h* "The ark of the covenant of God"; compare IV. *f, g* (ארון ברית האלהים): Judges xx. 27; I Sam. iv. 4; II Sam. xv. 24; I Chron. xvi. 6.

IV. *a* "The ark of the Lord [YHWH]"; compare III. *b* (ארון יהוה): Josh. iv. 11 *et al.*; I Sam. iv. 6 *et al.*; II Sam. vi. 9 *et al.*; I Chron. xv. 3 *et al.*; II Chron. viii. 11.
b "The ark of the Lord [YHWH], the Lord of all the earth"; compare III. *c* (ארון יהוה אדון כל הארץ): Josh. iii. 13.
c "The ark of the Lord God [or YHWH]"; compare III. *g* (ארון אדני יהוה): I Kings ii. 26.
d "The ark of the Lord [or YHWH] God of Israel" (ארון יהוה אלהי ישראל): I Chron. xv. 12 *et al.*
e "The ark of the Lord [or YHWH] your God"; compare III. *g* (ארון יהוה אלהיכם): Josh. iv. 5.
f "The ark of God"; compare III. *h* (1. ארון אלהים): I. Sam. iii. 3 *et al.*; (2. ארון האלהים): I Sam. iv. 13 *et al.*; II Sam. vi. 3 *et al.*; I Chron. xiii. 5 *et al.*; II Chron. i. 4.
g "The ark of our God"; compare III. *h* (ארון אלהינו): I. Chron. xiii. 3.
h "The ark of the God of Israel" (ארון אלהי ישראל): I Sam. v. 8 *et al.*
i "The ark of God which is called by the Name, the name of the Lord [or YHWH] of hosts who dwelleth between the cherubim"; compare III. *f* (ארון האלהים אשר נקרא שם שם יהוה צבאות ישב הכרבים עליו): II Sam. vi. 2, R. V.
j "The ark of God, the Lord [or YHWH], who dwelleth between the cherubim, which is called the Name" [literal translation]; compare III. *f* (ארון האלהים יהוה יושב הכרבים אשר נקרא שם): I Chron. xiii. 6.
V. "The holy ark" (ארון הקדש): II Chron. xxxv. 3.
VI. "The ark of thy [God's] strength" (ארון עזך): Ps. cxxxii. 8; II Chron. vi. 41.

Different names for the Ark predominate in different books, as follows: In Exodus, Nos. I. and II. 2; in Numbers, Nos. II. 2 and III. *b*, 1; in Deuteronomy, No. III. *b*, 1; in Joshua, Nos. IV. *a* and III. *a*, 1; in I Samuel, Nos. IV. *a* and *f*, 2; in II Samuel, Nos. IV. *a* and *f*, 2; in I Kings, Nos. I. and III. *b*, 1; in I Chronicles, Nos. I. and III. *b*, 1; and in II Chronicles, Nos. I. and III. *b*, 1.

——**In Rabbinical Literature:** The Ark, by reason of its prominence in the Bible, forms an important subject of discussion by the Rabbis, a great many sayings relating to it being found throughout the Talmud and the Midrashim. They discuss the dimensions, position, material, contents, miraculous powers, final disposition, and various incidents directly or indirectly connected with the Ark. Such discussions at times embody popular legends, and are also of interest as reflecting the poetical spirit which animated many of the rabbis.

Thus it is related (B. B. 99*a*) that the available space in the Holy of Holies was not in the least diminished by the Ark and the cherubim—that is to say, that through the working of a miracle the Ark and the cherubim transcended the limitations of space. With regard to the position of the Ark in the Holy of Holies, there is the following picturesque saying in Tanḥuma, Ḳedoshim, x.:

"Palestine is the center of the world, Jerusalem the center of Palestine, the Temple the center of Jerusalem, the Holy of Holies the center of the Temple, the Ark the center of the Holy of Holies; and in front of the Ark was a stone called אבן שתיה, the foundation stone of the world."

In Yoma 72*b*, and Yer. Sheḳ. vi. 49*d*, it is recorded that Bezaleel made three arks which he put inside of one another. The outside and inside ones were made of gold, and measured respectively ten cubits and a fraction and eight cubits, while the middle one was of wood and measured nine cubits. Again, according to one opinion (Yer. Sheḳ. vi. 49*c*), there were two arks traveling with the Israelites in the wilderness. One contained the Law, in addition to the tablets of the Ten Commandments, and the other the tables of stone which Moses had broken. The one that contained the Law was placed in the "tent of meeting"; the other, containing the broken tables, accompanied the Israelites in their various excursions, and sometimes appeared on the battle-field. According to still another view (*l.c.*), there was only one Ark, and it contained both the Law and the broken tables (Ber. 8*b*; B. B. 14*b*). R. Johanan in the name of Simon ben Yoḥai, basing his opinion on the repetition of the word "name" (שם) in II Sam. vi. 2, maintains that the Ark contained the Ineffable Name and all other epithets of God (B. B. *l.c.*; Num. R. iv. 20). Marching in the vanguard of the Israelites, the Ark leveled the hills before them (Ber. 54*b*; see ARNON). It carried the priests, who in turn were to carry it in the passage of the Jordan (Soṭah 35*a*). When King David had the Ark brought from the house of Abinadab and carried upon a new cart, the two sons of the latter, driving the cart, were tossed by an invisible agency into the air and flung to the ground again and again, until Ahitophel explained to David that this was owing to the transgression of the Law, which enjoined upon the sons of Kohath to carry the Ark upon their shoulders (Num. vii. 9; Yer. Sanh. x. 29*a*). When the Philistines despatched the Ark upon a cart drawn by two milch-kine without a driver, the kine not only took the Ark straightway to Beth-shemesh (I Sam. vi. 8-12), but they also sang a song (taking "*wayishsharnah*," v. 12, "and they took the straight way," as derived from *shirah*, "a song"). According to R. Meïr, their song was the verse, "I will sing unto the Lord, for he hath triumphed gloriously" (Ex. xv. 1); according to R. Johanan, "Give thanks unto the Lord, call upon his name" (Ps. cv. 1); others suggest Ps. xciii., xcvii., xcviii., xcix., or cvi.; but R. Isaac Nappaḥa has a tradition, preserved in Tanna debe Eliyahu, xi. (compare 'Ab. Zarah 24*b*), that they sang the following processional hymn:

"Rise, O rise, thou acacia chest!
Move along, move along in thy great beauty!
Skilfully wrought with thy golden adornments!
Highly revered in the sanctuary's recesses!
O'ershadowed between the twin Cherubim!"
— Midr. Sam. xii.; 'Ab. Zarah *l.c.*; Gen. R. liv.

"When Solomon brought the Ark into the Temple, all the golden trees that were in the Temple were filled with moisture and produced abundant fruit, to the great profit and enjoyment of the priestly gild; until King Manasseh put an image of an idol in the Temple, which resulted in the departure of the Divine Presence and the drying up of the fruit" (Tan., Terumah, xi.; also with slight variations, Yoma 39*b*).

A Vanguard in the Desert.

The Ark was not merely a receptacle for the Law; it was a protection against the enemies of the Israelites, and cleared the roads in the wilderness for them. Two sparks, tradition relates, came out from between the two cherubim, which killed all serpents and scorpions, and burned the thorns, the smoke of which as it curled upward sent a sweet fragrance throughout the world, and the nations of the earth exclaimed in wonder and admiration (Cant. iii. 6), "What is this that cometh up from the wilderness like pillars of smoke?" (Tan., Wayaḳhel, vii.)

Opinions are divided as to what finally became of the Ark when the Temple was destroyed. Some, basing their views on II Chron. xxxvi. 10, and Isa. xxxix. 6, declare (Yoma 53*b*) that it was taken to

Its Ultimate Fate.

Babylonia, while according to others (*ib.*) it was not taken into captivity, but was hidden away in the Temple, in the apartment where the wood for fuel was kept; and it is related that a certain priest, while doing his work in that apartment, noticed that some of the stones in the paved floor projected above the others. He no sooner began to tell the story to a fellow-priest than he expired. That was regarded as a sure sign that the Ark had been buried in that place (Yer. Sheḳ. vi. 49*c*). Another tradition records that it was King Josiah who hid the Ark and other sacred vessels, for fear that if they were taken to Babylonia they would never be brought back (*ib.*).

"Why was a distance of 2,000 cubits always maintained between the Ark and the people? In order that when the march was stopped upon each Sabbath day, all the people might travel as far as the Ark to offer their prayers" (Num. R. ii. 9). "One son of Obed-edom betokens by his name, 'Peulthai, for God blessed him' (I Chron. xxvi. 5), the blessing brought upon his father's house; he honored the Ark by placing a new candle before it every morning and evening" (Num. R. iv. 20.).

Ark is used figuratively for a teacher of the Law in a farewell address: "If Obed-edom was blessed greatly for keeping the Ark in his house, how much more should he be blessed who shows hospitality to students of the Law?" (Ber. 63*b*.)

——**In Mohammedan Literature:** In the Koran the Ark of the Covenant and Moses' ark of bulrushes are both indicated by the one word "tabut," which term certainly comes from the Hebrew "tebah," through the Jewish-Aramaic "tebuta." The reference in the Koran to the Ark of the Covenant occurs in the middle of the story of the choice of Saul to be king. There the people demand a sign that God has chosen him, and the narrative continues (ii. 249): "and their prophet said unto them, 'Lo, the sign of his kingship will be that the ark [*tabut*] will come unto you with a "Sakinah" in it from your Lord, and with a remnant of that which the family of Moses and the family of Aaron left—angels bearing it. Lo, in that is verily a sign for you if ye are believers!'" Baidawi (*ad loc.*) explains "tabut" as derived from the root *tab* (return), and as thus meaning a chest to which a thing taken from it was sure to return. It was the chest in which the Law (*Taurat*) was kept, and was about three cubits by two, and made of gilded box-wood. "Sakinah," he says, means "rest," "tranquillity"; and it came to the Israelites in the coming of the Ark to them, or it was the Taurat itself, brought in the Ark and calming them by its presence (see Shekinah). Moses was wont to make it go on before in battle, and it would steady the Israelites and prevent them fleeing.

Tabut, Sakinah, and Remnant.

Others said that there was in the Ark a figure of chrysolite or ruby with the head and tail of a she-cat and with two wings. It would utter a moaning sound, and the Ark would rush toward the enemy with the Israelites following it. When it stayed, they stood and were at ease, and victory came. By the "remnant" in it is meant the fragments of the broken tables, the staff and clothes of Moses, and the turban of Aaron. After Moses died, God took it up to Himself, and the angels now brought it down again. But others said that it remained with the prophets that succeeded Moses, and that they gained victories by means of it until they acted corruptly and the unbelievers took it from them. So it remained in the country of Goliath until God made Saul king. He then brought calamity upon the Philistines and destroyed five cities. Perceiving that this was through the Ark, they placed it on two bulls, and the angels led it to Saul.

Composition of "Remnant."

Al-Tha'labi, in his "Ḳiṣaṣ al-Anbiyya" (p. 150 of ed. of Cairo, A. H. 1314), gives details as to the earlier and later history of the Ark. He brings it into connection with the important Moslem doctrine of the Light of Mohammed, the first of all created things, for the sake of which God created the worlds. The Ark was sent down by God from paradise with Adam when he fell. In it, cut out of a ruby, were figures of all the prophets that were to come, especially of Mohammed and his first four califs and immediate followers. At the death of Adam it passed to Seth, and so down to Abraham. From Abraham, Ishmael received it as the eldest of his sons. It passed then to Ishmael's son, Kedar, but was claimed from him by Jacob. Kedar refused to relinquish it, but was divinely commanded to give it up, as it must remain in the line of the prophets of God, which was now that of Israel. On the other hand, the Light of Mohammed, which shone on the forehead of every lineal ancestor of his, remained in the Arab line of Kedar. So the Ark passed down to Moses. How and when it was lost, the Moslem historians do not state. According to Ibn 'Abbas, a cousin of Mohammed and the founder of Koranic exegesis, it, with the rod of Moses, is now lying in the Lake of Tiberias, and will be brought forth at the last day. The story of the image with the cat's head and tail is traced back to Wahb ibn Munabbih, who was of Jewish birth. It has probably some Midrashic origin. What is apparently an earlier form of this latter legend is given in the "Khamis" of Al-Diyarbakri (i. 24 *et seq.*; compare ed. of Cairo, 1302).

History of the Ark.

Earlier Form of Legend.

In it the chest with images of the prophets is not connected with the Ark of the Covenant. The chest, called also *tabut*, which had been given to Adam as above stated, was in the possession of the emperor Heraclius, and was shown by him to ambassadors from Abu Bakr, the first calif. It had been brought from the extreme West (Maghreb) by Alexander, and so had passed to the Roman emperors.

——**Critical View:** A classification of the passages in which the Ark is mentioned (compare Seyring, in Stade's "Zeitschrift," xi. 115), shows that in the older sources (J., E., and Samuel) the Ark is called simply "the ark," "the ark of Yhwh," or "the ark of God." In Deuteronomy, and in writers under Deuteronomic influence, it is called "the ark of the covenant of YHWH"; while the priestly sections call it "the ark of the testimony." In I Sam. iv. the Ark is taken into battle, and both Israelites and Philistines are affected by it as though YHWH Himself were there.

As the Egyptians, Babylonians, and other nations had similar structures for carrying their idols about (compare Wilkinson, "Ancient Egyptians," iii. 289; Delitzsch, "Handwörterbuch," under "elippu"; and "Isaiah," in "S. B. O. T." p. 78), critical scholars hold that the Ark was in the earliest time a kind of movable sanctuary (see Wellhausen, "Prolegomena," 5th ed., p. 46, note; Stade, "Gesch." i. 457; Nowack, "Archäologie," ii. 3; Benzinger, "Archäologie," 367; Winckler, "Gesch. Israels," i. 70; Couard, in Stade's "Zeitschrift," xii. 53; and Guthe, "Geschichte des Volkes Israel," p. 31). As the corresponding shrines of other nations contained idols, so late tradition has it that the Ark contained the tables of the Decalogue (I Kings viii. 9, 21). As the two versions of the Decalogue, that of E. in Ex. xx., and that of J. in Ex. xxxiv., differ so radically, critics hold also that there could have been no authoritative version of the Commandments deposited in the Ark, but believe that it contained an aerolite or sacred stone—similar to the sacred stone of the Kaaba at Mecca—which was regarded as a fetish. The fact that in J. (the Judean source) the Ark is not prominent, YHWH being consistently represented as dwelling at Sinai while his angel goes before Israel (Ex. xxxiii. 2), and that in E. (the Ephraimitic source) the Ark plays a conspicuous part, led Wellhausen and Stade to believe that it was originally the movable sanctuary of the Joseph tribes, from whom, after the union of the tribes, it was adopted by the nation. This view has been generally adopted by other critics (see references above).

In the historical books the Ark plays no part after the time of Solomon, when it was placed in the Temple. Couard believes that it was carried from Jerusalem in the days of Rehoboam by the Egyptian king Shishak (Stade's "Zeitschrift," xii. 84). That would adequately explain its disappearance from history. While the Ark figures in Deuteronomy and in the priestly legislation, there is, as Couard points out, no evidence that it was actually in existence as an object in the cult at the time that those codes were combined; it appears to represent merely an ideal in the minds of the compilers.

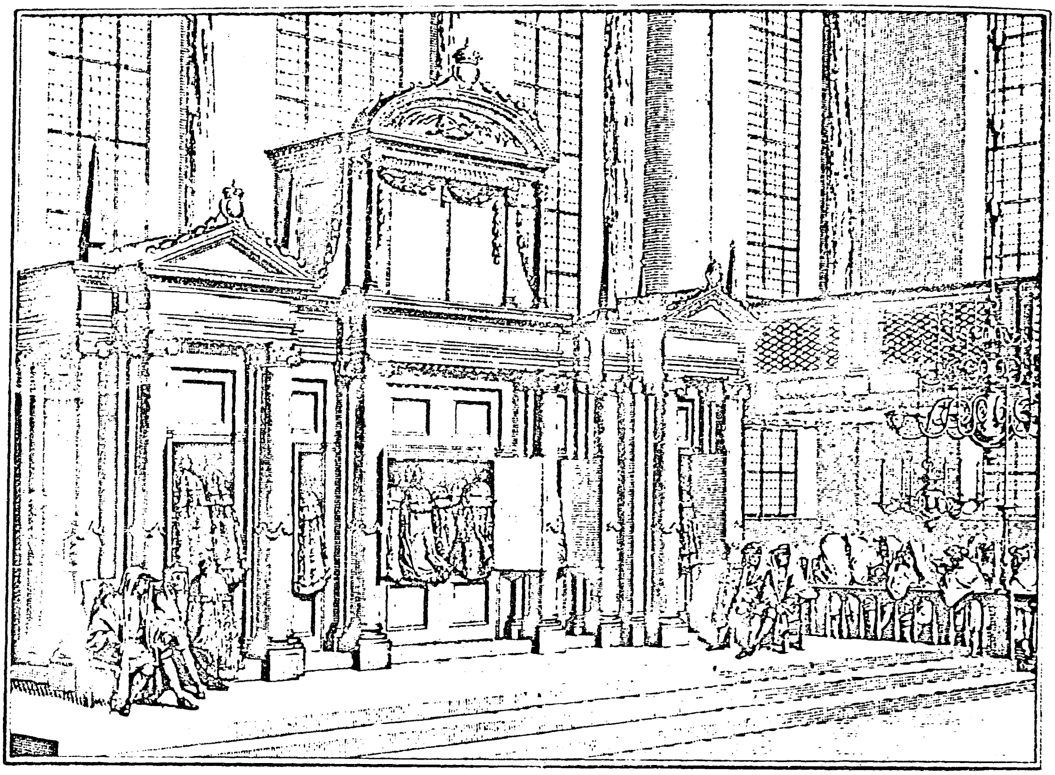
Supposed Earliest Representation of an Ark of the Law, in the Museo Borgiano at Rome.

(From Garrucci, "Arte Christiana.")

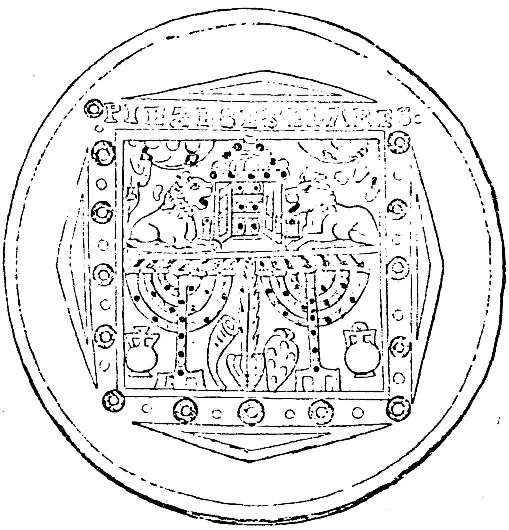
ARK OF THE LAW.—In the Synagogue (ארון הקדש): A closet or chest in which are kept the Torah scrolls used in the public worship of the synagogue. The Ark is placed in or against the wall of the synagogue, toward which the worshipers turn in the solemn parts of the liturgy—the wall in the direction of Jerusalem. The Ark is always placed a few feet above the floor of the nave and is reached by steps. As the Torah is the most sacred and precious possession of the Jew, so is the chest which holds it the most important and ornate part of the synagogue. It is called "Aron ha-Kodesh" (the Holy Ark) after the Ark of the Covenant in the Tabernacle and the Temple (Ex. xxv. 10 *et seq.*, xxxvii. 1 *et seq.*). The perpetual lamp (נר תמיד) is usually hung in front of it. From the platform near it the priests pronounce their benediction on festivals (compare the expression עלה לדוכן, R. H. 31*b*; Shab. 118*b*), and in modern Ashkenazic synagogues the *bimah* or *almemar*—the platform from which the prayers are recited and the lessons of the Torah read by the precentor—is placed near it (compare in the Talmud the expressions עבר לפני התיבה and ירד לפני התיבה [Ber. v. 4; R. H. iv. 7, 34*b*], for performing the function of precentor). Whenever the Ark is opened the



ARK OF THE LAW OF THE SEPHARDIC SYNAGOGUE AT AMSTERDAM.

(After Picart.)

congregation rises in reverence for the Torah it holds, and when it is empty, as on the Feast of the Rejoicing of the Law (Simḥat Torah), when all the Torah scrolls are taken out to be carried in procession, a burning candle is placed in it. Before the Ark there is frequently placed a curtain of costly material, called *paroket* after the curtain which in the Tabernacle and Temple screened the Holy of Holies (Ex xxvii. 21, xxxvi. 35, xl. 21).



Symbolic Representation of an Ark of the Law on a Glass Dish in the Museo Borgiano at Rome.

(From Garrucci, "Arte Christiana.")

It may be safely assumed that the Ark constituted from the first an integral part of the synagogue edifice. The synagogue was considered a sanctuary next to the Temple (Meg. 29*a*; see Targum to Ezek. xi. 16), and the Ark as corresponding to the third division of the Temple, the Holy of Holies. The application of the term היכל to the Ark is therefore not appropriate, as this name was given to the second or middle division of the Temple (I Kings vi. 5, 17; vii. 50). It is equally certain that the Ark served from the beginning as a receptacle for the sacred scrolls used in the service of the synagogue, although the older accounts do not expressly mention it. This may be inferred from the analogy with the Ark of the Covenant in which, according to tradition (Deut. x. 2 *et seq.*; I Kings viii. 9; II Chron. v. 10), the tablets of the covenant, or the Decalogue, were deposited, and the place of which was taken by the Ark and the Torah.

In the Mishnah the Ark is referred to not as ארון, but as תיבה, the word used in the Old Testament (spelled without י) for the Ark of Noah (Gen. vi.-viii.) and the Ark in which Moses was hidden (Ex. ii. 3, 5). Its preference for the term "Tebah" may be due to a desire to distinguish between the Ark of the

Tabernacle and Temple, and that of the synagogue (compare, however, the Baraita). The vulgar crowd commit a deadly sin in calling the sacred shrine simply "chest" (Shab. 32*a*). In Megillah iii. 1 this gradation of sacredness is given: From the proceeds of the sale of a synagogue an Ark may be purchased; from those of an Ark, wrappers (for the Torah scroll); from those of wrappers, books (that signifies, according to Maimonides' Yad ha-Ḥazaḳah, Hilkot Tefillah, xi. 14, the Pentateuch and other parts of the Old Testament in book form); from those of books, a Torah scroll (compare also Shulḥan 'Aruk, Oraḥ Ḥayyim, § 153, 2). According to Ta'anit ii. 1 the Ark was portable. Josephus ("Ant." xvi. 6, § 2) mentions incidentally that the sacred books were kept in the synagogue (*σαββατεῖον*); Chrysostom (347-407) refers in "Oratio Adversus Judaeos," vi. 7 ("Opera," ed. Montfaucon, vol. i.), to the Ark (*κιβωτός*, the word by which the Septuagint renders the Hebrew ארון) and in "Orat." i. 5 to the "Law" and the "Prophets" which were kept in the synagogues. It is only Maimonides (Yad ha-Ḥazaḳah, Hilkot Tefillah, x. [xi.] 3) and Bertinoro (to Ta'anit ii. 1) who state explicitly that the sacred scrolls were preserved in the Ark.

ARK OF THE LAW IN THE SYNAGOGUE AT GIBRALTAR.

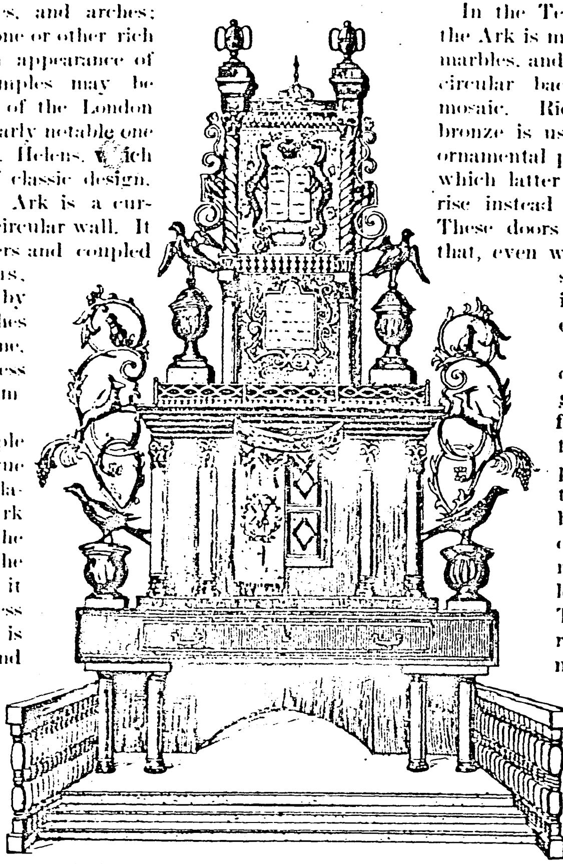
(From a photograph in the collection of Hon. Mayer Sulzberger.)

A.

Architecturally Considered: In earlier times and in less important synagogues the Ark was generally a movable piece of furniture, so that in case of disturbance or danger it could be readily removed with its contents. In its most rudimentary form it was merely a wooden case or closet, raised from the floor sufficiently high for the congregation to see the scrolls of the Law when the doors were open.

Sometimes the Ark is fashioned as a recess or niche in the wall, and the design is then very properly considered in connection with the architectural treatment of the interior of the synagogue. When this method is adopted it is generally ornamented with columns, cornices, and arches; and when built of stone or other rich materials, presents an appearance of great dignity. Examples may be found to-day in some of the London synagogues, a particularly notable one being that in Great St. Helens, which itself is a fine piece of classic design. In this structure the Ark is a curtained recess in a semicircular wall. It is flanked with pilasters and coupled Corinthian columns, which are surmounted by other columns and arches supporting a half dome, a fine effect of stateliness being attained by this simple treatment.

A more modern example is found in the synagogue Mickve Israel, of Philadelphia, where the Ark occupies practically the entire eastern end of the building. Here, also, it takes the form of a recess in the wall; and it is framed with columns and pilasters supporting a round arch, in the tympanum of which are the tables of the Law surrounded by stained glass. When the doors are opened, a base of white marble is disclosed, and on this rest the scrolls.



Ark of the Law in the Synagogue at Pogrebishche, Russia.
(From Bersohn, "Kilka Slow.")

In the synagogue at Amsterdam there is an extremely beautiful Ark treated architecturally with Ionic columns, cornices, and pediments; the central portion is raised higher than the sides and contains the tables of the Law elaborately framed and surrounded by carving. This Ark is specially notable from the fact that it is divided vertically into five parts, each having separate compartments with doors, and all containing scrolls. Notwithstanding its elaboration, however, it has no relation to the interior design of the building, and must be considered rather as a handsome piece of furniture placed in the position of honor.

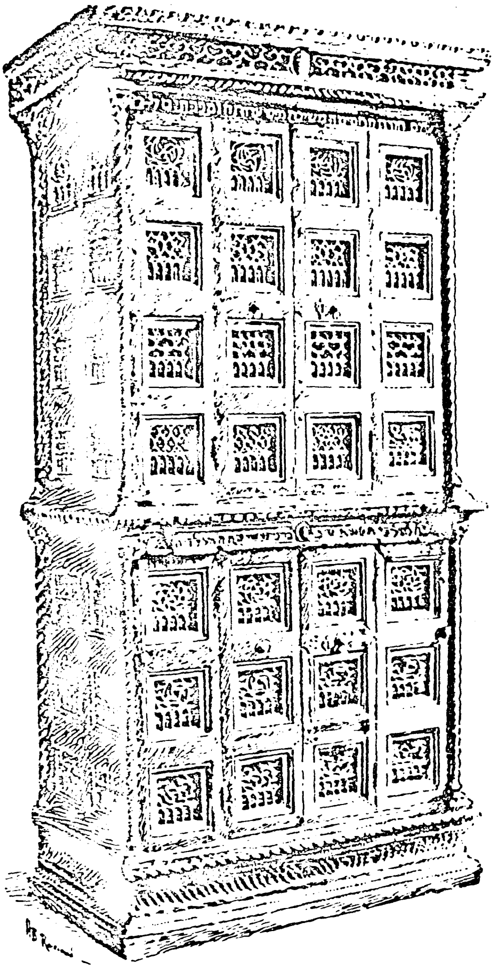
In many of the important synagogues in Europe the Ark is treated in the same way. In Wiesbaden, Florence, and Paris are three instances of this. The Ark in the synagogue in each of these cities is a superb structure made of stone, marble, and rich metal work; but the main line of the walls against which it is placed has been recognized in its design, and while it is a separate structure, it still forms a consonant part of the interior and harmonizes with it without losing its distinctive importance.

The Ark in the Temple Emanu-El in New York is an unusually elaborate piece of Moresque design. It is richly carved, entirely constructed of wood, and colored in the manner of the Alhambra.

In the Temple Beth-El, New York, the Ark is made of onyx and colored marbles, and is placed against a semicircular background of marble and mosaic. Richly wrought and gilded bronze is used for capitals and other ornamental parts, and for the doors—which latter are counterweighted, and rise instead of sliding to the sides. These doors are of open design, so that, even when they are closed, the scrolls may be seen, as the interior is illuminated with electric lights.

The approach to the Ark of the West End Synagogue, New York, is by four steps from the main floor, giving upon a broad platform extending nearly the whole width of the building; from the center of the rear of this again rise four semicircular steps leading to the actual Ark. This is of elaborate Moresque design and workmanship, in which strong relief is obtained by the use of light oak fretwork, embedded in black walnut panels, in the central sliding doors which conceal the scrolls. Handsome walnut pillars, which reproduce the form of those of stone that support the portico of the exterior of the building, and of those of onyx that uphold the galleries, flank the Ark. The whole structure is set in an arched recess in the south wall of the building, and receives light in the daytime from rows of Moresque windows of stained glass, placed close together and filling the extent of the arch. By night, concealed gas or electric lights are skilfully adjusted to illuminate the salient points of the design. The pulpit and the reading-desk, occupying their customary positions, repeat the mosaic ornamentation of the combined oak and walnut, characteristic of the Ark. An equally elaborate Ark is that of the "Shearith Israel" congregation in New York, the Sephardic place of worship; a colored plate of it forms the frontispiece of vol. i. of this Encyclopedia.

The Ark is always surmounted by a representation of the two tables of the Law, while a perpetual lamp hangs in front; silver and bronze lamps of rich workmanship are often placed at the sides. The doors, except in the Sephardic synagogues, are covered by curtains, and the walls of the interior are also adorned with rich hangings.



Ark of the Law from the Synagogue at Modena, Dated A.M. 5265 = 1505 C.E.

(From the Musée de Cluny.)

The Ark is approached always by at least three steps, but sometimes many more are used, and—as in the case of the Paris synagogues—a fine effect is obtained by marble steps and balustrades.

A. A. W. B.

ARK OF MOSES ("tebah"): For three months Moses was kept hidden by his mother, and when she could no longer conceal him, she made a box and launched it on the Nile river (Ex. ii. 2-3). The box was made of rushes, and was lined with slime and pitch to make it water-tight. Midr. R. to Ex. i. 21 says that the pitch was placed on the outside of the box, so that its odor should not be offensive to the infant.

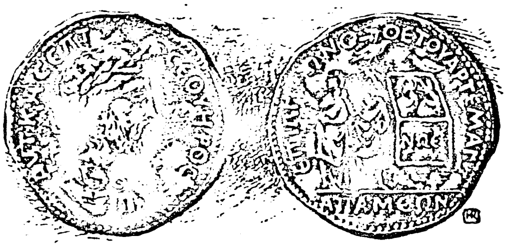
J. JR. G. B. L.

ARK OF NOAH.—Biblical Data: The vessel occupied by Noah and his family during the Deluge (Gen. vi. 14, vii., viii.).

The English name should not be confounded with the Ark of the Covenant. The Hebrew name, תבה, is the same as that of the chest in which the infant Moses was placed on the banks of the Nile. It was a box-like structure made of gopher-wood, a species of pine-tree not found in Babylonia, but brought, as was frequently done, from the Mediterranean coast land. It had three stories and a roof. In the parallel Babylonian flood-story no mention is made of the material; but in the main the descriptions agree. In either case the vessel was made water-tight with bitumen and provided with cells or rooms. The proportions, as given in Genesis, show regard for safety and rapid movement under steering. The huge dimensions of the Ark—300 cubits long, 50 cubits broad, and 30 cubits high—were never reached in the construction of ancient vessels, but would have been necessary for the accommodation of all the animals that survived the Deluge. It was really a great house set afloat, and was so called in the Babylonian version ("Flood Story," line 91). Its purpose, according to both accounts, was to accommodate Noah and his family and the animals of every kind that were to populate the earth after the waters subsided. In the Babylonian account the Ark rested on Mount Nisir, east of the Lower Zab river, therefore not far from the starting-point; and the high water lasted but a week. Noah's Ark, after tossing about for a year, rested in the highlands of Ararat or Armenia, and stories have been current at various times to the effect that remains of it had been found in that region, as, for example, in Josephus, "Ant." i. 3, § 6 (see Ararat and Flood). See Schrader, "Cuneiform Inscriptions and the Old Testament," i. 46-60.

J. JR. J. F. McC.

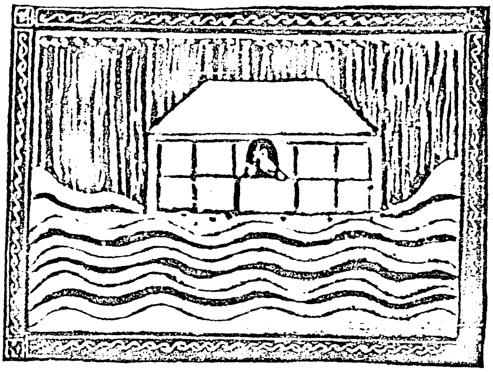
——**In Rabbinical Literature:** One hundred and twenty years before the Deluge, Noah planted cedars from which he afterward made the Ark (Gen. R. xxx. 7; compare Christian parallels; Ginzberg, "Monatsschrift," xliii. 411). This lengthy period was requisite, partly in order to urge the sinful people to amend their ways, and partly to allow sufficient time for the erection of the Ark, which was of very large proportions. According to one view the Ark consisted of three hundred and sixty cells, each ten yards long by ten yards wide; according to another it consisted of nine hundred cells, each six yards long by six yards wide (Gen. R. xxxi. 11; compare commentaries on the passage for the exact mathematical computations). The lowest of these



Coin of Apamea, with Supposed Representation of Noah's Ark.

(From Maspero, "Dawn of Civilization.")

stories was used as a depositary for refuse; in the second the human beings and the "clean" beasts were lodged, and the uppermost was reserved for the "unclean" beasts. A differing opinion reverses the order, so that the refuse was deposited in the third story, from which it was shoveled into the sea through a sort of trap-door (*καταράκτης*; Gen. R. *l.c.*). For purposes of illumination, Noah used precious stones, bright as the sun at noonday (Sanh. 108*b*; Yer. Pes. i. 27*b*; Gen. R. *l.c.*), which shone by night and were dull by day. The stones were the sole light in the Ark, since the stars and planets did not fulfil their functions during the Deluge (Gen. R. xxxiv. 11). Another miracle witnessed by the occupants of the Ark was the entrance of the animals. They were not led in by Noah, a task which would have been impossible for any human being; but God caused them, as well as the spirits of those whose bodies were yet uncreated, to gather there from all sides (Gen. R. xxxi. 13, xxxii. 8; Zeb. 116*a*; for Christian parallels see Ginzberg, "Monatsschrift," xliii. 414). Another Midrash says that the angels appointed over the various species of animals brought each his allotted animal with its necessary fodder (Pirke R. El. xxiii.). In regard to the feeding of the animals, the greater number of Haggadot say that each received suitable food at the usual time (Tan., ed. Buber, Noaḥ ii.; Gen. R. xxxi. 14); and since Noah was constantly employed in feeding them, he did not sleep for a moment during the year in the Ark. As Noah was an exception among his contemporaries, so also were the animals that were destined to be saved. They were the best of their species, and, unlike the other animals of the time, they remained true to their proper natures, without overstepping the limitations which nature had prescribed for them (Tanḥuma, *l.c.* v.; Gen. R. xxviii. 8; Sanh. 108*a*). Besides the regular occupants, the Ark supported Og, king of Bashan, and the immense animal "Reêm," neither of whom, owing to their enormous size, could get into the Ark, but held fast to it, remaining alongside (Pirke R. El. xxiii.; Gen. R. xxxi. 13). In order that Noah on his entrance into the Ark might not be molested by the wicked people, lions and other wild animals were placed to guard it. A beam of the Ark was found by Sennacherib, and he made an idol of it (Sanh. 96*a*). Another beam of the Ark was used as the gallows for Haman, according to Midrash Abba Gorion, iv.; ed. Buber, 19*a* (see Deluge in Rabbinical Literature).



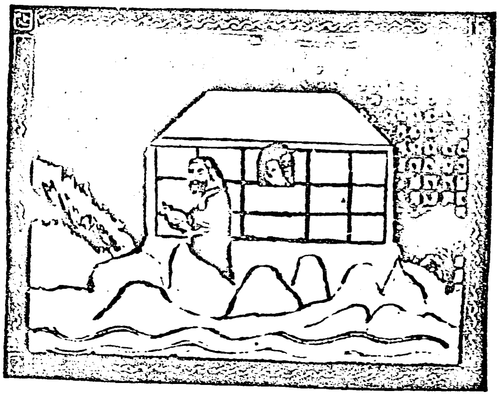
The Ark of Noah Afloat.
(From the Sarajevo Haggadah.)

J. SR. L. G.

——**In Mohammedan Literature:** Mohammed's conception of the Ark of Noah was of an ordinary ship. He refers to it frequently in speaking of Noah, and in all but two cases uses the word "fulk," which is elsewhere his usual word for a ship. In one passage (sura liv. 14) he calls it "a thing of boards and nails"; in another (xxix. 14), "safinah," which he also uses elsewhere of a ship.

There is, therefore, little Koranic material that need be considered under this rubric. A curious expression in the Koran (xi. 43), "And he said, 'Ride ye in it; in the Name of God it moves and stays,'" probably means only that at all times it was under the care of God. But some commentators (Baidawi, *ad loc.*) have thought the meaning to be that Noah said, "In the Name of God!" when he wished it to move, and the same when he wished it to stand still.

It is mentioned (xi. 46) that it settled on al-Judi. This name must go back to a flood legend current among the Syrians of the east Tigris, in which the Ark settled on the mountains of Gordyæa. But in Moslem tradition this has become a specific mountain, lofty and long in shape, near the town called Jazirat ibn 'Umar, on the east bank of the Tigris, in the province of Mosul. So Yaḳut (*s.v.* ii. 144), and Ibn Batuta passed it on his travels (ii. 139). Mas'udi ("Golden Meadows," i. 74) states that the place where the Ark grounded could be seen to his day, but there do not seem to be current among Moslems any of those tales so common in Jewish and Christian legend of remains found by adventurous travelers. Probably the Moslem al-Judi was much too accessible. According to Yaḳut a mosque built by Noah was still to be found there.



The Ark Resting on Mt. Ararat.
(From the Sarajevo Haggadah.)

On the dimensions and plan of the Ark there was much difference of opinion. It is evident that Mohammed's conception of a simple ship had been changed by outside influence. Baidawi (*l.c.*) gives the Biblical dimensions of 300 cubits by 50 by 30, and expands only in explaining that in the first of the three stories wild and domesticated animals were lodged, in the second were human beings, and in the third the birds. But other professed legend-gatherers go much farther. Al-Tha'labi in his "Kisas al-Anbiyya" (pp. 31 *et seq.*) and al-Diyarbakri in his "Khamis" give stories of how Noah, under the direction of Gabriel, built a "house" of teak wood—after having first grown the trees for the purpose—with dimensions of 80 cubits by 50 by 30; or, according to others, 660 by 330 by 33; or, again—and this on the authority of Jesus, who raised up SHEM to give the information to his disciples—1,200 by 600. On every plank was the name of a prophet, and the body of Adam was carried in the middle to divide the men *from* the women. When Noah came near the end of his building, he found that three planks, symbolizing three prophets, were missing, and that he could not complete the "house" without them. These planks were in Egypt and were brought from there to Noah by Og, son of Anak, the only one of the giants who was permitted to survive the Flood. The last of the Ark seems to have been that Noah locked it up and gave the key to Shem (Ibn Wadih, i. 12).

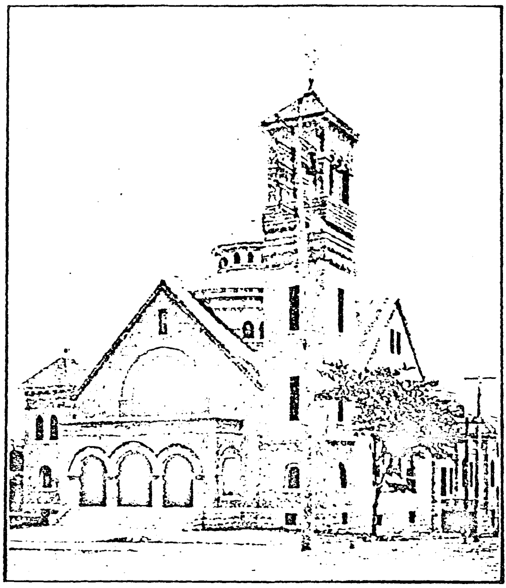
J. JR. D. B. M.

ARKANSAS: One of the South-central states of the United States; admitted June 15, 1836; seceded May 6, 1861; and was readmitted June 22, 1868.

Arkansas has about three thousand Jews. Though their settlement in different parts of the state can be traced to comparatively early days, their communal activity is of but recent development. A curious item of circumstantial evidence in this matter is the old marriage law of Arkansas (Statutes of 1838), which was so worded as to exclude Jewish ministers from performing the ceremony. This law remained unchanged until 1873, when, through the exertions of M. A. Cohn of Little Rock, the blunder was corrected in the revised statutes. There are in the state but five congregations of sufficient size and means to employ a permanent minister and to hold regular services; namely, Little Rock, Pine Bluff, Fort Smith, Hot Springs, and Jonesboro. The communities next in size are Texarkana, Helena, and Camden.

Little Rock.

The most important Jewish community in the state is Little Rock; it is the oldest as well as the largest. The first Jewish settlers there that can be traced were the Mitchell family (three brothers), who came from Cracow, Galicia, in 1838. From that year until the Civil War there was little Jewish immigration; but during the war and immediately afterward the influx was comparatively large. In 1866 a congregation was formed and incorporated with M. Navra as president. On March 18, 1867, a charter was granted to it under the name "Congregation B'nai Israel of Little Rock." The members worshiped in the Masonic Temple under the leadership of a ḥazan, S. Peck of Cincinnati, who resigned in 1870. In 1872 J. Bloch was elected rabbi; and the congregation moved into a hall, preparatory to building a temple. This temple was completed and dedicated in September, 1873. Bloch served until 1880, and was succeeded by I. W. Benson, who held office from 1881 to 1883; he was followed by M. Eisenberg, who occupied the pulpit for the remainder of the year. He was followed by Joseph Stolz as rabbi, who was at the time a student in the Hebrew Union College of Cincinnati. The rabbis succeeding him were: Emanuel Schreiber (1889-1891), Charles Rubenstein (1891-1897), Harry H. Mayer (1897-1899), and Louis Wolsey, the present incumbent. The membership (Sept., 1899) is 170; and the Sabbath-school has 100 pupils and 5 teachers. The building now occupied was built during the ministry of Rev. C. Rubenstein, and was dedicated in May, 1897, by him and Rabbis Wise, Samfield, and Stolz. Recently there has also been established an Orthodox congregation, having a membership of 13. Their present leader is a ḥazan, S. Carmel. With the growth of the community and congregation the following societies were organized:



Synagogue at Little Rock, Arkansas.

(From a photograph.)

The Concordia Club (social, 1868); The Hebrew Ladies' Benevolent Society (for the relief of the poor, 1869); Little Rock Lodge, No. 158, I. O. B. B. (1871); Kesher Shel Barzel (1876); Hebrew Relief Society (1892); The Temple Aid Society (formed by Rabbi Rubenstein in 1892, to aid in building the temple).

Many Little Rock Jews have been prominent in public life. One of the earliest settlers, Jonas Levy, was mayor from 1860 to 1865, and Jacob Erb (now in Chicago) occupied a position as county judge from 1890 to 1894, while Jacob Trieber is at present the judge of the United States Circuit Court.

The estimated population is 40,000, of whom the Jews number 900. The latter include many merchants, a banker, lawyer, school-teacher, sash and blind manufacturer, photographer, and pawnbroker. Jews are also engaged in the following trades: baker, barber, confectioner, laundryman, musician, restaurateur, and tailor. It is perhaps worthy of note that many of the Jews of Little Rock and other Arkansas cities were members of the Confederate Army.

Pine Bluff has a Jewish community almost as large as that of Little Rock. The proportion of Jews to the total population being greater, they are more influential in public affairs. Between 1845 and 1850, a Jew named Wolf—now in the New Orleans home—came to Pine Bluff. From that date the influx of Jews continued until to-day (1902) there is a Jewish population of some 700 or 800. In 1867 the congregation Anshe Emeth was organized with 20 members. Bloch, a teacher in the public schools, was rabbi, and M. Aschaffenberg, president. In 1871 Bloch resigned and was succeeded by Flügel, who retained office for four years. His successor was M. Greeneblatt, at whose death (1885) Rev. Isaac Rubenstein was appointed. He held office but one year, and was succeeded in 1887 by the Rev. Ferdinand Becker. During his long term the congregation increased to its present membership, 76; and he conducted a most successful Sabbath-school. On his retirement in 1898 he was succeeded by the present incumbent, Rabbi Joseph Korafeld.

Pine Bluff.

The population of Pine Bluff is estimated at 12,000, of whom 800 are Jews. The majority of the Jewish inhabitants are merchants; and there are several lawyers, a physician, and a school-teacher. The trades followed by Jews are: carpenter, laundry, printer, and tailor.

Fort Smith, the community next in size, is considerably smaller than Little Rock or Pine Bluff. Although there were Jews here as early as 1845, it was not till much later that there were enough to form a congregation. The earliest settler that can be traced was Edward Czarnickow, who came to Fort Smith from Posen in 1842. He was followed by Morris Price (1843), Michael Charles (1844), and his brother, Louis Czarnickow, and Leopold Loewenthal (1845). From 1845 to 1865 several business houses were established, and the greater part of the business done was carried on with the Indians that flocked to Fort Smith.

Fort Smith.

The first organization was the Cemetery Association. It was established in 1871, and the next year it purchased a plot for a cemetery. Louis Tilles was president. The Hebrew Ladies' Benevolent Society was also organized in that year. From its inception it has been a great power for good; relieving the poor, and contributing generously to the building of the temple. In 1890, through the efforts of Rabbi Messing of St. Louis, a congregation, consisting of about 25 members, was formed. A. Traugott was appointed minister. With the aid of the Ladies' Benevolent Society a lot was bought and a temple erected. In 1895 Traugott retired and was succeeded in 1896 by Max Moses. During the ministry of the latter the debt on the temple was almost entirely liquidated. In 1898 Moses was succeeded by Max C. Currick, who served till the end of 1901. The membership has greatly increased, there being now (1902) 44 full members and 25 associate members; of these about 10 live in neighboring towns. The Sabbath-school, which has 40 pupils and 3 teachers, is in a most prosperous condition. Besides the organizations mentioned, there are the Progress Club (social), with 40 members (1899); and a local lodge of the I. O. B. B. (1879), at one time very prosperous, the membership of which has fallen from 30 to 7.

The total population of Fort Smith is estimated at 20,000, of whom 230 are Jews. The only trades pursued are: tailor, cutter, photographer, and upholsterer.

Van Buren, a suburb of Fort Smith, contains a few Jewish families, most of whom are members of the Fort Smith congregation.

Hot Springs has a Jewish population of 170 in 10,000. There have been Jews in Hot Springs since 1856, when Jacob Kempner came there from Cracow, Galicia. The congregation was organized in 1878. F. L. Rosenthal was the first rabbi, and was succeeded by the present incumbent, Louis Schreiber. On account of the large numbers of sick poor that flock to Hot Springs, the demand upon the community is very heavy; and to meet it the Society for the Relief of the Sick Poor was organized in 1899.

Hot Springs.

The first Jewish settler in Jonesboro was Morris Berger, who arrived in 1882. In 1897 there were enough Jews to form a congregation. In September of that year Rabbi Isaac Rubenstein was called to the ministry. Through his untiring efforts the temple was completed, and was dedicated on Jan. 2, 1898. He died in Jan., 1899. In August of the same year Adolph Marx began his ministry, and served until 1900, when he was succeeded by J. Ellinger. The total population of Jonesboro is 5,000, of whom 125 are Jews. Both in Hot Springs and Jonesboro the only trades pursued by Jews are those of tailor and shoemaker.

Jonesboro, Texarkana, Helena, Camden.

Texarkana, Helena, and Camden have Jewish communities of about the same size, numbering each between 100 and 140. None of them has either a permanent rabbi or regular services; but they all have services during the autumn holidays, generally conducted by a student of the Hebrew Union College. The oldest of these communities is Helena, its congregation having been organized as far back as 1869. It had permanent rabbis until 1887. They were: A. Meyer (1880–1881), L. Weiss (1882–1884), A. M. Block (1885), and A. Gustmann (1886–1887). Abraham Brill served as rabbi from 1900 till 1901. Each of these communities has a social club, a society for the relief of the poor, a literary society, and a local lodge of the I. O. B. B.

Scattered through the remainder of the state, in the towns of Brinkley, Batesville, Conway, Ozark, Paragould, Malvern, Newport, Paris, Fayetteville, Searcy, and Dardanelle, there are some four or five hundred Jews. They are in no greater groups than five families to a town; with the exception of Newport and Conway, which have each about 55 Jews.

A. M. C. C.

ARKITE(S): Ancient people of northwestern Palestine. In Gen. x. 17, I Chron. i. 15, the Arkite (הערקי) is mentioned as a son of Canaan and opens the series of the chief Phenician cities. The city of Arka, from which the name is derived, is the modern ruin Tell 'Arka in the Lebanon, northeast of Tripolis, on a brook called River of 'Arka (not the Sabbatical River of Josephus!). The city occurs in Egyptian inscriptions, about 1500 B.C., as *'(I)rkan(a)tu* (W. M. Müller, "Asien und Europa," p. 247); in the Amarna Letters (122 *et seq.*) as Irgata, Irganatu. The Assyrians mention Irkanat as hostile under Shalmaneser II.; Tiglath-pileser III. subjected Arka (Delitzsch, "Paradies," pp. 272, 284; Schrader, "Cuneiform Inscriptions and the Old Testament," i. 87, 246). In Roman times Arka (Arkē, etc.) was an important town, called Caesarea Libani. It was a Roman colony and famous for the cult of Venus Arcitis (*Macrobius*). As a fortress it played a prominent part in the Crusades.

The strange form *Ariki* in the Septuagint, in Josephus, and in the Samaritan text is not intelligible.

J. JR. W. M. M.

ARKOVY, JOSEPH: Professor of clinical dentistry at the University of Budapest; born in Budapest, February 8, 1851. He graduated in 1876 from the university of his native city, and then went to London, where for several years he practised in the German Hospital. In 1881 he established a clinical hospital at Budapest, which was amalgamated in 1890 with the general clinics as the "Department of Dentistry." Arkovy is the pioneer of scientific dentistry in Hungary, and the author of several works on the subject, the more important of which are: "A Fogak Gondozása" (1881); "A Fogbél és Gyökhártya Bántalmak" (1884); and "Diagnostic der Zahnkrankheiten" (1885). He has also published several essays in Hungarian, German, and English dental journals. Arkovy has been baptized.

ARLES (Latin *Arelas* or *Arelate*, Hebrew ארלים. ארלי. ארלד. ארלדי. ארלאדי. ארלא. ארלדי. ארלך. ארלב. אורלאך): City of France, in the department of Bouches du Rhône; ancient capital of Provence. The date of the settlement of the Jews in Arles is lost in antiquity. According to a legend, the emperor Vespasian placed Jews on three vessels, which were abandoned by their captains in the open sea. One of these came to Arles, another landed at Bordeaux, and the third reached Lyons ("Siddur," Roedelheim, 1868, ed. Baer, p. 112).

Early Settlement.

This legend makes it probable that there were Jews in Arles during the first centuries of the common era. But the first official document concerning them dates from 425. In that year the emperor Valentinian III. addressed to the pretor of Gaul, and to Patrocius, bishop of Arles, a decree, enjoining them to forbid Jews and heathens to take up the career of arms, to enter the magistracy, or to possess Christian slaves (Papon, "Histoire Générale de Provence," i. ii.). These restrictions, however, were not carried out, or, at any rate, did not last long; for some years later the bishopric of Arles was occupied by Saint Hilary (429-449), who cherished the most kindly feelings toward Jews in general, and especially toward those of Arles.

In 476 the Roman dominion in Gaul came to an end, and Provence fell into the hands of the Visigoths. Euric conquered Arles, where he settled for a long time. So long as the Visigoths remained attached to Arianism, the Jews enjoyed all civic rights. In 508, when Arles was besieged by the Franks and Burgundians, the Jewish inhabitants valorously defended the city. Arles fell into the hands of Clovis, and Bishop Caesarius was openly accused by the Jews of treason. The bishop's adherents, however, accused a Jewish soldier of having thrown a letter to the besiegers, inviting them to climb the wall at a certain place. The soldier was put to death, and the bishop was acquitted. But this relatively happy state of the Jews did not last. Arles, like most towns of southern France, fell under the dominion of the Merovingian kings, whose fanaticism weighed heavily upon the French Jews. The bishops were encouraged by Chilperic himself (561-584) to attempt the conversion of the Jews; and Virgilius, bishop of Arles, displayed such zeal for the salvation of Jewish souls, that even Pope Gregory the Great thought it necessary to moderate it by a stern rebuke (see S. Gregorii Papæ I. Magni Epistolæ," ii. lxv.).

Under the Carlovingians.

With the death of Dagobert I. (638), on which occasion the power passed into the hands of the Carlovingian dynasty, the state of the French Jews in general considerably improved. The Carlovingian princes efficaciously protected them from the attacks of the clergy. Jewish history has nothing to record of this happy period. It takes up the thread again with the death of Louis le Débonnaire (814-840), when Boso, count of Provence, supported by Pope John VIII. and the clergy, founded the kingdom of Burgundy with Arles for capital. In 850, the Jewish communities of Lyons, Châlon, Macon, and Vienne, to save their children from baptism, sent them to Arles, where Bishop Roland showed himself most favorably disposed toward the Jews. The usurper (879-888), as a token of his gratitude toward the clergy, transferred his rights over the Jews of Arles to Rostaing, archbishop of this town. Boso's son and successor did the same in 921 to Bishop Manasse. This form of transfer was sanctioned later by the German emperors, who acquired rights of suzerainty over Provence. Thus Conrad III., in 1147, granted to the archbishop of Arles, Raymond of Montredon, among other of his regal prerogatives, the jurisdiction over the Jews of his diocese. Frederick Barbarossa in 1154 confirmed and extended these privileges. The archbishop understood how to make the most of the power bestowed upon him, and laid heavy taxes upon the Jews of Arles. And yet their state was tolerably favorable in comparison with that of the Jews of other towns in France, who suffered much from the Crusaders. The archbishop watched carefully over his property, and permitted none to interfere with his Jews.

According to Benjamin of Tudela, the Jewish community of Arles counted at the second half of the twelfth century about 200 families. At their head were six rabbis: Moses, Tobias, Isaiah, Solomon, Abba Mari, and Nathan (see Benjamin of Tudela, "Travels," i. 5). They lived in a separate quarter of the town, and had their synagogue in Rue Neuve (Noble de la Laugière, "Abrégé Chronologique de l'Histoire d'Arles," pp. 301, 312). Their chief trade consisted in selling kermes, which is used in dry-salting. In 1215 Archbishop Michel de Morière regulated the administration of the Jewish community of Arles. On every Feast of Tabernacles the Jews had to elect three members, who were to administer the community. The elected members assumed the title of "rectors," and they were invested by the archbishop with full power. The rectors were responsible for their acts to the archbishop. The first rectors assigned by the archbishop himself were: Durantus (Durant), Salvetus (Salves), and Ferrerius (Ferrier). Trinquetaille, a suburb of Arles, also possessed quite an important community, which disappeared in 1300, when this suburb was united with the town.

Rectors.

The counts of Provence gradually established their power in Arles, owing to the incessant conflicts between the archbishop and the Christian inhabitants of the city; and the state of the Arlesian Jews accordingly changed. Thus Charles I. of Anjou officially deprived the archbishop Bertrand of Malferrat of his rights over the Jews (1276). This circumstance occasioned much suffering among the Jews of Arles; for the clergy could now undisturbedly excite the fanaticism of the Christian inhabitants against them. Charles I. of Anjou, it is true, accorded to all his Jewish subjects every kind of protection; and on one occasion energetically took their part against the Dominican friars, who tried to introduce the Inquisition into Provence. But Charles' successor had not his energy, and the state of the Jews of Arles gradually grew worse. Thus Charles II. (1285-1309), incited by the clergy, issued ordinances, according to which the Jews were forbidden, on pain of a fine of two silver marks, to employ a Christian servant, to hold a public office, or to lay aside the distinguishing yellow badge.

The Fourteenth and Fifteenth Centuries.

The first half of the fourteenth century was a relatively happy epoch for the Jews of Arles under the reign of Robert of Anjou, who cherished kindly feeling toward them; but the second half was just the reverse. The presence of Joanna on the throne of Provence gave scope to the enemies of the Jews, and the most odious restrictions were placed upon them. Jews could not, for instance, testify against a Christian; nor were they allowed to visit the public baths on any day during the week but Friday, which was set aside for their exclusive use; they were forbidden to do work on Sundays; no Jew could embark for Alexandria, and only four could take passage by the same boat for any of the other parts of the Levant.

In 1344 the Jews of Arles had much to suffer from the riots following the blood accusation against Samson of Reylhane. Such riots were repeated every few years, and Louis III. (1417-1434) saw the necessity of appointing special officials for the protection of the Jews. These functionaries, called "conservators," exercised jurisdiction over the Jews and maintained order in the communities. In 1436 the mob attacked the Jews of Arles, and maltreated even the conservators. King Réné (1434-1480) suppressed the functions of these guardians; and by the ordinance of May 18, 1454, granted to the Jews the right to retain their ancient customs. He, likewise authorized them to build a fortress in their quarter, in order to protect themselves from the attacks of the populace during Holy Week (Noble de la Laugière, *ib.* p. 301).

With the death of King Réné (1434-1480) the Jews lost their last protector. On the 13th of Nisan, 5244 (April 8, 1484), when Provence was annexed to France, a band of laborers from Dauphin, Auvergnois, and the mountain districts of Provence, driven by misery, attacked the Jews of Arles, ransacked their houses, killed several women, and compelled about fifty persons to embrace Christianity. These violent outbursts were repeated in the summer of 1485 (S. Kahn, in "Rev. Et. Juives," xxxix. 11 In 1488 the Jews were definitively expelled from Arles, to which place they never returned.

Prominent Jews in Arles.

Among the eminent persons associated with the town of Arles may be mentioned: R. Moses (tenth century); Judah ben Moses of Arles (eleventh century); Judah ben Tobi (twelfth century); Abraham ben David of Posquières, called also Abraham ibn Daud (twelfth century); Samuel ben Judah ibn Tibbon, Meïr and his son Kalonymus, Isaac ben Jacob Cohen, Gerson ben Solomon (thirteenth century); Levi ben Abraham, who took part in the religious controversy of 1303-1306; Joseph Kaspi, Kalonymus ben Kalonymus, Don Coprad of Arles, Kalonymus ben David ben Todros, Isaac ben Joseph Kimḥi, Tanḥum ben Moses (fourteenth century); Nathan ben Nehemia Kaspi, Isaac Nathan ben Kalonymus ben Judah ben Solomon (fifteenth century).

The following physicians of Arles may also be mentioned: Maëstro Bendit, probably identical with Bendich Ahin, physician to Queen Joanna in 1369; Benedit du Canet, one of the physicians of Louis XI.; Maëstro Salves Vidal of Bourrin, and Asher ben Moses of the family Valabrègue (1468).

ARLI, SAMUEL, OF MANTUA. See Samuel of Arles.

ARMAVIR: The old capital of Armenia, on the southeastern slope of Mount Ahaghōz, said to have been founded by King Armais in 1980 B.C. Moses of Chorene (fifth century) has the tradition that when King Vabarshak settled in Armavir (149 B.C.), he built a temple there and asked his favorite, the Jew Shambu Bagarat (Bagratuni), to give up his religion and worship idols. Shambu refused compliance. Moses also relates that when King Tigranes II. (90-36 B.C.), in order to take revenge on Queen

Cleopatra of Egypt, sent an expedition to Palestine, he carried a great number of Jews into captivity, and settled them in Armavir and in Vardges. He goes on to state that later they were transferred from Armavir to Ernanda; and under King Arsaces (85-127) again transferred into the new capital Artashat. When King Sapor II. of Persia invaded Armenia (360-370), he led away from Artashat 30,000 Armenian and 9,000 Jewish families, the latter brought by King Tigranes from Palestine, and then completely destroyed the city.

G. H. R.

ARMENIA: Formerly a kingdom of western Asia, now (1902) apportioned among Russia, Turkey, and Persia. According to the Peshitta and Targum Onkelos, the "Minni" of the Bible (Jer. li. 27) is Armenia—or rather a part of that country, as Ararat is also mentioned (Isa. xxxvii. 38; II Kings xix. 37) as a part of Armenia. The cuneiform inscriptions speak of "Mannai" in the same neighborhood (Schrader, "K. A. T." 2d ed., p. 423). In ancient times the Armenians were in communication with Tyre and other Phenician cities, in which they traded with horses and mules (Ezek. xxvii. 14). The Meshech mentioned in Ezek. xxvii. 13; xxxii. 26; xxxviii. 2, 3; xxxix. 1, and in Ps. cxx. 5, are probably the Moschi (Assyrian, *Mushku* and *Musku*), the inhabitants of the Moschian mountains, between the Black and the Caspian seas, which contained rich copper mines. "Tubal" (Assyrian, *Tabal*), which is always mentioned in connection with Meshech, is the name of the Tibareni, who lived to the southeast of the Black sea. The name of the Moschi is perhaps preserved in Mzchet, the ancient capital of Iberia (Georgia), now a small village and station on the Transcaucasian railroad, about fourteen English miles from Tiflis.

In the Bible.

Descendants of the Jewish captives who were carried away from Jerusalem by Nebuchadnezzar have lived in great numbers in the Parthian and Persian countries adjoining Armenia, and, occupying themselves with agriculture and handicrafts, attained wealth and lived peacefully under the rule of their "Princes of the Diaspora" ("resh galuta"), who were supposed to be descendants of David (M. Brann and D. Chwolson, in the article "Yevrei," in "Entziklopedicheski Slovar," vol. xi., *s.v.*, St. Petersburg, 1894).

Early Settlement.

According to Moses of Chorene (fifth century), King Hratchai (Fiery-Eye) obtained from Nebuchadnezzar, king of Babylon, a distinguished Jewish captive, named Shambat (which name, according to A. Harkavy, is identical with "Sabbat"), whom he loaded with honors. From Shambat descended the family of Bagratuni (or Bagration), which heads the list of the Russian nobility (see Bobrinski, "Dvoryanskie Rody," i. 1, St. Petersburg, 1890). When Vagharshak, brother of the Parthian king Mithridates I., and the founder of the Arshak dynasty, ascended the throne of Armenia 150 B.C., he introduced a new rule in the government of the country, nominating the Jew Bagarat, a descendant of Shambat, hereditary viceroy (*nakharar*, satrap), and coronator (*aspet*); that is, the official charged with the duty of placing the crown on the head of the ruler. This dignity and duty remained with the Bagratuni family until the end of the Arshak dynasty in 433. The coronation, thenceforth, depended for its validity upon the performance of this act (N. O. Emin, "Minutes of the Sixth Session of the Fifth Russian Archeological Congress," held at Tiflis, September, 1881, to be found in "Russische Revue," xviii. 309-311). But according to modern critics (Gatschmid and others) the work of Moses of Chorene is of a later date and his statements are open to question.

During his expedition to Palestine, to take vengeance on Queen Cleopatra of Egypt, Tigranes took a great number of Jews captive. He settled them in Armavir and in the city of Vardgès, on the river Ksakh, which subsequently became a large commercial center. King Arsham, the brother of Tigranes, imprisoned the coronator Hanania, and deprived him of all honors, because he liberated from bondage the Jewish high priest Hyrcanus. Josephus relates that Cleopatra took part in Antony's expedition to Armenia, when Antony subdued Armenia and "sent Artabazes, the son of Tigranes, in bonds, with his children and procurators, to Egypt" ("Ant." xv. 4, § 3). He also states that the Herodian house was related to the royal house of Armenia ("Ant." xviii. 5, § 4; *ib.* xiii. 16, § 4).

Many captive Jews were removed by Arsaces (85-127 of the common era) from the city of Ernanda and settled by him in the capital of Artashat. According to tradition, the family of Amatuni, which was of Jewish origin, came from Oriental Aryan countries to Armenia in the reign of Arsaces.

Carried Away by Persians.

At the end of the reign of Arshak, during his iniquitous persecution, the Persian king Sapor II. (about 360) ordered the destruction of the fortifications surrounding all the Armenian cities, and also commanded that all the Jews and Judaizers of the city of Van, who had been transferred to that city during the reign of Tigranes, should be taken into captivity and settled in Aspahan.

Faustus, the Byzantine (4th century), in describing the invasion of the Persians in the time of King Sapor II. (310-380), relates that the Persians removed from the city of Artashat 40,000 Armenian and 9,000 Jewish families; from Ernandashat 20,000 Armenian and 30,000 Jewish; from Zeragavan 5,000 Armenian and 8,000 Jewish; from Zarishat 14,000 Armenian and 10,000 Jewish; from Van 5,000 Armenian and 18,000 Jewish; and from Nakhichevan 2,000 Armenian and 16,000 Jewish families (360-370). This great mass of Jews, according to Faustus, had originally been transported from Palestine by King Tigranes Arshakuni. While these figures may be exaggerated, there can be hardly any doubt that Armenia at that time possessed a large Jewish population (see Ersch and Gruber, "Encyklopädie," xxvii. 440 *et seq.*; Grätz, "Gesch. der Juden," iv. 422; Jost, "Gesch. der Israel.," ii. 128, Leipsic, 1858; Harkavy, "Vyestnik Russkikh Yevreyev," 1871; "Razsvyet," 1882-83; F. Lazarus, in Brüll's "Jahrbuch," x. 34, 35).

In Jewish Literature. In the Talmud (Yer. Giṭ. vi. 48*a*) a rabbi, Jacob of Armenia, and the Academy of Nisibis are referred to, which goes to prove that Jewish scholarship flourished there. In the second century Jewish prisoners of war were brought from Armenia to Antiochia, and were ransomed by the Jews there (Yeb. 45*a*). To the question (Bab. Sanh. 94*a*) whither were the Ten Tribes driven, Mar Zuṭra (third century) answers: "To Africa;" and Rabbi Ḥanina: "To the Slug [סלֹג] mountains." Africa is said to be Iberia (Georgia), and Slug may be, as Harkavy suggests, Cilici, between Assyria and Armenia (A. Harkavy, "Ha-Yehudim u-Sefat ha-Slavim," pp. 105-109, and his reply to Steinschneider, H. B. ix. 15, 52 in "Roman ob Alexandrye," 1892, p. 32, note).

Armenia is also mentioned in the Midrashim: "God said, if I let them pass through the deserts, they will die of starvation. Therefore I lead them by the road of Armenia, where they will find cities and fortresses and plenty of provisions" (Lam. R. i. 14). See also Cant. R., Amsterdam ed., p. 198.

The Karaite Ibn Yusuf Ya'ḳub al-Ḳirḳisani, in treating of Jewish sects in his Arabic work, written in 937, speaks of the sect founded by Musa al-Za'farani. Musa—known under the name of Abu-Imran of Tiflis—lived in the ninth century. He was born in Bagdad, but settled in the Armenian city of Tiflis, where he found followers, who spread all over Armenia, and under the name of "Tiflisites" (*Tiflisiyim*), still existed in Ḳirḳisani's time. "It is interesting to know, by the way," says Harkavy, "that in the ninth and tenth centuries such a large Jewish community existed in Tiflis, in which a separate sect could be formed" (A. Harkavy, in "Zapiski Vostochnavo Otdyeleniya Imperatorskavo Russkavo Archeologicheskavo Obshchestva," viii. 247; *idem*, in "Voskhod," 1896, ii. 35, 36).

Ḥasdai ben Isaac, in his letters to the king of the Chazars (about 960), says that it was his intention to send his letters by way of Jerusalem, Nisibis, Armenia, and Bardaa, which fact is proof of the existence at that time of Jewish communities in Armenia (see A. Harkavy, "Soobshcheniya o Chazarakh," in "Yevreiskaya Biblioteka," vii. 143-153).

Benjamin of Tudela in his "Travels" (Mas'ot; 1160-1173) says that the power of the Prince of the Exile (Exilarch) extends itself over all the communities in the following countries: Mesopotamia, Persia, all of Armenia, and the country of Kota, near Mt. Ararat. In Nisibis—"a large city, richly watered"—he found a Jewish community of about 1,000 souls. Pethaḥiah of Regensburg, in his "Sibbub ha-'Olam" (1175-1185), narrates that from Chazaria he traversed the land of Togarma, and from Togarma entered into the land of Ararat (Armenia), reaching Nisibis in eight days. In another passage he speaks of large Armenian cities, containing few Jews. "In ancient times the Jewish population [of these cities] was large; but owing to internal strife, their numbers were greatly reduced. They scattered and went to various cities of Babylon, Media, Persia, and Kush."

In 1646 the Spanish adventurer Don Juan Menesses came to Constantinople to offer Turkey the dominion of a whole Armenian province inhabited by Jews (Hammer, "Gesch. des Osmanischen Reiches," v. 392). For modern history, reference may be made to the respective cities and countries.

G. H. R.

—In Rabbinical Literature: According to an old tradition, which has found striking verification in recent discoveries in Assyria, Mt. Ararat (Gen. viii. 4) was held to be an Armenian locality (Targ. Yer. *ad loc.*; Josephus, "Ant." i. 35). The rendering of "Minni" (Jer. li. 27) by "Armenia," as given in the Targum, has also been verified. On the other hand, the identification of Harmonah ("Harmon," Amos iv. 3, R. V.) with Armenia (Targum, *ad loc.*) is probably based upon the false etymology of הרמונה, as if the word were composed of *har* (mountain) and *monah* (מיני) (Armenia).

It is probably on this false etymology that the Haggadah bases the statement that upon their journey from Palestine to the places whither they were deported, the Ten Tribes passed through Armenia. "This," adds the Midrash, "was probably ordained by God in order that the Israelites might pass through cultivated regions where they could easily procure food and drink, and not through the desert, where they would suffer from hunger and thirst" (Lam. R. to I, 14). Apart from Nisibis, which can not well be included in its limits, the Talmudic and Midrashic sources know almost nothing of Armenia. An amora, Jacob Armenaya by name, is mentioned (Yer. Giṭ. vi. 48*a*, below); yet it is doubtful whether the epithet "Armenaya" here really signifies "Armenian." Equally doubtful is the import of the passage (Yeb. 45*a*), where Jewish captives are mentioned as having been transported from Armon to Tiberias. This Armon, contrary to the statements of Rapoport and Neubauer, can not be identical with Armenia.

L. G.

ARMENIAN VERSION OF OLD TESTAMENT.

See Bible Translation.

ARMILUS: In later Jewish eschatology and legend, a king who will arise at the end of time against the Messiah, and will be conquered by him after having brought much distress upon Israel. The origin of this Jewish Antichrist (as he can well be styled in view of his relation to the Messiah) is as much involved in doubt as the different phases of his development, and his relation to the Christian legend and doctrine.

Saadia (born 892; died 942) is the earliest trustworthy authority that speaks of Armilus. He mentions the following as a tradition of the ancients,

Saadia's Tradition of Armilus.

hence of the eighth century at the latest: If the Jews do not prove themselves worthy of Messianic salvation, God will force them to repentance by terrible persecutions. In consequence of these persecutions, a scion of the tribe of Joseph will arise and wrest Jerusalem from the hands of the Edomites, that is, from the Christians; the Arabic text of Landauer, p. 239, has correctly "Jerusalem," and not "Temple," as in the Hebrew translation, which has it owing to an erroneous interpretation of the Arabic "al bait al mukaddas." Thereupon the king, Armilus, will conquer and sack the Holy City, kill the inhabitants together with "the man [Messiah] of the tribe of Joseph," and then begin a general campaign against the Jews, forcing them to flee into the desert, where they will suffer untold misery. When they have been purified by sorrow and pain, the Messiah will appear, wrest Jerusalem from Armilus, slay him, and thereby bring the true salvation.

Armilus in the Apocalyptic Midrashim.

Armilus is for Saadia, or rather for Saadia's sources, nothing more or less than the last powerful anti-Jewish king, the Gog of the prophets under another name (compare "Emunot we-De'ot," ed. Fischel, viii. 152-154; ed. Landauer, pp. 239-241). The same thing is said of Gog that Saadia says of Armilus in "Aggadot Mashiaḥ" in Jellinek, "B. H." iii. 141; but the rôle ascribed there to the Messiah, son of Joseph, shows that this Midrash is not Saadia's source.

Armilus and Satan.

However, an entirely different shape and meaning are given to Armilus in some smaller Midrashim dealing with the "latter days." In the "Midrash wa-Yosha'"—which comes nearest to Saadia's conception—Armilus is taken to be Gog's successor; but is represented as a monstrosity, bald-headed, with one large and one small eye, deaf in the right ear and maimed in the right arm, while the left arm is two and one-half ells long. His battle with and his defeat by the Messiah, son of Joseph, correspond with Saadia's account (Jellinek, "B. H." i. 56; Targ. on Isa. xi. 4; but see Steinschneider, "Hebr. Bibl." xiv. 45). A similar description of Armilus is found in "Nistarot R. Simon b. Yoḥai" (Secrets of Simon b. Yoḥai), a pseudepigraph, the latest redaction of which can not antedate the first crusade (Steinschneider, "Z. D. M. G." xxviii. 646). (See Apocalyptic Literature, Neo-Hebraic, 10.) The statement found there that Armilus is the son of Satan and of a stone (Jellinek, "B. H." iii. 80) is an interpolation from another source, written in Aramaic, while the book itself is in Hebrew; nor is this curious origin of Armilus mentioned anywhere else in the book. An entirely different conception of Armilus is found in the pseudepigraphs: "Zerubbabel," "Otot ha-Mashiaḥ" (Signs of the Messiah) and "Tefillat R. Simon b. Yoḥai" (Prayer of R. Simon b. Yoḥai). Aside from a few unimportant variants in these three versions—the Zerubbabel seems to show the earlier, shorter form—they agree in the following description of Armilus: In Rome there is a splendid marble statue of a beautiful girl which God Himself made in the beginning of the world (מששת ימי בראשית), according to the version given in "Tefillat R. Simon." Through sexual intercourse of evil men, or even of Satan himself, with this statue, a terrible creature, in human form was produced, whose dimensions as well as shape were equally monstrous. This creature, Armilus by name—the Gentiles called him Antichrist, says the "Otot"—will set himself up as Messiah, even as God Himself, being recognized as such by the sons of Esau, that is, by the Christians. He agrees to accept as his doctrine the Gospels, which the Christians lay before him ("B. H." ii. 60; *tiflatam*—not *tefillotam*—signifying something offensive, morally as well as religiously, whereas *tefillotam* signifies their prayers). Then he turns to the Jews, especially to their leader, Nehemiah b. Ḥushiel, saying, "Bring your Torah and acknowledge that I am God." Nehemiah and his followers open the Torah and read to Armilus, "I am the Lord, thy God; thou shalt have no other gods before me." But as Armilus nevertheless insists upon being recognized as God by the Jews, and they cry out to him that he is Satan and not God, a bitter battle breaks out between Armilus with an immense heathen army on the one side, and Nehemiah with 30,000 Jewish heroes on the other. This unequal combat ends in the death of the "Ephraimite Messiah" and a million Jews. After an interval of forty-five days, during which the Jews unworthy of the Messianic glory die out (compare the similar statement in reference to the liberation from Egypt found already in the old Haggadah, Mekilta, Beshallaḥ, i., ed. Weiss, p. 29), and the remnant have shown their true worth in sore trials and bitter sufferings in the desert whither they will have fled, Michael will blow his trumpet; then the Messiah and Elijah will appear, gather the dispersed of Israel, and proceed to Jerusalem. Armilus, inflamed against the Jews, will march against the Messiah. But now God Himself will war against Armilus and his army and destroy them; or the Messiah, as one version has it, will slay Armilus by the breath of his mouth (Jellinek, "B. H." ii. 51, line 3, where the text is probably corrupt; compare II Thess. ii. 8). According to a Roman legend (see Eusebius, "Chronicon," I. xlvi. 7, ed. Migne, pp. 283, 284, and Book II. *anno* 1145), it was an Armilus who presumed to war with Jupiter, and was slain by the latter's thunderbolt. In the Armilus legend the Messiah takes the place of Jupiter, and here also Armilus is slain by fire and sulphur from heaven (Jellinek, "B. H." ii. 62).

The Later Armilus Legend.

The alleged descent of Armilus from a stone is a Jewish version of the wide-spread legend connected with the name of Virgil and referring to a statue that became a courtezan among the Romans (Güdemann, "Gesch. des Erziehungswesens . . . der Juden in Italien," pp. 221 *et seq.*, 332, 333). It is indeed not improbable that this borrowing from the Virgil legend was due to Christian influence. The antithesis, Christ and Antichrist, which is the distinctive feature in the Christian legend of the Antichrist, led already in the tenth century to the opinion that Antichrist also would be the offspring of a virgin and, of course, of Satan (see Bousset, "Antichrist," p. 92, and the description of St. Hildegarde, lib. iii., visio xi., ed. Migne, pp. 716 *et seq.*).

As to the origin of the name Armilus, whether it is derived from Romulus, the founder of Rome, or from Ahriman, the evil principle of the Persians, Arimainyus = Armalgus (Targ. Isa. xi. 4 and Targ. Yer. Deut. xxxiv. 3), see AHRIMAN, ANTICHRIST, and ROMULUS.

ARMLEDER PERSECUTIONS: A series of persecutions by a band of marauders who in 1338-39 massacred a large number of Jews in Alsace. In 1336 a nobleman of Franconia, pretending that an angel had commissioned him to do so, gathered a band of desperadoes and pillaged and murdered the Jews. These assassins styled themselves "Judenschläger" (Jewbeaters). Somewhat later John Zimberlin, an innkeeper of Upper Alsace, followed the example set in Franconia. He tied pieces of leather round his arms and bade his followers do the same. This gave rise to the name "Armleder." Their leader was called "King Armleder," and under him they marched through Alsace, killing many Jews.

Those who were fortunate enough to escape fled to Colmar, where the citizens protected them. Armleder, whom success had intoxicated, besieged the city and devastated the surrounding country. The citizens asked Emperor Louis of Bavaria to assist them. When Armleder heard that the imperial troops were approaching, he fled to France. No sooner had the emperor left the country, however, than Armleder again appeared.

The lords of Alsace, under the leadership of the bishop of Strasburg, formed an alliance (May 17, 1338), the members of which pledged themselves to pursue Armleder and fifteen of his most prominent followers. But it was very difficult to attack Armleder's adherents; and in the following year a knight, Rudolph of Andlau, made an agreement with "King Armleder," granting an amnesty to him and his followers, provided that for the next ten years they would refrain from molesting the Jews. Though attacks ceased for a short time, the Jews, during the ten years of armistice, never lived in security; and in 1349 there occurred the terrible massacres on the occasion of the BLACK DEATH, to which the attacks of Armleder had been the prelude.

BIBLIOGRAPHY: Scheid, *Histoire des Juifs d'Alsace*, Paris, 1887, pp. 23 *et seq.*; Schudt, *Jüdische Merkwürdigkeiten*, Frankfort-on-the-Main, i. 455, 1714, whom Grätz (*Gesch. der Juden*, 3d ed., vii. 326) follows, is very inaccurate.

G. D.

ARMORY: A word occurring only three times in the A. V. In Jer. l. 25 it is used figuratively ("The Lord hath opened his armory and brought forth the weapons of his indignation"). In Song of Songs iv. 4 reference is made to a tower of David, built for an Armory, on the walls of which there "hang a thousand bucklers, all shields of mighty men." In Neh. iii. 19 Ezer, son of Jeshua, undertook the repair of the city wall opposite the entrance to the "armory at the turning" (of the wall). Thus there seem to have been one or more buildings devoted to the storage of arms, as it is mentioned in I Kings x. 17 that Solomon kept five hundred golden shields "in the house of the forest of Lebanon."

ARMS. See WEAPONS.

ARMY.—Biblical Data: This term, here used to designate the defensive force of Israel at all stages of the nation's history, embraces widely dissimilar aggregations of men. The Hebrew vocabulary scarcely indicates these distinctions fully. Thus, the most comprehensive Hebrew term is חיל ("force" or "forces"); צבא, a much more common designation, is properly "an army in the field"; while מערכה means "an army in order of battle." As the character of any fighting body depends upon its composition and organization, the subject will here be treated from this point of view. The decisive historical dividing-point is the institution of a standing Army in the time of King David, an epoch coeval with the establishment of the kingdom.

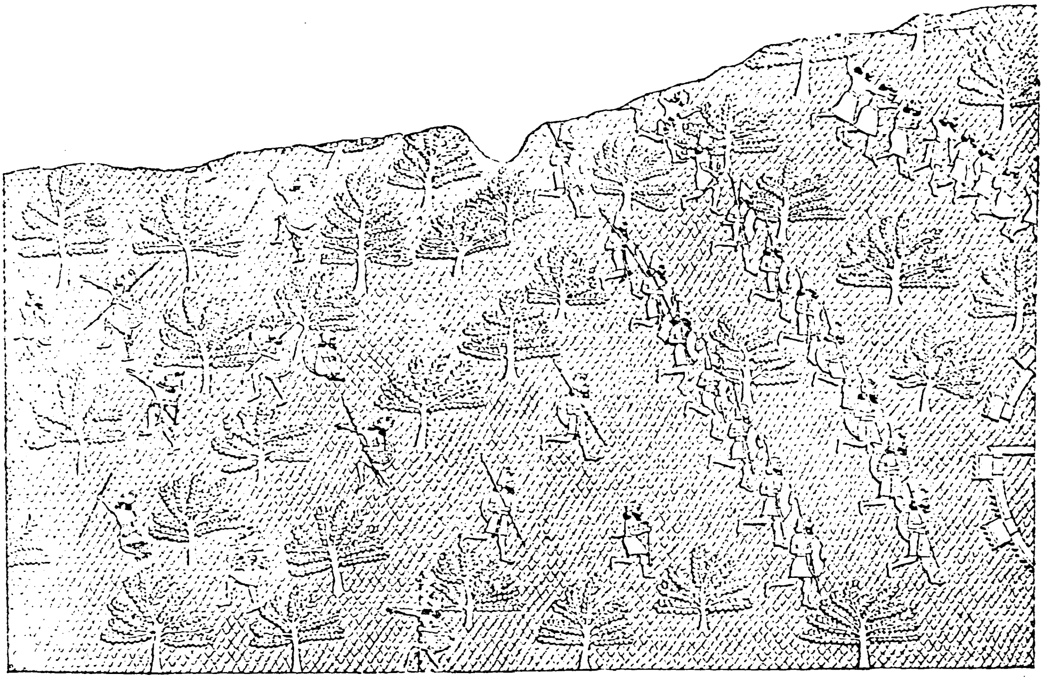
In Tribal Days.

In the old tribal days levies were made by the chief of each clan, to be employed either in the general cause or in the interests of the clan itself. As typical of this custom may be cited the levy of Abraham, mentioned in Gen. xiv. Abraham here musters his own well-tried servants—hereditary retainers, not chattels of questionable loyalty—and these constitute a military body prepared to operate in the maneuvers of the brief campaign (xiv. 14). In verse 24 of the same chapter a suggestion is given of the readiness with which kindred or friendly clans fell in with a movement to help the general cause. The "army" here consists of all reliable, able-bodied men, who possess no other discipline than that acquired in the vicissitudes of semi-nomadic life. The same conditions apply to the deeds recorded in Gen. xxxiv. 25, xlviii. 22, and virtually remain unchanged during the desert wanderings of the tribes. The encounter with Amalek (Ex. xvii. 8-13) is an example of these frequent conflicts with alien peoples, which are also vividly exemplified in the gradual subjugation of the Canaanites by the Hebrew confederacy, detailed in Judges i. 1-ii. 5, where the attack is described as being made either by single clans or by a combination of tribes. Here the fighters include all those capable of bearing arms, the division of forces depending solely upon the exigencies of the occasion.

After the Settlement in Canaan.

A slightly different system prevailed after the settlement had been fairly established. The necessity of defending territory once acquired led to the formation of a kind of irregular militia in each considerable district. Combinations for the common defense against external and internal enemies naturally followed; and these gradually led to the formation of an elementary

Army organization, in which the unit consisted of a military body or company (גדוד) of no fixed numerical standard, but accustomed to act together and to obey a popular leader. The existence of such companies is already indicated in the Song of Deborah (Judges v. 14, Hebr.), where it is said: "From Machir came down the troop-leaders [A. V. "governors"], and from Zebulon those marching with the baton of the captain"; the captain here being "the writer" (see A. V.), or the man who kept the muster-roll of his troop—a duty later delegated to a special officer (Jer. lii. 25). Such companies consisted of volunteers, many of whom in course of time took up the business as a permanent occupation. In periods of national or local danger these men were of great service to their people; but when no great occasion demanded their interference, they were apt to become a species of licensed freebooters. Both Jephthah and Samson seem to have been typical leaders of such free-lances, whose capacity for mischief, in the event of a wide-spread discontent with the existing order of things, was exemplified by David's band of outlaws.



An Assyrian Army Marching Through a Wooded Region.

(From Layard, "Nineveh.")

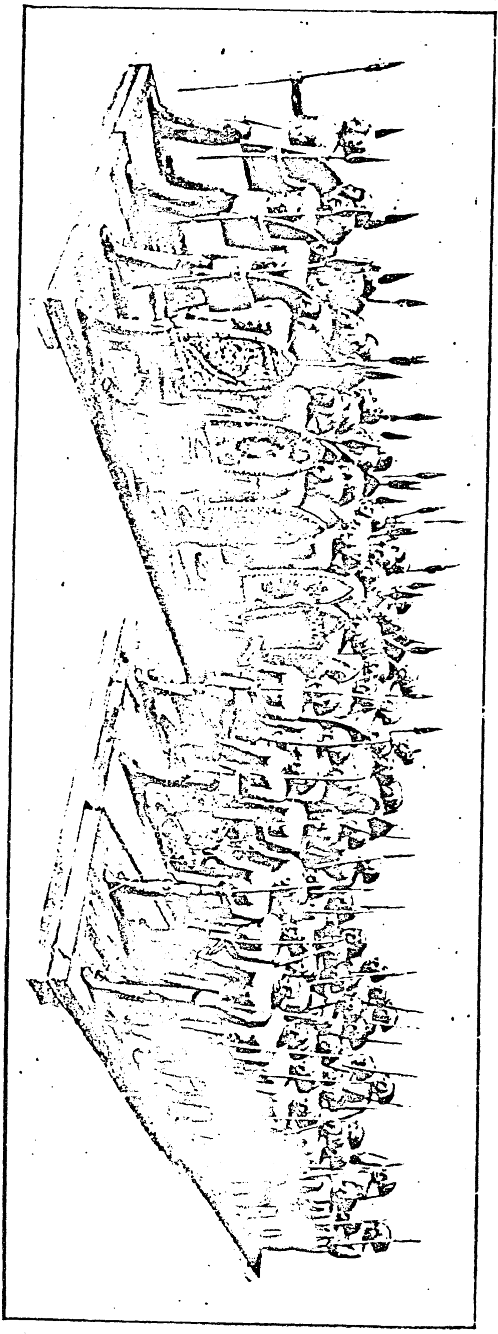
Elements for a General Levy.

While some of the ruder and rougher of the judges thus became leaders of semi-professional warriors, an entirely different order of soldiery was being developed in a more regular way. As the clan and family chiefs of the earlier days put their men into the field and led them, so in more settled times the great landholders furnished their respective quotas for the common defense. Thus the term גבור חיל (*gibbor ḥayil*) in some cases came to signify both "man of valor" and "man of property"—that is to say, the landed proprietor furnished his contingent of fighting-men in proportion to his wealth; and his military reputation ordinarily depended upon such display of force. This was one of the reasons why Gideon, the most stable of the judges, was chosen to take the lead against the Midianites. In the later period of the Judges there were three elements in a general levy: (1) casual recruits, a more or less irresponsible body; (2) the freemen of the family or household, with their bondmen; (3) irregular troopers of the guerrilla order. Gideon's sifting process on the march (Judges vii. 2 *et seq.*) illustrates the various grades of quality in his motley Army.

Reign of Saul.

The reign of Saul constituted a stage of transition in the military as well as in all the other affairs of Israel. During this régime the Philistines, the most military people of Palestine, had become a constant menace to the Hebrews, and had thereby revealed the imperative necessity both of a stable government and of a standing Army for the national defense. It was merely an unclassified levy that Saul had with difficulty raised against the Ammonites (I Sam. xi. 7 *et seq.*). After the repulse of those tribes, however, he dismissed the greater part of the host, retaining 3,000 to hold points of vantage in Bethel and Gibeah against the Philistines (I Sam. xiii. 2 *et seq.*). Naturally, the king and the crown prince Jonathan divided the command between them; the former selecting for his special service any man distinguished for personal prowess (I Sam.

xiv. 52). But the changing fortunes of the war and the king's mental troubles precluded any further development. Thus, while a standing force was recognized as necessary, the soldier was still any one capable of bearing arms. Such a militia, naturally, provided its own supplies (compare I Sam. xvii. 17), and received no pay.



COMPANY OF EGYPTIAN SOLDIERS. FIGURES IN THE CAIRO MUSEUM.
(From Steindorff, "Blütezeit des Pharaonenreiches.")

Reign of David.

The decisive advance made by David consisted in his having at the capital, and indeed as an appendage to the court, a small body of chosen troops who were strictly professionals, were equipped with a regular commissariat, and received fixed wages (compare I Kings iv. 27). These were not chosen, like the old levies, by tribal representation, but were recruited from the best available sources. Some had doubtless been members of David's former band of outlaws, while others were Philistines; and it was from the latter that the whole body derived its name, הכרתי והפלתי ("Cherethites and Pelethites"). At the same time, the general militia was still maintained and extended (II Sam. xviii. 1; II Kings i. 9; xi. 4, 19). Upon the death of David's old general Joab, the captain of the guard Benaiah became commander of the whole Army; and it may be assumed that thenceforth the two positions were usually vested in the same officer.

Decline Under Solomon; Cavalry.

All hopes that Israel would continue to be a great military nation came to an end through the misgovernment in the later years of Solomon, and the schism which it occasioned; nor had the Army under David attained to an equality with the respective military forces of other leading Eastern nations of the period. In David's time, cavalry formed no part of the service. Introduced by Solomon, it had to be abandoned by the immediate successors of that ruler. Both horses and chariots, however, were employed during and after the Syrian wars. According to the report of Shalmaneser II. of Assyria, who fought against him in 854 B.C., Ahab had 2,000 chariots; and the decline of the military power of northern Israel was marked by the reduction to which the successors of the latter had to submit (II Kings vii. 13, xiii. 7). Thus, Hezekiah of Judah was ridiculed by an Assyrian legate because of his lack of war-horses and riders (II Kings xviii. 23). All branches of the service were most fully developed in the military era of Jeroboam II. and Uzziah (Azariah). It is certain that the permanent maintenance of a large cavalry force was made difficult for Israel by reason of the rugged nature of the ground. Moreover, the Prophets opposed cavalry as a foreign innovation, and as tending to encourage relations with Egypt, the country from which most of the war-horses were furnished (Isa. xxxi. 1); and the service was further condemned as fostering a reliance upon mere human force (compare Ps. xx. 7, xxxiii. 7, cxlvii. 10).

Bibliography: Apart from the data furnished by the Bible itself, some casual information is given in Josephus (*Ant.*). The inscriptional accounts of Assyrian wars in Syria and Palestine afford a few details. For the army operations of antiquity in the Orient, the Egyptian and the Assyrian monumental sculptures—especially the latter—are of high value. Special treatises are: Gleichgross, *De Re Militari Hebræorum*, 1690; Zachariae, under the same title, 1735, and the articles in the Bible dictionaries, among the best of which is that of Bennett in the *Encyc. Biblica*. See also Spitzer, *Das Heer- und Wehr-Gesetz der Alten Israeliten*, 2d ed., 1879; Nowack, *Hebräische Archäologie*, i. 359 *et seq.*; F. Schwally, *Semitische Kriegsalterthümer*, vol. i., Leipsic, 1901.

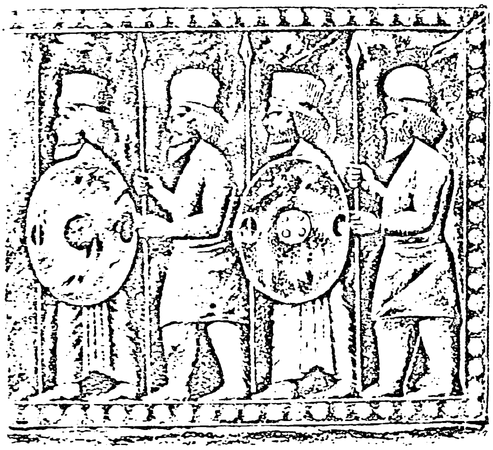
——**Ancient and Medieval:** Of peaceful disposition, the Jews at all times have shown bravery in war. As the terms for virtue among the Greeks and Romans, *ἀρετή* and *virtus* respectively, are derived from military prowess, so the nobleman among the He-

Spirit of Bravery.

brews is called "ish hayil" (the man of [military] strength; warrior). Abraham, the prototype of the nation, while guided by the words, "Let there be no strife, I pray thee, between me and thee. . . for we are brethren" (Gen. xiii. 8, R. V.), goes courageously to war against the four mighty kings to rescue his nephew, and refuses to take a portion of the spoils after having liberated the land of Sodom (Gen. xiv. 14-23). It fell to Esau's, not to Jacob's, lot to "live by the sword" (Gen. xxvii. 40); yet no sooner did Simeon and Levi, the sons of Jacob, learn of the villainy (not "folly," as in A. V. and R. V.) which Shechem, the son of Hamor, had wrought with regard to their sister Dinah, than they "took each man his sword, and came upon the city boldly, and slew all the males" (Gen. xxxiv.). The Mosaic laws on warfare, which insist that peace should be offered to a city before it be besieged (Deut. xx. 10), are framed on the presumption that faint-heartedness is rare among the people; since the officers are enjoined to issue before the battle the proclamation: "What man is there that is fearful and faint-hearted? let him go and return unto his house lest his brethren's heart faint as well as his heart" (Deut. xx. 8; compare Josephus, "Ant." iv. 8, § 41; Soṭah viii. 1). Indeed, the Song of Deborah echoes the spirit of heroic warfare, while it upbraids the tribes and clans that abode by the sheepfolds and would not come to the help of the Lord against the mighty (Judges v. 8 *et seq.*, 16, 23). Thus the battle of Gideon (*ib.* vii.) was a battle of heroes. So do the feats of Saul (I Sam. xi. 7-11), of Jonathan (*ib.* xiv. 13-15; compare II Sam. i. 22), of David (I Sam. xvii., xviii. 7) and his men (II Sam. xxiii.), and the warlike psalms (Ps. xx., xlviii., lxviii., cx., cxlix.) testify to the value laid on prowess by the Hebrew nation. The religious enthusiasm of the Hasmoneans lent to their patriotism in war still greater intensity, and made of the people a race of heroes (I Macc. iii. 21, iv. 8 *et seq.*, v. 31 *et seq.*, vi. 42).



Persian Foot-Soldiers.

(After Coste and Flandin, "La Perse Ancienne.")

Under the Hasmonean dynasty a regular Army was formed (I Macc. xiv. 32), the soldiers receiving payment. Jews served as mercenaries in the Syrian Army also (I Macc. x. 36). Hyrcanus I. was the earliest to maintain foreign mercenaries (Josephus, "Ant." xiii. 8, § 4); Alexander Jannæus did likewise (Josephus, "B. J." i. 4, § 3).

Fighting on Sabbath.

One of the chief obstacles in Jewish warfare at the beginning of the Hasmonean uprising was that the Jews were prevented from carrying arms on the Sabbath. This exposed them to the peril of being attacked without being able to defend themselves (see I Macc. ii. 38; Josephus, "B. J." i. 7, § 3; ii. 16, § 4; *idem*, "Ant." xviii. 9, § 2); but it was decided that in defense, and in sieges as well, when the warriors were regarded as carrying out special divine ordinances, fighting on the Sabbath day was permitted (I Macc. ii. 41; Sifre, Deut. 204; Shab. 19*a*). Whether arms may be carried on the Sabbath as an ornament of the warrior, or not, is a matter of dispute between Eliezer—who stands on the affirmative side—and the other tannaim, who see in weapons of war a necessary evil that the Messianic time, the world's great Sabbath, will do away with (Shab. vi. 4). "Nor did our forefathers," says Josephus ("Contra Ap." i. 12), "betake themselves, as did some others, to robbery; nor did they, in order to gain more wealth, fall into foreign wars, although our country contained many ten thousands of men of courage sufficient for that purpose." Of the heroic valor displayed by the Jews at the siege of Jerusalem, the last three books of Josephus on the wars of the Jews, and the Midrashim, give ample testimony. It filled Titus and his soldiers with admiration. And yet, despite the terrible losses and cruel tortures inflicted upon the nation by the victor, the war spirit did not die out in the Jewish people. Bar Kokba's Army, which tradition places at 200,000 men, performed wonders of heroism (Giṭ. 57*a*; Lam. R. ii. 2; Yer. Ta'anit, iv. 69*a*; Pesiḳ. R. 29, 30 [ed. Friedmann, p. 139*b et seq.*]).

The story of Anilai (Ḥanilai) and Asinai (Ḥasinai), the Jewish robber generals, whose Army filled the lands of Babylonia and Parthia with fear, forms a strange chapter in the history of the Jews of the East (see Josephus, "Ant." xviii. 9, §§ 1-9).

Classical Times.

But not only in their own country did the Jews prove to be brave soldiers. Josephus ("Ant." xi. 8, § 5) records that many Jews enlisted of their own accord in the Army of Alexander the Great, and that Ptolemy I., recognizing their bravery and loyalty, took many Jews and distributed them into garrisons (*ib.* xii. 1). Ptolemy Philometor and his wife Cleopatra committed their whole kingdom to Onias and Dositheus, the two Jewish generals of the whole Army, whose bravery and loyalty were the safeguards of the queen in times of great peril (Josephus, "Contra Ap." ii. 5). Helkias and Ananias, two Jewish generals of Cleopatra, saved her throne from the onslaughts of her own son, Ptolemy Lathyrus (*idem*, "Ant." xiii. 13, § 1).

Seleucus Nicator and Antiochus, his grandson, kings of Syria, received aid from the Jews in their wars, and in recognition endowed them with many privileges of citizenship (*ib.* xii. 3, §§ 1-3). The

Jews aided the Romans, also, in their wars. Especially did Julius Cæsar speak in terms of high praise of the valor displayed by the fifteen hundred Jewish soldiers engaged in his wars against Egypt and against Mithridates of Pergamus; and in recognition of their services he conferred especial favors on Hyrcanus, the high priest, and on the Jewish people (*ib.* xiv. 8–10). Mark Antony received assistance from Jewish soldiers, Herod having formed an Army of five Jewish and five Roman cohorts (*ib.* xiv. 15, § 3). On the other hand, Mark Antony, at the request of Hyrcanus, exempted the Jews from service in the armies because they were not allowed to carry arms or to travel on the Sabbath (*ib.* xiv. 10, §§ 12, 13).

It was reserved for the Christian emperor Honorias to issue (418) a decree—renewed by Theodosius, by Clotaire II., and by the Byzantine emperors—forbidding Jews and Samaritans to enlist in the Roman army (Codex Theodosianus, xvi. 1. 8. 16), probably in view of their Sabbath observance, as Dohm ("Die Bürgerliche Verbesserung der Juden," i. 151) suggested; but, as he contended (*ib.* p. 154), this does not afford sufficient reason (see also "Protocolle der Dritten Rabbiner-Versammlung zu Breslau," 1846, p. 196; "Juden-Emancipation," in Ersch and Gruber, "Encyklopädie," p. 297, note 49).

Babylonia.

Of the military spirit of the Jews of Babylonia the following fact bears testimony: Twelve thousand Jews had fought in defense of Cæsarea Mazaca against Sapor I., only to be defeated and massacred; and when the news reached Samuel, the great teacher of Nehardea and friend of the new dynasty, he would not show signs of mourning, as his patriotic feeling was stronger than his love for his coreligionists (M. K. 26*a*).

Arabia.

Of the warlike spirit of the Jews in Arabia, the story of Dhu-Nowas and the chivalry of SAMAU'AL IBN-ADIYA are by themselves sufficient testimony. When Mohammed came to Medina he found the whole country full of Jews ready to resist him with arms in hand, and he was anxious to make them his allies. They refused. But though they were noted for being brave and sturdy fighters, they lacked strategic skill and organization. First the Banu Ḳainuḳa were surrounded, captured, and allowed to leave the country for the Holy Land; then the Banu Nadhir, part of whom were massacred, the rest emigrating also to Palestine; lastly the Jews of Khaibar, after having fought like lions, surrendered and emigrated to Babylonia (628). "The sword which the Hasmoneans had wielded in defense of their religion, and which was in turn used by the Zealots and the Arabian Jews [in the cause of freedom], was wrung from the hands of the last Jewish heroes of Khaibar" (Graetz, "History of the Jews," iii. 83). Benjamin of Tudela (twelfth century) found an independent Jewish warrior tribe living in the highlands of Khorasan near Nisapur, numbering many thousand families, regarding themselves as descendants of Dan, Zebulun, Asher, and Naphtali, under a Jewish prince of the name of Joseph Amarkala ha-Levi (Benjamin of Tudela, ed. Asher, pp. 83 *et seq.*). Another independent Jewish tribe bent upon warlike expeditions is mentioned by Benjamin as living in the district of Tehama in Yemen (*ib.* p. 70).

In Southern Europe.

When the city of Naples was besieged in 536 by Belisarius, the general of the emperor Justinian, the Jews, besides supplying the city with all necessaries during the siege, fought so bravely in defense of the part of the city nearest the sea, that the enemy did not venture to attack that quarter; and when Belisarius at last forced his entrance, they still offered heroic resistance, according to the contemporary testimony of Procopius ("De Bello Gothicorum," i. 9; Graetz, "History of the Jews," iii. 31 *et seq.*; Güdemann, "Gesch. des Erziehungswesens der Juden in Italien," p. 2). When Arles was besieged by the generals of Theodoric (508), the Jews, loyal and grateful to Clovis, their king, took an active part in the defense of the city (Grätz, "Gesch. der Juden," v. 56; Eng. transl., iii. 36).

In Spain.

Jewish soldiers assisted Childeric in his war against Wamba. The Moors are said to have entrusted to Jews the guardianship of the conquered cities of Spain. Under King Alfonso VI. of Castile, in 1068, 40,000 Jews fought against Yusuf ibn Teshufin in the battle of Zalaka, with such heroism that the battle-field was covered with their bodies. Under Alfonso VIII. (1166–1214) there were many warriors among the wealthy and cultured Jews of Toledo that fought bravely against the Moors (Graetz, "History of the Jews," iii. 386; German ed., vi. 229). Alfonso X., called "the Wise," while infante, had many Jews in his army; and in the capture of Seville (1298) the Jewish warriors distinguished themselves so highly that, in compensation for their services, Alfonso allotted to them certain lands for the formation of a Jewish village. He also transferred to them three mosques which they turned into synagogues. The cruel fanaticism of the Moors had alienated the Jews, who were now won over to the Christians by the tolerant rule of the latter (Graetz, *ib.* iii. 592; German ed., vii. 136). Jews fought bravely at the side of Pedro the Cruel in defense of the cities of Toledo, Briviesca, and Burgos, against Henry de Trastamara, his brother, and had to pay for their loyalty to their king either with their lives and the lives of their undefended wives and children, or, as the Jews of Burgos had to do, with a heavy ransom to the relentless victor (Graetz, *ib.* iv. 123 *et seq.*; German ed., vii. 424).

According to Brisch ("Gesch. der Juden in Cöln," i. 77), the Jews of Cologne carried arms. They were enjoined to take active part in the military service and to defend the city in case of war ("Cölner Geschichtsquellen," ii. 256, 311); the rabbis on the Rhine permitted the Jews to do so in case of siege. When excommunicated by Pope Gregory VII., Henry IV. was deserted by princes and priests, states and cities, but the Jews of Worms in common with their Christian fellow citizens stood by him and defended him with arms in hand. The emperor showed his recognition in the shape of decrees releasing them from paying toll in Frankfort-on-the-Main, Dortmund, Nuremberg, and other centers of commerce (Grätz, "Gesch. der Juden," vi. 88). Jews defended the city of Prague against the Swedes in the Thirty Years' War (Grätz, *ib.* x. 50; English ed., iv. 707); and in 1686, as loyal subjects of Turkey, they defended the city of Ofen against the victorious armies of Austria (Grätz, *ib.* x. 286). Under Boleslav II., in the tenth century, the Jews fought side by side with their Bohemian fellow-citizens against the pagan Slavs (see Löw, in "Ben Chananja," 1866, p. 348). The Jews of Worms and of Prague were practised in bearing arms. On the other hand, the Jews of Angevin England were prohibited from possessing arms by the Assize of Arms, 1181 (Jacobs, "Jews of Angevin England," p. 75).

Germany and Austria.

Under Ferdinand II. and Maria Theresa, Jews served in the Austrian Army (Wolf, in "Ben Chananja," 1862, p. 61). In 1742–43 Rabbi Jonathan Eibeschütz, in common with other rabbis of Prague, allowed the Jews to fight in defense of the fortifications of the city of Prague against the attacks of the French Army, he himself standing among them to cheer and encourage them. This is stated in a memorandum of the Austrian Jews, dated 1790, where many rabbinical arguments are given in favor of performing military service on the Sabbath in behalf of their country (Wolf, *ib.* 1862, pp. 62 *et seq.*).

Dohm ("Bürgerliche Verbesserung der Juden," ii. 230) relates that in the naval battle between the British and the Dutch, Aug. 15, 1781, a Dutch Jew fought with such heroism that many other Jews were induced to follow his example and join the navy, and the chief rabbi of Amsterdam not only gave them his permission and his blessing, but excused them from the observance of the Sabbath and the dietary laws as far as their military duties would interfere with it. Jewish soldiers in the Dutch navy excelled in courage and zeal in the conquest of Brazil (Kohut, in Simon Wolf's "The American Jew as Patriot, Soldier, and Citizen," p. 443; Graetz, "History of the Jews," iv. 693). Jews, encouraged by their rabbi, Isaac Aboab, defended the fort of Recife, near Pernambuco, against the Portuguese with such remarkable skill and heroism as to evoke the praise and gratitude of the government; for, without their dauntless resistance, the garrison would have been compelled to surrender (Graetz, *l.c.* pp. 693, 694). When the French fleet, under Admiral Cassard, made a sudden attack on the Jewish colony of Surinam in 1689, it was met with brave resistance; and, despite the fact that it was a Sabbath day, the Jews fought valiantly for their colony (Kohut, *l.c.* p. 460). Of this bravery they gave proof a second time, in 1712, when Cassard again attacked Surinam, on which occasion one of the Pintos defended the fort single-handed until, overwhelmed by superior force, he was compelled to surrender (Kohut, *l.c.* pp. 454–61). Especially did David Nasi distinguish himself by his heroic valor and skilful generalship. He died in 1743 on the battle-field, in his thirty-first campaign against the Maroons (Kohut, *l.c.* p. 466).

The Jews of Poland were, like their fellow-citizens, enjoined to do military service. In Lithuania and the Ukraine they fought alongside their Christian brethren. In the rebellion of the Cossacks (1648–1653) the Jews fought with the noblemen against the rebels. Among those that fell at Ostrog and Zaslav, under Marshal Firley, there were many hundreds of Jewish soldiers. John III. Sobieski, by a decree of 1679, exempted the Jews from military service; nevertheless, they fought in times of peril for their country. When, in 1794, the population of Warsaw rose in arms, Jews were among them; and a whole Jewish regiment fought under Colonel Berko near Praga against Suwarow (Sternberg, "Gesch. der Juden in Polen," pp. 54, 55; Ph. Bloch, in "Oesterreichische Wochenschrift," 1900, p. 280 (see Russian Army, below).

Poland.

G. K.

——**Modern:** There is no record of Jews serving in the mercenary forces employed by the Continental monarchs after the decay of the feudal system and before the introduction of national armies and navies after the French Revolution. But they have always been found among their countrymen when the patriotic spirit has been roused. The record of the Dutch Jews in the colonial forces continues a high one to the present day. In the Alt-Neu-Schule, the ancient synagogue of Prague, hangs a banner said to have been presented by Emperor Ferdinand III. to the Bohemian Jews for their gallant share in the defense of Prague against the Swedes in 1648, notably that of a special company formed to extinguish fires caused by the enemy's artillery.

In Europe, prior to the Napoleonic campaigns, Jews were often in evidence in military affairs as Army contractors. Joseph Cortissos (1656–1742), to whom Marlborough owed much of his success, is perhaps the most prominent of these. The Jews of Holland, of Britain, and, later on, of America, did good service in the armies and navies of the free countries during the eighteenth century. An English officer, Aaron Hart, born in London in 1724, was among the first British settlers in Canada. Isaac Myers, of New York, organized a company of "bateau-men" during the French and Indian war in 1754.

American Jews most readily took up arms in the Revolutionary war. Forty-six names are known, twenty-four of them being those of officers, prominent among whom is Col. Isaac Franks. Col. David Salisbury Franks, who was of English birth, was prominent in resistance to the British. At that time there were scarcely 3,000 Jews in all North America. In the War of 1812, 44 Jews took part, from Brig.-Gen. Joseph Bloomfield and 8 other officers, down to Private Judah Touro; in the Mexican war of 1846, 60 Jews served, 12 of them officers, among whom was David de Leon (afterward surgeon-general of the Confederate armies), who twice received the thanks of Congress. Over 100 Jews have served in the small regular Army of the United States (including Major Alfred Mordecai, attaché during the Crimean war, and the author of works on ordnance and explosives; and Col. Alfred Mordecai, Jr., recently chief of the National Armory, Springfield, Mass.). Three naval officers have been particularly distinguished; namely, Commodore Uriah Phillips Levy (died 1862), who secured the abolition of corporal punishment and rose to the highest rank in his day; Capt. Levi Myers

American Jews in the Revolutionary War.

Harby (died 1870); and Commander Adolf Marix at a recent date.

Jews in the Civil War.

But it was the great Civil war that gave to the Jews of the United States their greatest opportunity of proving their military ardor and capacity. Then patriotism and gallantry shone out most brilliantly. Fourteen families alone contributed 53 men to the ranks; and 7 men have been traced who received from President Lincoln "medals of honor" for conspicuous gallantry. Simon Wolf gives a list of Jews serving on the Union and the Confederate sides, which exhibits 40 staff officers (including a commissioned hospital chaplain, the Rev. Jacob Frankel), 11 naval officers, and a total of 7,878 of other ranks, out of a Jewish population of less than 150,000 souls. Among these were at least 9 generals (Brevet Maj.-Gen. Frederick Knefler of Indianapolis being the highest in rank), 18 colonels, 8 lieutenant colonels, 40 majors, 205 captains, 325 lieutenants, 48 adjutants, etc., and 25 surgeons.

Jews in the Spanish-American War.

In the recent war with Spain (1898) American Jews were equally active. It has been asserted that the first volunteer to enroll and the first to fall were alike Jews. It is certain that Jews served in both the navy and the Army to an extent far beyond their due numerical proportion, and that they behaved with zeal and valor. The numbers of officers engaged were as follows: Army 32; navy 27; non-commissioned officers and men—Army 2,451; navy 42. These figures are based upon the preliminary lists given in the "American Jewish Year-Book" for 1900-1.

Before the armies of their native lands were open to them, adventurous Jews not seldom became soldiers of fortune. Such was Perez Lachman (better known as General Loustannau), who held high command in the Mahratta army. Dr. Joseph Wolff, the missionary, when visiting central Asia and northern India in 1829, found a number of Jews of leading military rank in the armies of native princes.

Jews Serve Under Napoleon.

Jews Under Wellington.

But it was especially through the forces of the French republic, consulate, and empire that the Jews became active as soldiers or sailors. It has been alleged, but on nebulous grounds, that the great marshals, Soult and Masséna, were themselves Jews. Be this as it may, there were 797 men serving in 1808 out of 77,000 French Jews; and many a Polish community for the first time beheld a foreign Israelite in the person of some soldier of Napoleon. Two decorated Jewish soldiers, Jean Louis May and Simon Mayer, sat in the Sanhedrin of 1806. A Jewish officer, Lazarus Mayer Marx, was appointed to the marine artillery in 1810. A Jewish regiment under one Berko was among Kosciusko's forces in the Polish revolt. Berko became a colonel in the French Army, and died during the campaign of 1811. Many Jews were also in the national armies assembled against Napoleon. Joshua Montefiore (1752-1843), uncle of the late Sir Moses Montefiore, served in the British Army, and, as an officer of the East Yorkshire Regiment, was present in 1809 at the capture of Martinique and Guadaloupe. The duke of Wellington is reported to have said, in 1833, that not less than fifteen Jewish officers had served under him at Waterloo. Among these was Cornet Albert Goldsmid (1794-1861), who afterward rose to the rank of major-general in the British service. He had been preceded in the rank of general by Sir Jacob Adolphus, M.D. (1770), inspector-general of hospitals; Sir Alexander Schomberg, Royal Navy (1716-1804); Lieut.-Gen. Sir David Ximenes (died 1848); and has been followed by Lieut.-Gen. Sir George d'Aguilar, K.C.B., and Maj.-Gen. George Salis-Schwabe, not to mention a singularly large number of gallant gentlemen of less immediate Jewish origin.

A Jewess Sergeant-Major.

The names are known of 125 Jewish soldiers of the Prussian Army who served in the campaigns of 1813-15, 20 of them officers, one a drum-major. Sixteen of these received the Iron Cross for valor. Altogether 343 Jews served in the Prussian Army at that time, of whom only 80 were conscripts and no less than 263 volunteers. At the conclusion of the war there were 731 Prussian Jews serving. Among these may be mentioned Lehmann Cohn, a sergeant of the Second Cuirassiers, who earned the Iron Cross at Leipsic, and fought in La Haye Sainte at Waterloo. One of his sons fought as a captain in Italy in the fateful year 1848; and another, still living in London, earned his medal under the walls of Delhi in 1857. Mention must also be made of that remarkable woman, Louise Grafemus (really Esther Manuel), who, in search of her husband who was in the Russian Army, disguised herself and served in the Second Königsberg Uhlans, was wounded twice, and rose to be sergeant-major, and received from Bülow the Iron Cross. She found her husband in 1814 under the walls of Paris, only to see him fall in action the next day, when grief betrayed her sex. She was then thirty years of age, and was sent back to her two children at Hanau, her home, with great honor.

Jews served in the Austrian Army from the year 1781. Emmanuel Eppinger became an officer in 1811, and earned decorations from two monarchs. In 1809 Von Hönigsberg was made lieutenant on the battlefield of Aspern, and several sons of Herz Homberg, the Bible commentator, were officers (see Wertheimer, "Jahrbuch," i. 16, ii. 187 and 237). The Dutch Jews behaved particularly well in 1813-15. They had been recognized as brothers-in-arms since 1793.

In considering the naval and military services of European Jews after the Napoleonic campaigns, it must be remembered that Jews have not been treated more indulgently than their Gentile neighbors in the matter of military duty where universal service is the rule, especially where, as in Russia, and particularly Rumania, they are still exposed to civil disabilities. In Russia, indeed, 38 per cent of the Jews liable to serve in the Army are called out, as against 30 per cent of the general population; but this is due to the retention on the books of the names of absentees and possibly of deceased persons also, whenever these happen to be Jews. In this way it is made to appear that an overwhelming proportion of Jews seek to escape their military duties; but the experience of every other country would suffice to expose the inaccuracy of this proposition. A quarter of a million Jews are on the books of the active and reserve forces of the Russian empire, 75,000 of whom serve on the peace strength.

Jews in Modern European Armies and Navies.

Turning to Germany, where service in the Army is equally compulsory on all Jewish as on other German citizens, it is interesting to find that members of 1,101 congregations, to the number of 4,703, have been traced by name who served against France in the campaigns of 1870-71. Of these German Jews 483 were killed and wounded, and no less than 111 were decorated for conspicuous gallantry. Owing to the privilege enjoyed by the officers of German regiments of reserving commands to their own social class there are no Jewish officers in the active German Army, with the exception of the Bavarian contingent, and none in the navy.

In Austria-Hungary matters are different. As early as 1855 there were 157 Jewish officers, many in the medical corps. In 1893 Austria-Hungary had [illegible]344 of her Jewish citizens enrolled in all branches of her Army and 325 in her navy. Besides these there were as many as 2,179 Jewish military, and 2[illegible] active officers, exclusive of those in the reserve regiments. These numbers were considerably above [illegible] of the total Jewish population.

In France, again, 10 Jews have reached the rank of general officer. In the beginning of 1895 there were serving also in the active Army 9 colonels, [illegible] lieutenant colonels, 46 majors, 90 captains, 89 lieutenants, and 104 sublieutenants of Jewish birth. The Jewish officers of the reserve in 1883 numbered [illegible]. These contingents are largely in excess of the proportional representation for which the Jewish population of France would call.

High Reputation of Italian Jews.

The Italian Jews, comparatively few in number, have a particularly brilliant military reputation. Two hundred and thirty-five Jews volunteered for the Piedmontese Army in 1848. In the one Tuscan battalion, which bore off the honors at Curtatone and Montanaro, no less than 45 Jews, from Pisa and Leghorn, were serving at the time. In the Crimean war Sardinian as well as French, British, and Russian Jews took part. Fully 260 Jewish volunteers came forward in 1859, and 127 of them followed Garibaldi at Naples in 1860. Among the renowned "Thousand of Marsala," too, there were 11 Jews. In 1866, when there were but 36,000 Jews in all Italy, 380 volunteered for active service. In the Royal Italian Army that marched into Rome in 1870, there were 256 Jews. General Ottolenghi has reached high command, and is decorated with several orders for distinguished service. Other Jewish officers of lower rank in 1894 numbered 204 in the active Army, and 457 in the various reserve forces; that is to say, about seventeen times the proportional quota of Italian Jewry.

Among the smaller states, the Jewish soldiers of Bulgaria, and even those of Rumania, have behaved with singular gallantry. Forty Jewish volunteers received medals from the sultan of Turkey after the recent Greek war.

Jews in the British Army and Navy.

There remain only the British Army and navy to be spoken of. Service in these is a superlative test of Jewish patriotism and aptitude for military duty, since such service is absolutely voluntary, and includes the tedium of tropical garrison duty far oftener than the excitement of war. Some families of less immediate Jewish descent, such as the Barrows and Ricardos, contribute many officers of distinction. But reckoning only gentlemen of Jewish birth, there were in Jan., 1902, 12 naval and marine officers, 39 officers of the regular Army (including Col. Albert E. W. Goldsmid, late assistant adjutant-general; Lieut.-Col. J. J. Leverson, C. M. G., the diplomat; and Major F. L. Nathan, superintendent of the Royal Explosives Factory), 17 officers of British militia, and 86 officers of British volunteers. Adding colonial Jewish officers of militia and volunteers, Canada provided 2, Fiji 2, Jamaica 2, Australia 27, New Zealand 8, South Africa 43, and India 1, making a total of 239 Jewish officers in the British forces. The colonial Jews have done particularly good service, Capt. Joshua Norden (1847), of Natal, being the first Jew to fall in South Africa, where Col. David Harris in 1896 concluded a stiff little campaign near Kimberley. Official returns exist of the religion of the non-commissioned officers and rank and file of the British regular Army and militia; but these are notoriously unreliable. The recruits on and after enlistment incline to regard their religious denomination as a private and personal matter, and therefore exhibit a preference for the all-embracing "Church of England," to which three of every four private soldiers elect to belong. Exclusive of officers, there were on Jan. 1, 1899, 82 Jews reported in the ranks of the Army and 46 in the militia; but the progress of the South African campaign led to the identification of many more Jewish sailors and soldiers, of whom over 2,000 have taken part, with distinct credit to their race, in the Transvaal war. There were serving in Jan., 1902, not less than the following numbers of British Jews, every one, it must be repeated, enrolled of his own free will and accord: Royal navy and marines, 120; regular Army, 550; British militia, 180; British yeomanry and volunteers, 800; and colonial militia and volunteers, 500, a goodly proportion of the Jews in the British empire. For there are also Jews in India, the Beni Israel, who for over a century have contributed gallant and faithful soldiers to the Sepoy infantry. In 1869, from that small community there were serving in the Bombay Army 36 native officers and 231 soldiers. With the introduction of "class regiments" formed entirely of men of the chief warlike races of India, the military career of the Beni Israel became restricted, until they entered the hospital corps and armed police of that great Eastern dependency.

Bearing in mind the universal liability to military service in Continental states, and comparing the Jewish with the Gentile population of each country, it may be calculated that there are now serving on the active peace strength of the undermentioned regular armies and navies of Europe the following numbers of Jewish citizens: Russia, 75,000; Austria-Hungary, 11,700; Germany, 6,400; France, 1,400; Italy, 850;

Rumania, 750; Great Britain and Ireland, 650; other states, 1,350; making a total of 98,000 European Jews who may be termed for the time being professional soldiers and sailors. But including the Jews who would be called out to bring up to war strength the various auxiliary and reserve forces of European countries, it would be found that their nine millions of Jewish subjects would place under arms some 350,000 soldiers of well-proved military quality. See Russian Army.

G. F. L. C.

Russia.

Jews served in the armies of the Chazars and in the Jewish dukedom of Taman as early as the ninth and tenth centuries (Chwolson, "Ibn Dast," p. 17; Mordtmann, "Isztachri," p. 103). Records are extant concerning two Jewish envoys, Saul and Joseph, who served the Slavonian czar about 960 (A. Harkavy, "Juden und Slavische Sprachen," pp. 143-153); concerning Anbal the Jassin, who, in 1175, served under Prince Bogolyubski of Kiev ("Polnoe Sobranie Russkikh Lyetopisei," ii. and v.); and concerning Zachariah Guil Gursis (probably Guizolfi), prince of Taman, who in 1487 offered Czar Ivan Vasilyevich of Moscow "to come to him and to serve him with his whole household, or first alone, with only a few of his men," which offer was accepted by the czar in a letter, dated March 18, 1488; but for certain reasons he did not go to Russia ("Sbornik Imperatorskavo Russk. Istor. Obshchestva," xxxv. 41, 42, 43). In the responsa of Rabbi Meïr of Lublin (Venice, 1638), p. 103*b*, mention is made of Berachah, "the Hero," who was killed in the Polish war against Russia, near Moscow, in 1610. From a document discovered in 1900 at the Archives of the St. Petersburg Archeological Institute it is evident that among the "Children of Boyars" who enlisted in the Russian military service in 1680 two were Lithuanian Jews, Samoilo Abramov Vistizki and his son Juri (Goldstein, in "Voskhod," 1900, No. 30). The warlike Jews of the Caucasus also deserve mention.

When the old kingdom of Poland came under Russian rule, Jews were not admitted into actual service in the Russian Army, but instead had to pay a special military tax.

By an edict of Emperor Nicholas I., issued Aug. 26, 1827, the Jews were ordered to perform actual military service on the basis of a special and very severe statute. According to the regulations of this statute, the authorities were permitted to take recruits from Jews at the ages of 12 to 25 (see Cantonists), and "supernumerary" recruits (*bezzachotnyye*) even up to the age of 35. The practical application of these regulations gave rise to direful abuses and corruption. The Jews were subjected to heavier duties in performing military service than the rest of the population, being compelled to furnish 10 recruits per 1,000 inhabitants every year, while non-Jews were to furnish 7 per 1,000 every alternate year (Mysh, "Rukovodstvo k. Ruskkim Zakonam o Yevreyakh," p. 411). For arrears in taxes Jews had to furnish one additional recruit for every 2,000 rubles. The Karaites, who applied to the czar in 1828, were exempt from military service ("Voskhod," 1896, vii. 2).

In 1853 temporary regulations were issued, permitting Jewish communities and private individuals to present substitutes from among those of their coreligionists that had been detected without passports. Great atrocities and corruption resulted from these regulations, which were abolished by the emperor-reformer, Alexander II., who, on Sept. 10, 1856 (Complete Russian Code, 2d ed., V. xxxi., No. 30,888), ordered that henceforth recruits from Jews should be taken on the general basis; thus prohibiting the recruitment of minors and of "supernumeraries" (see Poimanniki).

The following table, derived from official sources, will show the number of recruits enlisted, and also that of the alleged arrears:

Year.	Jews Enlisted.	Deficiency.
1876	6,427	2,455
1877	5,183	4,351
1878	6,503	2,630
1879	7,983	2,281
1880	9,268	3,054
1881	8,084	1,702
1882	6,910	2,527
1884	7,774	2,559
1885	8,727	2,340
1886	12,070	746
1887	12,263	407
1888	13,141	572
1889	14,552	378
1890	14,755	437
1891	15,837	890
1892	15,438	1,053
1893	15,306	3,084
1894	14,171	1,263
1895	14,188	1,238
1896	15,831	1,588
1897	15,934	1,468
Total	240,345	36,993

In the law of Jan. 13, 1874, enacting universal military service, no special regulations concerning the Jews are mentioned. Various exceptional rules as to their duties in the military service were formulated later, and are contained in the laws of Feb. 15, 1876; Jan. 9, 1877; May 9, 1878; April 12, 1886, etc. By the law of May 9, 1878, the Jews who had enjoyed the privilege of the first grade—that is, in being exempt from service on account of certain family conditions—were deprived of their privileges in case of deficiency of Jewish recruits in the other grades. By the law of 1886 the family of a Jew who evaded military service was fined 300 rubles. For the detection of such a refractory conscript a premium of 50 rubles was offered. Since the enactment of 1874 great prejudice was manifested by Russian Gentiles against the Jews as soldiers, especially as regards the arrears in Jewish recruits; but official reports show that from 1876 to 1897, 240,345 Jews were taken into the Russian Army, and the number of uncomplying conscripts did not exceed

36,993 for the twenty-one years. It has been proven, however, that a larger proportion of Jewish recruits were enlisted, compared with the general population, the apparent discrepancy being accounted for by the irregular registration of deaths in the death registers, and also by the large emigration of Jews from Russia.

In addition to the statistics furnished in the foregoing table, Jewish recruits to the number of 8 were enlisted in 1874 and 1875. The fact must be taken into account that service in the Russian Army entails more hardships upon the Jews than upon non-Jews for the following reasons: (a) In military service the Jews are often prevented from observing the laws of their religion, as, for instance, concerning kosher food; (b) the relation between Jewish and Christian soldiers is not very pleasant, and the position of the Jews in the Army is most unsatisfactory; (c) the military service does not give any privileges to the Jewish soldier, who is compelled to leave the place of service for the pale of Jewish settlement immediately after the completion of his term of service. "Under such circumstances," says Mysh, "one should be surprised rather at the comparatively small number of arrears among the Jewish recruits."

Russian military authorities—among them General [illegible] in his "Diary," published in the "Artillery Zhurnal" of 1794; General Lebedev in "Russki Invalid," 1858 (No. 39); and Major-General Ku[illegible] in "Voyenny Sbornik" (Military Collection), [illegible] 7, 8, 50—have often testified to the real patriotism and bravery of the Russian Jewish soldiers. The daring deeds of Goldstein in the war for the liberation of the Slavonians (in 1876), of [illegible], near Erzerum (in 1878), and of Leib Faigenbaum (see Faigenbaum, Leib), near Plevna (in 1877), will be long remembered. L. Orshanski was in the emperor's guard for 54 years, and was buried with military honors in St. Petersburg in 1899 ("Jew. Chron." March 17, 1899).

H. R.

ARNHEIM, FISCHEL: Bavarian deputy and lawyer; born at Baireuth, Bavaria, Feb. 23, 1812; died there Jan. 31, 1864. He was destined by his parents for a commercial career. They gave him a thorough Jewish education, and he was at a very early age proficient in Bible and Talmud. But his love for science induced him to prepare himself for the gymnasium, the highest class of which he entered at the age of seventeen. Arnheim subsequently studied law at the universities of Munich and Erlangen; and in 1848 he was appointed royal attorney at law at Naila, and later in his native town, Bayreuth.

Owing to his wide reputation as a lawyer, Arnheim was elected by the cities of Hof and Münchberg to the Bavarian legislature, where his juridical knowledge and unbiased and independent attitude made an impression. In appreciation of his services the freedom of the city of Hof was conferred upon him, and his reelection on four occasions to the legislature was never opposed.

He was the only Jew in his electoral district. He remained a deputy until his death. Being a student of Bible and Talmud, Arnheim successfully defended his coreligionists against accusations raised by anti-Semitic members of the legislature.

S. M. B.

ARNHEIM, HEYMANN: German rabbi; born at Wongrowitz, Prussia, Feb. 6, 1796; died there Sept. 22, 1865. While still a child he was left fatherless, and from the age of twelve was compelled to earn his own living. Notwithstanding these unfavorable conditions, he acquired a knowledge of Latin and Greek, and, more especially, of the German language and literature. He first became a private teacher at Neu-Strelitz; then (1824) a schoolteacher at Fraustadt, and finally (1827) occupied a similar position at Glogau. There he published (1830) his first work, "Leitfaden beim Unterricht in der Mosäischen Religion." In 1836 he translated into German and commented on the Book of Job. This translation was highly appreciated by the learned world, and Arnheim was invited by Zunz and Sachs to collaborate in the translation of the Bible that they were preparing. To this work Arnheim furnished the following books: The first four books of the Pentateuch, Kings, Ezekiel, Hosea, Obadiah, Jonah, Micah, Nahum, Zechariah, Proverbs, Job, Ruth, Ecclesiastes, Esther, Nehemiah, and Jeremiah—this last in collaboration with Sachs.

In 1840 Arnheim became head teacher (*Oberlehrer*) at Glogau, and commenced to preach in the great synagogue. The same year he published a translation of the Sabbath prayers and of the Yozerot for Purim, with notes in which he displayed a great knowledge of Midrashic literature. In 1849 he became rabbi of the Zeller Institution.

Arnheim was a contributor to many scientific journals, such as the "Hallische Jahrbücher" and the "Magazin für die Literatur des Auslandes."

S. I. Br.

ARNHEM: A city of Holland, situated on the Rhine about fifty miles southeast of Amsterdam. No Jews are mentioned in the records of the city prior to 1404. In that year two Jews are mentioned as having passed through Arnhem on a royal errand to Zutphen, and as having been detained on their return by floods in the former place, where the city authorities provided for their maintenance. A curious statement of the supplies granted them is found in Van Hasselt, "Geldersche Oudheden," i. 66, § 21. The city archives also reveal the facts that about the mid-

Early History.

dle of the fifteenth century a Jew was appointed city physician, and in 1449 a riot took place in Arnhem before the house of a Jew, in which the Jew Isaac was so energetically defended that the authorities, fearing removal from office, agreed to resign in a body if any one of them were dismissed. On Ash Wednesday, 1450, a Jew was baptized in Arnhem, and in 1460 it was announced that all meat sold by Jews must be provided with a little yellow marker; disobedience entailed a fine of ten groschen ("Alle vleesch dat de Joeden gehandelt hebben, en sal men nyet verkoopen, daer en sy een gheel Vaenken by den vleesch daer men 't mereliken bi kennen mach. Die anders dede verboer 10 gr."). On September 21, 1451, Cardinal Nicolaus de Cusa preached in Arnhem on absolution, and declared that none should ever receive absolution who permitted a Jew practising usury to dwell alongside of or below him. At the same time he ordered, under penalty of expulsion, that all Jews should register at the burgomaster's office, and in future wear a Jew badge upon their outer garment. They were not allowed to exact interest on pledges, nor henceforth to lend money to Christians at all; every transgression of this regulation was punishable with a fine of 4 g. to be paid by both Jew and Christian. Within the space of a year all existing loan-offices must be closed without stringency upon borrowers; and Jews must leave the city, unless they earn their bread by labor and honest commerce without usury, and wear a badge for recognition by all ("Oir broet met hoeren Arbeide verdienen of regtveerdige koomanschap sonder woekeren, doen wolden, en mits zy dat Teyken boven heur Cleeden dragen, daer men se bi kennen mach"). Meanwhile it was ordered that no one should do them any injury by day or night, openly or secretly ("dat nyemant an den Joeden enich arch sou keeren by dage off by nacht, heymelich off openbaer"). On Jan. 10, 1571, Alba notified the authorities of Arnhem that all Jews living there, and all their property—of which an inventory was to be made—should be seized and held in ward until further disposition be made.

Jews but Tolerated.

This demand was, as far as is known, not complied with by the authorities of Arnhem, while the authorities of Zutphen replied that no Jews lived there. Probably as a result of Charles V.'s cruelty the Jews left Holland; they returned, however, in the seventeenth century, when Jews were found in the eastern portion of Gelderland and Holland. Immigrants from Poland also arrived, usually by sea, and settled preferably in the western harbor-towns. Not until the end of the seventeenth century were traces of Jews again found in Arnhem. A resolution dated March 20, 1663, denied citizenship to Jews, and forbade them to follow the butcher's trade; it shows that they had at least the right to settle there.

The first mention of a synagogue was made in 1735, when the physician Levi Heymans registered a complaint with the burgomaster and the assessors, in which he petitioned that the congregation "be compelled to afford him peaceable possession of his sitting in the Jewish synagogue." On Feb. 7, 1765, three Jews, as wardens of the Jewish congregation, presented a petition stating that the congregation had greatly increased in numbers, and that thei meeting-place for prayer in the house of Solomon Cohen, which they had used a number of years, had become too small.

Synagogues.

In response they were requested to prepare a plan and submit a constitution and by-laws for the government of an incorporated congregation. The plan submitted was officially approved April 17, 1765, the congregation was established, wardens were elected, and the constitution was read at a meeting of the congregation. Among the first wardens was Samuel Jacob Hanau, who was associated with a Catholic named Kerkhoff in a large china and pottery factory, the products of which were used by the city authorities and were famous for taste and finish. In the Walstraat, close to the town wall, a house was set aside for the synagogue; the approach to it was by a narrow lane which still bears the name "Joedengang" (Jews' way). It was leased for twelve years, from April 1, 1769; and in 1782 another house close to the wall, by the Velperpoort, was hired and fitted up as the synagogue.

At first the Jews of Arnhem buried their dead in the neighboring village of Huizen. Later they used the more distant cemetery in Wageningen, where a considerable Jewish congregation existed. Two Jews, Solomon Cohen Jacobs and Samuel Levie, on Sept. 22, 1755, petitioned the authorities for a suitable burial-place.

Cemeteries.

By a resolution of Oct. 13, 1755, a lot forty feet by one hundred was assigned to them, to be fenced in by them, but otherwise free of all expense. On April 11, 1808, a larger tract was purchased (adjoining this), and continued in use till 1865, when a general city cemetery was laid out, and a distinct portion was assigned to the Jews. An agreement was made that the Jews should not alienate their part of the cemetery, and that the city should never disinter the bodies.

A benevolent society was established, possibly only a burial society, although, according to a provision of the by-laws, all fines collected were to be paid partly to the town hospital, partly to the Jewish poor. When the congregation became too large for this synagogue, a site for a new building was purchased in the Kerkstraat for 5,000 florins in 1798. It is evident that at the end of the eighteenth century the congregation of Arnhem was prosperous, and that it contained many wealthy Jews. This fact is shown by an event mentioned in only one place (Van der Aa, "Aardrykskundig Woordenboek," under "Arnhem"). In 1783 a riot took place in Arnhem because the city authorities sold a portion of the old burial-place surrounding the large church on the "Marktplein" to a Jew, who erected thereon a mansion. Public indignation was allayed only by the restoration of the cemetery, properly fenced in, to its original purpose. In 1852 another site was purchased, upon which the present synagogue stands, the former building being used for a school. On Aug. 19, 1853, a new synagogue was consecrated. A model bath-house was established in 1885 through the efforts of Chief Rabbi T. Tal. In 1891 the school was removed to an elegantly appointed building belonging to the congregation, adjacent to the synagogue.

Chief Personalities.

After the time of the French consistorial division of the country, Nymegen was the seat of the rabbinate for the province of Gelderland. But on the death of Jacob Lehmans, in 1887, the seat was transferred to Arnhem; and on June 26 of the same year Tobias Tal, a graduate of the Amsterdam rabbinical seminary, was elected chief rabbi. He remained until he was called to The Hague in 1895; and his brother-in-law, Louis Wagenaar, formerly chief rabbi in Leeuwarden and of the province of Friesland, was appointed his successor in Arnhem. Other learned men, with at least local reputation, were: Joel Frankfort, teacher from 1836 to 1866, esteemed for Talmudic learning; J. Waterman, translator of Fürst's Hebrew lexicon into Dutch, and a leader of the reform movement in Dutch Judaism which reached fullest development about 1860. In 1780, the jurist Jonas Daniel Meyer was born in a house situated where the synagogue now stands. The Dutch poetess, Estella Herzfeld, wife of Mr. Hymans, passed a portion of her life in Arnhem.

Besides the burial and charitable societies that exist in every Jewish congregation, Arnhem has the following: (1) Hizzuk Emunoh, an association for the study of rabbinical literature; (2) Berit-Abraham, a society that gives pecuniary aid to lying-in women, and toward expenses attendant on the ceremony of circumcision; (3) Sa'adas Aḥim, an association composed of small traders, for mutual assistance in times of sickness and mourning; (4) a charity association, and an association for lending money without interest to small traders, and several others. The Home for the Aged was removed to a new and better house in 1899, and steps were taken to establish an orphan home in Arnhem for the whole province. In addition there is a society for dowering respectable girls, and for providing poor school children with clothing, especially on their attaining the thirteenth year; also a fund for remitting money to Palestine.

Statistics.

The Jewish population in 1898, according to the rather unreliable "Provinciaal Verslag," was 1,390 in a total population of 56,413—about 2.5 per cent. There were 30 births in 1898, a rather small proportion; but the death statistics were more favorable, seeing that, while the mortality in the whole population of the town was 1,029 ($18\frac{1}{5}$ per thousand), among the Jews there were only 19 deaths ($13\frac{2}{3}$ per thousand). This mortality is the highest of recent years, the average number of deaths being 16. The Jews of Arnhem support themselves mainly as small traders in clothing and woolen goods. The meat business affords employment to a number of Jews, who may be said to control the trade. Several large stores are maintained by Jews. There is only one Jewish lawyer, who is a member of the city council, and maintains a banking-house; he and a Jewish member of the bar, with a few teachers, compose the academically educated Jewish population of Arnhem. Nevertheless, the congregation may be accounted one of the most prosperous in Holland.

Bibliography: For the older history of Arnhem, besides the manuscript in the Archives, see Van Wyn, *Huiszitten Leven*, i. 206, 572, 650, 651; V. Hasselt, *Geldersche Oudheden*; idem, *Arnhemsche Oudheden*; Nyhoff, *Oorkonden van Gelderland*; idem, *Wandelingen door een Deel van Gelderland*; Van der Aa, *Aardrykskundig Woordenboek*; Koenen, *Geschiedenis der Joden in Nederland*. For its later history, Waterman's oration, to have been delivered at the dedication of the New Synagogue, Arnhem, 1853, but printed and circulated only—now very rare—is valuable.

G. J. Vr.

ARNOLD: Cardinal-bishop of Cologne; died April 3, 1151. One of the few prelates who, during the Crusades, protected the Jews from the violence of the mob. When, during the Second Crusade, the inflammatory sermons of the French monk Rodolphe caused the populace throughout the Rhine provinces to attack the Jews, and torture and kill such of them as would not accept baptism, this cardinal-bishop was persuaded by a gift of money to set aside the castle of Woikenburg, Lorraine, near Königswinter, as an asylum for the Jews, and to allow the many Jews that fled thither to defend themselves with arms against the aggressors. The property that the Jews left behind was turned over to the bishop. This occurred on Sept. 23 and 24, 1146. Toward the end of that month two Jews, Abraham and Samuel, were murdered on their way up to the castle. Moved by a second present from the Jews, the bishop had the murderer cruelly put to death.

The authority for these statements is Ephraim ben Jacob, who was one of those shut up in Wolkenburg. Besides his account, see Neubauer and Stern, *Hebr. Berichte über die Juden-Verfolgungen Während der Kreuzzüge*, 1892, pp. 60, 190; Grätz, *Gesch. der Juden*, vi. 179.

G.

ARNOLD OF CÎTEAUX: Cistercian monk, who, with the sanction of Pope Innocent III. (1198–1216), incited a crusade against the Albigenses and Jews of southern France, and occasioned the attack of Simon de Montfort on Viscount Raymund Roger. The latter was stigmatized as a patron of Jews and Albigenses, and on this account his beautiful capital, Béziers, was besieged by De Montfort, and on its fall (July 22, 1209) was well-nigh totally destroyed. According to Arnold's report to the pope, about twenty thousand perished by the sword regardless of caste, age, and sex; after which the city was looted and burned, so that "the vengeance of God raged therein in a wondrous way." The flourishing and cultured Jewish congregation of Béziers was almost exterminated; two hundred persons lost their lives, and a great many others were taken captive. "The year of mourning" is the name by which that year is designated in the Jewish chronicles; the Hebrew word for "mourning" having appropriately the numerical value of the date (יגון = 69 = 4969, or 1209 of the common era).

From southern France, Arnold carried his murderous fanaticism to Spain under the following circumstances: Mohammed al-Naṣir, the Almohade prince from the northwest of Africa, apprehending the success of the Christians in Mohammedan Spain, transported a vast army to Andalusia to make war on the advancing religion. The Christian princes of Spain immediately ceased their habitual internecine hostilities for the sake of united resistance, and appealed to Innocent III. to inspire a general crusade against the Crescent. The pope acceded; and among the multitudes crossing the Pyrenees, Arnold and his followers were foremost. These ultramontane swordsmen, as they were designated in contrast to the Spaniards, were deeply affronted by the comparative prosperity and freedom that the Jews enjoyed in the Castilian capital Toledo; and Arnold instigated a sudden onslaught upon them (June, 1212). At that particular juncture the Jewish population of Toledo, in addition to being the most representative and flourishing in Spain, had been swelled by the accession of fugitives from Salvatierra, the first city captured by the Mohammedan invaders (Sept., 1211). The fate of the Jews of Toledo would have been sealed had not Alfonso the Noble, king of Castile, and the Christian knights of the city, promptly protected them; thus terminating auspiciously what was in Castile an importation of foreign fanaticism, the first persecution of Jews.

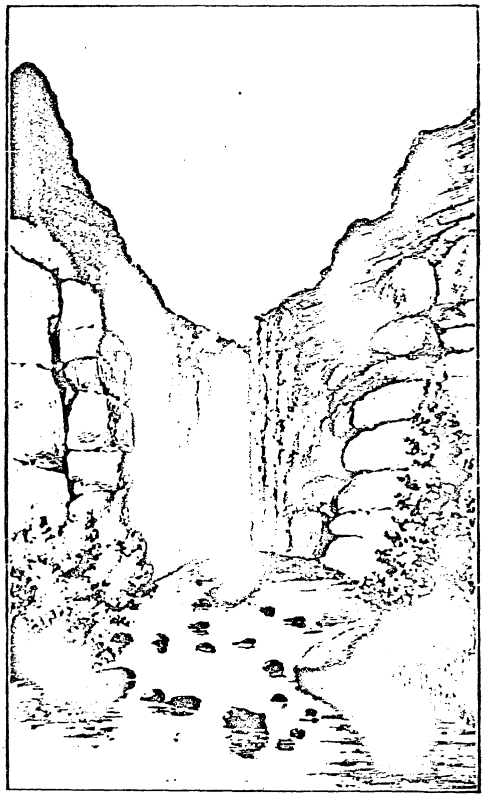
ARNON.—**Biblical Data:** A river and wady of eastern Palestine, the modern Wady Mojib (or Wady el-Mojib). The name means perhaps "noisy," a term which well describes the latter part of the course of the river. Its length is about 45 miles, from its rise in the desert to its entrance into the Dead Sea. It spreads out to a breadth of 100 feet here and there, but for the most part is narrow; and though low in summer, in the winter season it is in places 8 or 10 feet deep. It runs at first northwesterly, but afterward its course becomes westerly. Its striking feature is the steepness and narrowness of the ravine through which it passes shortly before it empties into the lake, opposite Engedi. Between the lofty limestone hills, which cause this precipitous descent, and the lake, the river expands into a shallow estuary nearly 100 feet wide.



Gorge of the River Arnon Near Its Mouth.

(From Stade, "Geschichte des Volkes Israel.")

The Arnon has always been an important boundary-line. Before the Hebrew period it separated, for a time at least, the Moabites from the Amorites (Num. xxi. 13, 26; Deut. iii. 8; Judges xi. 18). After the Hebrew settlement it divided, theoretically at least, Moab from the tribes of Reuben and Gad (Deut. iii. 12, 16). But in fact Moab lay as much to the north as it did to the south of the Arnon. To the north, for example, were Aroer, Dibon, Medeba, and other Moabite towns. Even under Omri and Ahab, who held part of the Moabite territory, Israel did not hold sway farther south than Ataroth, about ten miles north of the Arnon. Mesha in his inscription (Moabite Stone, line 10) says that the Gadites (not the Reubenites) formerly occupied Ataroth, whence he in turn expelled the people of Israel. He mentions (line 26) his having constructed a road along the Arnon. The ancient importance of the river and of the towns in its neighborhood is attested by the numerous ruins of bridges, forts, and buildings found upon or near it. Its fords are alluded to by Isaiah (xvi. 2). Its "heights," crowned with the castles of chiefs, were also celebrated in verse (Num. xxi. 28).

J. JR. J. F. McC.

——**In Rabbinical Literature:** The Haggadah tells the following story of a miracle witnessed at the Arnon, which seems to be alluded to in the Bible (Num. xxi. 14, 15). The mountains bordering on the Arnon consist of two lofty ranges, with a valley, seven miles wide, between them. When on the way to the promised land, the Israelites, after having crossed the first range, prepared to cross the second, the Amorites hid in the caves, intending to attack the unsuspecting travelers. But the Ark of the Covenant, which preceded the Israelites, caused the heights to sink and the valley to rise, with the result that the concealed Amorites were crushed in the caves. The miracle would have been unnoticed by the Israelites, had not God caused the well which accompanied them to throw up portions of the corpses. Then it was that all Israel sang the Song of the Well (Num. xxi. 17 *et seq.*). In commemoration of this miracle the Rabbis decided that a special benediction be uttered upon seeing the Arnon (Ber. 54*a et seq.*; Num. R. xix. 25; Tan., Ḥukkat, xx.).

J. SR. L. G.

ARNSTADT: Capital of the German principality of Schwarzburg-Sondershausen, on the River Gera. In 1264 (Aug. 5 and 7) there were outbreaks here against the Jews, in which five were slain (the learned R. Shabbethai ben Samuel; Joseph and Kasser, sons of R. Jehiel bar Ḥakim; R. David Cohen, of Mayence; and the boy Eliezer, son of R. Simson, of France). In Feb., 1349, the Black Death raged in the town. In 1441 the Jews were expelled from the town. In 1466 another expulsion took place, "because they [the Jews] would not be baptized." In 1521 Jews are still mentioned as dwelling there, and as possessing a synagogue, which occupied the site later covered by the Bartholomew Cloister. Their cemetery in the Ichterhäuser-strasse is also mentioned. In the seventeenth century there were no Jews in Arnstadt, though in the nineteenth century a congregation was again formed there. In 1900, in a population of about 14,000, there were 97 Jews.

G. A. F.

ARNSTEIN, BENEDIKT DAVID: Austrian playwright, grandson of the famous Vienna banker Adam Isaac von Arnstein; born in Vienna Oct. 15, 1765; died there in 1840. In 1782 he entered his grandfather's banking-house, but left in 1786 to undertake a series of travels which enabled him to make the acquaintance of many distinguished writers of his time. From association with Alinger and Liebel he learned to appreciate the Greek and Roman classics. Such men as Retzer, Schreyvogel, Kotzebue, Ratschky, and Zeon exercised a powerful influence upon him. He published: "Eine Jüdische Familienscene," 1782; "Dramatische Versuche," 1778; "Die Kleinodien," drama, 1796; "Die Maske," comedy, 1796; "Die Pflegetochter," drama, 1798; "Das Billet," comedy, 1800; "Das Geschenk," 1801.

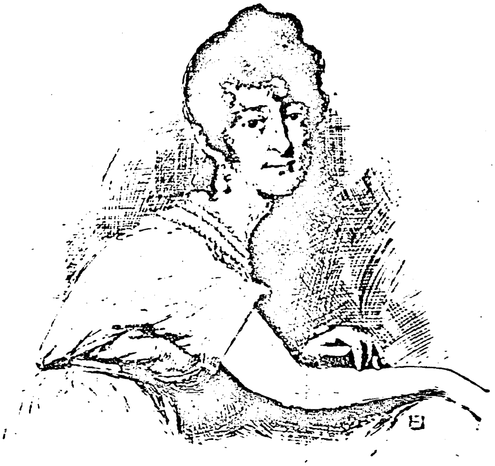
S.

ARNSTEIN, FANNY (VÖGELE) VON: A leader of society in Vienna; born in Berlin September 29, 1757; died near Vienna June 8, 1818. Daniel Itzig, the wealthy and generous banker, and head of the Jewish community of Berlin, was her father. She was one of a family of nine daughters and four sons. Itzig being a man of culture, and surrounded by an attractive family, his house became a social center. Close relation existed with the Mendelssohn circle, even before Fanny's brother-in-law David Friedländer came to Berlin, and two of Mendelssohn's sons married members of her family. Henriette Herz, Rahel, Dorothea, and Henriette Mendelssohn, Marianne Meyer, and the other representatives of the Jewish salon period were her intimate friends. On her early marriage with the banker Nathan Adam von Arnstein she carried the social influences of Berlin, as molded by Frederick the Great, to the Vienna of Joseph II. To wide reading and unusual linguistic attainments she joined an attractive exterior, tact, grace, and distinguished bearing, and, above all, extraordinary kindness of heart. The Von Arnstein mansion at Vienna and her villas at Schönbrunn and Baden were daily thronged with guests; and her easy hospitality, of which Rahel writes in her letters, embraced alike the prosperous and the poor. Her benefactions, private and public, were endless; she was especially active in ameliorating the destitution that followed the disasters of 1809. Ladies of rank united to care for the needy; and, though a Jewess and of the inferior nobility, she was invited to join them on account of her executive ability and sagacity. When the same association founded a hospital at Baden, near Vienna, she collected 7,000 florins among her coreligionists; and in 1813 she sent supplies to Rahel, then engaged in relief-work at Prague. Love of her adopted country filled her soul; and the opinion she had conceived of Napoleon and the French, on her visit to Paris during the Consulate, did not tend to lessen her almost personal grief over Austrian and Prussian reverses. The Frenchmen who freely gathered round her were never left in doubt as to her feelings. On the other hand, the German victories of 1813-14 gave her the keenest delight; and the Vienna Congress saw her at the zenith of social success. Her salon was frequented by the celebrities assembled at the capital—Wellington, Talleyrand, Hardenberg, Capo d'Istrias, Varnhagen von Ense, his wife, the Schlegels, Justinus Kerner, Karoline Pichler, and Zacharias Werner. For over a generation she exercised an influence upon Austrian art and literature. She was one of the founders of the Gesellschaft der Musikfreunde. Only one shadow fell upon her life. During her widowhood her beauty attracted admirers and suitors, whom she successfully kept at a distance. Prince Karl von Lichtenstein was particularly assiduous in his attentions. A rival, Freiherr von Weichs, ascribing his own lack of success to Frau von Arnstein's preference for Lichtenstein, challenged and killed him. Though the first families of Vienna were concerned, Frau von Arnstein was wholly exonerated, and continued to enjoy her popularity. Despite the distractions of society, she was a devoted mother to her only daughter, Henrietta, Baroness Pereira-Arnstein, who inherited her intellect, grace, beauty, and goodness.



Fanny von Arnstein.

ARNSTEIN, NATHAN ADAM VON. See ARNSTEIN, FANNY VON.

AROER: A name probably meaning "bushes of dwarf juniper" (Lagarde, "Sem." i. 30), which is applied in the Old Testament to three distinct localities.

1. "Aroer, which is on the edge of the valley of Arnon" (Deut. ii. 36, R. V.), is probably represented by the present ruins of 'Arā'ir on the north bank of the Arnon ravine, about eleven miles from the mouth of the river (Tristram, "Moab," pp. 129-131). The city was still standing in the time of Eusebius. This place was usually described by its situation, in order to distinguish it from other localities of the same name (Deut. iii. 12, iv. 48; Josh. xii. 2, xiii. 9; Judges xi. 26; II Sam. xxiv. 5). It appears first as having been captured by the Amorite king Sihon from Moab (compare Num. xxi. 26). It should be noted that in the Mesha inscription, l. 26, it is mentioned as having been built by the Moabites. After Israel's attack on the Amorites, it was assigned as part of the territory of the tribe of Reuben, whose southern frontier it marked. This is the city mentioned in Num. xxxii. 34, with the southern towns, as having been built by the children of Gad before the distribution of the land. When Hazael and his Syrians took from Israel the territory across the Jordan, Aroer is given as its southern limit (II Kings x. 33). It is clear, from Jer. xlviii. 19, that the Moabites ultimately recovered it from the Israelites.

2. A city in the territory of the tribe of Judah (I Sam. xxx. 28, and probably Josh. xv. 22). It has been identified with the ruins of 'Ar'āra, twenty miles south of Hebron and twelve miles southeast from Beer-sheba. David sent to the elders of this city a share of the booty taken from the Amalekites who had attacked Ziklag (I Sam. xxx. 28).

3. A town east of Rabbath-Ammon (Josh. xiii. 25) in the territory of the tribe of Gad, originally an Ammonite city (Judges xi. 33). It has not yet been identified. According to Jerome ("Onomasticon Sacrum," 96, 5), it was on a mountain, twenty Roman miles north of Jerusalem.

The reading "the cities of Aroer are forsaken" (Isa. xvii. 2) is probably incorrect, as it presents many geographical difficulties, occurring as it does in connection with "the burden of Damascus." While it is possible that there may have been another Aroer near Damascus, it is more likely that the passage should be rendered "the cities *thereof* shall be forsaken." This emendation, proposed by Lagarde, has been quite generally accepted by modern scholars.

The Gentile name from Aroer is Aroerite (I Chron. xi. 44).

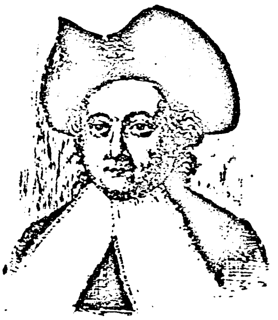
J. JR. J. D. P.

ARON HA-KODESH: Hebrew name for the Ark in the synagogue. See ARK OF THE LAW.

ARON, ARNAUD: Chief rabbi of Strasburg, Alsace; born March 11, 1807, in Sulz unterm Walde, Alsace, and died April 3, 1890. Destined for a rabbinical career, he began his Talmudic studies at an early age at Hagenau and continued them at Frankfort on the Main. In 1830 he became rabbi of the small community of Hegenheim in Upper Alsace; and the more important Jewish community of Strasburg called him to be its spiritual head in 1833. As he was under thirty, the age prescribed by law, he required a special dispensation to qualify for the office. In Strasburg Aron acquired the reputation of an eloquent and inspiring preacher and a zealous communal worker. He assisted in founding the School of Arts and Trades and took active interest in other useful institutions. In 1855 he convened an assembly of the rabbis of the department of the Lower Rhine for the consideration of religious questions.

Aron is the author of a devotional work which enjoys great popularity among French Israelites. This is "Prières d'un Cœur Israélite," a collection of prayers, partly original and partly drawn from Biblical and other Jewish sources. In this work he had the assistance of Ennery. Arnaud Aron was the author of the catechism used for confirmation as prescribed by the Consistory of Lower Alsace. In 1866 the French government acknowledged his services by appointing him a Knight of the Legion of Honor. In 1870, while Strasburg was besieged, it was he, together with the archbishop, who raised the white flag on the cathedral. Subsequently he was decorated by the German emperor.

S. I. B.



Arnaud Aron.

ARON, EMIL: German physician; born at Stettin, Pomerania, March 12, 1864. He received his education at the Werdersche Gymnasium at Berlin, and the universities of Berlin, Munich, and Heidelberg, being graduated from the last-mentioned with the degree of doctor of medicine in 1888. After a tour to Vienna, Paris, and London, Aron in 1890 established himself as a physician in Berlin. He was assistant physician in the Jewish Hospital in that city from 1891 to 1896, becoming specialist in laryngology. Aron has been a contributor to the "Berliner Klinische Wochenschrift" ("Zur Kasuistik der Halsrippen," 1892, etc.), Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin" ("Ueber die Einwirkung Verdichteter und Verdünnter Luft auf den Intratrachealen Druck beim Menschen," 1892, etc.), "Deutsche Medizinische Wochenschrift" ("Zur Behandlung des Pneumothorax," 1896, etc.), and other medical journals.

BIBLIOGRAPHY: Wrede, *Das Geistige Berlin*, s.v., Berlin, 1898.

S. F. T. H.

ARON, HENRY: French publicist; born in Paris, Nov. 11, 1842; died there Nov. 13, 1885. He was a pupil of the École Normale and obtained a fellowship there in 1865, but soon gave up teaching to join the staff of the "Journal des Débats," and also collaborated in the "Revue Politique et Littéraire." Aron afterward became secretary of the "Revue des Deux Mondes." In 1876 he was entrusted by Ernest Picard, minister of the interior, with the management of the "Journal Officiel" and of the "Bulletin Français," but on the resignation of the ministry he relinquished his charge, which he resumed upon the reelection of a Republican majority, Oct. 14, 1877. He was decorated with the Legion of Honor Jan. 30, 1870, but resigned again when the "Journal" came under state control, on Jan. 1, 1881. He reentered the "Journal des Débats" as art critic. Though not a Hebraist, he became, in 1880, one of the founders of the "Revue des Etudes Juives."

s. J. W.

ARONIUS, JULIUS: German historian; born Feb. 5, 1861, at Rastenburg, Germany; died June 29, 1893. After completing the gymnasium course, he entered the University of Berlin, where he studied history, philology, and later went to the University of Königsberg. He was graduated from the latter as Ph.D. in 1883, on which occasion he wrote a thesis, "Studien über die Älteren Angelsächsischen Urkunden." Aronius became instructor at the Berlin Realgymnasium, at the same time devoting himself to the study of Jewish history. Entrusted by the Historische Commission with a preparation of a history of the Jews in Germany during the Middle Ages, he began the work, under the title "Regesten zur Geschichte der Juden in Deutschland" (Berlin, 1893). This work gives in chronological order, under each date, an abstract of every entry in the medieval chronicles and documents relating to the Jews of Germany. Its publication was interrupted by the death of Aronius, and was completed by Saalfeld.

s. I. Br.

ARONS, LEO: German physicist and Socialist. Though privat-docent at the University of Berlin he took part in the Socialist movement, and was in consequence suspended from his office by the minister of education, Bosse, April, 1899. Being wealthy, he spent in 1895 large sums of money to advance the interests of his party. In 1897 he carried a resolution at the Socialist convention of Hamburg, in virtue of which the Socialists would no longer abstain from voting at the elections for the Prussian Diet.

Arons' scientific works belong to the field of theoretic as well as of experimental physics, with especial reference to electricity. Among the many works published by him may be mentioned the following: "Bestimmung der Verdet'schen Constante im Absoluten Masse," in "Annalen der Physik und Chemie," new series, 1885, xiv. 161; "Interferenzstreifen im Spectrum," *ib.* p. 669; "Verdünnungswärme und Wärmekapacität von Salzlösungen," *ib.* xxv. 408; "Methode zur Messung der Elektromotorischen Gegenkraft im Elektrischen Lichtbogen," *ib.* xxx. 95; "Ueber den Elektrischen Rückstand," *ib.* xxxv. 291; "Beobachtungen an Elektrisch Polarisirten Platinspiegeln," *ib.* xli. 473; "Ein Elektrolytischer Versuch," *ib.* xlv. 383; "Ein Demonstrationsversuch mit Elektrischen Schwingungen," *ib.* p. 553; "Die Elektricitätsconstanten und Optischen Brechungsexponenten in Salzen," *ib.* liii. 95; "Elektrische Lichtbogen," *ib.* lvii. 185; "Polarisations-Erscheinungen in Dünnen Metallmembranen," *ib.* lvii. 201; "Versuche über Elektrolytische Polarisation," in "Verhandlungen der Physikalischen Gesellschaft zu Berlin," xi. 3; "Ueber einen Quecksilber-Lichtbogen," *ib.* p. 6.

Bibliography: *Die Nation*, 1897-98, p. 18; 1898-99, p. 422.

s. I. Ber.

ARONSON, RUDOLPH: Composer and theatrical manager; born in New York, April 8, 1856. He early manifested talent for music, and after his graduation from the New York high school was sent to the Vienna Conservatory. After completing his course there, he entered the Paris Conservatoire, devoting himself to a careful study of the French composers. He had a strong predilection for the lyrical genre, and it was the popular rather than the classic compositions that he strove to master in regard to style and method.

Returning to America, Aronson first came prominently before the public as the *director of* fashionable concerts in Madison Square Garden, New York; and such was the success of these concerts that he built a concert-hall at Forty-first street and Broadway, opened May 27, 1880. In connection with this enterprise, the now popular "roof-garden" was first introduced as a summer feature.

He subsequently secured capital for a theater to be devoted solely to the elaborate performance of light operas—the Casino, a fine specimen of Moorish architecture, opened Oct. 22, 1882, which was the first permanent home of light opera in America.

Aronson has composed over 150 dances, marches, and various other orchestral pieces, many of which have been successfully performed by Gilmore, Cappa, Eduard Strauss, Theodore Thomas, and other prominent orchestral leaders.

ARONSSOHN, JACOB EZEKIEL: German physician and medical writer; born in 1774; died June 12, 1807; obtained his degree of M.D. in 1800; and subsequently became teacher at the Berlin University. Of his various publications may be mentioned: (1) "Medicinische Gesch. der Französischen Armee in St. Domingo im Jahre 1803, oder Ueber das Gelbe Fieber," Berlin, 1805 (translation of a French work by N. P. Gilbert, treating of the yellow fever); (2) "Die Kunst des Zahnarztes oder Vollständiger Theoretischer und Praktischer Unterricht über der an den Zähnen Vorkommenden Chirurgischen Operationen, die Einsetzung Künstlicher Zähne, Obduratoren und Künstlicher Gaumen" (translated from the French by L. Laforgne, with illustrations, Berlin, 1803); (3) "Vollständige Abhandlung Aller Venerischen Krankheiten," with annotations by F. W. Wolf, Jr., Berlin, 1808; (4) "Gründliche Anleitung zur Zweckmässigen Einrichtung der Apotheken," with illustrations, Berlin, 1804; (5) "Die Kunst das Leben des Schönen Geschlechts zu Verlängern," with illustrations, Berlin, 1804; 2d ed., 1807; (6) "Rechtfertigung der Schutzblattern, oder Kuhpockenimpfung," Berlin, 1801; (7) "Toilettenkunst-Recepte, 64 Wohlfeile, Bewährte, nach Chemischen und Diätischen Gründsätzen Abgefasst, zur Beförderung und Erhaltung der Schönheit," Berlin, 1805.

F. T. H.

ARONSSOHN, JACQUES LÉON: German physician; born at Metz May 2, 1793; died at Strasburg Sept. 8, 1861. His father, Jacques Aronssohn (died 1845), practised medicine at the garrison of Pont à Mousson. Aronssohn went to Strasburg in 1809 to matriculate at the Faculté de Médecine. He took his degree as doctor in 1816; became assistant surgeon at the municipal hospital in 1823; and resigned this position two years later to go to England to finish his studies. In London he made the acquaintance of some of the most prominent physicians and surgeons, as, for instance, Astley Cooper, Lawrence Brodie, and Tyrrell. After his return to France he established himself as a physician at Strasburg; and during his twenty-five years of practise he was regarded as one of the most efficient of doctors. In 1838, suffering from a chronic irritation of the larynx, he went to Italy to seek a milder climate. At Pisa he was requested by the French ambassador to take part in the autopsy on the body of the daughter of King Louis Philippe. Scarcely had this work been finished, when he was summoned to Florence by the widow of King Murat.

During 1832, while the cholera raged in France, Aronssohn was requested to organize one of the provisory hospitals. Later he was appointed a member of the Central Sanitary Commission; of the board of health; of the committee of primary instruction; of the commission for the inspection of the asylum at Stephansfeld; and physician to the Eastern Railway Company. From 1849 he was president of the Société de Médecine de Strasbourg and a member of several French and foreign scientific societies. The Legion of Honor was bestowed on him in 1839; at the same time he was appointed assistant physician to the king, which for him was merely a title. It brought him in contact, however, with the royal family and the eminent men of that epoch. As early as 1823 he was authorized by the Royal Council of Public Instruction to establish a course of surgical instruction. He took an active part in the foundation of the institution for the examination of fellowship; and when Professor Lobstein died Aronssohn remained in charge of the medical clinic for six months.

Aronssohn was not eloquent; his lectures resembled his conversation; they were informal talks, attractive, and so presented that they held the attention of the pupils.

The grief he suffered at the death of an adopted son, the severe illness of his beloved daughter, and the loss of a dear friend, brought on the heart-failure that ended his useful life.

Aronssohn is the author of:

"Les Tumeurs Développées dans les Nerfs," inaugural dissertation, 1822; "Appréciez les Progrès Récents du Diagnostic," 1836; "Mémoires et Observations de Médecine et de Chirurgie Pratiques"; 1st Mémoire: "L'Instruction des Vers dans les Voies Aériennes"; 2d and 3d Mémoires: "Quelques Points de l'Histoire des Hernies"; "Tetanos"; "Lotion Chaudes des Térébenthine dans les Brûlures"; "Compte Rendu de la Clinique Médicale de la Faculté"; "L'Introduction au Traité sur les Eaux Minérales du Duché de Nassau" (translated from Kaula); "L'Inflammation et les Scrofules."

Besides these works Aronssohn wrote a number of reports for different societies and committees of which he was a member; for instance, "Projet de Loi d'Organisation Médicale."

ARONSTEIN, L.: German chemist; born May 25, 1841, at Telgte, Westphalia; graduated from the University of Göttingen in 1864 with the degree of Ph.D. Two years later he became assistant in the physical department of the University of Leyden, Holland, and in 1867 accepted the post of director at the high school (*Höhere Bürgerschule*) of Breda, Brabant, where he also taught the natural sciences. In 1876 Aronstein was appointed professor of chemistry at the Royal Military Academy of Breda, and in 1894 was offered a similar appointment in the Royal Polytechnic School, Delft. He accepted the invitation, and has continued to occupy the position ever since. His papers, which are of a distinctly technical character, have appeared on the pages of Liebig's "Annalen der Chemie," published in Leipsic and Heidelberg; in the "Berichte der Deutschen Chemischen Gesellshaft," the "Recueil des Travaux Chimiques des Pays-Bas," etc. Brief notices and reviews of Aronstein's contributions to chemistry may be found in the "Jahresbericht über die Fortschritte der Chemie," edited by F. Fittica, Brunswick.

A. S. C.

ARONSTEIN, PHILIPP (pen-name **Arnstein**): German school-teacher and author; born Dec. 4, 1862, at Halver, province of Westphalia, Prussia. Aronstein received his education at the gymnasium in Soest, the universities of Berlin and Bonn, and the Academy of Münster, whence he was graduated as doctor of philosophy. After having taught at different schools in England and Germany, he at present (1902) holds the position of Oberlehrer at the Progymnasium at Myslowitz, province of Silesia, Prussia. He has been a contributor to several well known German magazines and newspapers; *e.g.*, "Neue Deutsche Rundschau," "Anglia" ("Ben Jonson's Theorie der Lustspiele," 1894; "Dickens-Studien," 1896), "Englische Studien" ("John Marsten als Dramatiker," 1894; "Die Entwicklung der Lokalverwaltung in England," 1895), "Neuere Sprachen" ("England um die Mitte des 18ten Jahrhunderts," 1895), and has written principally upon education in England, and English history and literature. Aronstein's chief independent works are: "Benjamin Disraeli's Leben und Dichterische Werke," 1895, and "Die Entwicklung der Höheren Knabenschulen in England," 1897. He also translated from the English into German Bishop Mandell Creighton's "Age of Queen Elizabeth," 1900.

F. T. H.

ARPAD: A city of northern Syria, the modern Tell-Erfad, thirteen miles northwest of Aleppo. It is mentioned in II Kings xviii. 34, xix. 13; Isa. x. 9, xxxvi. 19, xxxvii. 13; Jer. xlix. 23. Rammannirari III. fought against it (Schrader, "Keilinschriftliche Bibliothek," i. 209), and Tiglath-pileser III. besieged it for two years and captured it about 740 B.C. (*ib.* i. 213, and Isa. x. 9).

J. JR. G. A. B.

ARPHAXAD (**ארפכשד**): According to Gen. x. 22, 24; xi. 10–13; and I Chron. i. 17, 18, the third son of Shem. Bochart's identification ("Phaleg," ii. 4) of this name with the Arrapachitis of the Greeks, an Armenian region, north of Assyria, adjacent to the Great or Upper Zab river, has long prevailed. The Arrapachitis, however, did not belong to the Semitic world; and it would be difficult to account for the element "-shad" (very improbably explained as an Armenian element, "-shat," by Lagarde, "Sym." i. 54). Still more improbable is the Kardish Albag. Delitzsch's ("Paradies," 256) explanation from the Assyrian "arba-kishshati" (the four quarters of the world), has not been confirmed. More recently, the view of Michaelis, anticipated by Josephus ("Ant." i. 6, § 4), that Arpakshad contains the name of the Kasdim or Chaldeans, has become predominant. The explanations of Gesenius, etc., "boundary ["Arp"] of Chaldea" (*Keshad*); of Cheyne, "Arpakh" and "keshad," written together by mistake ("Expositor," 1897, p. 145), etc., are now superseded by the observation of Hommel ("Ancient Hebrew Traditions," 294) that Arpakshad is the same as "Ur of the Chaldeans" (*Ur-kasdim*). Both names agree in the consonants except one, and also in meaning, as Arpakshad is the father of Shelah, grandfather of Eber and ancestor of Terah, Nahor, and Abraham, who came from Ur (Gen. xi. 12). The inserted "p" of Arpakshad has so far not been explained—Hommel has recourse even to Egyptian—but it is doubtless due to some graphic error (see UR). In Judith i. 1, etc., Arphaxad, a king of the Medians in Ecbatana, is mentioned, conquered by Nebuchadnezzar II. of Assyria and put to death. The name has clearly been borrowed from Gen. x. by the writer.

J. JR. W. M. M.

ARRAGEL, MOSES: Spanish rabbi; flourished in the first half of the fifteenth century at Maqueda and Guadalfajara, Castile. The name is the Arabic *al-Rijal* (Steinschneider, "Jew. Quart. Rev." xi. 610); according to H. Derenbourg ("Journal des Savants," November, 1898), it is derived from the Hebrew "ha-Ragil" (the expert).

When in 1422 Don Luis de Guzman, grand master of the Order of Calatrava, was preparing in Toledo to make war upon the Moors, he seems to have suffered a change of heart; and, tired of the chase, of playing chess, and of reading romances of chivalry, he felt the need of a good translation of the Bible in Spanish, with a commentary thereon. He asked Rabbi Moses Arragel to undertake this work (April 5). At first the rabbi declined the invitation, feeling how impossible it was for a Jew to translate, or comment upon, the Bible in a manner to satisfy a Catholic. Don Luis, however, insisted; and he assigned Friar Arias de Enciena, custos of the Franciscans in Toledo, to make known to Moses his particular wishes in regard to the matter. The translation of the Old Testament in the Castilian language is one of several which were made at this time; and the cooperation of the Jewish rabbi with Catholic dignitaries in its production is one of the signs of the comparative religious tolerance then prevailing in Castile.

Translates the Old Testament.

It took Arragel many years to finish this work. When completed (June 2, 1430) it was presented by him with much ceremony to Don Luis in Toledo, in the presence of a concourse of prominent and learned men. The head of the Order of St. Francis, replying to the presentation address, expressed himself as follows: "Rest assured that if, please God, the interior of the Bible as regards its substance is equal to its exterior, it will be the most beautiful and the most famous work to be found in many a kingdom." These and other details are found prefixed to the translation, accompanying which is the whole correspondence between Don Luis de Guzman and Moses Arragel. Luis' letter commences as follows: "We, Master of Calatrava, send many salutations to you, Raby Moses Arragel, our vassal in our city of Maqueda. Know, O Raby Moses! that we desire to possess a Bible with glosses and comments; and we are told that you can do the work well."

It is interesting to notice that this translation into old Castilian follows the order of books according to the Hebrew canon. This was the express desire of Jerome; and indeed his translation seems to have formed, in a measure, the basis for this new translation, which was made with the help of the Hebrew original. Wherever the Latin text of Jerome agreed with the Hebrew, Moses followed both; where they differed, he followed the Hebrew exclusively. A surprising freedom of speech is also shown by Moses in the glosses that he has attached to the text. He does not scruple to differ from the interpretation of his own coreligionists. When he comes in conflict with the dogmas of the established church, he says plainly: "This is the opinion of the Christians; but the Jews hold just the opposite view." He often cites the view of the grand master, Don Luis, himself, but never controverts him. He is decidedly rational in his own views on many points, and does not scruple to declare many expressions figurative. The glosses are not simply dry explanations, for Moses has inserted here and there a number of Jewish tales, fables, and proverbs. The authorities cited are numerous. Of classic authors, we find Aristotle, Euclid, Ptolemæus, and Pliny; of Christian scholars, Saint Bernard, Saint Ildefonso, and Nicholas de Lyra. His remarks on Christian theology are drawn from the "Tratado sobre la Justicia de la Vida Espirituel" of Don Pedro, archbishop of Seville. He mentions by name the Talmud, the Midrash (Midras or "los Prabot"), the cabalists "rabi Tanhuma," "rabi Salomon" (Rashi), "rabi Abraham Aben Ezra," "rabi Moysen de Egipto" (Maimonides), "rabi Niçun (Nissim) de Barçelona," "rabi Jacó" (Jacob ben Asher), "rabi Joseph," "el Camhy" (Kimḥi), etc.

On the whole, this work of Arragel's shows him to have been a man of vast learning, of fine literary taste, and of a breadth of view hardly to be expected in a Spanish rabbi of that time. According to S. Berger, Arragel used some previous attempts at translating the Bible into Castilian. As such he notes MS. Escurial, i.j. 3, and for the prophets, a manuscript of the fifteenth century preserved in the Library of the Academy of History at Madrid.

The manuscript of this translation, called the "Bible of Olivares," is preserved in the Palace of Liria at Madrid, belonging to the duchess of Berwick and of Alba. It was given in 1624 to Don Gaspar de Guzman, count of Olivares, by Don Andres Pachico, the grand-inquisitor, because of the services rendered by himself and his father, the ambassador at Rome. It passed by marriage into the possession of the fifth duke of Alba, Don Francisco Alvarez of Toledo. There are 515 folios, the text being in two columns, surrounded by the glosses, which are written in very minute script.

Its Careful Illustrations.

It is interesting from another point of view: it is filled with miniatures which make it one of the treasures of the Casa de Alba. The illustrations (334 in number, of which 6 are full-page), however, have a particular Jewish interest; for, in addition to the pictures in it of indubitably Christian origin, and copied from other Bibles in the Cathedral library of Toledo, there are others which have a thoroughly Jewish tinge, and on account of which the supposition is justified that Moses Arragel, if he did not himself assist in the painting, at least gave directions to the Toledo artists who did the work. In one picture the interior of a synagogue is reproduced with the greatest care and exactness. Moses is represented as holding the Law in his hands, the Law being written on a large marble plate. The frontispiece, which is here reproduced, represents the grand master upon his throne, covered with a white mantle upon which is seen the red cross of the Order of Calatrava; around him are vassals and knights; by his side are a Franciscan and a Dominican (Friar Arias de Encinas and Juan de Zamora); and in front of him is Rabbi Moses himself, on his knees, presenting his work to his lord and master. The Jew-badge can be plainly recognized on his right arm. He is surrounded by the knights of the order; while immediately below the throne a scene is depicted in which the knights are seen feeding, clothing, and otherwise succoring the Jews.

Bibliography: De Rossi, *Histor. Wörterb.* p. 47; *Nepi-Ghirondi*, p. 250. A description of the manuscript, together with extracts, was given in 1899 by Señor Paz y Mélia in an article entitled *La Biblia Puesta en Romance por Rabi Mosé Arragel de Guadaltajara*, contained in a collection published in honor of Marcelino Menendez y Pelayo, Madrid, 1899, vol. ii. pp. 1 *et seq.*, an account of which article will be found in *Bloch's Oesterreichische Wochenschrift*, May 11, 1900, p. 356. A detailed account has been given by Samuel Berger in the *Bulletin des Antiquaires*, 1898, pp. 239-244 (an abstract of which article can be found in the *Rev. Et. Juives*, xxxviii. 309-311), and in *Romania*, xxviii. 521. Compare also *Catalogo de las Colecciones Expuestas del Palacio de Liria*, Madrid, 1898, p. 40, and Reuss and Berger in the *Realencyclopädie für Protestantische Theologie*, 3d ed., p. 143, reprinted in *Urtext und Uebersetzungen der Bibel*, Leipsic, 1897, p. 263.

G.

ARRAS: Chief city of the department of Pas-de-Calais, capital of the ancient Artois, France. According to Gross, the name of this city appears in a very curious Hebrew document (De Rossi, MS. No. 563, 23), which relates that Robert the Pious, king of France (996–1031), together with his vassals and neighboring princes, having decreed the extermination of the Jews who refused baptism, a certain Jacob b. Jekuthiel went to Rome to invoke for his coreligionists the protection of the pope. The pope sent a high dignitary to put a stop to the persecution. Jacob went from Rome to Lorraine, and thence to Flanders, about 1023. He died there at אריין (*i.e.*, Arras), on the banks of a river, probably the Scarpe. His sons conveyed his body to Rheims.

It does not follow from this text that there was a Jewish community at Arras at this time; and the identification of the Hebrew word in question with Arras is very problematic. Jews probably were living at Arras, as in the whole surrounding region, in the thirteenth and fourteenth centuries; but nothing whatever is known of their history.

Bibliography: Gross, *Gallia Judaica*, pp. 71 *et seq.*

G. I. L.

ARROWS. See Weapons.

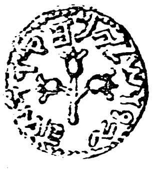
ARROYO, ISAAC BEN MOSES: Lived in Salonica toward the end of the sixteenth century. He wrote "Maḳhil Ḳohelet" (The Preacher Preaching) and "Tanḥumot El" (Consolations of God), philosophical expositions of Ecclesiastes and the Pentateuch (Salonica, 1597, 1573).

G. M. L. M.

ARSACES: Parthian king; according to some scholars, the sixth of that name, mentioned in I Macc. xiv. 2-3, as having entrapped Demetrius, who had rebelled against him. Demetrius married a daughter of Arsaces and, according to Josephus ("Ant." xiii. 5, § 11), died in captivity. He is further mentioned—in I Macc. xv. 22—in the number of kings to whom Rome sent the edict which forbade the persecution of the Jews. He is also known as Mithridates I.

G. G. B. L.

ART AMONG THE ANCIENT HEBREWS: Material for the formation of an opinion on the art of the ancient Hebrews is extremely scanty, as the vestiges are limited to certain specimens of pottery and of the glyptic art, including incidental references in Hebrew literature, touching mainly the Temple at Jerusalem.

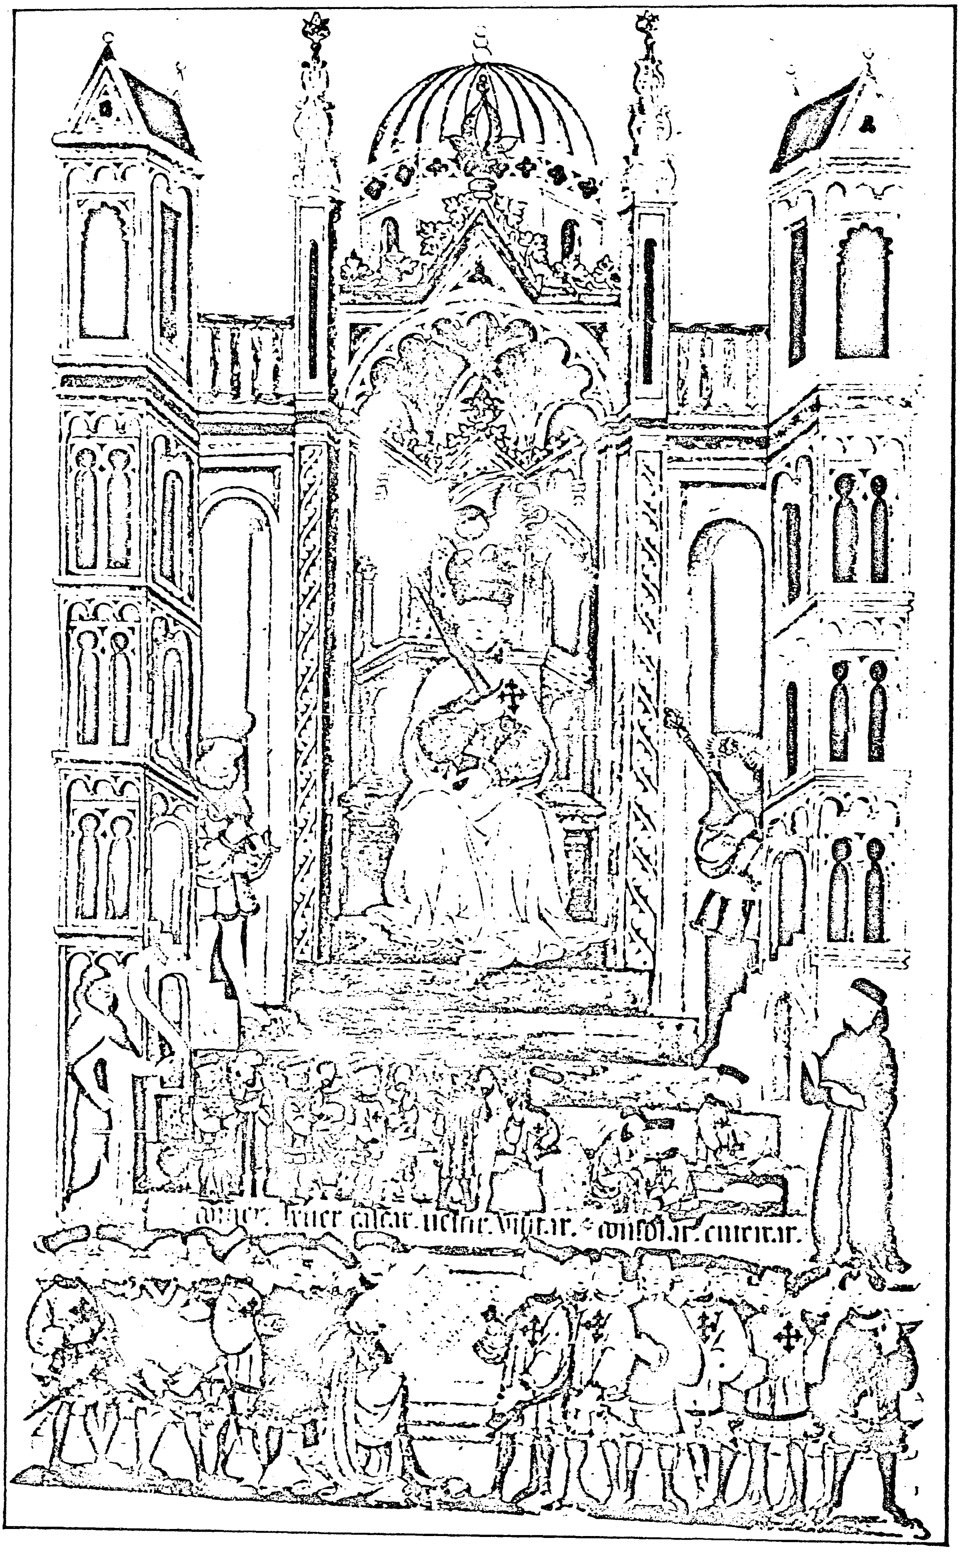


Shekel of Simon Maccabeus. (Exact size.)

(From the collection of J. D. Eisenstein.)

The potter's art reverts to the earliest days. After their settlement in Canaan, the Israelites no doubt soon learned this art from the inhabitants, although for a long time thereafter the Phenicians, who carried their earthenware to far-off lands, still continued to supply the interior of Palestine. Excavations in Jerusalem and Tell el-Hesy (probably the ancient Lachish) have yielded a proportionately rich fund of material, sufficient, according to Flinders Petrie, to trace the history of Palestinian pottery. Petrie distinguishes an Amorite, a Phenician, and a Jewish period, each having its own characteristic style. It is undoubtedly true that the art of pottery among the Hebrews was developed

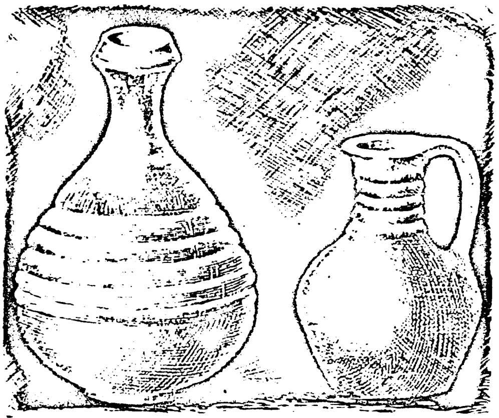
Pottery.



MOSES ARRAGEL PRESENTING HIS CASTILIAN TRANSLATION OF THE BIBLE TO DON LUIS DE GUZMAN.

(From "Estudios de Erudicion Española.")

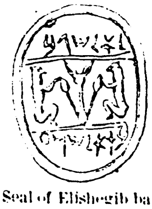
under Phenician influence, for its forms are always coarse imitations of Phenician models The older finds, especially those of Jerusalem, exhibit forms that are in use to-day throughout Palestine and Syria. See POTTERY.



Hebrew Pottery.
(From Warren, "Recovery of Jerusalem.")

Seal-Engraving.

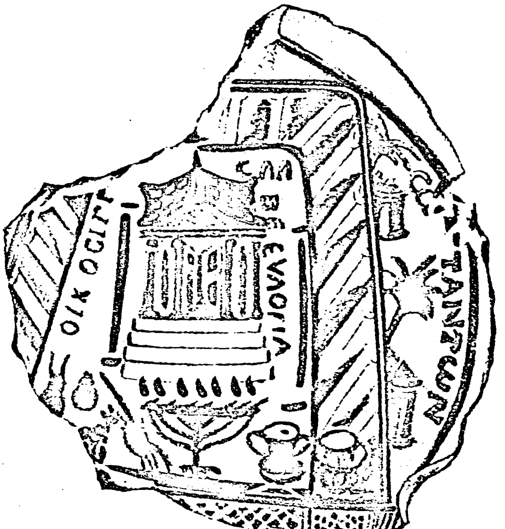
Glyptics dates back to remote antiquity. If tradition assumes that signet-rings were worn by the Patriarchs (Gen. xxxviii. 18), and that the generation of the wilderness journey was skilled in engraving on precious stones, it points at least to the antiquity of the art. The Hebrews were taught this kind of engraving by the Canaanites, who, in their turn, had received it from the Phenicians. Originally, this art of engraving came from the East; for in the Euphrates district it had been the custom since remotest time to attest all the more important business transactions by written contracts, to which the seals of the parties interested were affixed. The northern Syrians and Phenicians no doubt adopted the custom through their frequent intercourse with this district; and, with the custom, they doubtless learned also the art of making the seals. The devices upon these seals point likewise to their Eastern derivation (see Perrot and Chipiez, "Histoire de l'Art dans l'Antiquité," vol. iii., "La Phénicie," p. 240). It is, however, always difficult to decide whether any particular seal among those preserved belonged to the Hebrews or to some neighboring nation, unless it contain some distinctive name. Even when the name is indubitably Jewish, it is always possible that it may have been made by Phenicians. The Hebrew and Phenician seals resemble each other very closely in shape, script, and ornamentation. As to ornamentation, there are found devices of Phenician origin, such as the palm-leaf, garland of poppy-heads or pomegranates, winged spheres, etc., and those of Egyptian, such as Hathor's insignia, the eye of Osiris, etc. (see the illustrations in Benzinger, "Hebräische Archäologie," pp. 258 *et seq.*; and see article SEALS).



Seal of Elishegib bat Elishama cut in jasper.
(In the British Museum.)

Metal-Casting.

Of metal-work there are no remains extant. The description of Solomon's Temple is the main source of information upon this point, the notable fact in which is that it was a Tyrian artificer, named Hiram (I Kings vii. 13) or Huram Abi, as the chronicler calls him (II Chron. ii. 13), who made the necessary utensils for the sanctuary. The Jews themselves evidently had not yet mastered the art of casting in bronze or brass, certainly not to the extent necessary for this work. The account of the building in I Kings vii. affords only the merest outlines of the larger art-works manufactured for its use, such as pillars, the brazen sea, portable lavers, or basins, etc. The shapes of the smaller utensils, vessels, and vases of gold and silver were undoubtedly molded after Phenician models. It was especially in the manufacture of such articles that the Phenicians excelled; and their products ruled the market, particularly in Egypt. Even if the Jewish metal-workers under Hiram learned enough to make the smaller articles themselves (compare II Kings xvi. 10), they still were constructed upon Phenician lines. The same is true of the ornaments employed, which exhibit the Phenician composite style. Thus, in addition to native flowers, are found the palm-leaf of Assyria, the lotus-flower of Egypt, and especially pomegranates and colocynths. Figures of animals, so frequently found on Phenician vases, were among the decorations of the borders of the brazen sea. In religious symbolism, likewise, the same Egyptian and Jewish forms are found alongside each other: the lotus, the eye of Osiris, Hathor, and Horus upon seal, all of Egyptian origin—the original meaning of these symbols was of course lost to the Syrian artists—while the most frequent device of Babylonian origin among the Hebrews was the cherub (I Kings vi. 23-28, 32, 35; vii. 36; see CHERUB).



Fragment of a Glass Vase, with Representation of the Temple.
(From Vigouroux, "Dictionnaire de la Bible.")

Older than the art of metal-casting among the

Jews was another species of metal-work—overlaying with metal plate. The very ancient Ephod received its name no doubt from the fact that it consisted of a figure of wood or other material, overlaid with gold or silver foil. The "calves of gold" at Dan and Beth-el were probably only idols thus overlaid, and not entirely composed of solid metal (I Kings xii. 28). Later accounts of the building of the Temple specify that the walls and doors, and even the floor, were overlaid with gold leaf.

Sculpture.

The plastic art was the one that had the least opportunity for development. Sculpture in stone hardly existed at all among the Jews: they possessed neither clay idols—the "mazebah" was always a plain stone pillar—nor sarcophagi, which latter, in Phenicia and Egypt, afforded opportunity for art-display; nor are any sculptured decorations of their stone houses known. They evidently lacked during all this period the ability to execute artistic work in stone.

Ivory- and wood-carving, on the other hand, were practised by the Jews from ancient times. The above-mentioned overlaying with metal involved, as a necessary condition, that the underlying wood had been wrought into proper shape. The old teraphim seem to have been of human form, or at least to have possessed a human head (I Sam. xix. 13). The cherubim for the Holy of Holies were carved out of olive-wood. The wood-work of the walls and doors of the Temple was ornamented with carvings (I Kings vi. 18, 29, 35). Solomon's throne of state is mentioned as an important product of the carver's art (in ivory) (I Kings x. 18-20); but unfortunately it is not stated whether it was made by Jewish or by Phenician artificers.

Religion as an Opponent of the Plastic Art.

It was the religion of the Jews that precluded the full development of the art of sculpture, and so confined it within the above-mentioned narrow limits. In the most ancient times, when images were not proscribed, the technical ability to make them artistically was lacking; and when in later periods this artistic skill might have been acquired from others, images were forbidden. The persistent fight of the Prophets against images was waged with such success that in the end not only was any representation of the Deity forbidden, but even the portraiture of living beings in general, man or beast. Such a command as that of the Decalogue (Ex. xx. 4; Deut. v. 8) would have been impossible to a nation possessed of such artistic gifts as the Greeks, and was carried to its ultimate consequences—as to-day in Islam—only because the people lacked artistic inclination, with its creative power and formative imagination.

Painting.

The same reason, to which is to be added a defective sense of color (see Delitzsch, "Iris, Farbenstudien und Blumenstücke," pp. 43 *et seq.*; Benzinger, "Hebr. Archäologie," pp. 268 *et seq.*), prevented any development of painting. Attempts in this direction are found in the earliest times in the custom of decorating with colors jars, vases, and articles of similar character. Objects found at Tell el-Hesy show such attempts of a somewhat rude fashion; those found in Jerusalem exhibit them executed in a more careful and finished manner. The question, of course, still remains whether these latter objects are native products or imported articles. In either case the painting amounts to but a simple form of ornamentation by means of colored lines, in which geometrical figures predominate, with parallel lines and lines at right angles, zigzag and waving lines, all forming a sort of band around the neck or body of the vessel. In the Old Testament, painting is not mentioned: when Ezekiel (xxiii. 14) speaks of "men portrayed upon the wall, the images of the Chaldeans portrayed with vermilion," it is not painting that is referred to, but probably outline drawings with a colored pencil, the contours being then filled in with color. See CHERUB, HOUSE, SANCTUARY, SYNAGOGUES, TEMPLE, POTTERY, SEALS.

Robinson's Arch, Jerusalem.

J. JR. I. BE.

ART, ATTITUDE OF JUDAISM TOWARD: Art, the working out of the laws of beauty in the construction of things, is regarded in the Bible as wisdom resulting from divine inspiration (Ex. xxxi. 1-6, xxxv. 30-35, xxxvi.-4), and is called in the Talmud "hokmah" (*wisdom*), in distinction from *labor* (חכמה ואינה מלאכה. R. H. 29*b*; Shab. 131*b*). It is, however, somewhat incorrect to speak of Jewish art. Whether in Biblical or in post-Biblical times, Jewish workmanship was influenced, if not altogether guided, by non-Jewish art. Roman architecture was invoked in the building of Herod's Temple just as Phenician architecture was in the construction of those of Solomon and of Zerubbabel (I Kings vii. 13; Ezra iii. 7). Plastic art in general was discouraged by the Law; the prohibition of idols in the Decalogue (Ex. xx. 4) being in olden times applied to all images, whether they were made objects of worship or not (see Josephus, "Ant." xvii. 6, § 2; xviii. 3, § 1; *ib.* "B. J." i. 33, § 2; ii. 9, § 2; 10, § 4). In accordance with this view the pious in Talmudical times even avoided gazing at the pictures engraved on Roman coins ('Ab. Zarah 50*a*; Pes. 104*a*; Yer. Meg. iii. 2 [74*a*]; Hippolytus, "Refutation of All Heresies," ix. 21). It is possible, however, that these figures formed an exception because they were, as a rule, representations of kings or emperors worshiped as gods by the Romans.

Influence of Idolatry.

Rabbinical tradition, however, follows more rational rules in interpreting the law prohibiting images. Referring the law, Ex. xx. 23, "Ye shall not make with me gods of silver, neither shall ye make unto you gods of gold," to beings beheld by prophetic vision at the throne of God, or to anthropomorphic visions of God himself, the Rabbis forbade only the fashioning of the four figures of Ezekiel as a whole or of any other angelic being, and especially the making of human figures, as these might be made objects of worship (Mek., Yitro, x.; 'Ab. Zarah 42*b*, 43*b*). In view, however, of the fact that only carved figures or statues were, as a rule, objects of worship, the prohibition was not applied to images not projecting ('Ab. Zarah 43*b*). Portrait-painting, therefore, was never forbidden by the Law. As a matter of fact, far more potent than the Law was the spirit of the Jewish faith in putting a check on plastic art. In the same measure as polytheism, whether Semitic or Aryan, greatly aided in developing art as far as it endeavored to bring the deity in ever more beautiful form before the eye of the worshiper, Judaism was determined to lift God above the realm of the sensual and corporeal and to represent Him as Spirit only. In particular, the lewdness of the Astarte worship, which still exerted its evil influence in post-exilic times (Isa. lvii. 3 *et seq.*), offended the Jewish sense of chastity, so that idolatry was termed "to go a whoring" (Num. xv. 39; Hosea i. 2, and elsewhere). Nor was the Syrian or the Greco-Roman idolatry any purer in the judgment of the Rabbis, as may be learned from 'Ab. Zarah ii. 1, where it is stated that the heathen in Mishnaic times were still suspected of sexual intercourse with beasts. They saw too often in artistic beauty the means of moral depravation, and insisted, therefore, on the mutilation or destruction of every idol (*ib.* iv. 5). And whatever the Church did during the Middle Ages toward developing art, in the eyes of Judaism the images of Jesus and the Virgin, of the apostles and the saints, presented a relapse into pagan idolatry, warning the Jew all the more strongly against the cultivation of the plastic arts, since both the making of or the trading with any such images as might be used for the Christian cult was forbidden (Shulḥan 'Aruk, Yoreh De'ah, 141, 3). In all probability the extensive use made by the Church of symbolic figures caused the Jew to shun applying them.

In the Middle Ages.

Still, both ecclesiastical and secular art existed to some extent among the Jews of the Middle Ages. While it was a rule not to decorate the walls of the synagogue with figures, lest the devotion of the worshiper should be distracted by the sight, the doors of the synagogue and the Ark were frequently ornamented with representations of animals (among which the lion was a favorite subject), occasionally also of birds and snakes, and of plants (such as flowers, vines, and the like). In all cases where fear of idolatrous worship by non-Jews was excluded, liberal-minded rabbis saw no reason for prohibiting such ornamentation, whereas rigorists would discourage it altogether (see Berliner, "Aus dem Inneren Leben der Deutschen Juden im Mittelalter," p. 117; D. Kaufmann, in "Jew. Quart. Rev." ix. 254 *et seq.*; Abrahams, "Jewish Life in the Middle Ages," p. 29).

Of home utensils, cups and lamps used for Sabbath and festival days were occasionally, despite the opinion of rabbinical authorities, embossed with figured designs. Platters painted and inlaid, table-covers embroidered with golden birds and fishes, wooden vessels edged and figured, were in common use (Abrahams, *l.c.* p. 146). The walls of the houses of the rich were sometimes decorated with paintings of Old Testament scenes, and on the outside secular subjects were portrayed (Berliner, *l.c.* p. 35; Abrahams, *ib.*). Portrait-painting, though not common, was not unknown among the Jews of Germany in the eighteenth century; while in Italy it existed as early as the fifteenth century. Especially was the illumination of manuscripts and the artistic binding of books carried to great proficiency by Jews, who probably acquired the art from the monks (Abrahams, *l.c.* p. 220). According to Lecky "(Rationalism in Europe," ii. 237, note 2), many of the goldsmiths of Venice who cultivated the art of carving were Jews. Of recent years greater attention has been paid to the subject of Jewish ecclesiastical art, especially since the Anglo-Jewish Historical Exhibition of 1887. Societies have been founded at Vienna, Hamburg, and Frankfort-on-the-Main devoted to the collection and study of artistic objects used in Jewish acts of worship, whether in the synagogue or the home. In bibliography, also, attention is now being paid to title-pages, illustrations, initials, and the like, in which Jewish taste has had an influence.

Modern Jewish art no longer bears the specific character of the Jewish genius, but must be classified among the various nations to which the Jewish artists belong. See AMERICA, ARCHITECTURE IN: ALMEMAR; ARK; CEMETERY; COINS AND MEDALS; MEGILLAH; SEFER TORAH; SYNAGOGUE.

——**Art in the Synagogue:** This is restricted for the reason that it distracts the thought of the worshiper at prayer. A prohibition against copying the forms of the cherubim of the sanctuary or the four animals of the Chariot for synagogue use was deduced from the words of the Decalogue, "Ye shall not make 'with me'" (Mek., Yitro, 10; 'Ab. Zarah 43*b*), but it was held not to apply to the lion alone, when shown without the other animals of the Chariot group; hence this animal was extensively used as an ornament on the Ark and as the ensign of Judah. The synagogue of Ascoli in Italy had an Ark of gilt walnut with two life-size lions, carved out at the bottom, flanking the steps leading to the doors behind which the scrolls were deposited. After the expulsion of the Jews in 1569 the Ark was removed to Pesaro (D. Kaufmann, in "Jew. Quart. Rev." ix. 254-269). R. Moses Trani, in answer to an inquiry, decided that a bas-relief sculpture of a lion should not be permitted to remain within an Ark of the Lord (Responsa, i. 30, quoted in "Leḳeṭ ha-Ḳemaḥ," p. 36*b*).

David ibn Zimra, in the case of one who built a synagogue in Crete and wished to place a crowned lion on the top of the Ark—the design of his coat of arms—decided against it (Responsa, No. 107).

Judah Minz of Padua would not allow Hertz Werth, a rich member of his congregation, to place before the Ark an embroidered curtain with a bas-relief of a deer set in pearls, being his coat of arms, while other rabbis permitted it. Finally, a compromise was reached by Rabbi Isaac Castiglione, who allowed the figure of the deer to be embroidered on the curtain without forming a bas-relief (J. Caro, "Abkat Rokel," Responsa, No. 65). Joseph Caro, in reply to a question, permitted figures of birds to be embroidered on the curtain (*ib.* No. 66). While R. Eliakim ordered paintings of lions and snakes to be erased from the walls of the synagogue at Cologne, R. Ephraim permitted the painting of horses and birds on the walls of the synagogue (Mordecai, 'Ab. Zarah iii.; "Bet Joseph" to Tur Yoreh De'ah, § 141). Indeed, curtains embroidered with figures are in use in almost every country where the Jews are scattered, without any fear of disturbing the thought of worshipers in the synagogue, for the reason that artistic decoration in honor of the Torah is regarded as appropriate, and the worshiper, if he be disturbed by it, needs not observe the figures, as he can shut his eyes during prayer ("Abkat Rokel," Responsa, No. 66).

On the other hand, Elijah Capsali decided against any decoration in the synagogue which employed figures of animals as part of the design. R. Samuel Archevolti objected to the decorations of the Safed synagogue, and his opinion received the approbation of Moses Alsheik and R. Jacob BeRab ("Jew. Quart. Rev." *ib.*). Moses Sofer ruled against a stained-glass window above the Ark bearing the figure of the sun with rays and inscribed: "From the rising of the sun even to the going down of the same the Lord's name is to be praised;" on the ground that the people bowing to the Ark, on entering the synagogue, would be worshiping the sun ("Hatam Sofer," Responsa, No. 129).

A case occurred where a representation of a "menorah" (Ḥanukkah lamp) had been painted on the Ark, with a different verse of the Seventy-seventh Psalm for each of the seven branches, and on the occasion of its renovation the ambitious artist signed his name to it. R. David ibn Zimra (Responsa, No. 107) said he had no objection to the replacement of the old design by a more artistic painting; but he ordered the signature to be erased, as that innovation was likely to attract attention, and was disrespectful in a synagogue. The same decision is rendered by Mendel Krochmal ("Ẓemaḥ Zedeḳ," Responsa, No. 50).

ARTA or **LARTA:** Chief city of the nomarchy of Arthamania, Greece; situated on the Arta, about 7 miles from its mouth. It is the ancient Ambracia, called by the casuists of the sixteenth century Acarnania, and assigned to the Morea. In 1890 it contained 4,328 inhabitants, of whom about 200 were Jews. Little is known of the early history of the community. The casuists of the sixteenth century speak of an old synagogue "of the Corfiotes" (called also "of the natives," קהל תושבים), which leads to the supposition that Jews from Corfu settled at Arta when Roger I. of Sicily took possession of that Ionian island. Moreover, Benjamin of Tudela (about 1170, under Manuel I. Comnenus) mentions 100 Jews (or Jewish families?), whose leaders were R. Solomon and R. Heracles.

Fifteenth Century.

At the time of Scanderbeg (1404-67), Arta was already under Turkish rule. Upon their expulsion from the Spanish dominions, the Jews, coming from Calabria, Apulia, and Sicily, formed congregations and established a college. The earliest leaders of the latter were Rabbi Caleb (a name which frequently occurs among both Rabbinites and Karaites, and was later used by the Sephardim as a family name), Solomon Hamy, and Benjamin b. Shemariah, and, later, Abraham Obadiah Sephardi (died at an advanced age before 1529), who bequeathed his whole fortune to the poor of the Corfiote and Apulian synagogues; and finally Benjamin b. Mattathias (died before 1539), the author of "Binyan Ze'eb." The last-named, a loyal and modest character, was engaged in commerce in addition to his studies. He corresponded with the rabbis of Venice, of Constantinople (Elijah Mizraḥi), and of Salonica (Joseph Taytazak), and engaged in disputes with David Cohen of Corfu. His son-in-law, Samuel b. Moses Calai (still living in 1574), author of "Mishpete Shemuel" (Venice, 1599), was the contemporary and rival of Isaac (b. Shabbethai?) Cohen, Solomon b. Baruch, Abraham b. Moses, and others. Somewhat earlier lived the notary Shabbethai b. Moses Russo (1525). About that time (before 1534) certain new ordinances were instituted. It appears that the Jewish youth of both sexes had somewhat scandalized the community of Arta by holding dancing parties. The heads of the commu-

Internal Dissensions.

nity not only put an end to such entertainments, but also forbade betrothed young men to visit their fiancées before marriage, as was the ancient custom of the natives. This last measure caused dissensions in the community. The Jews originally from Apulia, numbering about thirty families, especially protested, under the leadership of the heads of the community, Shabbethai b. Caleb and Moses b. Shabbethai Clevi (Clevois?), Judah b. Jacob, and David b. Solomon Mioni, Herero b. Solomon Pichon, Mordecai b. Mazalṭob Maça, Mattathias b. Leon, Mattathias b. Solomon Benjamin Haliezi (probably from Haliez in Galicia), and Shabbethai b. Abraham Fidelo. In order to avoid future scandal and to secure the sanctity of the home, it was decreed (about 1521) that betrothals should be entered into only in the presence of ten laymen and one rabbi. Moreover (before 1561), dice or any other games of chance were forbidden except on the semi-holidays, Purim, and the fast preceding it.

The Jewish population of Arta comprised at this period about 300 families, who were, however, not completely assimilated: for the Greek Jews had not yet yielded altogether to the Spanish. In addition to the occurrence mentioned above, the Jews had other causes for dissension among them, chiefly in regard to the apportioning of the taxes. In this latter case the difficulties were adjusted by the syndics. But disputes arose among the permanent residents of Arta, or between them and strangers who came to the city, like the Jews of Patras who had left their native town to escape some great danger. Arta itself, where they sought refuge, did not always afford protection. In one instance the governor of the city cast all the Jewish inhabitants into prison during the Feast of Tabernacles in order to extort from them the sum of 3,000 florins.

The Jews on the highways were even less secure than in the cities: the casuists of this epoch record several assassinations of Jews; *e.g.*, that of Moses Soussi. The principal occupation of the Jews being commerce, they traveled a good deal, either to Corfu or to Janina (45 miles from Arta), where they sold Venetian wares or fabrics, or to neighboring villages and other places. They also followed various trades, even women being engaged in dyeing silk. There were also Jewish physicians at Arta (Jacob Rofé, Moses Polastro), who at times charged the comparatively large sum of 50 ducats for treating a patient.

The moral tone of the community, though marked on the whole by devotion and even an austere piety, was lowered in individual cases through lack of central administration. Thus, a certain Shemariah b. Abraham dared to maltreat the rabbi Benjamin b. Shemariah and even to say things prejudicial to the community. Another, Solomon by name, stigmatized as apostates the Maranos who, fleeing from Apulia, sought refuge at Arta. Finally, a certain Manoah Politzer (? פליצר), with the assistance of two false witnesses, Abraham Turkia and Abraham Tobiel, appropriated (about 1529) the legacy of R. Abraham Sephardi mentioned on page 143. In contrast to this darker side is the solidarity which united not only the Jews living in Arta, but also the latter with those of the neighboring towns. Thus it is recounted that when some pirates robbed a certain Eliezer of Pola (מפולי) and sold their booty to the Jews of En-Mavra, a notification from the rabbinical body of Arta was sufficient to cause the purchasers to restore the property to the owner in consideration of the expenses involved.

Decadence in Seventeenth Century:

Rabbinic studies declined here as in the Orient generally. By the seventeenth century the rabbis—for example, Eliezer Menahem—were obliged to seek their knowledge at the colleges of Salonica, as probably also R. Moses Jacob, Raphael Cohen, Abraham 'Iṭon (עטן), and Shabbethai Russo, contemporaries of the chronicler David Conforte. This decadence was doubtless due in part to the political vicissitudes which successively befell Arta, such as the invasions of the Venetians (1688), of the French (1797), of Tepedelenli Ali, pasha of Janina (1798), of the Greeks (1821), and lastly of the Turks (1821).

Modern Times.

Between 1854—when the town revolted against the Turks, who reconquered it after a few months—and June, 1880, nothing of note occurred among the Jews of Arta. Then, at the instance of some public-spirited men, the Talmud Torah was reorganized so as to include both secular and religious instruction. This reform went into effect a year later (June, 1881), according to regulations written in three languages (Hebrew, Greek, and Italian), dated March 17, 1880, and signed by Julius (Shabbethai Ezra) Besso (president), Jacob Raphael Mioni (vice-president), Moses Daniel Yerushalmi (treasurer), Michel Shabbethai Besso (secretary), and the inspectors Elie Joseph Cané, Moses Solomon Battino, Moses Zaffo, and Abraham Shabbethai (printed by Nacamulli, Corfu). Mention is also made of two benefactors of the institutions, citizens of Corfu: (1) Abraham Tchaki, who contributed much toward the success of the work, and (2) especially Solomon Abraham, who, in addition to funds, gave a building of the value of 1,000 francs, which he owned at Arta. Nicole Zanetti is mentioned as professor of Greek.

Some time after (1881), Arta was ceded by the Turks to the kingdom of Greece, conformably to the Treaty of Berlin.

G. A. D.

ARTABAN V.: Last of the Parthian kings; died in the year 227. He was the son of Volageses V., whose throne he ascended about 216, after a struggle with his brother Volageses VI. For many years he successfully conducted a war against the Romans, defeating both Caracalla and his successor Macrinus. He lost his life, however, in his conflicts with the Persians, 227.

This last ruler of the house of the Arsacids was well inclined toward the Jews: Abba Arika, the head of the academy of Sura, received signal marks of his friendliness. Thus he once sent to him a number of valuable pearls as a gift, and received in return from Abba Arika a *mezuzah* (door-post inscription), with the remark that the word of God was of a higher value than all the gems of earth

(Yer. Peah i. 1, p. 15*d*; Gen. R. xxxv., end; in both places "Rabbi" is erroneously given in place of the original "Rab").

When Artaban died Rab exclaimed in sorrow. "The bond of friendship has been sundered!" ('Ab. Zarah 10*b*. The text has ארדבן; read ארדבן (Persian Ardewan); Kohut, "Aruch Completum," i. 280).

Bibliography: Gutschmid, *Gesch. Iran's*, pp. 154 *et seq.*, 1888; Jost, *Gesch. des Judenthums*, ii. 139; Grätz, *Gesch. der Juden*, 2d ed., iv. 281.

G. L. G.

ARTAPANUS: Historian; lived in Alexandria in the second century B.C. He wrote a history of the Jews, parts of which have been preserved in the writings of the church-fathers Eusebius ("Præparatio Evangelica," ix. 18, 23) and Clement of Alexandria ("Stromata," i. 23, 154), as well as in those of some later authors. Freudenthal shows that both Alexander Polyhistor and Josephus made use of Artapanus' work. The fragments that have survived enable one to form an opinion—not a very flattering one—as to the merits of their author. Artapanus evidently belonged to that narrow-minded circle of Hellenizing Jews that were unable to grasp what was truly great in Judaism, and, therefore, in their mistaken apologetic zeal—for even in those early days Judaism had its opponents among the Hellenes—set about glorifying Judaism to the outer world by inventing all manner of fables concerning the Jews. As an illustration of this method, the following account of Moses will serve. According to Artapanus (Eusebius, *ibid.* ix. 27), Moses is he whom the Greeks called Musæus; he was, however, not (as in the Greek legend) the pupil, but the teacher, of Orpheus. Wherefore Moses is not only the inventor of many useful appliances and arts, such as navigation, architecture, military strategy, and of philosophy, but is also—this is peculiar to Artapanus—the real founder of the Greek-Egyptian worship. By the Egyptians, whose political system he organized, Moses was called Hermes *διὰ τὴν τῶν ἱερῶν γραμμάτων ἑρμηνείαν* ("because he expounded the writings of the priests").

The departure from Egypt is then recounted, with many haggadic additions and embellishments. The astounding assertion, that Moses and the Patriarchs were the founders of the Egyptian religion, led Freudenthal to the assumption that "Artapanus" must be a pseudonym assumed by some Jewish writer who desired to be taken for an Egyptian priest, in order to give greater weight to his words. This supposition, however, as Schürer points out, is highly improbable, and fails to explain the remarkable phenomenon of a Jew ascribing a Jewish origin to the Egyptian pantheon. It is much more probable that Artapanus belonged to a syncretistic circle of philosophers that saw no such grave objection to a moderate idolatry as to prevent its being accepted as of Jewish origin. Having adopted the Greek fables that derived the Egyptian cult from Grecian heroes, and having identified these heroes with Biblical personages, he had no alternative but to trace the idolatry of Egypt to a Jewish source.

[Or, Artapanus' position may have been somewhat as follows: Thinking it necessary for the honor of the Jewish people that they should be regarded as the source of all religion, he chose to attribute to them the origin of the Egyptian religion in spite of difficulties that he may have felt in connection with its idolatry.—T.]

T. L. G.

ARTAXERXES I. (surnamed **Longimanus**—"Long-Hand"): King of Persia; ascended the throne in 465 B.C., and died in 425 B.C. In the Persian name Artakhshathra ("he whose empire is perfected") the "thr" (written with a special sign in Persian) is pronounced with a hissing sound, and is therefore represented in other languages by a sibilant. Thus in Babylonian, Artakshatsu, Artakhshassu, and numerous variations; in Susic, Irtakshashsha; Egyptian, Artakhshasha; Hebrew, ארתחשׁשׁתא and ארתחשׁסתא (that is, Artakhshasta); in Greek, *'Αρταξέσσης* (inscription in Tralles' "Corpus Inscriptionum Græcarum," 2919), and by assimilation with the name Xerxes *'Αρταξέρξης* and *'Αρτοξέρξης*. According to the chronographic lists of the Babylonians and of the Ptolemaic Canon, Artaxerxes I. reigned forty-one years, which includes the short reign of his son Xerxes II.; murdered after a reign of six weeks. Some Greek authorities give him only forty years; thus Diodorus, xi. 69, xii. 64. (Concerning the chronology, compare Meyer, "Forschungen zur Alten Geschichte," 1899, ii. 482.) From this period many dated archives are extant, found throughout Babylonia, but particularly in Nippur, by the expedition of the University of Pennsylvania (published by Hilprecht and Clay, "The Babylonian Expedition of the University of Pennsylvania," vol. ix., 1898). But there are no archeological remains of the reign of Artaxerxes I. with the exception of a single inscription on a building in Susa and an alabaster vase in Paris which bears his name in Persian, Susian, Babylonian cuneiform, and in hieroglyphs. All information concerning him is derived from the accounts of Greek writers, especially the fragments of Ctesias, and from the statements of the books of Ezra and Nehemiah. Josephus wrongfully claims that the Ahasuerus (Xerxes) of the Book of Esther is this Artaxerxes I., and also that the Artaxerxes of Ezra and Nehemiah is Xerxes.

Sources of Information.

Artaxerxes was the second son of Xerxes, who was murdered in the summer of 465 by his all-powerful vizir Artaban. The murderer accused the king's eldest son Darius of the crime, with the result that Darius was slain by his younger brother Artaxerxes, who then mounted the throne. But Artaban sought the crown for himself, and therefore aimed at the life of the young king; the latter, it is stated, warned by Megabyzus, his brother-in-law, rid himself of the murderer by slaying him, with all his household and party, in open combat (Ctesias, "Persica," 29; Diodorus, xi. 69; Justin, iii. 1, according to Dinon; but Aristotle, "Politics," viii. 8, 14 has a different version). The murder of Xerxes is mentioned also by Ælian ("Variæ Historiæ," xiii. 3), and in an Egyptian inscription of the time of Ptolemy I., which ascribes the deed to the vengeance of an Egyptian god on the foreign king. The Greek chronologists evidently through a misunderstanding, make of Artaban a Persian king and state that he reigned seven months. The Greeks gave Artaxerxes the surname *Μακρόχειρ* (Longimanus, Long-Hand), asserting, probably correctly, that his right hand was longer than his left. They uniformly describe him as a brave and handsome man, a kindly and magnanimous ruler (Nepos, "De Regibus," ch. i.; Plutarch, "Artaxerxes," ch. i.). The authentic narrative of Nehemiah gives an accurate picture, showing him to have been a kindly monarch, who, noticing the sadness of his cupbearer, asked him his wish and granted it. This characterization does not deny that he was susceptible to harem-influence or that he could become very angry when any one appeared presumptuous. Ctesias relates that he once sought to decapitate Megabyzus because, on a hunting expedition, when a lion was about to spring upon the king, Megabyzus slew him without awaiting the royal spear-thrust. The women of the court interceded for the offender, and his sentence was commuted to long exile upon an island in the Persian gulf, whence he finally succeeded in escaping. He afterward secured the king's pardon. The reverence with which the Persians regarded Artaxerxes may be seen in the fact that two of his successors adopted his name.

His Character.

His long reign was generally tranquil, the system of government introduced by Darius working satisfactorily. A few satraps who rebelled now and again (as, for instance, at the very beginning of the reign, the governor of Bactria), were speedily subdued. On the borderlands and in the mountainous districts the authority of the government may not have been vigorously sustained, but every other religion under his sway in Asia may be said to have enjoyed a period of peaceful growth. Artaxerxes I. was, however, not a creative genius.

Fuller details are known concerning his relationship to the Jews, toward whose development at a critical juncture he contributed efficiently. Two documents are contained in the Book of Ezra, ch. iv. (albeit wrongfully placed by the editor of that work); and there are also fragments of the memoirs of Ezra and Nehemiah themselves. Both documents in ch. iv. and the decree containing Ezra's appointment in ch. vii. have been declared spurious. In addition, the attempt has been made frequently to place Ezra's journey and reforms in the reign of Artaxerxes II.; but all such endeavors are critically untenable (compare Meyer, "Entstehung des Judenthums," 1896).

His Relations to the Jews.

In the seventh year of Artaxerxes I. (458 B.C.) the Babylonian Jews requested that permission should be given to the priest Ezra to visit Palestine, with full power over the Jews there, and to enforce the book of the Law as the will of the king. How the king acceded to this request, and how Ezra endeavored to carry out his mission, are well known. Ezra first took strong measures against the mixed marriages, coming thereby into conflict with "the people of the land," the Samaritans and their allies. To protect himself against them, Ezra undertook to rebuild the walls of Jerusalem. Permission for this was not contained in the commission he had received from the king; accordingly the Samaritans and their governor, Rehum, interfered and addressed a letter to the king, given in Ezra iv. 7. The king, who had no doubt been informed of the former importance of the rebellious city and the danger which its refortification might threaten to his revenues, issued orders that the rebuilding of the walls must stop (iv. 17). The triumph of the Samaritans was complete; the walls were torn down, and the gates were burnt (Neh. i. 3). Such was the condition of the city when, in Kislew of the twentieth year (December, 446), Nehemiah, the king's cupbearer, received information from his brethren concerning it. The Bible narrative tells how he succeeded in being sent as governor to Judea, and how he immediately (summer of 445) set energetically to work to restore the fortifications, thus enabling Ezra, through the influence of his authority, to establish the book of the Torah as the law binding upon the Jews. Nehemiah returned to court in 433 (Neh. v. 14, xiii. 6), but was despatched to Judea a second time to counteract certain evils which had arisen.

G. E. Me.

ARTAXERXES II. (originally **Arsakes,** surnamed **Mnemon** by the Greeks): The eldest son of Darius II.; succeeded his father in 404 B.C. (Diodorus, xiii. 108), and adopted the name of his grandfather Artaxerxes. He reigned until 359; that is, 46 years.

Artaxerxes II. seems to have been of a noble disposition; but, despite personal bravery, he was feeble in character, and under subjection to his imperious mother, Parysatis, who favored her younger son Cyrus to the extent of desiring the throne for him. After Cyrus' rebellion, and his death in the battle of Cunaxa (401 B.C.), Parysatis ruled the king completely and led him into the gravest crimes. Owing to his weakness, he was not the man to save the effete and dying Persian empire. Immediately upon his accession Egypt declared and maintained its independence. His whole reign was filled with rebellions and uprisings by satraps, especially in Asia Minor and Syria, though Palestine, then under the rule of the high priests, seems to have steered clear of any participation. Nevertheless, the internal distractions of the Greek world enabled him to succeed in the main in asserting that supremacy over Greece that Darius and Xerxes had vainly aimed at. After having diverted the attack of the Spartans by inciting their war against Corinth, he succeeded, through conjunction with Sparta and Dionysus I. of Sicily, in imposing his will upon the Greeks by the celebrated "Peace of the King," in 387 B.C. For decades thereafter, this "King's Peace" was the law in Greece, against which no state dared rebel.

Bibliography: Greek histories, especially Plutarch's biography of this king, are full of information concerning Artaxerxes II.; but the suggested connection with the history of Ezra, made by some historians, is without foundation.

G. E. Me.

ARTAXERXES III.: A son of Artaxerxes II. He originally bore a name which in Babylonian was written "Umasu" (and therefore in the Ptolemaic canon, as given by Elias of Nisibis, the form

אֹמִים is found). He was called Ochus by the Greeks. After he had rid himself of the rightful successor, Darius, he mounted his father's throne in the autumn of 359 B.C., and reigned until the summer of 338. Hence the Babylonians and the Ptolemaic canon assign twenty-one years to his reign, while Diodorus (xv. 93; xvii. 5), together with the Greek chronologies, wrongly extends his reign by some years (see Meyer, "Forschungen zur Alten Geschichte," ii. 466, 488 *et seq.*, 496 *et seq.*).

His Character.

Artaxerxes III. Ochus was a cruel and bloodthirsty despot. He began his reign by murdering all relatives who might become dangerous to him. He was, however, a most energetic ruler, who allowed himself to be discouraged by no obstacle or failure, but ruthlessly prosecuted his purposes. With the assistance of the unscrupulous eunuch Bagoas and his Rhodian captains of mercenaries, Mentor and Memnon—fitting tools for his schemes—he succeeded in cementing the rapidly disintegrating empire of Persia by bloodshed, treachery, and fraud. He crushed several insurrections, notably that of the rebellious Sidonian in 345–344; and after many unsuccessful attempts he succeeded, in 343 or 342, in subduing Egypt also, and made it suffer severely for its rebellion.

Connection with Jewish History.

A certain conflict with his Jewish subjects seems to have been connected with these struggles. Josephus ("Ant." xi. 7, § 1) relates that when the high priest Judas (Joiada) was succeeded by his son Johanan (Jonathan or John; compare Neh. xii. 11, 22), his brother Jesus (Joshua) sought to deprive him of the office. Jesus relied for support upon Bagoses, Artaxerxes' general (the Bagoas previously mentioned), and so enraged Johanan that the latter struck him down in the Temple. Bagoses seven years later avenged the murder of Jesus by exacting of the Jews a tax of 50 drachmas for each lamb offered at the daily sacrifices. He also unlawfully and forcibly entered the Temple precincts, claiming that he was purer than the murdering high priest Johanan. There is no reason to consider this account as being in its essentials untrue (Willrich, "Juden und Griechen vor der Makkabäischen Erhebung," p. 89, declares the episode to be a misunderstanding of events which happened under Antiochus Epiphanes). It is probably to this episode that Eusebius refers in his "Chronicle" (under date of 1657 from Abraham—that is, 360 B.C.—which date is certainly erroneous; he is followed by Jerome; by Syncellus, p. 486; and by Orosius, iii. 76), when he relates that Artaxerxes III., upon his march against Egypt, carried a number of Jews into exile in Hyrcania and Babylonia. Possibly one of the uprisings alluded to above may have included a portion of Judea. This is possibly also the explanation of the strange statement of Justin (xxxvi. 3) that Xerxes, the king of the Persians, conquered the Jews. Neither of these statements is particularly reliable. The suggestion that the story of Judith is a reflection of these events lacks all foundation. The statement of Solinus (xxxv. 4) that Jericho was besieged by Artaxerxes and destroyed by him, has been explained by Theodore Reinach ("Semitic Studies in Memory of A. Kohut," pp. 447 *et seq.*) to refer to the conquests of the Sassanian king Artaxerxes I. (226–241).

In 338 Artaxerxes III., with most of his sons, was murdered by Bagoas; one of his sons, Arses, was elevated to the throne; but after a reign of two or three years he also was put to death by the murderer of his father.

ARTEMION: Leader of the Jewish insurrection in Cyprus against Trajan, 117. There are but scanty details of this revolt. According to Roman sources, the Jews destroyed the capital of the island of Salamis and slew 240,000 Greeks. The revolt was quelled by Trajan's general Martius Turbo; and to judge by the atrocities committed by him, the suppression was attended with very sanguinary results for the Jews. The law passed in Cyprus after the revolt, that no Jew should set foot on the island, and that, if cast there by shipwreck, he should suffer death, shows the hatred felt by the Greek Cypriotes toward the Jews.

ARTHUR LEGEND: The cycle of stories clustering around the semi-mythical hero King Arthur of England, and which finds its place in Jewish literature in a Hebrew translation entitled ספר השמד הטבלה הענולה ("The Book of the Destruction of the Round Table"), composed in 1279 by an author whose name can not be ascertained. Only a few fragments exist in the Vatican manuscript edited by A. Berliner in "Oẓar Ṭob," 1885, pp. 1–11. These include passages from "The Life of Lancelot" (לנצולוט דל לק), "The Birth of Arthur," "The Quest of the Grail" (ליברו דיל קשטא דיל סנגראאל). The original seems to have concluded with a sermon on repentance, to which the translator refers in his preface as one of his two motives for translating the work, the other motive being to drive away his own melancholy. From the nature of the translation, which includes several Italian words, Steinschneider concludes that the original was in Italian and that the writer lived in Italy. But the source from which the author drew his form of the story is no longer extant; it was obviously merely a short abridgment of the voluminous romance of chivalry out of which the Arthur Legend has been composed. While the book throws no light upon the origin of the legend, or even upon its later literary history, it is interesting for the contrast it presents between the scenes of bloodshed and unchastity that constitute the romance and the Jewish ideals so opposed to these. "The Quest of the Grail," though possibly in its origin a Celtic legend, has become inextricably associated with the Christian sacrament of the mass; and it is therefore extremely curious to find it treated in Hebrew. The translator seems to have felt this, and gives a somewhat elaborate apology for translating it. A Judæo-German version of the legend also exists among the manuscripts in the library of the city of Hamburg.

A. J.

ARTICLES OF FAITH: In the same sense as Christianity or Islam, Judaism can not be credited with the possession of Articles of Faith. Many attempts have indeed been made at systematizing and reducing to a fixed phraseology and sequence the contents of the Jewish religion. But these have always lacked the one essential element: authoritative sanction on the part of a supreme ecclesiastical body. And for this reason they have not been recognized as final or regarded as of universally binding force. Though to a certain extent incorporated in the liturgy and utilized for purposes of instruction, these formulations of the cardinal tenets of Judaism carried no greater weight than that imparted to them by the fame and scholarship of their respective authors. None of them had a character analogous to that given in the Church to its three great formulas (the so-called Apostles' Creed, the Nicene or Constantinopolitan, and the Athanasian), or even to the "Kalimat As-Shahâdat" of the Mohammedans. The recital of this "Kalimah" is the first of the five pillars of practical religion in Islam, and every one converted to Islam must repeat it verbatim; so that among the conditions required of every believer with reference to confession is the duty to repeat it aloud at least once in a lifetime. None of the many summaries from the pens of Jewish philosophers and rabbis has been invested with similar importance and prominence. The reasons for this relative absence of official and obligatory creeds are easily ascertained. The remark of Leibnitz, in his preface to the "Essais de Théodicée," that the nations which filled the earth before the establishment of Christianity had ceremonies of devotion, sacrifices, libations, and a priesthood, but that they had no Articles of Faith and no dogmatic theology, applies with slight modification to the Jews. Originally race—or perhaps it is more correct to say nationality—and religion were coextensive. Birth, not profession, admitted to the religio-national fellowship. As long as internal dissension or external attack did not necessitate for purposes of defense the formulation of the peculiar and differentiating doctrines, the thought of paragraphing and fixing the contents of the religious consciousness could not insinuate itself into the mind of even the most faithful. Missionary or proselytizing religions are driven to the definite declaration of their teachings. The admission of the neophyte hinges upon the profession and the acceptance on his part of the belief; and that there may be no uncertainty about what is essential and what non-essential, it is incumbent on the proper authorities to determine and promulgate the cardinal tenets in a form that will facilitate repetition and memorizing. And the same necessity arises when the Church or religious fellowship is torn by internal heresies. Under the necessity of combating heresies of various degrees of perilousness and of stubborn insistence, the Church and Islam were forced to define and officially limit their respective theological concepts. Both of these provocations to creed-building were less intense in Judaism. The proselytizing zeal, though during certain periods more active than at others, was, on the whole, neutralized, partly by inherent disinclination and partly by force of circumstances. Righteousness, according to Jewish belief, was not conditioned on the acceptance of the Jewish religion. And the righteous among the nations that carried into practise the seven fundamental laws of the covenant with Noah and his descendants were declared to be participants in the felicity of the hereafter. This interpretation of the status of non-Jews precluded the development of a missionary attitude. Moreover, the regulations for the reception of proselytes, as developed in course of time, prove the eminently practical—that is, the non-creedal—character of Judaism. Compliance with certain rites—baptism, circumcision, and sacrifice—is the test of the would-be convert's faith. He is instructed in the details of the legal practise that manifests the Jew's religiosity, while the profession of faith demanded is limited to the acknowledgment of the unity of God and the rejection of idolatry (Yoreh De'ah, Gerim, 268, 2). Judah ha-Levi ("Cuzari," i. 115) puts the whole matter very strikingly when he says: "We are not putting on an equality with us a person entering our religion through confession alone [Arabic original, *bikalamati* = by word]. We require deeds, including in that term self-restraint, purity, study of the Law, circumcision, and the performance of the other duties demanded by the Torah." For the preparation of the convert, therefore, no other method of instruction was employed than for the training of one born a Jew. The aim of teaching was to convey a knowledge of the Law, obedience to which manifested the acceptance of the underlying religious principles; namely, the existence of God and the holiness of Israel as the people of His covenant.

No Fixed Dogmas.

No Need for Creeds in Judaism.

The controversy whether Judaism demands belief in dogma, or inculcates obedience to practical laws alone, has enlisted many competent scholars. Moses Mendelssohn, in his "Jerusalem," defended the non-dogmatic nature of Judaism, while Löw among others (see his "Gesammelte Schriften," i. 31–52, 433 *et seq.* 1871) took the opposite side. Löw made it clear that the Mendelssohnian theory had been carried beyond its legitimate bounds. The meaning of the word for faith and belief in Hebrew (אמונה) had undoubtedly been strained too far to substantiate the Mendelssohnian thesis. Underlying the practise of the Law was assuredly the recognition of certain fundamental and decisive religious principles culminating in the belief in God and revelation, and likewise in the doctrine of retributive divine justice. The modern critical view of the development of the Pentateuch within the evolution of Israel's monotheism confirms this theory. The controversy of the Prophets hinges on the adoption by the people of Israel of the religion of Yhwh, that excluded from the outset idolatry, or certainly the recognition of any other deity than Yhwh as the legitimate Lord of Israel; that, in its progressive evolution, associated with Yhwh the concepts of holiness, justice, and righteousness; and that culminated in the teaching of God's spirituality and universality. The historical books of the Bible, as recast in accordance with these latter religious

Evolution of Judaism.

ideas, evince the force of a strong and clearly apprehended conviction concerning the providential purpose in the destinies of earth's inhabitants, and more especially in the guidance of Israel. The Psalms and Wisdom books manifest the predominance of definite religious beliefs. To say that Judaism is a barren legalistic convention, as Mendelssohn avers, is an unmistakable exaggeration. The modicum of truth in his theory is that throughout Biblical Judaism, as in fact through all later phases of Jewish religious thinking and practise, this doctrinal element remains always in solution. It is not crystallized into fixed phraseology or rigid dogma. And, moreover, the ethical and practical implications of the religion are never obscured. This is evidenced by the Biblical passages that, in the opinion of many, partake of the nature of Articles of Faith, or are of great value as showing what, in the opinion of their respective authors, constitutes the essence of religion. Among these the most noteworthy are Deut. vi. 4; Isa. xlv. 5-7; Micah vi. 8; Ps. xv.; Isa. i. 16, 17; xxxiii. 15.

Discussions and Dogmatism Disfavored.

Whatever controversies may have agitated Israel during the centuries of the Prophets and the earlier postexilic period, they were not of a kind to induce the defining of Articles of Faith to counteract the influences of heretical teaching. Dogmatic differences manifest themselves only after the Maccabean struggle for independence. But even these differences were not far-reaching enough to overcome the inherent aversion to dogmatic fixation of principles; for, with the Jews, acceptance of principles was not so much a matter of theoretical assent as of practical conduct. Though Josephus would have the divisions between the Pharisees and Sadducees hinge on the formal acceptance or rejection of certain points of doctrine—such as Providence, resurrection of the body, which, for the Pharisees, was identical with future retribution — it is the consensus of opinion among modern scholars that the differences between these two parties were rooted in their respective political programs, and implied in their respectively national and anti-national attitudes, rather than in their philosophical or religious dogmas.

If the words of Sirach (iii. 20-23) are to be taken as a criterion, the intensely pious of his days did not incline to speculations on what was beyond their powers to comprehend. They were content to perform their religious duties in simplicity of faith. The Mishnah (Ḥag. ii. 1) indorsed this view of Sirach, and in some degree discountenanced theosophy and dogmatism. Among the recorded discussions in the schools of the Rabbis, dogmatic problems commanded only a very inferior degree of attention ('Er. 13*b*: controversy concerning the value of human life; Ḥag. 12*a*: concerning the order of Creation). Nevertheless, in the earliest Mishnah is found the caution of Abtalion against heresy and unbelief (Ab. i. 11 [12]); and many a Baraita betrays the prevalence of religious differences (Ber. 12*b*; 'Ab. Zarah 17*a*). These controversies have left their impress upon the prayer-book and the liturgy. This is shown by the prominence given to the Shema'; to the Messianic predictions in the Shemoneh-'Esreh (the "Eighteen Benedictions"), which emphasized the belief in the Resurrection; and, finally, to the prominence given to the Decalogue—though the latter was again omitted in order to counteract the belief that it alone had been revealed (Tamid v. 1; Yer. Ber. 6*b*; Bab. Ber. 12*a*). These expressions of belief are held to have originated in the desire to give definite utterance and impressiveness to the corresponding doctrines that were either rejected or attenuated by some of the heretical schools. But while these portions of the daily liturgy are expressive of the doctrinal contents of the regnant party in the synagogue (see Landshuth, in Edelman's "Hegyon Leb"; and LITURGY), they were not cast into the form of catalogued Articles of Faith.

Philo and Akiba.

The first to make the attempt to formulate them was Philo of Alexandria. The influence of Greek thought induced among the Jews of Egypt the reflective mood. Discussion was undoubtedly active on the unsettled points of speculative belief; and such discussion led, as it nearly always does, to a stricter definition of the doctrines. In his work, "De Mundi Opificio," lxi., Philo enumerates five articles as embracing the chief tenets of Mosaism: (1) God is and rules; (2) God is one; (3) the world was created; (4) Creation is one; (5) God's providence rules Creation. But among the Tannaim and Amoraim this example of Philo found no followers, though many of their number were drawn into controversies with both Jews and non-Jews, and had to fortify their faith against the attacks of contemporaneous philosophy as well as against rising Christianity. Only in a general way the Mishnah Sanh. xi. 1 excludes from the world to come the Epicureans and those that deny belief in resurrection or in the divine origin of the Torah. R. Akiba would also regard as heretical the readers of ספרים החצונים —certain extraneous writings (Apocrypha or Gospels)—and persons that would heal through whispered formulas of magic. Abba Saul designated as under suspicion of infidelity those that pronounce the ineffable name of the Deity. By implication the contrary doctrine and attitude may thus be regarded as having been proclaimed as orthodox. On the other hand, Akiba himself declares that the command to love one's neighbor is the fundamental principle of the Law; while Ben Asai assigns this distinction to the Biblical verse, "This is the book of the generations of man" (Gen. v. i.; Gen. R. xxiv.). The definition of Hillel the elder, in his interview with a would-be convert (Shab. 31*a*), embodies in the golden rule the one fundamental article of faith. A teacher of the third Christian century, R. Simlai, traces the development of Jewish religious principles from Moses with his 613 commands of prohibition and injunction, through David, who, according to this rabbi, enumerates eleven; through Isaiah, with six; Micah, with three; to Habakkuk, who simply but impressively sums up all religious faith in the single phrase, "The pious lives in his faith" (Mak., toward end). As the Halakah enjoins that one shall prefer death to an act of idolatry, incest, unchastity, or murder, the inference is plain that the corresponding positive principles were held to be fundamental articles of Judaism.

The Decalogue as a Summary.

From Philo down to late medieval and even modern writers the Decalogue has been held to be in some way a summary of both the articles of the true faith and the duties derived from that faith. According to the Alexandrian philosopher (see "De Vita Mosis") the order of the Ten Words is not accidental. They divide readily into two groups: the first five summarizing man's relations to the Deity; the other five specifying man's duties to his fellows. Ibn Ezra virtually adopts this view. He interprets the contents of the Decalogue, not merely in their legal-ritual bearing, but as expressive of ethico-religious principles. But this view can be traced to other traditions. In Yer. Ber. 6b the Shema' is declared to be only an epitome of the Decalogue. That in the poetry of the synagogal ritual this thought often dominates is well known. No less a thinker than Saadia Gaon composed a liturgical production of this character (see AZHAROT); and R. Eliezer ben Nathan of Mayence enriched the prayer-book with a piyyuṭ in which the six hundred and thirteen commands are rubricated in the order of and in connection with the Decalogue. The theory that the Decalogue was the foundation of Judaism, its article of faith, was advocated by Isaac Abravanel (see his Commentary on Ex. xx. 1); and in recent years by Isaac M. Wise of Cincinnati in his "Catechism" and other writings.

The only confession of faith, however, which, though not so denominated, has found universal acceptance, forms a part of the daily liturgy contained in all Jewish prayer-books. In its original form it read somewhat as follows: "True and established is this word for us forever. True it is that Thou art our God as Thou wast the God of our fathers; our King as [Thou wast] the King of our fathers; our Redeemer and the Redeemer of our fathers; our Creator and the Rock of our salvation; our Deliverer and Savior—this from eternity is Thy name, and there is no God besides Thee." This statement dates probably from the days of the Hasmoneans (see Landshuth, in "Hegyon Leb").

Saadia's, Judah ha-Levi's, and Baḥya's Creed.

In the stricter sense of the term, specifications in connected sequence, and rational analysis of Articles of Faith, did not find favor with the teachers and the faithful before the Arabic period. The polemics with the Karaites on the one hand, and, on the other, the necessity of defending their religion against the attacks of the philosophies current among both Mohammedans and Jews, induced the leading thinkers to define and formulate their beliefs. Saadia's "Emunot we-Deot" is in reality one long exposition of the main tenets of the faith. The plan of the book discloses a systematization of the different religious doctrines that, in the estimation of the author, constitute the sum total of his faith. They are, in the order of their treatment by him, the following: (1) The world is created; (2) God is one and incorporeal; (3) belief in revelation (including the divine origin of tradition); (4) man is called to righteousness and endowed with all necessary qualities of mind and soul to avoid sin; (5) belief in reward and punishment; (6) the soul is created pure; after death it leaves the body; (7) belief in resurrection; (8) Messianic expectation, retribution, and final judgment. Judah ha-Levi endeavored, in his "Cuzari," to determine the fundamentals of Judaism on another basis. He rejects all appeal to speculative reason, repudiating the method of the Motekallamin. The miracles and traditions are, in their supernatural character, both the source and the evidence of the true faith. With them Judaism stands and falls. The book of Baḥya ibn Pakuda ("Ḥobot ha-Lebabot"), while remarkable, as it is, for endeavoring to give religion its true setting as a spiritual force, contributed nothing of note to the exposition of the fundamental articles. It goes without saying that the unity of God, His government of the world, the possibilities of leading a divine life—which were never forfeited by man—are expounded as essentials of Judaism.

Ibn Daud and Ḥananel ben Ḥushiel.

More interesting on this point is the work of R. Abraham ibn Daud (1120) entitled "Emunah Ramah" (The High Faith). In the second division of his treatise he discourses on the principles of faith and the Law. These principles are: The existence of God; His unity; His spirituality; His other attributes; His power as manifested in His works; His providence. Less well known is the scheme of an African rabbi, Ḥananel b. Ḥushiel, about a century earlier, according to whom Judaism's fundamental articles number four: Belief in God; belief in prophecy; belief in a future state; belief in the advent of the Messiah.

The Thirteen Articles of Maimonides.

The most widely spread and popular of all creeds is that of Maimonides, embracing the thirteen articles. Why he chose this particular number has been a subject of much discussion. Some have seen in the number a reference to the thirteen attributes of God. Probably no meaning attaches to the choice of the number. His articles are: (1) The existence of God; (2) His unity; (3) His spirituality; (4) His eternity; (5) God alone the object of worship; (6) Revelation through His prophets; (7) the preeminence of Moses among the Prophets; (8) God's law given on Mount Sinai; (9) the immutability of the Torah as God's Law; (10) God's foreknowledge of men's actions; (11) retribution; (12) the coming of the Messiah; (13) Resurrection. This creed Maimonides wrote while still a very young man; it forms a part of his Mishnah Commentary, but he never referred to it in his later works (see S. Adler, "Tenets of Faith and Their Authority in the Talmud," in his "Ḳobeẓ 'al Yad," p. 92, where Yad ha-Ḥazaḳah, Issure Biah, xiv. 2, is referred to as proof that Maimonides in his advanced age regarded as fundamentals of the faith only the unity of God and the prohibition of idolatry). It did not meet universal acceptance; but, as its phraseology is succinct, it has passed into the prayer-book, and is therefore familiar to almost all Jews of the Orthodox school. The successors of Maimonides, from the thirteenth to the fifteenth century—Naḥmanides, Abba Mari ben Moses, Simon ben Ẓemaḥ Duran, Albo, Isaac

Arama, and Joseph Jaabez—reduced his thirteen articles to three: Belief in God; in Creation (or revelation); and in providence (or retribution). Others, like Crescas and David ben Samuel Estella, spoke of seven fundamental articles, laying stress also on free-will. On the other hand, David ben Yom-Ṭob ibn Bilia, in his "Yesodot ha-Maskil" (Fundamentals of the Thinking Man), adds to the thirteen of Maimonides thirteen of his own—a number which a contemporary of Albo (see "'Iḳḳarim," iii.) also chose for his fundamentals; while Jedaiah Penini, in the last chapter of his "Beḥinat ha-Dat," enumerated no less than thirty-five cardinal principles (see Löw, "Jüdische Dogmen," in "Gesammelte Werke," i. 156 *et seq.*; and Schechter, "Dogmas of Judaism," in "Studies of Judaism," pp. 147–181).

In the fourteenth century Asher ben Jehiel of Toledo raised his voice against the Maimonidean Articles of Faith, declaring them to be only temporary, and suggested that another be added to recognize that the Exile is a punishment for the sins of Israel. Isaac Abravanel, in his "Rosh Amanah," took the same attitude toward Maimonides' creed. While defending Maimonides against Ḥasdai and Albo, he refused to accept dogmatic articles for Judaism, holding, with all the cabalists, that the 613 commandments of the Law are all tantamount to Articles of Faith (see Dogma).

In liturgical poetry the Articles of Faith as evolved by philosophical speculation met with metrical presentation. The most noted of such metrical and rimed elaborations are the "Adon 'Olam," by an anonymous writer—now used as an introduction to the morning services (by the Sephardim as the conclusion of the *musaf* or "additional" service), and of comparatively recent date; and the other known as the "Yigdal," according to Luzzatto, by R. Daniel b. Judah Dayyan.

Modern Catechisms.

The modern catechisms abound in formulated Articles of Faith. These are generally intended to be recited by the candidates for confirmation, or to be used for the reception of proselytes (see Dr. Einhorn's "'Olat Tamid"). The Central Conference of American Rabbis, in devising a formula for the admission of proselytes, elaborated a set of Articles of Faith. These modern schemes have not met with general favor—their authors being in almost all cases the only ones that have had recourse to them in practise. The points of agreement in these recent productions consist in the affirmation of the unity of God; the election of Israel as the priest people; the Messianic destiny of all humanity. The declaration of principles by the Pittsburg Conference (1885) is to be classed, perhaps, with the many attempts to fix in a succinct enumeration the main principles of the modern Jewish religious consciousness.

The Karaites.

The Karaites are not behind the Rabbinites in the elaboration of Articles of Faith. The oldest instances of the existence of such articles among them are found in the famous work by Judah ben Elijah Hadassi, "Eshkol ha-Kofer." In the order there given these are the articles of the Karaite faith: (1) God is the Creator of all created beings; (2) He is premundane and has no peer or associate; (3) the whole universe is created; (4) God called Moses and the other Prophets of the Biblical canon; (5) the Law of Moses alone is true; (6) to know the language of the Bible is a religious duty; (7) the Temple at Jerusalem is the palace of the world's Ruler; (8) belief in Resurrection contemporaneous with the advent of the Messiah; (9) final judgment; (10) retribution. The number ten here is not accidental. It is in keeping with the scheme of the Decalogue. Judah Hadassi acknowledges that he had predecessors in this line, and mentions some of the works on which he bases his enumeration. The most succinct cataloguing of the Karaite faith in articles is that by Elijah Bashyatzi (died about 1490). His articles vary but little from those by Hadassi, but they are put with greater philosophical precision (see Jost, "Geschichte des Judenthums," ii. 331).

K. E. G. H.

The Articles: The thirteen Articles of Faith formulated according to Maimonides in his Mishnah Commentary to Sanhedrin, introduction to ch. ix.—which have been accepted by the great majority of Jews and are found in the old prayer-book—are as follows:

1. I firmly believe that the Creator—blessed be His name!—is both Creator and Ruler of all created beings, and that He alone hath made, doth make, and ever will make all works of nature.
2. I firmly believe that the Creator—blessed be His name!—is one: and no Unity is like His in any form; and that He alone is our God who was, is, and ever will be.
3. I firmly believe that the Creator—blessed be His name!—is not a body; and no corporeal relations apply to Him; and that there exists nothing that has any similarity to Him.
4. I firmly believe that the Creator—blessed be His name!—was the first and will also be the last.
5. I firmly believe that the Creator—blessed be His name!—is alone worthy of being worshiped, and that no other being is worthy of our worship.
6. I firmly believe that all the words of the Prophets are true.
7. I firmly believe that the prophecy of Moses, our master—peace be upon him!—was true; and that he was the chief of the Prophets, both of those that preceded him and of those that followed him.
8. I firmly believe that the Law which we possess now is the same that hath been given to Moses our master—peace be upon him!
9. I firmly believe that this Law will not be changed, and that there will be no other Law [or dispensation] given by the Creator—blessed be His name!
10. I firmly believe that the Creator—blessed be His name!—knoweth all the actions of men and all their thoughts, as it is said: "He that fashioneth the hearts of them all, He that considereth all their works" (Ps. xxxiii. 15).
11. I firmly believe that the Creator—blessed be He!—rewardeth those that keep His commandments and punisheth those that transgress His commandments.
12. I firmly believe in the coming of the Messiah; and although He may tarry, I daily hope for His coming.
13. I firmly believe that there will take place a revival of the dead at a time which will please the Creator—blessed be His name, and exalted His memorial for ever and ever!

According to Maimonides he that rejects any of these articles is an unbeliever, and places himself outside of the Jewish community.

Joseph Albo reduces the articles to three fundamental principles:

1. *Existence of God:* Comprehension of God's unity, His incorporeality, His eternity, and of the fact of His being the object of man's worship.
2. *Revelation:* Comprehension of prophecy, of Moses as supreme authority, of the divine origin and immutability of the Law.
3. *Retribution:* Comprehension of the divine judgment and of Resurrection.

These three principles have, in the main, been adopted also by modern theologians, both conservative and liberal, as the fundamentals of Judaism in the religious instruction of children as well as in the confession of faith to be recited by proselytes; some (*e.g.*, Büdinger) laying especial stress on the immortality of the soul, others (*e.g.*, Stein) on the priestly mission of Israel, or the Messianic hope.

Einhorn posits the following five Articles of Faith:

1. God the Creator.
2. Man in His image.
3. Revelation (through Moses).
4. God the Judge.
5. Israel His priest-people.

The Central Conference of American Rabbis, in 1896, at Milwaukee, Wis., adopted the following four (or five) articles in the "Proselyte Confession":

1. God the Only One.
2. Man His image.

3*a*. Immortality of the soul.
3*b*. Retribution.
4. Israel's mission.

K.

ARTISANS.—In Bible and Talmud: The general term for "artisan" in the Bible is "ḥarash" or "ḥoresh," which, derived from a verb meaning "to cut," is applicable to any worker in a hard substance, such as metal, stone, or wood (compare the use of this term in a general sense in II Kings xxii. 6, xxiv. 14; Jer. xxiv. 1, xxix. 2). At times it is used more definitely of a carpenter (Jer. x. 3; Isa. xli. 7), of a metal-worker (Hosea xiii. 2), or of an armorer (I Sam. xiii. 19). Usually, however, the term is qualified by the addition of the material, as "ḥarash eben," a worker in stone (II Sam. v. 11); "ḥarash 'eẓ," a worker in wood (*ib.*); "ḥoresh neḥoshet," a worker in bronze (I Kings vii. 14); and "ḥarash barzel," a worker in iron (II Chron. xxiv. 12). From the same root is derived "ḥaroshet," skilled work, defined, as above, by the addition of "eben" or "'eẓ" (Ex. xxxi. 5). In traditional literature the terms for "artisan" and "handicraft" are "umman" and "ummanut" respectively (Song Sol. vii. 2, "omman").

Terms.

Leaving to special articles a detailed description of the various crafts and occupations mentioned in Bible and Talmud, it will be sufficient to give here a general summary of specialized occupations, wherein, for completeness' sake, unskilled laborers are included.

Workers in Metal.

The smelting of gold and silver is undoubtedly one of the oldest crafts known to man. The "ẓoref" (Judges xvii. 4; Isa. xl. 19, xli. 7, xlvi. 6; Jer. x. 9, 14, li. 17, and elsewhere) or "meẓaref" (Mal. iii. 2–3), literally "smelter," is the goldsmith or silversmith. The smelting was done in the "kur" (smelting-pot, Prov. xvii. 3, xxvii. 21) or the "maẓref" (*ib.*). In traditional literature the "zahabi," Aramaic "dahabi," "dahabana" (goldsmith), is distinguished from the "kassafi" or "kassaf" (silversmith). Copper and bronze were worked by the "ḥoresh neḥoshet" (Gen. iv. 22; I Kings vii. 14). In the Mishnah he is called "meẓaref neḥoshet" (Ket. vii. 10); in the Talmud "ḥashshala dude" (kettle-smith, Ket. 77*a*; see, however, *ib.*, where "meẓaref neḥoshet" is differently explained). Iron, like gold, was smelted in the "kur" (Deut. iv. 20; I Kings viii. 51; Jer. xi. 4). The "ḥarash barzel" (iron-worker or smith, II Chron. xxiv. 12) is called in traditional literature "nappaḥ" (one who uses bellows) or "peḥami" (one who uses charcoal). Mention is also made of the "ṭarsi" (chaser or embosser; compare Löw, in Krauss, "Lehnwörter," ii. 277*a*; and Jastrow, "Dictionary," *s.v.* טרסי, i.).

The "ḥarash 'eẓ" (worker in wood, Ex. xxxi. 5) is called in traditional literature "naggar," and means "carpenter" as well as "joiner." As specialists in this calling are mentioned the "saddaah" or "saddana" (maker of stocks, Pes. 28*a*) and the "ḳaẓẓaẓ" (feller of trees, Cant. R. ii. 2; Lev. R. xxiii.). Carving is mentioned in I Kings vi. 29, and elsewhere; "kiyyur" (paneling), in traditional literature (B. B. 53*b*).

Workers in Wood and Stone.

Workers in stone were the "ḥoẓeb" (quarryman or stone-cutter, I Kings v. 29), who hewed the stone from the rock, and the "ḥoresh eben" (stone-polisher, II Sam. v. 11). In traditional literature the first is called "ḥaẓẓab," the latter "sattat" (B. M. 118*b*). Those who chisel millstones are called "neḳorot" (Tosef., Ḳid. v. 14; Ḳid. 82*a*); engravers in stone are "pattaḥe abanim" or "mefatteḥe abanim" (Yer. Sheḳ. iv. 48*a*; Kelim xxix. 5).

The "boneh" (builder) is called in traditional literature "bannai" (Kelim xxix. 3; Tosef., Kelim, B. B. vii. 2; Yer. Ḥag. ii. 77*b*; B. M. 118*b*), who is differentiated from the "ardikal" or "adrikal" = Assyrian "dimgallu" (the architect or eyestone-setter, B. M. *l.c.*; Targ. II., Sam. v. 11). The specialized term for wall-builders is "goderim" (II Kings xii. 13) or "ḥarashe eben ḳir" (II Sam. v. 11). To this trade belong the "pison" (mortar-maker, Kelim xx. 2), the "ṭaḥ" (plasterer, Ezek. xiii. 11), and the "sayyad" (whitewasher, lime-burner, Shab. 80*b*).

Workers in Clay, Earth, and Leather.

The "yoẓer" (potter) is in traditional literature "paḥara" (Targ. Isa. xxix. 16). As specialists in this trade are mentioned the "kaddad" (jug-maker, M. Ḳ. 13*b*; Pes. 55*b*, MS.M., ed. כדר), the "godel tannurim" (oven-maker), the "godel kele ẓurah" (art-potter, M. Ḳ. 11*a*; Yer. Shab. vii. 10*d*), and the "ḳaddar" (maker of pots, Tohar. vii. 1). The "zaggag," Aramaic "zaggaga" (glazier, M. Ḳ. 13*b*; Yer. 'Ab. Zarah ii. 40*c*), is specialized into the "nofeaḥ kele zekokit" (glass-blower, Yer. Shab. *l.c.*). Here belongs the "ḥofer shiḥin" (ditch-digger, B. Ḳ. 50*a*). The "bursi" (tanner or hide-dresser; see Krauss, "Lehnwörter," *s.v.*) or "'abbedan" (Kelim xxvi. 8) had as assistant the "shallaḥa" (flayer, skinner, Shab. 49*b*), who prepared the hides for tanning. As specialists in this line are found the "shakkaf" or "ushkafa" (shoemaker, Tosef., Kelim, B. B. i. 15; Giṭ. 68*b*), the "raẓ'an" (belt-maker, Pes. iv. 6), the "sarag" (harness-maker, Kelim xxiv. 8), the "zakkaḳ" (maker of leather bottles, Miḳ. ix. 5), and the "sandelar" (sandal-maker, Yer. Ḥag. iii. 78*d*).

Textile Industry.

In the textile industry a number of crafts are mentioned, such as "ẓammar" (the wool-weaver, 'Eduy. iii. 4; Kelim xxix. 6); "pishtani" (the beater of flax, Yer. Yeb. xiii. 13*c*; Gen. R. xxxii. 3); "ma'azela" (the spinner, Eccl. R. vii. 9); "aẓloya" (the net-weaver, B. M. 24*b*); "ḳiwwaah" (the common weaver, Shab. 113*a*, 140*b*); "oreg" (the weaver, Yer. Sheḳ. v. 49*a*); "gardi" (wool-weaver, Kelim xii. 4); "ṭarsi" (the artistic weaver, 'Ab. Zarah 17*b*; Suk. 51*b*); "sericarius" (the silk-weaver, Pesiḳ. R. xxv.; Cant. R. viii. 11, where the word appears in corrupted form); ẓabba', ẓabba'ah" (the dyer, B. Ḳ. ix. 4; Giṭ. 52*b*); "kobes" and "ḳaẓẓara" (the fuller, Ber. 28*a*; Tosef., Kelim, B. M. iii. 14; Yer. Ber. iv. 7*d*). Connected with this are the occupations of the "ḥayyaṭ" (tailor, Shab. i. 3), the "godel miẓnefet" (turban- or cap-maker, Kelim xvi. 7); and the "ashpara" (clothes-cleaner, 'Ab. Zarah 20*b*).

"Ma'aseh roḳem" (the art of embroidery) and "ma'aseh ḥosheb" (the art of fine weaving) were known and already highly developed in Biblical times (compare EMBROIDERY). Mention is also made of the "saḳḳay" (sack-maker, Kelim xiii. 5), and of the "sarad" or "saddar" (net-maker, Yoma 85*a*; Mek., Ki Tissa; Yalḳ., Ex. 327; Tosef., Ḳid. v. 14).

Workers in Agricultural Products.

AGRICULTURE afforded work not only to the field-laborers but to the "ṭaḥona" (miller, Yer. Peah i. 15*c*), and the "naḥtom" (professional baker, Ḥal. ii. 7). The baker was the "ḳefela" (κάπηλος, restaurant-keeper, Tosef., B. M. xi. 30). The "ḳallay'" parched the grain and offered it for sale, and the "garosah" or "dashoshah" (grist-maker) manufactured different kinds of groats or pearl-barley (Men. x. 4; M. Ḳ. ii. 5). Cooking, in Talmudic times, developed into an art, so that one boasted of knowing a hundred ways of preparing eggs (Lam. R. iii. 16). The "megabben" (cheese-maker, Tosef., Shab. ix. [x.] 13); the "ṭabbaḥ," "ṭabbaḥa" (butcher, slaughterer, or "shoḥeṭ," also professional cook, Beẓah 28*a*; Ḥul. 18*a*; Tosef., Ber. iv. 10), and "ḳaẓẓab" (meat-seller, 'Eduy. viii. 2); the "ḥalitar" (confectioner, Yer. Ḥal. ii. 58*c*); the "sodani" (brewer, Ber. 44*b*), and the "bassam" or "paṭṭam" (manufacturer of spices, druggist, Tosef., Ḳid. ii. 2; Yer. Yoma iv. 41*d*) supplied other necessities of the household. Fish and game were provided by the "ḥaram" (fisher, Yer. M. Ḳ. ii. 81*b*) and the "rishba" (fowler, Ḥul. 116*a*). The hunting of deer is frequently mentioned in the Talmud and Midrashim (Shab. xiii. 5; B. M. 85*b*).

Cattle-raising required the services of a "naḳdud" (herder, Lev. R. i. 9), of a "ro'eh" (shepherd), and of a "karzila" (assistant, B. Ḳ. 56*b*). The "paṭṭam" fattened animals for the market (Tosef., Beẓah, iii. 6). Other occupations dealing with cattle are "ahuryar" (equerry, Meg. 12*b*; differently explained in Jastrow, "Dictionary," *s.v.*), "baham" or "baḳkar" (cattle-raiser and cattle-driver, Deut. R. iii. 6; Yer. Beẓah v. 63*b*), "gammal" (camel-driver), "ḥammar" (ass-driver, Ḳid. iv. 14), and "ḳarar" or "ḳaddar" (carriage-driver, *ib.* Bab. and Yer.; B. M. vi. 1).

Other Occupations.

The demands of personal comfort, which in most instances called for manual labor, though the occupations themselves were scarcely those of Artisans, were filled by the "ballan" (βαλανεύς, bather, Sheb. viii. 5), with his attendants, the "turmesar" (θέρμαι); the "oleyar," "olearius" (clothes-keeper, Yer. Ma'as. Sh. i. 52*d*), and the "udyatha" (the female superintendent of the vapor-baths, Yer. Sheb. viii. 38*a*, "Zosime, the udyatha"); the "sappar" (hair-cutter, Ḳid. *l.c.*), and the "gara'" (barber and blood-letter, Ḳid. 82*a*). The women had their "gaddelet," "godelet," or "megaddelet" (hair-dresser, Kelim xv. 3; Ḳid. ii. 3).

In the interest of landowners worked the "kayyal" (measurer, Yer. B. M. ix. 12*a*), and the "mashoaḥ," "mashoḥaah" (surveyor, Kelim xiv. 3; B. M. 107*b*). The care of the city required the labor of the "ibbola'ah" (gate-keeper, watchman, Niddah 67*b*).

Traffic and communication by land gave employment to the "kattaf" or "sabbal" (load-carrier, B. M. 118*b*; Yer. B. M. x. 12*c*); to the "isḳundara," "baldara," "dawwar," "ṭablara" (the courier, Ḳid. 21*b*; Yer. 'Ab. Zarah i. 39*d*; Esther R. i. 8; Shab. 19*a*; Targ. Prov. xxiv. 34; Pesiḳ. R. xxi.), and to the "ba'al aksania," "ushpizkan," "dayyora," "pundaḳi" (the innkeeper, Pesiḳ. R. xi.; Meg. 26*a*; Ta'an. 21*a*; Giṭ. viii. 9). Communication by water was kept up by the "sappan" (seaman, Sheb. viii. 5), the "mallaḥ" (sailor, Eccl. R. ix. 8), the "mabbora" (ferryman, Ḥul. 94*a*), and the "naggada" (tracker of vessels, B. M. 107*b*). The ship had also an "amodaah" (diver, R. H. 23*a*).

Finally, mention must be made of the "zappat" (pitch-burner, Miḳ. ix. 7); the "diḳulaah" (basket-maker, B. B. 22*a*); the "liblar," "libellarius," "sofer," "safra" (writer), who wrote documents as well as books (Shab. i. 3; Giṭ. viii. 8; 'Ab. Zarah 9*b*); and the "ḳaboraah" (grave-digger, Sanh. 26*b*).

Handicrafts and Women.

In primitive society most of the handicrafts are carried on by members of the family as occasion demands. It is only with the advance of civilization that work becomes specialized and a class of Artisans develops. Thus even in Talmudic times, side by side with specialized craftsmen, a great deal of work was done by the women of the family. The Mishnah Ketubot (v. 5) sheds light on this subject:

> "The following are the things which a wife is under obligation to do for her husband: the grinding, baking, washing, cooking, nursing her children, making the bed, and spinning wool. If she has brought him one maidservant, she needs not be obliged to grind, bake, or wash; if she has brought him two maids, she needs not cook or nurse; if three, then she needs not make the bed or spin wool; if four, then she is at liberty to spend her time sitting in the armchair. R. Eliezer says, Even if she has brought him a hundred maids, she should be forced to spin wool; for leisure leads to idiocy."

Something similar is found a hundred years later (Yeb. 63*a*).

A trade which would necessitate business intercourse with women is looked upon as improper (Ḳid. iv. 14); for every one who deals with women has bad leaven in him, otherwise he would not have chosen such a trade (Ḳid. 82*a*; compare Jastrow, "Dictionary," *s.v.* סור). But, like all theories, this rule was not always carried out in practise; even scholars disregarded it (compare Pes. 113*b*). See also LABOR.

Nevertheless there were several trades regarded unfavorably by popular opinion. This is well expressed by R. Meïr (about the year 140):

> "One should teach his son an easy and cleanly occupation. One should pray to Him to whom riches and possessions belong: for in every trade there is wealth as well as poverty; but neither wealth nor poverty is dependent on the occupation, but rather on the meritoriousness of man" (Ḳid. iv. 14).

And R. Jehudah ha-Nasi (about the year 200):

> "There is no occupation which will disappear from this world. Happy he who has seen at his parents' home a fine trade; but wo unto him who has seen his parents engaged in an unpleasant trade. The world can not get along without a manufacturer of perfumes, neither without a tanner. Happy he whose trade is manufacturing of perfumes; wo unto him who is a tanner" (Ḳid. 82*b*).

Estimation of Certain Trades.

Drivers of asses and camels, shepherds, sailors, wagon-drivers, storekeepers, and crockery-dealers are looked down upon, "for their trades are robbers' trades" (Ḳid. iv. 14; Yer. Ḳid. iv. 66*c et seq.*). The following occupations are also looked upon with disfavor because they bring one into contact with women, and neither king nor high priest should be chosen from among those who follow them—namely, the trades of goldsmith, carder, millstone-chiseler, peddler, weaver, barber, fuller, leech, bath-man, and tanner (Ḳid. *l.c.*).

Gilds.

Classification by trade and the formation of gilds are mentioned in the Bible. Thus, gilds of goldsmiths and perfumers are referred to in Neh. iii. 8. Gilds of potters and weavers seem to be indicated in I Chron. iv. 23. These gilds seem to have been hereditary, similar to the later families of Garmu and Abtinas, who tenaciously retained in their respective families the special knowledge of baking the showbread and preparing the holy incense (Yoma iii. 11). The coppersmiths or embossers had a separate synagogue (Meg. 26*a*; Naz. 52*a*). In Alexandria there was a perfect organization of the various trades. In the synagogue the goldsmiths, silversmiths, smiths, embossers, weavers, etc., sat each in a separate group (Suk. 51*b*). Among some trades there existed also mutual insurance (B. Ḳ. 116*b*). See also AGRICULTURE, BAKING, BATHS, BOTTLE, COOKING, COPPER, COTTON, DYEING, EMBROIDERY, ENGRAVING, FLAX, FULLER, GLASS, IRON, LABOR, LEATHER, METALS, POTTERY, SHIPBUILDING, SPINNING, WEAVING, WOOL.

ARTISANS—Medieval: So far as they were allowed by the restrictions of the trade gilds, many Jews of medieval times obtained their livelihood by working with their hands. Benjamin of Tudela (1171) refers to many manufacturers of silk in the Byzantine empire, to dyers in Syria, and glassmakers at Tyre. A little later King Roger of Sicily brought Jewish silk-weavers to south Italy to found that industry (Grätz, "Geschichte," vi. 263). Indeed, the trade of dyeing seems to have been almost a monopoly of Jews in southern Europe, and was certainly their favorite form of industry, the tax levied on them being called "Tignta Judæorum" (Güdemann, "Culturgeschichte," ii. 312).

The Jewish silk manufacturers of Italy were also distinguished (*ibid.* 240). The Jews of Lyons, when expelled in 1446, established an important silversmith business at Trevoux. In Sicily the Jews appeared to have almost a monopoly of handicrafts, and the authorities in 1492 protested against the edict of expulsion, because, as they said, "nearly all the artisans in the realm are Jews." Among the Jews of Germany and north France in the thirteenth and fourteenth centuries are found masons, tanners, card-painters, armorers, stone-engravers, glaziers, and even makers of mouse-traps, while among the inhabitants of Spain before the fifteenth century were to be found shoemakers, silversmiths, weavers, mechanics, carpenters, locksmiths, basket-makers, and curriers (Jacobs, "Inquiry," pp. xv, xxiii). About 1620 the majority of the Jews of Rome earned their living as tailors (Rieger, "Rom," 198). Among the Artisans mentioned in the inscriptions at the Prague cemetery of the seventeenth century are furriers, carpenters, locksmiths, glaziers, potters, woodcutters, wheelwrights, and wagon-makers (Hock, "Familien Prags"). When it is remembered that many of these occupations could only be filled by persons who had entry to the gilds, which were religious fraternities as well as trade-unions, and did not admit the Jews, there is a remarkable variety of handicrafts in which Jews can be traced during the Middle Ages; see the lists at the end of chapter xii. of Abrahams' "Jewish Life in the Middle Ages."

There is, however, considerable variation in the amount of handwork shown by the Jews in the Middle Ages according to place and time. Where the central government was strong an attempt was made to use the Jews as indirect tax-gatherers, and here very little handwork is found; where, on the contrary, the central government was not all-powerful, the Jews had freer access to the more natural means of earning a livelihood. Of course, throughout Jewish history a certain number of employments in which handwork is required had to exist among them for religious purposes. Thus they require a special class of butchers and even of bakers, while their barbers also have to be acquainted with Jewish custom. That the exclusion from the gilds was the main cause of the relatively small numbers of Artisans among the medieval Jews is shown by the fact that, as soon as restrictions were removed, handicrafts were adopted by the Jews. Thus within fifteen years of the "Judenordnung" of Bohemia, 1797, which opened all occupations to Jews, there were over 400 Jewish Artisans in Prague (Jost, "Geschichte," ix. 167). Ten years after the first Jewish training-school for handicrafts was opened in Copenhagen in 1795, there were no less than 740 engaged in handicrafts out of 1,170 adult males (Jost, *ibid.* xi. 5). See ENGRAVERS, JEWISH, and GOLDSMITHS, JEWISH.

A. J.

——**Modern—Statistics:** Frequent expulsions and increased restrictions on residence during the latter Middle Ages furthered the diversion of the Jews into commerce, and especially into pedling. But during the last two hundred years handicrafts have found favor and have been taken up again, so that to-day out of the 3,000,000 Jews who may be regarded as of working age over 1,000,000 earn their living by manual labor. In the East, Jews are frequently found as Artisans. Those in Morocco include tinsmiths, boot-makers, and carpenters ("maltzan"). In Arabia they occur as armorers, silversmiths, and masons; in Persia, as silk-spinners and glass-grinders (Polak). Chubinsky declares that in Russia "Jews are prized as workmen owing to their zeal and cleverness" ("Globus," 1889, p. 377). He gives the percentage of Jewish Artisans in the southwestern provinces of Russia as forty per cent of the total number of Artisans, and in the cities fifty per cent of the total. At Jerusalem, in 1879–80, Sydney M. Samuel found 416 heads of families pursuing 29 handicrafts, among whom were tinkers, goldsmiths, watchmakers, smiths, turners, and masons ("Jewish Life in the East," p. 78). In 1881 Fresco reports 882 Jews of Damascus earning their living at handicrafts, no less than 650 being weavers (Anglo-Jewish Association, "Report," 1882, p. 78). Among the Russian Jews who passed through Liverpool in 1882, 1,730 out of 1,843 were Artisans and agriculturists (Mansion House Fund, "Report," p. 10). Nor is this a recent development. As far back as 1840, of the 30,000 Jews of Berditchev 600 were tailors, 380 tin- and coppersmiths, 350 shoemakers, 200 carpenters and coopers, 160 furriers, 90 bakers, etc. (Jost, "Geschichte," xi. 294*n*). In view of the anti-Semitic attitude of Rumania, it is curious to contrast in the following list the number of Jews and Gentiles engaged in different trades at Bucharest in 1879 ("Jew. Chron." Sept. 5, 1879):

Occupation.	Gen.	Jews.	Occupation.	Gen.	Jews.
Tinsmiths	61	729	Woodturners	45	61
Tailors	76	689	Cabinetmakers	33	57
Painters	215	354	Bookbinders	41	42
Braidmakers	87	251	Lampmakers	4	48
Silversmiths	48	164	Hatters	17	28
Watchmakers	48	112	Brushmakers	0	18
Coppersmiths	34	65			
			Totals	719	2,618

In an enumeration of the Jews of Kichinev in 1887 ("Ha-Yom," No. 280) very large numbers are given of those engaged in handicraft, among whom may be mentioned:

Cigarmakers	1,117
Tailors	898
Shoemakers	684
Bakers and cooks	299
Seamstresses	452
Fishmongers and butchers	295
Tinsmiths	202
Coopers	136
Capmakers	[illegible]
Glaziers	[illegible]
Sawyers	92
Saddlers	68
Bookbinders	55

The Jews of some of the European capitals have shown considerable taste for handiwork, as is instanced by the following tables:

Occupation.	Budapest, 1870 (Körösi).	Vienna, 1869 (Jeitteles).
Tailors	1,638	505
Shoemakers	316	119
Carpenters	75	59
Turners	23	95
Locksmiths	106	56
Upholsterers	116	58
Painters	140	10
Jewelers	235	170
Watchmakers	57	55
Bookbinders	33	54
Butchers	120	81

By a later census taken in Budapest statistics are furnished of the Jewish Artisans in that capital on Jan. 1, 1900; these are given according to the occupations in which they were engaged, as follows:

Occupation.	Jews.	Jewesses.	Total.
Food preparation	2,480	244	2,724
Clothing	3,610	1,471	5,081
Building	292	1	293
Textile	150	114	264
Pottery	83	2	85
Wood	616	4	620
Metals	2,147	54	2,197
Graphic	909	19	928
Industrial art	582	61	643
Engraving	310	11	321
Leather	188	1	189
Paper	178	41	219
Oil or grease	128	4	132
Dyeing	185	13	198
Miscellaneous	694	2,364	3,018
	12,552	4,404	16,912

In a census of the Jewish Artisans of Algeria, the following were the handicrafts most popular among 10,785 proletarians enumerated ("Revue Socialiste," 1899):

Shoemakers	730
Tailors	554
Workmen	371
Blacksmiths	178
Cigarmakers	131
Coachmen	124
Coachbuilders	111
Carpenters	102
Soapmakers	74
Painters	70
Trimmers	66
Masons	51
Tanners	45
Workers in wood	41
Dyers	39

In only a few instances can complete figures be given, owing to the general absence of any information as to religion in occupation statistics; but the interest of such statistics is the greater from their rarity. The following are, so far as known, the only official figures giving the actual number of Jews engaged in handicrafts, arranged according to countries and cities: though some are of rather early date, it seemed desirable to include them, in the absence of later particulars. Unfortunately, no official statistics on the subject are available for the United States.

Place.	Date.	Number.	Authority.
Algeria	1899	32,875	"Revue Socialiste."
Poland	1857	129,538	Soloweitschik.
Prussia	1861	11,445	Engel.
do.	1895	43,246	"Statist. Jahrb." 1899.
Russian Pale of Settlement	1888	293,507	Jacobs' "Persecution of Jews," 1890, p. 28.
do	1898	395,942	Soloweitschik.
Berlin	1870	3,725	Schwabe.
Budapest	1870	4,791	Körösi.
London	1898	38,000	Soloweitschik.
Vienna	1869	4,378	Jeitteles.

Of the actual trades followed, the most popular are the making of clothing and shoes, just as in the non-Jewish population. The cigar and jewelry trades also are favorite occupations of the Jews; thus over 60 per cent of the diamond-polishers of Amsterdam are of Jewish faith. All these are mainly trades that can be followed at home in the worker's own hours, and are known to the economist as "domestic industries." Jewish workmen drift into these naturally, as thereby they are enabled to refrain from labor on their Sabbath. Besides, the simpler processes of the tailoring and shoemaking trades are easily acquired, and therefore prove attractive to the Russo-Jewish immigrants. This has given rise to much so-called "sweating."

However, it is in Russia especially that the Jews have shown the readiest inclination to manual industries; the large number of nearly 400,000 mentioned in the foregoing table applies only to the fifteen governments of the Russian Pale of Settlement in 1898, and must be supplemented by at least another 200,000 for Poland, where Jews are rapidly taking to manufactures. In 1888, of the Jews of the Pale, 12 per cent. were Artisans, which is a higher proportion than in the general communities of either France or Prussia; and the percentage had increased by 1898.

Despite the fact that there are so many Jewish Artisans, the proportion of Jews earning their living by manual labor is generally much less than that of the general populations among whom they dwell. This is mainly due to the fact that they are concentrated in the towns. The following table gives the percentage of adult workers among the Jews and the rest of the population for the countries and towns mentioned at the time indicated:

Place.	Date.	Jews.	Others.	Authority.
Italy	1870	12.5	22.3	Jacobs.

This table shows by comparison that the percentage of Jewish Artisans in the countries and cities specified averages only one-half of the number of handicraftsmen of other faiths. This is not so much due to any aversion on the part of Jews to manual exertion as to their special attraction to and capacity for commercial pursuits (see COMMERCE). Up to within a few years the Jewish Artisans did not show much inclination to combine and organize themselves into gilds or unions; but recently a large number of trades-unions and benefit societies have been formed by them in Wilna, London, and New York. Jews show a special aptitude for work in which great muscular strength is not required, but are capable of working for many consecutive hours. Their capabilities for higher or finished workmanship is a matter of dispute. In London and New York they have certainly revolutionized the cheap-clothing trade, and by that means seriously affected the trade in second-hand clothing, which was itself until recently a Jewish monopoly. For the actual trades in which Jews engage see HANDICRAFTS, OCCUPATIONS; for the influence on their position see SOCIAL CONDITION, and for the recent attempts to train handworkers see EDUCATION, TECHNICAL.

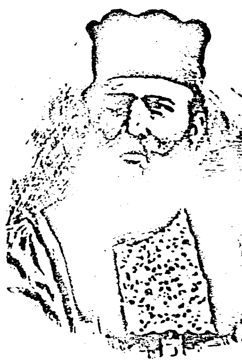
A. J.



Benjamin Artom.

ARTOM, BENJAMIN: Chief rabbi of the Spanish and Portuguese congregation of London; born at Asti, Italy, in 1835; died at Brighton, near London, Jan. 6, 1879. He was left fatherless when a child, and his maternal uncle supervised his early training. His theological education he owed to the rabbis Marco Tedeschi, of Trieste, and Terracini. At twenty he taught Hebrew, Italian, French, English, and German. His first appointment was that of minister to the congregation of Saluzzo near Genoa. While rabbi of a congregation in Naples he received a call to London, where he was installed as chief rabbi of the Spanish and Portuguese congregations of the United Kingdom (Dec. 16, 1866). After a year's stay in England, he became so proficient in English that he could preach in that language with eloquence. Deeply interested in Anglo-Jewish institutions, he directed his attention chiefly to organizing and superintending the educational establishments of his own congregation, the Sha'are Tikvah and Villareal schools. Although of Orthodox views, he welcomed moderate reforms, and endeavored to promote any enterprise tending toward the union of discordant factions. He was author of various odes and prayers in Hebrew, and several pieces of Italian poetry. A selection of his sermons delivered in England was published in 1873.

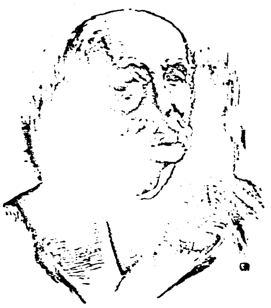
J. G. L.

ARTOM, ISAAC: Italian patriot, diplomat, financier, and author; born at Asti, Piedmont, Dec. 31, 1829; died at Rome Jan. 24, 1900, and was buried at Asti. At the age of sixteen he was ready for the university; but the higher schools of Piedmont excluded Jews, so he, in 1846, removed to Pisa, where he entered the university to study law. At the outbreak of the revolution against Austria in 1848, Artom, despite his frail constitution, joined the students' battalion commanded by Professor Montanelli, and took part in the battles of Curtatone and Montanara. At the close of the war he resumed the study of law, and in 1853 received a doctor's degree from the University of Turin.

In 1855 Artom entered the Foreign Office of Tuscany in the capacity of volunteer, or supernumerary,

Private Secretary to Cavour.

and three years afterward was made private secretary to Count Cavour. Clerical attacks on Cavour included among the charges against him the fact that his chief secretary was a Jew. In reply, Cavour expressed the highest opinion of Artom's ability (Chiola, "Lettere di Camillo Cavour," iii. 306).



Isaac Artom.

On the death of Cavour (June 6, 1861), Artom wished to retire from active political life, but was dissuaded by Count Arese, who, having meanwhile been appointed ambassador to France, induced Artom to accompany him to Paris and to accept the post of secretary of legation (1862). When Pasolini was installed minister of foreign affairs, Artom was appointed chief secretary. Soon after, however, he resumed his diplomatic career, first as counselor of legation at Paris, and later as minister plenipotentiary to Denmark. In 1866, during the peace negotiations with Austria, Artom and General Menabrea were chosen to represent Italy; and on the outbreak of the Franco-Prussian war, in 1870, the former was sent on a diplomatic mission to Vienna. From 1870 to 1876 Artom was again connected with the ministry of foreign affairs, in the capacity of under-secretary of state. He was elected senator of the kingdom, March 23, 1877, being the first Jew to sit in the Italian legislative body.

Artom's Literary Works.

Artom is favorably known as a writer both of prose and of poetry. Of his verses many were inspired by special occasions, his most effective literary effort of this kind being an ode upon the death of Victor Emmanuel (Turin, 1878). Among his prose essays are (1) "Relazione Sugli Studii Superiori nell' Università di Heidelberga" (Bologna, 1868); (2) "Vittorio Emanuele e la Politica Estera"; and (3) a brief record of the Italian ministry of foreign affairs, (published in the "IX Gennaio"). Other publications by Artom include a volume commemorating the death of Victor Emmanuel II., Bologna, 1882; and an Italian translation of Gneist's "Rechtsstaat; Lo Stato Secondo il Diritto; Ossia la Giustizia nell' Amministrazione Politica," Bologna, 1884.

But the most ambitious and by far the most important work of Artom is the biography of his former chief and friend, Cavour. This work, written in collaboration with A. Blanc, and entitled "L'Œuvre Parlementaire du Comte de Cavour," was published in Paris in 1862, and was soon afterward translated into Italian. As senator, Artom prepared two reports—one on the Italian treaty with Zanzibar ("Trattato di Commercio col Sultano di Zanzibar," Rome, 1886); the other on certain commercial and maritime negotiations with France, Spain, and Switzerland ("Facoltà al Governo di Mettere in Vigore il 30 Giugno, 1888, le Convenzioni di Commercio e di Navigazione che Fossero per Concludersi con la Francia, la Spagna, e la Svizzera," Rome, 1888).

s. F. S.

ARTON (formerly **AARON), LÉOPOLD ÉMILE:** French adventurer; born in Strasburg in 1849; settled in Paris in 1871. He was implicated in distributing among statesmen and politicians the bribes of the Panama Canal Company, which sought to secure the authorization of the Chambers for the company's financial operations. During more than four years the name of Arton was on all lips in France. He was many times the object of violent interpellations and stormy debates in both the Chamber of Deputies and the Senate, and was a steady menace to the stability of more than one French cabinet. He fled in 1892; but the French police never really tried to capture him until 1895, when he was arrested (Nov. 16) in London, and extradited. He was convicted by the Cour d'Assises of the department of the Seine (June 27, 1896) of defrauding a dynamite company, and sentenced to six years' imprisonment at hard labor. The judgment was annulled, and the Cour d'Assises of the Seine-et-Marne department condemned him to eight years' seclusion—which was considered less severe than hard labor—Nov. 6 of the same year.

While in prison he produced his famous "Notebook" ("Carnet des 104"), which contained, according to him, the names of the 104 deputies and senators whom he claimed to have bribed. A consequence of his revelation was a new interpellation in the Chamber of Deputies to the minister of justice (March 22, 1897). A legal prosecution was authorized against three deputies, among whom was the former friend of Arton, Alfred Naquet, and one senator. This proceeding reawakened the violent passions believed dead. A new parliamentary *commission d'enquête* was established by the Chambers June 29, in order to investigate the revelations of Arton; and this was followed by a new sensational trial Dec. 18, 1897, which lasted until Dec. 30, and resulted in the acquittal of all politicians accused by Arton, who, a few months later, was himself pardoned.

ARUBOTH: A district, probably in the south of Judah, where the son of Hesed, a commissariat officer of Solomon, had his headquarters (I Kings iv. 10).

J. JR. G. B. L.

'ARUK (ערוך): Hebrew expression for "dictionary," corresponding with the Arabic "ta'alif," and derived from "'arak [millin]" (Job xxxii. 14), "arranged words" (A. V. "directed words").

A Biblical dictionary, under the title "Maḥberet ha-'Aruk" (Composition of the Dictionary), was written by Solomon ibn Parḥon of Aragon in the twelfth century.

A Talmudical 'Aruk was first composed by Ẓemaḥ ben Palṭai, a gaon of Pumbedita, at the close of the ninth century; but only traces of it have been preserved (see Rapoport's biography of Nathan, the author of the 'Aruk, in "Bikkure ha-'Ittim," x. 24; and Kohut's "'Aruk ha-Shalem" [Aruch Completum] I., introduction, xviii.).

The work generally quoted as "'Aruk" is the great Talmudical dictionary composed by Nathan ben Jehiel of Rome, and completed in 1101. (See Nathan b. Jehiel.) Of this greater work different compendia were made later on for the use of larger circles of readers, with the explanation in modern languages of difficult words, under the title "Sefer ha 'Aruk ha-Ḳaẓer" (The Smaller 'Aruk), and were used by Sebastian Münster, Reuchlin, and other Christian scholars. See J. Perles, "Beiträge zur Gesch. der Hebräischen und Aramäischen Studien," 1-112, Munich, 1884.

K.

ARUMAH: A place in Ephraim not far from Shechem, where Abimelech, the judge, took refuge (Judges ix. 41). It has been identified with El 'Ormeh on the hills southeast of Shechem.

J. JR. G. B. L.

ARUVAS (AROVAS), ISAAC: Rabbi and author; son of R. Hananiah Aruvas; lived in the seventeenth century. He filled the office of rabbi in several African communities, and later settled in Venice. He is the author of "Emet we-Emunah" (Truth and Faith), a religious school-book published in Hebrew and in Italian (Venice, 1672). The work contains the 613 precepts and prohibitions arranged in the order of Maimonides' "Sefer ha-Miẓwot," the thirteen articles of faith of Maimonides, a number of ceremonial laws modeled upon those of Joseph Caro; and several ritual laws. It is highly spoken of by Moses Zakut and others. Aruvas was also the author of "Zibḥe Ẓedeḳ" (Thank-Offerings of Righteousness), Venice, 1662, a rhythmical-alphabetical poem on the ritual law of slaughtering, to which are appended commentaries.

G. M. K.

ARUVAS, MOSES BEN JOSEPH: A physician and translator; lived in Cyprus and Damascus in the fifteenth and sixteenth centuries. He translated Aristotle's "Theology," a pseudepigraphic work, from the Arabic into Italian. This translation, made at the request of Franciscus Roseus of Ravenna, became the basis for Nicholas Castellani's Latin book, "Sapientissimi Philosophi Aristotelis Stagiritæ Theologia," which Roseus presented to Pope Leo X. and published in Rome, 1519. Aruvas afterward translated the Arabic text into Hebrew. In this translation there was very little of the original Latin.

G, M. K.

ARVAD (the classical **ARADUS**): A town mentioned by Ezekiel (xxvii. 8, 11) as having contributed materially to Tyre's commercial greatness. Men of Arvad rowed the ships and manned the walls of Tyre. In the genealogical list of Gen. x. 18, and in the corresponding list of I Chron. i. 16, Arvad is given as an offshoot of Canaan, hence the term "Arvadite." The city, now called Ruwad or Ruweida, was built on an island, the very small size of which compelled the building of tall structures. It early gained prominence as a commercial center, and was able to withstand Thothmes and Assurbanipal; but later it became secondary to Tyre, and this was its condition in the days of Ezekiel. It did not, however, lose its prestige and importance, for it is mentioned in I Macc. xv. 23 that Lucius the Consul writes to Aradus ordering it not to oppress the Jews.

J. JR. G. B. L.

ARYEH (אריה, "lion"): A name commonly found among the Jews. The first person known to have borne it lived in the middle of the second century (Pes. 113*b*). His real name, however, was Judah; and "Aryeh," or to give the more exact and fuller form, "Gur Aryeh" (Lion's Whelp), was a complimentary addition to it (borrowed from Gen. xlix. 9).

There is no evidence of any other such use of the word; but among Italian and German-Polish Jews, on the other hand, frequent use was made of Aryeh as a religious name along with the secular names Leo, Leopold, Löwe (Löb, Leib), etc. The form "Gur Aryeh" is quite rare, and is to be found only among the Italian Jews (compare, for instance, Finzi Gur Aryeh, seventeenth century; and Judah Gur Aryeh in Michael's catalogue, "Oẓerot Ḥayyim," MS. 37). Judah and Aryeh often appear as the religious names of persons whose secular name is Leon or the like.

ARYEH LOEB: Dayyan of Lublin, Poland, in the seventeenth century. He was the author of "Liḳḳuṭe ha-Or" (Collection of Light), in two volumes, the second of which, "Ha-Maor ha-Gadol" (The Greater Light), is as yet unpublished. The first, published under the title of "Ha-Maor ha-Katan" (The Lesser Light) at Lublin in 1667, contains a commentary on the laws of "Ḳiddush ha-Ḥodesh" (Consecration of the New Moon), by Maimonides.

ARYEH LOEB B. ABRAHAM PORTSCHINER. See Portschiner, Loeb b. Abraham.

ARYEH LOEB BEN ASHER: A rabbi and one of the most eminent Talmudists of his age; born in Lithuania at the end of the seventeenth century; died at Metz June 23, 1785. He was rabbi in Pinsk, and, later, president of the yeshibah in Minsk. In 1765 he was called as rabbi to Metz, then one of the most important congregations in Europe. His election was confirmed by royal decree October, 1766. While his confirmation was still pending, a serious trouble broke out in the synagogue, which nearly brought about his resignation. He opposed this practise of the congregation: On Pentecost it was customary in Metz to recite the hymn Aḳdamut, after the reading of the first verse of the Pentateuch-lesson. The rabbi objected to this interruption of Scripture-reading, and ordered the reader to proceed, but the trustees defied his authority and insisted on the traditional usage. A violent scene followed, and the rabbi was compelled to leave the synagogue. He never afterward entered it except to deliver his sermons, four times a year; but at the request of members of the congregation who regretted their action on the occasion of the discreditable disturbance in the synagogue, he remained in the rabbinate till his death.

Aryeh Loeb was considered one of the keenest casuists of his time (see Azulai, "Shem ha-Gedolim" *s.v.* "Shaăgat Aryeh"). His yeshibah was well frequented; and he lectured even when, toward the end of his life, he became totally blind. His chief work, "Shaăgat Aryeh" (The Roaring of the Lion), is considered a classic in casuistic literature. It was published at Frankfort-on-the-Oder, 1755; Brünn, 1796; Slavita, 1833; with glosses by Moses Aryeh Loeb ben Joshua of Wilna, Josefow, 1855; and Wilna, 1874, with additions from the author's manuscripts and glosses by his son Asher Loew. In 1781 Aryeh Loeb published a work containing glosses to the Talmudic treatises Rosh ha-Shanah, Ḥagigah, and Megillah, together with miscellaneous casuistic novellæ, under the title "Ṭure Eben" (Rows of Stones). A supplement, containing glosses to Ta'anit, was published at Wilna in 1862 under the title "Geburat Ari" (The Strength of the Lion). Responsa of his are also found in the collection on the divorce-suit of Cleve. He was an advocate of the strictest orthodoxy and a type of the casuist that never can accept any exposition of a passage but the literal sense. When the Talmud, for example, calls Nebuchadnezzar (Ḥag. 13*a*) "the wicked, the son of the wicked, the grandson of Nimrod the wicked," Aryeh Loeb would not accept the explanation that Nebuchadnezzar is called Nimrod's descendant on account of his being of similar character, but insists that Nebuchadnezzar was, on the maternal side, a descendant of Nimrod (see "Ṭure Eben," 19*b*).

Aryeh Loeb is officially called Lion Asser, which means Lion (French for Loeb), son of Asher. His son, who was rabbi of Carlsruhe and died in 1837, called himself Asher Loew. Of Aryeh Loeb's disciples the most notable were: Raphael Cohen, rabbi of Altona, and Ḥayyim, the founder of the rabbinical college of Volozhin.

ARYEH LOEB BEN JACOB JOSHUA: German Talmudist and author; born 1715; died at Hanover March 6, 1789. He was a son of the author of "Pene Yehoshua'," who died as rabbi of Frankfort-on-the-Main 1755. In his youth he was his father's assistant, and taught as such in the yeshibah (academy) about 1745–1750 (see his letters in Israel Lipschütz' responsa "Or Yisrael," No. 57, Cleve, 1770). Subsequently he was called as rabbi to Skala in Galicia, and in 1761 to Hanover, where he officiated until his death. Aryeh edited the fourth part of his father's work (Fürth, 1780), and added to it his own novellæ on treatise Baba Ḳamma under the title "Pene Aryeh" (The Face of the Lion). His own works are of the usual scholastic type. Aryeh was succeeded by his son, Issachar Berisch (1747–1807). A eulogy on him is found in Eleazar Fleckeles' sermons, "'Olat Ḥodesh," Prague, 1793.

ARYEH LOEB BEN SAUL (called also **LEVI SAUL LOEWENSTAM**): Polish rabbi; born in Cracow about 1690; died at Amsterdam April 2, 1755. He came of a famous family of rabbis. His father Saul had been rabbi of Cracow; his grandfather was Rabbi Hoeschl of Cracow. In 1707 he married Miriam, the oldest daughter of Ẓebi Ashkenazi, then rabbi in Altona; and continued his studies under his father-in-law, with whom he went to Amsterdam, and thence to Poland. In the latter country he was elected rabbi of Dukla. Through the influence of his relatives he then obtained the rabbinical position in Tarnopol, the former incumbent having been ousted by the officials of the government to make room for him. This interference on the part of the civic authorities naturally aroused great opposition to him in the congregation, and in a short time Aryeh Loeb was deposed. Subsequently he was elected rabbi of Rzeszow, and later on of Glogau. In 1740 he was called to Amsterdam, where he remained until his death. A call was extended to him from Prague in 1751, but he did not accept it. It is doubtful whether he was rabbi in Lemberg, as stated by Buber ("Anshe Shem," p. 38).

Aryeh did not publish any books, and what there is of his exists in the works of others—as in the responsa of Ẓebi Ashkenazi, No. 76; in those of Mordecai of Düsseldorf ("Maamar Mordecai," Nos. 62, 63, Brünn, 1790), and in the works of his son Saul, "Binyan Ariel" (Amsterdam, 1778)—and shows no originality. He took an active part in the controversy between Jacob Emden and Jonathan Eybeschütz, and sided with the former, who was his wife's brother. His letters on that controversy are full of invectives against Eybeschütz (see Emden's "Sefat

Emet," p. 16, Lemberg, 1877). According to the testimony of his brother-in-law, Jacob Emden (see the latter's autobiography, "Megillat Sefer," pp. 21, 68, Warsaw, 1896), he was a man of mediocre abilities, whose scientific attainments were not above the practical requirements for the rabbinical office. Of his sons, one, Saul Aryeh, was his successor, while the other, who called himself HIRSCHEL LEWIN, was rabbi in Berlin. The son of the latter was Chief Rabbi Solomon Herschell of London. See AMSTERDAM.

ARZA: The steward of King Elah at the palace, in Tirzah, where Elah was killed by Zimri (I Kings xvi. 9).

J. JR. G. B. L.

ARZARETH: The name of the land beyond the great river, far away from the habitation of man, in which the Ten Tribes of Israel will dwell, observing the laws of Moses, until the time of the restoration, according to IV Esd. xiii. 45. Columbus identified America with this land. (See Kayserling's "Christopher Columbus," translated by Dr. C. Gross, p. 15.)

The name, it has been suggested by Schiller-Szinessy, is taken from Deut. xxix. 24–27, "Because they forsook the covenant of the Lord . . . and went and served other gods . . . the Lord rooted them out of their land . . . and cast them into another land [ereẓ aḥeret] as this day." This passage is made to refer (in Mishnah Sanh. x. 3) to the Ten Tribes (compare Tosef., Sanh. xiii. 12; Bab. *ib.* 110*b*; Yer. *ib.* x. 29*c*; Ab. R. N., ed. Schechter, A, xxxvi. 108, and Bacher, "Agada der Tannaiten," i. 143). But different opinions are expressed by Akiba and Eliezer—the traditions are rather confused as to the names—whether the Ten Tribes may be expected to return or not, since this point is not determined in the Scriptural verse. One of them takes the words "as this day" to signify that "as the day goeth, but doth not return, so shall they who are cast off not return"; the other explains the words: "as the day begins with the darkness of the night, but turns into day, so shall the darkness of their banishment be turned into bright daylight" (Mishnah Sanh. *l.c.*). The fourth Book of Esdras took the latter view, which was adopted also by R. Judah ha-Nasi in the Tosefta (*l.c.*), who refers to Isa. xxvii. 13.

J. JR. K.

ASA: 1. A Levite, father of Berechiah; found in the genealogy of the Levites in I Chron. ix. 16. 2. See ASA, THIRD KING OF JUDAH.

J. JR. G. B. L.

ASA (abbreviation of Asayah). — **Biblical Data:** Third king of Judah; son of Abijam and grandson of Rehoboam; reigned 917–876 B.C. (I Kings xv. 7–9). The most important event of his reign was the deliverance of Judah from Baasha, king of Israel, under whom the superior strength of the northern kingdom assumed a threatening aspect. Baasha raised a fortress at Ramah, four miles from Jerusalem; and, in order to secure immunity from his attacks, Asa was obliged to obtain the help of Ben-hadad I. of Damascus, thus involving the Arameans of Syria for the first time in the affairs of Israel. Ben-hadad invaded the most northerly territory of Israel northwest of the Sea of Galilee, and annexed it to his own dominions. The price paid to the Syrian king by Asa was taken from the store of silver in the Temple and the royal palace. Baasha was forced to retire; and Asa, using the material of the ruined fortress of Ramah, built Geba and Mizpah for the defense of his northern frontier (I Kings xv. 16–22). Asa also repelled a raid of Egyptians and Ethiopians under Zerah (Osorkon II.) (II Chron. xiv. 9–15). According to the narrator in I Kings, Asa was a religious reformer, putting down impure worship with an unsparing hand (I Kings xv. 11–15); but, while he was on the whole a wise and successful ruler, the picture given of him is somewhat vague. His religious reforms, more particularly, can hardly have been thorough, in so far as no traces of them are to be observed in the reigns of his successors. See BAASHA and BEN-HADAD.

J. JR. J. F. McC.

——**In Rabbinical Literature:** According to the Rabbis, Asa was one of the five men who were distinguished by certain physical perfections possessed by Adam, but were, on account of their having abused them, afflicted in these very parts of their body. Samson was distinguished by his strength, and behold, "his strength went from him" (Judges xvi. 19); Saul by towering with his neck above the rest, and behold, "he took a sword and fell upon it" (I Sam. xxxi. 4); Absalom by his long hair, and behold, "his head caught of the oak" (II Sam. xviii. 9); Zedekiah by his eyes, and behold, "they put out the eyes of Zedekiah" (II Kings xxv. 7); Asa by his feet (compare as to Adam B. B. 58*a*; Tan., Aḥare Mot, ed. Buber, 3) and behold, "in the time of his old age he was diseased in his feet" (I Kings xv. 23); that is, he was afflicted with gout. And the reason for this affliction of Asa was that, when enlisting the whole of Judah in war he "exempted none" (I Kings xv. 22), but forced also the students of the Law—nay, even newly married husbands, whom the Law (Deut. xx. 7) exempts—to march along (Soṭah 10*a*). [Pirḳe Rabbenu ha-Ḳadosh, v. 14, ed. Gruenhut, p. 72, has ASAHEL the light-footed (II Sam. ii. 18–23) instead of Asa. Compare Pirḳe R. Eliezer liii., where, instead of five, six are mentioned, Josiah being added as the sixth, as boasting of and afflicted in his nostrils (II Chron. xxxv. 22, 23; Ta'an. 22*b*) whereas Tan., Wa'etḥanan, ed. Buber, 1, has seven instead of five.]

The chronological discrepancy between II Chron. xvi. 1 and I Kings xvi. 8 is readjusted by the interpretation that the thirty-sixth year of Chronicles refers to the thirty-six years of the secession of the northern kingdom, which was a punishment for the thirty-six years of Solomon's marriage to the daughter of Pharaoh, and ended in reality in the fifteenth year of Asa's reign, when Zerah the Ethiopian was vanquished by him; the alliance between the kingdoms of Israel and Syria (I Kings xi. 23) also lasted thirty-six years In obtaining an alliance with the king of Syria against Baasha by giving away the gold and silver treasures of the house of the Lord (I Kings xv. 18), Asa sinned grievously, for which Hanani, the seer, sternly rebuked him (II Chron. xvi. 7) (Tosef., Soṭah, xii. 1, 2; Seder 'Olam R. xvi.).

Asa, having contracted a matrimonial alliance with the wicked house of Omri, brought about the decree of Heaven that after forty-two years both the houses of David and of Omri should go down together, which nearly happened in the time of Ahaziah, wherefore the latter is said to have been forty-two years old when he ascended the throne (II Chron. xxii. 2) in contradiction with xxi. 20, and II Kings viii. 26 (Tosef., Soṭah, xii. and Seder 'Olam R. xvii.).

Among the treasures which Asa took from Zerah the Ethiopian, and which Zerah had taken from Shishak (II Chron. xii. 9, compare xvi. 2), there was also the marvelous throne of Solomon upon which all the kings of Judah subsequently sat (Esther R. i. 2); while the other great treasures were given by Asa to the king of Syria to obtain his alliance; then they were taken again by the Ammonites, to be recaptured by Jehoshaphat; then they fell into the hands of Sennacherib, from whom Hezekiah recovered them, and at the capture of Jerusalem they came into the hands of the Babylonians; then into those of the Persians, and afterward of the Macedonians, and finally of the Romans, who kept them at Rome (Pes. 119*a*; compare III Sibyl. 179 and 351; IV Sibyl. 145).

J. SR. K.

ASAD: One of the two Arabian-Jewish rabbis that are said to have instructed the Tobba' Abu Karibah (king of Yemen) in the tenets of the Jewish religion. The name of the other was Ka'b; and both belonged to the tribe of the Banu Ḳuraiza. Tabari ("Annales," i. 902), who relates this incident, adds that they were the most learned Jews of their age. It is, however, noteworthy that older historians, like Ibn Isḥaḳ and Ibn Hisham, do not mention their names (see ARABIA).

AS'AD AL-DIN, YA'ḲUB IBN ISḤAḲ AL-MAḤALLI: Egyptian physician; lived in Cairo toward the end of the twelfth century and at the beginning of the thirteenth. He was born in al-Maḥallah, a city between Cairo and Damietta. Ibn Abi Usaibia, in his history of the Arabic physicians, praises As'ad highly and speaks of him as one of the most renowned scholars and physicians of that time. In 1201 As'ad went to Damascus, where he engaged in many controversies with the local physicians, among whom was Ṣadaḳa ben Munajjah, the Samaritan. He returned to Cairo, where he died.

Ibn Abi Usaibia mentions the following works of As'ad: (1) "Maḳalah fi Kawanin Ṭabiyah" (Treatise on the Canons of Medicine); (2) "Kitab al-Nazh" (Book of Pleasure), on the reflection that the eye beholds in the mirror; (3) "Kitab fi Mizaj Dimashka" (Book Containing Three Treatises); (4) "Masail Ṭabiyah" (Questions of Medicine).

ASAHEL.—Biblical Data: **1.** Son of Zeruiah, sister of David (I Chron. ii. 16). He was noted as a swift runner. As one of the thirty heroes of David (II Sam. xxiii. 24; I Chron. xi. 26), he had command of the army in the fourth month (I Chron. xxvii. 7). After the defeat of the forces of Ishbosheth, he pursued Abner (II Sam. ii. 18, 19). Asahel was, however, killed by Abner, who in revenge was slain by Joab (II Sam. iii. 27). **2.** Father of Jonathan, who opposed Ezra's policy of putting away foreign wives (Ezra x. 15). **3.** A Levite sent by Jehoshaphat to teach the men of Judah the "book of the law of God" (II Chron. xvii. 8). **4.** A Levite assigned by Hezekiah to collect the tithes and offerings in the Temple (II Chron. xxxi. 13).

J. JR. G. B. L.

——**In Rabbinical Literature**: Asahel, son of Zeruiah, was so fleet that he overtook deer; and when he ran over a field of ripening corn, the ears of grain did not even bend, but remained erect as if untouched. When his time had come, however, he could not move an inch, and was slain by Abner (Eccl. R. ix. 11; Yalḳ., Jer. 285). (See JOAB.) To Asahel was applied the verse: "I returned, and saw under the sun, that the race is not to the swift" (Eccl. ix. 11).

J. SR. L. G.

ASAHEL, ḤAYYIM: Rabbi and author who lived in Salonica during the first half of the eighteenth century. He was the son of Benjamin Asahel, the chief rabbi of that city. Ḥayyim Asahel was the author of a Hebrew work entitled "Sam Ḥayyai" (Spice of My Life), a collection of addresses and responsa, which was published after his death by his son Benjamin (Salonica, 1746). He lived for some years at Jerusalem, and was commissioned to collect subscriptions throughout Asia Minor for the poor of Palestine. He died at Smyrna while on this mission.

G. M. FR.

ASAIAH: **1.** A prince of the tribe of Simeon who, with others, attacked and captured Gedor, and settled there (I Chron. iv. 36). **2.** Servant of King Josiah, by whom he was sent, in company with Ahikam, Shaphan, Achbor, and Hilkiah, to inquire concerning the book of the Law that had been found in the Temple (II Kings xxii. 12, 14; II Chron. xxxiv. 20). **3.** A Levite appointed to take part in bringing back the Ark and in the service of song after its return (I Chron. vi. 15 [A. V. 30]; xv. 6, 11). **4.** A Shilonite residing in Jerusalem (I Chron. ix. 5); identical with Maaseiah (Neh. xi. 5).

J. JR. G. B. L.

ASAPH: 1. A son of Berechiah or Berachiah. (See Asaph ben Berechiah.) **2.** The father of Joah, chronicler at the court of Hezekiah (II Kings xviii. 18, 37; II Chron. xxix. 13; Isa. xxxvi. 3, 22). **3.** The keeper of the forests of Artaxerxes, probably in Palestine, in the time of Nehemiah (Neh. ii. 8).

J. JR. G. A. B.

4. Eponym of a musical gild. The name is prefixed as the title of authorship to twelve psalms (l.; lxxiii.-lxxxiii.) in the second and third books of the Psalter. The name appears only in the later historical writings. In the original documents of Ezra and Nehemiah (Ezra ii. 41; Neh. vii. 44—about 400 B.C.) the singers are all designated as "sons of Asaph," and are distinct from the Levites. In Neh. xi. 22, however, the overseer of the Levites at Jerusalem is described as "of the sons of Asaph, the singers." According to the chronicler (about 250 B.C.), the sons of Asaph were Levites, and there were three bands or gilds of singers descended respectively from Asaph Heman (Ps. lxxxviii.) and Ethan (Ps. lxxxix.), or Jeduthun (I Chron. xv. 17, xvi. 41, xxv. 1-6; II Chron. v. 12, xxxv. 15). The chronicler further represents Asaph as a contemporary of David, and as the founder of the gild of Asaphite singers (I Chron. xvi. 4-7; Ezra iii. 10; Neh. xii. 46). See Ethan, Jeduthun, Psalms.

J. JR. J. P. P.

ASAPH ("Mar Rab"): To judge from the title "Mar Rab," he was one of the Geonim (see Gaon), and, presumably, lived about the middle of the ninth century. The name occurs in a Cairo Genizah fragment, whose author was possibly Judah b. Barzilai of Barcelona. This Asaph may be identical with the Asaph who figures as one of the transmitters of the Massorah traditions (anonymous chronicle in Neubauer, "Medieval Jewish Chronicles," i. 174; here אפם is very likely a misprint for אסף); but there are no grounds for connecting him with the physician Asaph.

Bibliography: *Jewish Quarterly Review*, ix. 675-678.

J. SR. L. G.

ASAPH BEN BERECHIAH: One of the captive Levites carried off to Assyria (I Chron. vi. 24 [A. V. 39]), and whom Arabic and later Jewish legend says was Vezir of Solomon (Al-Nadim, "Kitab-al-Fihrist," i. 19; Jellinek, "B. H." v. 23). To him is ascribed a very remarkable treatise on medicine, called "Sefer Asaf," "Midrash Refu'ot," or "Sefer Refu'ot"—probably the oldest treatise of its kind in Hebrew—manuscripts of which exist in the libraries of Florence, Paris, Munich, Vienna (Pinsker 15, fragmentary), London (Almanzi collection; see Steinschneider, "Hebr. Bibl." v. 23), and Oxford. The contents of these manuscripts vary; but, in general, they contain treatises on the Persian months, physiology, embryology, the four periods of man's life, the four winds, diseases of various organs, hygiene, medicinal plants, medical calendar, the practise of medicine, as well as an antidotarium, urinology, aphorisms, and the Hippocratic oath.

The introduction is in the form of the later Midrash, and ascribes the origin of medicine to Shem, the son of Noah, who received it from the angels. The only authorities cited are "the books of the wise men of India," and a "book of the ancients," from which the present work was translated. Mar Mor, the Christian of Salerno; Mar Joseph, the physician; Bonfils, the physician; Rudolf, the physician in Worms; Samuel, the physician, etc., occur in additions made to the Oxford manuscript. Steinschneider and Löw, however, have shown that the list of medicinal plants goes back to Dioscorides; and the aphorisms can only be a working over of the well-known treatise of Hippocrates. In other places, Steinschneider has suspected the influence of Galen.

On the Author's Name.

There are very few indications affording any clue to the author or to the time and place in which he wrote. The author's name varies: "Asaph ha-Yehudi" (Asaph the Jew), "Asaph Ḳaṭan" (Asaph the little), "Asaph ha-Rofé" (Asaph the physician), "Asaph he-Ḥakam" (Asaph the wise man). In the Bodleian manuscript this name is coupled with that of Johanan ha-Yarḥoni, which Fürst takes to mean "of Jericho." In the Paris manuscript (No. 1197, 7) the name reads "Asaph ben Berechiah ha-Yarḥoni" (Asaph the astronomer). In one place in the Bodleian manuscript Judah ha-Yarḥoni is mentioned, and in a later part Samuel Yarḥinaï. A Johanan ben Zabda is mentioned together with Asaph in connection with the Hippocratic oath.

In the quasi-historical introduction, Asaph is placed between Hippocrates and Dioscorides. Rapoport saw in the name Asaph a corruption of either Æsop or Æsculapius, and thought that the author might be identical either with Shabbethai Donnolo or Isaac Israeli. Neubauer ("Orient und Occident," ii. 659, 767) held that Asaph was a Christian of the eleventh century, who wrote originally in Arabic, and whose work was translated into Hebrew from the Latin. The more correct view seems to be that it was translated from some Syriac original, as Steinschneider holds. Hebrew, Aramean, Persian, Greek, and Latin technical terms abound. This would place its composition somewhere in northern Syria or in Mesopotamia, rather than in Palestine, as Zunz thought. In this connection it is interesting to note that Solomon ben Samuel of Urgendsh (Gurgany) makes free use of Asaph's list of plants in the Persian-Hebrew lexicon which he composed in the fourteenth century (Bacher, "Ein Hebräisch-Persisches Wörterbuch," p. 41).

Date of Composition.

The date of composition can only be determined in a general way from the quotations of the work in Jewish literature. Donnolo (born 925 in Oria), if Kaufmann is right ("Die Sinne," p. 150), is the oldest known authority who quotes the work; and till Gedaliah ibn Yaḥya (sixteenth century) there were about a dozen authorities, among them Hai Gaon and Rashi, who mention Asaph's book. The date of composition would thus be in the ninth or tenth century, about the time at which Dioscorides was translated into Syriac. There is a legend that Socrates was a pupil of Asaph (Steinschneider, "Hebr. Uebers." p. 870).

A Latin rendering of a portion of the work is to be found in a Paris manuscript (No. 655, 6), under the title "Distinctio Mundi Secundum Magistrum Asaph Hebræum, Qualiter Terra Permanet Ordinata"; it has been published by Neubauer. Steinschneider suggests that the name occurs in a corrupted form in a Greek manuscript, "Viaticum" (Paris, MS. No. 2241), as 'Ασιψ υἱος 'Ιρακίου.

Bibliography: A complete description of the work is given by Steinschneider in *Hebr. Bibl.* xix. 35, 64, 84, 105. The introduction has been printed by Jellinek in *Bet ha-Midrash*, iii. 155, and the Hippocratic oath by Fuenn in *Karmel*, i. 239, and by Dukes in *Monatsschrift*, viii. 202; compare Steinschneider, *l.c.* A number of quotations will be found in Kaufmann, *Die Sinne*, Index, *s.v.* The Aramaic terminology has been studied by Löw in *Aramäische Pflanzennamen*, p. 24 *et passim*. Compare also Wolf, *Bibl. Hebr.* iv. 789; Steinschneider, *Donnolo* (1868), *passim*; idem, *Jewish Literature*, p. 367; Rapoport, in *Ozar ha-Ḥokmah*, ed. J. Barasch, p. iii. (Vienna, 1856); Zunz, in Geiger's *Jüd. Zeitschrift*, iv. 199, reprinted in his *Gesammelte Schriften*, i. 160; Neubauer, in *Orient und Occident*, ii. 659, 767; idem, *Cat. Bodl. Hebr. MSS.* No. 2138; Fürst, *Gesch. der Karäer*, pp. 24, 139; *Monatsschrift*, vi. 277.

L. G. G.

ASARAMEL: A name of uncertain meaning and intent occurring in I Macc. xiv. 28. The reading, as it has come down, gives it as the name of a place; but it is possible that it really is the name or a title of Simon. In support of the first view it has been suggested that it is a corruption of "Ḥazar 'Am El" (Court of the People of God). Wernsdorf, Grimm, and others see in the word the title of Simon, "Sar 'Am El" (Prince of the People of God).

J. JR. G. B. L.

ASARELAH or **ASHARELAH:** One of the Asaphites appointed by David to the Temple service, according to I Chron. xxv. 2). In verse 14 the same personage appears as "Jesharelah." The readings "Asarelah" and "Jesarelah" (with *s*) seem preferable. The variation in the initial syllable has a parallel in "Jesse," usually written "Yishai" (ישי), but which appears once as "Ishai" (אישי, I Chron. ii. 13). The name itself may be a distortion of Israel plus an emphatic ending "â." See Kittel's note in "S. B. O. T." to Chron. iv. 16.

J. Jr.

ASCALON (ASKELON). See Ashkelon.

ASCAMA (הסכמה; plural **Ascamot**): The name given by Spanish and Portuguese Jewish communities to the laws governing their internal administration. These laws, approved and accepted as binding by the members, called in general "Yeḥidim," were, for the most part, framed upon ancient models. They are a survival, to a certain extent, of the old internal administration of the Jewries of Spain and Portugal. Originally written in Spanish or Portuguese, they have been translated into the respective vernaculars of the countries in which these communities now exist. The ascamot of the English communities, framed in 1664, were translated from the original Portuguese into English in the year 1819. They correspond somewhat to the "teḳanot" of the Ashkenazic communities, though the latter are more limited in their scope, and more like "decisions in council" on certain affairs of communal interest.

Among the Ashkenazim the word "haskamah" (correct form of "Ascama") is used exclusively in the sense of approbation, and is chiefly employed as the name of a permit for the publication of a book. This haskamah or license had to be signed by at least three rabbis. The first instance of this kind of censorship seems to have occurred in 1554 in Italy (see I. Abrahams's "Jewish Life in the Middle Ages," pp. 69 *et seq.*), not for the purpose of stamping the book with any special religious character, but to prevent the publication of any work that was likely afterward to be destroyed by the censor appointed by the Inquisition. It would also serve the purpose of safeguarding the author's copyright. In later times the license was transformed into a recommendation.

Formerly the Mahamad—that is, the governing body of the Sephardic communities—also claimed a similar right to grant the license for any book published under its jurisdiction. Ḥakam David Nieto published his "Maṭṭeh Dan" in London (1714) without any haskamah, but "con licencia de los Señores del Mahamad" (with the license of the Mahamad). In the same manner every local authority claimed the right to grant or to refuse such a license. See Approbation, Censorship.

ASCARELLI, DEBORAH: Italian poetess, and wife of Giuseppi Ascarelli; lived at Venice at the end of the sixteenth and at the beginning of the seventeenth century.

As early as 1560 Deborah was known in Rome as a poetess of talent. She translated into Italian verse the second section of part two of Moses Rieti's "Miḳdash Me'aṭ," which, under the title "Me'on ha-Sho'alim," was recited in the Italian synagogues. This "Tempio di oratori" commenced as follows:

"Tempio di chi chiede em fin perfetto
Di chi ricerca sol gratia e amore
E da vita il tuo fronto benedetto."

It was published in 1601–2 by David della Rocca (Venice, 31 pp.), together with Deborah's translation of Baḥya's "Tokeḥah" (Admonition to the Soul); Rabbenu Nissim's "Longer Confession"; the Sephardic 'Abodah for the Day of Atonement; some original poems of Deborah, and an anonymous poem, supposed to have been written by the editor. The work was intended for liturgical purposes, and contained also the Hebrew originals. Deborah's translations keep close to the Hebrew text, but are spirited and full of real poetic fire. Nothing further is known of her life.

G. I. Br.

ASCARELLI, MOSES VITA (JEHIEL): Physician at Rome; died Dec. 11, 1889. He received his early education at the Talmud Torah in that city, and later studied medicine at the University of Rome. During the cholera epidemic in 1867 he distinguished himself by his disinterested labors, in recognition of which he received a medal from Pope

Pius IX. Ascarelli took an active interest in the organization of the Jewish community in Rome, and was one of the founders of the "Società di Fratellenza," for the dissemination of education among poor Jews and the development among them of a taste for art and the professions.

Amid his many occupations, Ascarelli found time to contribute to Jewish literature, and was a frequent contributor under the pseudonym "Emet le-Ya'aḳob" to the Hebrew journal "Ha-Maggid," for which he wrote many poems and articles on the condition of Italian Jews under Pope Pius IX. Ascarelli translated from Hebrew into Italian the work "Naḥalah le-Yisrael" (A Heritage unto Israel), a responsum sent by the chief rabbi, I. M. Hazan, in connection with a disputed inheritance in the Gallichi family. Ascarelli translated also, from French into Hebrew, under the title "Sefer 'Am Polanim we-Gere Polanim," the work of the Polish poet Mickiewicz, "Le Livre de la Nation Polonaise et des Pèlerins Polonais." He used to preach in the Catalan Synagogue; and one of his sermons has been printed under the title "Panigerico sull' Elezione d'Israele nel Tempio Israelitico di Roma il Sciavuot 5640 [May 17, 1880] per l'Iniziazione alla Maggiorita Religiose del Figlio Angelo Raffaele e altri Giovanelli della Communione."

S. I. Br.

ASCARI or AZKARI, ELAZAR BEN MOSES BEN ELAZAR: Rabbi and author of the sixteenth century; styled by Azulai "Ir we-Ḳaddish" (Angel and Saint); a pupil of R. Joseph Sagis, the colleague of Joseph Caro. He lived at Safed.

Ascari was a founder of the "Sukkat Shalom" (Tabernacle of Peace)—a society devoted to religious meditations—and wrote in its interest in 1585 his work "Ḥaredim" (The Devout Ones), which deals with the three principles of religious devotion: the knowledge of God, the strict observance of His commandments, and penitence. The section on the Commandments deals separately with the mandatory and prohibitory laws, and includes also those that can be observed only in Palestine. In the section on penitence, Ascari expresses his opposition to unnecessary fasting as a means to repentance. The work is permeated by a spirit of broad humanity coupled with humility and holiness.

Although Ascari understood the Cabala, and was personally acquainted with Isaac Luria—whom he describes as "our holy cabalist, on whom the Holy Spirit rests, as he speaks so wondrously"—he can not be counted among the cabalists. Ascari's commentary on the treatise Berakot of the Talmud Yerushalmi was published in the Jitomir edition of the latter work (1866), and was reprinted in I. D. Willawski's new edition of the same.

K. J. L. S.

ASCENSION: The translation to heaven of a few chosen ones, either to remain there in lieu of dying, or merely to receive revelations and then to return to earth. The ascensions of Enoch (Gen. v. 24) and Elijah (II Kings ii. 11) were of the former nature. Among the Babylonians and the classic peoples of antiquity the belief was wide-spread that extraordinarily pious men who had led blameless lives were permitted by God to leave the world without suffering death. The Babylonian legends tell of Xisuthros that he was caught up into heaven because he found favor in the sight of God (Berosus, ed. Richter, 1825, p. 57; Eusebius, [Armenian] ed. Mai, p. 14), and of Etana-Gilgamesh riding on an eagle to heaven, "whence the earth appears as a hill and the sea as a basin" (see Harper, in Delitzsch and Haupt's "Beiträge zur Assyriologie," ii. 391–408; and Jastrow, "Religion of Babylon and Assyria," pp. 520–522); the latter reappears in the Alexander legend (see Yer. 'Ab. Zarah iii. 42*c*; Meissner, "Alexander und Gilgamos," p. 17). The Biblical accounts of the ascensions of Enoch and Elijah do not therefore contradict the different theories on death found in Genesis (compare Death), which latter do not exclude exceptions. In addition to the first two mentioned, other personages are spoken of in post-Biblical accounts as not tasting death (II Esd. iv. 26). The apocryphal literature includes Baruch among such men ("Apocalypse [Syriac] of Baruch," xiii. 3), and so does the rabbinical literature (compare Baruch, in Rabbinical Literature), as well as Ezra (II Esd., end) and Moses ("Assumptio Mosis," x. 12), and this notwithstanding that the latter's death is definitely mentioned in the Bible.

In Rabbinical Literature.

The following list of persons who were taken up into heaven is found in rabbinical literature: Enoch (Biblical); Elijah (Biblical); Eliezer, Abraham's steward; Ebed Melek, Zedekiah's Ethiopian slave, who rescued Jeremiah from death (Jer. xxxviii. 7 *et seq.*); Hiram of Tyre, the builder of Solomon's Temple; Jabez (I Chron. iv. 10 *et seq.*); Serah, Asher's daughter; Bithiah (I Chron. iv. 18); Pharaoh's daughter, the foster-mother of Moses; and of later times the amora Joshua b. Levi, and a grandson of Judah ha-Nasi, whose name is not given (Yalḳ., Gen. 42; Ezek. 367; Derek Ereẓ Zutta i. end; compare Epstein, "Mi-Ḳadmoniyot," pp. 111, 112, and Kohler, "The Pre-Talmudic Haggada" in "Jew. Quart. Rev." v. 417–419). According to the Rabbis, all these personages are in paradise, which in later times was supposed to be heaven; therefore, the Bible may well say that Elijah ascended into heaven; see also Jonah, in Rabbinical Literature.

In addition to these there are others who ascended into heaven temporarily, returning after a time to the earth. The Biblical prototype of these is Moses, who went up unto God in order to receive the Torah; and the later legends mention several pious men, who, like Moses, received instruction and revelation in heaven, accounts of which are given in the apocryphal works The Apocalypse of Abraham, Testament of Abraham, Apocalypse [Greek] of Baruch. In post-Biblical times, also, persons received revelations in paradise. Paul is not the only one who believed himself to have been taken up into heaven; for a generation later the Jews spoke of the four rabbis who entered paradise. Although various attempts were made to interpret this passage

(Ḥag. p. 14*b*; Tosef., *ib.* ii. 3) allegorically or figuratively, as early as the gaon Samuel b. Hophni, who was followed, *mutatis mutandis*, by Grätz in modern times, the expression נכנס לפרדס ("to enter paradise")—exactly corresponding to the phrase נכנס לגן עדן ("to enter the garden of Eden") (compare Ab. R. N. xxv., ed. Schechter, p. 40)—means nothing else than that these four men, Elisha b. Abuyah, 'Akiba, Ben 'Azzai, and Ben Zoma, actually entered into the heavenly paradise.

The Later Midrashim.

Later Midrashim mention the Ascension of Ishmael b. Elisha, said to have been one of the martyrs during the Hadrianic persecutions. These men, together with Akiba and his teacher Neḥunyah b. ha-Ḳaneh, were known in the mysticism of the time of the Geonim as the triumvirate of the יורדי מרכבה ("the riders in the heavenly chariot"). Hai Gaon narrates that during this period a certain class of mystics were able, by various manipulations, to enter into a state of autohypnosis, in which they declared they saw heaven open before them and beheld its mysteries. It was believed that he only could undertake this "Merkabah-ride" who was in possession of all religious knowledge, observed all the commandments and precepts, and was almost superhumanly pure in his life ("Hekalot Rabbati," xiii., xiv., xx.). This, however, was regarded usually as a matter of theory; and less perfect men also attempted by fasting and prayer to free their senses from the impressions of the outer world, and succeeded in entering into a state of ecstasy in which they recounted their heavenly visions.

Ḥasidism.

A more modern form of this kind of Ascension is the עלית נשמה (Ascension of the Soul) of the Ḥasidim. The founder of Ḥasidism, Israel Baal Shem-Ṭob, speaks of his Ascension—a belief that appears still more pronounced among later representatives of that sect, who, in their state of ecstasy, either believed or pretended to believe that they had been caught up into heaven. Compare CABALA, ENOCH, ḤASIDISM, MERKABAH-RIDERS, MOSES.

ASCENSION OF ISAIAH. See ISAIAH, ASCENSION OF.

ASCETICISM: A term derived from the Greek verb ἀσκέω, meaning "to practise strenuously," "to exercise." Athletes were therefore said to go through ascetic training, and to be ascetics. In this usage the twofold application—to the mode of living and the results attained—which marks the later theological implication of the term is clearly discernible. From the arena of physical contests the word easily passed over to that of spiritual struggles; and pre-Christian writers speak of the "askesis" of the soul or of virtue—the discipline of the soul, or the exercise in virtue. But the physical idea, no less than the moral, underlies the meaning of the term in medieval Christian parlance. The monastery, as the place where the required life of abstemiousness is lived under rigorous regulation and discipline, becomes the "asketerion," a word which to the classical Greek conveyed only the notion of a place reserved for physical exercise; while the monks were the "ascetikoi," the ascetics, under discipline attaining unto the perfect practise.

Non-Jewish.

It is thus seen that both the term and the idea which the term expresses are of non-Jewish origin and implications. Judaism can not be said to encourage Asceticism, even in the restricted sense of discipline. Rationalists have indeed affected to construe the ritual legalism of both the Pentateuch and the later rabbinical codes as a disciplinary scheme, devised by God or man with the view of bringing men under rigid restriction of freedom of action, in the satisfaction of the appetites and the control of the passions, to a higher degree of moral perfection. But even before comparative studies had shown that most, if not all, of the so-called disciplinary contrivances of the Mosaic scheme rest on notions altogether other than those assumed, the rigorous constructionists among Jewish theologians put themselves on record as utterly inimical to the ascription of utility, either moral or material, to the divine laws. They were simply divine commandments, and to inquire into their origin or their purpose was forbidden—"Ḥuḳḳah ḥaḳḳaḳti; we'en attem reshuyim leharher aḥareha" (I have decreed the statute; but you are not permitted to inquire into its reasons; Yoma 67*b*; Sifra, Aḥare, xiii.).

At all events, Judaism is of a temper which is fatal to asceticism; and the history of both Judaism and the Jews is, on the whole, free from ascetic aberrations. Fundamental to the teachings of Judaism is the thought that the world is good. Pessimism has no standing-ground. Life is not under the curse. The doctrine of original sin, the depravity of man, has never had foothold within the theology of the synagogue. It never held sway over the mind and the religious imagination of the Jews. In consequence of this the body and the flesh were never regarded by them as contaminated, and the appetites and passions were not suspected of being rooted in evil. The appeal to mortify the flesh for the sake of pleasing Heaven could not find voice in the synagogue.

Asceticism is indigenous to the religions which posit as fundamental the wickedness of this life and the corruption under sin of the flesh. Buddhism, therefore, as well as Christianity, leads to ascetic practises. Monasteries are institutions of Buddhism no less than of Catholic Christianity. The assumption, found in the views of the Montanists and others, that concessions made to the natural appetites may be pardoned in those that are of a lower degree of holiness, while the perfectly holy will refuse to yield in the least to carnal needs and desires, is easily detected also in some of the teachings of Gautama Buddha. The ideal of holiness of both the Buddhist and the Christian saint culminates in poverty and chastity; *i.e.*, celibacy. Fasting and other disciplinary methods are resorted to to curb the flesh. Under a strict construction of the meaning of Asceticism, it is an error to assume that its history may be extended to embrace also certain rites in vogue among devotees to fetishism and nature-worship. Mutilations, the sacrifice of the hair, dietary observances and prohibitions, which abound

Torture of the Flesh.

in all forms of religion at a certain stage of development, do not spring from the notion of the sinfulness of the natural instincts and of life. Nor is the sacrificial scheme in any way connected with Asceticism. The idea of privation is foreign to it. If the offering was a gift to the Deity and as such entailed upon the offerer the parting with something of value, the expectation which animated him was invariably that of receiving rich return. But whatever theory must be accepted in explanation of the various rites of mutilation, and of the sacrificial ritual, certain it is that Judaism from the beginning set its face most sternly against the one, and materially restricted the other. Mutilations for whatever purpose and of whatever character were absolutely prohibited. Funeral horrors and superstitions were not tolerated. The Levitical code restricted sacrifices to one place. The priests only were entrusted with the office at the altar. And, if the Prophets are the truest expounders of the ideals and ideas of the religion of Israel, even the sacrificial and sacerdotal system, with its implications of extraordinary and precautionary cleanliness and physical abstemiousness, was of little vital moment.

Fasting, which plays so essential a part in the practises of ascetics, found official recognition only in the development of the Day of Atonement. The Prophets, again, had little patience with fasting. There are some obscure allusions to fast days of popular observance; but the Prophets of exilic and post-exilic days insist on the futility of this custom. Isaiah (lviii.), while appealing for a broader charity and deeper sense of justice, maintains that these, and not fasting, are the expression of a will sanctified unto God. It is characteristic of the attitude of later Judaism that this very chapter has been assigned for the Haftarah for the Day of Atonement, the one penitential fast-day of the synagogue.

Fasting.

Nevertheless, fasting among the Jews was resorted to in times of great distress. The Book of Esther, of late date, illustrates this for the period included in the Biblical canon. Rabbinical sources prove the growing tendency to abstain from drink and food whenever memories of disaster marked the days of the synagogal calendar, or instant danger threatened the community. In the scheme of the synagogue the one fast-day of the Bible received no less than twenty-two as companions (compare Fasting). Still, it may be doubted whether this multiplication of fast-days can be taken as a sign of an increased tendency to Asceticism. Probably the theory of Robertson Smith ("The Religion of the Semites," p. 413) still holds good to a large extent in explanation of many of the fast-observances of later Judaism, as undoubtedly it does for the voluntary and occasional fast-days mentioned in the historical books of the Bible; namely, that Oriental fasting is merely a preparation for the eating of the sacrificial meal. The rabbinical injunction, not to eat too late a meal on the eve of the Sabbath-day, so as to enjoy all the more that of the Sabbath, tends to corroborate the theory. Perhaps this also underlies the rabbinical report that some examples of rabbinical piety fasted every Friday (in preparation for the Sabbath).

Ascetics in Talmud.

Among the Rabbis some are mentioned as great and consistent fasters. Rabbi Zeira especially is remembered for his fondness of this form of piety. Yet to make of him an ascetic would transcend the bounds of truth. He fasted that he might forget his Babylonian method of teaching before emigrating to Palestine (B. M. 85*a*). The story continues that he abstained from drink and food for the period of one hundred days, in order that hell-fire might later have no power over him. Simon ben Yohai is depicted as an ascetic in the traditions preserved in rabbinical literature. But exposed to persecutions under the Hadrian régime, and often in danger of his life, his whole mind was of an exceptionally somber turn for a Jewish teacher. Moreover, his ascetic practises were not inspired by a consciousness of the futility of this life and its sinfulness, but by the anxiety to fulfil to the letter the Law, to ponder on the Torah day and night. He begrudged the hours necessary for the care of the body as so many precious moments stolen from the study of the holy Law. He envied the generation of the desert who had been fed on heavenly manna, and were thus absolved from the care for their daily bread; an echo of this sentiment may be detected in the petition of Jesus for daily bread (on Simon b. Yohai, see Bacher, "Ag. Tan." ii. 70–149).

Still, with all these seeming leanings to ascetic conduct, these rabbis did not encourage individual fasting. The community in distress did indeed proclaim a public fast; and it was the duty of the loyal member to participate. For he who would not share in the distress would have no part in the consolation of the people (Ta'an. 11*a*). The habitual faster was called a sinner (*ib.*). This judgment was enforced by an appeal to the Biblical text in connection with the "Nazir's" (Nazarite's) expiatory sacrifice (Num. vi. 11). Rabbi Zeira would not permit his disciples to indulge in extraordinary practises of self-restraint, if they presumed thereby to reflect on the piety of others saner than they. The title applied to such an adept at saintly practises is characteristically deprecatory for his attitude of mind: his conduct is declared to smack of conceit, if not of hypocrisy (Yer. Ber. ii. 5*d*).

The attempt has been made to explain the Biblical Nazarites as forerunners of monastic orders addicted to the practise of ascetic discipline. Pentateuchal legislation concerning them shows them to have been merely tolerated. Modern criticism explains their peculiarities as arising from motives other than those that determine the conduct of ascetics. The Biblical Nazirs, forerunners of the Nebi'im (Prophets), were protestants against the adoption of the customs and the religious rites of the Canaanites. In their dress and mode of life they emphasized their loyalty to Yhwh, enthroned on the desert mountain. Wine and the crown of hair were sacred to the gods of the land. Their very appearance emphasized their rejection of the new deities. And in later days the number of those that took the Nazarite vow was exceedingly small. One is inclined to the opinion that no case occurred in which the Pentateuchal provisions became effective.

Essenes not Ascetics.

Nor may the Essenes be classed among the order of ascetics. While some of their institutions, notably celibacy, appear to lend support to the theory that would class them as such, their fundamental doctrines show no connection with the pessimism that is the essential factor in Asceticism. They were political indifferentists; they were but little, if at all, under the sway of national aspirations. They stood for a universal fellowship of the pure and just. They set but little store by the goods of this earth, and were members of a communistic fraternity. But it is inadmissible to construe from these elements of their hopes and habits the inference that in them is to be found a genuine Jewish order of monks and ascetics.

A stronger case against the theory that Judaism is a very uncongenial soil for the growth of Asceticism might be made out by an appeal to the later Jewish mystics, the Ḥasidim and Cabalists of various forms, all ecstatic fantastics, and—this is a point that must not be overlooked—more or less strongly under the influence of distinctly non-Jewish conceits.

Looking upon this life as essentially good, according to Gen. i. 31; upon the human body as a servant of the spirit, and therefore not corrupt; upon the joys of earth as God-given and therefore to be cherished with gratitude toward the divine giver; having a prayer for every indulgence in food and drink; a benediction for every new experience of whatever nature, gladsome or sad—the Jew partook with genuine zest of the good cheer of life, without, however, lapsing into frivolity, gluttony, or intemperance. His religion, that taught him to remember his dignity as one made in the image of God, and to hold his body in esteem as the temple of God's spirit within, a dwelling of the Most Holy, "a host," as Hillel put it, "for the guest, the soul," kept the Jew equidistant from the pole of self-torturing pessimism, from the mortification of the flesh under the obsession of its sinfulness and foulness, and from the other pole of levity and sensuousness. Never intemperate in drink or food, he sought and found true joy in the consecration of his life and all of its powers and opportunities to the service of his God, a God who had caused the fruit of the vine to grow and the earth to give forth the bread, a God who created the light and sent the darkness, a God who, as a Talmudical legend—one of the many with Elijah for their subject—has it, reserves paradise "for them that cause their fellows to laugh" (Ta'an. 22*a*). The most beautiful saying of the rabbis about Asceticism is: "Man will have to give account in the future for every lawful enjoyment offered to him which he has ungratefully refused" (Rab in Yer. Ḳid., at the close); compare Tanḥ., end, "The wicked in his life is considered as one dead," etc.

K. E. G. H.

ASCETICS: While the dominant note of Judaism is optimism, faith in a God who delights in the happiness of His creatures and expects their grateful appreciation of His bounties—see Abstinence—there have, nevertheless, been prevalent in Jewish life certain ascetic tendencies of which the historian must take account. The two great rabbinical schools of the first pre-Christian century, the Shammaites and the Hillelites, debated the question whether life was worth living or not—"ṭob le-adam shenibra mishelo nibra" ('Er. 13*b*), and there was an unmistakable element of austerity in the teaching of many a Shammaite that favored asceticism (compare II Esdras iv. 12). While one teacher would say, "The Shekinah rests on man only amid cheerfulness that comes from duty well performed" (Pes. ii. 7*a*), another held the view that "there should be no unrestrained laughter in this world" (Ber. 31*a*).

Shammaites and Hillelites.

But it was particularly with the view of fitting the soul for communion with God, or for the purpose of keeping the body sufficiently pure to allow it to come into contact with sacred objects, that many strove to avoid things that either cause intoxication or Levitical impurity, the drinking of wine (Lev. x. 9; Num. vi. 3; Amos ii. 12; Judges xiii. 14), or sexual intercourse, which was forbidden to the people of Israel, in preparation for the Sinai Revelation (Ex. xix. 15), and to Moses during the life of communion with God (Deut. ix. 9, 18; I Sam. xxi. 5; Shab. 87*a*). According to this principle the life of the ancient Ḥasidim or Perushim (Pharisees) and Ẓenu'im (Essenes) was regulated. At the same time these devotees of holiness, making "askesis" (the practise of fortitude) their special object of life (see Philo, ed. Mangey, "De Vita Contemplativa," ii. 475, 477, 482), were naturally led to view sensual life as contaminating. Conybeare ("About Philo's Contemplative Life," p. 266) says: "Philo's ideal was to die daily, to mortify the flesh with fasting; he only insisted that the seclusion from social life should take place at the age of fifty, the time when the Levites retired from the active duties of the Temple service" (see all the passages in Conybeare, *l.c.* pp. 265-273, 315).

This was exactly the view of the Essenes and Therapeutæ also, in whatever connection they stood to Jonadab ben Rechab and the Kenites (see Mek., Yitro, 2, regarding "the water-drinkers" (*shote mayim*), as some of these are called). Banus, the eremite saint with whom Josephus passed three years of his life (Josephus, "Vita," § 2), was certainly an ascetic. Likewise were John the Baptist (Matt. iii. 4 and parallels) and the early Christians, Jesus and Paul included, in so far as they shunned marriage as a concession to the flesh (Matt. xix. 10-12; I Cor. vii. 28-38), imbued with ascetic views. It was exactly in opposition to this tendency, so marked in early Christianity, that the Talmudists denounced fasting and penitence (Ta'anit 11*a*, *b*) and accentuated the duty of cheerfulness in the Elijah legend (Ta'anit 22*a*). Upon the destruction of the Temple in the year 70, a veritable wave of asceticism swept over the people, and in tribute to the national misfortune various ascetic rules were instituted (see B. B. 60*b*; Tosefta Soṭah, end; II Esdras ix. 24; compare Bacher, "Agada der Tannaiten," i. 164).

Still, mysticism, which goes hand in hand with asceticism, always had its esoteric circles. Judah ha-Nasi, called "the saint," was an ascetic (Ket. 104*a*). Mar, the son of Rabina, fasted throughout

Mysticism and Asceticism.

the whole year with the exception of the holy days and the eve of the Atonement Day (Pes. 68*b*). For the sake of communing with the upper world, the lower one was despised by the elect few who preserved the tradition of the gnosis and the apocalyptic mysteries. So did the followers of Obadiah Abu-Isa, the Isawites, and of Judah Yudghan, the Yudghanites, at the close of the seventh century and at the beginning of the eighth, the forerunners of the Karaites, and many prominent Karaites themselves lead ascetic lives: abstaining from meat and wine, and spending much of their time in meditation and devotion, partly in order to obtain a deeper knowledge of the Scriptures, partly as mourners over Jerusalem (see Shahrastani, "Book of Religions and Philosophical Sects," Haarbrücker's translation, i. 254-257; Grätz, "Gesch. der Juden," iii. 417 *et seq.*, 446 *et seq.*; Jost, "Gesch. des Judenthums," ii. 350 *et seq.*; Abele Zion and Karaites).

To some extent, therefore, all the mystics of the Middle Ages were Ascetics, assuming or accepting for themselves the title of "Nazarites," or being called by their contemporaries "saints." This is especially true of Abraham b. David of Posquières and his circle in the thirteenth century, whose relation to the beginnings of the Cabala can hardly be denied. Further, the currents of thought which, emanating from India, created Sufism in Persian and Mohammedan circles in the twelfth and thirteenth centuries, exerted considerable influence upon Jewish thinkers, as may be learned from Baḥya, whose ethical system, "Ḥobot ha-Lebabot," oscillates between asceticism and Jewish optimism, with a decided leaning to the former.

Abraham ben Ḥiyya on Asceticism.

Even such thinkers as opposed the ascetic view could not extricate themselves entirely from the meshes of Neoplatonic mysticism, which beheld in the flesh or in matter the source of evil. Thus Abraham ben Ḥiyya strongly refutes the Neoplatonic conception of evil as being identical with matter, and maintains against Baḥya that indulgence in fasting and other modes of penitence is not meritorious, since only he who is ruled by his lower desires may resort to asceticism as the means of curbing his passion and disciplining his soul, whereas the really good should confine himself to such modes of abstinence as are prescribed by the Law. Nevertheless, Abraham b. Ḥiyya claims a higher rank for the saint who, secluded from the world, leads a life altogether consecrated to the service of God. He goes even so far as to advocate the state of celibacy in such cases; referring to the example of Moses—who had to abandon intercourse with his wife when receiving the laws on Sinai—to the majority of the prophets (who were, as he thinks, unmarried), and to Ben 'Azzai (according to Yeb. 63*b*). Like Baḥya, he considers that the ascetic, while leading a purer and holier life, requires less legal restraint (see his "Hegyon ha-Nefesh," ed. Reifman, 16*a*, 32*a*, 37*a*; Rosin, "Ethik des Maimonides," pp. 15, 16; Güdemann, in "Monatsschrift," 1900, pp. 196-216).

Of Asher, the son of Meshullam b. Jacob in Lunel, Benjamin of Tudela ("Travels," ed. Asher, 3*b*) relates as eye-witness that he was an ascetic ("parush") who did not attend to any worldly business, but studied day and night, kept fasts, and never ate meat. His brother Jacob bore the title of Nazarite, having also been an ascetic abstaining from wine (see Zunz's note in Asher's "Benjamin of Tudela," ii. 11, 12; Grätz, "Gesch. der Juden," vi. 240, 241).

Also the whole family of Judah, the "ḥasid" of Regensburg, of the twelfth century, his father, Samuel, and his grandfather, Kalonymus of Speier, grandson of Eliezer the Great of Worms, seem to have been a family of Ascetics (see Michael, "Or ha-Ḥayyim," Nos. 433, 990, 1174, 1200).

The subsequent development and growth of the Cabala produced other forms of asceticism. In fact, the Ḥasid and the Ẓanua' of the medieval apocalyptic literature being a survival of Essenism, ablutions and fasting were resorted to by the adepts of the Cabala as means of attaining communion with the upper world. Some of these Ḥasidim would spend the whole week—without or with interruption, according to their physical endurance—in fasting, rendering only the Sabbath a day of comfort and joy (see Ḥasidism). The object of their penitences and fastings was to bring about the time of divine favor, the Messianic era. Every Messianic movement had therefore Ascetics as leaders, such as were the Shabbethaians (see Grätz, "Gesch. der Juden," iii. 307) and others (see Abraham b. Samuel Cohen of Lask). Others would refrain from eating animal food—*'eber min ha-Ḥay*—and, like the Buddhists or the Pythagoreans of old, live on vegetarian diet. The same is related by Epiphanius of the Dosithean sect.

Maimonides on Fasting, etc.

Against all these ascetic views and tendencies Maimonides raised his powerful voice; and his sober view maintained the upper hand. He admits the wholesome influence on those needing much discipline of the soul of fasting and vigils, of sexual and social abstemiousness, the self-torture of the hermit, and of the penitent who dwells in deserts and uses only coarse haircloth for the covering of his flesh; but he declares the constant use of what can at best be only a remedial measure in abnormal and unsound conditions of life to be a great folly and injurious extravagance.

Maimonides, while adopting the Aristotelian maxim of the golden middle way in all things, finds in the various restrictions of the dietary and marriage laws of the Torah a legislative system of training the people to a sobriety which makes superfluous such asceticism as the monks and the saints of other nations indulge in; nay, sinful indeed, according to the rabbinical interpretation of Num. vi. 11, which says that the priest shall "make an atonement for him [the Nazir] for that he has sinned against the person [in making his vow of abstinence]" (see Ned. 10*a*; Maimonides, "Yad," De'ot, iii. 1, vi. 1).

Jewish hermits, living in a state of celibacy and devoting themselves to meditation, are still found among the Falashas. They claim that Aaron the high priest was the first Nazarite who from the time of his consecration separated from his wife to live only in the shadow of the tabernacle. Accordingly they join the monastic order after they have been married and have become fathers of children (Halévy, "Travels in Abyssinia," p. 230). According to Flad ("Abyssinische Juden," pp. 32 *et seq.*), the order founded by Abba Zebra (Halévy, "Abba Sura") consists altogether of eunuchs. This would indicate non-Jewish influence, of which the Falashas show many traces.

K.

ASCH, ABRAHAM: German rabbi and author; born at Posen; officiated as rabbi of Zell toward the end of the eighteenth century. He descended from a learned family which traced its pedigree to Meïr of Lublin. His father, Joseph, was rabbi of Dessau; and one of his relatives was the scholarly Isaiah Berlin. Asch wrote "Mareh Esh" (The Appearance of Fire), published posthumously by his son, Moses Jacob, in 1803. It contains critical notes on the texts of various Talmudic treatises. Probably Asch is not identical with Abraham Asch, author of "Torah Kullah" (The Whole Law), Berlin, 1796, who agitated against the custom of hasty burials.

ASCHAFFENBURG: Important town on the right bank of the Main in Bavaria. Jews in Aschaffenburg are first mentioned in the thirteenth century, when reference is made to a Rabbi Abraham of Aschaffenburg. In the reports of the persecution which the Jews had to suffer in the year 1349, at the time of the Black Death, Aschaffenburg and its neighboring towns are mentioned. Records exist of Jewish inhabitants in the following towns of the diocese of Mayence, called later the principality of Aschaffenburg: Buchen, Külsheim, Babenhausen, Steinheim, Seligenstadt (1292), Miltenberg (where a large cemetery existed as early as 1336), Amorbach, and Walldürn.
